The construction of the new boat is but an elaboration of that used by the Herreshoffs in their steam yachts for some years. The stem, keel, sternpost and the small amount of deadwood are all of oak. The frames are of angle steel, united by floors at the lower ends, with steel deck beams and gusset plates. A very thorough system of diagonal straps encircles the yacht, steel straps about 2×⅛in. running across the frames, between them and the planking, in each direction, with a special arrangement of diagonal straps on top of the deck beams and under the planking of the deck.

The lower third of the hull is planked with oak and yellow pine in single thickness, 1⅛in., but above this the skin is double, ⅛in. white pine inside and ⅞in. yellow pine outside, the two skins fastened to the frames with composition screwbolts, and to each other between

the frames by brass screws. The deck is of the usual construction, white pine about 3½×1½in., with marine glue in the seams.

The bulwarks are of 1¼in. yellow pine, about 8in. high forward and 6in. amidships, merely rounded on top and with no cap or rail. The coamings are of mahogany, there being a forehatch, to the forecastle, a skylight over the main cabin, the main companionway, and abaft it a very narrow skylight over the ladies' cabin. Just abaft this skylight is an oval coaming of bent oak about 6in. high, inclosing a space of deck about 8ft. 6in. long and 6ft. wide, in the center of which is sunk a cockpit about 4ft. 6in. long by 3ft. wide and 1ft. 6in. deep. Just outside and abaft this coaming is the head of the bronze rudder stock, with its swiveled brass socket for the short locust tiller. About 1ft. from the taffrail is placed a mainsheet traveler, with a second one some 4ft. forward.

On the forward deck are two heavy gammon irons, about 6ft. apart, each with an eye on top. To starboard is a hawsepipe, and in the bulwarks along the side are three or four brass leading chocks. The deck cleats are all of hollow brass, the pattern being by no means graceful. On each bow is an outrigger for the jib sheet. Just forward of the mast is a brass screw plate in the deck for the purpose of dropping the spinaker boom in order that it may clear the forestay. One of the Herreshoff patent compound capstans is placed on the fore deck between the hatch and the heel of the bowsprit. The fittings throughout, in the way of metal work, are eminently businesslike; strong, serviceable and well placed, and Wasp is likely to gain as much from perfection of detail as Gloriana certainly did. The main and spinaker boom gooseknecks will form part of a strong brass collar turning freely about the mast in an angle iron ring, and carrying a number of belaying pins.

The sail plan of Wasp will be similar to Gloriana's, of 4,137ft. by Seawanhaka rule, but with some 300ft. more canvas. The spars will be somewhat larger all around, but the principal increase will be in the masthead, which will be 12ft., or 3ft. longer than Gloriana's. The many novel features of the older boat will appear in the new one; the battens in the mainsail, the peak halliards of wire and manilla, the former coming into use when the peak is fully set; the shifting jig that may be clapped on to any halliard, by which the usual peak jig is dispensed with. The three chain plates are inside the skin, fastened to the steel frames, thus dispensing with the channels so indispensable to the other 46-footers.

The interior is handsomely finished in butternut, the planning being much the same as in Gloriana. With moderate beam, full fore and aft lines above water and the steel framing, there is a very large amount of space compared with the other boats of the 46ft. class. The forecastle is long, light and roomy, extending a couple of feet abaft the mast; abaft it on the starboard side is the captain's room, about 6ft. 3in. long and of good size. Opposite to this is the pantry on the port side, with space for a passage, and adjoining the main saloon is a toilet room and w. c. The main saloon is a fine large room for such a craft, about 8ft. long, the next 3ft. being given up to the steerage, with companion ladder in the center, a second toilet room to starboard and wardrobe to port, besides the latter being the passage to the after stateroom, arranged with the usual two berths. Below the floor is a depth of about 4ft. for water tanks, spare gear, etc.

The arrangements for launching were as novel as all else about the boat, the conventional appliances, bilgeways, cradles, poppets and chains being entirely absent, while the ground ways, which usually play a most important part, were merely auxiliary. Down the full length of the slipway and exactly in the center heavy ways of yellow pine, two sticks 8×9in. bolted side by side, had been laid and well greased. On them at the upper end was a wide 4in. plank laid flat, with guards bolted to each side to keep it on the ways. Across this plank rested another, about 8in. thick, each end of it resting on the regular groundways, from which the launching is commonly done. On this cross plank stood the lead keel of the yacht, probably 20in. wide on the bottom, the space between the keel and other plank being filled with oak wedges until the whole weight rested on the fore and aft plank. From each end of the cross plank, just over the ground ways, ran up three planks, making a sort of cradle, not quite touching the sides of the yacht, but ready to steady her should she list slightly.

A large jackscrew lay on the bottom of the slip, the head resting against the fore-and-aft plank, and to the latter was made fast a new 4in. line. This line ran up around a couple of chocks bolted to the floor of the shop, then around a third chock and back beside the yacht, where it was neatly faked off in coils on a part of the floor specially boarded off for it. Between the last chock and the coils a temporary compressor was rigged, an oak block bolted to the floor with a stout oak lever above it, the line being led between the two.

At a little before 9 A. M., with the tide nearly at its neight but still hurrying up the bay, the yacht was all clear, held only by the dog shores. The designer, Mr. N. G. Herreshoff, quietly took his place at the compressor, a man stood by the jackscrew, and a couple more, with pails of water, stood over the two leading chocks. A single turn of the screw after the dog shoers were down served to start the yacht, and she quickly gained headway. Mr. Herreshoff threw his weight on the lever as the coils jumped out of the box and the line smoked by the chocks, and her speed was lessened until, when half out of the big doors, she stopped quite still for a moment, then of herself resumed her way and after running slowly for a short distance she reached the end of the ways and dropped easily off and into the water, the sliding ways and shores dropping clear and floating away from her.

There was the usual cheering, but no champagne over the bows, no colors and no formal christening, though the gilt letters on her archboard proclaimed her to be "Wasp, New York, N. Y."

In launching trim she showed about 12in. of her paint line forward and 6in. aft, and though it was impossible to locate the true loadline, from all appearances she will trim very nearly as she should when her spars and gear are shipped. Mr. Rogers has not yet seen her, having never visited Bristol since she was begun.

NEWS NOTES.

We call attention to the advertisement of Messrs. S. S. Thorpe & Co., sail, tent and flag makers, who are making a specialty of flags of all kinds. They carry in stock the flags of all nations, in addition to U. S. ensigns, yacht ensigns, U. S. jacks and the International code signals. They have lately issued a very complete catalogue in colors of private burgees for ships, steamers, yachts and all classes of vessels.

Rifle Range and Gallery.

The Lischke Rifle Club.

THE practice scores for this week are as follows:

J Scharly	25	24	24	23	23	22	22	21	21	20—225

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest on Feb. 25 at McCune's shooting gallery, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 200. Scores as follows:

H S Burley	170	Thos Ford	264	J Hoser	254
W J Gibbs	268	C A Hankle	262	R Taylor	254
Geo McCune	268	M Tatro	257	G L Cutler	252

C. A. HANKLE.

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

EXCELSIOR RIFLE CLUB, Jersey City, Feb. 23.—The scores made to-night in the weekly competitions for class medals were, 10 shots off-hand, 25-ring target, possible 250:

Wm Weber	25	25	25	24	24	24	24	23	23	23—240
C Bauchle	25	25	25	24	24	24	23	23	23	21—237
W J Channing	25	25	25	24	24	23	23	23	22	21—235
W H Hallowell	25	25	24	24	24	23	23	23	23	21—234
W J Hennessy	25	25	24	24	24	24	23	22	21	21—234
J Speicher	25	25	24	24	23	23	22	22	21	20—231
Thos Hughes	25	24	24	24	23	23	22	22	22	20—229
G C Varick	25	24	24	23	23	23	22	21	21	20—226
C Boag	25	24	24	23	23	22	21	21	20	20—223
J Hughes	25	25	23	23	22	22	21	21	20	20—222

The medal winners were Class A, Wm. Weber with a score of 240; Class B, Chris Bauchle with a score of 237; Class C, G. C. Varick, 226. The club is jubilant over securing first prize in the late Zettler Rifle Club's open to all team shoot. Chris Bauchle is feeling good now, as the rifle he recently purchased is doing better work than he ever expected it would, and is consequently rolling up good scores with her. Geo. C. Varick, or Genial George, of flash light fame, has returned from an extended trip through the South, where he has been transacting some business. As yet he has not donned his old-time shooting clothes, but George will come around in a short time the Excelsior boys say.

As yet no dates have been set for the series of best two out of three 10-men team matches between the Jefsen Rifle Club, Capt. "Billy" Jefsen, and the Palisade Rifle Club, Capt. "Jack" Reinhardt. Both clubs' headquarters are situate on Jersey City Heights, and the series of matches will determine which club holds the best team. The first match will take place on the Palisade's range, 354 Palisade avenue. Both clubs have an army of rooters, and both matches will no doubt find many witnesses, and will further settle all arguments as to which club possesses the strongest team.

The new rifle club which was to have been organized at Secaucus last week has as yet not been started. George Bergkamp, a crack with both the gun and rifle, is actively engaged in having the proposed club come together.

The Palisade Rifle Club is refurnishing its headquarters, on Palisade avenue, Jersey City Heights.

MILLER RIFLE CLUB, Hoboken, Capt. Richard W. Dewey, Wednesday, Feb. 24, 10 shots off-hand, 25-ring target, possible 250. The scores made in the medal competitions to-night were:

First Class.

D Miller	25	25	25	25	25	24	23	23	23	23—241

GREENVILLE RIFLE CLUB.—Capt. W. H. Robidoux, Friday, Feb. 19. The scores made to-night in the weekly medal competition were, 10 shots, off-hand, 25-ring target, possible 250:

C Scheelein	25	25	25	24	24	23	23	23	23	23—238
C Boag	25	25	24	24	24	24	23	23	22	20—234
J Boag	25	25	24	24	23	23	23	22	22	20—231
Capt W H Robidoux	25	25	24	23	23	23	23	22	22	21—231
Geo Purkess	25	24	24	24	23	23	23	21	21	20—228
C Barr	25	24	24	25	25	23	22	21	20	20—225
H Gotthardt	25	24	24	24	22	22	22	20	20	20—223
J Cook	25	24	24	23	23	22	21	20	19	18—220
J Hill	25	24	23	23	22	22	20	20	20	19—218
H Spohn	25	24	23	22	21	20	20	19	19	19—212

The medal winners were: First class, C. Scheelein 238 and C. Boag 234; second class, H. Gotthardt 223 and J. Cook 220; third class, Geo. Purkess 228 and C. Barr 225.

A handsome trophy has been purchased by the FOREST AND STREAM. It will be presented to the winning club in the championship tournament now raging fiercely among the New Jersey rifle clubs. An illustration will be given in these columns in a week or so. It is an artistic piece of silverware which will be looked upon with pride by the victorious club. It will be properly inscribed, explaining when it was won, also explaining who won it and who the donors are.

Match shooting has taken quite a boom in Hoboken; quite a number of matches have been shot lately. The latest one was between Judge Geo. F. Seymour and John R. Havens, and Louis Thiebault and Counsellor Jacob Bretzfeld. The latter were defeated. Each man fired 50 shots. The scores were:

Geo F Seymour	238	240	238	240	239—1195
John R Havens	245	242	232	242	243—1203—2398
L Thiebault	240	244	244	240	241—1209
J Bretzfeld	231	238	234	236	239—1178—2387

Frank Vanderheyden, of the late Standard Rifle Club, is soon to be married.

The festival of the Miller Rifle Club will be a monster affair, the members say.

The prize shoot arranged by George W. Graf, of the Palisades for the benefit of John Casper, a fellow member, which turned out to be a most successful one financially, took place at the headquarters of the club, 354 Palisade avenue, Jersey City Heights. The first prize, a handsome smoking case, was won by Secretary C. E. Bird, of the Hudson Rifle Club, of Marion, with scores of 74, 74; total, 148. The second prize, a handsome field glass, was won by Lieut. Adolph Malz, of the Palisades, with scores of 73, 73; total, 146. At the close of the shoot a match took place between Messrs. Bird and Malz, each man firing fifty shots. Mr. Bird was defeated by these scores: A. Malz, 231, 235, 233, 237, 234; total, 1,170. C. E. Bird, 233, 235, 232, 234, 231; total, 1,165. A. Steuber, of the Jefsen Rifle Club, and A. Malz then shot a match at short range, in trick and fancy shooting. The two experts in this line were evenly matched. The targets had a ¾in. bullseye. The shots done were looking glass, hip shots, leaning backward over shoulder with glass, shooting with rifle held in every conceivable position. Steuber was defeated by his inability to light a parlor match, which Malz accomplished. A match followed between Henry Boddy and Geo. W. Graf; the latter won, the scores made being: Boddy, 237, 234, 231, 236, 238; total, 1,176. Graf, 235, 233, 238, 236, 239; total, 1,176.

OBITUARY.

Frank G. Kittridge, president of the Excelsior Rifle Club, Jersey City, died at his home in Jersey City of typhoid pneumonia last Friday evening, after an illness of two weeks. Mr. Kittridge had a large acquaintance among riflemen both in New York and New Jersey. Frank was a skillful marksman, and his genial manner brought him many friends. He has been a member of the club for the past two years, and his death deprives the Excel-

siors of a fine shot, a loved companion and a most conscientious and painstaking officer. Rifle shooters and readers of FOREST AND STREAM will deplore the death of genial, whole-souled Frank Kittridge, who had not an enemy in the world. The Excelsior Club met last Saturday evening and framed appropriate resolutions regarding their president's death.

The Beideman Rifle Club.

BEIDEMAN, N. J., Feb. 23.—The following named gentlemen met on Saturday last at the club house at Beideman's station, some six miles above Philadelphia, on the Camden & Amboy R. R., and formed the Beideman Rifle Club: President, Edwin McCoy; Vice-President, J. L. Wood; Treasurer, G. W. Bosler; Secretary, Walter Gilbert; and the following members: E. L. Gardiner, Chas. Meyner, J. C. Wurfflein, Alfred Yergey, Harry Myers, Wm. Reimold. The club grounds comprise a fine club house, heaving a range of 21yds., and an outside range of 200yds., is finely situated on the banks of the Delaware River, where plenty of sport of all kinds can be had at all seasons of the year, several of the members owning fine yachts and row boats. The initial shoot of the members was at 21yds., on Min. ring target, 10 shots off-hand, with the following result:

E L Gardiner	23 24 23 24 24 23 25 24 24 23—237
W Gilbert	25 24 21 24 23 22 22 22 23 23—229
J L Wood	24 25 24 21 21 24 20 23 22 24—224
Ed McCoy	25 25 24 22 22 23 21 21 21 21—224
J Bosler	22 20 25 21 23 24 21 22 20 21—216

Wurfflein Rifle and Pistol Club.

PHILADELPHIA, Feb. 13.—The regular weekly scores of the members of the Wurfflein Rifle and Pistol Association for week ending Feb. 26, at 25yds. off-hand ring target, using Wurfflein rifles, as follows:

J J Mountjoy	25 23 25 24 24 25 24 25 25 24—244
H J Mebard	25 25 23 24 24 25 24 24 25 24—243
E Travis	24 23 25 25 24 25 24 23 25 24—242
J G Dillin	22 24 24 25 22 25 25 24 24 23—238
W Wurfflein	22 23 24 23 25 25 25 22 25 24—238
S W Coulston	25 22 25 23 25 24 25 22 24 22—237
Dr Gardiner	22 21 24 23 24 23 25 24 24 24—234
Leslie Wood	23 23 24 24 23 20 24 24 24 25—234
A J Yergey	21 25 19 23 25 24 25 24 24 24—234
H O Dubbs	21 23 24 23 25 19 25 23 24 25—234
J C Wurfflein	21 22 25 24 21 23 24 24 22 25—231
E C Goddard	25 25 24 23 17 25 25 23 18 22—227

The Empire Rifle Club.

NEW YORK, Feb. 24.—The following scores were made by the Empire Rifle Club at headquarters, 12 St. Marks place, at their weekly shoot: Wm. Rosenbaum 231, B. Zahn 238, C. Zettler, Jr., 233, H. Zettler 230, W. Miller 224, G. Hillmeyer 222, W. Fetzer 218, H. Fetzer 198.

Trap Shooting.

All ties divided unless otherwise reported,

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

March 3.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.

March 3.—Ed. Hill vs. M. H. Rupell, 100 live birds, at Milford, N. J.

March 4.—Ed. Hill vs. M. H. Rupell, 100 bluerocks, at Frenchtown, N. J.

March 4.—Crescent Gun Club monthly shoot, at Dexter Park, Long Island.

March 4.—Kleinz, Sheets, Rothaker and Greenfield, 100 live birds each, at Gentlemen's Driving Park, Philadelphia, Pa.

March 5.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

March 5.—Amateur Gun Club, weekly shoot at artificials, Newark, N. J.

March 5.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

March 5.—John Erb's Old Stone House grounds, live bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J.

March 5.—Sweepstake shooting at Watson's Park, Burnside, Ill.

March 5.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

March 5.—Boiling Springs vs. Union Gun Club, team match, at Rutherford, N. J.

March 5.—Notman vs. Starkey, 21 live birds each, for $50 a side, at Streator, Ill.

March 5.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

March 9.—Atlantic Rod and Gun Club, monthly shoot at West End, Coney Island.

March 9.—Parkway Gun Club, monthly shoot at Dexter Park, Long Island.

March 9.—Ed. Hill vs. M. H. Rupell, 100 live birds, at Yardville, N. J.

March 10.—Newark Gun Club, monthly prize and open shoot, at live birds, John Erb's, Bloomfield avenue, Newark, N. J.

March 15.—Class vs. Helgins, 100 live birds each, for $200, at Dexter Park, Long Island.

March 15-16.—Union Gun Club tournament, one day at targets, second day at live birds, Springfield, N. J.

March 17.—Essex Gun Club, monthly prize shoot, at live birds, for members only, Jersey City Heights Gun Club grounds, Marion, N. J.

March 17.—Third monthly shoot of the Connecticut Shooting Association, under management of New London Gun Club, at New London, Conn.

March 19.—Open sweepstake, open to all, 15 live birds, $10 entry, birds extra. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J.

March 24.—Emerald Gun Club, at Dexter Park.

March 24.—Grand sweepstake, open to the world, 25 live birds, $20 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J. Begin at 1 o'clock P. M.

March 29 31.—Wilmington Gun Club tournament, at Wilmington, Del.

March 30.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

April 7-8.—Union Gun Club tournament, at Springfield, Ohio.

April 12.—Passaic City Gun Club vs. Boiling Springs Fish and Gun Club, team match at Passaic City, N. J. Open sweeps before and after the team match.

April 15.—Fourth shoot of Connecticut Shooting Association, at Union Grove, Hartford, Conn.

April 19-20.—Eagle Grove Gun Club tournament, at Eagle Grove, Ia.

April 19-21.—Elk Park Shooting Tournament, two days at artificials, third day at live birds, Royersford, Pa. Address H. E. Buckwalter, Royersford, Pa., or Harry Thurman, Germantown, Pa.

April —.—Ridgewood Gun Club tournament, at Ridgewood, N. J.

April —.—Territorial Sportsman's Association, first annual tournament, at Las Vegas, N. M.

May 2-7.—Fifteenth annual tournament of the Missouri State Fish and Game Protective Association, Kansas City, Mo. W. V. Reiger, Sec'y.

May 3-6.—Hill City Gun Club tournament, at Vicksburg, Miss.

May 4-6.—Canton Shooting Club tournament, at Canton, Ill.

May 10 12.—The Ohio trap-shooters' annual tournament, Columbus, O.

May —.—Capital City Gun Club's tournament, Washington, D.C.

May 10-13.—Nebraska State Sportsmen's tournament, Grand Island, Neb.

May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleek, Sec'y.

May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.

May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.

June 6-11.—Eighteenth annual tournament of Illinois State Sportsmen's Association, at Chicago. W. L. Shepherd, Sec'y.

June 13-18.—New York State Association's Thirty-fourth Annual Convention, at Syracuse, N. Y. Chas. H. Mowry, Sec'y.

July 5-7.—Atlantic City Gun Club's tournament, at Atlantic City, N. J.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. —.—Hacketstown Gun Club tournament, at Hacketstown, N. J.

Aug. 24-27.—Barnes & Gillman's tournament, Des-chre-shos-ka Island, Detroit, Mich.

Manufacturers' and Dealers' Association tournaments:
Baltimore, Md.—Second week in March.
Staunton, Va.—Second week in April.
Savannah, Ga.—First week in May.
Pittsburgh, Pa.—Second week in May.
Brooklyn, N. Y.—Second week in June.
Watertown, N. Y.—Fourth week in June.

DRIVERS AND TWISTERS.

SOME big shooting will be done at Rutherford, N. J., on Saturday, when the return match will take place between the Boiling Springs Fish and Gun Club, of that place, and the Union Gun Club, of Springfield, N. J. The Union Club will have the services of such noted experts as E. D. Miller, Tom Sigler, J. Warren Smith, James L. Smith, Thos. Brantingham, W. H. Wolstencroft and Neaf Apgar, all of whom are away above 90 per cent. For the Boiling Springs there will be Eddy Collins, Frank Post, W. R. Hobart, the Jeaneret brothers and James Blauvelt, senior and junior. The chances are in favor of the Unions, although "chances" do not always win. The match will begin at 1 o'clock P. M., and will be followed by sweepstake shooting, open to all comers.

* * *

The Newark Gun Club will hold its monthly shoot at John Erb's "Old Stone House," in Newark, N. J., on the 10th inst., and a very "large" time is anticipated. The regular club event is at 10 live birds per man, and this is usually made a sweepstake by the arranging of a pot, which is open to all who wish to enter. Impromptu sweepstakes also precede and follow the club shoot.

* * *

A big crowd of New Jersey and New York trap-shooters will go to Dexter Park, Long Island, on the 15th to see the live bird match between Frank Class, of Pine Brook, N. J., and Elias Helgins, of Brooklyn, each of whom will shoot at 100 live birds for $100 a side. The men will each stand at the 30yds. mark, Class using a 12-bore and Helgins a 10-bore gun. This is practically equal to a 2yds. handicap on Class. The Brooklyn man is a very skillful shot and possesses plenty of nerve as well, but those who have closely watched Class's form recently think the latter will be the winner.

* * *

So Captain Bogardus met his Waterloo when he stacked against George Rerroat in a 100-bird race, the stake being Rexroat's hard cash against Bogardus's silver cups. The fact of the Captain being able to stop only 83 birds makes it appear as though his old-time champion form had deserted him, as once upon a time he was able to make better scores by far.

* * *

Phillip Masson and Charles Erhard of Newark, N. J., will shoot a match at 25 live birds each for $25 a side at Weidenmayer's Park, on Easter Monday.

* * *

The members of the Amateur Gun Club of Newark, had an interesting series of target shoots on Washington's birthday. The strong wind precluded the making of clean scores. During the day Huxter broke 58 out of 84; Pierman, 14 out of 28; Gehring, 41 out of 67; Huff, 25 out of 55; Backus, 23 out of 42; J. Bowerly, 15 out of 26.

* * *

The monthly badge contest of the Roseville Gun Club was held at Newark on Feb. 25, each man shooting at 25 artificial targets. The medal was won by B. A. Rist on 16 breaks.

* * *

The West End Rod and Gun Club held its monthly medal shoot at 10 live birds on its Grove street grounds in Newark on Feb. 22. A. Freund securing the medal by grassing 9 birds. L. Spahn, L. Bratsch, C. Migert, E. Astfalk, E. Womelsdorf and L. Bishof went out with 7 kills each. In a shoot at 20 bluerocks Astfalk took first honors on 13 breaks; Spahn and Burkhardt crushing 10 each.

* * *

The following scores were made on Washington's Birthday by members of the Roseville (N. J.) Gun Club in a series of 10 target sweeps: S. Castle, Jr., 8, 5, 9, 4, 10, 6, 9; J. Ganiz, 7, 4, 6, 7, 6, 4, 7; Alf Whatton, 9, 6, 7, 8, 7, 6, 8; Alb Whatton, 8, 7, 9, 7, 3, 8, 6; M. Bowerly, 5, 3, 4; J. Bowerly, 6, 6, 5; M. Fuerth, 6, 7; Irving Castle (14 years old), 6, 7, 9.

* * *

On Saturday, March 12, a big day's sport is anticipated on the fine grounds of the Passaic City Gun Club, at Passaic City, N. J., when that organization will receive a visit from the Boiling Springs Fish and Gun Club, of Rutherford. A feature of the day's sport will be a team race at 25 targets per man, between teams of 10 men each from the two organizations.

* * *

"On to Baltimore," will be the cry next week. Judging from current reports the shoot to be held in that city under the auspices of the Baltimore Gun Club, aided by the Inter-State Manufacturers' and Dealers' Association, will be one of the biggest affairs ever held in that section, and will draw shooters from every State and Territory in Uncle Sam's broad domain. The team race is expected to be a national affair, and to draw fully a score of teams. The teams will comprise twelve men each. A diamond ring will be presented to the member of the Baltimore Gun Club who makes the highest score on his team.

* * *

And anent the Baltimore tournament it may not be amiss to state that during its continuance FOREST AND STREAM will be "at home" at Acton Park, and all visitors will be accorded a warm welcome to its "canvas mansion" during shooting hours. During the "off hours" ye trap editor will hold forth at the Carrolton House, corner of Light and Baltimore streets.

* * *

A big tournament will be held at Wilmington, Del., March 29, 30 and 31, the shooting to be at artificial targets. A grand programme is being prepared.

* * *

The semi-monthly shoot of the Atlantic Rod and Gun Club will be held at West End, Coney Island, next Wednesday, and on the same day the Parkway Gun Club will shoot at Dexter Park, Long Island. Both clubs shoot at live birds.

* * *

Every few weeks something like the following appears in print: "Newark, Del., Feb. 22.—An extraordinary accident happened here this afternoon at a clay pigeon shooting contest on New London avenue. During the progress of the sport there were gathered on the grounds a crowd of spectators. As Charles Peters was handling a double-barreled shotgun preparatory to shooting it accidentally went off and discharged its load right into the crowd, which was hardly twenty-five feet distant. Those who witnessed the accident expected to find a dozen or more killed or maimed. Strange to say, however, only four men had been struck and only two of them seriously injured. These were Jos. Jacobs and George Batson, the latter colored. Jacobs was literally covered with shot wounds in the face and breast. His eyes were put out, and it will be remarkable if he recovers. Batson will also be deprived of his sight and will carry shot around in his head for life. The other two victims, George Messimer and Charles McCarty, were only slightly injured."

This careless handling of firearms is the bane of the trap-shooter's life, and yet it continues. Only a few short months ago carelessness caused the death of a most popular Long Island trap-shooter, and in fact hundreds of cases could be cited where either life or limb has been sacrificed, and all because the club management is carried on with loose reins. If this sort of business is to continue, if men are to be allowed to load their guns when and where they please, and to point the muzzle in any direction they choose, the sport of trap-shooting will receive a terrible black eye. Let the club captain or whoever is in charge of a shoot watch the action of every man closely, and such lamentable accounts as the above will not appear. If a club member, whether he be a veteran or an expert, loads his gun at any other place than at the score, rule him from the grounds; if he points the muzzle of a gun, loaded or empty, in any other direction than toward a trap or target, rule him off the grounds.

* * *

During the recent live bird match at Frenchtown, N. J., a discussion arose as to the relative merits of Ed. Hill, of Trenton, and M. H. Ruppell, of Milford, N. J., both of whom are well-known as live bird and target shots. The outcome of the discussion was the arrangement of three contests under the following conditions: To-day they will meet at Milford and each will shoot at 100 live birds, American Shooting Association rules, for $150 a side. To-morrow they will go to Frenchtown, N. J., and shoot at 100 blue rock targets each for $50 a side, and on Wednesday, March 9, they will face the traps at Yardville, N. J., in a contest at 100 birds each under old Rhode Island rules for $150 a side. Each man has placed a forfeit for each match in the hands of Mr. Frank Mason, so there is no danger of the matches being defaulted.

* * *

The West Jersey Gun Club, of Camden, N. J., had a "very large" time at its Washington's Birthday shoot. A new system of handicapping went into effect and proved very satisfactory. Each member is allowed to shoot at a given number of birds in excess of the number shot at by the scratch men (25 each). The scores, with allowances, were as follows:

	Allow.	Hit.		Allow.	Hit.
Thompson	0	21	Richards	5	7
John Chalmers	2	14	Ellison	4	18
Austermuhl	0	21	S M Haines	6	11
H F French	2	15	Arnold	8	8
Leaming	2	21	Summers	2	19
Holliday	6	6	Sickler	4	15
Griscom	0	13	Ridgway	5	19
Hanson	4	9	Pancoast	2	19
Peacock	7	14	George	4	13

On the shoot-off of the tie for first prize each man shot as in the regular contest, the prize being won by Austermuhl, a scratch man, with 21 breaks. Summers, who tied for second place with Ridgway and Pancoast, was a guest. By mutual agreement Ridgway took the prize, Ellison won third prize. First prize was an umbrella stand, second a shooting jacket and third a can of powder.

* * *

So there is still another retired champion. This time it is Warren T. Lord, of Albany, who has held the title of champion of Rensselaer, Albany, Saratoga and Washington counties, in New York State. In announcing his retirement Mr. Lord has the following in the Albany *Argus*: "I desire, through your columns, to announce my retirement from the championship arena. I have taken part in the four matches that have been shot simply for the love of shooting and a desire to make a reputation as a pigeon shot among my friends of the Eastern New York League. The winning of four consecutive matches, against as many good men, has led me to believe that I have gained this, and as the demands of my position in a bank are too pressing to give any further attention to this race, I herewith relinquish the championship and retire from the arena altogether. I beg permission to here express my appreciation of the fairness and courtesy with with which I have been treated by every opponent against whom I have been matched, and to my Albany friends, one and all, and to the *Argus*, whose Rifle, Rod and Gun department so well represents their interests, I return my most grateful acknowledgments.—WARREN T. LORD."

* * *

Gus Greiff, the pushing young salesman for Von Lengerke & Detmold, succeeded in winning the New Jersey Shooting Club's diamond badge at Claremont last Saturday, this being his second victoy. Greiff is allowed two targets, and by breaking 20 out of 25 he tied F. G. Moore, who broke 22. On the shoot-off at 10 targets Greiff broke 9 to Moore's 8. In the above contest Simpson broke 21; Richmond, Compson and Purdy 19 each.

* * *

Fred Van Dyke, the Newark manager of Von Lengerke & Detmold, shot against Linus Dean for the championship challenge cup of the Maplewood (N. J.) Gun Club on Feb. 27, breaking 45 to Dean's 37.

C. H. TOWNSEND.

Team Shoot at Rochester.

ROCHESTER, N. Y., Feb. 24—Through the columns of a well-known sporting paper the Spencer Sportsmen's Association, of Lyons, issued an open challenge to any club in New York State. The Rochester Rod and Gun Club, which was a young organization, did not hesitate to try conclusions with the Lyons shooters, so a series of three matches was arranged, the first of which was shot at Lyons, Dec. 17, resulting in the defeat of the home team by thirty-three birds. Not feeling satisfied with the result the Lyons Club sent twelve of its crack shots to Rochester last month to wipe out the disgrace. As the first match was shot under American Association rules, rapid firing, the Lyons men decided that the second match should be decided by shooting at twelve doubles and one single. As our men had had no practice at doubles the announcement created a feeling among the Rochester men that the visitors would have a walkaway, but our gritty little captain said, "Boys, we will lick them out of their boots; it is a groundhog case." So at it we went, and when the smoke of the battle had cleared away we found we were victorious by six birds. A very heavy fog hung over the grounds all day, making it quite difficult to catch the second bird, which seemed no larger than an overcoat button. The scores follow:

I. B. MULLIN.

Ohio Shots.

CLEVELAND, Feb. 25.—The few who gathered at the Cleveland Gun Club traps this afternoon had plenty of good shooting in spite of the bad weather. The first badge in Class A of the regular club shoot was won by Tamblyn. The second badge went to Page. In Class B the first badge was won by Watts and the second by McMillan. The following is the score of the regular shoot: Tamblyn 27, Etworthy 21, Page 24, Watts 23, McMillan 17, Redwing 27, Sterling 15.

Visitors—Joe 16, Richardson 27.

After the club shoot two match shoots were arranged, in which Redwing's side was twice victorious.

Fulford, Budd, Brewer, "Unknown."

THE following copy of a telegram from our Western representative will explain itself: "Chicago, Ill., March 1.—Fulford and Brewer both here. Fulford shoots Budd Thursday, 100 birds, $250 a side. May shoot two races.—E. HOUGH." These will be great matches and should fill Watson's Park to its utmost capacity.

[Special to Forest and Stream.]

CHICAGO, March 1.—*Later.* Brewer has gone home for mysterious reasons; was hardly here twelve hours. Budd will be here to-morrow morning. Fulford wants Hurlingham rules only. Budd may want American. Compromise hoped for. We expect one Fulford-Budd match, and perhaps two or three. Chicago will concede everything reasonable.

Tuesday Night.—J. L. Wilcox, of Chicago, backs an unknown (probably Charlie Budd) for $400 against Brewer, 100 birds, American rules, race to be shot this week. Fulford has sent East for Brewer, who left to-day. Fulford takes the bet for Brewer. No Fulford-Budd race yet concluded, but they probably shoot Thursday.

WEDNESDAY, March 2.—Budd is here. No agreement yet on boundary, but matches with Fulford thought certain for to-morrow. Chicago don't want Hurlingham rules. Western shooters dropping in. Big sweeps to-day. E. HOUGH.

The Connecticut State Shoot.

TWENTY-FIVE TEAMS TAKE PART.

"THE best attended shoot ever held in the State" was the verdict anent the Connecticut tournament held at New Haven on Feb. 22. The match for the State championship called out 25 teams of 3 men each, each man shooting at 30 Keystone targets. The honors were captured by team No. 1 of the New Haven Gun Club with 79 breaks, this giving them the "H. A. Penrose Medal," which they will hold until the shoot at New London on March 17. The weather was damp and raw, and the wind was what could be termed "fishy." Nevertheless an immense crowd was present and some of the sweepstakes had as many as sixty-eight entries. As our correspondent says, "It was a red-letter day for New Haven, and trap shooting in Connecticut starts off this season with a new inspiration." Below will be found detailed scores of the shooting, the team race being No. 6 on the programme:

TEAM RACE.

New Haven Team No. 1.

Bates.....1101111101111111011111111110111—26

The Bloomsburg Club's Tournament.

THE Fair Grounds at Bloomsburg, Pa., were the scene of some good shooting both at live birds and Keystone targets on Feb. 22 and 23, shooters from all over the State being present. The first day was devoted to live bird work, about 700 being trapped. The birds were far above the average tournament stock. Among the visitors were John S. Dustin and John W. Fulford of Harrisburg; N. A. Hughes, of Williamsport, and Mr. Macherman, of Shamokin. The scores are given below. Event No. 1, 4 live birds: Mathew Quick 1, Clark Hagenbuch 3, J. S. Dustin 3, J. W. Fuller 4, J. H. Mercer 1, Louis Lowenberg 3, Dr. Bonham 2, H. B. Low 3, Ben Machaman 3, Silas McHenry 1,

No. 2, 5 live birds: J. B. Rhoades 2, E. A. Rhoades 2, Mercer 4, E. A. Brower 5, C. S. White 3, James Kane 3, Dustin 4, J. W. Fulford 3, Machaman 4, Barnes 2, Bonham 2, Quick 4.

No. 2, 6 live birds: Bower 5, Quick 5, J. B. Rhoades 2, Mercer 4, Dustin 6, Fulford 6, E. A. Rhoades 2, Allen 4, Machaman 4, Randall 2, Snyder 4, White 5, Bonham 4, Low 3.

No. 4, 8 live birds:

Hagenbuch	00010020—2	White	21010211—6
Dustin	11122111—8	F G Quick	01220120—5
Fuller	11121202—7	Rhoades	00011001—3

Special No. 2, 4 live birds, $4 entry: Fulford 4, Dustin 2, Smith 2, Roberts 2, Warfield 3, Armstrong 0, Hughes 2, Harter 3, Machaman 0, Spicer 3, Bonhem 2, Rhoades 2, Low 4.

Dustin averaged 84 5-12, Fulford 83 31-43, Abercrombie 82 22-29, Thatcher 80 per cent..

The Second Day.

Tuesday was devoted to target shooting at Keystone targets:

No. 1, 10 single Keystone targets, $1: Fulford 8, Bonham 8, Grouse 7, Hughes 10, Dustin 9, Kieger 6, White 6, Park 9, Lowenberg 5, Parker 6, Evans 4, Glenn 7, Bower 8.

No. 2, standard Keystone targets, $1: Fulford 10, Hess 6, Hughes 7, Dustin 9, Bower 10, Harter 7, Quick 2, Grouse 6, Evans 3, Lowenberg 7, Glenn 7, Bonham 6, Park 9, White 6, Parker 5, Boone 7, C. Hagenbuch 7, B. Hagenbuch 3.

No. 3, 15 single Keystone targets, $1:25: Grouse 12, Bower 13, Hughes 12, C. Hagenbuch 1., Fulford 14, Harter 7, Dustin 15, Hess 1, Bogart 5, Boone 10, Parker 15, Bonham 7, Lowenberg 11, Smith 9, Mercer 6, Kieger 9, Smithers 4, Parker 2.

No. 4, 10 single Keystone targets, $1: Hughes 10, Glenn 7, Harter 5, Boone 7, Bodine 6, White 5, Bonham 9, Parks 10, Bogart 3, Fulford 6, Evans 6, Bower 8, Spicer 8, Dustin 9, Hagenbuch 6, Keller 9, Lowery 4, Dildine 1, Grouse 8, Lowenburg 5, Smith 6, Quick 1, Scott 6, Husbard 4.

No. 5, 10 single Keystone targets, $1: Bower 10, Hughes 10, Smithers 0, Parker 6, Dustin 7, Parks 8, Harter 7, Bodine 5, Fulford 8, White 4, Bonham 8, Spicer 9, Confer 6, Dildine 3, Keiger 7, Grouse 9, Bogart 6, R. Scott 6, J. Scott 5.

No. 6, 15 single Keystone targets, $1: Dustin 9, Fulford 14, Scott 10, Bogart 2, Hughes 11, Bower 12, Park 11, White 12, Evans 8, Glenn 9, Smithers 4, Boone 11, Spicer 12, Mercer 5, Keiger 10, Grouse 10, Bonham 10, Dentler 7.

No. 7, 10 single Keystone targets, $1: Bower 5, Hughes 8, Fulford 8, Bodine 3, White 6, Lowenberg 8, Boone 6, Smithers 5, Mears 5, Parker 3, Glenn 4, Parks 6, Evans 5, Spicer 6, Dustin 9, B. Hagenbuch 6, Grouse 8, Bonham 6, C. Hagenbuch 7, Keiger 5, Confer 2.

No. 1, 15 singles, Keystone targets, $1.50: Hughes 11, Fulford 12, Lowenberg 9, Bogart 4, Bodine 6, Bowers 10, Dustin 12, Spicer 10, Grouse 13, Glenn 7, Parker 13, Hagenbach 8.

No. 2, 10 singles, Keystone targets, $1: Bowers 7, Hughes 9, Smithers 2, White 7, Lowenberg 3, C. Hagenbuch 7, Parker 5, Mears 6, Dustin 6, Armstrong 5, Fulford 10, Spicer 7, Grouse 7, Park 9, Keiger 7, Quick 6, Mercer 5, B. Hagenbach 3.

No. 3, 10 singles, Keystone targets, $1: N. Hughes 8, White 7, Fulford 10, Spicer 8, Parkes 7, Keiger 7, Bower 9, Harter 6, Grouse 6, Dustin 9, Mears 3, Mercer 2, Hagenbuch 8, Scott 6, Dentler 5, Luger 7.

No. 4, 15 singles, Kenstone targets, $1.50: Fulford 12, Hughes 12, Bower 12, Harter 3, Dustin 11, Spicer 11, Buick 7, Lowenberg 9, Park 13, White 9, Grouse 13, Keiger 12.

No. 5, 10 singles, Keystone targets at unknown angles, $1: Parks 4, Spicer 0, Fulford 6, Dustin 4, N. Hughes 9, Bower 7, Grouse 8, Keiger 5, Boone 4, Bodine 5, Hagenbuch 7, White 2, Mercer 7.

Country Club Scores.

SOME excellent work was shown at the Country Club shoot at the Pelham grounds, on Feb. 22. It was the annual shoot of the club, and with strong flyers and an adverse wind it was not easy to score high. There were five regular events and any number of minor matches. B. B. McGregor won the first event with a score of 5 killed, A. J. Caswell the second with 9, L. Rutherford and P. L. Theban tied in the third event with a score of 3 each, P. L. Theban won the fourth event with 6, and A. L. Norris won the fifth and last event with 4 killed.

Forest and Stream Gun Club.

ROCHESTER, Feb. 25.—The Forest and Stream Gun Club held a practice shoot at kingbirds at the Driving Park this afternoon. Following are the scores made: Homer Perry 23, J. A. Buckley 19, Geo. Zimmer 17, John Hofner 20, M. D. Tarba 20, Peter Kelley 13, M. Higginson 10 Tom King 14, Geo. Mason 8, Hemer Hill 12.

Free U. S. Birds at Watson's.

CHICAGO, Ill., Feb. 27.—Some thirty or forty shooters assembled at Watson's Park to-day and availed themselves of the courtesies of the U. S. Pigeon Co., represented by Mr. F. C. Damm and his assistant, Mr. O. Von Lengerke, of Von Lengerke & Antoine, Western agents for this new bird. The targets were thrown free, 3,000 of them, from five traps, and fun came easy. Everything worked well and the shoot passed off pleasantly. Some of the shooters preferred to go into the sweep which was left open for each event but no charge was made for birds at all. Considerable wind made the shooting a little hard. Many shooters not before seen on the grounds were on hand to-day. George Kleinman shot to-day, this being his first week out of bed after a rather bad sickness.

In the shoot to-day the birds and traps were taken directly out of the box, but there seemed to be a very smooth, good delivery, to which the trap pull contributed well. The new claimant for target honors displayed itself with unmistakable credit, and it appeared the general concensus of opinion that the day had been a most enjoyable and satisfactory one, and that many thanks were due the management for so successful and pleasant a time.

Mr. Damm goes East to-morrow. He tells me that his company is now turning out 40,000 birds daily and wishes it were more.

Shoot No. 1, 20 U. S. pigeons:

Geo Kleinman	15	Smith	7	Church	6
O'Brien	9	Brahm	13	Sickel	10
Skelton	5	Sleck	14	Reeves	13
Warneman	7	Britton	6	Karg	15

Shoot No. 2, 10 U. S. pigeons ($1 for sweep):

Britton	5	Park	5	Karg	6
Skelton	3	Kleinman	10	Church	7
Comley	4	Findley	7	Steck	9
Reeves	6	Brahm	7	Morrisey	9
Flickinger	7	Willard	7	Atwater	8

Shoot No. 3, 10 U. S. pigeons:

Richards	6	Henrotin	2	Bartow	4
Ferguson	4	Jones	2	Damm	5
Park	9	Aarons	2	Britton	2
Eisman	4	Bandrup	2	Connelly	8
Stern	3	Peasley	5	Reeves	8
Smith	3	Pryde	7	Steck	8
Findley	6	Atwater	9	Clrayer	2
Flickinger	8	Grubbs	6	Shepard	6
Schnee	7	Knoche	2	Fox	7
O'Brien	7	Karg	9	Turner	3
Brahm	2	Willard	7	Shepard, Jr	0
Kleinman	7	Sickles	3		

About half the above were in a $1 sweep.

Shoot No. 4, 10 U. S. pigeons:

Goodman	3	Shepard	6	McCabe	6
Findlay	5	Schnee	4	Park	7
Peasley	8	Scott	3	Von Lengerke	6
Britton	3	Ferguson	4	Morrissey	7
Barton	5	Grubbs	5	Knocke	6
Stern	5	Henrotin	3	Torkington	8
Reeves	7	Steck	8	Pryde	9
Atwater	7	Fleckinger	9	Walker	9
Richards	8	Mann	4	Church	2
Sickles	8	Harg	5	Mann	8
Smith	6	Brahm	4	O'Brien	7
Cleaver	8	Kleinman	6		

(About one-half of above entered for $1 sweep).

Shoot No. 5, 10 U. S. pigeons:

Reeves	10	Henrotin	4	Shepard	7
Jones	6	Grubbs	6	Pryde	9
Karg	8	Brahm	5	Atwater	8
Britton	3	Church	2	Wolf	5
Eseman	4	Shepard, Jr	2	Kleinman	6
Richards	9	Cleaver	2	Barton	3
Fleckinger	5	Morrissey	8	Peasley	5
Park	8	Steck	10	O'Brien	8
McCabe	5	Johnson	7	Jefferson	2
Findlay	9	Knocke	7	Goodman	3

(About one-half above entered for $1 sweep).

A few sweeps at live birds were also shot, the scores being as follows:

Sweep No. 1, 7 live birds $3, 50, 30 and 20 per cent.:

Morrissey	4	Skelton	2	Park	1
Brahm	2	Reeves	5	O'Brien	2
G Kleinman	7	Britton	1	Atwater	6
Eastman	3	Henrotin	3	Shepard	4
Bartow	1	Church	1		

Sweep No. 2, 10 live birds, $5:

Geo Kleinman	1222220211—9	J E Morrissey	0201110010—5
A J Atwater	0221220220—7	C E Comley	2010200000—3
A W Reeves	1110222221—9	C E Willard	2022010010—5

J Church	0110120112—7	W Skelton	0000010112—4

E. HOUGH.

The Inter-State Association.

THERE will be great times at Acton Park, Baltimore, on Tuesday, Wednesday and Thursday of next week, when the Inter-State Manufacturers' and Dealers' Association will open its season of 1892. The direct management of the affair will be in the hands of H. A. Penrose, who has arranged a programme that cannot fail to please all trap-shooters. Besides the regular programme events there will be a big team shoot run under the direct supervision of the Baltimore Gun Club, which is expected to draw out over a score of teams.

The regular programme is as follows. First day, guaranteed purses: Ten singles, entrance $1.50, $20; 10 singles, $1.50, $20; 15 singles, $2, $30; 10 singles, $1.50, $20; 20 singles $5.50, $60, 15 singles, $2, $30; 10 singles, $1.50, $20; 20 singles, $8, $50; 15 singles, $2, $30; 10 singles, $1, $20.

Second day, same: Ten singles, entrance $1.50, $20; 15 singles, $2, $40; 15 singles, $1.50, $30; 20 singles, $3, $50; 15 singles, $2, $30; 20 singles, $4, $75; 10 singles, $1.50, $30; 20 singles, $4, $75; 10 singles, $1.50, $30; 10 singles, $1.50, $20.

Third day, same: Ten singles, entrance $1.50, $20; 10 singles $1.50, $20; 20 singles, $2, $50; 10 singles, $1.50, $20; 20 singles, $3, $50' 15 singles, $2, $30; 20 singles, $3, $40; 10 singles, $1.50, $20; 15 singles' $2, $30; 10 singles, $1.50, $20.

The following disposition will be made of the moneys each day. All surplus money divided as follows: Fifty-five per cent. added to purses. Ten per cent. to first and 5 per cent. to second for best average in expert class to those shooting in all purses. Ten per cent. to first and 5 per cent. to second for best average in semi-professional class to those shooting in all purses. Ten per cent. to first and 5 per cent. to second for best average in amateur class to those shooting in all purses. All averages paid each night. The shooting will commence at 9 A. M. each day. All purses div. 50, 25, 20, 15 and 10 per cent. Target money to be deducted from purses when entries will allow.

The programme shows the following named firms as members of the Association: Forest and Stream Publishing Co., Hunter Arms Co., American Wood Powder Co., Henry C Squires, Peters Cartridge Co., Standard Keystone Target and Trap Co., Tatham & Brothers, Colt's Patent Fire Arms Manufacturing Co., Union Metallic Cartridge Co., S. S. Powder Co., Baker Gun and Forging Co., and Cleveland Target Co.

Team Match at White House.

WHITE HOUSE, N. J., Feb. 27.—The second of a series of six team matches between the White House and Somerville Gun Clubs took place here to-day, the home team winning. The first match was shot on Feb. 22 at Somerville, the scores being very low, with the Somervilles ahead. The teams comprised 5 men each, and each man shot at 25 Keystone targets. Below are to-day's scores:

White House Gun Club.

S Cole	0011100011010300001101101 12
H Bishop	1111101111101111111111—23
B Pickle	1010110111100100010000—10
L P Woodin	0001001010001100010011—10
S K Large	0100101010100001000101101—10—65

Somerville Gun Club.

J Ten Eyck	1000001000100100010000100— 6
Voorbees	0011110011100101010001l—13
Anderson	0100001000000000101l0101— 8
Alegair	0000030000001001100010 — 4
Layton	0111010011011101101060—14—45

The next two matches will be at 5 live birds per man, 5 men to a team, dates not yet fixed. H. B.

The Winterset Gun Club.

WINTERSET, O., Feb. 24.—Below are scores of two shoots held by our newly organized club, both being contests for the club medal;

Twenty-five single Peoria blackbirds: Dow 20, Fagan 15. Davison 21. Goshorn 22, Ely 13, Bush 16, Mardis 10.

At 13 live birds: Fagan 12, Goshorn 11, Ely 11, Dow 9, Bush 9, Davison 5.

Trap at Watson's Park.

BURNSIDE, Ill., Feb. 22.—The following scores were made here to-day in sweepstakes. No. 1, 7 live pigeons, entrance $3, div. 50, 30 and 20 per cent., American Association rules:

G Kleinman	0221212—6	R O Heikes	0220200—3
J P Card	0021010—3	Ed Steck	2010000—2
C E Willard	2212120—6	Jim Sheehan	2002212—5
F Place	2112121—7	H B Foss	2010010—3
F W Cleaver	2211010—5	O F Malcolm	2000010—2
Billy Patterson	0200000—1	J E Morrisey	2122100—5
W L Shepard	2120212—6		

No. 2, same as No. 1:

Kleinman	0211112—6	Foss	2012102—5
Card	0221001—4	Cleaver	000w
Willard	2202111—6	Place	2122220—6
Bingham	0220001—3	Malcolm	2000100—2
Shepard	2111210—6	Patterson	0010000—1
Sheehan	0012100—3	Steck	2020022—4
Morrissey	0112012—5	Sleeth	0001212—4

No. 3, 5 live pigeons, entrance $2.50, div. 50, 30 and 20 per cent. American Association rules:

Kleinman	11121—5	Place	11022—4
Card	12021—4	Morrisey	20102—3
Steck	01022—3	Shepard	12021—4
Sleeth	11002—3	Willard	22200—3
Sheehan	10202—3	Bingham	11112—5
Foss	21201—4		

E. M. Dernrag vs. Jim Neff, 50 live pigeon each, $50 a side, A. A. rules. The birds were rattlers and the contestants were rattled:

E M Dernrag	01002201112110122120201101221022201102212202210—37
Jim Neff	22222000010020012122300202220000220221212002111 2100—29

Same day, match at 25 Peoria blackbirds each: R. O. Heikes 22, Geo. Kleinman 24, C. E. Willard 21, W. L. Shepard 18.

Same day, match at 50 Peoria blackbirds each: Heikes 47, Willard 44, E. Bingham 42:

Heikes then broke 15 out of 16 in 1 minute and 20 seconds.

Feb. 26.—W. P. Mussey vs. A. M. Hoffman, 100 select pigeons each, $100 a side, A. A. rules:

Mussey	0212222202220302211—16

*Sam Touey	2002222—5	*W Shinn	2210120—5
*Geo Hoffman	0112201—5		

*Shot for cost of birds only. Kleinman first, Jessen second.

RAVELRIGG.

Under Rhode Island Rules.

GERMANTOWN, Feb. 24.—We had a match to-day on the Wingohocken Gun Club grounds, one of the old-fashioned ones, Rhode Island rules, 25yds. rise, H. & T. traps, gun below the elbow until the bird was on the wing, only one barrel at a bird, and they were as good a lot of birds as any one could want. Greenwood won the toss and was elected to go to the score first and brought down his first bird, a good left-quarterer, in good shape; Vandergrift followed suit with a right-quarterer. A. James was referee, T. Randall trap-puller, T. Mitchner handled the birds and H. Thurman was official scorer. The score was as follows:

Wm Greenwood	11101c0101110011111000111—16
John Vandergrift	1001110111111c0110111001—17

Among the spectators were a lot of familiar faces, as follows: Frank Kuhn, one of the best gun makers we have in this city; Dick Irwin, Frank Sheppard, Horace Lutz, Wm. Garvin, Geo. Hook, Chas. Topham, T. Mitchner, Wm. Jay, W. Brokaw, Jake Pryor, S. Kephart, J. Alberger, John Morris, Wm. Greenwood, Jr., Thos. Greenwood, John Greenwood, Thos. Pullinger, Jos. Watts, John Harmer, Geo. Old, Chas. Detwiller, J. Broadhurst, S. Le Grange, Thos. Randall, John S. Warner, F. Stallman, Peter Foster, John Riker, Mike Schultz, Wm. Windolf, B. L. Collum, A. G. Collum, from Philadelphia, Germantown and Frankford; A. James, Chas. Van Camp, A. Schnepp, W. H. Wolstencroft, Isaac Wolstencroft, Wade Wilson, A. Lawrence, Captain Pack, Nate Swope, John Stinger, Thos. Cavanaugh, Chas. Snyder, John Berkman, John Garlan, Thos. Harlan, J. Martin, S. Hothersall, John Fritz, Jr., Elmer Betson, R. Konover and about fifty others, and the Frankford boys went home happy, having won, but only by one bird.

Having a few birds over a sweepstake was started, 4 birds, entrance $3, Hurlingham rules, 3 moneys, ties div.:

Frank Sheppard	1211—4	J Thurman	2220—3
Geo Miller	1001—2	J Morris	1010—2
H Thurman	2110—3	H Lutz	0120—2
W Greenwood	1111—4	E David	1211—4
R Irwin	0021—2	Buckshot	0012—2
A James	2101—3	Hursh	0211—3
J Vandergrift	1110—3	Greenwood, Jr	1121—4
W Green	2111—4	J Foley	00w—0

H. T.

The Linden Grove's Combination Shoot.

ONCE every month Dexter Park shooting grounds are visited by the Linden Grove Gun Club, the members of which shoot at 7 live birds for the Class A and B medals and also at bluerock targets. The February shoot was fairly well attended. The birds were good, the weather cloudy; the wind, while not quite strong enough to hurry live pigeons, still had force sufficient to make the light saucers perform some troublesome movements. The contests were well contested, as shown below:

At 7 live birds, club handicap rises. Cunningham 27yds., Weisserborn 28, the rest 25:

D Eppig	0012122—5	C Vochringer	0002201—3
J Kelly	1020020—3	J Schlieman	2121201—6
W Cunningham	1020011—4	W Follmer	0200000—1
C Horney	0221011—5	A H Topking	12110w.
J Link	1200110—4	J Birwell	1C01021—4
F Weisserborn	0221102—5	L Neir	2012101—5
C Eich	0202220—4	T Eich	0001200—2

The first class medal was won by J. Schlieman. As birds were scarce it was decided to shoot off the tie for the second class medal at 10 bluerock targets, this also being made an open sweepstake. The scores follow, 10 bluerocks, 25 cents entry, 2 moneys:

J Schlieman	0000000000—0	G Mager	1000110011—5
P J Eppig	0011001111—6	W Cunninghan	1000011111—6
C Birwell	0000000000—0	F Weisserborn	1000010000—2
W Follmer	0000101100—3	L Neir	0001000110—3
J Birwell	0101011111—7	J Link	1011101111—8
C Horney	1111111101—9	C Voehringer	0030000100—1
C Eich	0101000010—3	J Eich	0001010000—2

Chas. Horney, who is an adept at target work as well as at rifle shooting, secured the second class medal.

Sweep, 5 targets, 25 cents entry: J Birwell 4, P. Eppig 4, Merger 3, Glear 3, Weisserborn 3, Link 2, Horney 2, Neir 2, C. Birmell 1. On shoot off J. Birwell won first, Merger second and Link third.

Toronto Tournament.

TORONTO, Feb. 26.—The Toronto Gun Club has just completed its three days' meeting and it has been a very satisfactory one indeed, with a liberal list of prizes, a good gathering of shooters and a high grade of shooting despite somewhat of unpleasantness in the weather surroundings. The story of the tournament is told in the subjoined day to day narrative:

Feb. 23.—The air was raw, the breezes very chill, and the dampness was that of coldness that seemed to pierce through one's anatomy down at the Woodbine yesterday. The surface under foot was slush and water, and access to the field was not pleasing. All these climatic difficulties, however, did not dampen the ardor of the 400 spectators who turned out at the traps during the day, or affect the skill of the ninety crack shots who had gathered from all parts of the province, and had come from over the border for the grand tournament of the Toronto Gun Club.

The traps had been carefully and conveniently laid by the energetic chairman of the club committee, George Briggs. They formed a semi-circle facing the lake and looking toward the east. A shanty was erected for the secretary's quarters, and for the stowage of guns and other traps of the trap shooters. The slight mist did not affect the light at short range in the slightest, and it was, verily speaking, a great day for the trap shooter.

Among the competitors from out of the city are: B. Brown, of Morristown; W. Stroud, J. Stroud and J. Forsyth, of Hamilton; J. Wayper, of Hespeler; J. W. Price, of St. Williams; C. Montgomery, of Brantford; J. P. Easton, of Monroeville, N. Y.; G. A. Mosher, of Syracuse, N. Y.; D. Leitch, of Ridgetown; John Bell, of L'Amaroux; A. Johnson, of Almonte; W. Lewis, of Collingwood; R. Fick of Port Rowan; H. Saulter, of Oshawa, and Geo. Rogers, of St. Catherines.

The first event on the programme was commenced shortly after 10 o'clock, and thereafter a continual ping-ping of the gun was sustained until twilight was seen approaching in the distance. The four blackbird events down on the programme for yesterday were completed. The shooting in these was remarkably good, and unless a man smashed 9 out of 10 of the discs he was not in it. The straight scores, too, were frequent. In these events the American shootists did some good work, and will return home carrying a few sheaves with them.

The $500 live bird shoot of 20 pigeons brought out a splendid lot of entries. The sixth squad had been finished late in the afternoon, but there were still some to follow. The birds were slow, and showed signs of too lengthy confinement. The raising strings were required in most cases and the flights were slow. The shooting, however, in this event was also capital and the scoring high.

The day's scores ran:

No. 1, 10 clay birds:					
Charles	9	H Forest	10	Montgomery	10
Tymon	8	Burgess	9	Wayper	10
Henry	7	Brown	9	Keller	8
Easton	9	J Parker	9	Donaldson	9
F Forest	8	Thompson	9	D Leitch	8
Emond	9	Wheeler	7	S Stover	9
Gilbert	8	Mosher	9	Wakefield	6
Thompson	7	Eddy	7	Price	8
No. 2, 15 singles:					
Mosher	10	Bickerstaff	5	Morley	13
Thompson	12	I Smith	13	Wayper	14
Brown	12	Burgess	10	Gilbert	10
Eddy	9	Roswell	11	Keller	12
Easton	14	Spiller	13	Chapman	11

Second Day, Feb. 24.

The weather to-day was more favorable than that of the first day of the Toronto Gun Club's tournament and the birds were by far a better lot. The unfinished $500 pigeon shoot was concluded with the result that Wayper, Price, Wakefield, Glover and Blea, who got a clean string of 20, divided the first moneys, aggregating $260, and netting each $52. Andrews, Tymon, Brown, Rogers, and Saulter, who made 19, divided the next five prizes or $110. Briggs, Wells, Henry, Stroud, Bell, Lewis, Evans, Forsyth, Spencer, McDowall and Chapman, who got 18, divided the next ten prizes of $130. She second live pigeon event on the programme was begun, but was not finished. Andrews, Glover and Wayper are the leaders so far, having killed a straight string. The other events at artificial birds were keenly contested.

No. 3, unfinished, 20 live pigeons:

Good Team Work at Dexter Park.

THE grounds of Louis Miller, at Dexter Park, were the scene of some lively shooting on Feb. 23, the main attraction being the contest between Elias Helgans and L. C. Gebring versus Geo. Remsen and A. Andrews. Each man shot at 50 live birds, for a stake of $100 a team. The weather was clear, the wind blowing stiff from the east'ard and the birds were good. The men shot from the 30yd. mark. The scores:

Helgans	21220112212021222112200120220111220111111211011—42
Gebring	11202201101012302c1000111121202201102221121202—37—79

R A Berry	5	D Monsees	7

CHICAGO TRAPS.

CHICAGO, Ill., Feb. 27.—There is a 24-karat hoodoo brooding over this burg in shooting matters. Nothing goes as planned. Last week was announced the plans for entertainment of the Milwaukee team that was to come down and repeat that Ft. Dearborn massacre. Instead, there comes on Tuesday a card saying that all Milwaukee is sick and all dates are off. At which Ft. Dearborn Club heaves a sigh of relief, for it expected to be beaten.

News was received here with some interest of the match at Oskaloosa, Iowa, on Thursday of this week, between Mr. C. W. Budd, of Des Moines, Ia., and Mr. I. A. Marshall, of Keithsburg, Ill., 100 live birds, which was won by Mr. Budd with a score of 96 to 90. If the birds were hard, that was goodish sort of shooting.

At Virginia, Ill., on Thursday of this week, the old-time and still sturdy champion, Capt. A. H. Bogardus, was defeated by Mr. Geo. Rexroat, of Virginia, in a match at 100 live birds, Mr. Rexroat killing 93 to the old Captain's 83. It is quite a credit to beat the old man, even now, although we must fear his best days are past. Mr. Rexroat made one run of 42 straight, a very remarkable string. Capt. Bogardus is credited with only 18 straight for top run. Mr. Rexroat has been shooting in high form of late.

On Friday of this week Mr. W. P. Mussey and Mr. M. Hofmann, both of this city, shot a race at 100 live birds, $100, Mr. Mussey winning, 87 to 81. These were hard birds. Mr. Hofmann stood to win till toward the finish, where Mr. Mussey ran out with 19 straight and a good lead. Mr. Hofmann at one stage killed 47 out of 49 birds. Only 3 birds of the 200 failed to start promptly on the springing of the traps.

Mr. Rolla Heikes started early in the week for New Orleans Mardi Gras tournament, which he will report for this paper. Mr. Heikes tells us that he is about determined to give a big spring target and live bird tournament, at Chicago, April 9. In that case his time race, to break 500 targets in an hour, will probably be shot here, and so also will be the Illinois—Ohio target race, 5 men teams, $250 a side. Illinois team will be chosen from R. O. Heikes, of Chicago; T. A. Marshall, of Keithsburg; Geo. Rexroat and A. J. Atwater, of Chicago; Ed. Spencer and W. Crosby, of O'Fallon; and Mr. Wilson, of Peoria. Ohio team will probably be George Osborn, of Toledo; Scott and McDonald, of Dayton; Ed. Taylor, of Cincinnati; Mr. Ward, of Columbus; and Mr. Sanford, of northern Ohio.

Fairly pleasant weather has prevailed to-day for the U. S. pigeon free tournament at Watson's Park, under the auspices of Mr. F. C. Damm, of the company, and Mr. O. Von Lengerke, of Von Lengerke & Antoine, Chicago agents for that target. Scores are given elsewhere.

E. HOUGH.

Shooting for a Live Ox.

A BIG crowd of trap shooters visited the well appointed grounds of the Perth Amboy (N. J.) Gun Club on Washington's Birthday to indulge in their favorite pastime. The club has recently purchased the old grounds of the Perth Amboy Base Ball Club, and has erected a pretty club house thereon. On this occasion the house was used for the first time. The Perth Amboyites turned out in force to see the shooting, which was all at live birds. The principal interest centered in a contest at 5 birds per man, $5 entry, the only prize being a gigantic ox. There were seventeen entries. This was shot under the old rules, single barrel, gun below the elbow until bird is on the wing. Charles Applegate was referee, John Hall and Thomas Redding judges. The scores:

C Palmer	11111—5	W Perrine	11010—3
H Dayton	01010—2	L B Campbell	0w
S Dayton	110c1—3	S Hall	11110—4
Jas Glenn	000o w	J Applegate	11111—5
W Hartman	01111—4	N Egan	11010—3
W Terry	10w	H Jones	10w
O Brown	1100w	D Applegate	0w
S Hall	11c0—3	H Brown	11011—4
J Van Brockle	11100—3		

Appleton and Palmer decided to auction off the ox, which they did, the animal netting $45 which they divided.

Other events shot during the day were as follows: Three birds, $2 entry, 3 moneys:

Campbell	111—3	Terry	101—2
Jones	111—3	Darby	011—2
Hartman	111—3	Lequinne	001—1
Brown	111—3	Dayton	100—1
Perrine	111—3	Applegate	0o1—1
Brace	111—3	Campbell won tie.	

Miss and out, $2 entry: Terry 2 2, Hartman 1 0, Van Brackle 10, Perrine 0, Glenn 0.

No. 2 same: Perrine 1, Van Brackle 1, Terry 0, Hartman 0, Glenn 0.

No. 3, same: Terry 11101, Hartman 11100, Darley 11100, Van Brackle 10 Perrine 10, Glenn 10.

No. 4, same: Terry 11, Hartman 11, Darley 10, Van Brackle 10, Perrine 0, Glenn 0.

No. 5, 3 birds, $2 entry, 3 moneys:

Applegate	111—3	H Dayton	100—1
Glenn	110—2	S Dayton	010—1
Hartman	011—2	Jones	000—0

Miss and out, $1 entry, 1 money:

Applegate	11111	Jensen	110
Brown	11111	Hornsby	10
Hartman	11110	Glenn	0
Campbell	1110	Gibby	0
Jones	110		

Match at 5 birds for basket of wine:

John Hall	00101—2	W H McCormick	10000—1

Shooting for a 400lbs. Porker.

AL HERITAGE'S trap grounds at Marion, N. J., were visited by live bird shooters from all over the State on Feb. 25 in response to an invitation to contest for a 400lbs. hog, raised by Jacob Pentz, of Fanwood, N. J. The day was cloudy, with a fairly stiff breeze. The birds were a rattling good lot throughout. Among those present were Ed Collins, of West Hoboken; E. M. and J. P. Cooper, of Red Bank; Neaf Apgar, of Plainfield; Dr. Moeller, of Nyack; Hugh Leddy, of Montclair; Frank Class, of Pine Brook; W. Hollis, of Kearney; "Dutchy" Smith, of Plainfield; J.E Wheatton, C. M. Hedden, Harry E. Smith and Gus Freche, of Newark, and "Uncle Billy" Hughes, of Jersey City.

Previous to the contest for the hog a series of Jersey sweeps at 4 birds each, $3 entry, were shot. The scores ran in order as below:

	No. 1.	No. 2.	No. 3.	No. 4.
Ed Collins	0111—3	1111—4	1121—4	0111—3
E M Cooper	1111—4	1111—4	1121—4	0111—3
J P Cooper	1111—4			
Lyon	0111—3	1111—4	1222—4	0111—3
Moeller	1111—4			
J Wheaton		1011—3	1110—3	1112—4
F Class		1111—4	2111—4	22o1—3
Latham			1110—3	000o—0
C Smith			2241—4	1002—2
Hoff				1112—4
Pierson				1011—3

The next event was at 5 birds, $5 entry, 3 moneys. The scores follow:

E Collins	21012—4	C M Hedden	01210—3
Cooper	12112—5	Gus Freche	1o213—4
J Wheaton	22110—4	W Green	12112—5
F Class	11111—5	W Hughes	01121—4
C Smith	01112—4	G Davis	12211—5
H Smith	21122—5	Wm Pierson	12210—4
Jas Cooper	10120—3		

Then came the great event of the day, at 10 birds each, $5 entry, the hog being first prize, 50 per cent. of the money second prize, 30 per cent. third and 20 per cent. fourth. There were 18 entries and as the following figures show the race was shot:

Ed Collins	2111211110 — 9	Wm Green	2111112211—10
E M Cooper	2221122222—10	W Hughes	10202120o0— 5
F Class	0121111021— 7	G Davis	oo0121120— 5
C M Hedden	1121212102— 9	Gus Freche	1o2210120— 7
L Lyon	2225122222— 9	H Leddy	0102100o0— 4
H Smith	11o2121110— 8	Chas Smith	1212010110— 7
Neaf Apgar	202o110211— 7	Wm Pierson	11010001o1— 4
P Jay	2202221222— 9	J Wheaton	1011122100— 7
Dr Moller	2102101011— 7	Capt Jones	2221221121—10

As the hog could not well be divided into three parts, it was left in charge of "Old South Paw" and to-day the tie will be sho off by Messrs. Cooper, Hollis and Jones. The ties for the moneys were divided.

The wind-up was in the form of a five-bird sweep, with ten entries. The ties for second were shot off and resulted in a pretty good fight, as seen below:

	Tie.		Tie.
"Dutchy"	12112—5	Hollis	20111—4 2o
Jones	20112—4	11122111	Freche 2111o—4 *
Hedden	22o22—4	122211122	P Jay 02022—3
Pierson	12011—4	21122111o	Latham 0o222—3
Collins	11210—4	110	Smith 00001—1

*Drew pro rata. Jones and Hedden finally concluded to divide.

A Great Day's Sport at Rutherford.

Last Saturday was a red letter day on the grounds of the Boiling Springs Fish and Gun Club at Rutherford, the main attraction being a team match between that organization and the Passaic City Rod and Gun Club. The teams were each comprised of ten men, and each man shot at 25 bluerock targets under the five-trap Keystone system. As all the Passaic City's members are residents of Passaic City it was stipulated that the team of the Boiling Springs must be comprised of none others than residents of Rutherford. The day was bitterly cold, and the wind which blew from the left across the line of traps, kept up a 25 mile pace all the afternoon. The race was begun at 1:45 P. M., the home team winning by a margin of 33 breaks. Afterward the entire party was served with a banquet, gotten up by Janitor Miller and his wife. The crisp air had given everybody a business appetite, and as a result the table was soon relieved of its burthen. While all the delicacies of the season were on the table, the savory mess of Boston baked beans prepared by Mrs. Miller seemed to receive the lion's share of attention. Among those who partook of the hospitality of the Boiling Springs club were Frank Post of Park Ridge, W. R. Hobart of Von Lengerke & Detmold, Neaf Apgar of H. C. Squires and "Tee Kay" Keller of the United States Cartridge Company, all of whom appeared to be in good health, judged both by their scores in the target sweep and at the table, especially the latter. As before stated the match begun at 1:45. At 5:45 the last shot of the day was fired and in these four hours, 2,415 targets were thrown. This is rattling good work under any conditions. The detailed scores of the match and of the sweepstakes, which followed are given below:

Abbott 9, Peck 9, Paul 9, Jelleme 9, Reid 8, Campbell 8, Wise 8, Short 7, Stone 7, Krebs 7, Apgar 6.

Rochester Rod and Gun Club.

ROCHESTER, N. Y., Feb. 27.—We observed Washington's Birthday by holding one of our lively tournaments, the scores of which are inclosed herewith. The attendance was good considering the condition of the weather. The targets were Peoria blackbirds, 5 traps, 18yds. rise, American Shooting Association rules in each contest, all ties div.:

No. 1, 10 singles, 25 cents entrance: C. S. Smith 8, Van Ostrand 10, Borst 10, Mann 10, Rickman 6, Tassell 6, F. Smith 9, Lefever 10, Hicks 9, Babcock 6, Richmond 8, Rutledge 3, R. Rickman 6, Stewart 10, Holton 9, Truesdale 7, Hadley 9, Gordon 2.

No. 2, same conditions, except 50 cents entrance: Van Ostrand 8, Mann 11, Borst 8, Rider 8, Richmond 6, Lefever 7, Babcock 6, F. L. Smith 9, Willard 6, A. Rickman 8, Tassell 6, Hadley 10, Truesdale 5, Gordon 1, Cooper 7, C. Smith 9, H. Stewart 9, Hicks 8.

No. 3, 15 single birds entrance 75 cents, same conditions: Richmond 10, C. S. Smith 13 J. Holton 13, Rider 11. Borst 13, Mann 15, F. S. Smith 15, Lefever 10, J. S. Willard 5, Hadley 13, Tassell 9, A. Rickman 12, Cooper 6, Stewart 14, Van Ostrand 12, Truesdale 14, Babcock 12, Hicks 11.

No. 4, 20 singles, entrance 75 cents, same conditions: Burnett 14, Mussleman 17, E. Meyer 17, McVean 14, Gavitt 14, Chamberlain 12, Mann 16, Rider 17, Hicks 19 Holton 16, Richmond 13, Borst 13, C. S. Smith 16, F. C. Smith 17, F. B. Allen 10, J. L. Weller 16, H. Perry 17, Rissinger 15, Wilkinson 12, H. Stewart 20, Truesdale 14, Hadley 19, A. Rickman 11, Lefever 17.

No. 5, 10 single birds, entrance 25 cents, same conditions. Hicks 9, Borst 5, Hadley 8, Stewart 8, Van Ostrand 7, D. Rickman 9, Foley 7, Watson 10, Parsell 7 Richmond 10, Whitney 10, J. L. Willard 7, Gavitt 8, Putnam 8, Walzer 8, Lefever 8, Truesdale 9, Forsyth 7, Rissinger 6, Tassell 5, McVean 7, Rider 6, Chamberlain 9, Rutledge 5, Cooper 9, Harris 7, Barnes 7, Bradstreet 7, F. L. Smith 9, C. S. Smith 9, Mann 8, Holton 10, Perry 9, J. Weller 9, E. Meyer 8, Wilkinson 9, Soule 8, Burnett 7, Musselman 7, Byer 9, Rickman 7, Gordon 3.

No. 6, 10 birds, entrance 25 cents, same conditions. J. L. Willard 8, Watson 7, Foley 9, Beyer 9, Van Ostrand 9, Holton 8, E. Meyer 8, Perry 8, Borst 8, Whitney 9, Barnes 8, C. Smith 7, Hicks 7, Killick 8, McIntyre 6, Truesdale 5, Chamberlain 7, Rissinger 7, Lefever 10, Putnam 9, Tassell 4, Forsyth 7, Parshall 9, McVean 6, Gavitt 9, Hadley 9, Harris 8, Mann 7, Weller 9, Rider 10, I. Smith 7, Wilkinson 7 Knoblock 5, Walzer 8, Lane 9, Dewitt 5, Babcock 9, Rickman 8, Richmond 7, Mullan 6, Quirk 7, B Rickman 8, Stewart 10, Soule 7, Norton 6, Mussellman 9, Burnett 9.

No. 7, 20 single birds, entrance $1. same conditions: Holton 17, Foley 15, F. L. Smith 20, Meyer 13, Wilkinson 17, Byer 19, Walzer 13 Babcock 14, Van Ostrand 14, Lane 19. A. Rickman 16, J. L. Weller 18, Borst 15, McVean 12, Hicks 17, Lefever 13 Hadley 16, H. J. Stull 17, H. Frey 19, Crouch 16, Tarba 13, Mann 16, J. Rissinger 13, Richman 15, C. Smith 18, Norton 15, C. Rissinger 14, Stewart 18, Richmond 15.

Along the Delaware River.

THE shooting grounds at Frenchtown, N. J., connected with Wm. Apgar's Hotel, were the scene of some lively pigeon contests on Feb. 26 and 27. On the first day a big crowd was present to see a contest between teams of 10 men each, representing Hunterdon and Mercer counties, but they were disappointed. The Hunterdon county team was on hand, but Mercer county could only muster five men, and Hunterdon refused to shoot with less than ten, so the match fell through. The time was very pleasantly spent in the shooting of private matches and sweepstakes, the scores of which follow.

Friday's Work.

Team match, Trenton vs. Frenchtown, 5 men per team, 10 birds per man, $20 a team:

Frenchtown.		Trenton.	
Wm Apgar	1121002101—7	Ed Hill	2120120021—8
J Warford	1022101221—8—15	Chas Zwerlein	1120001021—6—14

Sweep at 4 live birds, $2 entry, two moneys:

E Hill	2222—4	R Wagg	0112—3
H Millburn	1211—4	J Brinker	2011—3
A Heusler	1211—4	J Glenwood	1101—3

On a miss and out for second Apgar and Millburn divided.

Match at 5 birds, $5 a side:

	Tie.		Tie.
Rupell	22021—4 1122	Hill	01112—4 1120

Wood Wins the Diamond Badge.

THE monthly shoot of the Glenmore Rod and Gun Club took place at Dexter Park, Long Island, on Feb. 24, and was attended by twenty-one members. The day was cold and raw, with a strong easterly wind, and the birds were a fine lot. The club shoot at seven live birds, handicap rises, for the club trophy, a diamond badge, presented by A. Eppig, was an exciting contest. The fortunate man was R. Woods, who shot from the 27yds. mark and who was the only one to grass his seven straight. Elias Helgins, who went out with six kills, lost his fifth bird dead out of bounds. The details follow:

G Pfohlman	1000110—3	J Young	1010010—3
C Helgins	2121c22—6	Dr Van Ord	1112002—5
W Levens	c02121- 5	M Hayden	2000020—2
A Eppig	1001200—3	J Bennett	2101010—4
L Eppig	1001011—4	W Selover	2100202—4
C Engelbrecht	0111221—6	J Schlieman	0110112—5
D Boehme	0110012—4	P Sutter	1002221—4
E Vroome	1211102—4	J Still	0002000—1
W Vorbach	0100110—3	A Jardine	1020002—3
W Strasser	0122202—5	F Maier	c020110—3
R Woods	2121212—7		

After this event came an interesting race at 10 live birds for $10 and price of birds, between W. Selover and J. Schlieman, in which the result was in doubt until the eighth round when Selover lost his grip, as shown below:

Schlieman (25)	1111111111—10	Selover (27)	1211101000—6

Match for birds, 5 per man:

M Hayden	11111—5	J Young	11101—4

Sweepstake, 3 birds, $1 entry, two moneys:

A Eppig	111—3	E Helgan	121—3
L Eppig	0c2—1	M Hayden	102—2
J Schlieman	102—2	J Still	000—0
C Engelbrecht	001—1	Dr Van Ord	212—3
J Young	012—2	G Pfohlman	101—2

The Oskaloosa Gun Club.

OSKALOOSA, Iowa, Feb. 25.—The tournament of the Oskaloosa Gun Club commenced Tuesday morning with a good attendance. The weather was cloudy and damp and the mud deep. Everything was done by the members of the Oskaloosa Gun Club to make it pleasant for the visiting sportsmen. Among the number from abroad was Capt. A. C. Anson, of Chicago; Dr. Kibby, F. Doolittle and Mr. Johnson, of Marshalltown; H. J. Windsor, St. Paul, Minn; C. M. Grim, Clear Lake; Shad, of Emmettsburg; Georgeson, of Kelley; Parks, of Hampton; Cook, of Burlington; Deterline and Marshall, of Keithsburg; Solomon, of Springfield; Yearnshaw, Perkins and Budd, of Des Moines; Breitenstein, of Keokuk. Blue targets and North's electric pull were used and gave the best of satisfaction.

The match between Marshall and Budd was witnessed by 700 people and was close and exciting. Capt. A. C. Anson, of baseball fame, was referee and gave the best of satisfaction.

The match was at 100 live birds each for a $200 purse:

Marshall	2221222122—10	C W Budd	2111111112—10
	2012122111— 9		1111212113—10
	2221210221— 9		1120111211— 9
	1221112012— 9		1112111110— 9
	2221120211— 9		1212111112—10
	2122120022— 8		1011122211— 9
	2222220223— 9		1201121112— 9
	2111212212— 9		2211112221—10
	2211202221— 9		2112111121—10
	0222112112— 9—90		2211212122—10—96

Budd used a 7¾lb. L. C. Smith gun, 3½drs. wood powder and 1¼oz. No. 7 chilled shot in both barrels.

Marshall used a 7¾lb. Colt gun, 3¼drs. wood powder and 1¼oz. No. 7 chilled shot in both barrels.

Other scores of the tournament will be given next week.

C. W. B.

At Gentlemen's Driving Park.

PHILADELPHIA, Feb. 26.—All of the trap shooters around Philadelphia have been looking forward to this day, as the big shoot of the season in Philadelphia was to take place. It was to be a four-cornered affair, 100 birds per man, $200 each, the winner to take all, between the following: J. Frank Kleintz, Wm. Greenwood, John Rothaker and A. Sheetz, Burlingham rules to govern.

We were mostly disappointed, as on Mr. Kleintz's arrival on the grounds every one saw at a glance that he would not be able to shoot, as instead of bringing a gun he brought two crutches. and he could hardly get along with them, he having the inflammatory rheumatism and cannot put his right foot to the ground, and it is swollen to twice its usual size. The others refused to take advantage of him and take his forfeit, and the match was postponed for one week from to-day, and will be shot at the same place (the Gentlemen's Driving Park) Friday, March 4, starting at 12 o'clock.

As Mr. Kleintz was out of the race, and the other three being prepared and anxious for a shoot, they made a race at 50 birds each, for $100 each, the winner to take all, and they immediately got ready to shoot.

Mr. R. Irwin was chosen referee, Wm. Garvin official scorer. Mr. Sheetz being the first to face the traps made a very good kill with his second barrel, and Greenwood did the same; Rothaker killed with his first. At the end of the first half of the race Greenwood had killed 20, Rothaker 19, Sheetz 19, and the interest was kept at boiling point to the finish it being so close, but Rothaker finally scooped the pot.

The detailed scores are given below:

Sheetz	2200202021211211011201202020222320202220036
Greenwood	2100121223011211021110121212121002202101220201—38
Rothaker	1122102100110112212220212012000210121202112221—39

H. T.

A Lively Crowd at Plainfield.

THE Independent Gun Club, of Plainfield, held a shoot at live birds and artificial targets on George's birthday, the attendance as well as the scores being good.

In event No. 1, at 10 bluerock targets, Voehl broke 6, Rushton 4, Pierson 4, Goff 3 and G. Squiers 3.

No. 2, same: Voehl 8, Rushton 5, Goff 4, G. Squiers 3 and Pierson 3.

No. 3, same: Voehl 8, G. Squiers 4, Rushton 4 and W. Squiers 3.

No. 4, same: Voehl 8, Rushton 5, W. Squiers 6, G. Squiers 5.

No. 5, same: Voehl 8, Soper 8, Pierson 5, W. Squiers 5, Rushton 4, Paret 3, Manning 3.

No. 6, same: Manning 7, Pierson 7, Soper 7, Paret 5, Rushton 5.

No. 7, 5 targets: Soper 5, Rushton 3, Manning 3, Pearson 2, Paret 2.

No. 8, 5 targets: Soper 5, "Dutchy" 4, Pearson 2, Manning 2, Rushton 2.

No. 9, 5 targets: Manning 4, Rushton 4, Smith 3, Soper 3, McCullough 3, Pearson 4.

No. 10, 10 targets each, $1 entry: Smith 6, Manning 6, Soper 6, Pierson 6, Goff 6, Rushton 5, McCullough 3, Paret 3, Lair 1.

No. 11, same: Smith 10, Soper 8, Goff 7, Manning 6, Pierson 6, Darby 6, McCullough 5, Rushton 4.

No. 12, same: Craft 6, Mack 6, Darby 5, Voehl 8, D. Terry 5, Trult 5, Brantingham 8, Soper 8, Manning 3, Wheeler 6, Pierson 8, Rushton 2, McCullough 5.

No. 13, same: Mack 3, Darby 0, Voehl 9, D. Terry 4, Trult 7, Brantingham 5, Wheeler 5, Pierson 6, Rushton 6, McCullough 5.

Live bird events, 4 birds each, $3 entry, three moneys:

Smith	2211—4	1012—3	McCullough	0001—1	1221—4
Lair	0001—4	1122—4	Pierson	1201—3	1111—4

Manning	0100—1	1111—4	Squiers	2111—4	1111—4

Final shoot, miss and out, $1 entry, one money.

"Dutchy"	121	Manning	110
Pierson	121	Squiers	10
Lair	112	Smith	0
Voehl	121	McCullough	0
Soper	221		

Artificial Targets at Royersford.

THE trap grounds at Royersford, Pa., were well patronized on Washington's Birthday, and shooting was lively up to the time for lighting the candles. All the events were at artificial targets, and the results will be found below.

No. 1, 10 targets, $1 entry: Wilson 6, Landis 6, Thomas 8, Forest 7, Weinert 5, Crothers 8, Cimes 5. Greeland 4.

No. 2, same: Forest 7, Wyse 7, Weinert 7, Wilson 5, Thomas 5, Landis 4, Crothers 4.

No. 3, same: Wyse 8, Landis 7, Thurman 7, Wilson 6, Weinert 5, Fryer 3.

No. 4, same: Landis 8, Forest 6, Wilson 9, Johnson 3, Thomas 9, Weinert 3, Wyse 6, Thurman 9, Fryer 7.

No. 5, same: Thurman 10, Terry 8, Landis 7, Cleaver 7, Fryer 7, Wilson 5, Forest 4, Thomas 4, Weinert 3.

No. 6, same: Forest 5, Thurman 8, Landis 8, Wyse 7, Terry 10, Cleaver 7, Wilson 9, Thomas 7.

No. 7, same: Forest 7, Thurman 10, Landis 9, Wyse 6, Terry 10, Cleaver 6, Wilson 6, Fryer 3.

No. 8, same: Terry 10, Landis 9, Cleaver 9, Thurman 8, Wilson 6, Forest 7, Fryer 6.

No. 9, same: Thurman 9, Forest 9, Cleaver 8, Landis 7, Buckwalter 6, Terry 5.

At 5 targets each:

No. 10: Forest 5, Terry 5, Cleaver 4, Landis 2, Buckwalter 4, Crothers 3, Greenland 2, Thurman 2, Wilson 4, Weinert 2, Anderson 1.

No. 11: Forest 3, Terry 4, Cleaver 3, Landis 3, Crothers 4, Greenland 3, Thurman 1, Wilson 3, Hines 9, Kane 1, Jones 0, Hodge 3, Quary 3, Dickinson 2, Leidy 2.

Voss and Hartje Win Emerald Medals.

DR. HUDSON'S pet organization, the Emerald Gun Club, held forth at Louie Miller's Dexter Park, on Feb. 25, and a right jolly time did the 26 men enjoy. In fact this club always manages to have a good time whether at home or abroad, and generally has a big crowd at its shoots. The average attendance of this club is probably equal to any in the country, excepting perhaps the Coney Island Rod and Gun Club, which has a much larger membership roll than the Emeralds. At the Emerald's shoots everything is reduced to a system. Dr. Hudson being a good tactician as well as a strict disciplinarian. On the date above mentioned the sky was overcast and the wind blowing lightly. The birds were fully up to the average as to quality. Among the shooters was Thomas H. Keller, "Tee Kay," of the United States Cartridge Company, who is rapidly coming back to his old form, either at live bird or target work, and who succeeded in grassing 8 out of 10 of his birds with a strange gun. The conditions of the shoot were 10 live birds per man, club handicap rises, for Class A and Class B medals, the former shooting at 28yds. rise and over and the latter at 25yds. rise and under, ties to be shot off miss and out. In shooting off ties a second barrel kill counts but one-half a bird. The detailed scores will be found appended:

J Voss	1212021232—9	C Swindell	0210010122—6
L C Gehring	2111210122—9	Dr. Knowlton	1110011020—6
J Maesel	2220102211—8	G Nowak	2011120200—5
T H Keller	2012120021—8	M Pierson	0210011100—5
G Henry	1110201212—8	Dr Hudson	1002100001—4
Dr. Aller	1001111102—7	P Butz	0201200200—4
E Doernick	1001201022—7	H Miller	0000120100—4

The medal was won by Voss, who shot at 30yds., as did Gehring and Henry. All the others stood at 28yds.

Class B.			
W Hartje	1211111102—9	H Reagan	0210020201—5
W Thompson	2101101222—8	Dr Klein	1010002302—4
H Mall	0220021121—7	J Sax	0001100110—4
F Russell	0001110111—6	C Korth	0100000101—3
N Maschel	1010012001—6	Dr Horn	0000100101—3
W Hogan	0010102121—6	T Liney	2000000020—2

Class B medal was won by Hartje. Reagan and Hogan shot at 21yds. rise, the others at 25yds.

The Newton Badge Goes to Dwyer.

DOWN at Engeman's grounds, West End, Coney Island, on Feb. 25, twenty members of the Atlantic Rod and Gun Club braved the cold to attend the semi-monthly live bird contest for the club prizes, four in number. The wind blew lightly from the east. The birds, as a whole, were a good lot. The conditions were 10 birds per man, club handicap rises. There were ties for each of the prizes. First was shot off at 5 birds, second at 3 birds, third at 2 birds, fourth at 3 birds. Below are results:

R J Dwyer (29)	1211111221—10	W Sykes (25)	2122?00112— 7
G Nostrand (25)	1112121211—10	C E Morris (30)	2010101120— 7
J B Voorbees (27)	2112111111—10	H P Donnelly (25)	1021020101— 6
G Kleist (28)	2212222222—10	G Morris (26)	0110002122— 6
C Furgerson, Jr (27)	1111022122— 9	H Krotzka (25)	0110222000— 5
H Balzer (27)	1 21201122— 9	W Gilman (25)	0210100110— 5
R Sutherland (25)	1221101121— 9	T Buckley (25)	0100000122— 4
A Boyle (25)	1021112011— 8	C Mohrman (26)	2011000002— 4
D Monsees (30)	1212110011— 8	T Bullock (25)	2202000001— 5
W B yle (25)	2120120111— 8		

First prize, the Newton medal, went to Dwyer; second prize went to Furgerson, third honors were divided between A. Boyle and Monsees, and fourth went to Sykes.

The Lord vs. Parr Match.

THE following are detailed scores of the match shot at Albany, N. Y., on Feb. 20 between Warren T. Lord, of Troy, and Wm. G. Parr, of Albany, 100 live birds, $250 a side, A. S. A. rules:

W T Lord	1212101110211111111121—23

Minnesota Game and Fish—Concluded from page 200.

here who would go your security? Whom do you know?" "I don't know; let me see," said the special reflectively, "O, yes, there is Gus A——, that keeps the saloon; he's an old friend, he'll back me for most any amount; will he do?" "Yes, that'll be all right, he can drop in here and see us. But say, I hear that there are several good lakes up in —— county; and it's easy to get the fish down here on the —— railroad. But you've got to look out sharp. You know it's not quite according to law, but that's your lookout, we don't want to know where you go or what you do with the net; if you give security for it you can get it, and if you send us good fish, well iced, we'll take all you send and pay you 3½ cents a pound. Fish is what we're after." It is needless to add that further negotiations for nets, etc., here ended.

There are located in the northeastern section of the State men who derive a livelihood by guiding hunting parties, and have deer hounds located at various points easily accessible when wanted for running deer, who have thus far escaped, through the connivance of certain "influential" citizens and the laxity of local officers, the penalty they deserve. But they are being watched as fast as located and some of the dogs have been killed, and more will be the coming summer, and their owners or keepers being better known and listed will be dealt with and legal penalty enforced wherever possible. If it is possible for us to put an end to those who have entrenched themselves behind their "business men" shield, furnishing complete outfits and directing marauders where to go for game, we shall have done much for our own people and generations to come in protecting for our use an abundance of fish and game.

OBSTRUCTIONS BY OFFICIALS.

Strange as it may seem, there are sheriffs, county attorneys and justices of the peace within the State, who, in several instances reported by the specials, from motives which can only be conjectured to emanate from incapacity to comprehend a law, self conceit or personal compensation (pecuniary or political), practically prevent the board from securing convictions. Notwithstanding all this, the law has received the approval and enforcement by some of our most gifted judges, justices, lawyers and legislators. Against all the obstructions and hindrances of the law's full enforcement the Commission cannot help but feel that they have made great headway, considering that this year's effort is only the initiatory and really the first attempt to systematically attempting to regulate and control the unlawful killing of game.

This report would be incomplete without acknowledging to the true sportsmen—devotees of both rod and gun—of the State the many courtesies and kindnesses received by the individual members of the board, and its employees at their hands. By their generous effort and timely aid we have been enabled to accomplish much more than we otherwise might. It was largely through their instrumentality that the present commission was organized, and we doubt not they will value the services rendered when they realize the great disadvantages under which we have been compelled to perform our duties under the law as it now exists. We bespeak for ourselves a continuance of the aid of all true sportsmen in our future endeavors, and trust we may all work together harmoniously, to the end that still greater benefits may result. [Signed] Very respectfully,

R. O. SWEENEY, SR.,
Pres. Game and Fish Com. of Minnesota.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

J. B. K., West Winsted, Conn.—Write to the Dennison Mfg. Co., Broadway, New York.

S. P. M. T., Philadelphia.—1. Yes. 2. By the Marlin Fire Arms Co. 3. No. 4. Foxhound or some dog with a dash of that blood. 5. It depends on what you are going to hunt. If deer, use the heavier of the charges enumerated.

H. S. T., Manchester.—In cleaning a rabbit I found to my surprise a tapeworm in it which measured about 4ft. long; it was similar to the worm found in human beings, only with finer joints and not so large. Are such things common? Ans. Very common. These parasites infest mammals, birds and fishes.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth. 220 pages. Price $2.50. For sale by FOREST AND STREAM.

HAND-LOADED SHELLS.

The great demand for Hand-Loaded Shells has led us to increase our facilities and improve our apparatus so that we can supply the Wholesale trade in addition to the Retail.

We have placed this department in charge of an expert trap shot, who has had some 15 years' experience in loading shells by hand.

We guarantee our Special Quality Hand-Loaded Shells equal to the best.

We are prepared to load with Black Powders, American Wood, E. C., Schultze and S. S. Powder.

We make a specialty of loading the Eley Schultze Shell; salmon-colored paper with long steel conical base and extra strong primers (these are made to our order by Messrs. Eley Bros., London).

Our shells are all packed 25 in a neat box, nicely labeled.

Cash in Banks and Trust Companies at interest,	5,070,153 03
Interest accrued, Premiums deferred, etc.,	5,206,085 49
	$159,507,138 68

I have carefully examined the foregoing statement and find the same to be correct.
A. N. WATERHOUSE, Auditor.

From the Surplus a dividend will be apportioned as usual.

REPORT OF THE EXAMINING COMMITTEE.

OFFICE OF THE MUTUAL LIFE INSURANCE COMPANY OF NEW YORK,
January 25, 1892.

At a meeting of the Board of Trustees of this Company, held on the 23d day of December, ultimo, the undersigned were appointed a Committee to examine the annual statement for the year ending December 31, 1891, and to verify the same by comparison with the assets of the Company.

The Committee have carefully performed the duty assigned to them, and hereby certify that the statement is in all particulars correct, and that the assets specified therein are in possession of the Company.

In making this certificate the Committee bear testimony to the high character of the investments of the Company and express their approbation of the system, order, and accuracy with which the accounts and vouchers have been kept, and the business in general is transacted.

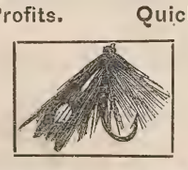
The Chubb Eight-Strip Split Bamboo Rods are pronounced by Anglers to be the "King of Rods;" they are unexcelled for quality of material, workmanship, beauty and balance. Printed guarantee goes with each Rod which warrants them for one year. Rods are put up in an elegant case.



Price each, $15.00.

All lengths, weights and styles are described in our New Chubb Catalogue of Fishing Tackle for 1892. The Catalogue also contains elegant Lithographic Plates of Split Bamboo and Lancewood Rods, and over 100 varieties of Artificial Flies in colors, and describes, illustrates and gives prices of Fishing Tackle used by anglers of to-day.

Send 25c. for Catalogue. This may be deducted from first order for goods amounting to One Dollar or more, by enclosing Coupon which accompanies Catalogue.

THE MENHADEN.

A FISH of the herring family, a little larger than the river herring or alewife, is at present subject of heated discussion in the newspapers and in Congressional committee rooms. The struggle between the advocates of State control of the fisheries and the menhaden purse-seine interests has been sharp and protracted, but it will probably go against the commercial fishermen as heretofore. Massachusetts has closed Buzzard's Bay against the purse-seine on the ground that the menhaden is the principal food of certain larger fishes which inhabit this body of water for a longer or shorter portion of the year, and if this fish becomes scarce the food fishes will cease to come into the bay. The bluefish, the striped bass and the squeteague are the most important species known to feed upon menhaden at Buzzard's Bay; the bonito is another with the same feeding habits, but this is not now prized as a food fish nor on account of its game qualities. Practically the objection to the wholesale capture of menhaden arises from the fear of driving away bluefish.

What are the habits of the menhaden, the source of so much contention? In the Northern States it appears on the coast early in the spring or with the approach of summer and disappears in the fall. It swarms in the bays and sounds when the surface of the water reaches a temperature of about 51°, and is often driven into brackish water by its enemies. The migrations of the menhaden have received comparatively little study. The fish come into the Chesapeake in February or March; they are on the New Jersey coast early in May; enormous schools have been seen in New York Bay on May 10; by the middle of June they have appeared in Long Island Sound and range eastward to Nantucket and Buzzard's Bay. The northern limit of the species is the Bay of Fundy; but in some seasons it does not visit the waters north of Cape Cod. In the fall the schools leave the shores except south of Hatteras, where the fish remains throughout the year. Where the menhaden spends the winter is uncertain, but there is reason to believe that the young at least seek the deep parts of bays when cold weather sets in. The great schools are represented as swimming out to sea to the inner boundary of the Gulf Stream.

The east coast of Florida has been considered to mark the southern limit of the common menhaden, but Dr. Henshall recently sent a fish from west Florida which appears to be the same as the menhaden of Northern waters.

The food of this fish, if we may judge from the examination of stomach contents, consists chiefly of microscopic animal and vegetable organisms usually surrounded by a mass of dark greenish or brownish mud. It seems certain also that oily substances floating at the surface form an important element of its food. Fishermen believe that menhaden consume the minute red and green crustaceans that swarm in the water and help support the mackerel and the alewife. Sometimes the menhaden takes food which makes it liable to decay and renders it unsuitable for bait.

About the spawning of the menhaden little is known; it may be considered established, however, that the fish does not breed upon the coast of New England and New York, although Capt. Atwood once saw a few ripe females in December at Provincetown, Mass., which were detained in the creeks by accident.

About Nov. 7, 1874, Delaware Bay was crowded from Cape May to Cape Henlopen with unusually large menhaden, nearly three-fourths of which contained eggs approaching maturity; but 60 hours later not one of them remained on the coast.

On Nov. 27, 1879, Col. McDonald obtained a menhaden from Hampton Creek, Va., in which the eggs were nearly ripe. It has been reported, but not verified, that the fish have been seen off the Virginia coast about Christmas so ripe that eggs and milt could be easily pressed from them.

The enemies of the menhaden are numerous and formidable. Among the whales the fin-back and the bone whale are especially destructive. Dolphins and porpoises consume enormous numbers. Acres of sharks have been known to surround schools of the fish and annihilate them. One observer has counted 100 menhaden from a single shark's stomach. The horse mackerel is another scourge to the menhaden, and the swordfish and sailfish are not much less destructive. The ravages of the bluefish are so well known as to require only passing notice. The cod, the pollock, the whiting, the bonito, striped bass, and weakfish all take a prominent part in the slaughter of this helpless fish. In southern waters the gar pike, the large-mouthed black bass, the catfishes and the tarpon prey upon menhaden. The commercial fisheries take about 700,000,000 annually, but these are a very small fraction of the total consumption.

It has been stated by Dr. Goode that the mission of the menhaden is to be eaten. Men use it as food fresh, salted or smoked; also in the form of sardines, extract of fish, etc. The scrap left after pressing out the oil is fed to cattle and poultry. The principal uses of the fish are for bait and for the manufacture of oil and fertilizers. The commercial products are worth upward of two million dollars annually; the value of the menhaden to the angler and the line-fishermen is best appreciated when the caprice of the fish, or its sensitiveness to temperature, result in its absence from its accustomed haunts.

DELMONICO'S WOODCOCK ON ICE.

THE New York Legislature has amended the Gould bill by taking away from the prosecuting officers authority to bring suits in a county adjoining that in which the offense was committed. This provision is a part of the present law; experience has demonstrated its wisdom; and we regret that the Legislature has deemed fit to omit such a useful clause.

The provision was originally incorporated in the law for this reason: In certain sections, particularly in the North Woods, prosecutions for game offenses were nullified because local sentiment did not sustain them, and it was difficult to get a jury which would convict. Or it might be that the prosecuting attorneys of the county could not be trusted to do their duty. The transfers to another county have in a large measure corrected this evil; and the game laws have been more efficiently enforced.

In the particular counties referred to there is now less need of such a provision than formerly because public opinion there is healthier and sustains the laws. Convictions are readily secured to-day in courts where five years ago such a thing would have been impossible. But elsewhere, as in New York city, the provision is still urgently needed. It ought to be within the option of the game protector, when he finds that the District Attorney of New York city will not do his duty, to remove the cause to another county.

Take the instance of the Delmonico unlawful woodcock—the case which District Attorney Delancey Nicoll has now stored away, like a woodcock on ice. After making the game protector all sorts of promises, that the case would be tried "right away," "in a few weeks," "on Feb. 23," and more to a like effect, he put it into the City Court, where as No. 6,941 it has a thousand cases ahead of it, and where in the customary order of events it will keep for months to come, like a woodcock in Delmonico's refrigerator. The game protector has all the evidence required; there is no reason why the case, dating from July of 1890, should not have been tried months ago, had Mr. Nicoll displayed any willingness to prosecute the Fifth avenue restaurant concern. If one case like this is to be refrigerated by the District Attorney, we have no assurance that he will not treat others in the same manner. Under these conditions the protector should be empowered to take his evidence and his papers elsewhere. With this provision of the law stricken out, and with New York District Attorneys who would refrain from woodcock case prosecutions, Delmonico's might go on year after year serving birds to its guests out of season, with a snap of the thumb to game protectors and the sportsmen of the State.

SNAP SHOTS.

A REPORT has been going the rounds that the Department of Agriculture was about to introduce the mongoose into this country to make war on vermin. We are enabled to state on the best of authority that the Department has never contemplated the introduction of this pest into the United States. The introduction of exotic species in general is contrary to the policy of the Department, and has been for many years, as appears in the published reports of Dr. C. Hart Merriam, Chief of the Bureau of Ornithology and Mammalogy. The newspaper article which stated that it was intended to introduce the mongoose was based on the vivid imagination of a reporter.

The Pottsville (Pa.) Game and Fish Protective Association is an enterprising organization, whose members, not content with arresting illegal shooters and planting trout fry, are bent on following the lead of such societies as the Massachusetts Association in the good work of putting out game birds. There is also on foot a movement to join forces with other associations in the county in the formation of a county league. We hope to chronicle the success of the plan. We trust that the society may flourish and expand and attain to a green old age, as full of years as the Pennsylvania Society for the Abolition of Slavery, the Relief of Free Negroes Unlawfully Held in Bondage, and the Improvement of the African Race, which has this year held its 117th annual meeting, and reported a good balance in the treasury.

Illinois has been paying a bounty of two cents per head for English sparrows. The period fixed was from Jan. 1 to March 1. During those three months the county treasurers have paid out in round figures $9,000 for 450,000 sparrows. It is reported that there is no perceptible diminution of the pests, and that the campaign has been a failure. The sparrows keep right on multiplying. The beauty of a bounty law is that nobody can begin to estimate the expenditure of public funds its operation will entail. California provided a coyote bounty of $5 per scalp a year ago, and the warrants issued for payments for the year 1891 count up $99,070.

The Game Bill in the New York Legislature is not perfect; certain of its provisions cannot be approved; nevertheless, as a whole the bill is vastly better than the present law. For that reason, every person genuinely concerned with the protection of New York fish and game should use his best endeavors to promote the passage of the bill. The principal sections are printed in our game columns. Immediately upon the Governor's signature, if the bill shall be sent to him, we shall publish the full text of the law as a supplement to the *Book of the Game Laws.*

Because of his rare fund of information about fish and fishing, and his known active and practical interest in fishculture and fish protection, Mr. A. N. Cheney of Glens Falls, N.Y., would make an excellent Fish Commissioner; and his appointment to the office would bring to the board an accession of decided strength.

These lines, ascribed to Whyte-Melville, struck a responsive chord when repeated by Mr. A. D. Stewart, of Hamilton, Ont., at the Syracuse convention of New York sportsmen:

When sportsmen meet, in cold or heat,
No matter what the weather,
No feuds are heard, the thing's absurd,
They're always friends together.

The Sportsman Tourist.

WINTER SPORTS IN NORTH CAROLINA.

LETTER VI.

Hunting in the Po-co-son.

ABOUT midway of the Antiquated & No Account Railroad (A. & N. C. R. R.) which stretches its iron length from Newbern to Morehead City, lies the little hamlet of Havelock, just on the perimeter of the Pocoson. The distance is eighteen miles, and if the traveler be in luck he may do it inside of two hours and a half by rail. Thence a three-mile wagon drive brings him to the central farm station, located amid an omnium gatherum of barns, fences, high gates and outbuildings, such as are properly attached to a well equipped plantation of 1,000 acres. Verily, it is a princely domain, even now, fairly well cultivated and reasonably productive. Yet it is not what it used to be in the old days when labor was systematized and the big bell swung statedly and alternately for the labor and dinner calls. Fully a hundred years ago this land was under cultivation, and its futility seems in no wise impaired or diminished at the present time. A wealth of marl underlies large portions of it, and exposures of it can be seen in many places where deposits have been opened and utilized as fertilizers. Fifty years ago Dr. Donald, a Scotchman of the old school, occupied it, and expended a small fortune in miles of ditches, which traverse the farm with frequent intersections for the purpose of drainage; and traces of a more recent occupation are conspicuous in the presence of ricketty buildings which once swarmed with tenants—the servants' quarters, the gin house, a sawmill and the blacksmith shop, all now empty. One cannot contemplate these bygones without some of that sentimental regret which always attaches to old ruins like clinging vines, and I insensibly find myself wandering about the deserted stock yards and peering into the long stables which used to quarter a hundred mules, and sometimes, in rummaging about the accumulated rubbish, I discover an old brogan or a plantation hoe weighing a couple of pounds, such as were in vogue before the days of modern equipment. More satisfactory than all it is to draw cold water from an antiquated well with a sweep, like one of those which still make the New England hills picturesque; and I may say here that it pleases me "mightily" to find so many points of decided resemblance between the farm people of North Carolina and northwestern Massachusetts, as well as similarity in their household belongings—the big chimney, the andirons, the backlog, the pewter candlesticks, and the dear old well sweep. It shows that we are kin with a common ancestry. There is no other State in the Union so purely native American for several generations back as the old North State. I am told that the census shows not more than 3,000 of foreign birth out of a population of a million and more. Tally one for the Tar Heel!

It was a pretty dark night in December when Mr. Edward Jack, of Fredericton, Canada, and I rode up to the superintendent's house with the county surveyor, four guides and a hound.

We couldn't see much by the light of the lantern, but while we were fumbling at the gate latch a namesake of Jack brayed a graceful recognition from an adjoining stable and the front door of the manor opened wide, exposing a cheerful blaze from the hearth, for the evening air was chilly and the frost was playing sharply about the lower clef of the thermometer which hung in the porch. There is nothing like an eight-foot fireplace and a pitch-pine welcome on a cold night. With a big backlog and plenty of lightwood, one can sit in the chimney corner and smoke and thaw himself into the most enviable good humor. Thus we all sat until we dozed, half stupefied by the unconscionable hunting yarns which were drawled out in the quaint vernacular of the country. Then we turned into bed for good and all.

Meanwhile Mr. Jack and his surveyor, Mr. Brown, had determined to start for the Pocoson early in the morning; and by the time that Cesar, who was master of transportation, had the wagons in line quite a considerable cavalcade was formed. Jack and Brown led with a buggy, then came an ox team drawing a large boat on a wagon, and next myself with Lackey and his boy in a two-wheeled cart drawn by a steer in harness, after the fashion of the country people. By sitting on some cornshucks, which were brought along for fodder, I managed to spread myself pretty well over the bottom and occupy the whole conveyance. Mundine, a noted hunter, followed with his black man Friday, and Brutus, the hound, brought up the rear. Cesar first and Brutus after him, as was befitting to history and the occasion.

A broad, level, graded road led straight away to the border of Lake Ellis, two miles distant, flanked sometimes by forests of virgin pine, sometimes by variegated foliage, and again on one side or both by broad tilled fields, now resting for the winter season. Assemblies of doves rose betimes out of the corn patches and pea fields, and twice a covey of partridges was started. Hosts of larks flew out of the clearings. A canal eight feet wide and four feet deep followed the road the entire distance, and an occasional mallard rose out of it. Originally the canal was cut from Lake Ellis for mill power at Havelock, there being about a seven-foot grade to the mile, and later on it was deepened to drain the lake, whose bottom was planted with rice. Before it was drained it was filled with black bass and yellow perch, and as the water passed off the country people carried away cartloads of the fish, which were left floundering.

Jack was hunting timber land and I was fixed for bear or partridge, it made no difference which. Alligators and moccasins happily did not come into my category, for the temperature was cold enough to keep them torpid. One great comfort of winter hunting in these parts is that none are seen. Northern men are always apprehensive of snakes, though the native Tar Heel often goes barefooted, and don't seem to mind them any more than a pine root hog.

Now, I dare say that very few persons outside of North Carolina ever heard of a Pocoson. The nomenclature of the Eastern Counties is peculiar anyway. Webster's Unabridged laconically defines it to be "a swamp, a marsh," but this is only half the story. Besides, swamp and marsh are two entirely different things. In some minds swamps are inevitably associated with bogs and mire, whereas Carolina swamps invariably rest on a sub-stratum of white sea sand or shell rock. A marsh is a grass meadow or wet savanna bordering the creeks and sounds, with few, if any, trees upon it, while a swamp indicates always a heavy growth of timber, and is not necessarily wet. Pocosons are elevated swamps with the natural growth of swamps. They are not alluvial nor subject to overflow, and they comprise not only swamp and marsh, but large areas of arable land as well, often interspersed with ponds and catch-basins. The soil is a rich vegetable mould, and is practically inexhaustible, as a century of continued cultivation proves. If the reader will refer to my "Sportsman's Gazetteer and General Guide," edition of 1877, he will read what follows about this particular tract:

"To go to the lake region [of Craven county] take the cars at Newbern, on the Atlantic & North Carolina Railroad, 18 miles distant. In the vicinity of Hancock is a heavily-wooded country, consisting of vast pine uplands and swamps, where gum, maple, and other trees grow in dense profusion. Five miles from the station is Lake Ellis, a round lake of about three miles in diameter, and nearly connected with it are four or five other sheets of water. Some of these lakes are open water, others are grown up with grass, like Lake Ellis, through which a punt can be easily pushed. These lakes are the resort of thousands of wild geese, black ducks and mallards, very few of any other kind being found there. The dry swamp, known as Long Lake, to the south and east of the above chain of ponds, is an excellent place to hunt for bears, wildcats and panthers. The pine ridges in that vicinity offer excellent deer hunting."

The foregoing is a very fair description of a Pocoson in a general way; and it also very nearly represents the present condition of the tract as it appears to-day. There has been very little change since 1877, though many old fields which were under cultivation have reverted to jungle or loblolly, and large portions of Lake Ellis which were once sown to rice are now permanently under water and overgrown with crab grass—conditions which have certainly diminished the number of wildfowl, deer and other game which used to resort there to feed. However, the owner, Mr. James A. Bryan, who is president of the First National Bank of Newbern, promises to sow five hundred acres to rice the present year, in the hope of restoring the old prestige. At present there is very little hunting in the forest or open except by permit. Survey lines show that the main tract comprises 57,450 acres, exclusive of water areas; and taken all in all, for accessibility, proximity to creature comforts, and variety and quantity of game, it affords one of the finest sporting grounds in the entire State. That portion of it included in its hydrographic basin and comprising four lakes and 1,800 acres of land, is admirably adapted for a club, requiring not a tithe of what has been spent upon Blooming Grove Park in Pennsylvania to make it equally desirable; and it can be bought for about the same price per acre originally paid by the Park Association. Since its earlier cultivation over $25,000 have been expended in canals and ditches alone, which cross the tract at frequent intervals; and wherever earth has been thrown out rank growths of brambles and briers spring up, which afford an iron-clad shelter for quail.

During a couple of days in January Mr. J. H. Shotwell's party, from Stroudsburg, Pa., bagged 40 quail, 30 woodcock, a deer, and plenty of robins, doves, meadow larks and gray, black and fox squirrels. Larks and doves fly in flocks of hundreds, and are a nuisance on the pea patches in planting time. While Mr. Jack's party was out we picked up enough mallards to keep the pot agoing during the entire week's outing. Dr. Fox, of Philadelphia, has had a snug shooting box on the northern border of Little Lake for three years past, and has always managed, in a happy-go-lucky sort of way, to keep his camp supplied for weeks at a time with venison and ducks, to say nothing of quantities of fine large terrapin, which he picks off the bottom of the lake near its margin. Croppies, black bass, blue and yellow perch and blue catfish are found in Great Lake and Little Lake, and the Doctor always kept several in corral to meet emergencies.

One distinguished feature of a Pocoson, though not always present, is a shallow lake, or lakes, occupying depressions on the summit of the elevation or watershed, and having no natural outlets. Great Lake, for instance, is 138ft. above the sea level, and its sister lakes are 1 and 2ft. lower, respectively. They are all connected by canals, some of them now dry.

Our course took us straight across the bed of Lake Ellis, which we waded in about 1ft. of water thickly grown up with grass, flanking large open spaces which even now sometimes swarm with mallards; then there was a short haul of a third of a mile to Great Lake, and the boat was launched on an ideal expanse. Its water is pure and transparent, and its bottom of hard white sand. All its indented shores are cinctured with a heavy growth of pine and cypress, and embosomed in bright-leaved evergreens in great variety. Such a display of winter foliage was hardly ever seen in an arboretum or botanical garden. There were live oaks and stately magnolias of eight varieties, three kinds of holly brilliant with red berries, red bay, yopon, olive, laurel, yellow jasmine, cherokee rose, three kinds of bamboo vine, gall berry in blue spangles, cranberry, ivy, fetter foot, creeping huckleberry, woodbine, honeysuckle, rhododendron, sand myrtle, wintergreen, flowering moss, mock orange, sarsaparilla and parasitic moss and pendent mistletoe clinging to the branches, all of them evergreens, simulating summer in midwinter in the most captivating manner. Everywhere the shore of the lake is indented by little coves which reach back under the overhanging foliage where the ducks gather to feed, and here the hunter, silently and covertly paddling his skiff along the margin, with one barrel puts them to flight, and with the other shoots them on the wing. It seems unfair to disturb them in their seclusion and take them unawares, and sad indeed it is that bowers so fragrant and fair to behold should be so fateful to the feathered race. As brother Jack apostrophized in an unguarded moment without respect to Cowper:

"Oh, happy shades! to me unblessed!
Friendly to peace, but not to me;
How ill the shades that offer rest,
And ducks that cannot rest, agree!"

I would dwell in that lonely hermitage as trustfully as a duck, with no other occupation than to study and enumerate its lovely flora, of which it is said that no less than 1,800 varieties (of trees, plants and shrubs) bloom here in March, April and May. A natural growth of such a composite character, many of them bearing berries, pods and burrs which remain on all winter, would tend to foster game in great abundance and variety, and certainly there is every indication of its presence. Trails, tracks and paths traverse the woods, the margins of lakes and open savannas in all directions. Roosting places and nests of wildfowl are seen on every hand, and along the water sides are otter slides and muskrat homes, mink burrows and alligator holes. And if such testimony be not sufficient, there is an up-country journal which has just happened to mention that a certain firm in Goldsboro recently shipped 10,000 rabbit skins in two days, besides having in stock 8,000 opossum, beaver, mink, raccoon and muskrat skins.

Cormorants, ospreys, hawks and eagles nest all around Great Lake in large numbers, as many as twenty nests being observed together. Kingfishers and herons make it their chosen homes. Turkeys range throughout the swamps. Bruin has his lair in their densest recesses. Deer are numerous on the pine ridges between Little Lake and Long Lake, and here and there, on eligible places, hunters put up ladders, where they can sit in wait and shoot them as they pass to and fro. It seems to be easy to start a deer at any time in any part of the Pocoson, and a hound is no sooner put down than he begins to give tongue. Several deer were killed while we were on the premises. Once Mundine was out after ducks. The moon had gone down, and he descended from his perch in the tuft of a pine and started for home. No sooner had he got fairly under way than he heard stealthy rustling noises behind him. More than once he felt a slight twitch upon his arm. It seems he had forgotten to untie the long rope which he had fastened to his gun to haul it up with to his perch, but he didn't know it at the time, and his apprehensions became living dread realities. He broke for the shallow water along the margin of the lake, but the varmint still pursued him. He took to the woods, and the evil presence was there. Finally he dropped his gun in dismay, and reaching his skiff paddled desperately for home, where he arrived duly, much disconcerted and torn. The next day, while looking for his abandoned gun, the tell-tale rope gave the "snap" away, and that is how Mundine came to tell us this thrilling story of the Pocoson, but it took him longer than it has taken me to write it.

CHARLES HALLOCK.

SPORTSMEN OF THE OLD SCHOOL.

A FEW days since while cleaning my gun I looked through the polished barrels to see whether they had became pitted by recent use, and unconsciously laid them down and wondered what was the condition of the barrels of some of my old muzzleloaders. I thought of how long it used to take me to remove the nipples, wash the barrels with hot water, wipe dry until the last rag came out without a stain, and putting on the old green baize covers lay them away for the next hunt. From my guns my mind naturally reverted to my old dogs; and Dash, Sport, Snap, Milo, Juno and many others appeared to my vision as in a panorama. Their many fine points and good qualities loomed up as if it were but yesterday; and caused the blood to course through my veins with unusual vigor. Continuing my reverie, I thought of the old-time gentlemen who used to instruct and caution me as to how my gun should be carried, how to load and to get over fences, with many other directions equally pertinent. I thought of the genial and kind-hearted old Commodore Jones, who resides about twelve miles from Washington, in Fairfax county., Va. His farm was in a good game country and the Commodore frequently added to his table by his gun such game as was in season. He had a receipt for cooking a ham, which as nearly as I can remember is as follows: Soak for two days, scrape well, wrap and tie up in a crash towel, simmer for twelve hours, remove grease, and just before taking from fire add some sherry wine and some good cider; let it remain in the liquor until next day; unwrap and serve cold, with a spoon beginning at the butt. His whisky he aged by taking to sea with him on his many voyages.

W. W. Seaton, a former mayor of Washington, and one of the editors of the old *National Intelligencer*, was fond of shooting, and being of noble English descent used to make occasional trips to Europe for the sport, and would bring on his return some fine dogs. He also did much shooting in Maryland and Virginia. "Seaton's Garden" was a square of ground situated in the northern section of this city, and it was there that he raised his dogs. Getting an order from him for a pup, once I disgusted his old gardener by taking the best one in the lot.

John F. Webb, father of ex Commissioner Webb, having been raised in the South was very fond of his gun and dogs, and it was he who gave me my first dog. It was under peculiar circumstances. My father had purchased me a gun, and as we were going home, stopped at Odd Fellows, Hall, Mr. Webb's place of business. While there the body of a young man was carried by, he having killed himself accidentally while hunting. My father immediately ordered me to take the gun back, but Mr. Webb plead hard for me and clinched the matter by saying "Let the boy have his gun and I will give him a dog." This he did, and thus I got both gun and dog.

James H. Marr, a former chief clerk in the Post Office Department, and who was pensioned by act of Congress, was an enthusiastic sportsman and did not give up his hunting until compelled by age. He was a kind-hearted gentleman and was fond of a joke. This is told of him: A certain postmaster-general was much annoyed by a persistent applicant for office, and turned him over to his first assistant, who referred him to Mr. Marr. Mr. Marr told him there was no vacancy, and the applicant was put off from time to time by this plea. One day he rushed hurriedly into Mr. Marr's room saying, "Now, Mr. Marr, there is a vacancy, for the body of one of your clerks has just been dragged out of the canal down by the market. I saw the body when they pulled it out." "My dear sir," gravely responded Mr. Marr, "I am sorry, but the place has been already filled by the man who saw him fall in."

Judge Bibb, a former Secretary of the Treasury, was an inveterate fisherman and a good rifle shot. Many old residents will remember him for his peculiarities, one of which was his wearing the old style of knee breeches and silk stockings. He resided in Georgetown just below the convent, and at his death he was possessed of several hundred dollars worth of fishing tackle, in which he took much pride. It is related of him that while he was secretary, his messenger, a man named Pettit, used to favor an applicant for office by admitting him to the

Secretary's room. One day the Secretary's bell rang violently and on Pettit's making his appearance he said, "Pettit, that man wants a messenger's place, and if he comes in here again he will get it."

Sir Edward Crampton, British Minister, who got into trouble about the Crimean war, was a fine looking old gentleman, straight, with a military bearing, and was a familiar figure in Washington along in the forties. Many of the boys will remember seeing him, too, about the locks at the foot of 17th street, and along the canal by Cumberland's boat house, accompanied by his big black Newfoundland dog. His favorite sport while here was trout fishing; and in season he made frequent excursions to the Great Falls of the Potomac in his carriage, drawn by two large bob-tail grays. Leaving his team in charge of "Old Man Dickey," at the falls, he would proceed to Difficult Run, about a mile distant, and seldom failed to return with a good string. It was from him that I first learned that trout could be caught so close to Washington.

Dr. Waring, who lived on E near Seventh, was a keen sportsman, and though he used glasses, seldom failed to bag his bird, and he was also fond of fishing. One day going through the Center Market I detected him and his friend Dr. Marron paying twenty-five to fifty cents to the country people for the privilege of pulling a few feathers from the chickens' tails to make flies with. Upon my saying that they could purchase the chicken for what they were paying for the feathers they immediately suggested that we go and take something, and we did. The two doctors undertook to cut off my dog Milo's tail in a scientific manner, and after much struggling with the poor brute the doctor's coachman performed the operation with a sharp hatchet with a promptness that surprised them.

Here a scratch and a whine at my door aroused me from my reverie, and Dell and myself were soon on the way to Bailey's boat house, Dell for a romp with the dogs and I to discuss the probabilities of a good hunting season for the next year. TOM MARRON.

WASHINGTON, D. C.

WILDFOWL IN TEXAS.—III.

[*Concluded from page 195.*]

THE next morning Will V. and I procured some shrimp and small minnows, and with our light bass rods and silk lines gave the fish another trial, and by noon we had ten bass ranging from 1¼ to 10lbs., one croaker of about 5lbs., and six channel cats, the smallest of which I could just readily hold at arm's length—probably 20lbs. in weight, while the largest would reach 35 at least.

My luck ran to cats, and when one was hooked no course was open except to tire him down, and frequently this would take a half hour or more to accomplish.

Selecting what fish we could use, the remainder were given to the fishermen who had been seining, and who secured a hundred averaging about 7lbs.

While on the bays, without local knowledge of the proper fishing grounds, it would be surprising if we had caught many fish, and in fact we did not try except when becalmed or in some bayou where we might be camped. In the bay of Espiritu Santo we caught a fine mess of spotted salt-water trout (weakfish), and in Avansas Bay took sixty-three fish in about two hours, mostly silver trout, and the remainder hogfish. This hogfish, so called, has much the shape of a kingfish, but the coloring is different; it is an excellent table fish. Crabs we caught in abundance, and turtles abound, both green and terrapin; but we were not fortunate enough to find the winter grounds.

That silvery reward of patience, plus many good dollars and more or less skill, the tarpon, greatly abounds, but is seldom fished for, and fulfils no apparent purpose except it may be that when some able skipper has a party of tenderfeet on board, taking them to the future deep-water port of the Southwest, and the tarpon are breaking lively, he may with sedate countenance relate the tale of how "one of them fish jumped clean over his sloop, and that close hauled at the time it went right through the mainsail," or possibly he may aver that it knocked a drummer overboard. It depends somewhat on the skipper and considerably on the class of passengers what the tale will be, for the tarpon in Texas is just as worthy as his brother in Florida to adorn a tale either of fact or fiction.

We were told at Matagorda that ducks had been scarce for some three weeks before our arrival, but that we would find them in plenty further west. As we neared Trespalacia Point we found many ducks, geese and myriads of snipe, in size from the oxeye to the curlew, as well as bittern, quocks, and blue, white and pink herons. We killed a few yellow-shanks in fine condition, and expected a feast; but the flavor was altogether too rank for our palates, probably arising from a too exclusive diet of small shrimp, which cover every flat. We were not satisfied with this experience of bay birds. Several brown-backed snipe (*Scolopax noveboracensis*) were killed and cooked *secundum artem* (that means we knew how to do it); but they also were a complete failure.

On the mainland shores of the bays are to be found many brackish flats, and on these jacksnipe were extremely plentiful, it being nothing uncommon to spring three or four couples simultaneously, and to see flying wisps containing twenty or upward.

During our chartless but not aimless cruising, we reached in a thick mist a beautiful motte at the entrance of Carancahua Bay, where we were kept two days on account of a severe norther.

On the previous night the coons had stolen a nice bunch of ducks, which had been carefully hung out of reach as we supposed, and a reserved piece of bacon, reducing our supply to a few onions and a scanty supply of flour.

The norther came in at daylight, and we were treated to the grandest exhibition of the flight of wildfowl that I ever expect to see. Swan, geese, duck, snipe and all varieties of shore fowl were on the move, and commenced to raft at the leeward edge of a sedgy marsh about one-half mile from us. Selecting stands, we expected to soon kill all required, and on my own part I wanted a goose for a change, and did not take advantage of several good shots offered by passing ducks.

A sharp appetite dictating a move, and having heard several shots, my steps were directed to camp and breakfast, expecting to find Will V. with plenty of meat. He was at camp, but without the meat, for his ambition had also been for a goose; and our breakfast, like the preceding supper and dinner, consisted of flapjacks and coffee.

After our scanty meal an attempt was made to get our boat afloat, for the water receded at once with the norther, but the mud was unfathomable just beyond the stern, so the continually augmenting raft of birds was safe from any attempts at disturbance.

Occasional flocks of geese and ducks would fly over the most, but always out of reach, and even a covey of quail kept themselves so well covered in the brush that we could not get a shot at one of them.

About noon I determined to reach the upland along the north shore of the point, and discovered at the head of the cove some ducks sunning on a sand spit within possible gun shot from shore. The position marked, a long detour was made through mud and water, and on approaching the shore a small shell reef with some scattering sedge gave fair cover, and careful scrutiny showed the ducks undisturbed. With the wind full in my face, and blowing nearly a gale, stalking was an easy matter, and the reef was reached without a duck's suspicions being aroused.

It was a beautiful sight. A large flock of widgeon, with their white pates and glossy plumage glistening in the sun. Many had heads tucked under wings, others with a leg and wing extended seemed to be absorbing the sunshine, while a few were preening and dressing their feathers. I own up to a pot shot pure and simple, without excuse except that we were out of meat, and besides I only shot the 12-gauge once (that is to kill), for I also own up to a miss at the second shot, with the excuse that the smoke from the first blew back so I could not see. What a scurrying, fluttering and whistling commotion as the survivors left the fatal spot, rudely awakened from their dreaming siesta. Hurrying on the spit I shot three cripples that were making out to deep water, a fourth getting away, and then gathered up my spoils, an even dozen that made a heavy back load before camp was reached.

Will V. was absent from camp, and when found was industriously gathering oysters, but left his occupation on being told that I had a duck. I purposely allowed him to reach camp first and have time to look around, and was rewarded by his characteristic expression of, "Did you get 'em all?" A "nice" meal followed, according to Will V., and "nice" describes everything, from merely pretty to the sublime, as used by Will V.'s best girl, so why should I be hunting around for adjectives.

The remainder of the day was spent in watching the immense raft of wildfowl, and trying to count the swans, which were conspicuous by their whiteness. Over 100 could be counted, and probably we did not see one-half, as the raft extended a long distance.

The next morning a few geese were flying, but we did not secure any, although Will V. made a most beautiful double miss just as I was calling him to breakfast, and afterward excused the shot, as we had plenty of game.

While at a stand after breakfast enjoying the genial warmth of the sunshine, six swans arose from the raft and started directly toward me. An apparent leader swerved to the right, but the remaining five kept their direct course and presented as fine an overhead shot as could be wished. No pot-shooting this time, for at the instant of explosion I was certain the shot was effective, and refrained from a second shot although the range was easy. The beautiful bird, with closed wings, struck the ground with a shock, apparently jarring the whole motte, for it was extremely fat and heavy, life entirely extinct. It was my first and only swan, and with its capture alone I felt full content, taking considerable pride in the achievement, feeling excusable for the hour spent in examination and admiration of its snow-white plumage and graceful proportions.

Unfortunately it was impossible to ship the specimen to where it could be mounted, and an attempt on my part to take off the skin was a dismal failure, for the whole body was covered with fat at least one-half inch thick, impossible to remove from the skin without soiling the down and feathers. The flesh was good eating, free from any strong taste, for this fowl at least had been a strict vegetarian, as proved by a rigid examination.

During the trip we saw many swan, notably at Cedar Bayou and Black Jack Peninsula, and could have killed several of them, but it seemed like wanton destruction to slay such majestic objects of creation unless compelled by necessity or with a laudable desire for investigation.

The wind lulled somewhat during the afternoon, and after unloading our boat completely, we carried it across the point and started up Carancahua Bay, but did not reach a ranch until nearly noon the next day, being impeded by a head wind, and finding our camp-fire so comfortable in the morning that an early start was out of the question.

At a ranch we found only the foreman, who, being lonesome, would gladly have kept us for a day or two; but after a chat—in which he told us of the fine sport with ducks earlier in the season, verified by two woolsacks filled with feathers—we exchanged some of our ducks for flour, syrup and salt and embarked.

The foreman also told us of a neighbor, who, having killed some seventy odd ducks which he thought would not justify taking time to market, had dressed and dry-salted them, as is usually done with bacon. They were pronounced very fine eating by our informant who had tried them.

A splendid sail down the bay followed, enlivened by driving up large flocks of sprigtails and widgeon and many white and Canada geese. Bluebills, here called black duck, would allow us to approach within a few yards, but they escaped unharmed, for while they are very fat, ducks of better quality were too abundant.

Night overtaking us, we encamped at a motte of salt cedars on the long sandy point dividing Matagorda and Lavaca bays, well protected from the cold wind blowing, and piling the drift wood high tried to rival the beacon light shining out bright and clear at intervals from the lighthouse broad before us.

In a morning ramble we found a freshwater pond where good shooting was had, where some reader of FOREST AND STREAM has probably visited, for I found on the bank of the pond a first-class waterproof canvas coat, practically new, with a dozen or more 12-g. Ely gas-tight and Kynoch shells, loaded by Von L. & D., of N. Y., with E.C. powder, also several 20-g. shells in the pockets. The shells and a box of safety matches were in perfect condition, although a rain had fallen since the coat was left. I am greatly indebted to the loser and return him my sincere thanks, but if this article should reach his eye I hope he will have the kindness to explain why he cut the buttons from a new coat, for every button was wanting, even to the back button supporting the game pockets.

On Dec. 18 we arrived at Port Lavaca and remained until the next morning, bestowing our valuable patronage at supper and breakfast at a restaurant where the meals where at a stipulated price, and although the holidays were at hand with increased trade, there is no doubt that the month of December would show a deficit at that establishment, for these were the only shore meals we had taken during the trip, and our previous gormandizing on ducks, oysters, fish, etc., had only improved our capacity for home-made bread and beef.

During the winter several paragraphs have appeared in FOREST AND STREAM concerning shooting and shipment of large numbers of canvasbacks from this point. The shipments have been large and the shooting may have been extraordinary, but instead of the ducks being all canvasbacks it is questionable if 3 per cent. were of that variety.

Port Lavaca is probably one of the best points reached by rail on the coast for the sportsman, but the hunting facilities offered are very scanty. A good sailboat can be secured, but nothing better than a boat's yawl and a few battered decoys for a ducking outfit. All the successful shooting is done at fresh-water ponds, which are to be found at several places well known to the local boatmen.

Leaving Port Lavaca, fully provisioned, we forced our little boat against a heavy wind and sea down the bay, passing the old town of Indianola, which was destroyed by an overflow some years ago, and about 4 P.M. reached Broad Bayou and passed into the Bay of Espiritu Santo, rejoiced to find ourselves in quiet waters after the rough buffeting we had received, for the day had been miserably chilly and the salt spray could not be avoided.

A good camp-fire, a lemon tempered with water, sugar and spirits and a hearty supper soon equalized temperatures, and with pipes aglow we laughed at the wiseacres who had predicted we could not make it down the bay with our little craft and advised us to take a tow, as a schooner was going our way.

A week of exploration followed, visiting the numerous islands, reefs, bays, coves and dugouts of Espiritu Santo and San Antonio bays. Swan, geese and ducks were very abundant and bay birds of all varieties swarmed on the flats, while fish and oysters were plenty. On some of the islands, especially Matagorda and St. Joseph, deer and turkey are found, but while we saw numerous tracks we did not come up with any of them.

These bays being shallow and full of feed, are unquestionably the best ducking grounds on the coast, and being a long distance from any shipping point are little disturbed by market-hunters. We were, of course, lost in the maze of islands and reefs, but really that was the most enjoyable part of the whole, for we had plenty of provisions and any place that looked inviting we visited, and if time had not to be considered, would have been pleased to remain lost all winter.

On the day before Christmas we entered Aransas Bay, making a camp within sight of the town of Rockport and near a raft of untold thousands of sprigtails, which we had a desire to sample.

During a part of the night the wind blew a promising gale from the S.E., but Christmas morning opened dead calm; and on attempting to leave we did not get two hundred yards from shore, but lay becalmed under a sun fervent as August. About 10 A. M. a roaring was heard, at first supposed to be caused by a railroad train; but we were soon aware of what was coming, and lowering sail were pulling lustily for a sheltering point, which we reached before the norther broke on us.

It was a glorious sight; the water, which had been like a mirror, was in a few minutes white with foam, and huge waves were breaking like the surf on the windward side of the point. The raft of ducks was instantly scattered, and the air was filled with the flying squadrons seeking shelter. Gulls went screaming and laughing before the gale, and even the sedate pelicans, which had been guarding a sandy spit, were forced to spread their snowy pinions and seek some quiet haven.

A genuine Texas norther is extremely vivifying and exhilarating, especially to persons in good health; but we had experienced too many of them since commencing our trip to enjoy it as a novelty, particularly in such an exposed situation.

Happily the norther only last twenty-four hours, and we arrived at Rockport the next day in season to purchase a few necessary articles and get a good start down the bay, for we were curious to view the great deep-water port of the Southwest before finishing our trip.

Nothing need be said in regard to deep-water projects, for the Boards of Trade at Rockport and Corpus Christi will give all the data required by any one, as well as full information regarding the resources and prospects of this country; but we carried out and proved correct a long-formed idea of mine, that good fishing could be had in the deep water, for we had glorious sport with silver trout, caught where probably no one had ever fished before.

On the return trip to Rockport we stopped on an island which is being put into cultivation, and formed the acquaintance of Professor H. P. Attwater, who happened to be visiting there, and were invited to meet him at his museum, for he has now a large collection, and is constantly adding to it, of the products and curiosities of this section, ultimately intended for the World's Fair. All the cereals, grasses, fruits, vegetables, soils, clays, sands, etc., as well as the game—beast, fowl and fish—will have their appropriate places showing the vast range of production and possibilities of this famed section of country.

The Professor was pleased with our boat, and as we were desirous of taking some visible remembrance of our trip back to the interior, an exchange for some unique and valuable curiosities in the way of shells, corals, etc., was effected, and our trip by water was at an end.

Prof. Attwater is a sportsman as well as a collector, affable and desirous of pleasing, and any person desirous of trying a shooting or fishing trip to Texas waters will find him ready to answer any reasonable inquiries, if he can spare time, and the recipient is assured he will not be grinding any little private axe, for the Professor is engaged under the auspices of the S. A. & A. P. R. R. and has no connection with any hotel, boatman or guide.

Our personal appearance after a six weeks' cruise in a small boat was disreputable to say the least of it; but a valise of clothing received by express provided change of raiment, and a bath and shave worked wonders, so much

so that at a hotel where we had registered before the change we were invited to register again—but then all hotel clerks have not the same powers of memory.

We remained at Rockport nearly a week, for the strike on the S. A. & A. P. R. R. was on, and no information could be obtained from the outside world either by wire or mail, and then went to Corpus Christi by sail boat, from which point trains had commenced running, and returned home greatly regretting that the uncertain enforced waiting had not been spent in another short cruise on the beautiful Aransas Bay.

Probably not many readers of the FOREST AND STREAM are so much enamored with hunting and nature that they would care for a trip in which the necessary labor of cooking, rowing and caring for camp would have to be performed by themselves, but that need not deter them from coming to Texas, for there are plenty of boatmen to be found for a water trip, or teamsters with outfits who will attend to camp details.

The season for ducks lasts from October until April, for apparently the ducks in their annual migrations do not linger in the ponds and streams during the flight, as was usual some years ago, but at once seek the points where they are comparatively unmolested.

Visitors should bring with them (at least some of the first ones) good gunning skiffs, decoys and hip boots, as nothing suitable will be found here, and these articles should be easily disposed of before returning, or stored for another trip which would likely be made.

Practically all grounds are free to the hunter, especially if in large pastures, for inclosures of 2,000 acres or more are excepted from the laws in regard to "posting," and it is only near large towns that the signs "pOstEd," so obnoxious, especially to the stranger, are found.

AUSTIN, Texas. J. V. B.

Natural History.

CATCHING WILD ANIMALS.—III.

YELLOWSTONE NATIONAL PARK.

[*Continued from Page 195.*]

A DAY or two after getting the antelope, Dolph and I went out again. I had left some one to look after the animals at home, which required pretty constant attention. We went up on Specimen Divide again, and watched some antelope a while, but could not find any young with them. We had Fisher and a pack outfit, so I devoted my attention to elk. I looked the country over with field-glass, and discovered several bands and lone animals. Away up on Specimen Ridge at the head of Spring Creek Basin, I could see three cows that did not move far from where they were when I first saw them, so I concluded they had calves, and to watch them, if I could not find calves by less climbing.

Close by I found two bands of elk, so we went to a high point where we could command a view of all. There we ate lunch, smoked and rested for two hours, keeping close watch of the elk all the time. I had seen two of the cows in the basin go to quaking asp groves, stay there a while and then come out and feed. It was a very difficult climb to get to them, at least 2,000ft. higher than where we were, and to make the trip the proper way we had to go over a mile west, before we commenced to ascend, but feeling sure of success, I determined to try it. I had seen a small bunch of cows, near where our trail ran. These I thought good to practice on, to see how close we could ride to them. We crossed a bit of a creek then, keeping a low knoll between us and the game, we rode very close to them before we had to expose ourselves at all. Even then there were a few small quaking asps handy, so we rode slowly forward and were within 20yds. of them before they saw us. They were all lying down sleeping. Seeing no young ones, we turned to the right to pass them. We were now so close that I could have killed any one of them with a revolver. They were too astonished at first to run.

We rode on about 50yds. further to the crest of a creek bench. Just under the edge of the slope was a band of ten antelope. We were close on them before they saw us. I was as much surprised as they were, but looked them over carefully for kids. They were all full grown. They walked slowly up the bank, while we sat on our horses, the dogs standing there staring at them. When they reached the bench they only ran a few rods before they turned and faced us. We continued on our course, starting up two more bands, but did not get within 100yds. of either. One band of seven took the old game trail we intended to follow up to the top of the ridge. They made much better time going to the top than we did. This trail is a very old one, wide and deep, and can be seen for miles. Any one passing along the Cooke City wagon road—a mile distant—always notices it.

We rode up slowly. To our right was the celebrated fossil forest, standing among the green timber. Sometimes there will be seen a petrified and living fir tree side by side, one can scarcely tell them apart a distance off. We saw a few lone elk in this timber, but none of them petrified, though one stood still so long watching us climb that I was in hopes he would turn to stone, so that there would be another attraction for those tourists who are never satisfied.

As we came to the last part of our climb, I saw one of the cows we were after chasing a bunch of antelope away from the quaking asp grove, where she had her calf cached. She would make a short run in among them, scattering them in all directions. She appeared to be trying to strike them down with her feet; they would run off a ways and then unite on the trail. When she had got them well away she turned and walked back toward the grove. We soon reached a grove, looked it over carefully, without result, then went to the next; Dolph to the left and I to the right.

We had not gone far before Dolph called "Here's one," and got off his horse. I told him to wait until I came up. He paid no attention to what I said, but started to pick it up. He had on a pair of woollen mittens much too large for him, and the first time the calf made a struggle it slipped through his hands, and away it went down the steep mountain side, bawling with fright, much like a domestic calf, only in a higher key. Bobby started with it, thinking she was going to have a splendid race, a trick she had learned at home. I followed on after it as fast as my horse could go down hill, until the ground became too steep, then off my horse and away down the mountain at a breakneck pace. As the calf disappeared in a grove of fir timber Bobby stopped at my call. The calf had been running very clumsily, its legs flying about in the most awkward way. At every jump I expected to see it fall. I ran on down through the grove, the dogs and Dolph following, on into the open ground on the other side, but saw nothing of the calf. We hunted the ground over carefully, went down to the creek bottom, but found nothing there. I was sure it had not stopped in the grove, because I was too close after it. It was useless to try to get the dogs to hunt it up. They could not smell it, even if it were under their noses. Once out of their sight they would have walked all round it without noticing it. Concluding that I would call that a lost calf, I started back for my saddle horse. I was completely winded, and could not get up the hill faster than a very slow walk. What made it worse was that I had had my run for nothing. I was making a direct line for the pony, and was passing the grove through which the calf ran, when I saw something red under the last one of the small firs; turning aside to get a better look at it, I saw some spots on it. Enough! I had found the calf or another one. Its head was close to the tree trunk, and had it been a large tree I would have passed it by thinking it was a large root. If it was the same calf, as I think it was, it had turned to the left and cached itself very quickly. I walked along as though I were going to pass it, until I could make sure, and then made a grab for a hindleg, which I secured. He struggled a good deal, but I would not let go, and soon had him quiet with a rope around his neck. Then I carried him in my arms to where the saddle horses were.

I left the calf tied to a sage brush, sent Dolph after Fisher, while I jumped on Dandy to ride up to the place where I thought I might find one more calf. I rode back and forth through the grove until I saw the calf, a large one, in a bunch of small dry quaking asps. Riding out of the grove, I dropped my bridle rein, got a small rope and started for the calf. It was in a difficult place for me to reach it, and I was sure that it would start up long before I got near, unless I was very careful. Once on

CALF ELK.

From a photograph by E. Hofer.

its feet I had small hope of ever getting hold of it. I walked zig-zag up to within six feet, when I saw it making a motion as if it would run, and I saw that my only chance was to dive head first through the dry brush. Through I went, tumbling along, smashing the dry twigs and limbs. The calf started, but I fortunately got my hand on one hind foot, and as soon as it found I had it, it lay down again. I was slightly disfigured by a deep cut under one eye, a gash two inches long on the back of my left hand and a hat with the rim torn off, but this had saved my eye. My "shaps" had protected my legs. I did not care for torn clothing, I had secured the calf, and the cuts would soon heal with a little pitch for salve. When I got my rope around its neck, and out of the brush, I looked up, my attention being attracted by a noise I had heard when I was in the bush. There was the old cow coming after her calf. She was followed by a two-year-old heifer. She looked ugly. Every hair stood on end and pointed forward. The calf cried in answer to her call. She came up once within twenty feet, and I think had I been there without a dog or horse she would have attacked me. She ran back and forth, calling for the calf, but it could not come, and the heifer getting frightened ran up the hill, and at last the cow followed. Poor thing, I disliked to deprive her of her little one, when she showed so much distress, but I wanted calves and thought it was just as well hers as another's. This calf was a heifer, quite two weeks old, large and strong. The other was a bull, the only male we had caught.

Dolph now came up, so I had him hold the calf while I went to a snow bank just above to wash the blood from my face and hands. By this time I looked as though I had been in a nest of wildcats. The cow came back and hung around just above me, calling again for her young. This made me feel uncomfortable, so I hurried away with the calf. We were on such steep ground that I did not try to pack the calves on the horse, but led them down the mountain. We had our hands full with them and the horses. On the first favorable piece of ground I stopped the outfit. Not having the panniers I took a long strip of canvas and made a bag-like arrangement at each end, threw this across the saddles, put the calves in gunny sacks, then in the bag, an elk on either side. As one cannot lash a live animal with the diamond hitch, I had to invent a hitch to hold the canvas in place. Besides this, one calf was twenty pounds heavier than the other. I packed the large one high, the other low, so that they would balance properly. It took half an hour to get them on Fisher. Then home we started, Fisher presenting a comical appearance. He looked like a horse with three heads, one large and two small ones. The large calf's neck was 'way out of the sack so that its head stuck up in the air. The other calf put his head across Fisher's neck very soon, but the big one rode almost home before she would rest her neck on the horse's. Fisher paid no attention to their familiarity but jogged along as unconcerned as usual. About dark we reached home with this addition to our family, which was about as large as I could properly provide for, Mr. Yancey having but three cows and only a part of their milk to spare from his own wants. When we released the calves in the pen Bobby came in to see her old friend, but she came near getting killed in response to her offers of friendship. One of the calves jumped on her with all four feet, and commenced to dance on her; I pushed it away, when Bobby escaped. After that I could not coax her inside the gate.

In handling the elk, antelope and deer one had to be very careful not to grasp them by the hair. It takes but a little to hurt them severely. Yet they are tough and will stand a lot of hard usage of the proper kind; but one must not pull their hair. About this time our first elk died. The change of milk was the cause.

One evening Mr. Yancey came in from a fishing trip and said that there were some young foxes about a mile from the house. Next day we went out armed with sacks and a pick and shovel. Upon investigation of their quarters, we found they had but one entrance to their den. This we filled with rocks, after getting the direction in which the hole led with a long willow. Then we dug down to the hole where the end of the stick was. By shoving the stick along, we located the turns, plugged the new hole, and sunk an open cut lare enough to take in a considerable length of hole when we should reach it. By changing off we made good progress, and in a little while could hear the foxes digging, too. While I was cleaning out some dirt I had picked loose my heel broke through into the den, and looking down there I saw a bit of red-gray hair. Taking a gunny sack, we carefully worked around until we had pulled out a young fox, and in a short time we had three. We cleaned the hole, but could not find more, old or young. They were bright-eyed little fellows, gray and black, with a tinge of red. They would open their mouths and cough at us, showing quite an array of very fine sharp teeth. We carried them home and shut them up in a wire-covered box. When any one was about they would neither eat nor drink, but would fight and make considerable noise over their food when no one was looking. We put a chain on one and fastened him to the corner of the house. He was very quiet during the day, but lively and noisy enough at night, barking a greater part of the time. E. HOFER.

EAGLES AND THEIR NESTS.—*Editor Forest and Stream*: In his article on the bald eagle, published in your last issue, Captain Bendire quotes from Dr. Wm. L. Ralph, as follows: "I not only saw them (*i.e.*, these noble birds) in great numbers, but found, with the help of an assistant, nearly one hundred occupied nests, and took thirty-five sets of eggs. I concluded from the great number of deserted nests found, that they must have been more abundant formerly, and on inquiry among the inhabitants, found this to have been the case. From what I could learn, these birds invariably lay two eggs, as I never found a larger set, and where I found a single egg, it was always fresh. One peculiarity of the bald eagle that I have never noticed in other birds of prey is, that when a pair are robbed of their eggs or young, they will not lay again until the next season." One of these days, some one will be wondering where the rest of "these noble birds" have vanished; and for his satisfaction, I am glad that Dr. Ralph is on record as having taken thirty-five sets of eggs. What under the canopy of heaven any man wanted of so many sets of eagle's eggs, only the man himself can tell. But up our way it is a crime to take even one eagle's egg, except it be for strictly scientific purposes, and the exception is so hedged about with safeguards against abuse, that he who should take such a number of the eggs of this noble bird, would be deprived of his collector's certificate by any self-respecting society of natural history which should have issued the same to him, and probably would be punished by the authorities whose duty it is to enforce the game law. Dr. Ralph has accounted for the decrease in the number of bald eagles in the vicinity which he visited. If two or three persons had visited the spot before him and done as he did, well might the number have decreased. I wonder if he realizes that he is responsible for a decrease of just seventy of "these noble birds." the season after his wholesale robbery of their nests? These so-called scientific collectors had better be called off, and the eagle and a few other birds given a chance. Perhaps some scientific person will tell us just how much and wherein science has been benefited by this and other similar depredations among the nests of the "noble birds."—F. D. HALL.

BLUEBIRDS IN NEW JERSEY.—New York, March 3.—While out snowshoeing yesterday I was rather surprised to see a number of bluebirds, and their pleasant and familiar note seemed strangely out of keeping with the winter landscape. By the way, it seems queer that within twelve miles of New York we should have excellent sleighing and the best snowshoeing and tobogganing we have had since the great blizzard.—WAKEMAN HOLBERTON.

Words of Appreciation.

I WANT to congratulate you, and especially Mr. Fred Baker, on that photograph of the family of mule deer. It is the most magnificent thing in wild animal photography that I ever saw in my life, and I would a thousand times rather have taken it than have killed a thousand deer with my rifle. You are peculiarly happy in having been able to ornament your first number of the new issue with such a plate. I hope we are to have more of such work.—ERNEST E. THOMPSON (Paris).

OF course I like FOREST AND STREAM extended. I miss—a little—the familiar green tint, but I shall soon become used to the white paper. I am fond of the paper, because I like its tone, and read in it what plain, common health-seekers, like myself, fee like telling one another. That is the only reason for me intruding on its columns: the feeling that after the day's outing is over the boys sit around the fire and chat, and whether we express ourselves in a way to interest one another or not, good will is there to guide observation, if not experience.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

NIGGER WOOL SWAMP.

IN eastern Missouri, extending from Poplar Bluff northeast for one hundred miles and from twenty to forty miles wide, is a tract of land so level that but for the fact that part of it is covered by water and part of it is not more than a foot higher than the water, it would be impossible to notice any variation from a true level.

It is covered with a heavy growth of very tall trees, the dryer portion thickly grown with underbrush, and the wet ground thickly covered with coarse grass. It abounds with gray squirrels, turkeys, a large variety of rabbits, ducks in season, and a few deer. It is also a resort for the diamond-dack, or timber rattlesnake, and is abundantly stocked with malaria.

One chilly October morning about three years ago, it was my fortune to get out of a warm bed in the sleeper at Poplar Bluff at four o'clock. The only place open at that hour was the bar of the only hotel. At one end of the bar hung the skins of two diomond-back "rattlers," one six and the other six and a half feet long. With them hung the backbone of another one seven and a half feet in length. The barkeeper said they were killed somewhere in the neighborhood; two of them quite recently, by a man living in town. I told him I wanted to see that man, and the barkeeper said he would be round for a drink before breakfast. While we were talking the man came in. He was offered $2 to spend the day trying to show me a snake, $3 if we found one six feet long. "No," said he, "can't go to-day, 'cause its my chill day. Thar's Bill; mebby he mought go." "No," Bill said. "Had a chill yesterday and feel too tired. But stranger, what you wantin' a snake so bad fur?" I told him it was to get the skin. Then the barkeeper offered to sell one of his snake skins for a dollar, but I wanted one of my own killing and did not buy. One man volunteered the information that "thar were slathers uf squirrels out in the swamp, and a feller was purty durned apt to run into a drove of turkeys." The best way to go, was to go out about nine miles on a freight train and back in the evening.

It did not take me long after breakfast to get through with my business and to learn that there was no train going south till night, but that a freight was ready to start through the swamp, and there was barely time to get out gun and shooting coat and get aboard. There was no time to select ammunition, but the coat felt heavy and I got aboard at once. The coat had in its pockets about thirty shells loaded with 8s and one loaded with 4s. Nine miles out the train stopped, and I stepped into the woods. Squirrels were abundant, but the timber was too tall for No. 8 shot. I soon found the best way was to sit at the root of a tree and keep perfectly still till one came within easy range, and in this manner got a fine bag in three hours.

A little after noon I got up on a big log in an open part of the woods to eat my lunch, and afterward was lying on the log half-asleep, when there was a good deal of commotion in the brush some 200yds. away, bringing me to my feet, gun in hand, in a hurry. A moment later a magnificent buck sprang into the open. He was not frightened, but in play was jumping, kicking and throwing his head about. Presently the play stopped and he began to walk slowly toward me, stopping every few feet to nibble at the grass. He evidently had no knowledge of my presence, but he was constantly on the alert. He never took a bite of grass without first putting his nose to it, and then instantly raising his head and looking about. Yet I stood in plain view on a log 4ft. high; not a twig between us. In perhaps ten minutes he had come within 50yds. of me, and was still headed directly toward me. Both barrels were loaded with 8s, but I did not dare to make a motion. So long as I kept perfectly quiet and he did not smell me he might come within 10ft., but one move by me would send him off. About 45yds. away he passed on the other side of a big tree. While his head was behind the tree I got one of the shells out of the gun, and got hold of the one No. 4 shell. Then I stood for five minutes more with the open gun in one hand and the other hand in the coat pocket. Then he passed behind another tree, and I got the shell in and the gun closed, but did not have time to bring it to my shoulder. Any attempt to raise the gun when he could see it would be a failure, for he would be turned before I could shoot, and nothing but a side shot at close range would do with No. 4 shot.

He was now not more than thirty yards away, and I felt more interested in watching and admiring him than in the prospects for killing him. His hair was smooth and glossy, and his eyes looked so bright and lively, and his movements were so light and graceful that he was a veritable beauty. Half a dozen times he seemed to look straight into my eyes, evidently curious as to what I might be, and once or twice a look of suspicion crossed his face.

I now began to realize how painful it was to stand perfectly still for fifteen minutes. Every muscle ached and seemed about to rebel against my will. If the buck held his course he would pass about fifteen feet to one side. There was one more tree that he might pass behind. If he did that the gun could be brought to my shoulder and a killing chance be had. He came right to the tree, rubbed his nose against it and finally went on the other side. When his head appeared from behind the tree the gun was pointing at his eye. I wanted a shot behind the foreleg, but he stopped with only his head and half his neck exposed. Will he come any further? He looks straight at me, and I feel ashamed of the savage instinct that makes me want to kill such an innocent and beautiful creature, and I have about decided not to harm him when suddenly up goes his head, his nostrils are expanded and a look of terror comes in his face: he has scented the danger and in another instant will be off. Instantly the murderous instinct is aroused within me and I pull the trigger. The deer jumps ten feet high, turns round a couple of times in a confused way, recovers himself and in a few seconds is out of sight, no doubt carrying a hundred No. 4 shot in his face and neck, for he was only twenty-seven steps away. I've always regretted shooting at him. If it had dropped him dead it would have seemed too much like cold-blooded murder.

Soon after the deer had gone an owl of unusual size was noticed and a sneak was made for him; although fairly successful in getting a good shot, it was not good enough for 8s to bring him. He was badly hurt and did not fly far, but when followed would keep out of the way. After a good many short flights his wounds proved too much for him, and another easy shot brought him down. During the chase he had flown in various directions, and I had thought of nothing but following him, so when I picked him up I hardly knew which way to go. The clouds were so thick that there was no telling where the sun was and there had been no wind all day. After a little study it came to my mind that this way was north, and to my left hand was west, to the railroad. It could not be thirty minutes walk to it, but forty-five minutes brisk walk showed nothing but gloomy cypress swamp and water 6in. deep all over the ground. Either the woods or myself had got turned round. It could not be myself that was turned, for I knew this way was north. How did I know it? Well, I just knew it, in spite of any or every evidence to the contrary; "felt it in my bones." I looked at the moss on the tree trunks, knowing that more moss grows on the north than on the other sides, but I was surprised to notice that on these trees the most moss grew on the south side, and fell to speculating on the cause of it. Just then the clouds broke away enough to give a brief view of the sun. It was in the northeast and my watch said 3:30 P. M. Both the sun and moss showed that I was wrong, but so strong was the impression that that particular direction was north, that it was impossible to govern myself by them.

I had often ridiculed the idea of men becoming so confused that they would not believe their compass needles pointed north, yet I would not believe the sun was in the southwest at 3:30 P. M. I realized that getting lost in this place was a serious matter, for if a wrong direction was taken I might go fifty miles, or rather attempt to go that distance, through impassable cypress swamps, but I could not overcome the senseless impression that a certain direction was north. The only sensible thing I did do was to remember that I could not be too far from the railroad to hear a train and that a train would pass before night, and compromised matters by deciding to sit still till the train was heard. While waiting for this, a faint boom came rolling through the woods, sounding like a distant cannon. The sound repeated at short intervals, and I soon decided that it was somebody unloading heavy lumber on the railroad. No, it could not be on the road for it was not in that direction, but there was somebody there, and I could get directions about getting out. Remembering that lost people travel in circles, I picked out a very tall dead tree and went directly toward it, picking out another further on as I advanced. After twenty minutes of rapid walking I waited to hear the sound again and presently heard it, but it was further away than before, and instead of being in my front it was behind and to my left. Were the woods enchanted? I had certainly kept a straight course by those trees, yet the noise was now behind me. While puzzling over it the noise was heard in the first direction, and in a moment more in both diretions. Then it dawned upon me that both places were on the railroad and I could be only a little way from the road, as I was nearly, but not quite, on a line between the two points. If I faced the place from where I first heard it, and then turned squarely to the left it would take me out. Practice proved the theory correct, and in a few minutes I stood on the track. Evidently I could not have been two hundred yards from it at any time after realizing I was lost, but had been traveling about parallel with it. I don't regret having had the experience, but don't care to repeat it. My advice to people in such circumstances is, don't get lost.

O. H. HAMPTON.

WORCESTER AND ITS SPORTSMEN.

WORCESTER, Mass., March 4.—*Editor Forest and Stream:* The season just closed has been a record breaker for the Worcester Fur Club.

It was reported last summer and in the early fall that an unusually large crop of reds were being raised for the winter's sport, and the appended score shows that the estimate was well taken.

During the first of the hunting there were few good following days, but later there was good sport, and some of the hunters braced up and finished strong.

In spite of the large number killed there is a good supply left over for breeders. About all of the foxes killed the past month have been bitches, and carrying from six to nine pups, and it is quite a question whether the season should not close Feb. 1 rather than March 1. Season of 1891-92 score: S. A. Smith 13, A. C. White 10, E. T. Whittaker 8, Horace Adams 7, John M. White 6, A. B. Maynard 6, Charles H. Howe 5, Geo. B. Appleby 5, H. A. Moffit 4, E. W. Gill 4, Noah Willard 4, John R. Thayer 3, A. E. Brown 3, L. E. Divoll 3, F. J. Hathaway 3, W. L. Taft 3, H. N. Ingraham 3, E. O. Eldridge 3, A. W. Hunt 2, N. S. Harrington 2, F. E. Harrington 2, Geo. T. Bates 1, A. L. Joslin 1, A. B. F. Kinney 1, H. W. Eager 1, E. O. Conforth 1, N. E. Rand 1, E. J. Bates 1, W. R. Dean 1, G. J. Rugg 1, Geo. H. Cutting 1, James Adams 1, H. L. Kinsley 1, Leonard Rand 1, George Galley 1, E. A. Learen 1, Geo. E. Blake 1; total 115.

The annual meeting of the Worcester Sportsman's Club was held at the Bay State House March 2. A very stormy night kept the attendance down. An entire shake-up in the list of officers was inaugurated and carried out. The retiring secretary's report showed a very prosperous year's work and a well-merited vote of thanks tendered him for the splendid showing he had made, taking the club a year ago with a debt of $136 and showing a balance of $86 on hand, all bills paid at present.

The retiring president's speech called the club's attention to the fact that trap-shooting was absorbing the entire energy of the club to the exclusion of its legitimate objects of late years, and suggesting that something must be done to interest the majority of members who are not trap shooters.

The falling off of the membership list is evidence that this is a fact and one that needs immediate attention. With the infusion of new blood into the board of officers it is hoped that something may be done to interest those who do not feel that smashing clay is the only amusement worthy a sportsman. There is scarcely another sportsman's club in New England that does not cater to some extent to its fishermen and bird hunters. Talking over the fish and game laws at the annual meeting, even pulling in some poor devil for fishing on the Lord's Day (if April 1 falls on that day), and then voting the entire income and energy of the club for the remainder of the year to running a series of shoots is not what is going to tend to strengthen the hold the club has on the majority of its members.

The new officers are, many of them, young men. Some of them are enthusiastic lovers of outdoor sport, and we expect great things from them.

With $200 or more per year coming in for dues they have quite a capital to work with, more in fact than some clubs who are doing good work. The whole of this can be expended in the interest of fish and game.

The past year has proved beyond a doubt that trap-shooting in the hands of a good man, backed by an executive committee who have been instructed by their club to run the shoots so that they would be no expense to the club, can be so managed as to pay its own expenses.

And next comes trouting. Two theories are afloat as to the probabilities for the coming season's fishing. One is that the continued low water of last year will prove ruinous to this year's fishing. This seems logical, and in fact we usually have our best fishing the year following a very wet season.

On the other hand there are a few careful observers who claim that the dry spell last year came on so early that but few trout ran up the brooks, and that the good supply of water which we had later prevented the brooks from running so low as to kill any fish, hence they argue that with good water this spring we shall be able to gather in what we missed last year. This also looks plausible, especially to those who may be influenced by the wish that it may prove true. I incline to this belief myself, and anxiously await the time that will prove which theory is correct. HAL.

IN THE FLORIDA "CYPRESS."

Editor Forest and Stream:

I suppose there are others besides myself who have been trying to find good hunting and fishing, and for that purpose I pen these lines. I would advise a party wishing to have a good time to try Ft. Myers, Lee county, Florida, noted throughout the country as the resort of the Silver King.

The Caloosahatchee has the record for the largest and greatest number of tarpon of any resort in Florida, and for jack and bass you can go out any day and have all the fishing you want.

Our party went not so much for the fishing, since it was the gun we preferred, and to the lover of gun and dog the Everglades are the nearest approach to the hunter's paradise that can be imagined. You can go up or down the river, without any decoys (as I have done,) and have all the shooting at duck and curlew you want; or take a tramp with the dog, and have all the shooting you want at quail, English snipe, (jack snipe,) fox squirrels, black squirrels, deer and turkey. There is other game that I have not mentioned, as I name only those we bagged.

Our party consisted of three others besides myself from this place, and W. Langford of Tampa—with guide six in all. We started from Myers to penetrate the Everglades as we know it here, but the Cypress as they call it. We had for cook and guide Tom Roberts (one of the 'gater hunters, who by the way are the only ones outside of the Indians that know the Cypress). He took his ox team and we traveled 50 miles southwest of Myers, the team following us from day to day. A party going in that part I would advise not to take a tent; we wished many a time during our stay we had left ours at home. The climate is mild and healthy, and one can sleep out anywhere during the dry season.

Through the aid of the ox team we were not bothered by baggage, and yet we had everything a camping party could ask for. If we were out after small game and wished a change, we would go to the wagon and exchange gun for rifle, and thus were ready for deer or turkey.

Many have a notion that Florida is a land of snakes, but I have seen more in Pennsylvania in the same time than I have there. I did not see a dozen in all, and of the rattler I have yet my first one to see outside of a glass case.

At Ft. Myers is the Caloosa House, Mr. Boyd, Prop., rates $2.50 per day, and boats included for this; or if you desire a camping party to go with ox team, or to go down the coast and gun along the rivers, write to Tom Roberts of Ft. Myers, and I am sure you will not think his charges too great, as we found him very reasonable.

Any one desiring further information can write to me or to the above named parties. W. O. FREET.

READING, Pa.

WOODCOCK AND RESTAURANTS.

Editor Forest and Stream:

In your edition of Feb. 25 I notice an editorial entitled "The Delmonico Woodcock Case," and in another column a letter from Mr. H. W. Brown, of Binghamton, N. Y., on the unjust discrimination of the proposed New York game law so far as it relates to the open season of woodcock (Section 149), which exempts Saratoga and some other counties from the original section of the bill and opens the season in these portions on Aug. 1 instead of Sept. 1 as provided by the original section.

If Mr. Brown had appeared before the game law committe of the Assembly as I did in opposition to this section 149 he would have found that the Saratoga hotels have a short season which ends about Sept. 1, and the best market for woodcock is during August, and that the same influence was brought to bear in favor of this section as that to postpone the Delmonico case above mentioned, viz., the hotel interest. I know from Mr. Brown's letter that he is a sportsman and is familiar with the fall flights of woodcock, but I am sorry to say that sportsmen cannot compete against the interests of hotels. I want to say in conclusion in justice to Mr. Gould who introduced the bill and also had Lewis county exempted from the original section, that he told me in person that he was heartily in favor of having the season open on Sept. 1, but that if Saratoga and Warren counties were exempted he owed it to his constituency, who desired it, to have Lewis exempted.

I hope Mr. Brown will now see that this section is to provide Saratoga hotels with August woodcock and to put a penny in the pockets of "game hogs" and market gunners of the adjoining counties.

HENRY A. VANDERPOEL.

ALBANY, N. Y., March 1.

[The obnoxious section has been killed.]

PACIFIC COAST NOTES.

GEYSERVILLE, Cal., Feb. 20.—Sitting here in the warm sunshine and looking out upon a landscape beautiful with green grass and fields of grain just peeping up through the mellow soil, it requires quite a stretch of the imagination to comprehend the record of 15 and 20° below zero reported from "Chicago and the West" in a late FOREST AND STREAM. We have seen snow but once this winter, and then it was three or four miles distant. Last Thursday we witnessed the phenomonon of a real snowstorm upon the summit of Geyser Peak (3,470ft. above us). We first noticed a dark clould gathering over the mountain and soon the summit was completely hidden from view by the falling snow. Presently a beautiful rainbow appeared, the clouds rolled away and Geyser Peak, grown old in the short space of ten or fifteen minutes, came out in hoary locks. The one white peak towering above the surrounding green ones made a very pretty picture. The sun kept right on shining and the larks singing, unmindful of the proximity of the snowstorm.

Our Russian River Valley is a winter paradise for quail and the little birds do not need to huddle together to keep from freezing. Our season closes on March 1, and judging from the beautiful bands which we see almost daily in the vicinity of our home we hope to have some left over for another year. Two nice little broods are still with us that reared their young here last summer, and they are so tame that they sometimes come within a few yards of the house. We almost feel that these birds are our own individual property and are more than pleased that the little fellows have managed to stay alive. About two miles from home not long since we saw a band of perhaps forty birds and, in fact, we seldom drive out without seeing at least one nice flock. Pot-hunters are certainly not numerous in this locality and, although within an easy reaching distance from the city, sportsmen are not over-abundant.

Last summer doves were quite plentiful, but for the past three months they seem to have left the country altogether. What has become of them we do not know. We have been able to hook a few trout since the beginning of the rainy season, though it is not quite late enough for our best fishing. Salmon usually find their way up Russian River and into the small streams tributary to it, but this winter they have been very scarce. Perhaps the fishermen down stream are somewhat to blame for this state of affairs, as we were informed last week, and upon good authority, that the seiners near Healdsburg are meeting with the best of success. A few nice salmon-trout were caught near here one day last week, and they were indeed fine ones, as through the kindness of a friend one of them found its way to our table. A lady who lives near Dry Creek, the other day spied a salmon floundering his way over the riffles, and quickly running to the house for a gig went back and captured a beautiful fish all by herself, and what seems almost incredible, without a scream.

I must tell you of a goose hunt we had in the latter part of November last. It was a bright summer morning, when we set out for the overflow country lying north of the city of Sacramento, on my first wild goose chase. The *Record-Union* a few days before had published a long article on St. Claire and his celebrated cannon, and the work of destruction he was carrying on among the geese, and I was anxious to get out before the feathered tribe had become extinct.

As we emerged from the wooded country beyond the Sacramento River we beheld a scene that filled my mind with anticipations of goose dinners for at least a month. And at the same time there rose a doubt in our minds as to the correctness of the statements made by the *Record-Union*, for there were hundreds of geese in sight, quietly feeding around the edges of the everflow, directly in front of us. A long stretch of perfectly barren, level land intervened, and there was no way to approach save by driving boldly up in front and in plain view of a thousand watchful eyes. I was anxious, if not excited, and it was in vain that R. endeavored to dissuade me from trying to get near enough for a shot. "We can never get within 40 rods," he said. "They'll fly as soon as they see us." "But," I urged, "let us try it anyway. I'll drive up just as close as I dare, then you fire."

After much argument on both sides, he consented to prepare to make a shot, just to preserve peace in the family, although he knew it was no use. Accordingly, shells were placed in the shotgun, and, with my heart in my mouth and the whip in my hand, I headed for the identical flock which seemed most accessible. And I was just as sure of getting one of those geese as R. in his superior wisdom was that he was going to fool away his precious ammunition. I was permitted to make the approach in my own way, my incredulous companion kindly refraining from offering suggestions, and I did so with what I considered the greatest discretion. Keeping my eyes upon the game, I drove very carefully until a grand commotion and a universal stretching of long necks told me plainly that we were discovered. Our horse being spirited and ever ready for a run, I knew about what to expect from her; and bringing the whip into requisition, we took a lively gallop and kept it until the birds rose from the ground. Then I quickly reined to the right, throwing R. toward them and away from the horse's head. Two rapid shots followed, and as soon as I had succeeded in quieting the horse I looked for the result, and I saw four great geese on the ground and waddling off in as many different directions. Their wings were broken, but their legs, evidently, were in good condition. We were between two bodies of water, and the strip of land on which we stood was covered with about an inch of the thickest mud imaginable. Of course, the geese were making for the water just as fast as their little legs would carry them, and there was no time for mincing matters. R. had become thoroughly woke up by this time, and he jumped out of the buggy, and heading three of the victims in one general direction, splattered off after them. The fourth was left for me to capture. He dodged so rapidly to one side and then the other, that I was compelled to drive him around in a circle to keep him from getting into the water. After making a number of rapid revolutions I concluded that he exhibited indications of being about ready to surrender, and I threw the reins over the dasher, leaped out into the mud and started to pick him up. And I was just about as long catching that goose as I am telling this story. I soon discovered that my calculations as to the qualifications of a wild goose were far from correct. His momentum, instead of being retarded by the inconveniences of a broken wing, seemed to be increased thereby. I forgot all about the mud, the horse, in fact, everything else, until I had my goose in my hands. Then turning my attention to the horse, I found her standing just as I had left her, apparently understanding and enjoying the proceedings as well as anybody.

Getting into the buggy, with the bird in my lap, I hastily drove down the coast to see how things were developing at the other end of the line. R. had secured his three geese, and I met him tugging them along and puffing like a porpoise. He was a sight to behold; he was nothing but mud, and I could not refrain from telling him what I thought he looked like. He said I had better take a look at my own make-up before commenting on anybody else.

Although we were delighted at our good luck, somehow we could not make up our minds to go home. We sought a shady retreat under some willows not far away, ate our lunch and watched the movements of the geese.

Hundreds of birds were in sight all day; and whenever we spied a flock on our side of the water we would plan an advance after the manner in which we had done it in the morning. But it was no use; we couldn't get in a mile of them again that day. MARION.

CHICAGO AND THE WEST.

[By a Staff Correspondent.]

CHICAGO, Ill., Feb. 27.—Later on in the season there will begin to be inquiries from gentlemen wanting good upland shooting. I wish that all such would preserve this copy of FOREST AND STREAM and duly refer to it when they begin to write in and want to know where to go, right away, to-morrow, for some chicken shooting. It seems probable that the locality in question is good, although I have not shot there. It will not be worth while for any one to ask about this who cannot give references. I will not give the address to market shooters or to any who cannot certify me that they will live up to my informant's standard of correct deportment. Leaving names and places out I give below the information as it came to me in letters:

"I noticed in FOREST AND STREAM you had inquiries about shooting, etc. Last year friends and myself killed 876 chickens, as high as 97 in one day, for two of us, without a dog. We seldom shot more than we could give away, unless we were going to the railroad and could ship them. If we could have disposed of them, could have killed 5,000. There is no grain, all wild land; forty miles square, fine cover. Chickens and sharptails, mostly latter. Thousands of geese, but not a great duck country. A nice sprinkling of moose, elk, deer and bear. Waders in abundance. When I get the chance I take out parties and put them up; and if you can turn any one this way you will do a brother sportsman a good turn.

"I have killed 59 elk, 3 moose (have not hunted them) and 35 to 40 deer, just shooting the latter as I happened on them, and 2 bear.

"We are isolated and have the whole country to ourselves, being about the only hunters. I have ponies, wagon, tent, stove, etc., and know every foot of country to the reservation. No fishing.

"Please do not publish this letter. We do not want every one in here. My wife and children do all their own work, but if you knew some nice fellows who wanted a quiet, clean place, kindly mention us. We are roughly housed (I'll send you a photo as soon as I can get some paper, I'm out), but do not sell 10-cent butter and live on skim milk. We always have a good garden, plenty of cream, good butter, and game ad lib., not to mention choice lamb, and charge $1 per day, $3 for a team. When I go after big game I get $5 a day and the party finds everything, except my pony, and I get oats for him. For $3 I merely furnish team and my boy; if I go I take my gun, shoot my share, and the party can please themselves what they give me according to the sport I show them.

"If people knew what a corner we have here we'd soon have no game; it is too easy of access.

"Big game, while enough for sport, is not picked up by tyros and not found without experienced guides."

Upon receipt of the above I explained that I was in the newspaper business, and hunting news, not picnics for a few friends. The request for permission to give the news, without names of persons or places, obtained consent in the following letter:

"Replying to your letter of the 3d, I do not wish to reap all the benefit, but you said you had friends applying to you, and in that way I supposed the benefit would be mutual. You can certainly publish the news if you wish, but you will please not mention my name unless to parties who may apply to you, when, if they are respectable, we shall be only too glad if you will put in a word for us. I have a family, and we have to be a little particular. You know as well as I that some go out to see how much whisky they can drink, and that kind we do not want, though by no means teetotalers. I will not hunt with any one full of whisky. We feed guests well, and can give reference. Only charge $1 per day, $3 for team. Every one who comes says we make them more comfortable and feed them better than they expected.

"I have some photos of chicken hunts, if you would like them for cuts, say so and I'll send them, also a snap-shot at two moose calves.

"Game laws have been well observed, no arrests, but the presence of a local warden has had a deterrent effect. Don't think a moose has been killed up here and no elk or deer since the season. Chickens are in large packs and the snow everywhere tracked up with them; with a good season there'll be millions, like it was in the early '70s."

Next summer or fall if any gentleman of approved standing wants to learn the name of my "unknown," I shall be prepared to give it, but not till close to the opening of the chicken season, and only to well accredited persons. Any applicant must have been a reader of FOREST AND STREAM for a term at least six months, and I shall have to like him, or he don't get this name. That's the kind of a bureau of information I am this evening. The man that likes FOREST AND STREAM the most, and has read it longest, and is the most faithful believer in the paper and its doctrines, is the one that has the best chance on the immortal snap herein.

Last week articles of agreement were signed whereby Mr. Henry Smith of 183 Clark street, was to swim a match with Mr. T. W. McFarland of 79 Clark street, in the icy waters of Lake Michigan. Both contestants were to wear Boyton rubber suits, and Capt. Paul Boyton was to go along as referee. It was Mr. C. S. Burton who first agreed to contest with Mr. Smith in this dubious honor. Both these gentlemen are readers of FOREST AND STREAM, and interested in natural history. They told me privately that they were bound to get a Labrador duck, as they felt sure that supposedly extinct bird existed in quantity in the center of Lake Michigan in winter. At the sticking point, however, Mr. Burton acquired a sudden case of bad rheumatism, and declined to start. Mr. McFarland took his place. Mr. McFarland's courage was good up till yesterday morning, when it transpired that he had suddenly became afflicted with a carbuncle on his neck. This latter had not been visible the night before. A substitue was found in one Whistler, a light-weight wrestler, who agreed to go out with Mr. Smith.

At 3:30 yesterday afternoon these two actually did go into the water with Boyton, in the presence of a crowd of 3,000 people, and they stayed in for 42 minutes. At the end of that time Whistler said he had enough, and was hauled on board the tug which carried the reporters. Mr. Smith came aboard a little later, and then it was learned that his pluck had been of a real sort. In going over the boat as he went into the water, he cut a hole through the heavy rubber suit, and although he could not sink, he lay for 40 minutes in a bath of ice cold water, which poured out in bucketsful as he was lifted into the boat. It took hard rubbing to restore circulation. Boyton went through his usual water performance. Mr. Smith is one of the best known sportsmen of this city, and a man well to do, and how he ever concluded this singular arrangement, which came so near being serious, must remain a mystery; but he was clean grit and stayed through and won. After he saw Mr. Smith fairly in the water, Charlie Burton made frantic efforts to jump in also, accoutred as he was, but his friends persuaded him he didn't mean it. Mr. McFarland, the man with the carbuncle, comes in this morning for a plenteous "roast" in the daily papers, which gave the matter much attention. "Hank" Smith is the hero of the town. "If anybody wants to go swimming in the lake now, he can," says he, "for I don't want any more of it. But after this I can decline with thanks, and won't have to plead any galloping rheumatism nor any papier maché carbuncle. I'm the only real Labrador duck champion of Chicago, and I pity these people that haven't got any nerve." I have been coon hunting all night with Mr. Smith in Indiana before now, and know he has plenty of staying quality. He will probably show this now by staying out of the water.

Mr. Chas. Antoine is back this week from an extended purchasing trip for his firm. He was absent over a week in New York, his old home.

Dr. Abbotts, of Austin, returned not long ago from a long trip to Honduras and Central America, in which he had some interesting experiences in sport of a novel sort, of which I hope he will tell more at a later time.

Indiana readers may be interested in the following card, published by the Fish Commission of that State:

OFFICE OF FISH COMMISSIONER.—Richmond, Ind., Jan. 15.—I have made arrangements by which I can have orders filled for breeding fish, at Reservoir in Ohio, for private pond owners, such as bass, channel cat, pike, croppies and blue sunfish, one and two years old, at $3 per hundred, to which must be added cost of cans and freight charges to destination. As the U. S. Fish Commission does not furnish fish for private ponds, I have made arrangements as above and will promptly attend to all orders and inquiries.—W. T. DENNIS, Commissioner of Fisheries, Indiana.

Mr. Dennis writes me that he will meet the protection committee of the Kankakee Association at English Lake club house at a date early in March. E. HOUGH.

UNCLE BARNEY'S STORY.

Editor Forest and Stream:

I think lots of your readers would enjoy the acquaintance of Barnard Saucerman or, as he is better known, Uncle Barney. He is a gunsmith, a tall, quaint Pennsylvania Dutchman, honest as daylight and about 70 years old. His name on one of the old time muzzleloading rifles of this section is as well known and as good a guarantee of excellence among the older people of the vicinity as that of Greener, Parker, Colt or Winchester is to the sporting world in general. I seldom pass Uncle Barney's shop without exchanging a moment's gossip, and many are the pleasant reminiscences I have enjoyed in this manner. A few days ago the old man hailed me, and the conversation turned upon a very fine collection of ancient firearms which are on exhibition in a store in Muncie.

"Yes," said he, "I learned to shoot with the old flintlock, and many a turkey and deer have I killed before the percussion cap came into use. I remember well my first deer. I was only eight years old. I had found that a deer was using on some fodder in my father's field; and I had heard my brother older than me say that when it rained in the afternoon and then the sun came out bright in the evening the deer would come out to feed before night. On this particular evening I was sure that everything was just right, so I slipped into the back room and set father's gun up against the open window and went quietly around the house to get it. But my older brother caught me taking it out. I coaxed him to let me go on, however, as I was sure I would kill a deer. He only laughed and told me to be careful.

"Arrived at the field, I crouched down against the fence in the corner of a woods and waited with the gun between the rails. I had been sitting perfectly still for perhaps fifteen minutes, when I heard a slight noise behind me, and turning my head I saw a three-point buck not two rods behind, standing perfectly still and eyeing me curiously. Here was a fix. The long, heavy rifle sticking through the fence, my back to the deer, and the slightest motion might send him skipping away. I hardly breathed. Very slowly I moved the gun around and brought it to bear on the other field; slowly, very slowly, I turned my head, and there stood the deer. He had bounded over into the clearing and then perhaps, attracted by my curious motions, had stopped and was looking squarely at me. Again the gun barrel was between the fence rails. There was no chance to raise it to my eye, and I would hardly have dared to do it if it had been open ground. Resting it firmly across my hip and taking the range as best I could (I suspect I shut my eyes) I pulled the trigger. When the smoke cleared off there was the buck, kicking and wallowing on the ground.

"Proud? I was the proudest boy in twenty miles, and I always could get the gun after that." L. H. H.

A DAY AT RAGGED ISLAND.

Editor Forest and Stream:

President Harrison has been elected an honorary member for life of the Ragged Island Gunning Association of Virginia. He spent three days there recently as the guest of the Association, and while, on account of adverse weather conditions, he did not secure large bags of either canvasback or redheads, he proved himself such a good sportsman that his election was carried unanimously.

The Ragged Island Club is situated on the Back Bay in Princess Anne County, Va., and just north of the North Carolina boundary line. It is reached by a drive down the Atlantic beach from Virginia Beach of eighteen miles, and a row of two miles across from the Beach, or by steamer from Norfolk, through the picturesque Albemarle and Chesapeake Canal and North River to Pungo Ferry, thence by a drive of six miles to Hills Landing and by row or sail boat, three miles across the bay to the island. Ragged Island itself is about three miles long by a mile broad, it derives its title from the innumerable inlets, straits and ponds by which it is cut up and is one of the best pieces of marsh on the Atlantic Coast for wildfowl. The surrounding waters are brackish and shallow and abound in wild celery and tape weed, so that the canvasbacks and redheads which seem to have deserted the Chesapeake this last winter would appear to have betaken themselves to the Back Bay of late. The Knott's Island marshes lie a few miles to the southward and there are several clubs in the near vicinity, but Ragged Island is acknowledged by even the professional gunners to be the best preserve from North Island to Currituck Light House. The island was rented for some years to some New York and Boston sportsmen, who only had a small hut upon it and was shot over or from by the market guuners almost without molestation. About a year ago, however, Mr. C. A. Woodard, an enthusiastic sportsman of Norfolk, learning that the property was to be sold in a partition suit, interested some of his friends, notably Mr. Beaman, Mr. Burke and Judge Portlock, and in a very quiet manner had a representative at the sale, who much to the surprise of the New York lessees who were also represented, outbid them, and although a motion was made to set the sale aside on technical grounds, it was defeated and the Norfolk gentlemen entered into possession of the property. They set to work vigorously at once and erected one of the prettiest shooting club houses on the coast, appointed a game constable, and within a short time placed the majority of their shares. There are thirty shares, of which the two remaining are now held at a thousand dollars each.

It was my privilege to enjoy a day in January last at Ragged Island, where I had been for geese and brant on the Old Dominion steamer Newberne, retracing the steps of your able correspondent, Charles Hallock, through Albemarle Sound, the Coinjock Cut and upper Currituck Sound through the Canal, to the Locks. We had left Roanoke after a howling and bitter cold northeaster, which had made shooting impossible. We did not realize during the evening, sitting round good Captain "Tom" Southgate's comfortable fire in the Newberne's cabin, how bitter cold it was outside. We had decided to have Captain "Tom" drop us at Pungo Ferry, but when we awoke at 8 A. M. and looked out on one of the most beautiful still and cold winter mornings that I ever saw, we were at the Locks, and Captain Tom's cheery voice sang out, "I was afraid you thin-skinned New Yorkers would freeze if I put you off at Pungo three hours ago, so I carried you here." Farewells spoken, the Newberne left us to steam her twelve miles to Norfolk, and after an hour's wait we boarded the queer little steam craft W. B. Rogers, which carried us three hours back to Pungo. It was so bitter cold that thin ice was forming, even at midday, on the canal and river. Arrived at Pungo we managed to get our traps and finally ourselves into a high cart that we hired to drive us to Hills Landing, where we knew the Ragged Island Club boat was awaiting us. Wednesday and Thursdays are closed days for shooting in Virginia, so we knew our time was not lost, and when we arrived at Hills Landing just before sunset, where we found Superintendent Waterfield and Constable Williams awaiting us, and where we were joined by three of the club members who had driven down from Norfolk, our hearts were cheered and our blood stirred by the evening flight of the wild fowl. Never shall I forget that sight! The sky was cloudless and the winter sun just sinking flushed the whole sky "rosy red." Against the pale rose in the east dark clouds, interspersed now and then with patches of white, seemed to rise and fall, and through the still air came the far off "honk" of the geese and "coo" of the swan. Safely on board the club yacht, a large Cape Hatteras skiff, we were poled across the bay and around the north end of Ragged Island to the club house, situated in the center on the east side. Somewhat chilled by the long trip we found a delicious hot supper awaiting us, cordial greetings and canvasbacks cooked as they should be. Our party of three was portioned off to a large and comfortable bedroom with six beds. Through mutual agreement before retiring the sixteen or more blinds on the island were allotted, and we retired early to dream of the morrow's sports and to pray for a stiff breeze to make the birds move.

Aroused at 4:30 after a good breakfast, the party separated. The hoped for breeze had not come and it was still bitterly cold. With my good number 10 and a heavy coat to wear, in going to the blind, I was given the stern seat in the skiff, my friend F. took the bow, our dog crouched between my legs and burly Game Constable Williams proceeded to pole us to the blind. It was still dark and the air was so still we could hear the breakers on the outside beach and now and then the quacking of black ducks in the marsh behind us and the coo of the swan. We had gone perhaps a quarter of a mile when we heard the sound of breaking ice and came up with two or three of the skiffs which had started before and whose occupants had found it necessary to break the channel. Arrived at the blind on the south end of the island we disembarked and Williams put out the decoys. Delayed as we had been by the ice, the sun had now risen and there was no flight and only a distant report now and then apprised us of the fact that our friends had reached their blinds. An hour passed with no sign of life, when suddenly Williams cried "down" and three canvasbacks came up from the southward. There was no wind to make them fly low across the point and although we almost dug into the ground in our anxiety to conceal ourselves, they detected us from their elevation, wouldn't "stool" and sheered off. They were followed soon by two others also too high, and then came slowly winging his way to our decoys a shelldrake, which F. knocked over with a pretty side shot and then three more canvas, one of which we winged but which again escaped us. By this time there began to be a movement among the feathered host, a little breeze sprang up from the southwest and the shooting was good and continuous. First two or three, then a pair of red heads, then a small flock of butterballs, and then six of the fine canvasbacks. We poled back to the club house at noon hungry and contented where we found most of our friends had returned equally happy. Just sitting down to lunch word came that a flock of swan had settled in a pond five hundred yards away. We rushed to the top of the club house where my friend S. from the little platform put his Remington five hundred yards and plumped a bullet in among "the whiteness." They rose slowly and majestically and departed and we resumed our lunch.

The afternoon brought warmer airs and we started again for the blind. As we were about to pass a point where two of our friends had stationed themselves and where they had put out their decoys, we noticed one of them walking along the edge of the marsh and the other standing up whistling in the blind, with as pretty a flock canvasbacks as one ever saw coming straight for the decoys and entirely unnoticed by C. We waved, we whistled low, and finally, as the ducks, well in gunshot, but disgusted themselves, sheered off, we shouted madly, and in chorus, "You blank fool—*Where are* your eyes?" I wish your readers could have seen the look of disgust on C.'s face when he saw the ducks departing, and he informed us confidentially that evening that he had been punished for his foolishness by not getting another shot that entire day. We had in our turn a fair afternoon of sport and returned to the club house after dark and after witnessing another evening's flight of wild fowl. Two of our friends on their way home picked out a fine goose from a low flying flock and it was a cheerful little company that gathered round the blazing wood fires in the cozy little Club house and made merry with song and story. Business made it necessary for us to depart next morning at dawn but on our way over to Hills Landing in the yacht, S. killed two of a flock of blue peters at three hundred yards with his Remington and crippled a third, which a bald eagle promptly swooped down upon and removed from our sight. We reached Norfolk the evening of the same day and were in New York the next morning with most delightful reminiscences of "a day at Ragged Island." J. B. T.

THE BIG MOOSE.

IT was in the month of September. I was with a party of men constructing a dam at the outlet of Ten-Mile Lake. Moose were plenty in the vicinity and their haunts were seldom disturbed; the dam had to be completed before the fall rains, consequently no person could be spared to hunt the game, which deprived us of the luxury of much juicy steak at our table, to say nothing of the delicious soup that their muffle and brisket would furnish. A party of men some two miles below us witnessed the wonderful sight of fifteen of those noble fellows crossing the stream in one afternoon. Our camp was out of beef and one of us must foot it to the village, fifteen miles away. The lot fell upon me. I started in the early morning, leaving a heavy double-barreled gun behind for the first time for several trips. The day promised to be warm and I intended to be as expeditious as possible. The morning was bright and the songs of the birds cheering. Soon surmounting a high ridge I struck the tote road and was making good time when my attention was aroused by an unusual noise a short distance away. There stood the biggest wild animal I ever set eyes upon—a monster moose. I had seen many of his kind, but for size and beauty this fellow surpassed them all. He was fat and sleek, his hide shone in the morning sun, his stately form was clearly outlined against the blue sky, his head and antlers were enormous, the latter could not have been less than five feet across, and there were numerous branches growing from the blades. Altogether it was a picture not soon to be forgotten. I was tramping fifteen miles over a horrid tote road for beef, and there it stood, a pile of it within 20yds. and the gun one and one-half miles away.

To go back for the firelock would be useless, the monster would be gone on my return. One shot from the gun that was left in camp would have saved me the fifteen-mile tramp, secured the much-needed food and made me the happy possessor of those fine antlers.

A whiff of wind gave him the scent of his enemy and this stately creatute was soon lost in the distance.

SHEET HARBOR, N. S. M. M. F.

PROTECTION OF DOES.—*Editor Forest and Stream:* I am glad to see that the clause forbidding the killing of does has been eliminated from the New York game bill. Such a law would be another "nail in the coffin" of all kinds of hunting except hounding. The still-hunter even cannot always be sure, on account of brush or distance, of the sex of the game. But the worst is that no one who does not care to would live up to it. Why make a law that can be so easily evaded. A good knife and five minutes will at any time destroy all proof of sex. Thus how could we who live in counties where hounding is prohibited kill at all—without large chances of violating the law? We are not only willing but anxious that the game should have proper protection, but it is not to be expected that we want all protection for ourselves and the broadest license for everybody else. We naturally want some chance with the rest of the State.—R.

TESTING A GUN FOR LOADS.—Magog, Quebec.—I commenced to use a gun about thirty years ago, while so small that my father had to help me hold up an old flintlock. Since then I have owned a great number of guns, and now have seven, ranging from .22 to .50cal. rifles, and from 16 to 8g. shotguns. The only way to tell how to load a gun is by trying it with various charges, wadding, etc. Then you know how to feed it to get the best results. When I get a new gun I take it off alone and try it thoroughly, then bring it before the public. By doing so I have sold many a gun for twice what it cost me.—E. D. S.

A MEMORY OF THE MOUNTAINS.

THE following extract from a private letter received from a gentleman residing in Montana was recently received by a sportsman of this city. It refers to a trip made last autumn, and draws a charming picture of a very beautiful region. The writer says:

"I want to put in at least ten or twelve days in Red Eagle Valley, for I am positive that there is much to be seen there that few white men have ever seen. You could do some exploring there to good advantage. Even now I can see the valley from the rocky ledge on which we stood, the basin and the falls that you and Norris climbed the mountain to see, the glaciers at the upper end, and the gap between Kootenai and the red mountain on the left, the lake which we had left behind us, calm and placid as a sheet of glass; before us the pines with the soft murmur of wind in their branches, and far as the eye could reach, mountains piled upon mountains. When I think of the magnificent view we obtained from that ledge of rocks I never cease to wonder why no one has ever gone there to photograph it. It is worthy to be painted by a Bierstadt. I shall surely live in the belief that you will pay it one more visit this summer if no more," H. H. G.

DOG AND FOX.—The following note of fox cunning is extracted from a Mumford, N. Y., letter to Maj. H. W. Merrill, of this city: I must tell you about a chase my dog had with an "old red"—one that had been run before judging by his actions. It had been thawing all the morning. About 2 P. M. I heard the hound running out west of the house as though he had a fresh track. I paid no attention to him till I heard him give tongue, as he does when running by sight. Then I went over to the woods and found he was running a fox. He went directly west with it, and judging he would bring it back I went to the barn for the gun. I had only returned when I saw the fox jump from the road into the big lot going in a N. E. direction, so I ran down to get a shot at him, but for some reason or other he turned and went through the grass where I first was, so I lost my shot. It was a sight to see that fox. He would get on the fence and walk it for a long way, then jump out 10 or 15ft., take a circle, return to the fence, take another walk, then jump, going in a straight line for quite a distance, only to return on the same track he went out on. I had an opportunity to watch him for fifteen or twenty minutes before the dog came up; and it was a sight to see the dog work. He would walk the fence as well as he could, Always watching for the place where the fox had jumped. I followed the dog and fox east for a couple of miles, when a very heavy fog came up, rendering it useless to go further; but the dog returned with the fox about 9 o'clock in the evening, where father called him off as he was crossing the farm just south of the barn. I never saw a fox use so many little tricks to puzzle a dog before.—J. M.

A TRAIN RUNS DOWN A BUCK.—Manchester, Va.—One night, not long ago, the through passenger train from the south killed a very fine buck near Reams's Station, on the Petersburg Railroad, about eleven miles south of Petersburg, in Dinwiddie county, Va. The deer was picked up from beside the track early the next morning by the section men, who brought it to Reams's Station on a pole car and skinned it, delivering the choice steaks to some of the section hands. Mr. W. T. Reams, a popular engineman of the Atlantic Coast line, told me to-day that he had been running engines on the Petersburg Railroad for nearly twenty years, and had killed crows and turkeys, but had never killed a deer before. He regarded the occurrence as being a very unusual one. Our engine inspector showed me a dove the other day which he found wedged in between the air pipes on the front of an engine that had just brought in a train. I never heard of possums trapped in a city before I came to Manchester. A watchman at the Atlantic Coast Line shops here has trapped three just outside of the shop door. Dick invited me around the other night to show me his trap. After stumbling over a pile of scrap iron back of the shop, we came to the spot, and found the trap "settin'," ready for another possum—an old hare trap, almost big enough to catch a Newfoundland dog. Dick baits with a salt herring, the best bait for possum he has ever used.—A. P.

BIRD DOGS THAT STAY HOME.—A Worcester, Mass., correspondent has this to say of the bird dogs which are never sent to field trials and bench shows: The cuts of the dogs and handlers at the field trials were very interesting to me. Dogs and men as they are at their work have a great attraction. I have been thinking that I would gather up pictures of a few of our bird dogs and send you—dogs that are bred and broken for hunting dogs—dogs that can and do hunt from daylight till dark as many days a week as their masters may be fortunate enough to get away from business—dogs that we kept at home out of sight when the bench show was held here a few years ago, but were trotted out the next fall to do the season's work. I wonder how they would look to some of the "old guard," men who hunt and never owned a dog of whose pedigree they knew more than that he was "a bird dog."—HAL.

AN ARKANSAS DEER SCRAPE.—Little Rock, March 5, 1892.—*Editor Forest and Stream:* In an article, entitled "An Arkansas Deer Scrape," in FOREST AND STREAM for February 26, a correspondent, "Noctus," relates a very exciting story of the rescue, through his eloquence, of himself and party, from the perils of a prosecution under a statute of this State (Arkansas), which makes it an offense for non-residents to hunt in the State, and "leaves a heavy fine and imprisonment with the court." We "natives" can imagine the feelings with which those worthy officers, Squire Meredith and Constable Shipwith, listened to the oratory of this "innocent abroad," since we know that no such statute existed. "Noctus" was the victim of a hoax.—T. D. CRAWFORD.

THE OLD-TIME GUNS.—I have written "Awahsoose" that I could antedate him a little on guns, for my first two or three years' experience was with an old flintlock fusil, and the "first bird I ever shot on the wing" was a gray squirrel, which I had the good luck to drop on his jump from one tree to another, one day when the old lock responded more quickly than usual to the pull on the trigger.—VON W.

THE OZARK COUNTRY.—*Editor Forest and Stream:* will not some of your readers familiar with the Ozark region as a game country give us through these columns an account of it? I am sure that the subject would interest a large number besides myself.—BRIGHAM.

IF A PARTRIDGE COULD READ it would give him unalloyed satisfaction to peruse the trap pages of the FOREST AND STREAM, and reflect that the tens of thousands of shots there recorded are all spent ammunition so far as the partridge tribe are concerned.

THE NEW YORK GAME BILL.

THE most important sections of the Gould bill are given in their full text below. For summary of other portions of the bill see last issue. The bill was considered by the Legislature last Monday night and on Tuesday; and important changes were made. Sec. 149, which opened the woodcock season in Lewis, Warren, Fulton, Hamilton and Saragato counties, Aug. 14, was killed. The woodcock season is made to open Sept. 14, everywhere except on Long Island, where the date is Nov. 10. Sec. 49 protecting hares and rabbits was stricken out on the ground that they are pests; there is now no protection for them except on Long Island. Sec. 79 was so amended as to protect robins at all times, also blackbirds. The prohibition of carrying guns on Sunday was killed. Sec. 70 was amended to permit killing wildfowl on Hudson River below Troy to May; Sec. 233 by striking out "in any county adjoining;" Sec. 243 by striking out "such protector or peace officer," etc., to end.

An amendment was adopted to prohibit purse-nets from Long Island Sound between Westchester county and Long Island.

The speckled trout opening was changed from May 1 to April 15. Sec. 139 requiring non-residents to pay a license fee of $10 to shoot in Richmond county (Staten Island) was killed. Sec. 148 permitting trout fishing in Spring Brook creek was killed.

Certain of the sections here given were put into type before the amendments above noted had been made.

40. DEER.—Wild deer shall not be caught, shot at, hunted or killed between the 1st day of November and the 15th day of August following. No person shall kill or take alive more than two deer in any season.

41. VENISON.—Wild deer or venison shall not be possessed or sold between the 15th day of November and the 15th day of August following, and possession thereof, between the 1st day of November and the 15th day of November is forbidden and shall be deemed a violation of this section unless it be proved by the possessor or seller that such deer or venison was killed within the lawful period for killing or out of the State.

42. FAWNS.—No fawns shall be caught or killed at any time in this State, nor any part thereof be possessed at any time, possession of fawns shall be presumptive evidence of the violation of this section.

43. TRAPS.—Traps or any device whatsoever to catch or entice deer, including salt-licks, shall not be made, set or used, and deer shall not be caught, hunted or killed by aid or use thereof.*

44. HOUNDING.—Deer shall not be hunted with dogs between the 11th day of October and the 10th day of September following. Dogs of the breed commonly used for hunting deer shall not be permitted by the owner or person harboring the same to run at large between such dates, in the forest where deer inhabit. Deer shall not be hunted with dogs in the counties of St. Lawrence, Delaware, Green, Ulster at any time, or in Sullivan county between the 1st day of December and the 1st day of October. 45. Dogs, while chasing deer in violation of law, may be killed by any person.

46. TRANSPORTATION.—Deer or venison killed in this State shall not be transported to any point within the State from or through any of the counties thereof or possessed for that purpose, except as follows: One carcass or a part thereof may be transported from the county where killed when accompanied by the owner. The possession of deer or venison by common carriers, unaccompanied by the owner, is a violation of this section. This section does not apply to the head and feet or skin of deer severed from the body.

47. CRUSTING AND YARDING.—Deer shall not be hunted, killed or captured by what is commonly known as crusting nor while they are yarded.

49. HARES AND RABBITS.—Hares and rabbits shall not be hunted, shot at, killed or possessed between the 1st day of January and the 1st day of September, nor shall they be caught in traps, nor shall traps be set to catch them, except as provided by Sec. 169. [Sec. 49 stricken out.]

50. SQUIRRELS.—Black and gray squirrels shall not be hunted, shot at, killed, or possessed after the same have been killed, between the 1st day of January and the 1st day of September, except as provided by Sec. 171

70. WILDFOWL.—Web-footed wildfowl, except geese and brant, shall not be pursued, shot at, hunted, killed, possessed or sold between the 1st day of March and the 1st day of September, except as provided by Sec. 161, and shall not be pursued, shot at, hunted or killed between sunset and sunrise. 71. Web-footed wildfowl shall not be pursued, shot at, hunted, killed or caught in any way, save with gun raised at arm's length and fired from the shoulder without other rest; nor from any boat other than a boat propelled by hand or floating device, except as provided by Sec. 162; nor by the use of any bough-house at a greater distance than 50ft. from either the shore or a natural growth of grass or flags. Such fowls caught or killed, in any manner prohibited by this section, shall not be brought to the shore, sold or possessed.

72. QUAIL.—Quail shall not be pursued, shot at, hunted or killed between the 1st day of January and the 1st day of November, except as provided in Sec. 165. 73 Quail shall not be sold or possessed between the 1st day of February and the 1st day of November, but possession thereof between the 1st day of January and the 1st day of February is forbidden and shall be deemed a violation of this section, unless it be proved by the possessor that said birds were killed within the lawful periods for killing the same or outside the State.

74. WOODCOCK AND GROUSE.—Woodcock, ruffed grouse, commonly known as partridge, or any member of the grouse family, shall not be pursued, shot at, hunted or killed between the 1st day of January and the 1st day of September, except as provided by Secs. 164 and 149. 75. Woodcock, ruffed grouse, commonly known as partridge, or any member of the grouse family, shall not be sold or possessed between the 1st day of February and the 1st day of September, and possession or sale thereof between the 1st day of January and the 1st day of February is forbidden and shall be deemed a violation of this section, unless it be proved by the possessor or seller that said birds were killed within the lawful period for killing the same or out of the State, except as provided by Secs. 149 and 164. 76. Woodcock, ruffed grouse, commonly known as partridge, or any member of the grouse family, or quail killed in this State, shall not be transported to any point within this State, from any of the counties thereof, or possessed for that purpose, except that such birds may be transported from the county where killed when accompanied by the owner thereof. Possession of the birds named, by a common carrier, unaccompanied by the owner, is a violation of this section, unless it be proved by such common carrier that the birds were killed out of the State.

149. WOODCOCK IN CERTAIN COUNTIES.—Woodcock shall not be hunted, shot at, killed or possessed in the counties of Lewis, Warren, Fulton, Hamilton and Saratoga between the 1st day of January and the 1st day of August. [Sec. 149 stricken out.]

77. PLOVER, SNIPE.—Willow's [Wilson's], commonly known as English snipe, plover, mudhen, gallinule, grebe, bittern, surf bird, curlew, water chicken, bay snipe or shore birds, shall not be pursued, shot at, hunted, killed or possessed between the 1st day of January and the 1st day of September, except as provided by Sec. 163.

79. ROBINS, BLACKBIRDS, MEADOW LARKS.—Robins, blackbirds and meadow larks shall not be shot at, hunted, killed or possessed after they have been killed, between the 1st day of January and the 1st day of November.

81. SNARING, NETTING, TRAPPING.—Ruffed grouse, commonly known as partridge, or any member of the grouse family, or quail, shall not be trapped, netted or snared, nor shall any person possess any of said birds, so taken, nor shall any net, trap or snare of any kind commonly used for taking ruffed grouse, or any member of the grouse family, or quail, be set. Any such net, trap or snare is declared to be a public nuisance and may be abated and summarily destroyed.

105. TROUT.—Trout of any kind shall not be fished for, caught, killed or possessed between the 1st day of September and the 1st day of May following, except as provided by Secs. 166 and 148. 106. Trout of any kind, salmon trout or landlocked salmon, less than six inches in length, shall not be intentionally taken or possessed, and in case any such fish is caught or taken, the person taking it shall immediately place such fish back in the waters from which it was taken, without unnecessary injury. 107. Trout of any kind, salmon trout or landlocked salmon, shall not be willfully molested or disturbed while upon their spawning beds during the close season, nor shall such fish or any spawn or milt from any such fish be taken or carried away while upon the spawning beds.

108. SALMON TROUT AND LANDLOCKED SALMON shall not be fished for, caught or killed, in the inland waters of this State between the 1st day of October and the 1st day of May following, nor shall such fish so caught be possessed, except as otherwise provided by Secs. 155 and 167. 110. It shall be lawful to possess and sell at any time salmon trout, sometimes known as lake trout, if said fish have not been taken from the inland waters of this State during the close season, but possession of such fish between the 1st day of October and the 1st day of May following is forbidden and shall be deemed a violation of Sec. 108, unless it be proved by the possessor that such fish were not caught in such inland waters during the close season.

109. TRANSPORTATION.—Trout of any kind, salmon trout or landlocked salmon, caught in any of the inland waters of this State, shall not be transported to any point within the State from any of the counties thereof, or possessed for that purpose, except when accompanied by the owner. Possession thereof by a common carrier, unaccompanied by the owner is a violation of this section.

110. BLACK BASS, or Oswego bass, shall not be fished for, caught, killed or possessed between the 1st day of January and the 30th day of May, except as provided by Secs. 144 and 168. 111. No black bass less than 8in. in length shall be intentionally taken from any of the waters of this State, nor possessed, and in case any such fish is caught or taken the person taking it shall immediately return it to the waters from which it was taken without unnecessary injury.

112. MUSKALLONGE shall not be fished for, caught, killed or possessed between the 1st day of January and the 30th day of May.

113 SALMON shall not be fished for, caught, or killed between the 15th day of August and the 1st day of March following, nor shall such fish taken between those dates in this State be possessed.

114. No salmon less than 18in. in length shall be intentionally taken from any of the waters of this State, nor possessed, and in case any such fish is caught or taken the person taking it shall immediately place such fish back in the waters from which it was taken without unnecessary injury.

115. SIZE OF MESHES.—The use of seines, pound-nets, gill-nets or fykes for taking fish the meshes of which shall be less than 1½in. bar is forbidden, except as provided by Secs. 134, 146, 147 and 173.

[For summary of exceptions and local fishing laws, see last issue.]

SOME OF THE PROSECUTION SECTIONS.

230. ACTIONS.—All penalties imposed by this chapter may be sued for and recovered in the name of "the people of the State of New York." 231. Actions for penalties, and as provided in Sec. 230, shall be brought in the name of the people on order of the chief protector or by direction of either the Commissioners, who are hereby authorized, in their discretion, to employ special counsel to commence and maintain such actions, and the compensation of such special counsel may be fixed and allowed by the Commissioners. 232. Actions for penalties imposed by this act may be brought in any county where the penalty shall be incurred, in any county adjoining, or in the county where defendant resides, subject only to the right to remove the same to any other county adjoining that in which the penalty shall be incurred, or in which the action shall have been brought as aforesaid, for cause shown as provided by the code of procedure. But the same shall not be changed to the county wherein the offense was committed. 236. Any individual, upon giving security for costs, unless he shall be the owner or lessee of the premises upon which it shall be claimed the penalty was incurred; and any society or corporation or agent of any society or association for the protection of fish or game may recover in his or its name all penalties provived for by this act with costs, but on recovery by the plaintiff in such case of a less sum than fifty dollars, plaintiff shall only be entitled to costs to the amount of such recovery. Such person shall be entitled to one-half of the penalty recovered, the other half to be paid to the Board of Commissioners. * * *

243. ARREST AND TRIAL.—Any protector or peace officer may, without warrant, arrest any person committing a misdemeanor under the provisions of this chapter, in his presence, or where such a misdemeanor has been committed and he has reasonable cause for believing the person to be arrested to have committed it, and take such person immediately before a justice of the peace or police justice or other magistrate having jurisdiction, who shall proceed without delay to hear, try and determine the matter and give and enforce judgment according to the allegations and proofs. Such protector or peace officer may cause any chest, locker, box, crate, basket or packages in possession of such person to be broken open and the contents examined, and may enter upon any skiff, boat or vessel and search any and all parts thereof for that purpose.

248. WITNESSES.—No person shall be excused from giving evidence in any civil or criminal action, prosecution, or proceeding, under or authorized by this act, on the ground that the evidence might tend to convict such witness of a crime, or misdemeanor, or to establish the liability of such witness under any of the provisions thereof; but such evidence shall not be received against such witness in any civil or criminal action, prosecution, or proceeding.

SUPERVISORS' ORDINANCES.

272. ORDINANCES OF SUPERVISORS REPEALED.—All laws or ordinances heretofore passed by any board of supervisors of any county in this State, relating to birds, fish, shell fish and wild animals are hereby repealed, except the laws passed by the supervisors of the county of Suffolk in respect to salt-water fishing and in respect to shell fish, and boards of supervisors, except as provided by Secs. 173 and 273, shall hereafter have no power or authority to pass any regulation or ordinance relating to birds, fish, shell fish or game contrary to the provisions of this chapter. [173 gives Suffolk county supervisors authority as to salt water fish and shell fish.]

273. POWERS OF SUPERVISORS.—Boards of supervisors may pass at their annual session such ordinances as shall afford additional protection to and further restrictions for the protection of birds, fish, shell fish and wild animals, except wild deer, but no such ordinance shall be operative until a duly authenticated copy thereof shall have been filed in the office of the clerk of the county, and published in the papers in such county in which the session laws are published, and filed in the office of the Secretary of State, and it shall be the duty of the Secretary of State to furnish a copy of such ordinance to the chief game protector, and to print all such ordinances in the volume of session laws for the current years. No such ordinance shall take effect until the 1st day of May next after its passage.

274. ADDITIONAL POWERS.—The board of supervisors of any county may raise by tax any sum not exceeding $1,000 in any year, to aid in the enforcement of the provisions of this chapter.

LONG ISLAND GAME AND FISH.

160. This article applies exclusively to the counties of Kings, Queens, Suffolk and Long Island Sound.

161. WILDFOWL.—Web-footed wildfowl, except wild geese and brant, shall not be shot at, hunted, killed or possessed between the 1st day of May and the 1st of day October, or shall not be pursued, shot at, hunted or killed between sunset and daylight. 162. Floating devices may be used for the purpose of shooting web-footed wildfowl therefrom in the Long Island sound, Great South Bay west of Smith's Point, Shinnecock and Peconic bays and in any part of said counties said birds may be pursued and killed from boats propelled by hand, and from any sail boats in Long Island sound, Gardiner and Peconic bays.

163. PLOVER, SNIPE.—Plover, Willows [Wilson's] commonly known as English snipe, rail, sand-piper, mud-hen, gallinule, grebe, bittern, surf-bird, snipe, curlew, water-chicken, bay-snipe or shore-birds, of any kind, shall not be shot at, killed or possessed between the 1st day of January and the 1st day of July.

164. WOODCOCK AND GROUSE.—Woodcock, ruffed grouse, commonly known as partridge, or any member of the grouse family, shall not be hunted, shot at or killed between the 10th day of January and the 10th day of November, nor possessed or sold between the 1st day of February and the 10th day of November, and possession thereof between the 10th day of January and the 1st day of February, is forbidden, and shall be deemed a violation of this section, unless it be proved by the possessor or seller that said birds were killed within the lawful period for killing the same, or out of the State.

166. TROUT.—Trout shall not be fished for, caught, killed, sold or possessed between the 1st day of September and the 1st day of April following.

167. SALMON TROUT AND LANDLOCKED SALMON.—Salmon trout and landlocked salmon shall not be fished for, caught, killed, sold or possessed between the 1st day of October and the 1st day of April following, except as otherwise provided by Sec. 116.

168. BLACK BASS.—Black bass shall not be fished for, caught, killed or possessed between the 1st day of January and the 30th day of May.

169. HARES AND RABBITS.—Hares and rabbits shall not be shot at, hunted, killed or possessed between the 10th day of January and the 10th day of November.

170. DEER.—Deer shall not be shot at, hunted or killed for five years from the 14th day of August, 1892, except from the 10th to the 16th day of November inclusive.

171. SQUIRRELS.—Black and gray squirrels shall not be hunted, shot at, killed or possessed between the 10th day of January and the 10th day of November.

172. JAMAICA BAY.—Fish shall not be fished for, caught or killed by any device except angling, which shall be lawful on any day of the year between the 1st day of April and the 1st day of December in the waters of Jamaica Bay or the inlet thereof. No striped bass, sea bass or blackfish under 6in. in length shall be taken in said waters; if any are taken, the same shall be returned to the water without unnecessary injury. The inlet of Jamaica Bay shall not be willfully obstructed by any net or device so as to prevent the passage of fish therein at any time. This section does not prevent the catching of eels by the use of spear or eel weir, or the capture of fish for bait or shrimp by means of hand or cast-nets.

COMPARATIVE LIST OF CLOSE SEASONS.

The season designated in the first line, for each species, is that of the present law; in the lower line is that of the Gould bill:

	State Law.	*Long Island.*
Deer	Nov. 1 to Aug. 15.	Nov. 1 to Aug. 15.
"	Nov. 1 to Aug. 15.	Nov. 17 to Nov. 10.
Hounding	Oct. 20 to Sept. 1.	Oct. 10 to Oct. 1.
	Oct. 11 to Sept. 10.	Nov. 17 to Nov. 10.
Wildfowl	May 1 to Sept. 1.	May 1 to Oct. 1.
	March 1 to Sept. 1.	May 1 to Oct. 1.
Quail	Jan. 1 to Nov. 1.	Jan. 1 to Nov. 1.
	Jan. 1 to Nov. 1.	Jan. 1 to Nov. 1.
Grouse	Jan. 1 to Sept. 1.	Jan. 1 to Nov. 1.
	Jan. 1 to Sept. 1.	Jan. 10 to Nov. 10.
Woodcock	Jan. 1 to Sept. 1.	Jan. 1. to Sept. 1.
	Jan. 1 to Sept. 1.	Jan. 10 to Nov. 10.
Snipe	.....	Jan. 1 to July 10.
	Jan. 1 to Sept. 1.	Jan. 1 to July 1.
Robin	At all times.	Jan. 1 to Nov. 1.
	At all times.	At all times.
Hare	Feb. 1 to Nov. 1.	Feb. 1 to Nov. 1.
	No protection.	Jan. 10 to Nov. 10.
Squirrel	Feb. 1 to Aug. 1.	Feb. 1 to Aug. 1.
	Jan. 1 to Sept. 1.	Jan. 10 to Nov. 10.
Speckled trout	Sept. 1 to April 1.	Sept. 1 to April 1.
	Sept. 1 to April 15.	Sept. 1 to April 1.
Salmon trout	Sept. 30 to April 1.	Sept. 30 to April 1.
	Oct. 1 to May 1.	Oct. 1 to April 1.
Black bass	Jan. 1 to May 30.	Jan. 1 to May 30.
	Jan. 1 to May 30.	Jan. 1 to May 30.
Muskallonge	Jan. 1 to May 30.	Jan. 1 to May 30.
	Jan. 1 to May 30.	Jan. 1 to May 30.

The present law allows an individual 3 deer in a season; the Gould bill reduces the limit to 2. The law forbids ferrets for rabbits; the bill does not. The law gives a later trout season to the Forest Preserve; the bill makes the seasons uniform.

Camp-Fire Flickerings.

"That reminds me."

MAJE was "no good" any way. In the first place he was "yaller", besides he wouldn't follow anything but rabbits, and then he wouldn't bark, but would squeal instead like a young pig. None of the boys liked Maje much, but Laura did, so he was allowed to live at the farm. Walter C. lived up the road a little way and used to come down consiberable, sometimes to go hunting with the boys, but mostly to see Laura. One moonlight evening he came down and found the boys getting ready to go out after foxes. Walter C. thought lots of Laura, but he thought lots of fox hunting as well, so he went home for his gun and joined the party. Now Maje had a bad trick of going with the other dogs and leading them off on a rabbit track, at which times he would bark as well as any dog. So the boys told Laura to keep Maje in the house that night, and started on their hunt. Walter C. and a companion had just got stationed when they heard the dogs coming right for them. Eagerly they watched up the old blind road, and they soon saw the whole pack coming, led by a yellow streak. "That's Maje," said Walter C. in disgust, and he set his gun against a tree and waited for the culprit. When he got abreast, the disappointed hunter jumped for him, and landed sprawling in his wake, but the yellow streak was too quick for him, and the dogs were soon out of sight and finally out of hearing. Wrathfully the hunters returned home, and there under the stove lay Maje sleeping the sleep of the innocent. Walter C. had jumped for a fox. DARBY.

PLYMOUTH, Mass.

Four years ago a part of seven or eight men went up to the Seeberry Stillwater, on the West Canada Creek, after deer. With them were eight dogs, one a pup mongrel that had never smelled a track. During the first day's hunt the dog showed a great desire for camp, especially as his nose had been jammed in a bear's track that day.

The owner said it could live one more day and that was all, unless it showed better spirit than that.

At breakfast next morning the health of the dog was drunk, first out of a four-quart pail of tea, made of two handsful of black tea. Then something stronger was proposed. Then, as the dog evinced a desire to drink out of the tea pail, a large tin cup of Crow whisky was put down for the pup's benefit. That pleased the pup wonderfully; he drained the cup to the last drop.

The pup's poor qualities never showed again, for he ran into the woods and started a deer and put it to water in fifteen minutes after his "nip." A guide said that he never saw a dog run so well before or since.

Fortunately the dog ran without dosing after that. He was shot while chasing sheep a year later.

WOODCHUCK.

NORTHWOOD, N. Y.

A party of six were in a hunting camp on a small stream heading at the base of the Rockies. Four were ranchers and two were city braves fresh from office work. The latter had brought to camp with them a new and very handsome Kodak. En route to camp views of every pretty piece of landscape were duly recorded by Mr. Kodak. The next day in camp Mr. Kodak goes a fishing and sketches all sorts of pretty holes and nooks and everything of interest excepting the fish. They were in the next creek over the hill. The third day, our two braves having heard of three big deer hanging up in the trees on top of a high mountain, decided to make the attempt to

reach the spot and photograph the place where the deer were slain. With a saddle horse, an extra horse with a harness, and two guides, they set forth. They climbed through deep snowdrifts, over high rocky points and through fallen timber, till at length, more dead than alive, the precious Kodak and the rest of them arrived at the hanging deer. Photographs were in order. Deer in trees, deer lying on the ground, sportsmen shooting at deer leaning against trees like Mark Twain's horse, as if trying to think, hunter packing deer on his back, horses dragging and packing deer, in short, deer in every position a dead deer can be made to assume were duly recorded. Guides, guests, horses, deer and everybody danced before the beautiful Kodak to be taken.

The two braves, assisted by the horses, dragged the deer to camp, and Kodak, heavy with responsibillty, was an object of especial care. Then in camp, just before the return, everybody and everything were photographed—one man seated on a table surrounded by deer, another astride of a big buck, tightly grasping its horns (while to spectators it was doubtful whether the deer was really carrying the man or the man trying to hold up the deer). Homeward bound, more photos and more responsibility on the untried camera. One week of expectation and the following message was received:

"Kodak out of order after first eight pictures were taken, and not a hunter or deer or even a horse in sight."

Angling Talks. By George Dawson. Price 50 cents. Fly-Rods and Fly-Tackle. By H. P. Wells. Price $2.50. Fly-Fishing and Fly-Making for Trout. By J. H. Keene. Price $1.50. American Angler's Book. By Thad. Norris. Price $5.50.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

KINGFISHER MEMORIES.

Editor Forest and Stream:

The time for the annual "round up" of the Kingfishers at Cincinnati, preparatory to the start for Northern waters and woods, came again in July last. The weeks before the day fixed were full or plots and plans for forays among the bass and trout, full of hours given to overhauling tackle, picking out the lines, the hooks and the rods that would do the work of capture in most successful style. The "calamity" boxes were investigated to their uttermost corners, and each particular piece of tackle honored with a critical inspection that would have reflected credit upon West Point.

As the fingers busied themselves among the oiled lines and snooded hooks memory traveled away to the camps and camp fires of the years agone. The logs are burned out, the stake pins removed except perhaps a corner guy that may monumentally mark the spot to wandering eye, the ashes scattered to the winds, the tall flag pole of birch or pine that floated the starry emblem of sovereignty and free "Kingfishers" as well, become fuel for "moss back" fires, the forms of loved companions vanished among the shadows, yet there's a charm and a tender attachment for these hallowed places that linger when other places are forgotten. Even the day we hoisted the stars and stripes on Canadian soil, 60ft. in the air, and caught muscalonge and bass and trout under its protecting folds, the forerunner, perhaps, of the time when all Americans can do likewise and fear not the rigors of custom's officials nor the angry growl of the British lion, even this is a treasure trove of memory.

Ah! those camp-fires—how they crowd the brain full of tender thoughts! Veteran angler, did you ever forget them? Did they ever steal in on you as you sat looking in the winter blaze, while the wind whistled without and the rain or sleet beat upon the window pane? As you sat, and smoked and dreamed you were an angler again, and fought over the glorious battles with the inhabitants of the waters, feeling anew the electric thrill through every quickening pulse as the contest progressed—seeing again the battle royal given by gleaming trout, or valiant bass, or kingly muscalonge—exulting in the successful end to the combat—or, perhaps, tracing in more tender mood the faces of those who erst gave pleasure to the camp-fires—would you sell these memories for a price?"

The "Kingfishers" have dotted the great North Woods with many camp spots in the years that have fled. From Sturgeon River on the west to St. Mary's on the east—from the silent woods of the Northern Peninsula of Michigan adown the line to the Kankakee—the gleam of their white tents has been seen, and the light of their camp-fires has kindled ruddy reflection in the forest background, or sent shafts of light shimmering across the waters. Anon the shores of Black Lake, of the Intermediate Chain, of Echo and Douglass, of Brown and Platte, of Thunder and Carp, have welcomed their tents and given delight and sport to the earnest and happy anglers of the "Kingfisher" band.

They were happy. They loved the shadowy forest and the rippled lake, the tangled banks of the trout brook and the waving processions of reeds that marshaled their graceful lines along the lakeshore, the perfumed yellow and white blossoms of the water lilies that lifted their modest heads above the green and red pads floating on the surface. They loved the balsamic air and the bright, free sunshine, the broad vistas of meadow and mountain and forest line, or the closer, rapt circle about the camp-fire after dark, where the sparkling logs gave light to the sombre jokes to help 'em on their way.

To them the green grass was a carpet of down, the bed of fragrant boughs a couch of roses, and the platters of brown and smoking trout or bass a royal feast. They were not tenderfeet.

They loved to watch the crests of whitecaps chase each other adown the wind, or at night in their tents listen to the swash of the waves on the lakeshore. There was a pleasure even in the pebble-mixed sand that complained as the boats at sunset were drawn up from the grasp of the tumbling billows. They loved—why deny it—to tell "fish lies" when grouped around the camp-fire after the stars came out and the mosquitoes were iniquitous. There were some who could tell these better than others, but all could earn fair wages.

Then there are those who have crossed the river and are resting in the shade on the other side. In the busy round of every-day life, when toil and bustle and the hum and roar of machinery and progress fill the ears, we may temporarily forget those who have dropped from the ranks. But no sooner does the call to the woods and streams reach the ear or telegraph itself to the mind from some friendly letter by mail, than we find memories of these comrades of the past crowding like assailing legions upon the thoughts. Then it is we grow reflective and silent. As Du Chaillu, when he threaded the lonely paths of the great African forests, we become impressed with thoughts that reach out and strive to compass the mysteries of life. Thoughts that seek to solve the broken links in the chain of brotherhood—of the vacant spaces that repeat themselves about the camp-fires.

Grand old Ben Renshaw—full of quaint anecdote and rugged humor—whose solid qualities and substantial virtues have been so fitly described by "Kingfisher" in FOREST AND STREAM.

Brave "Uncle Danny" Sloan, his body blasted with paralytic strokes that withered half his limbs and retarded the duties of the vital organs, but with a soul fired with angler's zeal and himself gifted with nerves of steel. Shall we forgot the angry storm on Douglass Lake when he sat unmurmuring in the stern of the boat, an upset imminent and darkness showing its edge—the spray from the tossing waves striking him full in the breast, cold and suggestive. Though unable to swim a stroke, he seemed as unconcerned as if standing on solid land. His cool courage commanded our intense admiration.

Generous Lou Snider, knowing no pleasure better than contributing to the pleasure of others, and lastly Billy Whetzel, whose unerring glance and quite mental pose, whose love of the woods and wild game marked the born huntsman. These have crossed the river. How we miss them as we enter the woods and strike the lines of our camps.

But, I wander! The forms of the past—old scenes and old comrades—have drawn me away. These are the eternal shadows that flit around the burned-out embers of old camp-fires and come back to us, vivid with remembrances of pleasures that are ended and joys that are gone.

S. R. S.

APRIL TROUT FISHING.

Editor Forest and Stream:

Let the law makers not cut us short of the best month for trout fishing, namely the month of April, in the lower part of New York, from Columbia county to New York city, a distance of over a hundred miles, and in Massachusetts and Connecticut. If the open season must be shorter, do not take the month of April which every lover of trout fishing has been accustomed to look forward to as a child does to Christmas. In that month eight times out of ten they will get the largest trout and a finer mess of any time after. I know what I am talking about from experience. A friend and myself have been in the habit of going on the first of April for a long time in the States mentioned, and with better luck than any other time during the rest of the season. I might go back ten or twelve years and give you our experience, but what we want to hear about is the present, so I will tell of a trip on the first day of April, 1890.

We drove twenty miles the last night of March from Norwalk to North Castle in Westchester county, N. Y., and it snowed all the way there, but was not cold; when we reached there the wagon body was full of snow.

We said we would have the whole stream to ourselves, for we thought no one would dream of going trouting with the snow 6in. deep; but we were doomed to disappointment, for there was a party from New York city who had come up to Bedford station the last night of March, and as we were going across a lot they were coming in the road near by, so we went to a part of the river a mile below them and commenced to fish. And it was fishing. I never saw fish bite so fast in my life. By noon the snow was almost gone, and when we got up to where the New York party had commenced to fish we had all the fish we wanted. It was 2 o'clock, but before we went I wanted to see if the New York party had good luck, so I fished up a little way and found that the trout were not so plentiful. I made up my mind that they had their baskets full. When we got in Stamford we heard of some big catches that day, and when we got to Norwalk we heard of some more fine baskets. One man had thirty-eight nice ones, the most of them weighing a half pound.

On Good Friday, the first week of April that year, I went up in Connecticut, and when I started to fish I was told there was no use to try, for there were seven on the river ahead of me; and I thought so myself. But it came on to rain about 10 o'clock, so I fished on; and after it had rained a while the trout began to bite, and I got as fine a mess as any one would want to see; one weighed 17oz. I got a good soaking too, but did not catch cold, for the excitement kept me warm. All whom I heard of going that day had good luck. I always carry both kinds of bait, using the worm, grub or bug in the bushes, and the artificial fly in the open places as the chance may occur, and I think that one is as good as the other and just as honorable.

I went out in the town of Bedford, N, Y., the same year on the 30th of May, and was having very bad luck on the Mianus River, when we came to a house and stopped for a drink of water. The old gentleman said that we were too late and would not have any luck, for the men from the city and White Plains always fished in the spring of the year; and he said that in April he had caught trout right by his house that would weigh a pound and a half, and I believe him, for I know him to be a gentleman of truth. I asked why they would not bite now, and he told me just as I always believed myself, that the river got low as the warm weather came on and the trout would hide under the banks and in deep pools, and only bite when it is getting dark, as all anglers know and often tell in the FOREST AND STREAM. Then I asked him why they were more shy in summer months than in April, and this is his reply, and I think it is as good a one as old "Nessmuk" could give: Usually the month of March takes the frost out of the ground, sometimes the first of the month and others later according to the warmth of the weather or thickness of the frost; and just as soon as the frost leaves the ground and there is a rain, the worms come up out of the earth and are washed into the river by the hard rain, and the trout are out from their hiding places just as soon as the worm is, and they begin to eat and grow fat, and they watch for a storm to come up just as much as we used to watch for the dinner horn when we were boys on the old farm, for we expected to get a good dinner; and so do the trout when the storm comes. The month of April brings its April showers. Every angler remembers some time when he has been out fishing and there was a heavy shower, when he would go to the nearest place for shelter, and was sorry that it had rained, for it would spoil their day's sport, as they thought; but was surprised to find the trout more lively than when he had left off. So you see that a trout knows when the storm comes just as well as you do, and when the warm weather comes on, the worms go down in the earth and it takes a very heavy storm to bring them up; so the trout don't get as much food in three months of warm weather as they do in March or April. As the warm weather comes on and the streams get low they see people fishing on the banks and become more shy and hide under the banks and in deep pools until evening comes and brings the millers and bugs and other insects that chance to fall in the water.

I never saw a poor fish caught in April, even on the first day; and my family say that the fish are better than in July, and I believe it, for they get more to feed on in the spring. For pleasure and good of your health one day in the month of April is far ahead of any in warm weather, when you will nearly roast wearing rubber boots and the wood flies and mosquitoes bite the life out of you, and you will come home with three trout perhaps and say there are no more in the river worth catching. But you go on the next spring and come home with as fine a mess as you ever caught. In April I like to be in the woods and hills and see all nature springing to life; the trees are just budding, and the grass on the south side of the hill is nice and green; and as you look up in the tree you see the gray squirrel and the crow building a nest; and so you go home with a full basket of trout and a light heart and thank God for the beautiful month of April.

I went out again on the first of April, 91, on Mianus River, but did not have my usual good luck, for there was a path on the side of the river that told the story; they had been caught the last of March against the law. If people will go fishing in March, how are they to be stopped from going in April if the law is changed to the May? It will be impossible; and I can't say that I would blame them either, for the people like to go out in the spring of the year for a walk in the woods and hills; and if they should happen to see a nice large trout in a pool and the law was on him the temptation would be too great to resist; and if they did not have a hook and line in their pocket they would go home and get one and return and cut a pole and take the trout, with all others they could get where people would not see them; while if the law-abiding citizen should wait all the month of April before he wet his line, when he went on the first of May he would have no trouble in getting along on the banks of the river, for there would be a good beaten path for him to walk.

In many streams there are suckers, which run up and out of the pond in the spring of the year, and they are caught with a worm the same as a trout; and I know many who fish for them and for trout in the same pool. I was told of a man last year who broke his rod on a large sucker, which bit like a trout, and he thought he had one until he got the 3lbs. sucker on the bank. So any one who had a mind to go to the brook would say that he was going after suckers, but would catch trout, put them in his pocket and go home and thank the unwise law-makers that passed the law in his favor.

If we want a month taken off of the open season, why I will tell my idea of the month to take. But first let me give some experiences. In 1891, the last day of June, in Connecticut, I went out to get a few trout for supper. I caught six and noticed that three of them had larger bellies than the others, and that is what a good many people mistake for fat. They were full of eggs. I never caught a mess of trout in my life in July without finding plenty of them full of eggs.

B.

NORWALK, Conn.

TARPON "ON THE FLY."

ALL fish stories are more or less open to criticism. This one must be the exception to the rule. It is a fish story, but it is cold fact from start to finish. It is not written to boom any place or anybody, but is simply an attempt to give a plain statement of things as they happened and perhaps place credit where credit belongs.

On Tuesday of last week, while the Ladies' Boat and Canoe Club were holding a special session in the Lavis boat house, their deliberations were suddenly interrupted by frantic cries of "Help! Help! Somebody! Everybody! Help!" Of course all business was at once suspended, and everyone rushed to see what could be the matter.

While the ladies were trying to locate the disturbance the cries increased and the excitement in proportion. Some of the ladies were on the point of fainting, but among the throng were some of more nerve than others, who rushed around to the other side of the boat house, where the whole drama came into view. One of the hotel guests, Mr. Wm. Gladding, was dancing up and down on the wharf, yelling at the top of his voice, and tugging away at a large fishing line which he had found made fast to the wharf by one end while at the other was a big fish, cutting and sheering, now working up toward the wharf in short tacks until the line slacked, then making frantic leaps clear of the water in his efforts to escape, which he very clearly would have done if there had not just at this time appeared an ally. The man on the wharf was nearly exhausted; the ladies were too demoralized to render any assistance, while the fish appeared to gather strength with every rush. The excitement among the ladies increases, and little squeals of terror are interspersed with, "Will he get him?—help him, do—oh my gracious me," and the like. But as everything seemed lost the tiny canoe Elizabeth is seen making for the seat of war. The breeze is fresh and the little craft close-hauled, her skipper, Mr. Hagner, with his hundred and fifty pounds to windward, is trying to hold her down, while with a bone in her teeth she flies across the bay to the succor of the hard pressed Gladding. As the canoe neared the wharf the tarpon (for so it proved to be) made his last terrible rush directly under the canoe and clear from the water. Mr. Hagner's eagle eye sees the chance; one sweep of his good right arm and the silver king is fairly

"caught on the fly." The tarpon struggles desperately but Mr. Hagner's fingers are clinched in his gills with a death grip, while the good little Elizabeth with the added weight to windward stands up to her work and soon reaches the wharf, where by this time quite a crowd has collected, each and all ready to help. The tarpon was soon landed on the wharf, stunned with a club, duly measured and admired. It was a fine specimen, measuring a little over four and a half feet.

Now the question arises, to whom does the tarpon belong? The man who set the line, Mr. Gladding who found it and made all the noise, or Mr. Hagner and the Elizabeth? I believe the ladies have waived all claims.

Your correspondent, "F. S. J. C.," in FOREST AND STREAM of Feb. 18, objects to fish stories told to boom place or party. O. K. I agree with him; but he must not include this modest yarn with the other kind. As I said above, it is cold fact, all the details of which can be verified if need be. TARPON.

TARPON SPRINGS, Feb. 26.

ANGLING NOTES.

JUDGE CARMAN, of Patchogue, and M. H. C. Wilson, of this city, have just returned from a flying trip to Florida. They were very fortunate during a short stay at Fort Myers—each killed a tarpon the first day they went out. The Judge's big herring weighed 120lbs. and Mr. Wilson's a trifle over 100lbs. Many fishermen had spent weeks there without any luck in the tarpon line, though they all had great sport with the many other varieties of fishes, particularly in catching big-mouth bass on the fly. They report that they saw one gentleman at Fort Myers have a grand tussle with a 60lb. tarpon on a fly-rod. He was fishing with light tackle and using a small bit of mullet when the silver king took the bait. He was a trifle over four hours in bringing the fish to gaff, and the fisherman was almost as much played out as the fish.

It is amusing to a veteran when visiting angling resorts to watch the beautiful way in which the guides seduce the greenhorns into buying tackle or outfits from them or from the local stores. There is always some particular fly or spoon, without which it is useless to fish, and then when it comes to going out to the fishing grounds, woe to the man who has not been there before, for unless he happens to have an unusually conscientious boatman, the chances are that he will be taken over some very convenient ground where there are few if any fish.

"They are not biting to-day," or "You ought to have been here last week," etc., etc., are the consoling remarks made by the guides; we have all listened to these remarks time and time again. Anglers on their first trips to the Thousand Islands suffer from this to a very great extent; there are so many good-looking and convenient localities barren of fish while the best and most prolific waters are at considerable distance from the hotels and require hard work at the oars to reach them. In fact the experience of sportsmen is that the first season at a new resort, whether for fishing or shooting, is usually wasted. It matters not how much one knows about shooting or fishing in a general way, there is always something new to be learned at each place. Special rigs of tackle suited to the locality, special grounds which the fish or game seem to favor, etc. A friend of mine made a month's trip into the Canadian Wilderness after caribou last season and never saw one; he had been assured that there were plenty there. Probably they had been seen in the summer by Western anglers but had changed their ground in the fall as they usually do.

Visitors from Florida report that the accounts of the tarpon taken and their weight are greatly exaggerated. This, of course, is to be expected and is common at all sporting resorts. I have even heard of photographs being sent out representing beautiful strings of bass, pickerel, etc. The originals of these fish were well executed copies in papier maché made at considerable expense for this purpose. SCARLET IBIS.

BOSTON ANGLERS.

A PARTY of gentlemen, consisting of Chas. H. Cummings, Captain E. Foster, George Craig, Oscar Joslyn, Abe Provonshee, Mr. Smith, George Griffin and Charles Hartwell of the Cheshire House, all of Keene, N. H., in one day's fishing through the ice last week at Chesterfield Lake, caught nine fish, which made a total of 77lbs. in weight. They were highly satisfied with their good fortune, but of course suffered the usual disappointment of losing the largest fish, this time by means of a broken hook.

Mr. W. E. Perry, the celebrated Boston trap shot and sportsman, is away from home on a fox hunting trip.

Mr. Henry Hobart, of East Bridgewater, Mass., will soon leave home for a trip to Florida. He will probably stop at Punta Rassa, and goes prepared to capture a tarpon.

Mr. John Danforth, the steward and warden of the Parmachenee Club, passed through Boston a few days ago, en route to his home in Maine. He has been down in Florida four or five weeks, and had with him his son, who has been quite ill, but is now almost fully restored to health, having been greatly benefitted by the trip. Mr. Danforth stopped over in New York for a few days, and was royally entertained by the members of the club, who are mostly New York men. It is said he received a large and substantial present from the club members, as a popular demonstration of the esteem in which he is held. Mr. Danforth is an old pioneer in the backwoods life of Maine, and is known far and wide by sportsmen who visit the woods. He states that the club will this year establish a large farm, in connection with their preserve, which will keep them provided with fresh vegetables and will be a great improvement in the comfort of the members.

Mr. Fred. Seaver, Chas. Boyd and Jas. F. Rogers, Superintendent of the Jamaica Plain Gas Company, and all prominent gentlemen living in the promising Boston suburban town, have just returned from a three days' fishing trip down on Cape Cod. They brought back with them 90 pickerel, running from 1 to 4lbs., and on the way home stopped long enough at a famous ducking resort to shoot 15 black duck. These added to their stock of fish made a very presentable showing, and that they were well satisfied with their trip goes without saying.

Mr. Berry, of the big Springfield skate concern, Barney & Berry, in company with a Boston gentleman, will shortly start on a fishing trip to Florida. Mr. Berry is the owner of a steam launch which he uses on these trips. For the purpose of running in and out of the numerous rivers and bays along the coast it is a great luxury, and adds much to the pleasure of the trip.

Mr. Harold A. Pitman, of Boston, is spending a few days in Maine, on a snowshoeing trip.

Hon. Mr. Windling, of Washington, D. C., a lecturer of some note, and quite a prominent angler, has been spending a few days in Boston, looking up old friends.

Mr. Rollin Jones and party of Boston, are in camp at Lake Winnepesaukee, enjoying the fishing through the ice.

Mr. F. S. Hodges of Boston and J. H. Bridge of Augusta, Maine, left a few days ago on a tarpon fishing trip to Florida. They will locate at Punta Rassa.

Mr. George Rogers, Charles Currier, Reuben Davenport, L. D. Chapman, Mr. Caliga, the artist, and S. N. Moon, all of Boston, spent Washington's Birthday at Great Pond, in the vicinity of Cohasset, Mass., pickerel fishing through the ice. They returned with a very satisfactory string.

Mr. Waldron Bates of Boston, has gone to Florida for the tarpon fishing. He will stop at Tampa and Punta Rassa, and as he is an ardent and patient angler, stands a good show for capturing a Silver King.

A Boston party of four, consisting of Henry B. Moore, Calvin Austin, agent of the Boston and Bangor Steamship company, John A. Asworth, George C. Moore and Irving Powers are stopping a few days at Lake Winnepesaukee. Their camp is located about three miles from Atlas Bay, one of the best places on the lake for winter ice fishing.

A few members of the Winnapan Fishing Club, consisting of Messrs. C. D. Fiske of Barnaby & Co., J. C. Hollins of Hollins & Co., Frank Fuller, Dr. Everet Leach of Leach & Green, Zenas Sears, and Solomon S. Rowe, are stopping at the club camp at Lake Winnepesaukee, although there is quite a scarcity of fish they have sent home several fine lake trout, and report an elegant time. WM. R. SCOTT.

A HANDSOME DOLLY VARDEN TROUT was sent to the U. S. Fish Commission by Mr. Eugene G. Blackford to be cast for the World's Fair. This beautiful fish, weighing about 7 or 8lbs. and measuring over 2ft. in length, was obtained from the West Coast over the Canadian Pacific road, and its vermilion spots were nearly as bright as when it left the sea. The Dolly Varden is one of the largest red-spotted trout of the world, and closely resembles the European sälbling, the Sunapee trout and the sea trout of Labrador. In Alaska it reaches its finest development, but alas! for the want of anglers and the lack of near-by markets it is now practically a waste product; thousands are hauled up on the beaches with the salmon and left to decay in the sun.

SKANEATELES LAKE, New York, had for years been netted outrageously until residents in the vicinity had come to believe that illicit fishing could not be stopped. Last April Chief Protector Pond announced that there would be a change, and Protector Hawn went to work. Sixty-eight nets have besn destroyed, aud fifty-six actions begun. For the first time in thirty years the fish have had a chance to spawn unmolested. The protoctor has gained the confidence and esteem of the local protective associations, and the condition of things is decidedly healthier than it was a year ago.

NEW HAMPSHIRE TROUT.—Manchester, N. H.—Game about here has been scarce the last fall and the severe drought has killed most of the trout in our streams; so there is not much to look forward to but a good healthy leg-strengthening tramp this spring. Our streams are very well stocked, and if we had been favored with plenty of water we could get from half a dozen to a good string easily.—J. H.

MASSACHUSETTS BROOK TROUT.—North Adams, Mass., Feb. 29.—I send you photograph of a brook trout taken the second of this month from Cheshire reservoir, in fishing through the ice. It was caught on a tip-up. The length is 20½in., weight 4lbs.—A. C. P.

TARPON.—Mr. Frank N. Stout, editor of the Fort Myers (Fla.) *Press*, sends us a record of tarpon taken there in 1891. There were 160 of them, Mr. Geo. T. Stagg's capture of the 205lb. fish being the largest.

MR. WAKEMAN HOLBERTON announces a new edition of his "Standard American Trout Flies." The plate will contain sixty colored illustrations of artificial flies, with a hand-painted speckled trout in the center.

MR. CHARLES HALLOCK'S "SALMON FISHER," advertised on another page, is in that popular writer's happiest vein.

THE Quannapowittanglingassociationofwakefieldmassunitedstatesofamerica is a name fit to catch fish with.

Fisheulture.

NEW SOUTH WALES NOTES.

THE Commissioners of Fisheries for New South Wales in their report for the year 1890, acknowledge the receipt from the Acclimatization Society, at Wellington, New Zealand, of 5,000 eggs of the brown trout, 1,000 eggs of Loch Leven trout and 1,000 fry of the American brook trout, all of which were distributed as widely as possible and with very small losses. Some experiments were made in shipping trout fry on long journeys in hermetically sealed jars, and as they were attended with excellent results American fish-culturists and others engaged in stocking waters will be interested in the following extracts:

"From experiments made in the department it was found that trout fry imprisoned in hermetically sealed jars would exist for seventy-two hours at least. Acting on the knowledge so obtained, it was determined to attempt the transport of fry so imprisoned to remote waters for liberation. The experiment proved successful, and, so carrying it further, we succeeded in sending to New Zealand some of the fry which had been hatched here from Wellington ova."

A shipment of four jars of trout fry was made from Wellington to New South Wales. Jar No. 1 contained 15 Loch Leven trout; No. 2, 13 of the same, 10 weeks old; No. 3 contained 16 brown trout fry, and No. 4 contained 13; these were 9 weeks old. The fish were given no food before shipment to prevent pollution from excrement. Temperature of water 54deg.; air 55deg. Another box containing two jars, ¾ of a pint of water in each, and 15 and 8 brown trout respectively, was also sent. These were the youngest fry on hand, having just absorbed their egg sac, and never having been fed. They were placed in the jars at 6 A. M. Nov. 7, and shipped by rail to the steamer, a distance of 60 miles. They were received and opened at the Department of Fisheries, New South Wales, on the 18th, at 10:30 A.M., having been hermetically sealed up for 10 days and 3½ hours, and, "when liberated into the trough the fry for the most part were, and remained exceedingly lively for some time, and although every effort was made to keep the temperature down by the assistance of ice, 67deg. was the lowest to which it could be brought, and the fry gradually sickened and died one after the other, so that at present there are but three brown and four Loch Leven left."

As for the fishing industry of the colony, an increase in the catch is shown, and this, it is claimed, is due partly to

THE MURRAY COD.

the setting off of certain portions of the coastal waters where netting is not allowed. This is said to be true also of the Murray River, in which closures are made against the operations of the netters.

The extinction of cormorants or shags on the Murray was encouraged by bounty. These birds are very destructive to fish and exist in vast numbers on this river. The rewards paid during 1889 and 1890 for their extinction amounted to £1,501 17s. 10d. The following is the mode of capture in the Murray district: "Taking advantage of their habit to congregate in thousands, and to build their nests in swamps, the blacks and half-castes, noting the locations, made raids on their nests at the proper time in the breeding season and captured all the fledglings, and as each nest contained on an average three birds, it was not a difficult matter to collect a considerable number in a short time and with comparatively little trouble."

Another plan pursued was to collect the eggs and hatch them out under a hen or in an incubator. A few half-castes made this quite a business, so that the greater part of the large sum paid as rewards for capture passed to those persons.

The reports on the condition of the oyster fisheries are not encouraging. The yield has been much less than in 1889. Two-thirds of the oyster supply is imported from New Zealand and Queensland. The failure of this crop is partly due to damage by floods and ravages of what is known as the worm disease. Another reason for failure is the fact that many of those taking up foreshores for oyster culture take off all the marketable oysters and fail to cultivate at all.

The number of anglers in New South Wales is very large, and certain areas of streams are legally protected from net fishing, with the result of increasing the supply of fish and the size of the anglers' creels. The colony has within its boarders the famous "Murray cod," which is not a cod at all, but a spiny-finned fish somewhat resembling our black bass, and growing almost to the weight of 100lbs. It is an excellent food fish and altogether one of the most highly prized of the river species. Efforts are now being made to learn the breeding habits, in order to apply the knowledge to the artificial multiplication of the fish.

NIGHT LIGHTS SCARE VERMIN.

Editor Forest and Stream:

Some time ago I accidentally ran across a way of keeping minks, otters, etc., away. As I never saw it in print I thought it might be of value to some readers of the FOREST AND STREAM, so I will here give it: I raise several thousand ducks every year for market and am obliged to hang light in their yards to prevent a stampede at night. I noticed on several occasions mink tracks near the yards, but never closer than 100ft. of the lanterns. Last spring an otter got in my trout pond and stole several trout every night, besides scaring the balance almost into fits. He would not go in traps and was so quick I could not get a shot at him, so I thought of a light and hung out a lantern. In less than a week he disappeared, and I have not seen him since.

Two lights were also effectual in keeping rabbits out of our garden while the plants were small, after which I discontinued it.

I don't know anything more exasperating than to have some varmint to get in among your trout (every one of which is a pet to the owner), and gradually to see them disappear and not be able to help matters. The remedy is so simple I thought I would give it to my brother fishermen.

FIXTURES.

DOG SHOWS.

March 8 to 11.—Washington City Kennel Club, Washington, D. C. Fred. S. Webster, Sec'y, 711 Fourteenth street, Washington, D. C.

March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Littell, Sec'y.

April 6 to 9.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. C. Steadman Hanks, Sec'y.

April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

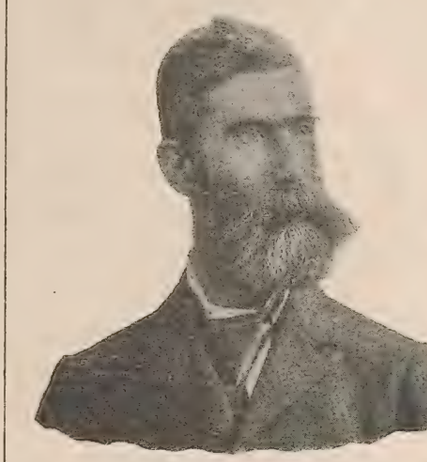
PHILADELPHIA DOG SHOW.

PHILADELPHIA broke the record last week and at the same time the ice of ill-fortune that seems to have attended all similar ventures. Considering the time at his disposal, owing to the peculiar tactics of the Chesapeake Bay Club in claiming dates, Mr. Watson has performed wonders. We have already given the names of prominent dog fanciers present. The weather was wretched the first two days, but with sunshine the people began to swarm through the building. The show was held at Tattersall's, a building admirably adapted for such a purpose because of its accessability, good light, and excellent repute. The judges selected did their work on the whole in a capital manner, giving general satisfaction, in fact at very few shows have I heard so little grumbling. The names of the judges will be found at the head of each breed reported, and other notes of interest about the show will be found as usual in "Dog Chat." There were two rings, one on each floor, and the judging progressed so rapidly that every one knew his dog's fate by 6 P. M. the first day.

MASTIFFS (*Judge, George Raper*).—One of our old mastiff judges, Mr. Dudley, was down to make the awards in this breed but was unable to fill his engagement. There were only thirteen entries including the local class, so it was not much of an exertion for Mr. Raper to take on this extra breed. The winner in open dogs, Pluto, was far the best in the lot and the only one with pretensions to form; his head is long, but well shaped and massive, a light eye spoils it, however, his feet turn out, but bone, body and especially loin are good. Jefferson is too greyhoundy in build and not a worthy son of old Dread, an old-time winner at Philadelphia. Third prize was rightly withheld. Lady Caution could do no better than second without competition and was lucky to do so well; bad, weak head, ears badly hung, light bone, etc. In puppies first was withheld and second given to Romau Caution, who has a poor head and is too young to tell much about, and so was his sister, Rose Caution; but Herzog, hc., must have caught the judge in a generous mood. In the local class Harry, shown fat, depends chiefly on his good forelegs and skull for his high position, wants more bone and depth of muzzle. Nero III. has a plain, flat head and falls away too much in quarters. King, reserve, has a better head than either, though it is too long, ears wrong, ribs flat and needs more depth of chest. The others need not be particularized. It is a pity that Mr. Raper could not have taken back a better idea of our mastiffs as a class, for we have a very much better lot than those he has seen so far would lead him to infer we had. Why do the actions of the Mastiff Club seem to stultify the efforts of our mastiff breeders instead of encouraging them to show?

ST. BERNARDS (*Judge, Geo. Raper*).—There was quite a good show of this breed and Philadelphia locally was well reprsented. Kingston Regent, looking none the worse for his New York week, won unchallenged in his class, and the same must be said of Republican Belle from the same kennels. The open dog class brought out an entry of eight, and the judge thought Aristocrat quite good enough for first place, but Refuge II. runs him close, if he does not beat him, as he has a better head, more bone, but he is not so straight on his pins. Bevis, third, has a fair head, nice markings, but muzzle too light; is very straight behind and flat-ribbed, loin, quarters and bone of the best. Sir Lion, reserve, is a dark brindle, head sour in expression, but pretty well formed, needs more spring of ribs, is well marked and stands well in front, with fair bone. Faust, vhc., has a splendid front, head wants more stop, but is nicely marked; is short in body, coat woolly, and is rather on the small size. Shebeaque, not mentioned, I thought deserving of recognition. With Princess Florence present there was no anxiety about first place in bitches; but this grand bitch looked as if she would like to be back on the banks of the Hudson and voted dog shows a nuisance. Second went deservedly again to Lady Gladwyn, who beats the third winner, Sunray, in head and general appearance of quality; the former bitch is unlucky in having to run against such a "corker" as the winner, but with Princess out of the way, it will not be long before she also joins the challenge ranks. Ellen Terry's good size and broody look made her reserve, followed by Altonette, vhc., and about in her right place. I have commented on all these bitches quite recently. Nanciebel, hc., is the best of that division, and might have had another letter; she is small, but of intense quality; head typical, but not enough of it; well-chested and good on her legs; was shown out of coat, but is a serviceable bitch in any kennel. Hilda, in the same division, is too snipy-muzzled, lacks markings, but has a good skull and other noticeable properties. Duchess of Arlington has a light shelly body and is snipy headed. Nell Gwynne, c., is but a poor one and not much like others of Alton's get. In puppies quite a nice youngster, by Tristan G. out of Nancibel, won well, he is a good upstanding dog showing a good deal of quality, and no doubt will have a fairly good head when filled out; second went to an almost all white dog with a patch on one eye; these almost self colored dogs should not be recognized, however good their build may be, as they do not approach correct type. The local class had nine entries, Harmony proved the winner, she was at New York last week, Lady Austin, second, has a fair type of head but small all through, is slack in back, would do with more rib, and muzzle is too pointed; Ben Ormonde, third, is a rather plain headed dog, not stop enough, his body is his best part; Faust here took the reserve card and Lady Sowden, good legs and feet, but weak in back and narrow in head, followed. Empress of Contoocook was the pick in smooths and the only challenge entry, Mr. Raper says she ran Princess Florence close for the special, but I fail to see it, though I think none the less of her (E. of C.) as a very good bitch. In open dogs Adonis II. won, close pushed by Scottish Leader, who needs a little toning up, Adonis II. has capital chest, shoulders and body, a fairly good head, but is not so straight in front as the others nor so well ribbed and also loses in size. Bellegarde won, the only bitch shown and she was at New York. The only local entry was a poor one with a plain sour head. The winners of the specials have already been given.

NEWFOUNDLANDS (*Judge, George Raper*).—Only two filed into the ring, Jumbo and Rover. Neither is a good one; not massive enough in head and coats wrong.



GREAT DANES (*Judge, George Raper*).—Another poor lot. Bismarck, the winning dog, has a plain head, lacks proper bone and is cowhocked. He was the only entry in dogs. Lufra again won in bitches, beating Flora in neck and loin. Minka, third, is savage, has a poor head and was indifferently shown.

DEERHOUNDS (*Judge, George Raper*).—The same old crowd from Mr. Thayer's kennels. In open dogs Robber Chieftain had again to step down for a younger scion of the same house, being beaten in general symmetry, etc. There was no denying Hillside Romolo in the next class, Theodora losing in substance and size; Nora C., a weedy specimen, was clearly out of her element alongside the others.

RUSSIAN WOLFHOUNDS (*Judge, George Raper*).—In dogs Leekhoi had had enough of shows for the novice and did not fill. The bitches from the same kennel, Svodka and Flodeyka, occupied their respective positions again, the former beating in front, ribs and loin.

GREYHOUNDS (*Judge, George Raper*).—Only six altogether, but a good lot. Gem of the Season added another challenge win, and in open dogs Ornatus ran against a well made one, who, had he stopped growing at two-thirds of his present size, would have been a good one; as it is he is too large, but does not strike one as coarse. Ornatus beat him in feet and on general principles, as it were. The order in bitches was again Bestwood Daisy and Lily of Gainsborough, the latter improving, and if she only had better forelegs and feet can down the other as a greyhound, Daisy being much on the bric-a-bac order. The other entry, Maud, is a shelly, weedy looking blue bitch.

POINTERS (*Judge, W. Tallman*).—There was lots of quality in these classes, and the judge knew his business. In challenge dogs, any weight, there were five entries, but only three put in an appearance. Duke of Hessen was again clearly ahead of Pontiac, but between the latter and Tempest there is little to choose. In bitches, Revel III., keeping her age well, can still take care of her class, and Stella B. was some distance behind her. In the open dog class two or three well-known dogs only put in an appearance, and the judge chose the best for first place, Westminster Drake, he is a well-made dog, a little cut out before the eye, muzzle needs to be squarer and his tail is not quite correct, but his body, legs and feet are good; second went to Graphite, who only beats the other in squareness of muzzle and carriage of stern, his ears don't hang right, and his shoulders and body are not so good; Lebanon, who has made a name in the field, has a short, thick neck, heavy shoulders, is chunky-looking all round and did not move free enough behind. Competition in the bitch class lay between Revelation and Ightfield Madge, and the former rightly won; she is better everywhere but in head, where she is a little plain and lippy. Madge is not a good model from shoulder to set on of stern, being too flat in loin, but has good legs, feet and ribs. Ruby VII. was absent. In light-weight dogs Inspiration took the ribbon, though faulty in muzzle he beats Rock II. in body and legs, the latter is also a bit thick in head and throaty, heavy in shoulders, lacks depth of chest, but has good quarters and hindlegs; Axtel King Don, third, needs more stop, shoulders too high, could be stronger in loin, but his good points are well-sprung ribs, good bone and legs. Lebanon II., vhc., has a long, houndy head, though not badly formed, a bit open in feet, not deep enough in chest, in fact is light all through in body. Bing, hc., has a plain, sour head, skull too round and full and is too much cut out before the eye, does not stand true in front, is heavy in shoulders and too flat in loin. Lady Gay Spanker was a good winner

MR. JAMES WATSON.

in bitches, pasterns could be better, but she has a sweet well-formed head, and is otherwise capitally built and is an excellent mover. Miss Rumor, from the same kennel, loses to the other in head and condition, but both are a capital sort. Irene, third, is too full in skull, a little wide in front, but otherwise well built, a light eye rather spoiling her expression. Penelope II. is long-cast, throaty and feet should be closer. Lebanon Boy was the winner in puppies, he is leggy and is a bit dish-faced; Fan Fan II. has not a bad head, is better ribbed than the winner, for her size, and is all round a more finished pointer. Rock II. was the only entry in the local class.

ENGLISH SETTERS (*Judge, W. Tallman*).—These classes gave the judge every opportunity to spread himself, for there was some keen competition. Challenge dogs had no entries, and in bitches Albert's Nellie was alone. Nine of the eleven entries in dogs then trooped into the ring, and when the sorting was over Breeze Gladstone once more wore the blue ribbon, and he will now go among the dogs in a higher class. If he was as good behind as he is in front little fault could be found with him; but here he seems a little tied. Roderigo, second, hardly deserved so high a position with Orlando or Sheldon in the ring; he is not in show shape and is faulty in hocks. Orlando, third, is faulty in muzzle, but well formed in skull, stands on good legs and there is nothing the matter with his body. Sheldon, reserve, has few noticeable faults, a bit light in eye and a trifle short in neck; then Sir Frederic is another well-formed dog, of much greater quality, who deserved all he got, though he does move a little queerly behind; he follows the standard in many other respects. Cassio, hc., has a short, thick neck, has a well shaped head, though a bit broad in skull, dips a little behind the shoulder, but is otherwise a well made, sturdy dog. Ightfield Rhulas deserved more than c., though he does lack a little in rib and is too prominent in brow, a bit long cast, and his bone is not quite straight enough. Prima Donna won in a class of fourteen bitches; she is well found in loin, legs and feet; might be cleaner in neck and her ribs need more spring. Spectre, second, not so good in head, being too long and narrow, though the outline is good, beats the other in ribs and was in nice fettle, but when moving throws her elbows out a little. Bessie Avent, third, has a plain head, but is well formed behind it. Countess Christine, reserve, is a nice-looking bitch, bit plain before the eye, and well deserved her position. In the vhc. lot Canadian Lillie is a little cheeky, but head fairly well formed; has splendid loin and quarters, but shoulders are somewhat heavy. Virginia Rockingham is short of coat, and barring her beautiful head is rather plain throughout. Bonnie Gladstone Girl was out of shape, falls away in loin too much, nice head, but pasterns and front could be improved. Forest Heather has not stop enough, ribs and legs all right, but is too straight in loin. Hiram was the only one to turn up in puppies; he is a coarse, throaty dog that will hardly win when there is any competition. In the local class Count Belton beat Lilian Bondhu in head and bone, as Lilian is rather weak-faced and short-necked, otherwise beats the other in true formation behind the shoulder.

IRISH SETTERS (*Judge, W. Tallman*).—Though the entry was not large, still there was lots of quality present. Five well-known dogs were entered in the challenge class for that sex, and Tim, getting down in flesh, by superior type won well in hand from the others, Seminole getting the reserve, and was the better of the two in coat. Laura B., in nice condition, won well from Elfreda, especially in head properties. Duke Elcho could not be denied in the open dog class: he was well shown, a little high in skull perhaps, but a good all-round dog, sound in color. Exile II. loses in spring of ribs and set on of stern to the others. Planet Chief is a good dog spoilt by a short, thick neck and heavy shoulders; having said so much, you can find little fault with his head, body or color. The vhc. dog was not on the catalogue; some mistake in the entry; he is plain in head and has not enough rib. Norna beat Edna H. in bitches; the former has hardly depth enough of muzzle, but her head is of good type; is a little wanting in ribs, but this said you have done, as she has good color and stands on good legs. Edna H. loses to her in skull and depth of chest; she is well known as a good one. Alice Kent, third, turns her toes out, is too narrow-chested, is lightly built, and not in it with the others. There were no puppies. The local class filled well, with Count Leo the winner, a big dog, with a fair head. King, second, is heavy in shoulders and has a plain head, lacking type. The others need not be mentioned.

GORDON SETTERS (*Judge, W. Tallman*).—A new lot altogether and none of them showing much merit. Bob H. had the dog class to himself; he has a well-formed head, but very coarse, his quarters fall away too much, but his coloring is good. In Janet's absence Venice was given first; her skull is too wide, she is narrow in front, does not move well behind, and tan is not rich enough. This bitch won also in the local class, beating a poor puppy.

SPANIELS (*Judge, W. West*).—A good turnout welcomed the judge in those classes, though most of them have now become household words in the fancy. In fields Beverley Negus, low in flesh, and Bridford Ruby, in nice shape, took care of their respective challenge classes. In open black dogs Brantford Mohawk was the only one considered good enough for the money; he is light in loin and quarters and needs more ribs, is weak in pasterns, feet turn out and is rather low in flesh. Pasha, vhc., is a big curly, fat dog, whose head is the best part of him. Beau was the only entry in any other color dogs and Fancy the same in bitches; she is not deep nor square enough in muzzle, and was too fat. Lots of good ones were to the fore in cockers. Black Dufferin, showing the effects of constant travel, was alone in challenge dogs and bitches. I Say can take care of Bessie W., whose light eye and snipy muzzle are against her. Fascination, the New York winner, had an easy time of it in open black dogs, Snowball; plain head and lack of coat condition being noticeable in comparison, being second. Obadiah, reserve, is well known and under the circumstances might have been second. In the bitch class of six opponents Amazement beats Maid of Perth in front and skull, the latter's skull is too round and feet turn out, otherwise, for body, coat and condition, she is quite correct. Smug, third, would have a good head if her muzzle was square, has nice body and coat, but hocks turn in a bit. Parvin's Queen, vhc., has a nice skull but is too much cut out before the eye and muzzle not square enough, nice body, but quarters fall away too much, nice front, though a "little on the leg." Miss Waggles was not in her stall, but I know her as a nice little cocker deserving of her letters. Other than black saw Beauty, a good-legged bitch, first, a little domy in skull and ribs should be better sprung. Lady Gay is a trifle high on leg for modern fancy, but they are straight, she is rather plain-faced, is better ribbed than the winner, but not so short in body. Fascination won in puppies with Wallace's Hazel second; the latter wants squareness of muzzle and head is too narrow, coat open and stary; I preferred Miss Waggles for the place. Busy Bee, a nice little cocker, took the local prize; she could be better is muzzle, but body and legs are good. Smug and Parvin's Queen furnished the other winners, the latter given third with only two prizes put up. A fair Irish water spaniel, with good topknot, but wanting in coat, finished the list of spaniels.

BEAGLES (*Judge, W. Stewart Diffenderffer*).—Not many on hand nor was the quality quite as good as I have seen, but the judge handled them with good results. Tony Weller and Racer Jr., showed up for the challenge dog prize, the latter is a better shaped beagle all round but age is beginning to tell, or has told, his mouth is gone and he moves very groggily, so the decision that gave Tony first placce can hardly be questioned. June M. was alone in the corresponding bitch class, she needs more rib, her coat is soft and she is rather long cast. In open dogs Tomboy and Rambler had it nip and tuck, with the decision in favor of the former; he is more of the working type, stands a little out at elbow, is not cobby enough, his head would do with more stop, has an excellent coat and a brush well carried. The Rambler won at New York. Fairy's Lee, vhc. is a big coarse dog with little pretension to type, an almost all black and tan color with a good hound coat; Hunter, c., has been mentioned before. Betty R. won in bitches, over Forest Queen, I rather liked the latter for the top place; Beety wins in legs and body, her eyes are too full and muzzle falls away too much, is thick in ear and throaty, and does not move very well behind; Forest Queen is soft in coat, tail carried too gaily, but she is good in body, bone and legs. Rye II. is plain in head and throaty; Lady Vic, hc., is very snipy and has too much loose skin on head, stands a little wide in front but has a good hound coat. Daisy II., in the same division, is weak in muzzle and soft in coat and a little too wide in chest; Belle of Rockland, c., is well known, loin and quarters worst part. The puppy prizes were rightly withheld.

The foxhounds were those from Mr. Avent's Kennels' and were spoken of last week. Dr. Cryer judged them.

COLLIES (*Judge, George Raper*).—An excellent lot and competition was keen. In the challenge class Roslyn Wilkes and Charleroi II. did battle and Wilkes's superior condition and truer forelegs just won him the verdict; he is better in head than the other. Cora II. had no competition in the next class, as Flurry III. was only out for the specials. In open dogs The Squire could not be denied, as the next one, Ormskirk Shep, is not so true in front nor so good in body. Dell Wilkes, inclined to be thick in head and of better size than his brother, Prince Wilkes, was placed third, with the latter vhc. Don Carlos should have had a letter or two as he has a fair head, nice coat, good legs and feet and carries his ears well. Wellesbourne Charlie and Christopher were in for specials only and the former won the special afterward for best in show. In bitches Duchess of Fife, who could be better in feet and eye, won first somewhat handily from the plain-headed Jakyr Deau. Green Mountain Lass, third, is rather coarse in head, ears nicely carried, and has a good, dense coat. Zulu Princess II. has a better head but is not so good in coat or color, being nearly all black. Dot, vhc., a pretty little bitch, short of coat, and tail not just as it should be, deserved her letters. Duchess, c., is plain-headed, is straight behind, quarters fall away too much and is small-sized. A good one in Pompus Chief, who won in puppies; should have been in the open class; he has a capital long head that looks like carrying age, ears a trifle large, splendid legs and feet, and dense coat that looks puppyish at present; he was shown too fleshy, spoiling his symmetry somewhat, carries his tail too gaily, but a good dog nevertheless. Chrysolite is not made up yet with the other. Flora II., a nice stamp of bitch, short in head between eye and ear, coat dense but not flat enough. Pompus Chief and Flora II. supplied the winners easily enough in the local class. The Chestnut Hill Kennels won the kennel prize.

BULLDOGS (*Judge, George Raper*).—Pathfinder and Saleni were the only good ones present, and were first in their respective classes. Second was withheld in dogs from a big coarse brute, who was none the less a celebrity, owing to his famous leap through the window of the second story.

Rose, second in bitches, has a characteristic tail, and that is the best I can say of her; face not broken up enough.

BULL-TERRIERS (*Judge, George Raper*).—A good show of quality, with the well-known Carney taking first challenge win without competition. Streatham Monarch, looking well, easily took care of Edgewood Flyer in the open dogs; the latter shows himself tucked up and is weak before the eye yet; he afterward won in puppies. Greenhill General, reserve, is cheeky, thick and round in skull, has a good body, but tail could be carried better. Sir Monty II. is thick and flat-faced and light in loin. The well-known Edgewood Fancy won in bitches over Rose, who is too thick and blocky in head. Queen Bendigo and Lady Vesuvius have both been criticised recently: they were vhc. and hc. respectively. The latter was second in puppies, with Mister Dick Bendigo vhc.; the latter also described before.

FOX-TERRIERS (*Judge, George Raper*).—Some of our best dogs were on hand, but Blemton Victor II. had not the task set him at New York, nor would he perhaps have done so well this time, as he showed rather light in loin, still he had no trouble in getting well to the front of Starden's Jack in more senses than one. Dona's Youth and better carriage of ears served to put her ahead of New Forest Ethel in the next class. In open dogs Blemton Rasper won, a bit on the leg but a terrier all over, perhaps a little weak before the eye, and wants more rib; good in coat, legs and feet. Raby Trigger, holding himself well, came in a nice second, with Ebor Spendthrift third; good front, gone off in head, and would do with more back rib, but a good terrier nevertheless. Dobbin, reserve, is well known and was well up with the last named. Fijalo, vhc., is pinched in muzzle and feet too open. Spinster won in bitches, with Woodale Refusal second; the latter loses in ribs and front, has lots of coat but not hard enough. Damson, third, is a bit full in skull and short in muzzle, and ears should be carried closer. Rosa Canina, vhc., well known, is not improving. Lansdowne Dimity, vhc., is weak in muzzle, ears not carried well, but is good in body and front. Positive, another three-lettered one, does not stand strong enough in pasterns and lacks terrier character. The wire-haired dog class was poor, a third only being given to Phasa, light throughout and not straight enough in front, nor coat of correct texture. In bitches, Capsicum was alone. Woodale Dandy won in puppies, closely pressed by Lansdowne Desperado, who is pinched in muzzle and too round in skull, yet has an excellent coat; he stands a little out at times. This pup beat his kennel mate, Dimity, in the local class.

IRISH TERRIERS (*Judge, George Raper*).—Dunmurry, the only one in challenge class. In open dogs the judge reversed his New York decisions and explains it by their difference in handling. Boxer IV. standing out in front; Hanover Boy won; his light eye spoils his expression, but he has a good promising head, a trifle thick in skull, is dropeared and not carried close enough; behind this he is a well made terrier, with a better coat than Boxer IV. Jack Briggs, second, is still leggy and light in body, but has a better head than either of the other two. Nailor, hc., deserved another letter; good expression, head a trifle short and thick and heavy in shoulders, otherwise well formed. In bitches Kathleen, faulty in head, but excellent in body, won easily; she is rather short as Irish terriers go, and this led me to speak disparagingly once of what is considered by many her very best point. Snapper is weak in muzzle, light in bone, but has a nice Irish terrier coat.

BLACK AND TAN TERRIERS (*Judge, George Raper*).—These were few in numbers, and all but one well known. Sultan was alone in challenge class, and so was Prince Regent in open dogs. Rochelle Carmencita had to give way to Mr. Symonds's new importation, Gypsy Girl, who excels her in head, front and bone, Carmencita being too Italian greyhoundy.

SKYE TERRIERS (*Judge, George Raper*).—Bruce beats Scotty in length of body, coat and front.

SCOTCH TERRIERS (*Judge, George Raper*).—Kilstor again asserted his supremacy. Kilbar being absent, Glenelg was his only opponent, whom he beats in head, stronger, loin and quarters, but Glenelg wins a little in texture of coat. In any other sort of terriers Sir Robert, a Dandie Dinmont, was placed over King o' the Heather, hitherto a well-known winner in this breed, but was here beaten in bone, coat, muscling and front by the other. Heather Madge, getting into her coat, was reserve, with Mephisto Dick, the Welsh terrier, vhc.

YORKSHIRE TERRIERS (*Judge, George Raper*).—These classes were not as good as we have seen them, now that the Salem Kennel is forsaking the breed. Charley II. the winner is mixed in color but beats Smart in coat, and the latter is too dark in body color. In small-sized, under 7lbs., Bright beats Prince in body color, tan and coat. Charlie, vhc., has nice tan on muzzle but head tan too light, is short of coat and dark in body color.

DACHSHUNDE (*Judge, George Raper*).—Windrush Rioter had no trouble in beating Feldine in head, chest, crook, length of body and arch of loin. Janet was absent; there were four others in this class so mixed up by their chains, and with numbers gone, it was impossible to get at which was which, they were not, however, long enough in heads or bodies.

PUGS (*Judge, Dr. M. H. Cryer*).—The judge was well sustained by a good entry in every class, showing that he was not without honor in his own country. Penrice was alone in challenge dogs, and Sateen, looking fat and heavy in bag, being just off her litter, also had no competition. In open dogs, Robin Hood won; good in skull, depth of muzzle, carriage of ears and in curl, but light in body, and stands over a little. Little Duke, second, a nice cobby little fellow, needs a shorter muzzle and fuller skull; feet are open, but he has a nice trace, and ears are well carried. Bradford Rowdy II. is faulty behind and muzzle could be improved; skull fairly good. Bismarck, hc., is small in eye and too long-faced. Nobody's Baby (formerly Diamond Nellie) won well in bitches; nice skull and wrinkle, but rather dark-colored; good body and tail. Frisk, second, was in a cage with four others, and only one collar between them; they were all mentioned, but it was impossible to distinguish between them. Dog show managers should certainly give this sort of thing their early attention; it is due to the public that they should be able when they buy a catalogue to identify the dogs they are looking at. Penrice Boy, long in muzzle and face too broken up, won in puppies over Tiptop, Diamond Queen third. A capital pug won in the local class, Meddler, well-formed skull and muzzle, excellent wrinkle, and nice body and curl. Daddie, second, is long-faced. In toys, a fair little one in Sunray won, not so much on the apple-headed type as some of them. Floss is quite a well-marked little thing that will be apt to grow out of this class.

KING CHARLES SPANIELS (*Judge, George Raper*).—Romeo won again, this time over Calumet Ben d'Or, a well known winner. Duke of Wellington, reserve, is not so short in face nor so good in coat and tan as the others. Twinkle, vhc., has a good skull, tan not rich enough. In the other than King Charles class Tiney, a Blenheim, won from Tokio, a Japanese spaniel, but I preferred the Jap, as he is shorter faced and truer to his type than the other, who is short in ear. Fugiama is another nice Jap, who got vhc.

In the miscellaneous classes the heavy-weight candidate was a sort of a big hairy dog, something like a bad St. Bernard. The light-weight class were a fairly good lot, Sheffield Lad, the new Pomeranian, scoring over Golden Rod, the Italian greyhound, and a nice little Maltese terrier getting reserve, another Italian greyhound getting vhc., as did the Mexican hairless Dude. The awards were all given last week.

H. W. LACY.

WASHINGTON DOG SHOW.

WASHINGTON, D. C., March 8.—*Special to Forest and Stream.* This show opened this morning in most unpropitious weather; the rain poured in torrents till afternoon. Notwithstanding this there has been quite a fair attendance. The building is very much improved since last year; instead of the tan bark floor a solid boarded floor has been laid down and the building is not so draughty. The number of entries in the catalogue is 422 but some of these are duplicates and there are a good many absentees.

Judging commenced promptly at 10 A. M. in the two rings and the regular classes and some of the specials were all judged by 5:30 P. M. The judges are Miss A. H. Whitney, Charles Heath, Major J. M. Taylor, James Mortimer and W. Stewart Diffenderffer, and their decisions have been well received.

The pointer the setter classes are very strong. St. Bernards on the whole are mediocre, though New York kennels are well represented. Terriers, greyhounds and mastiffs are good. The new dog Argoss made his first appearance and is much admired; he had an easy win as Leekhoi is not fit to be shown. A number of well known dog men are present and if the weather is only propitious the Washington Kennel Club will very likely score another success. The management is good, as might be expected with John Read at the helm, and Mr. Webster, Joseph Hunter and others are working hard. The arrangement of the catalogue leaves much to be desired, as the numbers are rather confused. There is a good deal of grumbling again that so many of the specials are confined to residents of the District of Columbia. The full list of awards follows:

MASTIFFS.—CHALLENGE—1st, C. C. Cook's Menglada.—OPEN—*Dogs:* 1st, J. L. Winchell's Beaufort's Black Prince; 2d, Mrs. Chas. Wallack's Merlin; 3d, Linkwood Kennels' Linkwood Chief. Very high com., J. B. Nelson's Jeffeson. High com., R. R. Simms's Duncan. *Bitches:* 1st and 2d, C. C. Cook's Pharoah Queen and Miss Beaufort. Com., G. F. Curtis's Zoe. *Puppies:* 1st, C. C. Cook's McKinley; 2d, withheld.—NOVICE—Prizes withheld. High com., T. C. Daly's La Dor. Com., G. F. Curtis's Zoe.

ROUGH-COATED ST. BERNARDS.—CHALLENGE—*Dogs:* 1st, New York St. Bernard Kennels' Kingston Regent. *Bitches:* 1st, New York St. Bernard Kennels' Republican Belle.—OPEN—*Dogs:* 1st, Jacob Ruppert, Jr.'s Aristocrat; 2d, C. R. Diffenderffer's Comte. *Bitches:* 1st and 2d, Jacob Ruppert, Jr.'s Lady Gladwyn and Altonette; 3d, Cobb & McLear's Duchess of Arlington. Reserve, F. E. Lamb's Mountain Queen. Very high com., Jacob Ruppert, Jr.'s Ellen Terry. High com., Geo. Scala's Josephine Marie Sanderson. Com., V. Petrola's Ida and P. D. Marshall's Lady Marshall. *Puppies:* 1st, Maryland Kennels' Sir Melvale; 2d, withheld.—NOVICE—1st, Cobb & McLear's Duchess of Arlington; 2d, Maryland Kennels' Sir Melvale. Very high com., V. Petrola's Ida and W. R. Traver's Dallas.

SMOOTH-COATED ST. BERNARDS.—CHALLENGE—1st, Jacob Ruppert, Jr.'s Empress of Contoocook.—OPEN—*Dogs:* 1st, J. E. Wilkinson's Adonis II. *Bitches:* No entries. *Puppies:* 2d, Miss Emma Gray's Psyche.

GREAT DANES.—*Dogs:* 1st, Chas. Struth's Tiger; 2d, Dr. W. H. Shepherd's Duke. High com., Miss L. B. Harrison's King. *Bitches:* 1st, J. B. Maenner's Stella. *Puppies:* 1st, J. H. Maenner's Stella; 2d, A. Thornton's Bismarck II.

BLOODHOUNDS.—*Dogs:* 1st, J. L. Winchell's Victor; 2d, G. F. Pollock's Belbus, Jr. *Bitches:* 1st, J. L. Winchell's Judith *Puppies:* 1st, G. F. Pollock's Belbus, Jr.

NEWFOUNDLANDS.—*Dogs:* 1st withheld; 2d, H. B. Moore's Major Moore. Com., J. A. Reubsaur's Sir Carlo.

RUSSIAN WOLFHOUNDS.—*Dogs:* 1st, Muscovite Kennels' Argoss; 2d, Seacroft Kennels' Seacroft Leekhoi. *Bitches:* 1st, Seacroft Kennels' Seacroft Srodka.

DEERHOUNDS.—*Dogs:* 3d, W. B. Hibbs's Rou.—NOVICE—1st and 2d, R. J. Breckinridge's Glenmarth and Maida II. Very high com., W. B. Hibbs's Rou.

GREYHOUNDS.—*Dogs:* 1st and 2d, A. W. Purbeck's Gem of the Season and Ornatus. *Bitches:* 1st and 2d, A. W. Purbeck's Bestwood Daisy and Lilly of Gainsboro; 3d, Knight Greyhound Kennels' Lady Clare. High com., W. P. Compton's Lady Ringold.—NOVICE—1st, Knight Greyhound Kennels' Sir Lancelot; 2d, P. T. Gadsdon's Ton. *Puppies:* 1st, Knight Greyhound Kennels' Sir Lancelot.

FOXHOUNDS.—AMERICAN—*Dogs:* 1st, Sandy Spring Hunt Club's Barney; 2d, W. Deputy's San. Very high com., Sandy Spring Hunt Club's Boston. High com., W. Deputy's Clymer and Sandy Spring Hunt Club's Low. *Bitches:* 1st and 2d, W. Deputy's Mollie and Fannie. Very high com., Sandy Spring Hunt Club's Bird.—ENGLISH—Prizes withheld.

POINTERS.—CHALLENGE—*Dogs* (55lbs. and over): 1st, Westminster Kennel Club's King of Kent; 2d, Geo. W. Lovell's Pontiac. Reserve, Tempest Kennels' Tempest. *Bitches* (50lbs. and over): 1st, Westminster Kennels' Lass of Bow.—OPEN—*Dogs* (55lbs. and over): 1st, E. R. Bellman's Graphite; 2d, T. G. Davey's Westminster Drake; 3d, Eugene Halpin's Brackett's Lad. *Bitches* (50lbs. and over): 1st and 2d, T. G. Davey's Revelation and Ightfield Madge; 3d, E. R. Bellman's Nellie. Reserve, E. P. Wilkins's Bev. R.—CHALLENGE—*Dogs* (under 55lbs.): 1st, Hempstead Farm Kennels' Duke of Hessen; 2d, Wm. H. Hyland's Ossining. *Bitches* (under 50lbs.): 1st, E. R. Bellman's Stella B.—OPEN—*Dogs* (under 55lbs.): 1st, J. H. Winslow's Inspiration; 2d, Joseph H. Hunter's Black Wonder; 3d, T. G. Davey's Axtell's King Don. Reserve, L. O. St. Clair's Gum Gum. Very high com., W. L. Sanders's Shot Echo. *Bitches* (under 50lbs.): 1st and 2d, T. G. Davey's Lady Gay Spanker and Miss Rumor; 3d, F. S. Webster's Ridgeview Bagatelle. Reserve, E. Kessler's Irene. Very high com., Dr. E. K. Goldsborough's Telie Kent.—PUPPIES—*Dogs:* 1st, Westminster Kennels' Westminster Ralph; 2d, R. O. St. Clair's Gum Gum; 3d, A. W. Hancock's Lad of Fritz. Very high com., John Wanstall's Wanstall's Dan. Com., C. W. Smith & Bro.'s Zeb. *Bitches:* 1st, W. N. Lipscomb's Croxie Kent; 2d, T. H. Keller's Mine. Reserve, E. P. Wilkins's Shiela. High com., R. L. Jones's Effie Preston and Hilda Hurd.—NOVICE—*Dogs:* 1st, Joseph L. Hunter's Black Wonder; 2d, C. W. Johnson's Gus Thompson. *Bitches:* 1st, Arthur Goldsborough's Black Wonder's Sister; 2d, F. L. Webster's Ridgeview Bagatelle. Reserve, Dr. E. K. Goldsborough's Telie Kent. Very high com., Pembroke Pettit's Queeny II.

ENGLISH SETTERS.—CHALLENGE—*Dogs:* 1st, Manmee Ken's Cincinnatus. *Bitches:* 1st, Dr. J. H. Hartman's Albert's Nellie.—OPEN—*Dogs:* 1st, Manmee Kennels' Toledo Blade; 2d and very high com., Blue Ridge Kennels' Don Gladstone and Antonio; 3d, E. O. Damon's The Corsair. Reserve, T. G. Davey's Ightfield Rhulias. High com., T. E. Shreve's Sir Dixon. Com., W. J. Willard's The Bard. *Bitches:* 1st, 3d and very high com., Blueridge Kennels' Gossip, Laundress and Belton's Princess; 2d, E. W. Jester's Peggy Dortch. Reserve, E. J. Meyers's Prima Donna. Very high com., T. G. Davey's Canadian Lilly and Maumee Kennels' Winning Ways and Lady Beatrice. High com., T. G. Davey's Forest Heather. Com., A. S. Mattingly's Pleasant Kelpie and R. E. Morris's Belle of Bosco.—PUPPIES—*Dogs:* 1st, T. E. Shreve's Mecca; 2d, T. H. Hardy's Monk of Teesdale. High com., R. E. Morris's Don of the Meadow and F. A. Anderson's Dan of Trinidad. Com., Mrs. W. H. Davidson's Freckles, W. H. Davidson's Sibngo and Stubener & Scroth's Rock of Furness. *Bitches:* 1st, Frank Pitzer's Lady Breeze; 2d, F. A. Anderson's Nellie of Trinidad.—NOVICE CLASS—*Dogs:* 1st, T. E. Shreve's Mecca; 2d, T. J. Davey's Brighton Boswell. Com., J. M. Green's Green's Lee and W. W. Hill's Pilot. *Bitches:* 1st, E. W. Jester's Roi D'i; 2d, A. S. Mattingly's Pleasant Kelpie. Com., T. E. Shugrue's Shugrue's Flora.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st and 2d, F. C. Fowler's Seminole and Kildare. *Bitches:* 1st, Dr. W. Mills's Elfreda. OPEN—*Dogs:* 1st and 2d, F. C. Fowler's Duke Elcho and Exile II. *Bitches:* 1st, Mrs. S. H. Price's Norna; 2d and 3d, F. C. Fowler's Edna H. and Alice Kent. Reserve, H. B. Anderson's Nugget. Com., T. L. Jackson's Flash Sarsfield.—PUPPIES—*Dogs:* Com., R. L. Jones's Lad of Limerick. *Bitches:* 1st, F. C. Fowler's Avondale.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st and reserve, Dr. S. G. Dixon's Ivanhoe and Leo B.; 2d, J. B. Blossom's Beaumont. *Bitches:* 1st, Mrs. J. E. Dager's Janet; 2d and very high com., Dr. S. G. Dixon's Duchess of Waverly and Lady Waverly. Reserve, J. B. Blossom's Heather Bee.—OPEN—*Dogs:* 1st, A. B. Crosby's Skip; 2d, J. B. Blossom's Heather York; 3d, Imwood Kennels' King Noble. Reserve, Fenwick Kennels' Rexmont. *Bitches:* 1st, J. B. Blossom's Flomont; 2d and reserve, Dr. S. G. Dixon's Maid of Waverly and Princess Louise; 3d, H. F. Smith's Countess Roxie. *Puppies:* 1st and 2d, Dr. S. G. Dixon's Waverly Girl and Waverly Boy.

CHESAPEAKE BAY DOGS.—*Dogs:* 1st, withheld; 2d, Miss E. G. Ferguson's St. Peter. *Bitches:* 2d, Henry May's Rose.

FIELD SPANIELS.—Prize withheld.

COCKER SPANIELS.—CHALLENGE—*Dogs:* 1st, Luckwell & Douglass's Black Dufferin; 2d, C. T. Sackett's Rabbi. *Bitches:* 1st and 2d, Ancient and Modern Kennels' I Say and Amazement. Reserve and very high com., C. T. Sackett's Bessie W. and Novel.—OPEN—NOT OVER 28LBS.—*Dogs:* 1st and 3d, Ancient and Modern Kennels' Fascination and Obadiah; 2d, C. T. Sackett's Adam. Very high com., J. P. Willey's Jersey Obo. *Bitches:* 1st, Frank P. Comstock's La La. Novice class prize withheld.

COLLIES.—OPEN—*Dogs:* 1st, Jos. Livingston's Ormskirk Shep; 2d, 3d and reserve, F. R. Carswell's Prince Wilkes, Dell Wilkes and Duke. Very high com., Miss Parker's Roslyn Charles. High com., O. H. P. Scott, Jr.'s Lion Scott. *Bitches:* 1st, 2d and very high com., F. L. Carswell's Nancy Hanks, Sadie Wilkes and Lady Moll; 3d, James Watson's Duchess of Fife.—PUPPIES—*Dogs:* 1st, H. C. Mahaffy's Buzz. *Bitches:* 1st, F. R. Carswell's Duchess.—NOVICE—1st, Miss Parker's Roslyn Charles.

POODLES.—1st, J. L. Redfern's Margot; 2d, R. R. Wallach's Dick; 3d, Dr. S. G. Dixon's Paris.

BULLDOGS.—*Dogs:* 1st, Wheatley Kennels' Pathfinder; 2d, A. B. Grave's Handsome Dan; 3d, Retnor Kennels' Oswego. Very high com., S. W. Stinemetz's Trott. *Bitches:* 1st, Wheatley Kennels' Salem.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, Tubby Hook Kennels' Carney. *Bitches:* 1st, G. House's Duchess.—OPEN—OVER 30LBS.—*Dogs:* 1st and com., J. Moorehead, Jr.'s Streatham Monarch and Mister Dick Bendigo; 2d, F. F. Dole's Edgewood Flyer; 3d, Retnor Kennels' Young Marquis. *Bitches:* 1st, Tubby Hook Kennels' Edgwood Fancy; 2d, Retnor Kennels' Maggie Cline; 3d and high com., J. Moorehead, Jr.'s Queen Bendigo and Lady Vesuvius.—UNDER 30LBS.—1st, Retnor Kennels' Young Victor; 2d, J. Moorehead, Jr.'s Mister Dick; 3d, Dr. Kerr's Oxford. *Puppies:* 1st, F. F. Dole's Edgewood Flyer; 2d, J. Moorehead, Jr.'s Lady Vesuvius.

BASSETT HOUNDS.—1st, 2d and 3d, E. W. Jester's Curve, Bow and Bent. Very high com., W. F. Rutter, Jr.'s Rowton Wags.

DACHSHUNDE.—CHALLENGE—1st, E. A. Manice's Windrush Rioter.—OPEN—1st, E. A. Manice's Zulu II.; 2d, Mrs. Wilderming's Dach II.

BEAGLES.—CHALLENGE—1st, Oak View Kennels' Tony Weller; 2d, Middleton Kennels' June M.—OPEN—*Dogs:* 1st and 3d, Forest Beagle Kennels' Tomboy and Hunter; 2d, E. W. Talbott's Brittle. Very high com., Nut Swamp Kennels' Fairy's Lee. *Bitches:* 1st and 2d, Forest Beagle Kennels' Daisy II. and Forest Queen; 3d, 338, no name. Very high com., Nut Swamp Kennels' Lady Vic. *Puppies:* Prize withheld.

FOX-TERRIERS—CHALLENGE—*Dogs:* 1st, Blemton Kennels' Blemton Victor II; 2d, Woodale Kennels' Starden's Jack. *Bitches:* Blemton Kennels' New Forest Ethel; 2d, Morey Kennels' Blemton Brilliant.—OPEN—*Dogs:* 1st, Woodale Kennels' Dobbin; 2d, Blemton Kennels' Blemton Valor; 3d, Toon and Symonds's Ebor Spendthrift. Very high com., Morey's Raby Trigger. Com., J. P. Evan's The Dean. *Bitches:* 1st, C. S. Hanks's Damson; 2d, Woodale Kennels' Woodale Refusal.—PUPPIES—*Dogs:* 1st, Donald Munro's Sparkler; 2d, John Moorhead, Jr.'s Harvard. *Bitches:* 1st, Woodale Kennels' Woodale Damsel; 2d, E. W. Irwin's Chinquipin. Very high com., R. T. Stewart's Hillside Freedom.—NOVICE—1st, Blemton Kennels' Blemton Valeria; 2d, Woodale Kennels' Woodale Damsel.—WIRE-HAIRED—1st, H. E. Mandelshon's Carlisle Vamp.

IRISH TERRIERS.—CHALLENGE—1st, Walter J. Comstock's Dunmurry.—OPEN—*Dogs:* 1st and 2d, Walter J. Comstock's Boxer IV. and Hanover Boy. Very high com., Toon & Symonds's Jack Briggs. *Bitches:* 1st, Walter J. Comstock's Crate.

BLACK AND TAN TERRIERS.—OVER 7LBS.—CHALLENGE—1st, Rochelle Kennels' Broomfield Sultan.—OPEN—*Dogs:* 1st, Toon & Symonds's Prince Regent; 2d, Frank P. Comstock's Salisbury. Very high com., Rochelle Kennels' Merry Monarch. *Bitches:* 1st, Frank P. Comstock's Louis; 2d, Rochelle Kennels' Broomfield Madge. Very high com., Toon & Symonds's Gypsy Girl.

DANDIE DINMONT TERRIERS.—*Dogs:* 1st, Ed. Brooks's King of the Heather. *Bitches:* 1st, Ed. Brooks's Sendie.

BEDLINGTON TERRIERS.—1st, M. A. H. Thelberg's Orie Vire.

SKYE TERRIERS.—CHALLENGE—1st, C. A. Shinn's Sir Stafford.—OPEN—*Dogs:* 1st, Mrs. A. P. Smith's Bruce. *Bitches:* 1st, C. A. Shinn's Bessie.

SCOTCH TERRIERS.—1st, Toon & Symonds's Kilstor.

PUGS.—*Dogs:* 1st, Mrs. M. M. Ballantine's Robin Hood; 2d, W. R. Traver's Dandy; 3d, G. W. Wambach's Lord Baltimore. Very high com., W. Amiss's Amiss Bijou. *Bitches:* 1st, G. W. Wambach's Dolly; 2d, W. Skidmore's Tiney.—NOVICE—1st, Wm. R. Traver's Dandy.

KING CHARLES SPANIELS.—1st, Geo. W. Fisher's Calumet Bendor.

BLENHEIM SPANIELS.—1st, G. W. Wambach's Tiney; 2d, W. R. Traver's Poodle.

MEXICAN HAIRLESS.—1st, G. R. Bassett's Duke; 2d, Chas. L. Lenman's Mexie.

MISCELLANEOUS.—Equal 1st, G. C. Whiteman's Beauty and J. Whelan's Little Tarquin; 2d, R. Hitchcock's Chi; 3d, Toon & Symonds's Sheffield Lad.

SPECIALS.

Mastiffs—Best kennel, Chas. E. Cook. O. E. M. C. forty-guinea challenge cup, J. L. Winchell's Beaufort's Black Prince. A. M. C. silver challenge cup for best American-bred Beaufort's Black Prince. Taunton gold medal, Beaufort's Black Prince. St. Bernards.—Best kennel, Jacob Ruppert, Jr. Best dog or bitch bred and owned in the District of Columbia, Geo. Scala's Josephine Marie Sanderson; also for best entered and owned by a resident of the District of Columbia. St. Bernard Club medal for best American-bred rough dog, Maryland Kennels' Sir Melval. Best bitch ditto, F. E. Lamb's Mountain Queen. Best smooth bitch ditto, Jacob Ruppert, Jr.'s Empress of Contoocok. Pointers.—Best kennel, T. G. Davey. Best dog or bitch owned in the District of Columbia (2), A. Goldsborough's Black Wonder's Sister. Best sired by Duke of Hessen or Robert le Diable, W. H. Hyland's Ossining. Best with field trial record in Derby or All-Aged Stakes, J. H. & J. A. Hunter's Black Wonder. Best bitch sired by Tribulation. Best kennel owned by resident of the District of Columbia, R. C. Jones's kennel. Pointer Club special for best dog, Westminster Kennel Club's King of Kent. Best bitch ditto, Westminster Kennel Club's Lass of Bow. Other specials will be decided to-morrow.

[*Special to Forest and Stream.*]

WASHINGTON.—*Tuesday Noon.*—These specials have been awarded for best exhibits:

Bloodhound puppy, Pollock's Belbus, Jr. Deerhound, Breckenridge's Glenmarth. Greyhound, Purbeck's Gem of the Season. Kennel foxhounds, W. Deuty. Kennel cockers, Ancient and Modern Kennels. Bulldog, Wheatley Kennels' Salem. American-bred dog, Graves's Handsome Dan. Bull-terrier, Moorehead's Streatham Monarch. Local, Kerr's Oxford. Kennel beagles, Forest Kennels. Dog, Forest Kennels' Tomboy. Bitch, Forest Kennels' Daisy II.

Kennel English setters (2), Blue Ridge Kennels. With field trial record, Dager's Cincinnatus. Local dog, Mattingley's Pleasant Kelpie. Kennel Irish setters, F. C. Fowler's. Irish setter, Seminole Kennels' Seminole. Kennel Gordon setters, Dr. Dixon's. Kennel fox-terriers, Blemton Kennels. In show, Blemton Kennels' Victor II. Open class, Woodale Kennels' Dobbins. Novice, Blemton Kennels' Valeria. Local, Evans the Dean. In show, owned by lady, Miss Parker.

Non-sporting dog, Beaufort's Black Prince. Breeder of best three English setters, E. Dexter.

MORE CANINE PIRACY.

Editor Forest and Stream:

Being rather struck with some writing on diseases of dogs in the last *Canadian Kennel Gazette*, which seem to have been read before some society by F. A. Campbell, V. S., Toronto, I sent the paper to Dr. Perry with the note, "This reads like sense." His sententious reply was, "I thought so when I wrote it," and on investigation of this I find that large parts of the paper have been copied *verbatim* from "Ashmont's Diseases of Dogs." Refer to the portions of this "Canada Official" paper, on worms, prurigo, erythema, erysipelas, eczema, etc., and whole passages will be found cribbed bodily from "Ashmont's" well-known work, and many others where the merest gauze is used as a cloak of piracy by slight changes of language and unimportant additions. I thought the appropriation of Dr. Perry's fugitive writings in the famous "Merlin" steal was bad enough, but to boldly crib from such a standard work as "Ashmont" is more than I ever dreamed of.

W. WADE.

HULTON, Pa.

POINTS AND FLUSHES.

FROM a letter received from Mr. Geo. Meister, I learn that the Central City Kennel Club, of Jackson, Mich., came out of their recent show with nearly enough receipts to pay the expenses, which is a most gratifying result, as the members were in every way deserving of success. The officers, Dr. E. L. Kimball, Messrs. S. H. Slifer, C. H. Ruhl and C. W. Sarvis, were most diligent and courteous, as well as other members. It is to be hoped that they will give a show next year.

A meeting was held at Ottawa, Ill., on March 3, for the purpose of organizing a kennel club. The rapid manner in which clubs are being organized throughout the smaller cities of the country indicate better than any other feature the general and permanent interest in the dog.

There were several errors in the New York catalogue, one of which in the awards, is peculiar from its novelty. Under the head of English Setters, special 2 reads as follows: "The English Setter Club offers the silver medal of the club to the breeder of the best three English setters, dogs or bitches or both, over twelve months old, regardless of ownership." This medal was awarded to the Memphis and Avent Kennel as breeder of Orlando, Bessie Avent and Rowdy Rod, the former two of which are owned by J. M. Avent and Bayard Thayer Kennels, the latter by the Greenfield Hill Kennels. The Memphis and Avent Kennel represented the partnership of Messrs. W. B. Gates, A. H. Merriman and J. M. Avent and the partnership was dissolved and the dogs sold many months ago, consequently the Memphis and Avent Kennel has no existence—it is legally dead. A special prize, therefore, could not be awarded to a breeder which has no existence.

In the toy spaniel challenge class Nank-i-Poo won first over Milwaukee Charlie, while the special for the best toy spaniel was given to the latter, the judge thus reversing his decision.

Dick Swiveller was present at Chicago and New York, but did not compete, he being marked absent in the catalogue in both instances. Rule XXI. reads as follows: "Special prizes shall only be offered for dogs of established breeds, and no dog eligible for special prizes can be withdrawn from competition unless it has been stated on entry blanks 'Will not compete for special prizes'." It may be that this rule was intended only to govern the competition for special prizes, but it does not state so. As it reads it governs the whole competition. It is not in any case good, straightforward competition to withdraw a dog at one show and allow him to compete at another where there is none. Dick Swiveller, the week after Chicago, had a walkover in the challenge class at Jackson. At New York, if he had been alone in his class he possibly might have been present.

I notice that violations of Rule XIX. at Chicago and New York were common. The rule is as follows: "In entering a dog in a challenge class, it is necessary to specify on the entry blank a sufficient number of first-prize winnings to entitle him to compete in such classes, as required by these rules, and this record must be given in the catalogue." In several instances no winnings were given, and in many other an insufficient number were given, or the winnings were not specified.

The celebrated pug Bonsor, from being at Chicago a well-ordered pug duly registered, he having a registration number, sire, dam, etc., has an entry in the New York catalogue which represents him as listed, date of birth, breeder and pedigree unknown, the whirligig of a few days making great changes in his history.

The wolf-killing match between Mr. Paul H. Hacke's Borzois and Mr. Geo. McDougall's greyhounds, to take place at Roggen, Col., on March 28, promises to be a most interesting affair. I have a feeling that Mr. Hacke is in for a much more formidable competition than he is aware of, to judge from the tone of his correspondence. To go right into the land of wolf-killers, against trained men and dogs, shows most commendable pluck. There are, however, many handicaps which the Borzoi will encounter, the difference between the altitude of Pittsburgh and Roggen being not the least of them; the latter place is much higher, consequently the atmosphere is more rarified. It might be mentioned incidentally that some of the Colorado dogs are desperate wolf-killers. It would be a very safe assumption to go on, that when the Borzoi have beaten those guileless Colorado country dogs killing wolves they will know that they have been in a wolf fight. B. WATERS.

GORDON SETTER CLUB MEETING.

THE annual meeting of the Gordon Setter Club of America was held at Madison Square Garden, Feb. 25. As a large percentage of its members are scattered over the country from Canada to California the meeting was small in numbers, but it made up any such deficiency in enthusiasm.

The officers elected for the ensuing year were as follows: Mr. James B. Blossom, Pres.; Dr. J. M. Lord, Vice-Pres.; L. A. Van Zandt, Sec'y-Treas. The executive committee is composed of the foregoing and Messrs. Bleistein, Goodman, Lee and Tallman. The secretary's report showed twenty-five members in good standing, and the treasurer's statement showed a fair balance in the treasury, with no indebtedness. Projects for the next year were discussed, and it is almost certain that with the coöperation of those who are interested in the Gordon in this country successful field trials will be held next fall, and 1893 will see a marked improvement in the breed. Now is the time to take hold. There is plenty of room for improvement both in the field and on the bench, and how soon that improvement is made depends upon the efforts and coöperation of those who are or ought to be interested in it. The management of the club is now in the hands of sportsmen, owners of Gordons and gentlemen, and this fact should insure a very large increase in membership. L. A. VAN ZANDT, Se'cy.

NEW YORK DOG SHOW.

Editor Forest and Stream:

Your New York dog show EXTRA is very fine and you are to be very highly commended for the energy in getting it out so promptly. I was unfortunate this year in only having a few hours in the show and only looked at two classes—pugs and toy spaniels. I am sorry Mr. Raper did not give his reason, in his remarks on the pugs in your EXTRA, for placing Kash, Jr., over Waddles and Saxon. According to my opinion, Kash, Jr., has a smaller head, a longer muzzle, poorer ears, is more leggy and is not so good in general form as either of the two mentioned; and as to coat and color, they are not comparable with the other two dogs, as his coat is long and open and color very bad.

Mr. Raper's remarks as to Bob Ivy being "shown too fat" is rather laughable. Mr. Editor, are you sure that some of your imps did not change thin to fat?

The Westminster Kennel Club gave a prize of $15 for the best toy spaniel, any variety, in challenge dog class. The New York *Herald* gave its bronze medal for the best toy spaniel, open to all classes. The well-known Milwaukee Charlie was beaten for the first (the kennel club prize) by Nank-i-Poo, but shortly afterward Milwaukee Charlie won the *Herald* prize over Nank-i-Poo and others. Now, as the conditions of these two prizes were the same, except the latter one had more dog in it, I was anxious to learn the gentleman's reasons for this. The following I find in your EXTRA: "In the challenge class the King Charles Milwaukee Charlie, owing to his moderate condition of coat, was beaten by the Japanese pug Nank-i-Poo, but the former was good enough to win the special offered for the best toy spaniel." Milwaukee Charlie's "moderate condition of coat" must have improved wonderfully fast. What a pity the judging of the challenge class had not been deferred a few hours. M. H. CRYER.

DOG CHAT.

THE proof slips of the New England Kennel Club's premium list for their show, April 5 to 8, did not give the names of judges, but we gave, exclusively, the names of three of the principal judges in our last issue. The full list is: Mr. James Mortimer, New York city, mastiffs, St. Bernards, great Danes, bull-terriers, bulldogs, poodles, pugs and miscellaneous 25lbs. and over. Mr. John Davidson, Monroe, Mich., pointers, English, Irish and Gordon setters, bloodhounds, foxhounds and beagles, Chesapeake Bay dogs, and all spaniels but toys. Mr. T. S. Bellin, Albany, N. Y., fox-terriers, dachshunde, Scotch terriers, Irish terriers, Dandie Dinmont, black and tan terriers, Skye terriers, Yorkshire toy terriers, toy spaniels and miscellaneous under 25lbs. Mr. John S. Saunders, V.S., Boston, Mass., Boston terriers. Mr. H. W. Smith, Worcester, Mass., deerhounds, greyhounds and barzois. Dr. H. Clay Glover is the veterinarian and Mr. John Read will, as usual, superintend the show, which is an earnest that it will be done right. The following railroads will carry three dogs free when accompanied by owners or caretakers: Boston & Maine, Fitchburg, New York & New England, Old Colony and Boston & Albany. Also the following express companies will return dogs free that have paid full rates coming to the show: United States, American, National, Adams and New York & Boston.

The members of the Pendle Forest Hunt have had what may be described as the best run of the season. The hounds put up in the neighborhood of Gisburn what was supposed to be a splendid fox. Away the party galloped at the heels of the hounds, who took them at a rattling pace round by Hellifield Halton West and Paythorne. Scent was ultimately lost, but the members of the hunt mutually congratulated each other on the excellent sport they had had. It transpired at the close of the day that they were indebted to the sheep dog of Mr. Joseph Bullock, of Moorhouse Farm, near Gisburn, for the exciting incidents of the chase. The dog much resembled a fox, and being alarmed at the sight of the hounds took to its heels.—*Northern Daily Telegraph.*

The Hamilton Kennel Club continues to do good work in Canada as behooves such a large and intelligent body of dog lovers. It has just arranged to hold a one night local dog show on Thursday, March 10, which ought to be very successful. The entries will be confined to exhibitors living in the city of Hamilton or the county of Wentworth, and in order to encourage local breeders and give all a chance of bringing forward their dogs, no entry fee will be charged. Diplomas will be given to the successful competitors. The judges chosen are Messrs. W. B. Wells, of Chatham, and W. B. Palmer, of Woodstock. Arrangements are in course of completion by which it is hoped that a permanent club room will soon be provided, and when this is an accomplished fact, and a comfortable rendezvous equipped with the kennel papers is opened to the members, the club will be as nearly perfect as it is possible to make it.

The Hempstead Farm consists of some 400 acres, divided into three separate establishments. The Home Farm is devoted to the horses and cattle, and has accommodations for about 125 horses; in the cow stables are some 70 head of registered Jersey cattle. On the East Farm are the Hempstead Farm Kennels; on the West Farm, the Hempstead Farm poultry yards. Heretofore all has been the property of the Hempstead Farm Co., Limited, but Mr. Terry has now acquired all interests except that of Mr. Lewis. The Hempstead Farm Co., Limited, will cease to exist on May 1. A co-partnership consisting of Messrs. Thomas H. Terry, A.D. Lewis and James Mortimer will take its place, which will lease from Mr. Terry the farm and carry on its business, the farm being the property of Mr. Terry and the stock, implements, etc., being the property of the copartnership.

Fangle—It seems to me very strange that Mrs. McJunkin should lavish so much affection on that homely pug dog. Cumso—Not at all. You ought to see her husband.—*Epoch.*

The annual meeting of the Maryland Kennel Club took place March 2, at the rooms of the club, in the Central Savings Bank Building. A committee, consisting of Col. H. D. Loney, Edwin J. Farber and W. Stewart Diffenderffer, was appointed to consider the project of authorizing the issue of a capital stock not exceeding $5,000, with a view to increasing the usefulness of the club and to have sufficient funds to give even better bench shows than heretofore. The following officers were elected for the ensuing year: W. Gilmor Hoffman, Pres.; Col. Henry D. Loney, Vice-Pres.; Wm. Charles Farber, Treas.; W. Stewart Diffenderffer, Sec'y; Edwin J. Farber, Attorney; who, with R. Gordon Williams, Alexander Brown, Geo. W. Massamore, Charles Ross Diffenderffer, Thomas J. Sheubrooks and James Thompson, will constitute the Board of Governors. Mr. W. S. Diffenderffer was elected delegate to the American Kennel Club, and Dr. W. H. Martenet, veterinarian to the club.

We were very pleased at the businesslike and unassuming manner in which the Keystone Kennel Club's show was run last week. Everything seemed to move along without friction. The only things that cast a damper on the affair were the sad faces of the management, and especially that of Mr. James Watson, when they looked out of the windows and saw hail, sleet, rain and everything else in the shape of contrary weather. Two whole days it kept that sort of thing up, but Thursday broke bright and clear and by 5 o'clock Mr. Watson heaved a deep, self-satisfied sigh and exclaimed, "We're on velvet from now to the finish." Both floors were crowded as we left on Thursday evening and late reports state that the club cleared $1,000. This we sincerely hope is true.

It must be remembered it is a serious undertaking to run a show in Philadelphia, where the record of so many losses stares one in the face, and we believe we are right when we say this is the first show, with the possible exception of the National Breeders', that has paid its way.

Mr. Watson worked the local press ropes with the deftness of long practice and they answered nobly. Without this important item of show management being attended to properly very few shows can hope for success.

The rings were well served and attendants did their work honestly, and after the first day the rings were kept much cleaner and covered with fine white sawdust, not the dingy looking stuff that covered them the first day.

The officers of the club are Jos. A. Wenderoth, Pres.; E. C. Johnson, Vice-Pres.; Jas. A. Mundy, Treas.; James Watson, Sec'y; and Daniel Mills, Jr., Asst. Sec'y. The superintendent was John S. Bratton and his assistant Frank P. Smith, but on the latter and Mr. Watson, I think, devolved the practical working of the show, ably aided by Mr. Mills, for whose courteous treatment we extend our thanks.

For a show of that size, 422 entries, we do not think that the judging has ever been completed in one day, even to the awarding of the specials. We fancy, however, that Mr. Raper, who only commenced at 2 P.M., had rather to hurry himself in some of his awards, though this would make no difference with him; people accustomed to our slow-going methods are apt to comment on it, which was the case at Philadelphia.

The sensation of the show was Fred Kirby's bulldog, which, unused to the noise and gayety of a bench show, broke his rope and made a wild plunge through the second story window, landing on his back on the pavement below. Beyond improving his front, he was not materially hurt and was quite content to remain in his stall for the rest of the show, with the proud satisfaction of having made the building ten degrees colder than it was before, owing to the broken window. This reminds us that the only fault that could be found with the arrangements of the show was the utter lack of heating facilities, and the weather the first two days must have made it very uncomfortable for the smooth and pet dogs.

On Tuesday members of the press and some of the judges and exhibitors, together with the committee, were given a lunch by the president, which made a pleasant break in the proceedings.

Mr. Huntington is very proud of the fact that his Psovie Modjeska has a litter of nine by Mr. Purbeck's Sailor that are said to be very promising, and if they are not the first to be bred in this country they are very near it.

Mr. Avent's Bessie Avent must be a good natural "bird dog" as he tells us that owing to her natural field qualities she can beat Roderigo at the game, and that he has had $1,000 offered for her. She has not been trained yet owing to an accident, having been struck by a train, which broke her hip. Bessie is, however, now in training. He has a fine litter of pups out of her by Chance, some of which are next year's prospective Derby winners.

At the Bath (Eng.) show lately held, one of the innovations calculated to help the judge in his work in judging puppies was in putting the age of the pup along with its number in the judge's book. Another was the statement accompanying duplicate entries in the judge's book that such and such a dog had been entered in classes already judged.

A gentleman in England has just sold the two prize winning deerhound bitches Royal Laura and Royal Ouida, to go to Australia, where they will be used for kangaroo hunting, and it strikes us it will take an "old man" to stand up against such dogs.

From *Stock-Keeper* (Eng.) we learn that two good King Charles spaniels have been shipped from Mrs. Forder's kennels to Mr. Boesger, Cleveland, O.

The following gossip about the Waterloo Cup in the *Stock-Keeper* (Eng.) is interesting: "Fullerton, in fact, may be with every propriety styled the lucky dog of the meeting, as in his course with Rhymes on Wednesday he was extremely fortunate, for had not puss favored him just after he had contrived to steady himself, he would, in all probability, have been put out. His great opponent, Racecourse, on the other hand, had all the worst of the luck, for the gruelling he experienced when he met Ivan the Great had taken all the steel out of him before he went to the slips with Fullerton. The forward running of Mr. R. Paterson's Roman Oak has proved that in the blue son of Arithmos, the popular Scottish courser possesses a nailing good outsider; while by running up Mr. G. F. Fawcett's Fitz Fife, another member of the long priced division, proved that the kennel made no mistake in selecting him to represent them. It is hard luck, however, to provide the runner-up for two years in succession, and Mr. Fawcett certainly commands the sympathy of coursing men. In the Waterloo Purse, Mr. Russell was repaid for his disappointment over Racecourse by the victory of his second string, Red River, who ran in the nomination of Sir C. W. Anstruther; while in the Plate, the uncertain Simonian did Col. North and Mr. N. Dunn, of Newcastle, a very good turn by defeating Lecturer in the final course. Last year, it may be remembered, Fullerton's wayward brother was successful in the Purse, after having been put out by the big dog, whom he led quite three lengths, in the first round of the Cup. This year he ran honestly enough, and Fullerton certainly proved to the spectators that he possesses a full modicum of grit by the determined manner in which he ran with Fitz Fife after their undecided."

The University of Pennsylvania intends to build a hospital exclusively for dogs. On the first floor there will be a large clinic room where operations will be performed; there will also be three wards, two which will be isolated for mange and other contagious diseases and the other for non-contagious diseases. Each dog will have a cage to itself, and the arrangements are intended to be quite elaborate.

The arrangements for the members of the press at the New York show were very much better than last year, a room in the building with messenger call being allowed for their exclusive use. A table was also set apart in the restaurant where one could scan the bill of fare with no thought of the reckoning.

We are sorry to hear from Messrs. Blake & Herbertson that their cocker bitch Jessie, second at Chicago and first at Jackson, Mich., is dead.

Mr. John E. Thayer feels so well satisfied with the success of the special he offered for the best puppy sired by any of his dogs that he intends to offer the same prize, $100, next year.

Mr. Wade wishes us to state that dogs belonging to friends of his, unaccompanied by owners, will be looked after at the Pittsburgh show by his man if he (Mr. Wade) is advised in season. It strikes us that Mr. Wade's man will have his hands full.

Secretary Vredenburgh announces that the stud book for 1891 will be ready for distribution on Monday, the 14th inst.

Besides having just imported the bull dogs Rustic Swell and Adiscombe Gypsey, Frank Dole has now on the way over several fine bull terriers, which will very likely be seen at Pittsburgh. They are Trentham Duchess, by Trentham Prince—Trentham Belle; Ted Pritchard, by Ben Caunt—Min; Streatham Flyer, by Gully the Great—Rose and sire of Streatham Monarch; Edgewood Robin, another good one; Duchess of Life and Lilly White, Hinks—Trentham Baroness. Addiscombe Gypsey was bought on sight by A. B. Graves, of New Haven, Conn., who also bought Handsome Dan.

We are sorry to learn from Mr. Albion L. Page, that the Dunrobin Kennels intend to dispose of their dogs and leave the fancy. Here is an excellent opportunity to pick up some good deerhounds. Mr. Page however would like to sell the kennel entire, if possible. Jackrabbits have been ordered by Mr. Page and will be turned down in the deer paddock on his estate, a description of which we gave in our account

of Dunrobin Kennels last summer. There rabbits will be used in coursing by the Eastern Coursing Club.

The FOREST AND STREAM Dog Show Extra is still selling. It holds the record as the hit of the season.

ARRIVAL OF 'PSOVIE ARGOSS.—Brooklyn, N. Y.—*Editor Forest and Stream:* After many trials and tribulations (nineteen days from London to Houston street dock) my Psovie Argoss, winner of the grand medal, Moscow, Russia, 1891, finally reached me safely and in most excellent condition. I wish to tender Messrs. Spratts, of London, my many thanks for the excellent manner in which he was shipped. First of all he was provided with a warm blanket of good English farm cloth, and next he was crated in a large and perfectly ventilated box, supplied with feeding and watering vessels of earthenware which could easily be kept sweet and clean. He reached here in excellent spirits, attributable in no small degree to very pleasant quarters. To say I am pleased with him but mildly expresses it; and I shall look forward to the Washington decision, hoping the good impression may extend beyond my biased feelings. In this issue of your paper the award will probably appear. He will be placed in the stud at once.—H. W. HUNTINGTON.

MR. BUNN'S MASTIFFS.—Peoria, Ill., March 2.—*Editor Forest and Stream:* I would be glad to answer through your columns the many inquiries I am receiving wishing to know if I should exhibit my kennel of mastiffs at any of this year's shows. To all I would say, no. My bitches have all come in season since Chicago and have been bred as follows: Sinaloa, first Chicago, bred to Beaufort's Black Prince. Ilford Cameo, second Chicago, to Ormond, first Chicago. Matella, third Chicago, to Wellingtou, second Chicago. Lady Cobrey to Edrie, second Chicago 1891, and a son of Jack Thyr. Lady Cobrey bred to Jack Thyr produced Ilford County Member. From this array of blood I look for some of next year's winners.—CHAS. E. BUNN.

BLACK WONDER.—Sandborn, Indiana.—*Editor Forest and Stream:* I wish to state that we have concluded to show our stud dog Black Wonder at Pittsburgh show. Until after that time, parties who desire his services will address my brother Joe H. Hunter, Washington, D. C. My bitch Daisy Hunter whelped on Feb. 28 ten puppies, by champion Antonio. All are doing well.—JOHN A. HUNTER.

COYOTE COURSING.—Pittsburgh, Pa.—*Editor Forest and Stream:* I desire to announce that on Saturday afternoon, March 12, two or more coyotes will be coursed on the Hacke stock farm, which is 31 miles from this city. This can be witnessed by all who desire to do so.—J. B. GRIMES.

CHICAGO AWARDS.—In King Charles Spaniels open bitch class, R. W. Holmes's Mollie Darling was first, Little Dollie second. In puppy class R. W. Holmes's Mollie Darling was second and Chas. Sidley's Nell Gwynne II. third, and not as stated.

CORRECTION.—The winner in novice fox-terrier bitch class at New York show was Clarence Rathbone's Beverwyck Moonray, and not J. L. Taylor's Brittany.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Princess Pet. By David Hawk, Lykens, Pa., for red Irish setter bitch, whelped June 5, 1891, by Elcho, Jr.'s Don (Elcho, Jr.—Maggie H.) out of Chief's Nord (champion Chief—Gipsy Maid).

Nellie. Black, white and tan beagle bitch, by Lincoln out of Nellie Krueger, by F. C. Rochester, Logan, O., to Geo. Gillivan, West Jefferson, O.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

H. M. H.—We know of no book on the Chihuahua dog. There is very little known about them in the United States.

I. O. C.—Rub some whale oil and sulphur on the leg and give a spoonful magnesia in his food every alternate day for a week.

J. H. H., New York City.—Where can I have dogs registered and pedigrees examined? Ans. At the American Kennel Club, 44 Broadway, New York city.

W. C. C.—Will you kindly give me the pedigree of the beagle Frank Forest? I believe he was a winner in the field trials of the National Beagle Club. Ans. Frank Forest is by Riot out of Skip and was whelped April, 1886. Breeder, Mr. George F. Reed.

READER.—What is the pedigree of champion Dick Swiveler? Who is he owned by and please give some of his winnings. Ans. Dick Swiveler by champion Bruce out of Leigh Doane II., owned by Mr. W. L. Washington, Pittsburgh, Pa. First New York, Lynn, Denver, Rockford 1889; first New York 1890 and 1891.

PISECO, Port Royal, S. C.—May a full-blooded Irish setter have any white in the coat? Ans. Yes. The standard adopted by the Irish Setter Club of America provides as to color and markings: "The color should be a rich golden chestnut or mahogany red, with no trace whatever of black; white on chest, throat or toes, or a small star on the forehead, or blaze on the nose or face not to disqualify."

A CONSTANT READER.—To settle a discussion would you kindly state which of the two breeds of terriers—the hard-haired Scotch terrier, the Dandie Dinmont and fox-terrier—is generally considered by experts the gamest and most lasting terrier? Ans. They each have their partisans, and it in a great measure depends upon the work they are required to do. In a scrimmage among dogs of anything like its weight, the Dandie will be found near the top of the heap, however long the struggle might last. There are, however, individual specimens of either breed who could be depended upon to the fullest extent; but taking everything into consideration we should plump for the Dandie as the gamest, strongest and therefore the most lasting of the three breeds.

E. J. R., New York City.—What is necessary to do to have a fox terrier registered? 2. Is mange always curable with the proper treatment? And what is the treatment? At what age is it possible to have a young bitch served? Ans. Send to A. P. Vredenburgh, 44 Broadway, New York city, for register blank. The fee is $1. 2. As a rule it is. Apply the following mixture four times a day for three days, then wash off thoroughly:

R Sulph. Flor.	℥j
Bals. Peruo.	℥j
Morph. Sulp.	gr. ij
Vaselin.	℥iv

The bitch, as a rule, comes in season for the first time when about ten months old, but it is not always advisable to breed her at that early age; about fifteen or sixteen months of age being the best time, as the bitch is then more mature and better able to bear the strains of maternity.

Business.

CANANDAIGUA, N. Y., March 1.—Allow me to say a word for the FOREST AND STREAM, of which I am an ardent admirer and a constant reader. A few weeks ago I inserted in your columns a small "ad.," offering for sale a litter of pointer pups, and I at once received numerous inquiries and have effected the sale of all of them. I cheerfully recommend as an advertising medium your most valuable paper.—L. A. PARKHURST.

Canoeing.

Canvas Canoes and how to Build Them. By Parker B. Field. Price 50 cents. Canoe and Boat Building. By W. P. Stephens. Price $2.00. Canoe Handling. By C. B. Vaux. Price $1. Canoe and Camera. By T. S. Steele. Price 1.50. Four Months in a Sneakbox. By N. H. Bishop. Price $1.50. Canoe and Camp Cookery. By "Seneca." Price $1

OCTOBER.

1. Springfield, Cup, Springfield,

THE Royal C. C. in making up its programme for the season has introduced on innovation which is likely to have a most important effect on canoe designing and racing, being nothing less than a race for canoes with American sliding seats. A proposal to permit the use of sliding seats was made last year, but voted down, and while the present exception is only for one race, it is a great departure from the position thus far held by British canoeists. A little experience with the Butler seat is likely to convince them that canoe sailing is safer, easier, dryer and faster than with the fixed deck seat.

A STICKFULL OR SO.

A FRIEND of mine asked me a "poser" a couple of days ago. It was worded something like this: "You're a vice-commodore, are you not?" I answered in the affirmative. "Well, what are you vice-commodore of?" Therein lies the stumbling block. The A. C. A. constitution reads as follows: "Art. V., § 1. * * * and for each' Division a Vice Commodore, Rear-Commodore and a Purser."

Now I have been a vice-commodore for two years, but whether it is of the A. C. A. or of a division I know not. The constitution further states in Art. V., § 2. "* * * In the event of the office of commodore becoming vacant by any cause, the same shall be filled for the unexpired term by the ranking senior office of the Division from which the Commodore was elected." Now the question arises if there is a senior vice-com., is he not the senior vice-com. of the A. C. A.? One often sees among officers of a large corporation the offices denoted as first, second or third vice-president. Is not the case an analogous one? It is enough to belong to that select circle known as the A. C. A. Commodore Club without having this dread uncertainty upon one's shoulder. If my brother vice-commodores are not officers of the A. C. A., then that Association only has a single executive, but as I look at the matter the missing link is provided by the right of succession in the event of a real, simon pure commodore being removed.

It is with pleasure that I note the fact, furnished me by "Billy Wack," that the year book is really likely to appear at an early date this year.

There is a suggestion of activity in southeastern Massachusetts, re the A. C. A. New Bedford and Providence, particularly the former, furnish some of the finest canoeing waters on tide water. New Bedford Harbor is a perfect gem, and should produce a grist of fine canoemen.

The following additions to the Puritan C. C fleet will be made this spring: By Com. Gilmore, an 18ft.×40in. canoe yawl and an open paddler; by Chas. F. Dodge, a 16ft.×30in. cruising canoe; by Geo. R. Underwood, a 16ft.×30in. racer, all by Robertson, of Auburndale, Mass. Extra accommodations are to be put in the house for fifteen canoes.

After the unconstitutional Division meet in the Eastern Division last year, entirely arranged by others during the absence of the vice-com. on business, the Division may not find itself in financial condition strong enough to hold a meet this spring. It is hoped, however, that sufficient increase in membership may be gained to permit of the expenditure of the necessary amounts.

I have just finished the third reading of "Canoeing in Canuckia" and thoroughly enjoyed it. What a mine of information it is for a novice to digest, and how many stumbling blocks the beginner could avoid by reading the experiences of the Commodore, the Vice, the Artist and the Cook. If one, young or old, wishes to mark the great strides canoeing has taken in a few years, he need but read this highly interesting narrative and contrast it with the canoeing of to-day.

What a relief it would be if this "what-do-I-get for-my-dollar" sort of spirit would cease to intrude itself upon conversations held between the A. C. A. missionary and his intended convert. What in the world a man wants to ask such silly questions for is beyond my comprehension. Besides, such questions are very difficult to circumvent when upon A. C. A. business.

The Puritan C. C. are agitating the question of becoming an A. C. A. club. This is a movement in the right direction, and could be properly and easily followed by the smaller clubs. It would give them a very enviable standing in the canoeing world. This excellent plan is followed in all too few instances. LEX.

MAHN-A-WAUK C. C.

THE Mahn-a-Wauk C. C., of Milwaukee, held its first annual meeting at the club quarters on March 1. Great interest was manifested in the meeting and it was well attended The annual election of officers resulted as follows: Com., Fred. W. Dickens; Vice-Com. E. J. Hansen; Sec.-Treas., A. P. Chapman, Jr.

Five new active members were elected, which swells membership to twenty-two. The club decided to celebrate its first anniversary on March 19 by a banquet at the Plankinton House, Milwaukee.

Sec.-Treas Woodruff, of the Western Canoe Association, was the guest of the club at the meeting, and he is confident that there will be 100 canoes at the summer meet on Lake Winnebago, this State.

The Mahn-a-Wauk Club, who were instrumental in having the meet held in Wisconsin, will send at least 20 members and 15 canoes. Canoeing is very active about Milwaukee.

RUSHTON'S BOATS.

THE new catalogue of canoes and boats just issued by Mr. J. H Rushton, of Canton, N. Y., is far handsomer and more elaborate than anything of the kind we have yet met with, being double the size of previous catalogues, and possessing artistic features such as are seldom seen in books of this class. The illustrations are numerous and excellent, and the subject matter is new and most readable, the introduction in particular being very taking. A number of lines of boats and canoes are given, but they are supplemented by shaded pictures of the boats, which to many will convey a clearer idea than the lines. The catalogue includes a still larger list than of previous years of all sorts of pleasure craft, rowboats, rowing and sailing boats, canoes for sailing, cruising and paddling, yachts, tenders, single-hand cruisers, sneak boxes, sails, rigs, oars, paddles and all the varied paraphernalia of boating and canoeing.

NEWS NOTES.

A. C. A. Membership.—Eastern Division: Edward D. Lamb, South Hadley Falls; Geo. W. Raynes, Jr., Lowell, Mass.

The officers of the Yonkers C. C. for 1892 are: Com., H. L. Quick; Vice-Com., P. B. Rossire; Sec'y, Thos. Hale; Treas., J. W. Simpson.

The Springfield C. C. is looking for an active season, with plenty of racing, the following dates being fixed: Spring meet at Calla Shasta, May 28 30, with championship races; club cup, May 7, June 4, July 2, Aug. 6, Sept. 3 and Oct. 1.

The officers of the Knickerbocker C. C. for 1892 are: Com., E. C. Griffen; Vice-Com., R. E. Whitman; Treas., Jas. P. O'Shea; Sec'y, J. E. G. Golden; Meas., F. C. Moore; Regatta Committee, W. T. Dudley, S. T. Wintringham and R. W. Gibson.

The Jersey City C. C. has chosen for a signal a design with four vertical stripes of blue and three of white, with a red crescent, the club totem, in the center. The club will hold a regatta on May 30 at the club house, foot of Danforth avenue, Newark Bay, Jersey City. The officers of the club are: Com., W. H. Hillier; Vice-Com., E. W. Edinger; Sec.-Treas., W. T. Markham (address 5 Wiley street, Jersey City).

Com. Wiune was lately in New York, and reports that he received the heartiest and most hospitable welcome in his recent trip through the Northern Division, from Toronto to Montreal and Ottawa. On Feb. 17 he was present at the third "At Home," given by the Toronto C. C. at the Academy of Music in Toronto, a very enjoyable entertainment. The Commodore of the T. C. C., Mr. G. R. Baker, and Messrs. Elgie, Ford, Tilley, St. Croix Bell, Sparrow and Ellis, accompanied Com. Wiune to Peterborough, where a grand camp fire was held in his honor. Last Friday and Saturday he was to run up to Montreal and Ottawa. The Northern Division is promising a large delegation to Willsborough Point.

A canoe club has been organized at Neponset, Mass., and "our band is few, but true and tried." We have termed it the Nockerbout C. C., and the signal of the club is a pointed pennant with a blue field containing the initial letter of the club in white. Officers have been elected as follows: Com., Chas. Hopkins; Fleet Capt., L. Bret; Steward, Edward Quincy; Sec'y and Treas., L. B. Smith. We have sailed and paddled together before on cruises, but none of us have ever entered a race. The club consists of ten enterprising members, whose aim is to encourage canoeing in this vicinity; and the prospect of a large membership before the end of the season is good.—L. B. SMITH.

The Brooklyn C. C. announces the following fixtures for 1892: May 14.—Sailing race for B. C. C. challenge cup. May 21.—War canoe race, one mile straightaway, crews of 15 men each. May 28 to June 4.—Delaware River cruise. June 14.—Tandem Paddling. 1. Decked canoes, double blades. 2. Open canoes, single blades. June 25.—Sailing Regatta. 1. Juniors, 1½ miles. 2. Senior, 3 miles. 3. Canoe yawls, 3 miles. July 2.—Annual cruise and race for Pagan cruising trophy. July 9.—Ladies' day at club house. July 15.—Handicap sailing race for special prize presented by Mr. Jos. Rudd, Jr. Swimming race, ¼ mile. July 30.—Combined race, 3 miles, usual conditions. Sept. 3.—Visiting cruise to Passaic River clubs. Sept. 10. —Single Paddling. 1. Decked canoes, double blades. 2. Open canoes single blades, Trophy and cup races open only to members. All other races, except swimming, open to members of A. C. A., or any recognized canoe, yacht or athletic club. Swimming race open to A. C. A. members only. Special programme will be announced as required. The Record for club members will be made up from unlimited sailing, double blade paddling, combined and swimming races. The member who shall have finished in the most races will be presented with a special prize, donated by Mr. W. H. Cammeyer. JJ. Regatta committee: Com. Chas. P. Weekes, ex officio, M. M. Davis' Joseph Rudd, Jr., M. V. Brokaw, chairman.

Yachting.

Small Yachts. By C. P. Kunhardt. Price $10. Steam Yachts and Launches. By C. P. Kunhardt. Price $3. Yachts, Boats and Canoes. By C. Stansfield-Hicks. Price $3.50. Steam Machinery. By Donaldson. Price $1.50.

SEPTEMBER.

3. Larchmont, Fall, Larchmont.

A STRIKING commentary on the ambitious attempt which was made five years ago in the new deed of gift to regulate the size of racing yachts and introduce a large and expensive type of craft, is found in the present condition of yacht racing in Boston, and in fact about New York as well. In drawing up the new deed it is decided by those who aspired to govern the course of yacht racing that a 90ft. single-sticker or 115ft. schooner was the only proper craft for a yachtsman to own; the rights of the many owners of the 70ft. and smaller racers were totally disregarded, and the Cup, which belonged as much to them as to the owners of the promised 90-footers, was placed far beyond their reach.

After all the loud promises of new 90-footers and of the great future for the class, the whole interest of racing in the East is this year centered in a class of 21-footers.

This small class is an admirable one at this time, encouraging experimental boats of all types, with enough racing to settle many vexed questions. Much more may be learned from the weekly racing of its dozen members than from a few races during the season by a fleet of three or four large yachts. At the same time, yacht racing cannot be confined entirely to the smallest classes; and all yachtsmen would be glad to see such practicable and popular classes as the 70ft. and 55ft. built up again.

In the America Cup the New York Y. C. has in its hands the means of building up the 70ft. class in a single season, and if all racing is not to be confined to boats under 30ft., this remedy cannot be applied too soon by returning to the genuine deed of gift, with its sale limit of over 30 and not over 300 tons.

INTERNATIONAL RACING.

WE are pained to see, from the last issue of the *Yachtsman* that the *entente cordiale* between that paper and its American correspondent has been rudely interrupted, as will appear from these two extracts:

"An American journal dealing with the *America* Cup question, asserts that the Royal Victoria Y. C. Challenge Cup is practically a copy of the New Deed. We do not wish to pose as a champion of the R. V. Y. C. Cup, but we would point out that that club had a perfect right to impose any conditions which may have seemed meet upon contests for that cup, seeing that they paid for and offered it. If one of the conditions be "that no race shall be sailed without the written consent of the Man in the Moon," surely nobody can grumble, for such a clause would simply mean "that the cup shall be the private property of the club"—and, indeed, so it seems very likely to be."

"In connection with the above, it may be remembered that our American correspondent, in vindication of the New Deed, thought fit to comment upon Mr. G. L. Watson. We made an editorial remark upon this, which we are quite ready to substantiate, if such a procedure be necessary, which is not the case. This has given such offence to our respected Trans-atlantic correspondent that *The Yachtsman* has been deprived of his services. We regret this unhappy episode in our career, not only from the fact that the *America* Cup has cost us a really valued correspondent, but because we see clearly that a representative portion of the American public still swear by the unsportmanly Deed, and, in support of it, do not hesitate to "throw dirt" where they know it will stick, viz., among certain classes in America."

Not only has the explanation of the Boston representative of prominent American yachtsman failed entirely to explain to the blind Britishers how the New Deed was conceived and executed solely for their benefit; but the mis-quotations and misrepresentation of the bona fide deed have called forth the following severe condemnation of the new one for an American correspondent of the *Yachtsman:*

SIR,—The defence of the new deed of gift of the *America* Cup by your Boston correspondent, which appears in your issue of January 28 ultimo, is an able paper, vastly more able and conclusive than the facts about the new deed give warrant for. It is apparent, from the various errors which your correspondent has fallen into, that he did not take the precaution of having the text of either the old or the new deed before him when he undertook the attack upon the first and the defence of the latter; he was therefore forced to draw largely upon his imagination for his facts. So much is this the case, that the deeds which your correspondent attacks and defends, as presented in his argument, bear only a remote resemblance to the real ones.

I propose, with your permission, to consider how far your correspondent's arguments and statements are borne out by the documents in question. First, as to the old deed. A. G. M. says, "The old deed of gift was loosely drawn, uncertain and unfair. British yachtsmen, if they knew it, had less chance to win under it than under the new deed, because they were left unprotected. The old deed was not carefully drawn, and no details were named. Uncertain because of its many doubtful words, and unfair because it allowed Americans to build a yacht 200ft. waterline length to meet *Genesta*, *Galatea*, or *Thistle*. It prescribed a course over the inside New York Harbor course, one which, in the light of the draught given to our modern yachts is not an unfair one, but one actually dangerous on account of its many shoal spots." The old deed said that "a yacht over 30 tons could challenge for the cup; and six months' notice should be sent with the challenge; that one of the races should be sailed over the inside course; and the rest should be out to sea,, twenty miles to leeward and return."

Here is the text of the conditions for matches in the old deed:—

"Any organised yacht club of any foreign country shall always be entitled through any one or more of its members, to claim the right of sailing a match for this cup with any yacht or other vessel of not less than thirty and not more than three hundred tons, measured by the Custom-house rule of the country to which the vessel belongs. The parties desiring to sail for the cup may make any match with the Yacht Club in possession of the same that may be determined upon by mutual consent; but in case of disagreement as to terms, the match shall be sailed over the usual course for the annual regatta of the Yacht Club in possession of the cup, and subject to its rules and sailing regulations, the challenging party being bound to give six months' notice in writing, fixing the day they wish to start. This notice to embrace the length, Custom-house measurement, rig, and name of the vessel.

This deed is dated July 8, 1857, and bears the signatures of J. C. Stevens, Edwin A. Stevens, Hamilton Wilkes, J. Beckman Finley, George L. Schuyler. It was formally accepted by the New York Yacht Club, by resolution as follows:

Resolved, that the New York Yacht Club accept the Cup won by the America, and presented to them by the proprietors, upon the terms and conditions appointed by them.

These conditions are clear, fair, and sportsmanlike to my mind. Where A. G. M. finds his "many doubtful words," and where the deed prescribes the inside New York course I cannot see. If it happened that the New York inside course was not a suitable course for deep-draught yachts, that was the fault of the course, not of the deed, the remedy was clearly for the club to select a suitable course, and thus bring itself into harmony with the conditions which it assumed when it formally accepted the cup upon the terms and conditions appointed by the donors.

If the New York course was not such a course as could be fairly and safely sailed over by yachts of the depth and tonnage that might properly challenge for the cup, then the club was bound by its acceptance to provide such a course, otherwise its acceptance would have been a hollow mockery, and to say that the old deed prescribed such a course is the purest kind of nonsense.

It was within the competence of the New York Yacht Club to alter, amend, or change its own rules and sailing regulations in any way, absurd or otherwise, so as to prevent the possibility of any foreign yacht club ever winning the cup. They could have done this, and yet kept within their technical rights under the deed, but to alter or change the deed itself was, and is as much outside the powers of the club, as it is for the club to change the course of a planet by resolution.

The cup, with its original deed of gift, and their formal acceptance by the club, formed together an international yachting trophy of the very highest historical value. To tamper either with the cup or deed was little short of sacrilege from a sporting point of view. It has, in fact, so far destroyed the prestige of the cup that now it is extremely difficult to awaken any enthusiasm about it on either side of the Atlantic.

So much for your correspondent's attack upon the old deed. Let us now turn to his defence of the new deed.

Holding, as I do, that the so-called new deed is of absolutely no legal value whatever, I find it very difficult to settle down to a consideration of its terms. Premising then this fundamental proposition, that the new deed is, in my opinion, absolutely worthless, that its origin, in the "hanky-panky" work of giving back the cup to, and re-accepting it from, old Mr. Schuyler, the sole surviving donor, was a contemptible farce; a farce which might do well enough to play on the stage in opera bouffe, but entirely unworthy of being seriously performed by a leading yacht club in connection with a grand international sporting trophy like the America Cup—keeping this promise always in view, I proceed to consider your correspondent's arguments.

First, "it gives us fixed lengths 90 ft. for single-stickers and 115 ft. for schooners." This is, in my opinion, one of the strongest arguments against the deed. When did the New York Yacht Club receive the Divine revelation fixing the exact limit of length for yachts? Because this is really what their deed proposes to do. Supposing for the sake of argument that we admit there may possibly be some sane yachtsman somewhere within the limits of creation, who would propose to challenge under the deed, he must build exactly up to the limit of 90 ft. or 115 ft. neither more nor less, because, there being no time allowance, he would have no chance of winning if he built under the limit. Therefore, what the deed proposes to do, so far as its influence goes, is to fix for ever the limit of length of racing-yachts, a thing which would be in direct opposition to the purpose and object of a great maritime racing trophy, namely, to encourage the building of sailing-yachts of every size, in order to lead up to ultimate perfection in the attainment of speed and sea-worthiness.

As to single-stickers, it may be that 90 ft. is about as long as they ought to be built, but who gave the New York Yacht Club the right to dictate to all foreign yachtsmen that they must not build beyond that limit? Who gave them the right to say that a sloop of 100 or 120 ft. load-line may not yet be designed to sail, with a reduced or moderate sail plan, faster than the present 80 or 90 footers?

As to schooners, the limit of 115 ft. load-line is too absurd to be defended for a moment Why, Sir, it excludes all the best schooner-yachts on both sides of the Atlantic, and would stop the development of sailing yachts just at the point where the possibility for improvement in speed and seaworthiness commence.

"*Secondly*, the new deed provides that centreboards shall not be prohibited from sailing for the cup."

It is, perhaps, right enough that centreboard yachts should be allowed to sail for the cup; but that is a matter which should be provided for by the rules and regulations of the clubs competing, as it has been since by the British Yacht Racing Association. It has no business at all in a deed conveying the cup.

"*Thirdly*, the inside course of the N. Y. Y. C. has been abolished," &c. What has this to do with the new deed?

"*Fourthly*, the time of challenging has been changed from six to ten months." This is another of the objectionable features of the new deed. No yachtsman wants to be tied down to exact dimensions, and a fixed day for so long a time as ten months in advance with all the particulars of his design in the hands of his opponent to cut and come on. Taken in connection with the dimension clause, this ten months' notice is abundantly sufficient to prevent a challenge so long as it remains in operation.

Now, about the dimension clause. Your correspondent admits that this clause is objectionable, and that no other dimensions, outside of a fixed water-line length, should be asked for; but he assumes that this clause can be waived by either party, ignoring the fact that the New York Yacht Club has formally decided that it will not enter upon the consideration of any challenge whatever until after it has received the full dimensions of the challenging yacht, as required by this so-called new deed.

So long as the club holding the cup adheres to this policy, there never will be a challenge; it would be absurd to expect it; and international yachting must remain in the grave where this pernicious document has buried it. "CRINGLE REDIVIVUS."

New York, Feb. 10, 1892.

NEW YACHTS.

THE chief activity in building in the East is in the new 21ft. class, new boats being announced every week, though in most cases the owners are unknown. Three are building at Lawley's, one by McIntyre; Mr. Waterhouse has lately completed a design for a fin keel 21 of novel construction, which will be built by Higgins & Gifford, of Gloucester. Mr. A. G. McVey, of the *Boston Herald*, has completed a design for a 21ft. "splasher" of great beam and light draft, which Smith is building. Messrs. Stewart & Binney have designed a 21ft. centerboard cat for Mr. J. Taylor, which will race in the new class, and Mr. J. Borden will have a fin keel boat to represent him. In spite of the small size of the boats, the class promises to be a most valuable and interesting one, and more may be learned from it than from the poorly-filled classes of much greater size. Almost every type of yacht will be represented, the small cutter, the fin keel in two or three forms, and the moderate and extreme centerboard, or "splasher." The rigs too will vary; cutter, sloop, jib and mainsail and cat, with all degrees of power. The boats cost so little to build and run, and call out so strongly the actual skill of the owner, that there is likely to be no end of hot racing through the season.

Lawley has partly plated up the new Gardner schooner. Frisbie, at Salem, has the two steam yachts for Dr. Wild and Mr. D. M. Little well advanced.

About New York, Piepgrass is plating the new Smith schooner and at Wood's shops, next door, the two Gardner boats, the steamer and the Sanderson 25-footer, to be named Pixie, are nearly ready. At New Rochelle Webber is at work on the Gardner 35-footer and he has also done a neat piece of work on the yawl Mimette, raising the deck and topsides bodily and putting in new tops to the frames and new wales, to increase the freeboard. At Poillon's the new steam yacht is nearly ready to be towed away for her engines. At Wallin & Gorman's the four Seawanhaka catboats are approaching completion, and the fleet will soon be manned and sailed to Oyster Bay together.

Tempest, schooner, has been sold through Hughes's agency by S. M. Roosevelt to E. A. Campbell, of Newark, N. J.

THE NEW WATSON CENTERBOARDER.

THE success of the centerboard 10-rater Dora last season has induced Mr. Watson to try the same experiment in a much larger yacht, a 40-rater, the general dimensions of which class are 59ft. l.w.l. by 14ft. beam. This new yacht, and a new keel boat of the same class, are described as follows in the *Field*:

A racing 40-rater centerboard is in course of construction in the building yard of Messrs. Henderson, of Partick, Glasgow. Rumors about this racing cutter have been in the air for a good many weeks, and they have finally taken shape in the hands of Mr. G. L. Watson, the designer of Dora and the other Clyde centerboards. This cutter, as may be imagined, is not a larger Dora. Instructed by the experience gained by Dora, the 40 rating centerboard shows considerable variation even in her present rudimentary state. The frames getting into shape show more rise of floor, which indicates a deeper and narrower cutter, and both ends suggest by easier lines less of a departure from the keel yacht than Dora did. The great rake of stem and sternpost leaves the impression of a shorter load waterline in comparison to Dora, with a corresponding increase of sail area. But the build of the cutter will only be seen when her scantling is completed; in the meantime, the designer is under obligation to give no other information than may be picked up with the progress of building the yacht. That an immense weight of lead keel is meant by the designer is seen from the excessive strength of the steel floorings, ties and diagonals. The solid wooden keel shows a slot very far aft of some 2½in. in width, and some 2½ft. in length, and if not enlarged the intention must be to raise a trifling part of the centerboard above the keelson. The lead keel is not yet cast, otherwise the extent of its adaptation to the centerboard would indicate the size of the gunmetal plate. The name of the owner of this racing cutter has not transpired, but no Clyde yachting man's name has been connected with her.

Just ahead of this 40 another 40 rating racing cutter is getting planked. She is a keel cutter, building for Capt. Towers Clark from Mr. Watson's design. Like the centerboard, she is composite, with a scantling that looks lighter than the 40 rating cutter Irene, built for Prince Henry of Germany last year by Messrs. Inglis, of Glasgow, from Mr. Watson's designs. The topside and covering board are of steel, perforated for lightness, and, of course, ultimately sheathed in wood. This cutter has, like the centerboard 40, what is known as a Dora bow, with a long overhang and a convex outline. From the stemhead to the keel the stem and keel make one easy and continuous curve, flattened as it gets aft, but from this cutter being a keel cutter with considerably more draft than the centerboard, the curve is much rounder. The sheer and counter show Mr. Watson's usual lines, and to those who are not prejudiced at the novelty of the bow, the cutter will be a handsome boat. The sail plan will have more cloth in the mainsail than the designer has been recently adopting, and of course the mast will be further forward. Both cutters will be plainly and substantially fitted up, and both will be ready for the first flight in the Thames.

The secrecy which has attended the order for, and the building of the new forty-rater centerboard at Partick has given rise to a rumor that if similar success attends her in racing against the keel forties that Dora started the Clyde with, she may be a probable challenger for the America's cup. But until the grave difficulties attending a challenge are set aside by the New York Y. C., a challenge is not likely to come off. That she will be quite deep enough to cross the Atlantic without the use of her centerboard there can be no doubt of.

The centerboard yacht is said to be for T. C. B. West, owner of Wendur.

WORK AT BRISTOL.

NOW that Wasp is afloat and the main shop clear, the work on the new Mayberry steamer is going ahead very rapidly. The frames for a yacht of this size are being bent last summer, awaiting an order, and a set of engines suitable for the boat were built at the same time; so that the building can be done very quickly. The yacht will be of steel throughout, the first all steel yacht which has been turned out at Bristol. Although the steel plant was put in some three years ago, and the torpedo boat Cushing was built entirely of steel; the larger steam yachts thus far have been of composite build; steel frames and double skin wood; the smaller yachts having wood frames. The north shop is quite filled up with yachts in all stages of construction. The Clyde 2½ rater was launched on Feb. 24, and has been at her moorings just off the shops. A day or two later, at the beginning of the recent easterly storm, she made her trial trip with Mr. N. G. Herreshoff at the stick, going well to windward in a very strong breeze and coming home with her decks and even her crew covered with ice. She will be shipped very shortly for the Clyde.

The 24ft. catboat is in one corner of the shop, entirely completed. Near her is Vice-Com. Morgan's new 25ft. fin keel, resting on the floor without her fin, the steel plate being ready, though the lead is not yet cast. She is a very neat piece of workmanship, clean joints and good finish everywhere, and the model, with its easy convex curves, without a suspicion of a hollow, is very attractive. All of the fin keels are practically of the same model, and unlike any existing craft. The bow is very shapely, being a lengthening of the old pilot boat stem, but the stern, owing to the width of the very long overhang at its extreme end, has rather a heavy look. The accommodations of the Morgan boat, not yet named, may be described as longitudinal but limited; there is ample length, and, in fact, plenty of width, but the lack of headroom under the flush deck makes it difficult to move about or do anything but turn in. Of course, a high cabin trunk would remedy this objection to a great extent, but as this boat is only intended for racing, the deck is perfectly flush.

The St. Lawrence steamer is well advanced, lying beside the Morgan boat. Ahead of the two are the 25ft. sailing length boat for Mr. Kersey and two of the Weston 21-footers, a fin keel and a centerboard. The former is similar to the Clyde and Kersey boats, and the latter, in spite of much more beam than the fin keels, shows a likeness to them in the general character of her lines. The firm has an order for a half-rater for England, and there was some probability of an order for a 5-rater from Lord Dunraven, but he decided to try Arthur Payne again, and the yacht is now building at Southampton. No signs of a new 46 footer are visible about Bristol, and there is hardly a probability now that any more additions will be made to the class. There is still plenty of time, if anyone comes forward with the money, to turn out a fin keel 46; and while she might spoil the racing and the class for this season, it is a question whether the experiment of a large fin keel might not better be tried at once, that yachtsmen may know all that is in it. Such a craft, for racing only, could be built at a moderate outlay.

MERSEY CANOE YAWLS.

THE home of the Mersey Canoe Club is at the old slip Birkenhead, and hard by is the building-yard of Sam Bond, well known as the birth-place of the "Mersey canoe" type, or large canoes, known as canoe yawls. These "Merser canoes," as a large class, began life by being simply large-bodied, beamy canoes; but speedily they augumented in size, sail and ballast, into small yachts, or canoe-yachts, deep-draughted and keel-ballast boats, whose only "canoe" characteristic left was that of being sharp at each end. In short, in giving up the majority of the useful characteristics of the canoe, they became simply inferior small yachts by hanging on the remaining points of canoe nature. But fortunately at that stage the yacht fever eased off, and gradually the type has returned to its true canoe form, and the latest craft on the stocks—though of size that might be called "yachty"—is throughout her nature, except her excessive beam, thoroughly of the canoe family.

Last week we had the pleasure of a thorough inspection, both of the new craft on the stocks, and of the latest additions to the fleet at the headquarters on the Mersey. Taking the largest and latest first, we find a fine specimen of sea-going canoe-yawl: a craft which, in our opinion, is quite on the verge of the practicable size for single-handed cruising anywhere. The yawl is for Dr. Paul, and is designed by Mr. Charles Livingston (who has kindly given her leading dimensions and weights, which will be found most useful in future comparisons of sea-going canoe yawls with small yachts). Her leading dimensions are: Length, 29ft.; beam, 5ft. 11in.; draught, 1ft. 6in.; area of mid-section, 4·2 sq. ft.; displacement, 1 ton 6cwt.; ballast, all stowed inside, 14cwt.; sail area total, 291 sq. ft.

She is well cut up at the fore foot, and has a good rise of floor, and very considerable fullness of bilge. She has an easy bilge, and runs much finer aft—both in water-lines and in quarters above—than is common in southern models. The model is just such as goes to make an easy sea boat, but, of course, needs suitable ballasting. The pronounced bilge and "floaty form" so popular in smooth water localities, and which is in places useful for special local requirements for beaching, are not conducive to easy motion in rough water, nor to speed at sea in inclined position, and it is not surprising to note the absence of such form in the Liverpool fleet.

This large yawl is carvel built, and beautifully-decked with teak. She is comparatively heavily built, but Bond knows well the nature of the work she will be put to, and has provided suitable scantling.

The next boat is absolutely "canoe yawl" from stem to stern, and must delight the eye of any seaman experienced in small boat work among waves. She is the Tavie, built last year by Bond for Dr. Hayward. Her ballast—5cwt.—is all stowed inside her (an essential point in canoe yawls); her length is 17ft. 7in.; beam, 4ft. 6in. She has considerable rake to her stern post, and wide overhanging quarters above fine after body lines; she should, with the after body she has, run very clean and safe before even a heavy breaking sea, provided sufficient sail is kept on her for effective steerage, or an oar used on the quarter. Her only fault is a little too much forefoot; she would benefit by a considerable rockering both forward and aft.

Looking at Tavie on deck, a novice would pronounce her greatest beam to be close aft, but it is close to amidships; her great sheer aft, and comparative width of deck to water-line, create the optical delusion. Her bilge is an easy round into a moderate rising floor, with a slight hollow in garboards. She has about 5in. sheer aft and 13in. forward.

Each of these boats would for real rough sea work be vastly improved in model by a reasonable amount of overhang at stem head. Though a "Roman nose" bow is something ugly its effect upon the boat's behavior in a sea, either running or going to windward, is so markedly favorable, that it should be there unless barred by the rules of the club.

The one point we above suggested as being not canoe-like in Dr. Paul's new craft is her great proportion of beam to length. Canoes, whatever their size, all the world over, are comparatively narrow long craft, and to go beyond four beams to length makes a near approach to boat, barge, or yacht rather than canoe.

Among the sailing canoes we saw three which, judging simply from viewing as they lay, showed a form of hull good enough to make things warm in racing if they came to Hendon Lake. Of course this is assuming their sail plans are equally good, and both boat and owner tuned up to concert-pitch. We must not omit to mention one large canoe-yawl, not in the racing or speed line, which was fitted with a small cockpit for working in, and the main body covered in by a roomy booby-deck cabin head. She is just that a couple of men could desire for a comfortable, lazy summer cruise in the fiords of the west coast of Scotland, or the inns and outs of the waterways of Sweden or Denmark. Her ballast, all internal and removable, enables her to be lifted about on to railway truck, steamer, or cart. She would row lightly and yet sail amply well for cruising.—*Field*.

BISCAYNE BAY Y. C., FEB. 22.

THE sixth annual regatta of the Biscayne Bay Y. C. was held on Washington's Birthday under particularly unfortunate conditions of weather, the breeze being so light and fluky that nearly six hours were consumed in sailing one-half of the projected 22 mile course. Of the 19 yachts entered only 15 started, the others declining to do so for lack of wind. The course was the regular club triangle of 11 miles, from Coco Plum Point to Bear Cut, thence to Cape Florida inner channel buoy, and thence to point of departure, this course to be covered twice by the larger boats and once by catboats and open sloops. As it was, all hands barely succeeded in getting around once in time to prepare for the reception and ball of the evening. The judges were Charles Richard Dodge, of Washington, D. C.; Alfred Monroe, of Concord, Mass., and Wm. D. Albury, of Biscayne.

During the races there were two notable specimens of light-weather sailing, the first being that of the sloop Gypsy, Thos. J. Falls, which easily led the entire fleet from start to finish, and the second being that of Jean de Hedouville's jsharpie Nicketti, which won easily in her class over three competitors. The club and open to all races were sailed together, and the winners in their respective classes were: Nethla, Vice-Com. Hine (club); Nicketti, Jean de Hedouville (club); Gypsy, Thos. J. Falls (open); Ross, of Key West (open).

The club reception and ball in the evening, during which the prizes won in the regatta were presented, was a decidedly brilliant affair for this section of country, there being nearly 300 guests present.

The championship pennants, won by Nethla, Nicketti and Florence W.—which last named had a walk-over—will be promptly challenged for as soon as the 30-day limit of possession expires. Thus we are promised other races before our season closes, and trust that for them the weather may be more propitious than it was for our regatta.

The Biscayne Bay Club extends a cordial invitation to all yachtsmen cruising southward during the season to visit them and make use of their club house at Cocoanut Grove, in the reading room of which will be found the latest files of the FOREST AND STREAM, as well as of the New York and Boston daily papers.

A very popular rig in this club is that of a three-sailed craft, in which the mainsail is smaller than the foresail. Notable examples of this rig are the Nethla, Micco, Oriole, Presto, Allapatta and Holgazana, all built by Brown, of Tottenville, Staten Island. It is not a regular yawl rig because in it the mainmast is stepped at the forward end of the cockpit and close against the house; neither is it a ketch, as it has heretofore been called. The Biscayne Club has therefore decided to adopt for it the term "American yawl" rig, by which designation they trust it may be generally known hereafter.

O. K. CHOBEE.

THE NEW YORK Y. R. A. DINNER.

AFTER a rather mild and open winter, the first day of spring in New York was of the sort which leads a man to choose a warm seat by the fire rather than to venture out, being cold and raw, with a dreary mixture of snow and rain. In spite of the bad weather, however, over 150 yachtsmen met at Clark's restaurant, in New York, to take part in the annual dinner of the New York Yacht Racing Association. Com. Prime prime presided, and about the tables were representatives of some 25 yacht clubs. The dinner was a great success, the evening closing with toasts and speeches. Under Com. Prime's able management the Association has been most successful since its organization, and besides establishing itself on a firm and permanent basis, it has done a great deal to promote harmony and co-operation among the clubs about New York.

NEWS NOTES.

MESSRS. L. W. FERDINAND & CO., of Boston, will issue no new catalogue this year; the last edition including everything in the line of yacht, boat and canoe hardware and supplies. They are ready to quote prices on all articles not included in the catalogue.

Mopsa, cutter, designed by Mr. Burgess and built by Lawley for C. F. Lyman in 1889, has been sold to J. W. Harrison, of New York.

Comet, schooner, the once famous racer owned by Mr. W. H. Langley, will be rebuilt at Poillons.

Surf, cutter, has been sold by Wm. Boyce, through Hughes's agency, to a Boston yachtsman.

The Buffalo Y.C. is at last likely to secure a site for a new and much needed club house on the borders of the new park. If the site is secured the club will erect a very commodious house.

The annual dinner of the Corinthian Y. C. of San Francisco took place on Feb. 20, eighty yachtsmen being present and Com. Stringer presiding.

The officers of the new Bayonne City Y. C. are as follows: Com., E. E. Van Buskirk; Vice-Com., W. E. Ellsworth; Sec'y, Philip Mooney; Treas., Frank Ellsworth; Meas., Philip E. Van Buskirk. It is intended to erect a club house on Ellsworth's Island, in New York Bay, opposite thirty-fourth street, Bayonne.

Wadena, steam yacht, recently arrived at Cadiz, Spain. Her owner, Mr. J. H. Wade, will join her at Alexandria. On March 4 she was at Algiers, sailing thence for Malta.

A fin keel 25-footer is promised in Boston for Mr. R. G. Hunt, owner of the racing sloop Posy of the Monatiquot Y. C.

There is some talk of the importation of the very successful 2½-rater Bahe for the 25ft. S. L. class about New York. She was designed and built by Arthur Payne in 1890, winning 25 prizes to 20 starts in that year. She is 26ft. 9in. l.w.l., with a lug rig of 555ft. by the Y. R. A. rule.

The Massachusetts Y. C. has this winter instituted a series of smoking concerts on Sunday afternoons which have become quite popular.

The Rhode Island Y. C. has elected the following officers for 1892: Com., A. E. Austin; Vice-Com., F. P. Sands; Rear Com., C. G. Bloomer; Pres., Sayer Hasbrouck; Sec., F. P. Eddy; Treas., E. T. Herrick; Meas., Benj. W. Stillwell; Asst. Meas., A. M. Black; Directors—R. H. Carver, R. L. Greene; Race Committee—A. D. Leete, C. F. Smith, E. E. Hubbard, A. B. Slater, Jr., G. F. Brownell; Committee on Admissions—C. G. Bloomer, Sr., R. H. Carver, R. L. Greene, A. M. Black, C. A. Eddy, E. T. Herrick, A. D. Leete, Leroy Fales, Chas. D. Wilbur; House Committee—C. G. Bloomer, A. D. Ross, R. L. Greene; Potter's Cove Committee—W. R. Fales, A. D. Ross, F. P. Eddy.

Editor Forest and Stream: I am instructed to inform you that at a recent meeting of the General Committee of the Corinthian Navy the FOREST AND STREAM was appointed official organ of the "Navy."—W. D. STRYKER, Purser.

The last number of *Le Yacht* contains the first part of a very interesting paper on the employment of aluminum in the construction of yachts.

Mr. Thos. Clapham, of Roslyn, L. I., will address the members of the Philadelphia Y. C. at the club house, 1715 Chestnut street, on Wednesday evening, March 16, at 8 P.M.

Crusader, schr., was recently sold through Hughes's Agency by J. R. Roosevelt to her former owner, C. A. Cheever, who within a few days sold her again to Wendell Goodwin and Frederick Swift.

The Indian Harbor Y. C., of Greenwich, Conn., will hold an open sweepstakes race on June 25, and an annual regatta on July 30.

Inanda, steam yacht, formerly Rival, owned by E. M. Field, was recently sold at a marshal's sale, being purchased by F. T. Chrystie for $7,400.

A recent issue of the *Wassersport*, the German yachting journal, contains a design by W. A. Stahl, a German designer, entitled "Quasi-Gloriana," and supposed to represent the American flyer. The attempt is a very clever one, but the design is more like Wasp than Gloriana, in fact much nearer to Wasp than some of the funny pictures in the daily papers.

The Greenville Y. C., of Greenville, N. J., on Newark Bay, has elected the following officers for 1892: Com., J. C. Simmonds; Vice-Com., O. Perry Vreeland; Sec., William Mitchell; Treas., Charles Mitzenius; Meas., Harry Watenstroth; Sergeant-at-Arms, Arthur Simmonds; Trustees, John Mitchell, A. D. S. Jackson and L. F. Harrison, Jr.

Mr. Waterhouse has an order for a 21 l.w.l. cutter of 25ft. sailing length for Mr. Young, of the Seawanhaka Cor. Y. C. The new boat will race in the class with Nameless, Needle, Smuggler, Pixie and the Kersey fin-keel.

A new smokestack is now building at Weymouth for the steam yacht Jathniel, being made of two cylinders of sheet iron with asbestos between them, the object being to prevent the burning of the paint.

Rifle Range and Gallery.

AMATEUR REVOLVER CHAMPIONSHIP.

CLOSE on the announcement that all the New York shots had fired their scores in the amateur revolver match comes the request from St. Louis for a date there. Some time past the St. Louis Pistol Club was known far and wide for the enthusiasm of its members with the single-handed arm and the excellence of the scores made by them. About a year ago the interest turned to rifle shooting, and 200yd. work had the call. A date within a few weeks will be fixed. A representative of FOREST AND STREAM will report at the St. Louis German Sharpshooters' range, where the firing will be done, and the records of the St. Louis experts taken and added to the forty odd sets of targets already made in this popular contest.

On Saturday evening last Dr. Hoffman fired his thirty shots at the New York Pistol Club rooms, No. 12 St. Marks Place. He found the strain of firing thirty shots and putting every one in the black no easy one to stand. When it was announced that a date was to be kept open for the St. Louis men, Barney Walther, of the New York team, said he had met them, "good fellows they are, too, and capital shots. They ought to be close up to the top I have been there and met them and am glad they are in the match.

Over in England the hold which revolver shooting has taken at Bisley led the Duke of Cambridge on the recent annual meeting of the National Rifle Association to announce that the next year's programme would include a much wider opportunity for the revolver marksmen. There will be two classes of revolvers provided for, military and army, with a series of prizes for each class. As much variety as possible will be given the competitions and a liberal prize list in an inviting series will bring, it is expected, a long list of entries. In a general way it may be said that the Council of the Association will adopt the suggestions made at the mass meeting of revolver shots, held by invitation of Mr. Walter Winans, at his marquee last July on Bisley range.

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

PALISADE RIFLE CLUB, Jersey City Heights, Feb. 25. The following scores were made to-night, 10 shots, off-hand, 25-ring target, possible 250:

C Burck	25	25	24	24	23	23	23	22	21	20—230
H B Udey	25	24	23	23	23	23	23	23	22	21—230
Capt J Reinhardt	25	25	25	24	23	22	22	21	20	20—227
A Malz	25	24	24	23	23	23	22	21	21	21—227
G A Fenger	25	24	23	23	23	22	22	21	21	21—225
J Tresouthick	25	23	23	23	23	21	21	21	20	20—220
G Graf	25	23	23	23	22	22	21	21	20	20—220
A Rossy	25	25	23	22	21	21	21	20	20	19—215
H Rosenthal	25	25	22	22	22	21	21	20	20	19—215
J Kehrwald	25	24	23	23	23	21	21	19	19	19—212
W Neuman	25	25	23	21	21	21	20	20	20	19—210
J Johnson	25	24	23	23	22	21	20	18	17	17—210
R Edgar, Jr.	24	23	23	20	20	19	19	19	18	15—200
W Hartung	25	24	23	22	18	18	18	18	17	17—200

The club has arrangements under way for their first annual spring shoot which takes place in a few months. An efficient committee has the matter in hand and their efforts will no doubt result in the club having their first shoot a success both socially and financially.

A large representation of the Excelsior Rifle Club, Jersey City attended the funeral of their late president, Frank G. Kittridge, who died a few days ago. A handsome floral offering accompanied them.

A "ladies' section" has been spoken of in connection with the Miller Rifle Club, of Hoboken. The idea is to set a night apart for the use of the range for the wives, sweethearts, etc., of the members of the Miller Rifle Club. The matter will be discussed at the next meeting.

New York Revolver and Pistol Club.

THE following scores were made by the members of the New York Revolver and Pistol Club on the 27th inst. at 12 St. Marks place. The first five strings of 6 shots each, Standard American target, distance 20yds. S. & W. revolver:

A Stein, .44cal	48	52	50	49	50—249
B Walther, .44cal	49	50	52	50	48—249
H Oehl, .44cal	50	52	50	50	53—255
Dr. Bell, .44cal	50	49	50	50	50—254
G E Jantzer, .32cal	46	43	44	53	54—240
G L Hoffman, .38cal	47	47	45	50	45—234
F Hecking, .38cal	39	38	40	36	47—200
W Koch, .44cal	40	40	37	41	40—198
A Bertrand, .32cal	36	31	40	33	34—174

Feb. 5.—First five strings of 6 shots each, on standard American target, distance 20yds., S. & W. revolvers:

A Stein	50	51	55	57	51—264
G E Jantzer	51	55	49	52	50—257
H Oehl	47	41	49	54	54—245
G L Hofman	45	52	49	49	48—243
B Walther	49	45	44	49	47—234
F Hecking	43	45	35	37	35—191
A Bertrand	30	29	32	31	35—157

F. HECKING, Secretary.

Bird is a Promising Shot.

MARION, N. J., March 2.—An interesting match of 100 shots on 25-ring American target took place at the headquarters of the Hudson Rifle Club last night between John Rebhan and Chas. E. Bird. Scores as follows:

Bird	220	229	239	237	232	234	233	243	241	236—2354
Rebhan	232	231	232	235	237	232	238	230	241	239—2347

Both men were in excellent condition, although it was expected higher scores would be reached. Mr. Bird has made wonderful progress in shooting of late and stands fair to be one of the crack shots of Hudson county. T. A. REYNOLDS, Scorer.

Revolver Shooting in England.

MR. WINANS'S rules for revolver competitions accepted by the National Rifle Association. It may be remembered that at the late Bisley rifle meeting a committee of revolver shots met at Mr. Winans's cottage at the camp, and with him as chairman, drew up a set of rules which they thought would be an improvement on those at time in use, and submitted these rules to the council of the N. R. A. These rules are to be adopted for the coming Bisley meeting, which opens on July 11.

At a Boston Club.

BOSTON March 5.—The annual shooting championship tournament of the Boston Athletic Association was brought to a close at the gallery on Exeter street to-night. The club championship was won by Mr. E. E. Patridge, who takes the gold medal and three handsome silver cups. The contest narrowed down to a competition between Mr. Patridge and Mr. Sumner Paine, they having distanced all competitors. The score:

Championship Match—no re-entries.

E. E. Patridge.

Off-hand rifle	79	81	84	86	84	88	89	84	91	84	—850
Rest Rifle	99	95	96	90	97	94	96	97	96	98	—958
Pistol	89	89	88	91	93	94	94	95	87	88	—908
Revolver	85	95	84	89	91	88	85	83	83	85	—868—3584

S. Paine.

The Greenville Rifle Club.

KINDLY publish the scores of the marksmen of the Greenville Rifle Club, made on their range Friday, March 4:

*Capt Robidoux	240	H Gotthardt	223	G Purkess		222
*C Boag	241	J Spahm	232	*J Hill		226
J Kaiser	237	*H Chavant	234	*J Dodds		223
		*J Cook	235			
		Ed Barr	223			
		J Boag	220			

* Medal winners in respective classes.

Several members of the G. R. C. will make their debut at long range shooting this coming outdoor season, preparations are being made, rifles bought, advise asked and given, and under the guidance of Capt. Robidoux, our oracle on shooting matters, we expect to make a good showing in this sport.

W. C. COLLINS, Sec'y.

Wurfflein Rifle and Pistol Club.

PHILADELPHIA, March 5.—Weekly scores of the Wurfflein Rifle and Pistol Association for week ending March 4, at 25yds., American ring target, using Wurfflein rifles, strictly off-hand, possible 250, with the following results:

E Travis	244	Dr Gardiner	239	A J Yergey		236
H J Mehard	243	L Wood	237	E C Goddard		235
J J Mountjoy	241	W Wurfflein	237	J C Wurfflein		227

The Lischke Rifle Club.

JERSEY CITY HEIGHTS, New Jersey, March 2.—Match of the A. Lischke Rifle Club, 17 Milton avenue:

J Scharly	25	24	24	24	24	24	23	23	21	21	—233
R Reicherz	25	24	24	23	23	22	22	22	21	21	—227
Capt A Lischke	25	24	23	22	22	21	21	21	21	20	—220

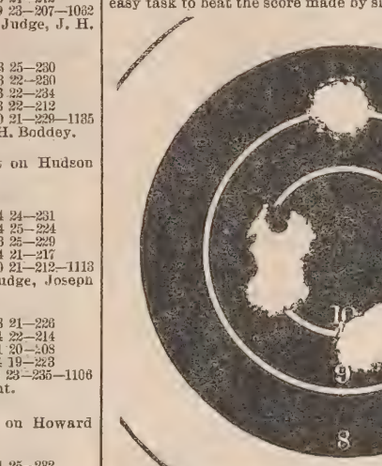
H Strater	23	23	23	21	21	20	20	19	19	18	—207

Each man fired 10 shots off-hand, 25-ring target, distance 110ft.

AUGUST PAETZOLD, Sec'y.



The Rifle at Owensville.

OWENSVILL, Ind, March 4.—J. Montgomery made the following scores to-day, 200 ds., off-hand, standard target, variable wind, Maynard, .25-20-86:

J Montgomery	8	10	5	10	6	8	9	9	8	7—80
	9	9	8	8	7	6	7	6	7	7—75
	9	8	7	7	8	10	7	10	8	8—82
	9	7	10	7	10	7	7	9	10	6—80
	7	8	7	8	7	8	8	7	10	10—80—397

Alex. Stein Holds the Record.

THE New York Revolver and Pistol Club, which shoots every Saturday night at the Zettler ranges, 12 St. Marks place, New York city, has a great many good pistol and revolver shots among its members, but try as they may the most expert will have no easy task to beat the score made by six-foot-and-over Alex. Stein

at the regular competitions on Jan. 31. For a long time the club, or rather the gallery, record stood at 57 out of a possible 60 points, that score having been made by Officer Petty, of the Twenty-third Precinct. On the date above mentioned, however, Mr. Stein started out "for blood," and succeeded in raising the record to 59 points. A full size *fac simile* of his target is shown below. Under the rules of the club each member is allowed to fire five scoring strings of six shots each. Mr. Stein's fine score was made on his third string.

Zettler Rifle Club.

NEW YORK, March 2.—At a regular monthly meeting held at the headquartern, 219 Bowery, the vacancy caused by the death of Sec'y N. B. Warde was filled by electing Mr. Gus. Nowak by acclamation to the position of recording secretary. The weekly competition for the club medal resulted in the following scores: I. A. Boyken 248, C. Percival 246, C. G. Zettler 246, H. Holges 245, B. Zettler 244, F. Ross 243, G. Nowak 241, G. W. Plaisted 241, R. Busse 240, M. B. Engel 239, F. Schmidt 239, F. Lindkloster 238, M. Troop 234.

Empire Rifle Club.

WEEKLY shoot at headquarters, 12 St. Marks place, New York, distance 100ft.: W. Rosenbaum 238, H. Zettler 235, W. Meisenholder 231, A. Rosenstraus 229, C. Zettler, Jr., 229, B. Zahn 229, H. Fetzner 221. Election of officers was as follows: Pres., H. Zettler; Vice-Pres., Gus Hillmeyer; Rec. Sec'y, B. Zahn; Fin. Sec'y, W. Meisenholder; Treas., Chas. Zettler, Jr.; First Shooting Master, W. Rosenbaum; Second Shooting Master, A. Rosenstrauss.

B. ZAHN, Sec'y.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest on March 1 at McCune's shooting gallery, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300. Scores as follows:

W J Gibbs	263	Thos Ford	258 R Taylor 251
C A Hankle	262	H S Burley	254 H A Parker 250
Geo McCune	262		C. A. HANKLE.

Beideman Rifle Club.

BEIDEMAN, N. Y., March 5.—Regular weekly score of the new club for the week, 21yds., ¼in. ring target, off-hand:

J L Wood	235	W Gilbert	231 J C Wurfflein 227
E L Gardner	225	H Myers	230 E McCoy 224
A G Yergey	235		

Dilger Defeats Sessman.

JEFSON RANGE, Jersey City Heights, March 6.—Match, 100yds., off-hand, 25-ring target, possible 250; 10 targets, possible 2,500: Fred Sessman scored 2,205; Wm. Dilger scored 2,252.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

March 11.—Ed. Hill vs. M. H. Rupell, 100 live birds, at Yardville, N. J.

March 12.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

March 12.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

March 12.—John Erb's Old Stone House grounds, live bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J. Ten bird sweep for 400lbs. hog.

March 12.—Sweepstake shooting at Watson's Park, Burnside, Ill.

March 12.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

March 12.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

March 12.—Boiling Springs vs. Passaic City Gun Club team match, at Passaic City, N. J. Open to all sweepstakes to precede and follow team contest.

March 15.—Class vs. Helgins, 100 live birds each, for $200, at Dexter Park, Long Island.

March 15-16.—Union Gun Club tournament, one day at targets, second day at live birds, Springfield, N. J.

March 15.—Opening spring shoot, under the management of the Spencer Sportsmen's Club, Lyons, N. Y. Henry Killick, Sec'y.

March 17.—Essex Gun Club, monthly prize shoot, at live birds, for members only, Jersey City Heights Gun Club grounds, Marion, N. J.

March 17.—Third monthly shoot of the Connecticut Shooting Association, under management of New London Gun Club, at New London, Conn.

March 19.—Open sweepstake, open to all, 15 live birds, $10 entry, birds extra. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J.

March 23.—Hacketstown Gun Club tournament, live birds only, at Hacketstown, N. J. Address James L. Smith.

March 24.—Emerald Gun Club, at Dexter Park.

March 24.—Grand sweepstake, open to the world, 25 live birds, $20 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J. Begin at 1 o'clock P. M.

March 29-31.—Wilmington Gun Club tournament, at Wilmington, Del.

March 30.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

April 1.—Crescent Gun Club monthly shoot, at Dexter Park, Long Island.

April 7.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.

April 7-8.—Union Gun Club tournament, at Springfield, Ohio.

April 12.—Passaic City Gun Club vs. Boiling Springs Fish and Gun Club, team match at Passaic City, N. J. Open sweeps before and after the team match.

April 14.—Newark Gun Club, monthly prize and open shoot, at live birds, John Erb's, Bloomfield avenue, Newark, N. J.

April 15.—Fourth shoot of Connecticut Shooting Association, at Union Grove, Hartford, Conn.

April 16.—Atlantic Rod and Gun Club, monthly shoot at West End, Coney Island.

April 16.—Parkway Gun Club, monthly shoot at Dexter Park, Long Island.

April 19-20.—Eagle Grove Gun Club tournament, at Eagle Grove, Ia.

April 19-21.—Elk Park Shooting Tournament, two days at artificials, third day at live birds, Royersford, Pa. Address H. E. Buckwalter, Royersford, Pa., or Harry Thurman, Germantown, Pa.

April 19-21.—Detroit tournament, Detroit, Mich. Address John Parker, Manager.

April —.—Ridgewood Gun Club tournament, at Ridgewood, N. J.

April —.—Territorial Sportsman's Association, first annual tournament, at Las Vegas, N. M.

May 2-7.—Fifteenth annual tournament of the Missouri State Fish and Game Protective Association, Kansas City, Mo. W. V. Reiger, Sec'y.

May 3-6.—Hill City Gun Club tournament, at Vicksburg, Miss.

May 4-6.—Canton Shooting Club tournament, at Canton, Ill.

May 10-12.—The Ohio trap-shooters' annual tournament, Columbus, O.

May —.—Capital City Gun Club's tournament, Washington, D.C.

May 10-13.—Nebraska State Sportsmen's tournament, Grand Island, Neb.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. —.—Hacketstown Gun Club tournament, at Hacketstown, N. J.

Aug. 23-26.—International tournament, Des-chre-shos-ka Island, Detroit, Mich. Live birds and targets.

Manufacturers' and Dealers' Association tournaments:
Staunton, Va.—Second week in April.
Savannah, Ga.—First week in May.
Pittsburgh, Pa.—Second week in May.
Brooklyn, N. Y.—Second week in June.
Watertown, N. Y.—Fourth week in June.

DRIVERS AND TWISTERS.

NEXT Thursday will be Essex Gun Club day on the Jersey City Heights Gun Club grounds, at Marion, and a fine afternoon of sport is anticipated. In the prize contest the members shoot at 10 live birds each, under club rules, and at club handicap rises. The members are rated at a given number of points each, and every bird killed in excess of the stipulated rating counts as one point to the credit of the shooter in the struggle for the prizes. These shoots are private.

* * *

Saturday will see a big crowd and a big lot of shooting on the finely appointed grounds of the Passaic City Rod and Gun Club, at Passaic, N. J. The main attraction will be the return match between a team of ten men from the above club and a team from the Boiling Springs Fish and Gun Club, of Rutherford. The first of this series of best-two-out-of-three-matches took place at Rutherford on Feb. 27, the Boiling Springs winning in a walk. In the coming contest the Passaic City contingent will make an heroic effort to even up the honors.

* * *

Judging from the present outlook the 400lb. porker raised by "Uncle" Jacob Pentz on his Fanwood farm is likely to die from old age. On Feb. 25 it was shot for at Marion, three men tieing for it. Last Saturday it was put up for the second time and won by Harry E. Smith, the promising young shot from the button-making portion of Newark. This was supposed to be the final appearance of the porker as a prize, but lo and behold here we have an invitation to visit John Erb's "Old Stone House" grounds, on Bloomfield avenue, Newark, N. J., on Saturday, March 12, to witness a third contest for the same hog. The shoot will be at 10 very lively birds per man, $10 entry, a portion of the money to go for second, third and fourth prizes, while the hog will be the premier prize. The fun will begin at 1 P.M., there will be plenty of rattling good birds and everybody is invited.

* * *

A more thoroughly disgusted man than was the genial Harry Thurman last Friday would be difficult to find. Harry is the major domo of trap-shooting affairs in Pennsylvania, and it is doubtful if any man in the country is directly interested in the making and direction of more matches or in the booming of more clubs and tournaments than is this self-same Harry, yclept by his intimates "Old Father Time." A good shot either in the field or at the trap, an athlete of no mean ability and a genial, wholesonled chap withal, he has a host of friends who "swear by him." As a newspaper man he is well known wherever a shotgun is fired. As the inventor of the "Thurman-anti-slip-off-the-pedal-attachment" for a bicycle he will soon gain new laurels, and will gain the everlasting gratitude of the world of cycledom. But this of course has nothing to do with his being disgusted as above mentioned. The cause of his disgust was the double fizzle anent the four-handed match which led him through the sticky mud to the Gentlemen's Driving Park on March 4. Harry says business was booming at the factory, and it was somewhat of a sacrifice for him to leave, and that once he did go he hated to be fooled. Well, "Father Time," we'll shake on the "disgusted" part of the affair, as we are not as a rule particularly anxious to ride a couple of hundred miles and find that we have been on a wild goose chase.

* * *

What a great State for enthusiasm Connecticut must be, judging from the fact that at the recent State shoot at Hartford there were entered twenty-five teams of three men. Down in New Jersey there are at least forty fully organized trap clubs, and yet the State Association has been unable to draw out, up to this time, more than eight teams for its championship shoots. The next shoot of the Connecticut Shooting Association will take place at New London on March 17, "St. Patrick's Day in the morning!" and the number of teams is expected to exceed those in the last shoot. The shoot will be held on the new grounds of the New London Gun Club.

* * *

Next Tuesday is the date set for the Frank Class vs. Elias Helgins match at 100 live birds each, to take place at Miller's Dexter Park, beginning at 2 o'clock P. M. Thus far all the betting is in favor of Class, with generous odds, and if he should chance to lose the friends of his opponent will become the proud possessors of several barrels of coin.

* * *

Enoch D. Miller anticipates a very large time at the grounds of the Union Gun Club, Springfield, N. J., on Tuesday and Wednesday of next week, when the club will hold its opening tournament of the season. The first day will be devoted to smashing Keystone targets and Wednesday will be given over to shooting live birds. The events on each day will be open to the world, as there is no barring out practiced on these grounds. The live birds will be good enough to suit everybody and the supply will

be large. To reach these grounds shooters should take the Morris & Essex road from New York to Milburn, where hacks are always in readiness to carry them to the grounds.

* * *

The following is the text of an open letter from the New York County Gun Club, formerly the Eureka Gun Club: "The initiation fee is $5. The dues will be $1.50 per month, and all subsequent club contests will be at no extra cost to members. There will be regular monthly contests on the first Thursday of the month at live birds or targets, according to the surplus in the treasury. Every member present is entitled to pro rata share of dead birds shot at the score, or killed by members outside of boundary. The hearty co-operation of those interested in trap-shooting in New York and vicinity is cordially invited. (Signed) THE EXECUTIVE COMMITTEE."

* * *

Those who propose going to Dexter Park on Tuesday to witness the Class-Helgins live bird match are advised to take the Brooklyn Bridge and the Kings County Elevated Railroad to Manhattan Junction, thence by electric cars to the park.

C. H. TOWNSEND.

Interstate at Baltimore.

BALTIMORE, Md., March 9.—The "croakers" who have been predicting all sorts of dire failures in the series of tournaments under the auspices of the Interstate Manufacturers' and Dealers' Association, will have to pull in their horns. All of last evening and all day to-day shooters from various parts of the country have been flocking into this city, until at this writing over fifty are registered at the various hotels. It began to rain about two o'clock this morning and did not cease to pour until about four o'clock this afternoon. A party ploughed through the mud to Actor Park but found that the grounds were unfit for use, so after a consultation it was resolved to do no shooting to-day. The full programme of thirty events, arranged for the three days will be shot off to-morrow and on Thursday.

John Parker, the efficient manager of the Association, has been here since last Friday, and by dint of hard work and able backing by the Baltimore Gun Club, has everything in tiptop shape for work. The tournament is bound to be one of the most successful ever held, and the unanimous opinion is that the future of the Association is assured. This may not be pleasing news to some who have tried to give this organization a black eye, but the truth must be told, no matter how unpalatable it may be.

Among those who are on hand to take part in the sport are H. Heflin, president; Wm. Linthicum, vice-president; H. G. Owens, Jas. Watkins, J. A. Hartner, E. Hall, Dr. S. J. Ford, Lee Clark, R. Bond, J. Malone, R. Scharff, Wm. Kumsen, R. Cantier, F. C. Latham and S. J. Martenett, all of the Baltimore Gun Club; W. H. Harttone and Capt. J. R. Marr, Wilmington, Del.; A. C. Krueger, Wrightsville, Pa.; W. R. Feiles, Christiana, Pa.; W. H. Wolstencroft, Philadelphia; E. D. Miller, Springfield, N. J.; Neaf Apgar, Plainfield, N. J.; R. H. Breintnall, Newark, N. J.; J. F. Bucher, Hanover, Pa.; J. Gordon, Pittsburgh, Pa.; Messrs. Terry, Cleaver and Evens, Camden, Del.; John W. Fulford, Harrisburg, Pa.; H. A. Penrose and W. P. Cady, New London, Conn.; E. D. Cordall, Front Royal, Va.; J. Jones, Bengies, Md., W. Parks, Wilkesbarre, Pa.; H. Ducker and P. F. Bondy, Hagerstown, Md.; C. W. Tuttle, Auburn, N.Y.; John Parker, Detroit, Mich.; S. V. Sommerson, Staunton, Va.; W. Hicks, Towson, Md.; H. Thurman, Philadelphia, Pa.; J. P. Hadder and H. W. McVicker, Winchester, Md.

There will be a big party of Reading Harrisburg shooters here to-morrow.

C. H. T.

New Orleans Mardi Gras.

NEW ORLEANS, La., Feb. 29.—The grand Mardi Gras trap shooting tournament of the Louisiana Gun Club, of New Orleans, has just closed a successful four-day shoot, both in the point of attendance and financially. The Louisiana Gun Club is one of the most flourishing and enthusiastic gun clubs of the South, but like many other clubs throughout the United States, the laborious work connected with giving a tournament falls upon a few of the members only, and in this instance Messrs. L. C. Thornhill, H. B. Febiger, E. T. Poursine and their worthy president, Walton Saxon, and vice-president, Billy Miller, may be credited with doing all the work and making the shoot a success. They have just completed a new club house on their grounds which for convenience can not be excelled. Having adopted the bluerock as their inanimate targets, they are provided with a complete set of latest improved expert traps, with North electric pull, which give universal satisfaction, also complete set of King's live bird ground traps. The grounds not yet having been graded are very difficult to shoot over, which accounts for the many poor scores made, the traps being almost three feet higher than the score.

A number of the shooters of the North were compelled to shoot expert rules, Messrs. Heikes, McMurchy, Osborn, Worth, Lindsley, Ruble (White) being the unfortunates who were handicapped. A great number of other good shots not being handicapped, made it almost impossible for the above-named shooters to win, although after the first two days' practising Heikes found the place and displayed some fine skill with his new Smith gun, and no doubt pulled out the largest winner at the tournament. As regards McMurchy's shooting, he was also greatly handicapped with his eyes, being under treatment at the present time for imperfection of sight, but says he hopes to be in it again in a few months' time. The treatment received by visiting shooters from the members of the club was all that could be asked for. All were made to have a pleasant time.

ROLLA HEIKES.

First Day.—Match at 10 single bluerocks:

Ruble	6	Thompson 9
Osborn	6	Foote 8
North	7	Kaufman 7
Lindsley	6	Clark 7
Dick Smith	9	Miller 7

No. 2, match at 15 singles, entrance $3:

Lindsley	11	Lewis 7	Vass 13
McMurchy	10	Yates 5	Foote 14
Dubray	9	Jim 12	Turton 8
Jefferson	10	Holz 11	Hassley 9
Nutt	11	Clarke 12	Febeger 12
Staple	5	A Hall 4	Steinhardt 11
Henry	7	Porterfield 9	Dorsey 11
Thompson	12	Gautier 9	Blunt 12

Team shoot, 3 to team, 10 singles:

Heikes	1110011101—7	Vass	1111101011— 8
Lindsley	1111100001—6	Febiger	1111111111—10
McMurchy	1111110110—8—21	Dubray	0111111000— 6—24
Smith	1111101111—9	Foote	1111011011— 8
Jim	1101111111—9	Porterfield	1000111010— 5
Holz	1111011001—7—25	Dorsey	1101111101— 8—21
Thompson	1111101001—7	Clark	1101111111—9
Henry	1010100111—6—22		

No. 4, 25 singles, entrance $5:

Snedsley	16	Febeger 21	Fenton 11
McMurchy	16	Vass 22	Gautier 15
Dick Smith	20	Clarke 24	Yates 19
Porterfield	19	Henry 18	Hassley 15
Foote	18	Thompson 22	Haly 19
Du Bray	11	Dorsey 19	Jefferson 16
Jim	19	W H Hale 14	Plumb 18
Staple	15	Lewis 13	

Match at 6 single live pigeons, entrance $6.50:

McMurchy	5	Porterfield 6	Blunt 6
Lindsley	6	Gautier 4	Chaudet 4
Heikes	6	Yates 4	Jung 2
White	6	Febiger 4	Dorsey 6
Jim	3	Talbot 6	Wanda 4
Hardy	6	Clarke 4	Osborn 4
Holz	6	Henry 6	Turton 5
Jefferson	3	Thompson 4	DuBray 4
Foote	5	Lewis 5	Lyle 6
Smith	4	Vass 5	Landry 5

Tie reduced to White and Jim and divided.

Match at 10 singles and 5 pairs, entrance $3.50:

North	10	Gautier 10	Vass 13
Heikes	15	DuBray 10	Hardy 6
McMurchy	14	Foote 12	Jim 12
Osborn	14	Thompson 15	Jefferson 14
Smith	14	Febiger 13	A Hall 6
Porterfield	14	Henry 11	Hetz 11
Lewis	12	Clarke 12	W H Hale 12

Third Day.—Match at 10 singles:

Snedsley	7	Jim 9	Clark 5
Osborn	5	Holz 9	Jackson 6
White	10	Finger 6	Miller 6
Hicks	8	Cocke 7	Lewis 5
McMurchy	9	Staple 2	Gautier 5
North	7	Thompson 7	DuBray 7
Porterfield	8	Vass 8	Foster 7
Smith	8	Dorsey 5	Jefferson 5
Foote	8	Henry 8	

[The delayed receipt of this report, just before going to press, prevents our giving the rest of the scores.]

The Oskaloosa Tournament.

THE following scores made at the tournament of the Oskaloosa Gun Club, Feb. 23, 24 and 25, were unavoidably crowded out of our last issue:

First Day's Shot.

No. 1, 15 singles, $1.50 entrance: Yearnshaw 8, McMains 5, Shadbolt 8, Walling 7, Georgson 8, Solomon 10, Wilson 9, Marshall 9, Denterline 9, Budd 8, Grimm 10, Seevers 7, Stump 6.

No. 2, 15 singles, $2.50 entrance: Marshall 15, Budd 12, Grimm 14, Denterline 13, Stump 7, Seevers 13, Wilson 12, Solomon 12, Walling 9, Shadbolt 11, Georgson 5, Yearnshaw 12.

No. 3, 10 singles, $3 entrance: Grimm 8, Budd 10, Marshall 9, Seevers 4, Denterline 9, Stump 8, Wilson 8, Solomon 7, Shadbolt 5, Walling 8.

No. 4, 10 singles, $2 entrance: Grimm 6 Marshall 10, Budd 9, Denterline 9, Stump 5 Seevers 5, Wilson 5, Shadbolt 7, Solomon 8, Georgson 6, Walling 5.

No. 5, 7 singles and 4 pairs, $2 entrance: Hoover 7, Walling 9, Shadbolt 13, Stump 10, Solomon 11, Marshall 10, Grimm 14, Budd 13, Denterline 12 Yearnshaw 11, Wilson 11.

No. 6, 20 singles, $3 entrance: Grimm 19, Budd 20, Marshall 18, Denterline 18, Wilson 15, Shadbolt 12, Hoover 12, W. Seevers 10, Solomon 16.

No. 10, 7 live birds, $5 entrance:

Marshall	1111110—6	Denterline	1111101—6
Yearnshaw	1001111—5	Walling	1110011—5
Kibby	1111010—5	W Seevers	1111110—6
Shadbolt	1110111—6	Solomon	1111011—6
Wilson	1110111—6	Hoover	1111111—7
Grimm	1111111—7	Williams	0111110—5
Budd	1111111—7	Doolittle	0000000—0
Anson	1010110—4		

The Second Day.

No. 1, 15 singles, $2.50 entrance: Cook 10, Perkins 6, Smith 9, Parker 5, Stenick 9, Solomon 9, Roberts 11, Windsor 12, Kibby 12, Budd 12, Anson 13, Grim 15, Marshall 13, Denterline 14, Shadd 7, Doolitte 3, Johnson 11, Hoover 6, Swearengin 12, Moore 10, Shafer 10, Duncan 9, Georgeson 12, Brown 5.

No. 2, 20 targets, $3: Yearnshaw 15, Solomon 17, Swearengin 18, Roberts 14, Moore 12, Bruner 13, Shadbolt 10, Doolittle 9, Johnson 12, Lane 8, Bulleck 3, Cook 17, Budd 15, Anson 16, Marshall 18, Denterline 19, Grimm 19, Kibby 17, Wilson 14, Gregory 8, Georgson 16.

No. 3, 5 pairs, $1.50 entrance: Denterline 6, Kibby 5, Grimm 7, Perkins 5, Budd 6, Anson 5, Cook 5, Marshall 7, Doolittle 4, Solomon 8, Yearnshaw 6, Wilson 7, Shadbolt 5.

No. 4, 10 targets, $2 entrance: Shadd 7, Budd 9, Steineck 6, Denterline 9, Smith 6, Shaffer 7, Salomon 6, Coon 8, Moore 8, Swearingen 8, Wilson 9, Georgson 7, Doolittle 5, Marshall 10, Grimm 8, Douglass 6, Roberts 6, Dinton 6, Phelps 8.

No. 5, 15 singles, $2 entrance: Parks 12, Steenick 8, Smith 13, Moore 11, Salomon 13, Duncan 2, Roberts 10, Wilson 8, Hoover 7, Denterline 12, Shaffer 15, Anson 9, Marshall 13, Coon 11, Yearnshaw 10, Doolittle 6, Douglas 10, Kibby 10, Budd 14, Grimm 15, Johnson 6, Shadbolt, Phelps 11.

No. 6, 10 singles, $2 entrance: Cook 5, Shadbold 9, Kibby 6, Roberts 5, Salomon 6, Hoover 6, Grimm 9, Budd 9, Perkins 5, Anson 7, Wilson 5, Doolittle 0, Marshall 8, Denterline 10, Moore 9, Berry 4 Yearnshaw 9, Johnson 7, Timbrell 5, Bruner 6, Shaffer 5, Lane 5, Georgson 9, Swearingen 7.

No. 8, team shoot, purse $50, 60 and 40 per cent., 14 teams:

Marshall	10010111111101111111111011—20
Denterline	11111111111111101101110011—21—41

Wilson	11011—4	Loacher	01011—3
Hoover	10011—3	Young	11101—4

The Final Day.

No. 1, 10 targets, $1.50 entrance: Budd 10, Anson 8, Denterline 10, Swearingen 8, Moore 7, Shadbolt 7, Georgson 10, Phelps 8, Wilson 7, Kramer 7, Brown 8, Aldrich 4, Stenick 8, Burt 6, Berry 4, Hoover 8, Solomon 9, Marshall 10, Perkins 6, Harrington 7, Seevers 8, Roberts 7, Parks 7, Shafer 6, Grimm 9, Johnson 8, Smith 7, Doolittle 4, Kibby 7.

No. 2, 6 pair targets, $1.50 entrance: Denterline 8, Marshall 9, Shadbolt 6, Perkins 8, Budd 9, Harrington 8, Doolittle 7, Anson 8, Grimm 11, Shafer 7, Kibby 6, Solomon 8, Parks 7, Hoover 5, Yearnshaw 5, Wilson 5.

No. 3, 10 targets, $1.50 entrance: Moore 8, Stenick 8, Smith 6, Perkins 7, Roberts 4, Powell 5, Solomon 9, Wilson 7, Hoover 9, Parks 8, Georgson 5, Carlon 4, Phelps 6, Stumps 8, Doolittle 8, Gish 5, Johnson 9, Kramer 7. Harrington 6. Budd 8, Marshall 7, Shadbolt 8, Anson 7, Kibby 9, Churchill 6, Douglas 9, Williams 1, Timbrel 6, Bruner 6, Denterline 9, Swearingen 8, Grimm 10, Shafer 8, Yearnshaw 8.

No. 4, 15 singles, $2 entrance: Douglas 14, Solomon 11, Georgson 10, Swearingen 7, Stenick 10, Phelps 10, Tuffery 5, Wilson 9, Harrington 10, Hoover 11, Churchill 9, Smith 9, Grimm 12, Doolittle 10, Gish 11, Marshall 13, Denterline 13, Shafer 10, Roberts 8, Budd 15, Shadbolt 11, Anson 7, Kibby 11, Johnson 9.

No. 5, 10 singles, $1.50 entrance: Walling 6, Hoffman 3, Timbrel 4, Coon 5, H. Seevers 6. Powell 10, Hardisty 6, Hoover 5, Kramer 6, Shockley 2, McElroy 4, W. H. Seevers

No. 6, 10 singles, $1.50 entrance: McMains 5, Glass 6, Swearingen 8, Aldrich 5, Stumps 6, Barr 6, Smith 9, Hoover 7, Parks 6, Kibbey 5, Johnson 7, Shafer 9, Shadbolt 8, Grimm 8. Banks 7, Doolittle 6, Gish 6, Solomon 8, Stineck 7, Phelps 7, Hull 2, W. Seevers 10, Holton 4.

No. 7, 10 singles, $1.50 entrance: Wilson 9, Phelps 8, Walling 7, Hoover 6, Roberts 7, W. Seevers 7, Crismon 4, H. Seevers 4, McElroy 6, Mattox 3, Fairchild 1, Kramer 6, Doolittle 7, Solomon 10, J. Seevers 7, Johnson 7, Gish 7, Shadbolt 8, McMains 7, Georgson 8, Barr 6, Roberts 7, Berry 7, Ferrall 7.

No 8, 10 singles, $1.50 entrance: Hoover 8, Wilson 9, W. Seevers 7, Kramer 6, Walling 9, Shadbolt 9, J. Seevers 7, McCoy 2, Phelps 8, Doolittle 7, Johnson 7, Gish 7, Glass 7, Henderson 1, Houghton 3, Roberts 5, Georgson 7, Powell 8, Perkins 5, Budd 10, Hunter 4, Swearingen 4, Moore 9, Denterline 8, Solomon 8, T. A. Marshall 8, A. C. Anson 8, Grimm 8, Ferrall 5.

Rochester Rod and Gun Club.

ROCHESTER, N. Y., Feb. 29.—Herewith are the scores of our semi-weekly practice shoot, held Saturday, Feb. 27. The day was cold and stormy, and attendance light.

Match at 10 Peorias, 5 traps, 18yds. rise, American Association rules: Newton 6, Fulton 3, Meyer 10, Mullan 4, Truesdale 7, St. George 3.

No. 2, same conditions: Holton 9, Newton 7, Meyer 8, McCarthy 3, Parker 2, Hicks 6.

No. 3, same: Mullan 3, Truesdale 9, Fulton 6. St. George 7, Newton 5, Parker 4.

No. 4, same: Fulton 6, Truesdale 8, McCarthy 5, Meyer 7, St. George 6, Mullan 6.

No. 5, same: Hicks 6, Truesdale 9, Fulton 8, Mullan 6, McCarthy 4.

No. 6, same: Meyer 8, Newton 8, Holton 9, St. George 4, Parker 1.

No. 7, same: Gardner 8, Mullan 5, Fulton 7, Parker 2, Holton 6, St. George 5.

No. 8, 5 pairs doubles: Newton 5, Truesdale 6, Holton 8, Fulton 4, Meyer 5, St. George 4.

No. 9, same: Newton 4, Truesdale 4, Fulton 1, Meyer 7.

No. 10, 10 Peorias, expert rules: Newton 5, Holton 7, St. George 4, Meyer 2, Gardner 3, Fulton 4.

No. 11, same: McCarthy 1, Truesdale 8, Gardner 3, St. George 5, Meyer 3, Newton 6.

New London Gun Club.

FOLLOWING are scores made by members of the New London (Conn.) Gun Club made on March 4. event No. 1 being for the club medal, which was won by C. Hebbard:

Medal Shoot.

Penrose	1001111101111111111111111—22
Cady	1111111011111111111111001—22
C H Hebbard	1101101111101111101101111—20
Connor	1111101111011010101100110—17
Clinton	0100001010101000100000000— 6
Bush	1111111110111011110011110—20
Strong	1111111111111111101111011—23
C T Hebbard	1111111101111111111111111—24
Dunbar	1000111111111111011011001—18
Ames	0000110111110101010110100—13

Thirty Keystones:

Penrose	29	Clinton 10	C Hebbard 24
A Hebbard	25	Dunbar 21	Beebee 2
Connor	27	Cady 25	Ames 20

Messrs. Penrose, Cady, Al and Chas. Hebbard used the "S.S" powder.

Ohio Trap Shooters.

CLEVELAND, O., March 3.—The third of the famous match shoots between the Cleveland and East End Gun Clubs took place this afternoon at the East End grounds, and was won by the former team by a majority of 16 birds. Redwing, Elworthy and Tamblyn, of the Clevelands, bore off the honors of the shoot, and really saved it for their side. But for the exceptionally good work of these three it might have been another victory for the East Enders, as the scores of the latter were more uniformly equal. The following are the individual scores:

Cleveland Club.		East End Club.	
Redwing	29	Wherry	20
Elworthy	27	Murray	27
Tamblyn	28	Byrnes	22
Watts	18	Brockway	21
Flick	25	Phare	22
Calhoon	24	Alexander	25
Holt	25—176	Haycox	23—160

Union Gun Club's Monthly Shoot.

THE regular monthly class shoot of the Union Gun Club, which took place at Springfield, N. J., on March 2, was poorly attended, owing to the almost-impassable roads in the vicinity of the club grounds. In the prize shoot each member shot at 25 Keystone targets, unknown angles. The scores follow:

Class A.

Miller	1110110111111111111111011—22
Sigler	1111101111011010111110—19

Class B.

W N Drake	1111111001111011111101111—21
L T Terry	1010110111110011001111100—16
J Briant	1001111111111111111111111—22
R Williams	1010110111111101101111101—18
G Pudney	1110100101101111110111111—19
A. Sickling	1110011111101011101010111—18
N W C	1110010111001101111001000—15
McMillon	1000111111101010101010100—16

Williams and Sickley shot off at 5 targets each for fourth prize in class B, the former breaking 4 to Sickley's 3. The regular programme events were not shot off.

Onondaga County Sportsmen's Association.

SYRACUSE, N. Y., March 3.—The following scores were made at the semi-monthly medal shoot of this organization at Maple Bay to-day, each man shooting at 50 kingbird targets, 5 traps, unknown angles:

Class A.

Mowry	47	Hookway	42
Ashton	42	Holloway	41
Becker	42	Lansing	40

C Walters	40
Howell	37
Hadden	35

Class B.

Williams	42	Fairchilds	39
Ayling	41	D Walters	37
Petit	39	B Smith	37

Ginty	36
McMasters	31

Philmont Rapid Firing.

PHILMONT, March 5.—Regular shoot of the Rod and Gun Club:

G Baker	12	G Fergerson	13	F Richardson	13
D Howland	15	I Spoor	6	D Ames	16
M Powell	11	J Vanderburgh	9	G Vanderburgh	14
S Scism	10	H Billandel	12		
G Vedder	4	W Dingman	19		

Chicago Shooters

Should not miss the exhaustive article on the "Trap Shooting Clubs of Chicago," by E. Hough, with portrait of Mr. John Watson, in our next issue.

BUDD—FULFORD.

CHICAGO, Ill., March 3.—Mr. E. D. Fulford came to our town. Jack Brewer was with him. They came here Monday, and got in the center of the town, and then they said, real loud:

"We're here!"

Chicago never trembled.

No, somehow Chicago stood it all right. At this date Chicago is still here.

Jack Brewer on Tuesday saw his picture, face toward the wall. "You'd better go home, Jack," Roll Organ said to him. "Our match box is out of order, so far as you are concerned. Besides, I heard there was a man looking for you." By that time Jack was at the depot. As the train passed South Chicago he was seen on

E. D. FULFORD.

the platform, and through his fine Grecian lips there floated the melody of that touching old song:

"He never came back—
He never came back—
He never came back any more."

After Col. Brewer had got past South Chicago Mr. Fulford said he would like to bet $500 that Col. Brewer could beat any man Chicago could name.

At this juncture the safe door at Billy Mussey's fell open with a harsh, subdued jar which startled Mr. Fulford.

"I'll have to go you," said J. L. Wilcox, sort of calm and deliberate like. "Let's say $400 a side, $50 forfeit right now, match to be shot this week."

"Say $25 forfeit," said Mr. Fulford, and so that was agreed. Mr. Fulford wired Col. Brewer, but he "never came back, etc."

"Talk about hard birds," said Mr. Fulford, "you don't have hard birds out here, real trained birds, you know, hard trained birds. I'll bet $500 I can bring 25 birds here that no man in Chicago can kill 15 out of."

The safe door again jarred harshly. "I'll have to go you," said a voice.

"I'll tell you how those birds are trained," said Mr. Fulford, etc., etc.

Some fellow, sort of careless, turned over the pages in the file of FOREST AND STREAM, and found where Mr. Brelsford said, Jan. 21, that Mr. Fulford would shoot Geo. Kleinman here under Association rules, or perhaps under Illinois rules, and that if only a forfeit could be obtained for a match "minor details would cause very little trouble." But somehow, in this case, Mr. Fulford wanted Hurlingham, and wanted Hurlingham bad.

"Nay, nay, Elijah," said Chicago, "no over-the-fence-and-out rules here; 50yds. is plenty wide to catch our easy birds." This was Tuesday evening.

But about Charlie Budd? Oh, he hit the trail in the high places and got here Wednesday morning, with his leather trunk and a few certified checks, one for $1,000 that I saw.

Charlie had challenged Mr. Fulford and posted $100 for a race under Association rules. He left arrangements with the Chicago friends who had sent for him. At noon Wednesday bets were made that Mr. Fulford would not shoot at all. It was 3 P. M. Wednesday before the races were concluded upon, two matches, 100 birds and $200 a side, each match, one to be shot Thursday, one Friday, Association rules to govern. Minor details caused the delay. We're so blamed ignorant out in this new country we don't know how to handle minor details, but Chicago did manage to get a forfeit up. This is the first time a visiting shooter was ever allowed to put up a forfeit here, and it was done only on Mr. Fulford's own motion. The Eastern gentlemen have been anxious about that forfeit. This is a custom which may be useful where men distrust those with whom they are associating. Out here, when we have learned the distrust we drop the association. A sportsman's word here is as good as a wheat trader's. But we don't claim to know how to get up matches.

Another man idly turned the pages of FOREST AND STREAM and found where Mr. Fuford said, Feb. 4, that he would shoot George Kleinman for $500 or $1,000 of his own money. "I wonder why he don't want a side bet or something for $5,000 or so on this race?" murmured the statician under his breath.

But this was at the sweeps on Wednesday afternoon.

Yes, we had a little sweep, 20 birds, $20. Mr. Fulford was there. Two men beat him, and two tied him. Br'er Gawge, he done tied him. Tall, sick-looking fellow, $17 gun. Score:

E D Fulford	22020222222212222222—18

Atwater first, $84; Budd second, $63.

The birds in this lot were mixed, and not a hard aggregation—not trained birds at all, so to speak. Mr. Fulford frankly and cheerfully admitted that his big scores were made on much harder birds. "I 'low he's throwin' off on us, boys," said a cautious citizen.

THE FIRST MATCH.

"Gentlemen," said Mr. R. B. Organ to a 300 fifty cents a head crowd at Watson's Park at 2 o'clock this afternoon, "permit me to introduce to you Mr. E. D. Fulford, champion wing shot of America." Mr. Fulford acknowledged hearty applause.

"Gentlemen," Mr. Organ next said, "allow me to introduce Mr. C. W. Budd, of Des Moines, Ia., also champion wing shot of America." Applause of a cheerful sort also met Mr. Budd.

Up to this time betting was a matter of belief, no pointers out. Budd was known to be shooting in good shape. Last night I was in his room alone with him and I tried my best to get him, for once in a way, to express an opinion about the coming match, something he was never known to do. The most I could get him to say was, "I don't think he has any license to beat me." Mr. Fulford had been far more fluent in regard to his past and future triumphs. Last night he wanted to bet Rob Organ he would get ninety-six to-day. Mr. Fulford is new in the trap shooting business, a nice fellow, but in need of well-meant and well-heeded counsel in regard to the art of conversation on trap matters. The best sort of art is to keep mighty quiet, and then a little quieter.

This morning, before the match, Mr. Fulford took an early train out and shot 100 birds by himself for practice. He scored 86 out of the 100. In this shooting he used seventy-five shells with the preposterous charge of 5½drs. of pounded wood powder. When at the call of time he took his seat at the scoring platform his cheek was contused and no one knows how much his nerves had been jarred. He continued this load partially in the match, though he used some Schultze shells also, with 3¾drs. He shot his new Greener 12-gauge, a hammer gun with the comb padded up with leather, weight 7lbs. 15ozs.

Mr. Budd, as is well known, never uses over 3½drs. of any nitro powder, and it is known also that he shoots an L. C. Smith 12ga. 7lbs. 10oz. This was a new gun. It is as good a shooter as any we ever saw fired on these grounds. There seemed little difference in the right barrels of the two guns, but it was evident Mr. Fulford's left was not so close as Mr. Budd's. Both are fairly phenomenal guns, and both did wonderful work. Neither gun killed a pigeon at 60, 70 or 80yds. Such shots as that are matters of inspiration. I doubt if a bird fell 55yds. from the score. I doubt also whether birds were ever killed further and cleaner than they were here. These shots look longer than they measure.

Your Uncle Adrian Anson refereed the match, and did so in an eminently dignified and highly satisfactory manner. Your Uncle Adrian is no slouch. Mr. J. P. Hoyt was engaged for a one-night stand on lithographing the official score. Mr. Hoyt makes a sweet thing out of a score card. Mr. H. Foss gathered for Mr. Fulford, Mr. F. Stone for Mr. Budd.

The day at 2 P. M. was brightening after a dullish morning. A puffy wind blew nearly straight from right to left across the score. The birds got into this and were for the entire race, especially the first half, largely left-quarterers, from drivers to incomers. I have used the usual letters to indicate flights, and they are as usual about worthless. It is the strength and speed of a bird, not its course, that makes it hard. Many birds marked with the deadly "D" brand were a very harmless sort, and some of the incomers were corkers. Three of our independent scores to-day agree that Mr. Budd's "D" birds, straight drivers, left drivers, left-quartering drivers, towering or high drivers, etc., outnumbered Mr. Fulford's birds of the same description by 12 to 16.

WHERE THE BATTLE WAS FOUGHT.

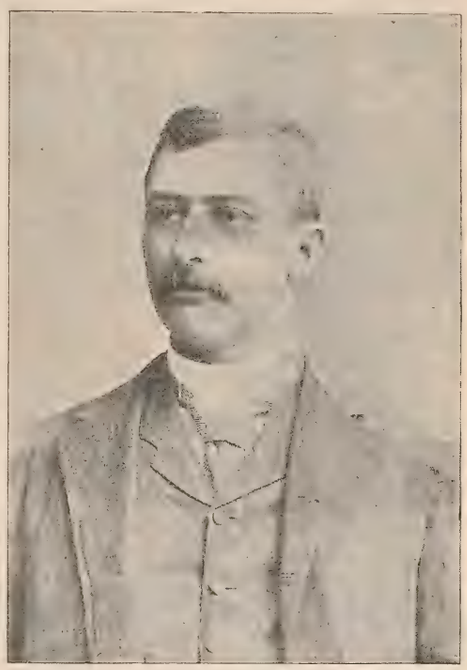
Still, it is not thought that he shot a harder 100 than Mr. Fulford.

One peculiarity was seen to-day in the birds. They sprang very high and got up high on the wind. This made much of the shooting of a highly sensational character. A shower race was probably never shot.

The middle 50 was the best part of the birds. The wind fell at about the 60s. The first 50 was harder than the last, though there were more straight drivers toward the close.

Only two birds in the entire 200 had to be flagged, one for each shooter.

Mr. Budd said that he had never shot on as hard birds as these. He also says these are the hardest grounds in the West.



Mr. Fulford said that in his practice shoot at 100 he shot some as hard birds as he ever saw. He also said to-night, however, that his score of 93 was made on birds as hard as these.

The Chicago shooters, who visit Watson's Park regularly, say the lot of birds was not so hard as that in the last Elliott-Kleinman race, and not any harder than those in the Hofmann-Mussey race last week.

I think the birds were strong and good, but not the best we can get. Come and see Watson's in a high wind once.

We are getting at some facts now in the comparison of the Eastern and Western birds. Mr. Fulford is about in our 85 class on these grounds, as near as we could figure to-day.

The style of the shooting was magnificent. Mr. Fulford has the fancy bang-bang down fine, and I must say he is the best second barrel shot on a bird killed with the first that I ever saw, though not so reliable on a bird disposed to keep right on going. The

CHAS. W. BUDD.

bang-bang style is pretty, but it is only skin deep. Mr. Fulford shoots by system, namely, bang-bang, not a very quick first, but a very reliable second. Mr. Budd has no system for all, but judges each bird for itself, which is the true theory of shooting on variable speeds. His first was quicker than Mr. Fulford's, his second more deliberate. Often to-day it was a question of calculation as to the lead on the fast left-quarterers. I never expect to see Charlie Budd exhibit such skill as he did in this work to-day. He lost three birds that any tyro could have killed and killed 3 or 4 that no one had a right to kill.

It was the easy birds that were lost. The hardest ones were killed. The boys were keyed up so high, expecting a screamer each time, that when a slow hoverer or easy incomer got out they sometimes snapped away both loads on an entire miscalculation. Mr. Fulford lost several birds in this way, and was especially unfortunate on right hand incomers or quarterers.

This race to-day was the most important in interest of any ever shot here. The crowd was large, for a Chicago match crowd. Prominent shooters from all over the West were here. Perfect order was kept without a hint or request for it. Mr. Budd was the favorite, but applause was equal, and there was no jeering nor guying. Mr. Fulford was alone among strangers, and more than one voice was heard in admiration of his pluck in coming out here and putting up his money against a stranger, and shooting in a strange country, alone, without even one friend to counsel or handle him. He had more symyathy and more friends at the close of the race than he had at the beginning, and the applause at his brilliant work was nothing artificial or feigned.

There was some betting, but most of the money wanted to go on Budd. Our friend Jack Ruble was there, looking for some good sure money. When Fulford straightened out one in the lead after the first shake-up, Jack remarked that he hankered after $25 on Fulford.

"Make it $50," said a by-sitter.

"All right," said Jack. But when Charlie forged ahead and stayed there, it was comical to see Jack prancing around trying to hedge out, which it was then too late to do. The price of brick at Ruble's factory will be marked up to-morrow.

But we digress. Mr. Organ said his dual championship speech, and then Charlie Budd walked up and said "Pull!" in a fine Italian voice, and she was a-rollin'.

Charlie shot too quick for fifteen birds. His 10th was an easy bird, but he hardly touched it, and at his next bird he got a fast slate and lost it also. This left him one behind only, for Fulford had lost his 7th, a very fast high bird to the left. A cloud fell on the western landscape at that station, and at the first 20 notch this was not dispelled.

In the second 20 the match was lost for Fulford. At the 25th bird Charlie had an accidental discharge of his gun as he closed it at the score. He lost the bird, probably in consequence of the accident. At the 31st bird, however, he had gathered great confidence, was cool, wary, full of generalship, and a certain winner, as everybody knew. At this stage both men were drawing some awful birds, very high, and were cutting them down in most exciting style. At this Charlie showed an exceptional gait. There is not space to describe all the fine kills, but I remember special furore over Budd's 15th, 24th, 27th, 31st, 41st, 45th, 66th and 71st

birds, all sky-scraping drivers to the left or back. His 54th and 81st were victous ones to the right, very high. These birds were centered and cut to pieces, or they would have skated across the line on the wind.

At much of this high work Mr. Fulford also was electrifying. His 47th bird was stopped clean with the first and, turning, he killed a high stray passing over, meeting grand stand applause. His occasional clean and keen work in the deep field also was admirable. He appeared to us a shooter, but ourclassed badly.

At the halfway point Budd led by 3 birds. At 56 he just stopped missing anything and got them all sorts, 44 straight, clean to the end. After 60 Fulford knew he was not in it, and so said this evening. At the 90 hole he had the appearance of collapse. The pounding and the strain had been too much for him. He cut down his last bird well, however, and then people shook hands with him and everybody else.

After supper to-night Mr. Fulford said he had no fault to find with anyone but himself. He showed a trigger finger badly cut up by recoil, and said he had fired forty shots with the second finger. His cheek was bruised and had a bad lump in it. He said that to-morrow he would shoot his old hammerless Greener, 7lbs. 7ozs., and he hoped to do better. He had never scored less than 98 with it. He thought he would win. He would bet $50 he would win.

At this juncture the ghost walked again. The safe door at Billy's clanked open and Mr. Fulford had his $50 placed very suddenly, like. Several invitations to do that again he declined politely. He also declined bets, $100 to a bird, that he would not kill 96, 95, 94, 93, 92, 91 or 90 birds, at each of which punctuation marks the safe door uttered a harsh sound and fell apart, disclosing a large, coarse roll. Mr. Breisford and several gentlemen around New York ought to see that safe. Seeing is believing. Mr. Fulford believes all about it now, and somehow it does not seem likely that he will say "$10,000" over a whisper again till he is safe with his friends back East. The West has deprecated all such talk. It has vindicated its own positions so far, and has held to all its promises. We can't run a real good shooting match out here because we haven't got any hard birds; real trained birds, you know, but we are getting on to this, and hope in time to learn.

Mr. Fulford was pleasant and he was pleasantly received. He made no cry to-night. It seems the general opinion that he is a good, nice, country shooter, but he has gone too hard and square against too hard and square a game.

Mr. Fulford's guide, philospher and friend, Col. J. Brewer, remarked to Mr. Allison in this city Tuesday morning that "Fulford would fool around those Chicago fellows till they got all his money." The Chicago fellows never wanted all his money, and don't now. They wanted to see a nice pigeon match, and they were and are ready to accommodate any gentleman who may pine for a little excitement on the side. But Chicago likes Mr. Fulford well enough to tell him that he would better get a new guide, philosopher and friend.

Mr. J. A. R. Elliott—tell me, ye prophetic shades, have I got to call him "champion," too?—writes that he has $100 forfeit up with the *Times* of Kansas City to bind $500 races with both Mr. Fulford and Mr. Brewer, to be shot in Kansas City within ten days. Mr. Fulford says he will not go to Kansas City, nor will Mr. Brewer, but he will back Mr. Brewer on those terms, the match to be shot at any neutral grounds—St. Louis, Davenport, Chicago, Milwaukee. This probably ends that match, but Mr. Elliott has had his talk. He was wired for to come up here to help shoot Fulford and Brewer at a time when no definite plans were made, and it seems to do him a great deal of good to have Chicago send for him. Jim loves Chicago, probably not.

Mr. Thos. A. Marshall and Mr. W. P. Mussey shoot 100 and $100, to-morrow at 12 M., just before the second Fulford-Budd match. If Tom Marshall eats as much supper to-night as he did last night he will be lucky to get 50.

Our old friend Mr. Coony Cahoon, of Freeport, is in our midst, as the lecturer says. Mr. Cahoon has, I regret to state, bereft society of the opportunity to gaze on his celebrated, his justly celebrated whiskers.

Friday, Second Day.

Rain was falling in the morning, to the intense disgust of everybody. The crowd went to the grounds early none the less. Mr. Fulford's chances were thought to have improved 20 per cent, as the birds would be soft, and he had shown himself not equal to the hard ones.

At noon the rain stopped, a faint wind blew out of the north, stirring Mr. Cairncross' new drab spring whiskers from left to right as he gazed toward the score. The wind would also have stirred Mr. Cahoon's whiskers, but as above stated, he had none.

MUSSEY—MARSHALL.

Tom Marshall is the mayor of Keithsburg and member of the legislature, but no one here lays that up against him, and he was allowed to shoot. As was feared the last two porterhouses that the Hon. Thomas had eaten proved a handicap to him, and he failed to accumulate over 83 birds. In this race the birds were much duller fliers than those of yesterday, but they included some corkers. Only one bird out of the 200 was flagged up. The flight averaged mainly right-quarters, the reverse of yesterday. Mr. Mussey went to 50 before he got much style, but then grew quicker, and went out on his last 20 in slashing shape, grassing his birds closard to the traps than either Budd or Fulford. The race see-sawed and varied, and was close enough to be exciting. Mr. Mussey turned the half way station 3 ahead, and it takes a hard man to beat him on that basis, as his last 50 is his best usually. The score:

One hundred live birds, $100, American Association rules:

This match and the following one were refereed by John Watson, who referees the majority of all Chicago matches and has yet to hear the first complaint.

Our friend Jack Ruble, seeking a little sure money, to get even on yesterday's misjudgment, put $25 on Mr. Marshall. And once more the price of brick at Ruble's yard must go up.

There is most always somebody around who thinks he can beat Billy Massey in a pigeon match, yet his record does not invite such invitations particularly.

BUDD-FULFORD, SECOND MATCH.

At 2:45 P. M. the light grew a little stronger and the air was not quite so dull and muggy. The wind was a trifle straighter. The birds averaged right-quarterers, and they were faster. Some few of them were as fast and strong as anyone would meet. On the average they were not a very hard lot. This was Fulford's day to win.

He did not win. He broke down, and from the bottom of my heart I was sorry for him, and so was every shooter in Chicago. Mr. Fulford's friends are to blame for this. They have led him wrong. They have lauded him to the skies on too brief a record. This has ruined many a man and it has ruined Fulford. He was overrated, and he made the mistake of overrating himself. To-night he is out of the shooting world. His Waterloo has come suddenly and swiftly. He is ruined unless he shall reorganize on an altogether different basis and begin again.

It is a mistake to be carried away with any one shooter, East or West, North or South. There is no absolute champion. There are half a dozen men in the country who shoot about equally well, and when one drops out another arises. Pin no absolute faith to any one of them. Men have their good and bad days like hounds and horses. Form can not be predicted. Variations of form will come, and these make or lose success. Just now there is probably no man in America who can defeat Charlie Budd, yet he has been beaten and he will be beaten again, though probably never by Mr. Fulford.

We in the West have no hurrah to make and no vauntings to set forth. We like Charlie Budd because we have known him for years as modest, plucky, quiet and absolutely above all suspicion. His record has shown him a shooter and a gentleman. For this reason we have faith in him. But we should not and shall not say that he is the only shooter in the world, or the only gentleman.

Neither is there any disposition here to exult for reasons of sectionalism in a victory of the West over the East. Frankly, it is felt here that the East was hardly fair with the Western brethren in the preliminaries of this compaign, and hardly credited them with the straightforwardness and sincerity which they felt. Yet it is believed that no bad feeling will be engendered, and hoped if there is to be any future campaign it will be conducted upon different lines. We can shoot and be friends. We want to be friendly and nothing else. The West can take care of itself in any sort of situation, but it feels no need of bluster. After the salute to the Western flag, nothing more is asked. We can be friends and we want it that way.

To-night Mr. Fulford has no better friend than Charlie Budd, and if Charlie were not constitutionally tongue-tied he would tell him so. Mr. Fulford's visit to Chicago has been a good one for him, and his defeat is the best thing that could have happened to him. For my part, I never want to see these two men shoot together again, and I never want to see a match again which, dramatic as this of to-day, shall yet so strongly appeal to my sympathies. It is due to the West that this report should be written as it is, but I beg it will be believed that the shooters of Chicago have no wish to taunt the Eastern shooters, or to ridicule the gentleman who was plucky enough to come out here alone and shoot in a strange country, when he had so much to lose.

The match itself may be replayed briefly. It was settled from the second bird, which Fulford missed. Fulford sat in his chair, pulling up and sighting his gun, a weapon which he had shot in long races before and should have known. He shot half a dozen practice birds with his hammerless, missing one. He began the race with his hammer gun, from which he had removed the leather pad. In his second string of 20 he missed 6 birds, Budd still showing his gait of the day before, though losing two scorching hot ones to the right, both dead out, the hardest birds I remember ever to have seen, I believe. Fulford on his 39th bird changed back again to the hammerless gun. He asked permission to shoot a practice bird with this. "Certainly," said Mr. Budd. He killed, and the race went on, as see the score. At his 44th bird he changed yet again, took up Mr. Organ's Greener, using Mr. Mussey's shells. It was known now that the race was over, and everybody wished heartily it was ended. Fulford missed 3 straight. No one spoke a word. Then, as it came his turn, he said, "I'll let it go at that."

He was reminded that he had one more shot to fire to even the score. He took up his hammer gun, fired and missed. It was an awkward moment, but the sympathy expressed was genuine. The score:

In 506 birds shot at yesterday and to-day only three failed to start promptly on the pull. This does not count Mr. Fulford's 100 in practice, though I am told none was flagged in that lot either. If necessary we can get harder birds. They were not trained at all. With a cold day and a keen wind the shooting would have been much harder. A 90 man on these grounds is fit company for any one. The man doesn't live who can kill 98 to the 100 here.

A little informal supper was offered Mr. Fulford and Mr. Budd to-night, but Mr. Fulford did not appear. He made a social mistake in this, as he was out all the evening later. The supper was pleasant, the Hon. Thomas in the chair. Mr. Marshall said he was afraid to go home, as one of the qualifications for office in the Mississippi bottoms district was a reputation as a shooter. He would consider any allusion to low score as a personal to himself, and would call the gentleman to order. He scouted the appellation of "yellowleg," and said he would show the boys something about ducks, if they would come and see him.

Later on it being learned that Brewer could not get here on Saturday, Mr. Wilcox declined to retain the forfeit posted by Mr. Fulford to bind the match with Brewer against an unknown, and it was returned to Mr. Fulford. So also, if he wishes, will be disposed the Chicago half of the forfeit. Brewer may come here the first of next week, but he will shoot no race here, then, or at any other time, with Charlie Budd or with any Chicago shooter. Plenty of reasons for this he can have by applying at this office, or at any other place in Chicago.

I asked Mr. Fulford whether he cared to say anything about the late matches between himself and Brewer in the East, in reply to the very general talk that they were hippodroming on fixed matches. We talked some time and he said finally that he did not wish to make any statement in regard to that. In this I think he made a mistake. I hope for his later denial in full of all such charges. We are fain to believe him an honest and good-hearted man, hurt mostly through wrong judgment on the part of his friends and wrong treatment on the part of those whom he thought to be his friends.

Had not Mr. Fulford been defeated so sadly, or had he wished to go on shooting, it was intended, since seeing him shoot yesterday, to match against him Geo. Kleinman, A. J. Atwater and W. P. Mussey, men who last week as they stood were not presumptuous enough to think themselves in his class.

"I'll say good bye to you for six months, gentlemen," said Mr. Fulford, "but next fall I'm coming out again and want to shoot again with Mr. Budd."

Charles Budd will be here a day or so, visiting. He has always been very popular here and will now be more so than ever. For the race he shot under these circumstances, he ought indeed to have won $2,500 to $5,000. It was worth it. But there was no Fulford money to be seen of any consequence. Charlie's share of the little purse made up to place as stakes will amount to little in comparison to what a race like this should net him, and still the stakes were enough to form a sportsman's race, and that is all Chicago wanted.

And now our talk is done and the battle has been fought. Let not the East think the West is over-jubilant; we are a little sorry, too. But it should be remembered that,

First, Chicago is the only city having a World's Fair.

Second, Chicago is willin' to learn.

Meantime, the safe door at Billy's swings idly in the wynde. There is a little money in there now, and some of it came from the East. Don't fool with that old safe door, good friends in the East, for somehow she's gettin' mighty easy on trigger.

FOREST AND STREAM

is the leading Trap paper of the United States. Its reports are prompt, intelligent, comprehensive; and it covers a wider territory than any other Trap paper.

Anent Gun Handicaps.

Editor Forest and Stream:

Nothing more forcibly exhibits the stupidity and unfairness of the gun handicap generally accepted than the following extract from the Chicago *Herald*'s report of the Budd-Fulford match on March 3:

"Fulford was handicapped by the heavy charge in his shells and by the fact that in the forenoon he had practiced at 100 birds. He grassed 86, and when he came to the traps in the afternoon his face on the right side was cut and swollen from the kicking of his gun, and his trigger finger was sore and almost cut to pieces. He used a 7lb. 15oz. Greener hammer gun, and his shells were filled with 5½drs. of wood powder, an extremely heavy charge. Toward the close of the match he was compelled to use his middle finger to pull the trigger."

Now, I believe that trap shooting is a source of pleasure, so I use a 10-gauge gun weighing nearly 11lbs. I let the gun take up the recoil, not myself. During the summer I frequently fire 250 shots in a single day, wearing only a gauze undershirt or a thin flannel shirt; no coat, no vest. I load this "cannon," as the 12-bore men contemptuously call it, with the enormous charges of 3drs. of black powder for inanimates, and 3½ and 4drs. (right and left barrels respectively) of nitro powder for live birds. At the end of the day there is absolutely no bruises, discoloration, or injury of any kind on face or body. Yet a man shooting a feather-weight or medium-weight 12-bore, loaded with from 5 to 5½(!)drs. of powder, and the same amount of shot I use, 1¼oz., pronounces my gun an "unsportsmanlike cannon," and then bathes his black-and-blue shoulder with arnica and adorns his cheek with sundry strips of court-plaster! Was anything ever more absurd?

This arbitrary limit to the weight and caliber of the gun is impertinent and presumptious. It savors of the "Great I Am." It is a notice to the world that "we," the very elect, know it all, and that the rest of us must sit at their feet and drink in wisdom.

A sensible, and therefore fair, set of rules was sent out some years ago, making the load, not the gun, the basis of a handicap. Its absolute fairness took away from the 12-bores their deliberate steal of two yards, so there was an instant and fearful howl, and to-day those rules are practically never used. But this very protest conceded everything. It was a confession that with equal charges the 10-bore was the better weapon. Hence we are entitled to elect which we prefer. How would it do, say, to make the good old cross-bow the "gentleman's" standard, and so dishonestly handicap all guns that they could not win? It is pathetically comical that Mr. Fulford, shooting a "gentleman's" weapon, with a "gentlemanly" load of 5½drs., and in the pursuit of a "gentlemanly sport," is very much more severely punished than was Mr. Fitzsimmons in his "gentlemanly" dispute with Mr. Maher at New Orleans. "Good Lord, deliver us" from a continuation of this foolishness on the part of many and dishonesty on the part of others.

In the field choose a light weapon. If for upland shooting, a 12 or 16-bore of 7lbs. or less; for trap or duck shooting, where the gun is not "toted," a 10-gauge, not far from 10lbs. either way. The present standard, 12-gauge, 7lbs. 15oz., is "English, you know," but it is an abortion in this country, being too heavy for field work and too light for trap and ducks.

In making handicaps, let the charge govern the penalty imposed. If 3½rs. of powder and 1¼oz. of shot will do better work in the 10-gauge, confess it and buy one. If the work in a 12-gauge is equal, stand at an equal and honest distance. Quit bruising your shoulders and cutting your cheeks and whimpering about "gentlemanly" weapons vs. "cannons." In short, be men and sportsmen. FAIRPLAY.

Knoxville's Anticipations.

KNOXVILLE, Tenn., Feb. 29.—The members of the Knoxville Gun Club are beginning to become enthused anticipating the pleasure (and profit (?) to their purses) attendant on our next tenth annual three-days' shooting tournament, to be held probably the last of May. This season of the year is most suited for such an occasion, when the boys' fancies lightly turn to thoughts of guns, traps and targets. No more enthusiastic club exists than in our beautiful mountain city, famous for its scenery and cordiality extended to all visiting brother sportsmen. Our club grounds are situated in a level plat on top of a gently sloping knoll, and have a perfectly clear sky background for each trap. No complaints are heard here of "Could not see the target." With this great advantage high scores can be made, and at our last September tournament Miller and Parker broke the world's record on straight breaks, Mr. Paul North witnessing same as referee part of the time. Look out for dates to be announced later, and we assure you a pleasant, social visit and good big purses and merchandise prizes. A few of the boys celebrated the 22d ult. with a sweep or two, just to see how steady their nerves were when "the stuff" is up. The following scores were made, expert traps, electric pull, 5 traps, rapid-firing system. No. 1, known angles and traps, $2 50 entrance, 4 moneys:

Goss	1011111111111101011111111—22
Wilson	1110111011101010100111101—17

Morris	1011111011111010101111—20
S Van Gilder	1111110011111111111111111—23
C Ross	1111101101111010011111—20

No. 2, same conditions as above, 15 birds, $1.50 entrance: John Ross 14, Goss 10, E. J. Ross 9, Duncan 10, Wilson 9, C. Ross 12, S. Van Gilder 13, Morris 11, Connor 12, Price 9, Jacques 15.

No. 3, 15 birds, $1 50 entrance: John Ross 12, Goss 10, Duncan 12, C. Ross 14, E. J. Ross 14, Wilson 9, Morris 10, S. Van Gilder 14, Connor 7, A. E. Meade 14, S. B. Dow 10, Jacques 13.

No. 4, 20 birds, $2 entrance: Duncan 16, John Ross 16, Wilson 12, C. Ross 16, E. J. Ross 17, Goss 11, S. Van Gilder 16, A. E. Mead 16, Jacques 17, Morris 14, S. B. Dow 10 Price 12.

No. 5, 20 birds, $2 entrance: S. Van Gilder 19, Goss 9, C. Ross 12, E. J. Ross 14, A. E. Mead 10, John Ross 18, Wilson 15, Jacques 17, John Conner 15, Duncan 14, Spillman 6, Slocum 14, J. R. Price 14.

At the annual meeting officers were elected as follows: S. B. Dow, Pres.; T. C. Eldridge, Vice-Pres.; S. Van Gilder, Capt.; J. C. White, Treas.; R. Van Gilder, Sec'y, who will be pleased to receive all communications and furnish programmes, rates (railroad and hotel) to all visiting sportsmen for our tenth annual May tournament. JACQUES, Sec'y.

Boiling Springs Defeat the Unions.

SATURDAY was a great day at Rutherford, N. J. On that day the Boiling Springs Fish and Gun Club received a visit from the crack shooters of the Union Gun Club, of Springfield, and by dint of careful work succeeded in winning a team match from the latter organization. The membership of the Union Club, as is well-known, comprises the name of nearly every one of the expert target shots of New Jersey, beside several from Pennsylvania. The latter, however, did not appear for Saturday's shoot. The day was a fine one for March, the light being of that peculiar cast of gray that is a favorite with shooters and the wind light and steady. It was not so cold, but one could stand about the grounds comfortably. The only drawback was the snow which covered the field in front of the shooters, this offsetting, in a measure, the good light.

The original conditions of the match called for 12 men per team, 25 artificial targets per man, under the 5-trap rapid-firing system. The Boiling Springs had a full team on hand, but as the Unions had only eleven men the match, by mutual consent, was shot with that number. This was the second of a series of best three out of five, the first of which was won by the Union Club on their own grounds.

The match was called shortly before 2 o'clock P.M., T. H. Keller acting as referee and Frank Mason being the official scorer. The first squad of Union men broke 120 out of 150 targets and the first squad of the home team took a lead by breaking 125. This lead was never lost and at the finish the score stood 234 breaks for Rutherford against 222 for Springfield. The visiting sportsmen, as soon as the result was announced, gave three rousing cheers and a "tigar" for their conquerers, these being returned with a will. The home team supplied an elegant lunch for the party and all hands made scores at the festive board. The rest of the day was filled in with sweepstake shooting, the results of which will be found below those of the team match.

SWEEPSTAKE EVENTS.

No. 1, 10 targets, $1 entry, 2 moneys: Sigler 10, Smith 8, Miller 8, Hobart 8, Paul 7, Hoff 7, Huck 7, Frank 4.

No. 2, same conditions: Hobart 10, Hoff 10, Miller 9, Sigler 9, Smith 9, Paul 6, Huck 6, Collins 6.

No. 3, similar to above: Hobart 10, Hoff 10, Huck 9, Apgar 9, Paul 8, Smith 8, Miller 8, Sigler 6, Collins 6.

No. 4, same: Miller 9, Collins 7, Hobart 7, Apgar 6, Hoff 5, Paul 5, Smith 2.

No. 5, like those above: Collins 10, Sigler 10, Miller 9, Apgar 9, Paul 7, Hoff 7, Huck 7, Smith 6, Jeanneret 5.

No. 6, same as above, excepting four moneys: Miller 10, Collins 10, Sigler 10, Apgar 9, Smith 9, Outwater 9, Addison 9, Paul 8, Post 8, Keller 8, Hobart 7, Crosby 7, Hoff 6, Blauvelt, Jr. 5.

No. 7, same, but three moneys: Miller 10, Apgar 10, Smith 10, Hoff 9, Addison 9, Outwater 9, Pudney 8, Collins 7, Hobart 7, Sigler 7, Keller 6, Blauvelt, Jr. 5.

No. 8, same, but four moneys: Smith 10, Keller 10, Paul 10, Outwater 10, Sigler 9, Collins 9, Miller 9, Apgar 9, Hobart 8, Addison 8, Blauvelt, Jr. 8, Post 7, Crosby 5.

No. 9, same, four moneys: Collins 8, Miller 10, Sigler 7, Tee Kay 8, Apgar 10, Smith 6, Hobart 10, Addison 8, Outwater 10, Huck 8, Post 10, Pudney 6, Hollister 10, J. P. 8, Collins 6 Dean 8, Drake 8, Elting 9.

No. 10, 15 targets, $1.50 entry, four moneys: Miller 14, Apgar 15, Sigler 14, Smith 13, Hollister 11, Beam 12, Outwater 13, Klees 11, Collins 10, Blauvelt, Jr. 8, Hoff 10, Elting 13, Matzen 9, Meyer 12, Hobart 13, Paul 12, James 14, Post 15, Huck 10.

No. 11, 20 targets, $2 entry, three moneys: Apgar 20, Smith 19, Sigler 18, Beam 16, Collins 17, Paul 14, Hollister 17, Klees 18, Outwater 17, Pellins 14 Matzen 11, Miller 19.

No. 12, 10 targets, $1 entry, four moneys: Beam 9, Smith 5, Elting 9, Hollister 9, Collins 8, Apgar 10, Meyers 7, James 7, Blauvelt, Jr. 6, Sigler 9, Outwater 10, Miller 7, Pellins 8, Paul 7, Lane 3, Peck 8, Klees 8.

The Auburn Gun Club.

AMONG other events of interest since my last writing was a team race with the Cato boys. These gentlemen desired to meet a team of ten of our B Class men on their grounds, and a match was arranged for Feb. 26. Our ten-man team consisted of only nine men—one A Class, three B Class and five C Class men. The race was 12 singles, 3 traps, unknown angles, and resulted in another victory for Auburn. The score of the match, as well as that of our last prize contest and live-bird shoot on the home grounds, is appended:

Auburn Team.		Cato Team.	
Vanderloo	111101000110— 7	Barnes	111101101011— 9
Goodrich	011111111111—11	Hadden	111111111111—12
Egbert	100001111111— 8	Shoecraft	111101111111—11
Webster	111011111101—10	Briggs	001101110111— 8
Bruce	110101111011— 9	Wolford	111101011101— 9

Egbert	10111110111011111111—16	Bruce	10001101101000000001— 7

*Handicapped 2yds.

In the live-bird shoot the interesting feature was the tie between Whyte and Nellis, each man killing seven straight, missing the eighth, and then killing nine without a skip. The race was then postponed for want of birds. The score: Bruce 0, Tuttle 5, Doan 1, Brister 3, Carr 0, Kerr 0, Sinclair 4, Tripp 2, Stewart 1, Whyte 7, Nellis 7. Tie, 3 birds

Whyte	021	111	212	2—9
Nellis	011	121	111	2—9

C. W. B.

Greenwood Justly Claims the Forfeit.

IT would be a difficult matter to find a more disgusted and disgruntled party of sportsmen than that which assembled at the Gentlemen's Driving Park in Philadelphia on March 4. The press both in and out of the city announced a live bird match to be shot by Frank Kleinz, Al. Sheets, John Rothaker and Wm. Greenwood, each of whom was to put up $200 and each to shoot at 100 pigeons, the winner to take the pot. Taking it for granted that the match would be a sure "go," a FOREST AND STREAM representative railroaded from New York to Philadelphia on the above date, walked over a slushy road from Girard Avenue Station to the Gentlemen's Driving Park, a distance of two miles, and when he arrived there received the very pleasing (?) intelligence that the match would not take place, that Frank Kleinz was in bed suffering from an attack of inflammatory rheumatism, and that for some unknown reason Sheets and Rothaker had failed to appear, and that Greenwood had been on hand for some time, ready and anxious to shoot. After a ninety-mile ride and over an hour's search for the grounds, it can be imagined that the above news was not of just the character to put one in a holiday humor. The entire party, and it was a fairly large one, was mad clear through and were nowise backward in expressing their sentiments. Included in the party were Geo. R. Hook, Chas. Topham, Jos. Thurman, Jr., Harry Thurman, Jos. Watts, Geo. Old, Jacob Pryor, Frank Stallman, Jas. Halford, J. Revell, J. Maglone, Jas. Muller, Thos. Greenwood, John Greenwood, Jos. Heffner and John Harmer from Germantown. From Morristown were M. Mack, with his famous pointer dog Mack which was to retrieve the pigeons for Greenwood, Judge Dickson, Edw. Felton, E. Billerbeck, J. Taney, and from the city proper Wm. Wolstencroft, Wm. H. Wolstencroft, A. Lumb, Wade Wilson, A. Rust, Dick Irwin, Robt. Welsh, Jos. Thorn, Prof. Mensh, J. Alberger, Harry Irvin and J. Young.

About two o'clock the party ploughed its way through the sticky red clay to an inclined piece of ground in the center of the track, where the traps had been set in readiness. Half an hour later a sweepstake was begun, at which time Greenwood, who had allowed 2½ hours grace to the three absent ones claimed the forfeit. An hour later Sheets and Rothaker reached the scene, though neither of them vouchafed any reason for their failure to appear at the time stipulated. Thus the affair resulted in a grand "fizzle," and one which was not at all creditable to the parties interested. Even though Frank Kleinz was physically unable to shoot, there seemed to be no good reason why Sheets and Rothacker should have remained away. It may be possible that they thought discretion the better part of valor and saw no better way out than to forfeit their paltry $10 apiece and thus save $190. This may be an economic like way of doing business, but it is scarcely the way to give a man a reputation as a sportsman. Greenwood was thoroughly disgusted with the outcome of the affair as he entered the lists with the intentions of shooting rather than to follow the "flunking" method. It is very doubtful if the match ever takes place, as Greenwood seems to be the only one with any "shooting blood."

Below will be found the scores made in the sweepstakes shot during the afternoon.

No. 1, 7 birds, $5 entrance, 2 moneys, 60 and 40 per cent:

W Greenwood	1011121—6	J Jackson	0202w.
R Welsh	2121122—7	Irven	2122220—6
H Thurman	1022212—6	Mench	2000211—4
J Thorne	2102201w.		

No. 2, 5 birds, $5 entrance, 60 and 40 per cent:

W Greenwood	12212—5	Mench	2200w.
R Welsh	21220—4	Topham	010w.1
H Thurman	2200w.	Young	11101—4
J Thorne	12100—3	Jackson	11101—4
Irven	100w.		

Two Hill-Ruppell Matches are Fiascos.

LAST week announced that arrangements had been completed for three matches between Ed. Hill, of Trenton, N. J., and M. H. Ruppell, of Milford, N. J., the first at 100 live birds, American Association rules, to take place at Milford on March 3; the second at 100 bluerock targets, to be shot at Frenchtown on March 4; and the third at 100 live birds, under Rhode Island rules, to be contested at Yardville on March 9. On the first mentioned date a goodly party assembled at Milford, expecting to see a good contest. But nary a match did they see. The principals were both there and so was the stakeholder, who held a forfeit of $10 from each man on each race. The agreement called for the full amount of stake for one match to be put up before said match was shot, but nevertheless Hill refused to shoot unless Ruppell would put up the total amount of the stakes for the three matches. This Ruppell flatly refused to do. He said he was there to shoot under the stipulated conditions and did not propose to agree to any change of those conditions. He insisted upon the match being shot, and was willing to give his pledge to shoot the remaining two matches. Hill, however, refused to shoot unless the world would move to suit him, and so Ruppell was given the forfeit. It looked like a clear case of backdown on the part of the Trenton man.

In order to kill time the party shot a number of impromptu sweepstakes, which resulted as below:

No. 1, 5 live birds, $5 entry, 3 moneys:

Hill	22111—5	Warford	10211—4
Eilenburg	21112—5	Holjes	02210—3
Ruppell	01222—4	Apgar	02100—2
Zwerlein	11120—4	Millburn	00100—1

On shoot off for second Rupell and Warford divided.

No. 2, same conditions:

Hill	21112—5	Millburn	22011—4
Ruppell	11112—5	Apgar	12011—4
Eilenburg	21112—5	Zwerlein	21120—4
Warford	22001—3	Holjes	10001—2

Hill first, Millburn and Apgar div. second after shooting Zwerlein out.

No. 3, same conditions:

Apgar	11121—5	Millburn	22011—4
Ruppell	21112—5	Zwerlein	01201—3
Warford	11111—5	Fox	22010—3
Hill	10212—4		

No. 4, miss and out, $1 entry:

Millburn	11112	Ruppell	10
Warford	11212	Zwerlein	10
Fox	21220	Apgar	20
Hill	110	Holjes	10

Match for $5 a side, 5 birds:

Zwerlein	12212—5	Warford	21201—4

THE FRENCHTOWN FIZZLE.

The next day a fair-sized party, comprising among others Frank Mason, the stakeholder, and M. H. Ruppell, met at Apgar's National Hotel in Frenchtown, expecting of course that the bluerock match would take place. The Trenton delegates failed to put in an appearance, and Ruppell pocketed forfeit No. 2. The afternoon was filled in by shooting bluerock sweeps, the conditions being 10 targets per man, $1 entry, two moneys. The events are summarized below:

No. 1: Ruppell 7, Reading 9, Eilenburg 10, Warford 3, Gummere 9.

No. 2: Ruppell 9, Reading 9, Eilenburg 7, Warford withdrew, Gummere 10.

No. 3: Ruppell 9, Reading 9, Eilenburg 9, Warford 6, Gummere 10.

No. 4: Ruppell 8, Reading 10, Eilenburg 8, Warford 8, Gummere 8. Ruppell had to smash 18 targets to win tie for second.

Another Shoot for the Big Hog.

LAST week we published an exclusive story of a hog shoot which took place at Marion, N. J., on Feb. 25. As was stated the three men, Messrs. Cooper, Hollis and Jones, who tried for the "porker," agreed to meet at the same place on March 3 and shoot off for possession of his hogship. On that date Jones and Hollis were on hand, but Cooper failed to appear. Consequently Hollis and Jones concluded to shoot off for possession of the hog, at 10 birds each, and in order to make the affair a little more interesting they let in Eddy Collins and Harry Smith, each of whom paid $10 for the entry. The birds were a cracking good lot throughout. The race resulting in a tie, it was decided to shoot it off at five birds, then miss-and-out. The result is given in detail:

	Ties.	Miss-and-out.
Smith	2110211012— 8	12122—5	22211221112211
Collins	2012220212— 8	11222—5	12111111221212o
Hollis	2102121210— 8	11120—4	
Jones	2212o21o21— 8	12002—3	

This was a warm fight between Smith and Collins, and might have been still waging had not Collins's sixteenth bird fallen dead a foot over the boundary. Below are scores of the sweepstakes shot during the day. Conditions, 4 birds, $3 entry:

	No. 1.	No. 2.	No. 3.	No. 4.	No. 5.	No. 6.
Jones	2111—4	2221—4	1111—4	1112—4	2111—4	1111 4
J Smith	2210—3	2101—3	2112—4	2212—4	1111—4	1111—4
Collins	2202—3	1012—3	1011—2	o122—3	1112—4	1221—4
Pfister	12lo—3	2111—4	2o02—2	1212—4	1112—4	2210—3
Hollis	1111—4	1121—4	1200—2	1112—4	212o—3	1121—4
Brown		0021—2	o000—0	1201—3	20o2—2	1202—3
Castle			1101—3	1222—4	2222—4	1112—4
H Smith				1121—4	2122—4	2011—3

The above were shot before the hog shoot. After the latter event came a 5-bird shoot, $5 entry, in which four men tied for first money. They decided to settle this by the scores in the succeeding event, when three of them again tried. These shot off, miss-and-out, the result being that first in both events was taken by Collins. The final event was a miss-and-out, $1 up, also won by Collins.

New Jersey Defeats East Orange.

CLAREMONT, N. J., March 5.—Match at 25 targets per man:

East Orange G. C. Team.		N. J. Shooting Club Team.

A Little Sport at Mamaroneck.

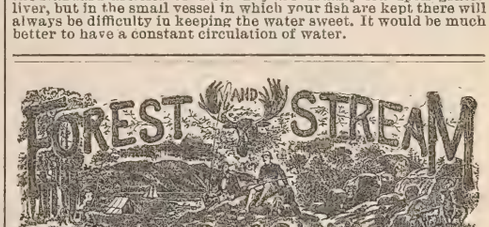
A FEW days ago several New York business men took their shooting paraphernalia and meandered to Mamaroneck, where within the shadow of Arickson's Hotel they enjoyed a few hours' sport at the traps. The conditions of the shooting were five live birds per man, 35yds. rise, gun below the elbow until bird was on the wing. Three of these events were shot, the results being as appended below:

	No. 1.	No. 2.	No. 3.
F Lawrence	01101—3	00111—3	00111—3
L Korter	00010—1	10000—1	10101—3
J Arickson	11110—4	11101—4	10002—2
W Grolze	11100—3	01103—2	10101—3
S Arickson	10011—3	00001—1	10101—3
J Mills	00010—1	11001—3	10100—2
T Theal	11010—3	00001—1	

Match at 5 birds:

Lawrence	11110—4	S Arickson	10111—4

During the afternoon an attempt was made to arrange a match between Messrs. Grolze and Mills, in fact each man challenged the other to a $50 match, but disagreement as to rules caused the match to fall through. These gentlemen will probably test one another's skill at an early date.



Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

J. B. R., JR., New Haven, Conn.—Can you inform me where I can buy Mongolian pheasants or their eggs. Ans. Write to Judge S. H. Greene, Portland, Oregon, inclosing stamp. He can put you on the track of them we think.

C. C. C., Newark, N. J.—I knew of a party several years since who caught a great many shad in the vicinity of Windsor Locks with bait which he prepared of flour as a base. I want to learn how to prepare the bait. Ans. Cholmondeley-Pennell says, "There is no paste so good as a simple one of white bread crumb, and made thus: Put a lump of crumb into a pocket handkerchief and, having twisted it up, dip it in water, giving it a few squeezes while immersed, so as to eject the air and substitute water. Then wring the crumb as dry as may be in the handkerchief and, taking it out, work it for a minute or two in the hands, which should be clean. Paste should be put on in a pear shape, so as to cover the shank as well as the bend of the hook.

R. K. B., Easton, Pa.—I have a few trout fry, about an inch in length, in a glass bowl, the water is changed frequently, but I am concerned regarding their food. Should I feed them or not, and if so, what? Ans. They must be fed as soon as the yolk sac is absorbed. Many kinds of food are successfully used—heart, liver and lungs of animals killed for market, run raw through a sausage-grinder; fish flesh ground up; sour-milk curd, made by pouring boiling water on bonny-clabber and straining off the whey; chopped earth worms and English dog biscuit are among the standard articles of diet. Fry are usually fed upon grated liver, but in the small vessel in which your fish are kept there will always be difficulty in keeping the water sweet. It would be much better to have a constant circulation of water.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisement must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of a approved character inserted.

Address all communications:

"WITH FLY-ROD AND CAMERA."

By EDWARD A. SAMUELS,

PRESIDENT OF THE MASSACHUSETTS FISH AND GAME PROTECTIVE ASSOCIATION.

This superb volume, in the preparation of which author and publishers have been long engaged, is now ready. Of the text, which relates chiefly to salmon fishing on the famous rivers of Canada, it is sufficient to say that it is from the pen of one who is a master of the angler's craft. The vivid pen-pictures of camp life and fisherman's luck are drawn with a firm hand. This is the work of no novice. From the first page to the last it is seen that the chapters have been written out of a full experience.

The illustrations are of a character fittingly to supplement the text. They are full-page reproductions, by a marvelously faithful half-tone photo-engraving process of Mr. Samuels's own invention, from photographic negatives made by the author for this work. They picture all the phases of Canadian salmon and trout fishing, with far-famed scenery and views of the quaint old towns through which fishermen pass on their way to the salmon streams.

The work has been prepared in the most luxurious style, printed on heavy plate paper, and elegantly bound in cloth and gold, with gilt top.

Size of page, 7x9½in.; 477 pages. Price $5.00. Sent postpaid.

Notice to Powder Mills AND Ammunition Manufacturers

I have just brought out and offer for sale a new type of a **Cartridge Loading Machine.** U. S. Patent applied for, which does not interfere with any existing patent.

This new machine possesses unequalled merits, has great durability, is not liable to repairs for a great number of years, can be adapted to load any size or shape of shell—pasteboard or metallic—and all kinds of Powder. It is the only patented machine used by all military authorities and Ammunition Manufacturers in Europe for loading sporting, military and revolver Cartridges.

Nearly 100 of my machines are in daily use. Will sell U. S. Patent outright or grant licenses thereunder upon liberal terms.

For particulars apply to Patentee and Manufacturer,

ARMIN TENNER,

Grossbeeren St., 13 A., Berlin Germany.

TENTS AND CAMPING

Is the subject of a new book called

Gypsy Tents and How to Use Them.

It gives a vast amount of information about how to live out of doors. Besides tents, how to make and put them up, it tells of camp fires, camps, pack saddles, cooking utensils, bedding and clothing, and the joys and sorrows of camping. All outers need it. Fully illustrated. Price $1.25.

THE NATIONAL PARK GRAB BILL.

THE bill to incorporate the Yellowstone Park Company which is now before Congress notifies the public that there are some people who are dissatisfied with the supervision exercised over the reservation by the Cabinet officers, in whose hands Congress saw fit to put the Park. These people are the directors of a corporation, which now has a practical monopoly of the Park, and which wishes Congress to strengthen this monopoly, to sanction a continuance of it for forty years, and practically to free the corporation from governmental control.

The bill authorizes this Yellowstone Park Company "to acquire and operate hotels and all appurtenant buildings or establisments in or near the Yellowstone National Park for the accommodation of all persons visiting or sojourning in and going to or from said Park." Notice the phraseology, "all persons," not for the accommodation of persons who may visit the Park, not for such persons as it can induce to patronize its hotels, but for the accommodation of *all* persons. It may also transport people between its own hotels by horse, cable or electric power, may run steamboats on the lakes, may acquire, for nothing, twenty-year leases of ten parcels of land of ten acres each, may operate telegraph and telephone lines, may make contracts with steam railways rnnning near the Park. It may use the public timber, stone and brick clay in the Park, may graze cattle, sheep and horses and build pastures for such stock. The power to keep the corporation in order, to prevent it from imposing on the public is taken away from the Secretary of the Interior and is given to no one. Vague mention is made of the Superintendent, and there is an effort to make it appear that he has some power. As a matter of fact, he has none at all. If this bill should become a law the only authority exercised in the National Park will be that of the Yellowstone Park Company.

We see in this bill very much for the Yellowstone Park Company but nothing at all for the Government. It is a grave menace of the rights of the people. To pass the bill would be to hand over to a great monopoly the Park, which for twenty years has been sedulously guarded for the public. During five administrations, Republican and Democratic, the Yellowstone National Park has been under the charge of the Secretary of the Interior. Its affairs on the whole have been managed wisely and well. Successive Secretaries have appreciated its wonders and its value to the public and have done all in their power to protect it from spoliation and from the greed of corporations. Experience has shown that in respect of the National Park the Secretary of the Interior is an efficient guardian of the public rights.

The organic act establishing the Park gave the Secretary of the Interior full control over it. The framers of this bill propose to take this power from him. Not satisfied with this they have inserted in the measure a section which provides that the leases of the company can only be forfeited by legal process in the courts, by suits which might drag on for many years without being decided, during all which time the company might continue to impose upon the public such burdens as it saw fit.

We believe that it is a long time since a bill has been offered in Congress which so seriously reflects on a member of the Cabinet. To enact the measure would be in effect to say to Mr. Noble, "All previous Secretaries of the Interior have done their duty by the Park, and it has been left in their hands. You have failed to fulfil your trust, and so we take it away from you and turn it over to this corporation." It would be an extraordinary spectacle if Congress were to do this thing, if at the bidding of a great corporation it were to put upon a Cabinet officer such a slight at this.

It is alleged by the bill promoters that these enormously valuable privileges must be granted in order to enable the Yellowstone Park Company to prepare for the tremendous influx of travel to be anticipated in 1893. It is not likely that travel to the Park in that year will be much greater than in ordinary years. Residents of the United States will turn their faces toward Chicago in 1893, not toward the Yellowstone Park. There will be some increase in the number of foreign travelers to the Park in that year, but a diminution of citizens of the United States. But even if the travel thither were to be great, it would be better that all who might go there should suffer discomfort than that the United States Government should abandon for forty years its rights to the National Park. Nothing very terrible will happen if the company can not accommodate all the visitors to the World's Fair.

MARCH DAYS.

BACK and forth across the land, in swift and sudden alternation, the March winds toss days of bitter cold and days of genial warmth, now out of the eternal winter of the north, now from the endless summer of the tropics.

Repeated thawing and freezing has given the snow a coarse grain. It is like a mass of fine hail stones and with no hint of the soft and feathery flakes that wavered down like white blossoms shed from the unseen bloom of some far-off upper world and that silently transformed the unseemliness of the black and tawny earth into the beauty of immaculate purity.

One day, when the wind breathes from the south a continuous breath of warmth, your feet sink into this later coarseness come of its base earthly association, with a grinding slump, as in loose wet sand, so deep perhaps that your tracks are gray puddles, marking your toilsome way.

As you wallow on, or perch for a moment's rest on a naked fence-top among the smirched drifts, you envy the crows faring so easily along their aerial paths above you. How pleasant are the voices of these returning exiles, not enemies now, but friendly messengers, bringing tidings of spring. You do not begrudge them now the meagre feasts they find, the frozen apple still hanging, brown and wrinkled, in the bare orchard, or the winter-killed youngling of flock or herd, cast forth upon a dunghill, and which discovering, one generous vagabond calls all his black comrades to partake of.

Watching them as they lag across the sky so much swifter than the white clouds drift above them, you presently note that these stand still as you may verify by their blue shadows on the snow, lying motionless, with the palpitating shadows of the crows plunging into them on this side, then, lost for an instant in the blue obscurity, then emerging on that side with the same untiring beat of shadowy wings. Then comes a puff of wind out of the north, then an angry gust and then a howling wintry blast that the crows stagger against in labored flight as they make for the shelter of the woods.

You, too, toil to shelter and fireside warmth and are thankful to be out of the biting wind and the treacherous footing. The change has come so suddenly that the moist, grainy snow is frozen before it has time to leach, and in a little while gives you a surface most delightful to walk upon, and shortens distances to half what they were. It has lost its first pure whiteness wherewith no other whiteness can compare, but is yet beyond all things else, and in the sunlight dazzles you with a broad glare and innumerable scintillating points of light, as intense as the sun itself.

SNAP SHOTS.

THE papers report a "rabbit drive" near Fresno, Cal., last Sunday, in which, it is stated, 5,000 men, women and children took part, and 25,000 rabbits were surrounded, driven into a corral and clubbed to death. Whereupon some one writes us to remark that it was "a very unsportsmanlike hunt." The Fresno rabbit plague is altogether too serious to be coped with in a "sportsmanlike" manner. When the Californians shall have reduced the supply to such normal proportions that there will be some fun in hunting for the game it will be time enough to talk about hunting the creatures as sportsmen hunt.

Last week a hearing was given by the Public Lands Committee of the House of Representatives on the Dixon bill, which is the Vest Yellowstone Park bill with the cut-off, and the Montana Mineral Railroad franchise bill. Messrs. Hague, Phillips and Hon. Theodore Roosevelt addressed the committee in the interest of the Park, Senator Sanders and Mr. Dixon in behalf of their constituents, and Mr. Vinnedge in behalf of Cooke City. The last-named gentleman stated that the Cooke City people much preferred the cut-off to any grant of exclusive privileges for any right of way. The gentlemen who spoke for the Park presented its case in an able manner. The discussion lasted two hours, and the decision of the committee has not been announced. There is no doubt that the sentiment of Montana is wholly against the Montana Mineral Railroad right of way bill. The Cooke City miners do not wish it to pass. The State press opposes it, and the people of the State at large are against it. The Livingston *Enterprise*, once a strong advocate of this bill, is now entirely opposed to it.

A New York broker is undergoing trial in one of the city courts as to his sanity. One of the witnesses, a physician, testified the other day that once when the broker and he were camping in the Adirondacks the broker took it into his head that his companion was a wolf, and for half a mile they had a wolf chase, the doctor going at his best pace and the broker after him with a gun. It must have been extremely lively while it lasted, and the incident goes to illustrate the principle that the fun one gets out of a woods trip depends largely upon the compatibility of his hunting chum.

By the death of H. P. Ufford, at his home in Lake Charles, La., the FOREST AND STREAM has lost a favorite contributor, and its editors a personal friend, who was endeared to them by the familiar correspondence of many years. As revealed in his letters no less than in his published sketches, "H. P. U." was a high-minded man, of wide and varied culture, lofty ideals, and attractive personal qualities. To know such a man was to love him; and the letter which brings news of his death brings with it, too, a sinking of the heart.

Among the individuals whose fitness for the office of Fish Commissioner of New York is under discussion, is an Albany man who enjoys the credit of having performed a unique feat of sportsmanship. It was at Lake George last deer-hunting season. A deer was driven into the water by the dogs, and having been come up with by the "guide," was duly tethered to a stake in the water; and thus helpless in the shambles was shot by the Albany man.

It affords us much gratification to print to-day a call for a convention of Kentucky sportsmen to be held in Frankfort April 19; and we trust the response may be hearty and full. Kentucky is sadly in need of intelligent reform with respect to her fish and game interests. In union there is strength; this meeting of her sportsmen citizens in convention for united action is full of promise.

The Gould bill in the New York Legislature has been weakened by the complacency of the Assembly in accepting about every fool notion proposed for its amendment. Nevertheless the bill should be adopted, and we again urge the sportsmen of the State to use their individual influence to secure its passage.

New Mexico has suffered severely and unusually from cold during the present winter. Deep snows have prevailed and ice has closed many of the ponds to the certain injury of fish and perhaps of the food of water birds.

The Sportsman Tourist.

DIANA'S REMINISCENCES.

EAGERLY as a maid of sweet sixteen looks forward to her first beau, do my husband and I look forward each week to Thursday evening, when FOREST AND STREAM is a most welcome guest in our little home. When the paper is opened the odors of the forest seem to pervade the air,

"And the cares that infest the day
Shall fold their tents, like the Arabs,
And as silently steal away."

The very walls seem to recede and melt away, and we find ourselves beside some trout stream or out with a party of hunters, missing a fine shot here or bringing down a big buck there; and now we are sitting by a camp-fire listening to some quaint, old-time hunter telling big tales of bigger game of bygone days. Thus all too quickly the evening goes, but how we do enjoy it all! How many new ideas we have gotten for our next vacation, and who can blame me if I give my guns and rod a little caress before I sleep.

The Boyhood Number of FOREST AND STREAM we enjoyed very much, but I searched in vain for some reminiscence of "girlhood days." Why should not some woman who, when a girl, used to shoulder a gun and trudge off with her favorite brother for a two or three days' hunt, come forward and tell about her first shot, and describe her emotions when she landed her first 4-pound fish that would only tip the scales at 1¼lbs., or when she brought down her first bird? It may be because the invitation was not extended to her. Surely it is not because she has become so engrossed with other things that she has lost interest in hunting and fishing. But be that as it may, I shall, all uninvited, tell my story; for I have been stirred to the depths by the reminiscences of "boyhood days," every one of which I read in FOREST AND STREAM.

I shall not go back to the old days when, a wee tot of a girl, I used to cry for my father's gun, shut my eyes when I pulled the trigger and then cry again when the gun went off, because the noise frightened me so; but I will tell of my first shot when I took hold of a gun all alone, aimed at something and shot—nothing.

I had gone with my brother and two cousins to the "new ground," where the boys said there was some fine bird shooting. We had ridden over on our ponies, and after we had dismounted and were climbing a five-rail fence my brother said, "Lucy, you are a girl, and girls can't shoot." I waited to hear no more, I just slipped to the ground, mounted my pony, gave him the bridle and in a short time was back home again.

On going to the gun rack, to my dismay, I found only a heavy old-fashioned shotgun, which was always spoken of as the "kicker." I did not long hesitate to take the "kicker," for I was fully determined to learn to shoot. What matter if I did get a kick or two? Was that half so bad as to be told, "You are a girl, and girls don't shoot." I could not load the gun and I dare not ask any one about the house to do it for me, lest it should be taken away and I forbidden to touch it again. I was in despair when I bethought me of "Uncle Sam," a superannuated negro who lived with his wife in one of the cabins which belonged to the old negro "quarters." This old negro had been a slave of my father before the war and was still a pensioner on the family. He was very fond of me and would do anything for me. I took the "kicker," all the powder and shot I could find, and made a bee-line for "Uncle Sam's" cabin. I found him outside praying most lustily: "Oh Lord, chicken is mighty good, but po' ole Sam doan want no chicken, he jes' wants a ham bone. Oh Lord, please jes' sen' ole Sam a ham bone"—with much stress on the bone. Long since we had all learned that when "Uncle Sam" was calling so loudly on the Lord for a ham bone he was doing so to drown the noise of chicken sizzling in his frying-pan, hence I did not hesitate to interrupt his devotions by asking him to load the "kicker" for me.

He obeyed my injunction to "put in a big load," but hesitated before he gave it to me, saying, "Honey, what is you gwine to shoot?" I was stumped. My thoughts had been so busy with the pleasure I should experience at my brother's surprise when I had proven to him that girls could shoot, that I had not thought about what I was going to practice on. I confided my ambition to Uncle Sam and he said: "Down in dese woods jes back dar is a ole fatnin' pen whar is a hog what is gwine to be killed in de monin'. Now you jes go down dar and shoot dat ole hog, den young marster will hear all de niggers a laffin an' a talkin about how you done shot de ole hog, and ef he doan take all dat he said back, den I ain't no nigger."

I made up my mind in a minute to follow Uncle Sam's advice. I grew happy and confident. In less than no time I was at the "fatnin' pen," where my career as a sportswoman was to begin.

My idea was to sit on the top rail of the pen, and when the beast looked up at me to shoot it in the head, never for a moment doubting I should kill him. I climbed up, seated myself on the top rail facing the inside of the pen. The hog looked up; I stilled my throbbing heart, pulled the trigger and—found myself lying on the ground outside of the pen, and that pig still alive looking at me with as much curiosity in his face as it was possible for a pig to have. I picked myself up and hurried home as fast as I could. I met the boys at the gate, but try as I would I could not smile. My whole body ached and my heart was sad. The boys were all smiles. I knew they saw me with the "kicker," but never dreamed they had taken a short way home and had seen me from the top rail of the pen until my brother whispered as he bade me good night:

"But some guns so contrive it,
As oft to miss the mark they drive at,
And though well aimed at pig or plover,
Bear wide and kick their owners over."

My cup was full. The tears I shed that night were bitter tears indeed. Before I slept, however, my mind was fully made up that before many moons came and went I would at least wing a bird. I confided my ambition only to my eldest sister.

At Christmas Santa Claus brought me a shotgun and one of the prettiest boy's rifles I had ever seen, and with them a little note from my father saying, "I shall grieve much should my daughter shoot herself. I know girls can shoot—sometimes better than boys."

After this the other girls saw very little of me, I was my brother's constant companion. No mother duck ever took more pains to teach her duckling to swim than my brother took to teach me all about the art of hunting. I was 12 years old when I shot at the pig, and was 13 and nearly a half when I shot my first deer.

It was in that section of Kentucky known as "Jackson's Purchase," which includes Trigg and several adjoining counties, that I killed the first deer. My brother and I were stopping at a rather picturesque old farmhouse one night, intending on the morrow to push on into the next county where, as we had heard, there was a famous "deer lick," for now "keen ambition spurred me on" to add a pair of antlers to my collection of coon skins, rabbit hides, wild turkey wings and other "trophies of the hunt."

After supper, as we sat with our host and his wife by a bright wood fire where the flames danced merrily and played hide and seek among the logs, my thoughts were so busy with the deer I was to shoot the next day that I paid little attention to what was being said by those about me until I heard our host saying, "I think I ought to know this 'black jack' country pretty good, and if I can't show you some deer before to-morrow night, I'll chaw my ole hat. But," he added in a stage whisper, "you mus' leave that thar tow-headed gal at home with my ole 'oman. Gals can't shoot." My brother's rather long drawn out "C-a-n-t they?" as he smiled at me, put an end to the matter and nothing more was said. Soon after we retired for the night.

The next morning I was up early and forgot to bathe my face in my haste to see the one "hired man" who worked on the place. After a few words with him I struck off through a dense "black jack" woods that was to the left of the house, and about a half mile away. I carried my brother's rifle, as it was a larger bore than mine, and I wanted to kill my deer, not merely wound him. I had almost cleared "black jacks," when my heart fairly stood still, for just beyond me a little to the right was an antlered buck. He stopped, raised his head and sniffed the air, and while I stood well to windward of him, within easy rifle range, half paralyzed with joy, he took two or three steps, stopped again with an air which seemed to say, "This time I am off for good." I took aim, fired, and fell in a half faint upon the ground.

"Wall, by the e-tar-nal hoecake," said my host, as he loomed up in front of me, "ef you didn't fetch him." And he pulled off his old hat and stood before me holding it in his hand. I was on my feet by this time, but so weak with joy that I had to lean up against a tree. My brother now came up, lifted me in his strong arms, carried me to where the deer lay dead, set me on my feet and said: "Well done, little sister. This is the largest buck I ever saw. Father will be proud of you."

They told me later that the hired man was frightened half to death when he saw me start out alone to shoot deer, and hastened to let the "men folks" know, and they followed me as quickly as they could; but I had about ten minutes' start of them, and so I shot my deer before they came up to me.

Many and long are the tramps I have taken with my brother since then; many a wild turkey and duck have we bagged; not a few deer has my loved rifle laid low, but never shall I forget that deer that I killed among the "black jacks."

I agree with Ben Jonson when he says:

"Hunting is the noblest exercise,
Makes men laborious, active, wise;
Brings health and doth the spirits delight.
It helps the hearing and the sight;
It teacheth arts that cannot slip
The memory, good horsemanship,
Search, sharpness and defense.
And chaseth all ill habits hence."

L. P. S.

A DAY IN THE TIERRA CALIENTE.

WHEN I was in Angostura last Don Luis and I talked of a trip we were surely going to make down toward the Gulf after Mexican tigers, cougars, deer, turkeys, etc. It then seemed certain that we should be able to get off for a week some time in December last. But we couldn't. He got into the toils of a lawsuit about some boundary question, a slow business anywhere, but worse here, and I—well, between one thing and another I found myself but little better off for time than he. One of my chums for some years has been a botanist from Vermont. He spends the summer and fall in Mexico collecting plants, and has traveled the land from end to end. Since the opening of the road from here to Tampico on the Gulf that line has been his favorite field. It traverses the whole range of Mexican vegetation, and was such a virgin region scientifically that a large proportion of his collection there last fall was entirely new.

Now P. is something of a Quaker, and has given me more than one lecture about the cruelty of killing the innocent little birds and pretty animals. But that did not keep him from inflaming my mind with accounts of how the woods were full of deer, how the turkeys were about as thick and tame as chickens in a barnyard, the scenery magnificent, and how there were no drawbacks except an occasional overplus of heat and a few million ticks. The fact is he has a pretty tough and lonesome time on his trips. He is out more than half the time, passing many monotonous hours aboard trains, camping under the stars, or clouds, as it may happen, with no tent but that one which stretches over us all; and so, though by past experience he knew that I would shed blood, he was willing to tempt me out and let it be upon my own head. This year he had with him as assistant a canny Yankee boy who before coming had never seen a wild deer, but was as keen a sportsman as you will meet in a day's journey. Jud had already got his first deer, and was anxious for me to go along some time so that he could knock off work and try for another.

Time pressed, and a long trip with dogs, tent and other paraphernalia seemed impossible this year. So I broke away for a short one. The run from here to Tampico, a little less than 300 miles, is made in about eighteen hours. The train leaves this place at midnight so as to have daylight for the more striking scenery on the lower end of the road. Travel is not very heavy yet, but when in a few months more there is deep water on the Tampico bar, then the only harbor on the east coast of Mexico will make itself felt at once. A line of passenger steamers will be put on from Mobile to that point, and any one having occasion to come to Mexico could not choose a more interesting route.

Monday night, Dec. 7, we started for Micos, a point about two-thirds of the way to Tampico and well down into the hot country, being only about 1,000ft. above sea level. Daylight dawned upon us as we were crossing Don Luis's broad hacienda. The road runs through an immense cedar thicket here, a famous place for turkeys and not without deer. The hills are dry, however, and remind us of the dry plateau above from which we had descended to the first mesa. At Cardenas—a hacienda belonging to the governor of this State, who by the way is a hunter, and happening to be on the train gave me a cordial invitation to come there to shoot deer—we begin another rapid descent. For awhile the hills are still rather bare, though apparently of excellent soil for fruit trees. At Canoas we stop to get water from a lovely mountain stream, examine brakes, and prepare for the plunge. Some get out and take a hand car, on which they are to follow the train, moving almost without propulsion down the long grade, and securing thus an uninterrupted view of the scenery of the famous cañon. Following the pellucid little stream a few hundred yards the road by a sudden turn avoids a tremendous gulf that drops away to invisible depths beneath the very wheels of the train. We creep along the mountain side on the right. The vegetation grows thicker and thicker until above us and below, and hiding the rough stones of the towering mountain opposite, is a jungle so dense that to penetrate it on level ground would be no light task, while on these steeps it is reserved for the panther and the wildcat. I do not recall anywhere in my travels a scene more essentially and impressively wild. Even the born hunter, who loves nature in proportion to her wildness, shrinks instinctively here and turns his eye with a sense of relief to the sturdy engine that treads cautiously the narrow line of territory conquered from this rugged realm. His next thought is of the men who formed the advance guard of this conquering road. What a skirmish they must have had.

The close line of hills at last opens upon a sweep of green tropic forest far below, and with curve on curve we swing through the long descent, every tree and shrub a stranger to the eye, till in the midst of a great forest we stop and are informed that around us is a coffee field. The dark green shrubs are full of berries about the size and appearance of small cherries. It is thought they do better in the shade, and hence they are planted in a virgin forest, or other trees are planted to shade them. I doubt the correctness of the theory, as those along the opening of the railway track seem to be decidedly healthier than those most shaded. Here we are in the most fertile belt of the descent, where the clouds rolling westward from the Gulf strike the cool bosom of the Sierra and pour their treasures of moisture on the soaked soil. Only a few months out of the year can even natives live here. It is far more unhealthy than down at the sea level. If ever there was a vegetation that could justify the much overworked adjective of lush it is here. The trees are not large, however, as a general rule. The undergrowth is something wonderful, and is green the year round.

The grade we have been coming down is mostly four per cent. From here on it is lighter. The vegetation is not so dense, and palm trees begin to mix with the wild fig, gum, etc. At Rascon we stop in a palm grove for a late breakfast. Two stations below is our destination. It is a beautiful country, but insufferably warm a large part of the time. We fortunately had cool weather. Thickets of palm and other growth alternate with lovely glades stretching up the curving hills. Our conductor is of the craft and pulled up to drop Jud and me in an ideal spot, about three miles before we got to the station. It was a flat valley thinly wooded and overgrown with grass waist deep, lying between hills covered with dense thickets.

It was exactly noon when the train slipped away eastward and left us to the new experience of hunting in the "sure enough" tropics. The first thing was to protect ourselves from being hunted. In spite of P.'s sentiments about killing game he has a most sincere and unaffected hatred for all "bitin' bugs." And Mexico abounds with them. The houses are full of fleas, the woods of ticks, and most of the people of one or two varieties of that wingless, hemipterous, non-metamorphic hunter, known to science as *Pediculus*, but whose plain every-day English name it would not be good form to put down here. All these are P.'s game, and he hunts them day and night, neither does his eye pity nor his hand spare them. Jud had a bottle of "medicine," a gruesome compound of oil of cloves, petroleum, turpentine, etc., which smelled to heaven. We soaked our cuffs, stockings, necks and other vulnerable points with it and set out.

It was a lovely place. We waded through the high grass a mile or so, taking in the sights and listening to the screams of parrots and other strange birds. Among them was a sort of brown jay, as impudent, persistent and noisy as the rest of his roguish family. In about a mile we found a sort of swamp, overgrown with mesquite and cut up by stock paths. Here we separated, I keeping near the hill and Jud, with the recklessness of youth, plunging into the thorny thicket. There was a lot of wild cattle around that looked at me much as if they had never seen a man. I was a little apprehensive that some old patriarch would charge me and I should have him to shoot, which I should have done with great promptness. There is no use fooling with a Mexican bull. If you climb a tree with one after you he will keep you up it a week unless driven off. I came upon two who were roaring splendid defiance at each other, and slipped into the bushes, thinking I should see a free fight. But one was afraid and the other was glad of it. Here I found my first *pinolillo*. I had heard of him from afar. He is considered the pest of that section. The most courageous and well armed hunter quails before him. From various accounts I thought I should recognize him, but had not made out exactly what he was. Gentle reader, he is just a plain seed tick. When I saw a brigade of them advancing up my ducking coat sleeve I just smiled to think of the big name and reputation my old friend had got down this way, and reaching for a twig brushed them off and went ahead.

I circled around the swamp, whistling occasionally for Jud and watching rather sharply the big rocks and trees that overhang the water-holes where the cattle came to drink. I didn't exactly expect to find a panther, but I

did not care to be found by one before I was ready. The sun was half hidden in clouds, but the air was soft and warm, and I stopped from time to time to rest and take in fully the strange, new scenes. As I cut across a corner I saw the flash of a white flag at the foot of the hill a hundred yards away and began to slip along with my gun ready. As I neared the place I caught a glimpse of a graceful form in the thick bushes upon the hillside, and seeing what I thought was a movement to run fired through the twigs. There were too many of them and the ball flew wide, while the surprised deer gave a bound or two and stopped. A few steps brought me into plain view at about 50yds. distance, the foolish animal looking at me with much more curiosity than alarm. As I again trained my gun I found that I had a genuine case of buck ague. My knees shook in spite of me and the white bead wandered all about over that deer. I got steady at last and fired. My game gave a few lunges up the hill and fell. I followed up and, hearing a plunge off in the bushes, began to peep around, after assuring myself that my first one was safe. In a moment I saw a pretty yearling gazing steadily at me an easy shot away. I had to stop a minute to decide whether to shoot or not. I don't like to be a hog. But I knew I had to go home the next day and that the weather was cool enough to keep the meat, so the faithful old Winchester spoke again and snuffed out the little innocent's life.

Jud had heard, the racket and soon came puffing through the swamp and thorns. He had heard a deer a few moments before, but could not see it in the ticket. We thought it was probably the same one I had shot. There are few people in those regions and we had to carry our own meat. It was four miles or more to shelter and lunch. Nothing would do Jud but that he must carry the larger one, a very fine doe, and we jogged along in easy staggers, reaching the station aboat dark.

This was a long time the terminus of the Gulf end of the road, and there is a large abandoned freight house, in which we slept. Tall mountains shut in the road beside a dimpling river of the prettiest water I ever saw, not even excepting the limpid streams of Oregon. A certain little lady who has a good deal to do with my hunting trips and other affairs had told me plainly that she had rather have some birds than venison. (She is from Tennessee, where, as in most of the South, "birds" mean quail.) So my Lefever and a box or two of cartridges went along. Next morning I went down the river with P., Jud still athirst for big blood, having started early after deer. P. was botanizing and I was sight-seeing, satisfied with almost anything, being already full of that content with which one returns from a successful hunt. These high mountains are haunts of the Mexican tiger or jaguar, the largest and handsomest of American cats. I cherish a hankering that is growing month by month to sometimes stretch upon my floor a spotted skin, the trophy of my own rifle. But this fellow cannot be successfully hunted without preparations of a kind and extent that I have never had time to make. It is a comparatively easy matter, however, and the hunt has no more of danger than is necessary to make it interesting.

A mile below the station the river begins to tumble over cascades. There must be more than twenty of them in almost immediate succession, and averaging from 10 to 20ft. in height. The total fall in about two kilometers, as we count distance here, is said to be 300ft. The water breaks into sprays of snowy whiteness, tinted delicately by the curtain of mosses with which the soft porous rock is overgrown. It takes plunge after plunge with a roar that fills all the narrow cañons. The railway which a little before was running alongside the river is now far above on the mountain side. Over the stream hang great cypress trees, whose branches are bestrewn with orchids rare and fine, which in their season fill all the sylvan air with dainty perfume.

We climbed down through trees and over boulders from the track to the river bank, and stood enchanted with the spendthrift loveliness. P. took off his shoes and began to wade after rare water plants, and as the roar of the falls forbade conversation I wandered down stream. Two fine birds nearly as large as turkeys flew cackling into the trees from a berry bush. I had only No. 8 shot, but a quick shot through the head tumbled one into the water. The other waited while I got a stick and hauled him out, and then accommodatingly flew to where he would not fall into the water and let me shoot him. I don't know the bird. The natives call it *ajola*. It is the size of a hen turkey but slenderer. The color is a lovely dark bronze, shading into greenish purple, and on the breast and neck flecked with white. The head is bare and reddish, tail and wing rather long, legs dark red.

I lugged them up to the track, nearly tearing a finger off on a villainous thorn, of which the woods are full. Walking out to where the road curves round a promontory I got a magnificent view, one that required me to sit down and look long and earnestly to take it in. On the mountain above me I saw fine prairie glades, and was told afterward that deer were abundant there. Returning on the track, I saw again the long array of cascades which stretch in panorama for below, a sight of surpassing loveliness which even the passenger on the train will get. Wishing to get a nearer view of one waterfall I climbed down again, encountering in the thicket a pair of curassows—*faisan real* they are called here. I snapped a shot at one's head, but as he sprang to fly the load caught him in the back and rolled him down the mountain. I doubt if there is a prettier gallinaceous bird than this. It was the female, and the rich brown of the body shaded into the mingled colors of the neck, while above the bright dark eye the sensitive, curling crest rose and fell with fright and pain. Speedily putting an end to its sufferings, I scrambled out to the track again. I was well loaded, for the three birds were but little lighter than so many turkeys, and wandered contentedly along toward the station. I met Jud, who had seen a fine buck but had allowed himself to be tricked out of shooting the old fellow.

Precisely at noon the train picked us up. I cannot begin to tell all of the strange and interesting things I saw. I have hunted a good many days but I never crowded so many experiences into twenty-four hours before. The insects are rather bad, it is true, and the heat is often severe even in winter. But after all it is a hunter's paradise. Where there is standing water, ducks and other water fowl are abundant. December and January are the times to go there, the former preferably. Since the time of my story Jud killed two deer on one trip at the station nearest the coffee plantations. They are everywhere. He said he must have seen about twenty on that trip. This is on the line of the Mexican Central Railroad, at whose offices information can be obtained as to time-tables, prices, etc. The writer can be communicated with through the office of the FOREST AND STREAM, and will cheerfully supply any information he may possess. AZTEC.

H. P. UFFORD.

IN the Lake Charles, La., *Commercial* is printed this tribute to the late H. P. Ufford, the "H. P. U." of the FOREST AND STREAM:

"Mr. Ufford came to us from the North but a short time since, seeking a more healthful home in our sunny South. While only a short term of life was allotted to him here in his new home, his manly and upright character, his genial and social disposition, gave him many true and warm friends. Gentle and loving hands, mingled with Southern woman's tenderness, ministered to him in his last illness, and sorrowing brothers of his order, together with comrades of both causes, laid him down to rest, with the hope of meeting his gentle spirit in a better life to come.

"Calcasieu Camp Confederate Veterans, in a body, escorted the members of the Grand Army of the Republic, where the tears of those who wore the gray mingled with those of the blue moistened the sod that fell upon the coffin, while both flags draped in mourning curtained away the rays of the Southern sun. Sleep, comrade, sleep, soldier of the blue. Southern flowers bloom brightly on your Southern grave. While these lines are inscribed to your memory by a soldier of the gray, with the hope of feeling your kindly grasp again in the spirit on the other shore.—W. H. A."

Natural History.

CATCHING WILD ANIMALS.—IV.

YELLOWSTONE NATIONAL PARK.

[*Continued from Page 224.*]

WE now began to have quite a collection, and every one passing that way seemed to enjoy seeing the animals. I wanted very much just now to get some blacktail, or mule, deer. So when a Mr. George Gray and his wife came out, they made up a party to go with me. I left Dolph to watch and feed the animals. We made a trip to Specimen Ridge, saw elk, deer and antelope, but no young. George and I had quite a time with one antelope trying to find her kids, but she was too smart for us. She would not run away, but would stay within one or two hundred yards. At last we gave up and went home. Next day I planned a trip to Mount Washburn and the valley of Antelope Creek.

There were with me George, his wife and Laura, a young girl from Mr. Yancey's, George's dog Bloke and Leo. The girls put up a good lunch, as the trip would take all day. We got an early start, but turned aside several times to seek cow elk and antelope. While the others took a view of Tower Falls, I rode on to the Antelope Creek basin and hunted for game until the others came up. I had seen only a few elk on the side of Washburn above the timber. We followed the new trail until we again had a good view of the basin from an elevated point. With field glasses I discovered a cow elk lying in the willows on the west fork of the creek. She was a distance from timber, and thinking she would not be out there alone unless she had a calf cached, we determined to have it, and so rode down to look it up. She left her bed while we were yet a quarter of a mile away and disappeared over the hills. We rode to where she had been and hunted very carefully for the little one. I was so sure that there was one around there somewhere, that we hunted every bunch of willows and then followed up a low swale. The girls soon got tired of that kind of work, and rode on along the trail, but George and I were off our horses, leading them, while we looked over every inch of the ground in the swale. We called to the girls to wait, but they could not hear us, and we went on with our search. Soon we could see the girls, who were on top of a hill, point at something and beckon to us. As we did not come fast enough, they came back, saying, "Do hurry! There is an immense bear just a little way ahead, and we saw three elk go into the timber. Hurry up!" We were not long getting to the top of the hill, and there sure enough was a very large grizzly gray bear. They say we don't have grizzlies in this country. Well, I don't know exactly what they look like, but that bear was a grizzly gray. The girls were for charging at once, but I held them back long enough to see what the lay of the land was.

Just then two cubs came in sight. They looked as if they had come up out of the ground. The mother was walking and nosing about, moving toward a pocket in the side hill that was full of timber. Our first intention—before we had seen the cubs—was to see how close we could get to the old bear and have a little fun with her, but now the programme was changed. If we could frighten her away from the cubs I thought we could get them. I cautioned the party to wait a moment and then we would ride slowly up. Presently she got out of sight behind a low knoll and we rode up on a trot, so as to save the horses for a charge. We got past the knoll before she saw us. When she did she stood up for a look, then I gave the word to charge and yell and away we went. The dogs were soon up with the cubs. We were all in an old quaking asp grove, with logs lying in all directions and a few standing trees. The old bear never stopped for a moment after we started to charge, but ran over the obstructions as easily as if on smooth ground. Not so the cubs, they would tumble end over end from the logs, but were making very good time. In a moment we were all in a sort of pocket, when up jumped a lot of elk—there must have been about twenty, but I had no time to count. The elk were so astonished at first that they stood still, looking at us. They did not seem to see the bear at all until she was right upon them. She was going straight for a bunch of five or six and was within fifteen or twenty feet of them before they started; when they did so she turned sharp to the right and disappeared in some fir timber. We had driven her away from her cubs. I called out that we must drive them over the hill to the left and then catch them. George and his wife were on the fast horses and his wife was in the lead, driving the cubs as fast as they could scramble along through the fallen timber.

On top of the hill the ground was more open, and here the dogs got to the cubs and stopped them. I jumped from my horse with a rope to get one, but the savage little brute was larger than I had supposed and had tusks half an inch long or more. I made a grab to catch him by the back of the neck, but he dodged me and started toward my horse's hindleg. He was just going to climb to a place of safety when Nig objected. Then away the cubs went back down the hill toward the fir grove, where their mother had gone. I had made the dogs let them alone when I jumped off my horse, but now I started them after the cubs again. They concentrated their efforts on one cub, but he fought his way to the timber. Mrs. Gray was going in after them; I called to her to stop; "Don't go in there! Let us go first!" But she paid no attention, but went in. I don't know exactly how it all happened, but she had gone but a few yards, when she was turned back by a lot of logs, then we were all there together; and into the timber we went, smashing through the brush, over logs, around stumps until we came to a beautiful little open glade in the center of the grove. We could hear the dogs in a thicket of lodge pole fir and soon one of the cubs appeared, climbing a white pine that grew from the center of the grove. The other cub had disappeared. We looked around for the old one, and not finding her, concluded she had left, satisfied with one cub. At least we never saw either again.

The whole thing had happened in a moment. All was noise and confusion, and at one time there were horses, elk, bear, men, women, dogs and cubs, all mixed up in the pocket among the fallen timber. We had made all the noise possible in order to bluff the old bear, and had succeeded, yet I was very much surprised. I did not think any bear but a black one could be made to leave her young, and never such a large one as we had just driven away.

The cub went on climbing until he was at the top of the tree. He would rest a bit, look down at us and growl. The tree he was climbing was from 95 to 100 feet high; a white pine, green on the outside, but dead and spongy on the inside. It had grown when there was thick timber of its kind all around; now there were but few tall trees standing, the others had been killed by a fire long ago and the fallen trunks were what we had been riding through when we drove the old bear away. There were a few green limbs on the tree toward the top. I did not like the looks of the job, and was planning how I would get him if I did go up. The others were doing most of the talking, the girls were wishing they were men so that they could climb the tree. There were strong hints thrown out that I was afraid; I don't know yet what of.

The only reason I did not start at once was that I was puzzling over the question of how I was going to get down the cub when I reached him. At last my plans were made. I took a ¼in. rope 10ft. long, and a stick about 7ft.; tied the rope and stick to my arm. I took off spurs, "chaps" and coat, stuck a revolver in my belt and started up the tree. I had to go about thirty feet before I got out of the top of the fir grove, but from here on I had good climbing. It was warm work, although the day was cool. We had now and then a passing shower of hail and snow with strong gusts of wind. When I had got up about seventy feet one of these squalls struck the grove and made the tree sway very uncomfortably under my weight. I rested until the blow was over and then climbed a few feet further. The girls suggested that I had "better come down. Let the cub go. You have gone high enough." But no, I was not going to have all that work for nothing. I could look down on what was now a very quiet scene, where only a few moments before had been an exciting chase with quickly moving figures and changing groups. As I approached the cub he became quite fierce, tearing at the treetop with his teeth, making the bark and slivers fly. He could not go any higher; he was unable to climb the small stem of the tree above him without limbs.

Having reached a point where I could touch the bear with the stick, I fastened a slipknot to the end, and began to try to get it over a hindfoot. This was anything but an easy job. He was resting on the only clump of limbs near him, and these interfered with my work, but I could not reach them. I was so high now that there was considerable danger of the tops breaking off with us. Then, too, I only had one hand that I could use freely. After fully half an hour's work I got the rope over his left foot above the heel, and tightened it securely. I felt elated over my success, for I had him sure now. Going down to the end of the rope, I began pulling. He began fighting, but it was no use, he had to come. Brave as he was, he had to back down this time. When almost at the foot of the tree George gave me another rope. I tied the ends of the two ropes together and then went to the ground and pulled the cub out of the tree. He came fighting, and made a dive for George the first thing. I bent a small tree across the rope and pulled his foot up to it, where we had him secure. We had another long fight to get two ropes around his neck. When this was accomplished we all went out of the grove, George and I with the bear between us. Here we could get a good look at the ugly little rascal. He was a grizzly gray like his mother, but a bit darker. His whole build and expression was very different from Johnny, the black bear, and his belly was quite light, and his claws long and sharp, and not quite black.

The girls led our saddle horses and we the bear to Antelope Creek, the cub fighting all the way. At the creek we gave him a good bath, which he enjoyed. When cooled off we staked him out with the three ropes, so that he could not get hurt or away, and then we all turned to discuss our lunch and the adventure, which the girls had enjoyed hugely. I had to compliment them on the way they conducted themselves during the chase. They were both strangers to fear. I don't think a mouse would frighten them after this. When rested, the girls went on home to send Dolph out with a pack animal, while George and I escorted the bear. He would not give up, but fought all the way until we got past Tower Creek, where Dolph met us with Fisher, with two beer boxes. I put the bear in one and 45lbs. of stone in the other, lashed the pack on securely, for Bruiser would not keep quiet. He struggled and squalled most of the way home, and I began to admire him for his sand. If his mother had had half as much as he, we would not have taken him, the chase would have turned the other way. When I got the cub chained up at Yancey's he refused food, but made dogs and men give him room. No one wanted to venture within reach, for he was always ready

for a row. He was as courageous as an animal could possibly be. I put him in a small cabin, but he dug out the first night and in the morning was sitting outside, so I chained him up to a post in front of the house in which I lived. He would fight his chain, the post, his box, knock his bucket of water over and act the bad boy all the time. About this time (the second day) I noticed the roach on his back, fitting over his shoulders like a cap, was a lot of hair much longer than that on any other part of his body. E. Hofer.

CHAMBERLAIN'S NUTTALL'S MANUAL.

Of the earlier writings on American ornithology, none have a greater charm than those of Thomas Nuttall. The results of his labors were modest by comparison with the elaborate productions of Wilson, Audubon and Bonaparte, but in the two little volumes which constituted his work, there was careful study and painstaking care. Whether as botanist or ornithologist, Nuttall was a close observer, and he wrote with a deep feeling that appeals most strongly to all lovers of nature. He it was who first wrote a connected history of our birds in such form that it was accessible to the general public. Other works on the subject were expensive and to be seen only in the libraries of the wealthy, but the two plain volumes of the "Manual" with their pleasing text, and their simple yet truthful wood engravings were within the reach of all. It was a popular hand book of ornithology, and the charm of its style, as well as of its subject, at once secured for it a large share of the popular favor, so that after a few years it passed to a second edition.

The little fat volumes have long been out of print and are now among the desiderata of many a bibliophile, but the demand for the book by ornithologists continues and cannot be supplied. To meet this want, Messrs. Little, Brown & Co., of Boston, have issued an edition of Nuttall's Ornithology, and it is of this that we have now to speak.

A mere reprint of the "Manual" is something that at the present day would hardly be thought of except as a curiosity, and it has been the purpose of the publishers to furnish a work which should be useful and practical, as well as entertaining. Since Nuttall's time the nomenclature and classification have so changed that, as the editor remarks, "little is left of American ornithology as Nuttall knew it except the birds." To have reprinted the "Manual" would have been to mislead many non-technical readers. Instead of doing this we have, in the work just issued, an American ornithology which embodies the results of recent investigations brought up to date for the area that the work covers. Matter that is obsolete, or that has been found to be incorrect, has been omitted. We are given the ornithology of to-day.

The task of editing this work was one which required knowledge, discrimination and judgment. Old and useless material had to be excised, new matter to be added, the information, acquired during the sixty years that have elapsed between the publication of the "Manual" in 1832–34 and the appearance of the new and modernized Nuttall, to be inserted. Mr. Montague Chamberlain, the editor of the present work, is well fitted to face the difficulties which here present themselves, and it is a matter of congratulation that he was chosen to perform a work which, so far as it goes, is well done, the intention of the editor and publishers being to give matter which should be popular, leaving to students to follow up technicalities in volumes which are purely scientific. Mr. Chamberlain's experience in editorial work is quite extended. For several years he was associate editor of the *Auk*, and is now editor of the Ornithological Club. He has also published "A Catalogue of the Birds of New Brunswick," "A Catalogue of Canadian Birds," and "A Systematic Table of Canadian Birds," together with many short papers which have appeared in various periodicals.

The most serious fault to be found with the new Nuttall is that its title is misleading. It is not a popular handbook of the ornithology of the United States and Canada, but of the eastern United States and eastern Canada. This is explained, to be sure, in the preface, but the title page and prospectus fail to give any hint that the work is limited to the species of the east, and in the prospectus it is especially stated that the work "will give to the readers the latest acquired facts regarding the species mentioned in the original work, also an account of the species and sub-species that have been discovered since Nuttall wrote." Later in the prospectus a hint is given that the area covered by the volumes is limited, but there is certainly room for great misunderstanding. As against this blemish may be set the charm of the literary style of the work, the general good judgment displayed in editing, the beauty of the type, paper and illustrations. The latter, especially the new ones drawn for these volumes by Mr. E. E. Thompson, are beautiful.

The volumes under consideration form a valuable and worthy addition to the bird literature of the day, and may be commended to readers.

Aquaria and Taxidermy Display.—Mr. W. M. Brackett, General Manager of the Minneapolis Industrial Exposition to open Aug. 31, writes: "We propose at our exposition this year, in addition to our fish exhibit, which attracted so much attention last year and which will be largely increased and improved this season, to arrange a very unique and interesting taxidermy exhibit of the birds and animals (game especially) of the Northwest, or in other words, what might be termed a 'zoögraphicon' of the Northwest. We have already secured a very large collection, and expect to make a very full exhibit, as we are still soliciting for more. All will be catalogued, with a short and terse description, printed in a neat and attractive form, with owner's name, and if for sale so stated. We should be pleased to correspond with any parties having specimens of the class named."

Spring Woodcock in New Jersey.—Newark, N. J., March 10.—*Editor Forest and Stream:* Every spring a few woodcock can be found in the vicinity of this city and occasionally a brood of young birds is met later in the season, but most of the old birds are killed before they have time to rest from their flight. Dead birds are openly shown and even bragged about on the streets and in public places, but as long as I can remember not a single lawbreaker has been prosecuted. It is discouraging. Cannot the gun clubs of this city or county, composed mostly of enthusiastic, law-abiding sportsmen, take the matter in hand and bring some of these fellows to terms?—J. G.

Game Bag and Gun.

Antelope and Deer of America. By J. D. Caton. Price $2.50. Wing and Glass Ball Shooting with the Rifle. By W. C. Bliss. Price 50 cents. Rifle, Rod and Gun in California. By T. S. Van Dyke. Price $1.50. Shore Birds. Price 15 cents. Woodcraft. By "Nessmuk." Price $1. Trajectories of Hunting Rifles. Price 50 cents Wild Fowl Shooting; see advertisement.

A NORTHERN WISCONSIN HUNT.

The month of November was very dry and had no snow, hence the hunting was not at its best nor equal to many former years, as our old hunters, J. M. Cox, of Marion, Ind., and Nat. Doyle, of Van Buren, Ind., who have hunted in those parts almost yearly for the past ten years, assured the new members of the camp, which was pleasantly located on a fine creek which empties into one of the branches of Pike River. We were south of the "Soo" railroad. The report of these two, after a fair examination of surrounding country in all directions for sign of deer, was unfavorable, the apparent scarcity of game and the dry season were truly discouraging; and thoughts were entertained and discussed of moving camp; but this is a great trouble, and it was concluded to do the best we could where we were, as other hunters in camps from three to five miles of us reported still other camps adjoining them, and then a camp of Indians came and stayed three days; they left saying "too many white men, not much game."

The Tomahawk Club, of Milwaukee, Wis., was east of us; they had moved down from Floodwood, Mich., bringing several deer with them. They also killed several near us. A camp west of us were from Kalamazoo, Mich. They, like the other hunters met by members of our camp, were gentlemen and sportsmen, and succeeded fairly well and, like us, did not hunt with dogs, yet dogs were heard almost day by day.

After a few days Doyle killed a large fawn and, with venison in camp, all were hopeful of better success. In a day or so after Cox shot a splendid doe, and in extra good condition; this gave some encouragement and prospects looked brighter. A circumstance. This deer was one and a half miles south of the river, one mile down the river from the creek where we camped. One day Cox, Dr. Williams and the writer took our boat down river to the nearest point, then making fast took his "blaze" to his deer, when after taking it down from where it had hung he found that the ropes had been left in the boat. Things looked as if some one had a good chance to take a three-mile walk extra, as there was no chance for bark where we were nearer than river. But I remembered that I had a few yards of annealed wire carried in one of my coat pockets. I offered it; it was very useful in getting that deer to the boat and to camp by dark.

The Doctor shot a fine one, and as it was his first to bring down he was greatly elated; but he had been practicing at them on several occasions, according to current audible reports. He has now mounted in his office a very choice pair, buck and doe. He will try them again, and as he is a good one in camp he will make himself heard.

Cy Wilson got a shot on his first day out, the Doctor was with him, both failed to score. Cy's next shots were in the last four days in camp, when he got two shots and dropped two bucks in their tracks, neither making a jump after shot. This, of course, very much helped his rheumatic affliction and increased his good feelings.

The exciting event of the hunt occurred about the middle of November. All had noticed, at times, signs of bruin, mostly where he had crossed the river, leaving tracks in the sand; but as all the tracks were going northward, it was not expected to find any specimens. Yet Cox and Doyle have long had a strong desire to bring one to bag. They took a trip to Wyoming four years ago almost expressly to capture one, and failed, but they got enough other large game, yet the great ambition was not satisfied, and is not yet by one of the parties, while one is content on that score; his next ambition is for moose and caribou. Whether that is ever filled or not time only will show.

Doyle having found a dead buck, which had been killed in a fight with another, as evidenced by the manner in which the ground had been torn and scratched, the hair scattered around, and the largest point broken off one horn, he was in the habit of watching that carcass every day or so, hoping to see sign of "b'ar." Finally one morning he found various and abundant signs that they had been feasting on the carcass. His thoughts then went to the old trap at camp as a possible means of capturing one, but such was not to be.

Continuing his hunt for deer a short distance, his attention was called so the continuous cry of a raven not more than 100yds. in a cedar swamp, or 200yds. from him. Now something, he knew not what, and does not now, prompted him to investigate; so, marking the locality as woodsmen only know how, he proceeded with his investigation. Penetrating the swamp, hunting faculties all being keen and active, he discovered an object about 50yds. distant, not in good view, owing to surroundings. And as soon as he was satisfied that it was not a human being and must be a bear, as he noted a few movements of its head (lying among the logs its body was partially concealed), he brought his .45-75 Winchester to proper position, and at its explosion there was a dead bear and a cub with a broken back. The first seen of it was when it was dragging itself away. This he shot, and slightly wounded the other cub, which was making off. Now feeling that it would be safe to approach, he did so cautiously, and found that the ball had entered the right eye and came out back of left ear.

And now comes the runaway cub to investigate perhaps. If two balls had killed two bear, we who were in hearing of the shooting cannot say with due regard for truthfulness, that two or three killed the second cub, but it was killed. Cox, who was nearest him, said he thought there were two Winchesters, but Doyle could stand it with three dead bear within 20ft. of each other. What Nimrod would not feel proud and joyous? Surely Doyle looked so when he returned to camp and when the exploits were narrated. Proper arrangements made, all hands and the cook proceeded up the river, some with the boat to the nearest point, thence between one and two miles to the swamp where the game was, which was conveyed to the boat. The bear were duly suspended in front of camp with our deer, making quite an addition to our game rack. While all were worn and weary they were all willing to do the same thing over. It was an eventful day, to be remembered by all who were there.

Several hunters called to see them. All admired, all would like to try it themselves. The old bear weighed about 200lbs. when we came out, cubs near 80lbs. each. They are now mounted and can be seen at business room of M. Doyle, Van Buren, Ind.

We brought out ten deer (five bucks, four does, one fawn). Largest buck weighed 203lbs. at railroad and was killed by Cox. S. F. J.

MR. CLEVELAND AT SPESUTIA.

Havre de Grace, Md., March 11.—*Editor Forest and Stream:* All old gunners along the Chesapeake are familiar with Spesutia Island, but to many of your readers in the North and West this may only be a name. It is, however, one of the most famous ducking shores of Maryland, and many thousands of gamy canvasbacks and equally delicious redheads, to say nothing of blackheads, widgeon and other ducks of the commoner sorts, have fallen before the guns of the shooters of Spesutia.

It was on the shores of Spesutia, and in Spesutia Narrows, that the big-guns of Wash Barnes and his gang of duck killers were used ten years ago, and I well remember the occasion, in the early part of the year 1883, when several of these guns were captured by the aid of a detective named Lindsay, and the exciting scenes which took place in court at the time the poachers were tried. These great-guns were used exclusively at night, and were mounted in the bow of a skiff, the stock being braced against a block on the bottom. The gunners lay in the stern and propelled the boat by means of a paddle. The guns were painted dull blue or gray, and each one is said to have had a line, with a buoy attached, tied to it, so that if the officers of the law pursued him, the shooter could unship it and throw it overboard, and if overtaken, no evidence would be found against him. When the pursuit was over, he could return, and finding the buoy, recover the gun. The destruction wrought by the discharge of one of these heavily-loaded guns into a bed of sleeping ducks was tremendous, and it is said that sometimes 100 canvasbacks have been killed and crippled by a single discharge.

From what has been said it will be seen that Spesutia Island is historic ground so far as duck shooting is concerned. The island has just been visited by ex-President Cleveland, who stopped there for a day or two to try the ducks, and left to-day for New York. Mr. Cleveland is better known to sportsmen as an angler than as a gunner. He is an ardent trout fisher, and has made frequent trips to the Adirondacks. There he has taken many a good-sized trout, and it is said that he has spent some fruitless hours on a lake's shore, waiting for the dogs to drive a deer into the water so that he could kill it. It appears from his visit to Spesutia, that Mr. Cleveland can handle the double-barrel as well as the split-bamboo, and that he enjoys facing a March gale and watching the blackheads dart as much as he does whipping a stream for trout.

Mr. Cleveland reached Havre de Grace last week, in company with Mr. H. W. Maxwell, Geo. W. Evans, H. A. V. Post and Dr. Wells, of Brooklyn and New York. The party boarded the steam launch Evadne, commanded by Capt. John Kean, and at once started for the island, which is about four miles distant. As they approached it they obtained their first view of the club house, a large wooden mansion with a cupola, built years ago by a wealthy Philadelphian as a residence for his son. Coming up to the dock, they landed and walked up to the house, passing the boathouse, well supplied with decoys for all sorts of fowl, from swans down to woodduck, as well as with batteries, sink-boxes, skiffs and all equipments necessary for the successful pursuit of this sport. At the club house the party passed into the hands of Mr. D. E. Mitchell, the six-foot-four Marylander, who has charge of the island for the Rod and Gun Club. He is one of the oldest duck hunters on Chesapeake Bay, and enjoys telling his experiences of years ago, and how once he killed 156 canvasbacks in a single day.

The shooting party was called at 4:20 A. M., the usual hour, on Thursday morning, and half an hour later were discussing a delicious breakfast prepared by Aunt Rachel, the club's old Southern cook. After this was over they started for the boxes, which they reached before light. Mr. Cleveland's gun was a 10-bore hammerless.

It is the club's practice to bait their blinds, putting out twenty bushels of corn at a time. The result of this is that the birds collect at the blinds to feed, and when one rows up to them in the gray light of the morning he finds there acres of ducks, which rise and fly away. Almost before the shooter is placed in the blind and the decoys have been put out the birds begin to return in small bunches, three, seven, ten, or forty in a flock, and splendid sport is had as they come in to the decoys.

The tender remains not far away, and picks up the dead and knocks over the cripples. The fowl killed here, besides swan, geese, brant, canvasback and redheads, are blackheads, widgeon, greasers, whistlers, pintails, and now and then a blackduck and a woodduck.

It was a rough day when Mr. Cleveland had his first experience at Spesutia—regular duck-shooter's weather, a howling gale from the north and the birds flew well. Of course the shooting was not easy, as any one knows who has tried the blackheads under such weather conditions, but, on the whole, the guest of the club held up his end pretty well. The total bag of the first day was 50 birds for the party. The second day they shot only till about 10:30 and then returned to the club house. Out of the 70 birds secured, Mr. Cleveland killed 18, which was more than his share.

I asked Mr. Cleveland what he thought of the new Forest and Stream, and called his attention to a copy of the last issue lying on the table in the reading room of the club. He laughed pleasantly as he answered: "You need not show it to me, I have already read that copy through. The paper is greatly improved: every one must acknowledge that. I enjoy the increased size, but I confess that I regret a little bit the old green cover that I had known for so many years."

Mr. Cleveland and Mr. Maxwell left Spesutia at 3 o'clock this afternoon for New York, having heartily enjoyed their stay. Blackhead.

AN ESQUIMAU CARIBOU HUNT.

THE Esquimaux in the vicinity of Point Barrow, Alaska, have always placed great dependence upon the hunting of the reindeer. The great mid-winter hunt begins soon after the sun returns, or about the last of January. Then the Esquimaux go out on the plains which stretch far to the south and east, and are covered with snow for about nine months of the year.

The hunt is anticipated with much pleasure by the young and active hunters, who look upon it as a field in which they can display their skill with the rifle and also their endurance, for, to be successful in the caribou chase, an Esquimau must be able to travel at a high rate of speed and continue the chase for hours. The hunt is hailed by the oldest people as a season of feasting on the fat of the land; if reindeer are found in large numbers there is no stint.

While the younger men hunt, the old men set their nets beneath the ice in the river and catch many fish, most of which are whitefish, and a few burbot. When these expeditions start out on a hunt, two or three families, or portions of families, usually go together and camp on the bank of some stream, where they can set their nets and have water handy. Here they build themselves snow houses and remain during the season, hunting the surrounding country to a distance of eight or twelve miles in all directions. The caribou being great travelers, as the hunters drive them from the vicinity of the camp their places are taken by others from distant feeding grounds, and these in turn are harassed by the natives with their magazine rifles, and in time they will be driven so far from the villages that it will be unprofitable to hunt them. These people do not like to go much further than sixty or seventy miles from their *igloos* (villages), and this is a long distance to bring in the product of the chase. Twelve or fifteen caribou are about the average to a hunter, but sometimes as many as fifty have been killed by one person, and, by the way, the best shot reported was four reindeer killed at one shot with a Peabody-Martini rifle by Mungie Ah Loo. This shot was vouched for by a number of natives, who are not given to boasting of the deeds of others, whatever they may say of themselves.

Many animals are wounded and escape the hunter only to fall easy victims to the prowling wolf, who takes the bloody trail, and with untiring persistence follows the stricken caribou to his doom, and the wolf and the reindeer lie down together. Occasionally a reindeer is seen which is the owner of but three legs, and is still able to keep its place in the herd while going at full speed; but it was most probably wounded in summer, when the chance of escape would be much greater than in winter, as the summer is a season of comparative plenty for the wolf and, in fact, all other animals, including man.

As before stated, the hunting grounds are comparatively level, with nothing that can be called a hill except along the river banks, where small hills have been formed by drifting sands, the deposit of the river along its banks. The method pursued by the hunter is as follows: He travels off in the direction which he intends to hunt during the day until he comes to the highest point to be found, and surveys the country through his binocular or a spy glass, one of which he is almost sure to have, as these aids to sight often save the tramping of many a weary mile. If a caribou is sighted, or, rather, a herd, for they roam and feed in winter in groups of ten to fifty or more, he at once starts off in that direction, striving always to keep in sight of the deer, especially as he gets in the vicinity of the feeding herd, for the reason that if the herd has seen the hunter they will remain comparatively quiet while he is in full view, but if lost to sight they at once become uneasy and start off in the opposite direction or directly to the windward.

As the hunter gets nearer they become alarmed and start off on a run, the native following at a dog trot, disturbing the deer as they stop to feed, and were it not for the curiosity of the caribou to find out what his tormentor is few of them would be taken by these people. But led on by its inquisitiveness the herd starts off at full speed partly toward the hunter and in a direction which will carry them to the leeward, to enable them to get the scent of the enemy. Usually the herd would pass 500 or 600yds. distant, but the Esquimau, knowing the object of the animals and that they will not vary their course, runs rapidly before the wind and shortens this distance as much as possible. When he sees that he has reached the nearest point he drops panting on the snow and begins to use his rifle, and one may image that in the exhausted state of the hunter his aim is not true, but he tries to make up for this by sending after the fleeing herd as many whistling bullets as possible, consequently the magazine rifle is the favorite weapon in the caribou hunt.

After the bombardment, if one or more deer be killed, the hunter removes the pelt and places the carcass in a pit which he excavates in the snow just the length of the body of the deer, with the neck turned at a right angle and the nose pointing upward, to lengthen one leg of the angle. In this shape the carcass freezes. This is done so that when the bodies are placed on the sled, one head to the right, the next to the left, four bodies on the sled, then three on top of these, making seven caribou to each sled load, the pelts, which have been staked out and dried on the snow after all the particles of flesh have been removed, may be packed between the elevated heads. On the following day the wife goes out with sled and dogs to bring in the game, the husband going off in another direction to hunt over new ground. The game which is brought to camp is put into a deep pit excavated in the snow for the purpose, and is kept for present use and to carry to the permanent home of the Esquimaux on the coast.

The snow-fall will not average more than 18in. for the winter, and this is continually drifting during the high winds, and forms in deep drifts under the high banks of the rivers and in all depressions of the land. Under the cliffs along the seashore great drifts are formed, and also on the rough sea ice. This drifting and piling of the snow in low places leaves the tundra with but a thin covering of a few inches for the caribou to remove, and this they readily do with the hoof, which is admirably formed for the purpose.

The moss upon which these animals feed is so plentiful beneath this light covering of snow that the caribou keep in good condition throughout the Arctic winter. Not only is this true of the caribou, but all other animal life is found well fed and in good condition—the fox, the hare, the little lemming, the ptarmigan, the fish in the rivers and the seals in the ocean. The great white bear is sometimes met in winter with an appetite which it is well to avoid unless one is well armed; this animal will not attack a person unless very hungry; it is usually as shy as a reindeer at the approach of man.

The plains are bare of everything like trees; low alder and willow bushes not more than four feet high are found along the rivers in sheltered places. These patches of bush are the home of the ptarmigan, which are snared by the women and children.

THE BARREN-GROUND CARIBOU (MALE AND FEMALE).

Drawn by Dr. R. W. Shufeldt.

When the time comes to leave the tundra and go to the coast to make preparations for the whaling season, the Esquimau cuts from the river ice long blocks, a foot longer than the sled and eight inches thick, in which grooves are made deep enough to admit the runners. The sled is placed in the grooves and water poured into them, which freezes solid to the runners; the ice is then dressed off smooth with a knife, rounded on the bottom and curved at the end, and all is ready for the load of caribou. If many reindeer have been killed, some one goes to the village and engages boys, girls, dogs and sleds enough to bring in the whole outfit. They travel about twenty-five miles per day with these loads. All are harnessed to the sleds—men, women, children that are not too small, and the dogs.

E. P. HERENDEEN.

CHICAGO AND THE WEST.

[By a Staff Correspondent.]

CHICAGO, Ill., March 12.—Four days ago there was every appearance of an early spring for this region. Ducks were in over all the marshes of Illinois and lower Wisconsin, and the flight was reported to have crossed Dakota. Then came the severe blizzard of the past week, which has doubtless set the birds back again, though it has not driven them south of the Kankakee marshes in this district. This morning the sky is clear and a warm wind is blowing from the south. The ice will soon be out of the marshes, and probably the best shooting of the season will fall within the coming week.

Numerous small bags, a dozen birds or so, have been made, some as early as the last week in February. The highest bag of the city is that of Mr. Abner Price, who killed 40 ducks, mostly mallards, in four hours' shooting in the timber along the Kankakee River above English Lake Club. The day was bitter cold, everything frozen tight except the mid-current of the river, and the shooting was on a flyway where the birds crossed high over a timber point. Under the circumstances the bag was remarkable, and one hardly to be made by a less experienced old-timer than your uncle Abner.

There will be a good flight on the Mississippi this spring it is thought, and some attention centers there now. Fred Allen of Monmouth is over at New Boston shooting now, and, I doubt not, using with seductive effect one of the new wooden Allen duck calls of which I see so many in town this spring. A Fred Allen call with a wooden barrel seems an anomaly, but it is a corking good call just the same.

A great many geese have been in this spring on the marsh at the head of the Iroquois River, opposite Medaryville, Ind. A few geese are using on the prairie above English Lake on the Kankakee. Two weeks ago there were numbers of geese on the Crystal Lake prairie, along the Fox River system. We get only the "honkers" or Canada geese through here, and their great shyness makes the bagging of one a feat long remembered.

Mention was made earlier of the suits brought against the Horicon Club, Wisconsin, by local shooters, seeking the removal of the club dams on the Rock River in the club marshes. It gives pleasure to announce that the club has been entirely victorious in their suits, the cases having been dismissed and injunction denied. "You don't understand this yet, Judge," said counsel for plaintiff in course of the trial. "Unfortunately, sir," replied the court, "I understand it only too well, and I know you bring this suit as an annoyance to men who are peacefully pursuing their rights on their own land, without harm to others. The case is dismissed."

Mr. Percy Stone promises me a copy of the proceedings in this case, which might be useful if FOREST AND STREAM should be called upon to assist another club, as it did the Horicon, by means of reference to favorable decisions in cases involving the question of riparian rights of clubs which have changed the natural course or conditions of streams or other waters.

It is gratifying to state that the latest advices from J. M. Hutchinson, who met with the sad accident in Florida, by which he lost a part of his right hand, show that the plucky patient's condition is the best possible. The middle finger is gone entirely, but the other fingers will remain useful, and it is quite within hope that the skillful use of the scalpel will not be denied to one once so accustomed thereto. Dr. Huchinson has written up a letter to the boys, using his left hand, but we hope for one with his right hand before very long. Mr. Wilcox, who was with him at the time, says that the Doctor's first remark after inspecting the injured hand, was the cool one, "They've left me my trigger finger, anyhow." He did not lose consciousness at all, though the row to shore and assistance was a long one.

Last Friday there came to trial the novel antelope cases mentioned earlier as brought by Warden Bortree against David R. Shirley, a commission merchant of 160 South Water street, this city. The warden saw a saddle of antelope hanging out Feb. 15, and brought suit under the statute prohibiting sale of "buck, doe or fawn." Defense set up that those terms did not specifically cover antelope, and that an antelope was not a deer, nor a species of deer. Justice Randall H. White held that the statute was good and valid as against antelope, and assessed Shirley $10 and costs. This case is unique in its way, and is useful, though probably a liberal interpretation of a loose statute. Much venison is sold here as antelope meat after the close of the season. This case will stop much of that, and also stop the open selling of antelope meat which has gone on openly for so long.

We need a clause in our law making it punishable offense for a game dealer to send out circulars to the trade inviting shipments of illegal game. Such circulars flood the country now. An inquirer is shown a plain, nice circular, stating that illegal game is not wanted. When the inquirer goes a nice rubber stamp, saying, "Send on your game," is planted across the righteous statement signifying such self-abnegation, and the circular in its improved form is sent out to some country dealer who can get illegal game. Now, give half the fine to the informer. The game dealers of this city cannot trust all the country dealers. They would be afraid to send out a stamped circular. Some fellow out in the country will conclude there is more money in informing than in selling, and a case or two will make South Water street pretty careful.

Until we regulate the buying and selling of game we will never regulate its killing. Our tools are poor. You can't block a wagon with an egg.

On the south side of the city the magnificent buildings of the World's Fair go on apace, and from the car windows as one passes there may be seen more and more proof of the strange days so soon in store for Chicago. What are the sportsmen doing? How about the great international tournament, the many international things? For one thing, the typical hunter's camp planned by the Boone and Crockett Club, of New York, is faring on very well. The management is now seeking for the location of the proper grounds. We shall see the tent, the fire, the simple meal, the plain garb, the evening pipe of peace, and shall in spirit feel the breath of mountain air and hear the whisper of the pines. There will be many of these types of outdoor living, both of white and savage hunters.

There is a weird and fateful spot in Hennepin Club's duck marsh, which is known as the "haunted half acre," and which has earlier come to mention by reason of the many occurrences thereon. He who goes upon this spirit-ridden spot needs care in all his conduct. If he step from his boat upon ground apparently the most solid, let him beware that he do not sink down to his armpits. If a duck be killed stone dead upon the water, let the shooter never turn his back, for when he seeks his bird it will have disappeared beyond the most patient search. This has been known to happen so often that some men will not shoot there at all. There is a tree upon the "half acre," and if a man shoot a duck passing over, it will fall into this tree and hang suspended by the neck beyond the possibility of recovery. One morning a full-grown raccoon was found suspended by the neck in one of the crotches of this tree, stone dead. The coon was thought to have committed suicide, but Charlie Gammon thinks it was climbing after one of his fork-hung ducks, and slipping, met a fate similar to that of the numerous ducks which festooned the forked branches.

The other day Mr. W. W. McFarland, one of our stalwart duck hunters, ventured across this mysterious bit of country. At the edge of the half acre he saw a mink and a muskrat engaged in a bitter fight, and killed them both at a shot. A hawk passed over, and he shot it, but it towered straight up and passed out of sight above, doubtless a spirit hawk. A duck sprang near by, and he knocked it down, but it disappeared, falling near a muskrat house. Determined to investigate this, Mr. McFarland went up to the rat house and looked about it. He found the channel leading into the house, and a show of feathers convinced him his mallard had gone into this hole. Taking a stick, he poked about in the side of the rat house. As he stooped over, his face almost against the house, he was startled to see the clean, intelligent features of a large raccoon protruded from the aperture and gazing directly in his countenance. Not having time to take up his gun, and thinking that this was a spirit coon anyhow, Mr. McFarland availed himself of the only weapon at hand, and spat a large and forceful stream of tobacco juice full in the coon's face, at a distance of about 6in. Great tumult ensued. The muskrat house disappeared in ruins, and as the coon fled, weeping bitterly, Mr. McFarland grasped his gun and slew him feloniously. Then he went home, wondering what would happen next in the haunted half acre, and refusing all suggestion that the coon was only fishing in the muskrat house. Mr. McFarland is certain that all natural laws are suspended in this fateful locality.

Mr. Charles M. Hampson, of Denver, prominent so long in the Rocky Mountain Association, was in town last week for some days.

Mr. S. A. Tucker, of the Parker gun, saw the match shooting in this city last week, and starts next week for the long coast trip. E. HOUGH.

ABOUT HOODLUMS.

Editor Forest and Stream:

So far as New Hampshire is concerned, "Von W.'s" conclusions in the matter of the game vs. the country hoodlum may be very accurate; but to New Brunswick and Maine they will not apply. They appear to me slightly constricted and as if they had been reached by generalizing from the conditions obtaining in a very limited district.

Miss Hardy needs at my hands neither praise nor defense. But since it comes directly in my way, I may remark that in showing up the truth of game matters in Maine she undertook a difficult and thankless task—one that required nerve and a courage born of the convictions that she was right. The person who takes a stand against "the state of things," as Daudet puts it, travels an uphill road. Many more heap abuse on his head than "rise up and call his name blessed." It matters not that he is in the right; the sympathies of fair-minded people who are not in a position to know the facts, are always with the law, and he who takes the opposite side of the question will find it very hard to convince them that he is not selfish and prejudiced.

As I understand her, Miss Hardy does not express sympathy with the hoodlum element. But she claims that in Maine outsiders have interested themselves unwarrantably in the making of laws that are neither fairly nor effectively administered; that these people, in the capacity of summer tourists, violate the game laws shamefully; that the country people think they have as good a right to kill game out of season as the tourist; that in the eastern part of the State public opinion is aroused to such an extent, that many who can fairly claim to be good citizens consider it no harm to kill game out of season, so long as they break none of nature's laws and save all the meat. In the face of the testimony she brings, "Von W." might very well hesitate to place the blame for game destruction on one class to the exoneration of the others.

I believe the variety of summer tourist, which she classifies as the "sport," to be fairly entitled to all the blame she lays on him. Were any additional evidence to that she brings needed, my own observations both in the Maine woods and on the lines of travel leading to them point the same way. One of the worst violators of the law I knew while there was a man who hailed from New York. He shot any kind of game he could find in the month of August, spent his money lavishly, filled up himself, his guides and hangers-on with whisky, gave the landlord of a hotel where I was stopping one Sunday a dollar and a half for the privilege of smashing the reflector of a hall lamp with a rifle bullet, and finally when the officers of the law got after him, made a sort of sandwich emigration, between two days. If that man was a sportsman I don't know where you will find your hoodlums.

One July day a few years ago I stood in a Boston gun store watching a man outfit for the Maine woods. He was what the world would call an "American of the better class." He had with him a Remington-Hepburn .45 rifle and a 12-bore Webley shotgun. He ordered 200 rounds for the rifle and 300 small shot and 50 buckshot cartridges for the shotgun. He told Messrs. Lovell to express both artillery and limberchests to Skowhegan, Me. I know from what I have seen myself and what I have been told by acquaintances employed on the routes of travel that a large percentage of the parties who visit the Maine woods carry with them just such batteries. They do not carry rifles to defend themselves against the fierce mosquito, neither did that man want buckshot cartridges to make war on the ubiquitous porcupine. He intended to spatter any unfortunate deer that would let him come within range.

The summer tourist follows the waterways; the deer come there to feed. Is it at all surprising, then, that when men go to the woods "heeled" like the one abovementioned, many meetings occur which are disastrous to the game?

"Von W." seems to me a little unfortunate in his attempt to fix so accurately the pedigree of the country hoodlum. He will find it difficult to convince his readers of its correctness. I know, and I think upon reflection "Von W." will acknowledge, that the lineage of the hoodlum traces to just as many sources as does that of the people of the North American Continent. He may be of English, Scotch, Irish, German, Swiss, French or African descent, or his pedigree may be untraceable. This is too axiomatic for any one to refute. The worst poacher described by Miss Hardy is, as I happen to know, a Canadian, born of parents who both came from the Emerald Isle.

My acquaintance with Maine is mostly confined to the territory adjacent to the St. Croix waters, comprising parts of Washington, Penobscot and Aroostook counties; from Lee to Houlton, from Vanceboro, east, to Mattawamkeag, west. The staple industries are lumbering, bark peeling and tanning. The bulk of the population live in villages. Though I saw much of the people I made few intimate friends; in the main their ways are not mine. I had little to commend me to them save a civil tongue and a strict attention to the eleventh commandment—"mind your own business." Few of them are rigid upholders of the game laws. Yet, in all the time I spent in these villages and around bark shanties and lumber camps, in which it is only reasonable to presume that the hoodlum element was not entirely wanting, I was never spoken to uncivilly; I never overheard a disparaging or annoying remark about myself or any other stranger. In my intercourse with the people I had but two disagreements, one with a hoodlum, the other with a pair of impudent law officers.

Concerning the innate wickedness of the country hoodlum, "Von W." and I are in perfect accord. I don't deny that he destroys his share of game. But when it comes to assigning him a definite pedigree, or holding him entirely responsible for the destruction of game to the exclusion of the visiting "sport," we differ most emphatically, unless upon maturer reflection "Von W." concludes to abandon these points and come over to my side of the house. L. I. FLOWER.

McDONALD'S CORNER, N. B.

A KENTUCKY CONVENTION.

To the Fishermen and Hunters of Kentucky:

At the last stated meeting of the Kentucky Fish and Game Club (or, more properly speaking, Protective Association), held at headquarters, in Louisville, March 2, it was unanimously resolved that the members of the Kentucky Fish and Game Club and the fishermen and hunters of Kentucky from all portions of the State be called to meet in convention at Frankfort, Tuesday, April 19 next, at noon.

Every club or local organization in the State is invited to send delegates, whether they are members of the Kentucky Fish and Game Club or not. That every fisherman, every hunter, and all those interested in the protection of fish and game will be welcome, and are urged to be present without further notice. It is earnestly desired that every county in the State be represented. The objects of this convention are threefold.

1. To consider and place the seal of approval of every one interested in the protection of fish and game in Kentucky upon the fish and game laws having been and about to be presented to the General Assembly, after harmonizing the changes suggested by several of the clubs throughout the State.

2. To evidence to the General Assembly the character and earnestness of those interested in their efforts to benefit the Commonwealth, and to memorialize them in a body to grant such wise legislation.

3. To become personally acquainted with each other, and map out a line of procedure by which we can assist in rendering effective the laws passed, and uphold them until the public fully appreciate their benefits and cease to violate them.

The farmers of Kentucky are especially invited, that we may perfect the trespass clause of the proposed game law.

Never in the history of the State was there such interest manifested in the matter as now. There will be a large gathering, distinguished speakers from this and other states will address the meeting, all who come may expect a pleasant and profitable meeting. Local clubs will please appoint their delegates (any number) at once, and send list of names to H. C. Forsman, Secretary, 830 West Main, Louisville, Ky., by April 1st, 1892, if possible.

FRANK HAGAN, JR.,
DR. J. B. ALEXANDER,
WM. J. WATKINS,
DR. C. LEWIS DIEHL,
ROBERT J. SNYDER,
} Committee.

J. FRY LAWRENCE, President.

THE ANTELOPE COUNTRY.

Editor Forest and Stream:

Mr. J. F. Eberhart of Chicago, came here last week to do some hunting. I took him out east, ten miles, where we found a bunch of eight antelope, but they were on an open, level country, so it was impossible to get at them. Mr. Eberhart killed eight jack rabbits on the trip, with a .38 Winchester, and proved himself an excellent shot. He had a shotgun along, and killed a few quail. My time was limited, so that it was impossible for me to take him into the antelope country proper. On our return he got a team and drove to Capt. Day's ranch—15 miles up Rocky Arroya, in hopes of finding some deer. Not getting proper encouragement there, he returned the next morning. I think, however, if he had gone into the foot-hills, 4 or 5 miles back of the ranch, he would have had no trouble in finding deer. A ranchman, who lives three miles above Capt. Day's, tells me that he frequently finds deer, within three to five miles of his ranch, in the canyons.

I was at Capt. Day's ranch yesterday, and was told that one of the ranchmen, who lives a few miles above, had lately ridden across the country to Seven Rivers, and on the trip jumped 21 deer. He crossed several of the canyons that run into Rocky Arroya, and passed through the same section of country in which I advised Mr. Eberhart to hunt. Mr. Eberhart took a shotgun with him, and brought in a fine bag of quail and ducks. He expresses himself as being well satisfied that there is plenty of game, such as antelope and deer, in this region, and says that if he could have spent more time, in getting into the proper game ranges, he would certainly have had good sport.

Mr. W. R. Kium, of Chicago, has been here about two weeks, and has had good shooting every day, on ducks, quail and jack rabbits.

The manager of one of the hotels, here, has a young mule deer, a yearling buck, which has become as tame as a kitten. It has, however its own ideas of friendship and social equality. A large mastiff, belonging to one of the boarders, approached it the other day and attempted to make friends with it. The buck resented the dog's familiarity by jumping on him with its fore feet, punching two good sized holes in his shoulder. The dog ki-yied, got out of reach of the deer's cable tow, and has ever since steered clear of its stamping ground.

Mr. Hough alleges, in your issue of Feb. 25, ignorance of the Allard herd of buffaloes. If he will oil up his think machine and give the crank another turn, he will doubtless be able to remember that I contributed to FOREST AND STREAM a brief account of this herd, some years ago. I think it was in '87 that, in company with Mr. Chas. Allard, the owner of the herd, I rounded them up and photographed them. The pictures were reproduced in the *Photographic Times*, soon after. Mr. Allard's ranch is in the Flathead Valley, and his address is Ravalli, Missouli county, Montana. The herd numbered, at that time, 35 head of full blood buffaloes, seven of which were calves, and I have heard from them frequently since, to the effect that they were increasing rapidly, so that I presume there must be over 100 of them now.

Mr. Allard started with four head, some fifteen years ago. He allows them to run at large on the range, and, strange to say, up to the time I was there none of them had ever been killed. I presume, however, that some blooming idiot will yet run across them, some day, and slaughter a lot of them. When I saw them they were somewhat wild, but by riding round them in a circle, for an hour or two, we finally got them quieted, and got within 50 feet of them, at which distance the photographs were made with a detective camera. G. O. SHIELDS.

EDDY, New Mexico, March 3.

MASSACHUSETTS ASSOCIATION.

Editor Forest and Stream:

The monthly meeting of the Massachusetts Fish and Game Protective Association was held at Young's Hotel, Thursday, March 10, President Geo. W. Wiggin in the chair. Fifty members were present. Messrs. F. T. Rueter, S. W. Card. M. J. Kiley, N. S. Hotchkiss, Geo. R. Alley, Arthur H. Alley and Edward H. Osborn were proposed for membership and their application referred to the committee.

Mr. Henry H. Kimball stated that House Bill No. 100, known as the Gilbert bill, allowing domestic-raised trout to be sold during close season on wild trout, would probably pass the House; and he presented the following resolution, which was unanimously adopted:

Whereas, House Bill No. 100 now pending, commonly called the Gilbert bill, allowing the sale of artificially raised trout during the season in which the capture and sale of natural trout is forbidden, is beyond any doubt the most destructive measure to our trout fisheries ever advocated, and most in opposition to what has been the settled policy of the commonwealth,

Resolved (unanimously), That every effort should be made to prevent its becoming a law, and,

Resolved, That a copy of this vote be sent to-morrow to the Governor, the President of the Senate and the Speaker of the House.

Messrs. Frank H. Ricker, Samuel Shaw, James Nicol, J. A. Hartwell, Josiah T. Dyer, Jos. E. Brown, Dr. Homer Emerson, A. C. Lombard, E. P. Libby, H. L. Cornell, E. B. Stearns, Will S. Atwood, Chas. B. Locke, Randolph M. Appleton, Chas. A. Meserve and Chas. H. Reed were elected to membership. RICHARD O. HARDING, Sec'y.

THE WOOD BUFFALO COUNTRY.

Editor Forest and Stream:

I have read with interest the description of the aurochs or European bison, by Mr. Waldeck, and have arrived at the conclusion that the so-called wood buffalo of North America are, in habits and description, identical with the European bison. Of the wood buffalo little is known beyond what information can be gathered from the employees of the Hudson's Bay Co., half-breed and Indian hunters, and occasionally from a hide being brought in for sale. Some persons say that "the wood buffalo are those of the plains, driven into the northern forests to escape the hunters;" but it is reasonable to presume that this idea is incorrect, and, moreover, lacks proof.

1. The wood buffalo were known when the white men first came into the country, and at that time thousands of buffalo were on the plains. 2. They are a larger species of animal than that of the plains, heavier forequarters, longer in the hair and are not prolific. 3. The wood buffalo has never yet attempted to quit the timber and return to the open prairie, which act would be only natural, if they were plain buffalo.

The habitat of the wood buffalo is within an area bounded by the Slave River, Peace River and the heavy timber north of the Salt Plain. In summer it grazes on the short herbage of the open spaces or glades in the forests, and retires in the winter to swamps and muskegs, there feeding on the twigs and small branches of trees in a similar manner to the aurochs. As far as it has been possible to ascertain from the personal observation of the Salt River and Athabasca Indians, but few of the wood buffalo remain. A band was lately tracked and seen, but imperfectly counted, contained from 60 to 70 head. They are extremely wary and very difficult to approach, though odd ones are occasionally killed by hunters in search of moose.

Should any reader be inclined to "*trek*" to the far North in search of what probably are the only specimens of this noble animal in America, I can say that his journey will not be in vain. If the buffalo are not found, there are musk ox, elk, moose, reindeer, bears and lynx in numbers to give both profit and pleasure. The musk ox can be found in great numbers on the barren grounds east of the McKenzie River; these, as well as all those animals I have above mentioned, are seldom hunted, and would give sport to an enthusiast that could not be surpassed either in India or South Africa.

Any information as to hunting, guides, etc., can be obtained from the Hudson's Bay Co., or from George W. Gairdner, a 23-years resident in the Great Lone Land, who now lives at St. Albert, Assa., who will be happy to answer any inquiries. G. P.

QU'APELLE, Canada.

FOREST AND STREAM ADS. DID IT.—Monmouth, Ill., March 12.—*Forest and Stream Pub. Co.:* Stop my ad until further notice, as I have sold everything out clean and can get no new stock to ship until May. My trade has surprised me this spring. Will give you another ad, later on.—F. A. ALLEN.

A VIRGINIA HUNTING GROUND.

GOOCHLAND, Va.—*Editor Forest and Stream:* This county bids fair to become a sportsman's paradise. Commencing fifteen miles west of the city of Richmond, it lies for forty-three miles on James River. It was a large slave-holding county; and while the white population has steadily increased, the negroes have diminished in numbers in a much greater ratio, so that the total population of the county is less than it was in 1810. As a consequence game has increased. Deer are now getting all over the county. It was always famous for partridges and wild turkeys. Now, owing to the scarcity of labor to work our large plantations, the cultivation of creek bottoms is being abandoned, and wildfowl are more abundant in season than was ever known before to any living inhabitant. There is a stream flowing north and south and tributary to the James, in the western part of the county, called Little Byrd, which is filled with beaver, whose dams may be seen in several places. John W. George, E q., for many years our county surveyor, who lives on the banks of this stream, informs me that a colored man brought to him this morning a beaver he had caught last night in a coon trap, not knowing what it was.

An hour or more ago, while sitting in my library, I heard my wife call from the other end of the house. Upon going to ascertain the cause, she informed me that she had just seen a strange gray animal, larger than a cat, with a short bushy tail, run out of a portico and scramble through the bars of an open cellar window into a basement storeroom. Upon examination I found a ground hog—woodchuck—ensconced among the barrels. Of course I did not hurt this harmless harbinger of spring, but set him free in the woods near by.

I wish to invite some of our Northern sporting friends to visit me when the hunting season opens again, and any who can be indorsed by FOREST AND STREAM I shall be glad to correspond with and welcome.

M. OF NORTHSIDE, VA.

WHAT YOUR GRANDFATHER LAUGHED AT.

Editor Forest and Stream:

Here is a copy of the *Farmer's Almanack* for 1836—Andrew Jackson, President; Martin Van Buren, Vice-President; Lewis Cass, Secretary of War. And over in the back part of it, with the other "new, useful and entertaining matter," is this joke at which your grandfather was no doubt highly amused. The *Almanack*, as its title page tells us, is "fitted to the city of Boston, but will answer for the adjoining States." That may apply to Jonathan's yarn as well. Here it is:

"Did you ever hear of the scraps that I and Uncle Zekiel had duckin' on't on the Connecticut?" asked Jonathan Timbertoes, while amusing his old Dutch hostess, who had agreed to entertain him under the roof of her log cottage, for and in consideration of a bran new tin milk pan. "No, I never did; do tell it," said Aunt Pumkins. "Well—you must know that I and Uncle Zeke took it into our heads on Saturday's afternoon to go a gunning after ducks, in father's skiff; so in we got and sculled down the river; a proper sight of ducks flew backwards and forwards I tell ye—and by'm-by a few on 'em lit down by the mash, and went to feeding. I catched up my powder horn to prime, and it slipped right out of my hand and sunk to the bottom of the river. The water was amazingly clear, and I could see it on the bottom. Now I couldn't swim a jot, so sez I to Uncle Zeke, 'You're a pretty clever fellow, just let me take your powder horn to prime.' And don't you think, the stingy critter wouldn't. 'Well,' says I, 'you're a pretty good diver, 'un if you'll dive and get it, I'll give you primin'.' I thought he'd leave his powder horn; but he didn't, but stuck it in his pocket, and down he went—and there he staid"—here the old lady opened her eyes with wonder and surprise, and a pause of some minutes ensued, when Jonathan added, "I looked down, and what do you think the critter was doin'?" "Lord!" exclaimed the old lady, "I'm sure I don't know." "There he was," said our hero, 'setting right on the bottom of the river, pouring the powder out of my horn into hizen."

REIGNOLDS.

BOSTON.

A BUFFALO CHASE IN 1892.—McCook, Neb., March 4.—*Editor Forest and Stream:* I witnessed last week one of the most remarkable feats by a horse I ever saw. "Buffalo" Jones was on his horse Jubar, and desiring to yoke up one of his wildest buffalo bulls (a three-year-old) he singled him from the herd of about fifty others and endeavored to drive him a quarter of a mile to the corral. To say the buffalo was wiry and nimble does not express it, he was lightning on legs. Mr. Jones succeeded in driving him down an embankment into the valley; the buffalo concluded he could outrun the horse, climb the bank and escape. He made a dash up the valley with all the speed that could be imagined, with Jubar flying to cut him off from the bank. Such a race is only seen in a lifetime. A point of the hill came down into the valley and stood directly in the path of Jubar, and must be scaled or he would loose the game. The roll was about 8ft. high and 5ft. wide where it must be crossed. Mr. Jones urged the steed with his spur just as the horse was nearing the critical point and away the flying horse went with a leap and a bound like that of a rubber ball. It really looked as if the horse had abandoned his feet and was flying in the air, as he held up in space so long. It is needless to say the buffalo did not climb that bank that day, but was corralled and yoked up after the most stubborn running and dodging I ever witnessed in my 25 years of punching cattle on the plains. We took a tape line and measured the wonderful leap, which was easily done, as the prints of every foot was very conspicuous. Here it is—from front foot of starting to front foot of lighting, 23ft. 2in.; from hindmost foot of starting to hindmost foot of lighting, 28ft. Then by dividing the difference we have 25ft. 7in. Who can beat it on an up grade as that? Mr. Jones has five yoke of buffalo bulls pretty well broken to the chariot for the World's Fair, and Jubar will figure as the champion leaping and cutting horse of the world.—FRANK W. SMITH.

NORTH DAKOTA GAME FIELDS.—Cando, N. D.—The first flock of Canada geese was seen here March 8. One lone goose was seen on a field and a small flock was seen flying northward. They must have been paid well for their temerity in braving the realms of old Boreas, for the worst blizzard known since the country was settled struck here about sundown and raged all night and until noon next day, when it began to abate its force and blew itself out before the morning of the 10th. It had been preceded by over a week of warm weather and southerly winds, which had probably led the geese to think that their way was open.—E. T. JUDD.

SHORT-BARRELED GUNS.—My 10-bore has three sets of barrels, 30in. full choke, 30in. modified choke, and 24in. cylinder. The last was formerly 26in., and weighed close to 8lbs. Before the barrels were cut I have shot more than one duck with it, good fair shots all of them, although, of course, in going on a ducking trip exclusively I would take my 30in. full choke gun along, still I mention this fact to show what a short 10-bore can do when loaded properly. The gun balances quite well, and as a brush gun it is unexcelled when loaded with 3½drs. of good quick powder, black or nitro, and 1¼oz. shot. I have stopped many an old cock partridge in thick covers, such as are found along the rocky Maine coast near Boothbay, and no thicker or worse place to shoot in exists. I have also shot crows and gray squirrels about as far off with this little brush gun as I could have done with my full-choke. While I should not pin my faith to the 24in. barrels for trap shooting, or even for ducks, I would take it any day in preference to any chokebored gun I ever saw for a field or brush gun. Some of your readers are on the right track when they advocate and use such a gun in preference to a choke.—E. H. F.

A BIRCH BARK FIRE.—I was ducking on the Susquehanna below Duncannon in a rain and sleet storm so cold that my hands became too numb to handle gun or paddle. I made for an island, and on landing found great rafts of drift wood, but so thoroughly soaked that to burn it seemed impossible. A country boy, ragged and miserable looking as well could be, with an old half stock muzzle-loader under his arm and both hands in his trousers pockets came along, peering ahead for "mushrats." Taking in the situation at a glance, he said, "This'll start it," and proceeded to tear from the lee side of a water birch a few handfuls of the shred-like bark. Laying it at the root of a tree and throwing on a handful of wet brush wood, he asked, "Gotter match?" I had. Lighting it he thrust it under the pile and it blazed as though saturated with oil. We burned drift wood and enjoyed life as it is seldom man's lot to enjoy it.—W. H. W.

MICHIGAN LOCAL LAWS.—The validity of Michigan local laws was established by the Supreme Court in the case of Hart, prosecuting attorney, vs. Allegan Circuit Judge. Civilian Cook was convicted in the Justice Court in Allegan county, of killing a deer in violation of act 40, of the public acts of 1891, which prohibited the killing of deer in Allegan and Van Buren counties for the period of three years. The case was appealed to the Circuit, where the judge quashed the complaint and dismissed the case upon the ground that act 152 of the same session repealed or rendered inoperative act No. 40. Mandamus was asked to compel the respondent to vacate the order, which was granted, the court holding that act 152 had no repealing effect upon act No. 40.

MOOSE IN MINNESOTA.—Game is very thick in these big woods, moose predominating. The laws of Minnesota prohibit the killing of this big game for a period of six years from 1891, but still every fresh cruiser coming into this country tries to kill all he can, and succeeds very well in hot weather, when they go into the water to keep away from flies, and as only a small part of the big animals can be used up before it would spoil, the carcasses are usually left in the water to bloat up and float away with the current. Mr. Campbell, a farmer at Big Falls, on the Big Fork River, claimed to have counted the carcasses of twenty-one floating by his place last summer.—*Northwestern Lumberman.*

THE POTTSVILLE (PA.) GAME AND FISH PROTECTIVE ASSOCIATION numbers 140 members, with the following officers: Col. J. M. Wetherill, President; F. C. Palmer, Secretary; Cyrus Sheetz, Treasurer; Trustees—Chas. W. Parkins, E. G Faust, E. G. Hoover, James Russell, Robt. Nelson, H. R. Foster and Chas. Schimpf. Secretary Palmer reports: "We have gained every suit brought against violators of these laws, and are now pushing a case against a December trout fisherman. One man paid $21.75 for one rabbit, another $18.50 for trout, another about $42 for one quail. These have all been reported in our local papers, from which we have received many favors."

ST. LOUIS NOTES.—March 13.—Duck shooting was fairly good last week and part of this week at Queen's Lake, King's Lake, Dameron, Dardenne and Cuivre, and the club members were out in full force. The blizzard on Wednesday drove the ducks back again which had left the warm days previous. The trap-shooters are talking of a big spring tournament in which all the clubs will participate. An elk carcass at the Union Market this week attracted great attention, and the general name applied by the seers was "What is it?"—ABERDEEN.

THE RABBIT SEASON.—Geneva, N. Y., March 14.—*Editor Forest and Stream:* I am very sorry to see that in the proposed new game law rabbits or hares are not protected in this State, except on Long Island. This is a very great mistake, for it gives boys and slaughterers an excuse for being in the fields with dog and gun any time during the close season for game. If the bill is passed in its present form sportsmen will very soon find out that open season for fur is no protection for feathars. Let the close time for rabbits or hare be the same as on birds and all will be well.—J. G. S.

A MARKET IDYL.—It was her first essay at marketing, but she tackled the work with the beautiful hardihood of youth and inexperience. "Have you canvasback ducks?" she inquired of the man in the stall. "Yes, miss, and they are beauties, and mighty scarce at this time of year. An' I've got mallards and redheads, too." "You may cut me off three-quarters of a yard of the canvasback," she said, in her clear, classic tones, "and cut it diagonally so that it will not ravel," and she looked about for the yard stick to see that he did not cheat her in measurement.—*Detroit Free Press.*

A HUDSON RIVER EAGLE.—An eagle was shot on the Hudson near Peekskill last Saturday, which measured about 9ft. from tip to tip of the wings. It will be stuffed.

ADIRONDACK DEER KILLING.—Johnstown, N. Y., March 7.—*Editor Forest and Stream:* Some parties putting in ice at their summer cottages on the shore of East Canada Lake heard guns fired back of the mountain where a well-known yard of deer were wintering, and one of the party found where three deer had been killed, snowshoe tracks plainly showing that the venison had been taken out to Stratford. On his return the head of the party at once drove down five miles to the home of Game Protector Bradley, giving him the particulars. This killing so close to the home of the protector was a double insult and we naturally looked to efficient and instant action on his part, but we are sorry to say that he moved very slowly in the matter, never followed to the place where every one living around the lake was sure they were taken, and it looks now as though, as in a similar case last winter, no one will be brought to justice. I have been of the opinion that Mr. Bradley did fairly well as protector, covering so much ground, but these violations so close to his home show him to be very inefficient, which greatly disappoints his friends in this section.—M. S. NORTHRUP.

SPRING SHOOTING AND WILDFOWL.—*Editor Forest and Stream:* It may seem rather strange to many of your readers when I assert that five years since where mallards could be found by the thousands they now can only be found by the hundreds. This statement will apply to the entire southern coast where the wildfowl seek a winter resort. The season for duck shooting in our State practically closes on Feb. 14, as all species of wild ducks seem to begin love-making about that time, and by the 1st of March are bred and unfit for the table. The mallards have commenced their homeward flight to the land where their happy broods are reared to gladden the sportsman's heart again during autumn's bracing months. Spring shooter, please spare the mother that rears that happy family of little ducklings, and you will be rewarded tenfold ere another merry Christmas.—TRINITY.

ELK FOR THE CATSKILLS.—The New York *Times* reports that the large park at Furlough Lake, in the Catskills, owned by George J. Gould, received some important guests last week from the West. They are four large Rocky Mountain elk from Wyoming. These elk, which are fine, large specimens, were captured four months ago near a small settlement 125 miles from a railroad. It took four months to tame them so they could be led to the railroad.

EARLY WILD GEESE.—Lockport, N. Y., March 9.—Mr. Norman Pomroy reports seeing four wild geese flying over his farm yesterday, going west. This is six days earlier than any previous record I have. Mr. Pomroy is the party that has the flock of thirteen *Branta canadensis* which I have heretofore reported to FOREST AND STREAM. Those seen yesterday were probably attracted over his place by the "honking" of his geese.—J. L. DAVISON.

LONG ISLAND WILDFOWL.—East Quogue, L. I., March 11.—At present there are thousands of blackheads and some redheads in the bay; and the outlook is good for having lots of geese here this spring, as there is plenty of feed in the bay. This is something that has not been here for several years past. There will be some great shooting here this season, we all think.—L. E. HOWELL.

Camp-Fire Flickerings.

"That reminds me."

JENNIE was *petite* and very amiable, her hair was of the hue of the chestnut, perhaps a shade darker. I never knew the exact color of her eyes for she always had them concealed, but I thought they were windows through which the amiability of her inner life was reflected on an outer and often unkind world.

I had foolishly believed that nothing could disturb Jennie's equanimity, and I was strengthened in this by the long suffering patience with which she had borne many trials, and endured labors which seemed far beyond the strength of her fragile form.

Alas! the ill-omened moment which was to undeceive me was at hand. Mr. Brown, of New Berne, N. C., and I were behind, Jennie was in front; we were passing the splendid grove of pines which grace the entrance to the Lake Pocosin, not far from Hancock station on the Atlantic & North Carolina Railway. Casting our eyes upward we saw on the top of a sweet gum tree a great hawk. We could see every spot on his breast. He never moved, for his cruel eye was fixed on a flock of doves perched on the neighboring tree, or on some larks disporting in the sunshine of a December day.

Mr. Brown had his gun with him and deliberately raised it to his shoulder, and forgetful of Jennie fired. The hawk fell, but Jennie's disposition at that moment changed. Gathering up herself as does the hare when it is about to make a desperate leap for life as it hears the panting hound close at its heels, so Jennie made one spring and suddenly starting forward broke the whiffle-tree of the wagon in which she was hauling us. By main force, for the reins were strong and Jennie was not so vicious as some other mules, she was held, and in fact what once bid fair to be a tragedy became a comedy, as we were greeted by many a hearty laugh from our companions, who stood at the door of the plantation house and observed that Jennie was drawing us home by the aid of a single trace.

EDWARD JACK.

A Nevada hunter spent three months looking for a grizzly bear, and the man's relatives have spent three months looking for him. They think he must have found the bear.—*Texas Siftings.*

A Lewiston, Me., Frenchman, while lauding the rabbit as an article of food, delivered himself as follows: "You take one rabbeet and skin him, and I just as lief have a chicken."—*Exchange.*

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth. 220 pages, price $2.50. For sale by FOREST AND STREAM.

Sea and River Fishing.

Angling Talks. By George Dawson. Price 50 cents. Fly-Rods and Fly-Tackle. By H. P. Wells. Price $2.50. Fly-Fishing and Fly-Making for Trout. By J. H. Keene. Price $1.50. American Angler's Book. By Thad. Norris. Price $5.50.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

TARPON LUCK.

ABOUT the middle of February I went to Florida for a two-weeks' sojourn among the tarpon and deer on the southwest coast. The sport exceeded my fondest anticipations. After the regular routine work of a couple of weeks sitting in an open boat, with an umbrella, novel and two tarpon lines out, I hooked and landed a "silver king," the monarch of Florida waters, and the embodiment and ensample of all royal sport.

After that my guide and I did not stick so closely to business. We often lay around camp for a couple of days fighting the few sand flies that had begun to appear, waiting for a return of exhausted energy.

From Tampa I wrote one day to Bill, and having a mild attack of the so-called "blues," feelingly described to him my lonely state and in the abstract the blessedness of communion with one's kind. A week brought me the unlooked-for but characteristic reply, "Wire me where to meet you." With this request I promptly and cheerfully complied, and on March 12 greeted the old man with feelings probably somewhat akin to those with which Robinson Crusoe received the overtures of Friday. Great Scott! Then I realized how lonely I had been. Let any one try confinement in a small sailboat or rowboat for a month with a guide who is scarcely companionable, much less sociable, and such an one can picture the situation.

Bill had brought a complete new outfit, purchased from the best New York dealers, and we took the sportsman's delight in overhauling his baggage. The next day we made a fresh start. With two guides in a small sailboat and skiff in tow, we began a cruise down the coast. Our outfit consisted of four 7-foot bamboo tarpon rods, each rigged with a reel and 300yds. of Hall's 18-thread line, and the regulation tarpon hook and wire-cored snood. This snood is rather heavy for sharks to bite off, but safer than the cotton-wired snood. Besides which we each had an 8-ounce fly-rod for the capture of smaller fish, notably mangrove snappers, harpoons for sharks and sawfish, .32cal. Winchesters and provisions for three weeks.

Down Tampa Bay, past Manatee River and Sarasota Bay took us the best part of two days, as the wind was of no use for propulsion. Quarters, too, were somewhat cramped on board, and when the fourth day found us in Charlotte Harbor it was with considerable relief that we landed and built a palmetto camp a couple of miles below Alligator River.

That first night in camp was worth two years of life. It was Bill's first experience of Florida, and he was enthusiastic. We had eaten part of a big channel bass for supper, had smeared our respective faces with tar-oil, had lighted our pipes and lay on our blankets beside the camp-fire. Night had come down like the drop-shutter of a camera, as it always does in this latitude, and the day beasts and birds had given place to night hunters. The moon was about half full and stood squarely overhead. "Quawk," said the night heron, passing close over us; "Hoot," said the owl behind the shanty (but I never yet heard an owl say "hoot," it's an unspellable gurgle); while the coons in the mangrove swamp back of us made no end of a row. The guides were out wading with a 50yd. gill-net after mullet, whose silver sides in death were destined to a noble purpose: to lure the royal tarpon. That was an exceedingly long pipe, and the silence between us lay unbroken till naught but ashes remained.

"How will you like your two weeks' breaking in!" I said.

"The tarpon are in, a light southwest wind which means east in the morning, and fresh bait," was the answer.

"No such luck."

"Probably not, but I'll bet fifty cigars."

"I prefer a pipe on the water, besides no betting on a certainty."

"Isn't one just as likely to catch one the first day as the thirtieth? I'll take the sailboat to-morrow and go to the west side of Pine Island, Big Pine, and you go down the coast here with the rowboat."

This was agreeable, and when the guides came back, about 9 o'clock, with twenty mullet, we all turned in.

Trivial annoyances, by frequent repetition sum up to the greatest trials. Getting out of a comfortable bed may seem a trivial annoyance: and palmetto leaves make good mattresses, and it requires only a little practice to appreciate them. After breakfasting on the remains of the channel bass we sought our respective fishing grounds, and I saw the sailboat disappear round the north end of Pine Island just as the sun rose. The wind was easterly and light, and all indications were favorable. Nevertheless the day passed with me as many such days had passed. The monotony was only relieved by occasionally reeling in 50yds. of line, changing the bait and trying to beat my last cast. Once a shark ran out 100yds. of line, and we had to pull anchor and row after him, but he was a big fellow and broke away with a third of my line, the wire snood proving too tough for him. I sat all day under my cotton umbrella and finished "Endymion."

At 5 o'clock Bill and the sailboat appeared crawling round the point before the light southwest breeze. At the time I thought I saw a sort of halo about the boat; it was not profanity; but my imagination is vivid.

I sat on the shore in front of camp and watched Bill's oncoming. Tarpon fishing teaches patience. He arrived an hour after dark and tied the sailboat a few feet off shore, using some vigorous language about the wind.

"Well, if they were in yesterday they seem to have left us to-day."

"Humph," said Bill, standing by the fire lighting his pipe.

"Did you see any around your way?"

"One," said Bill.

I smelt a rodent and asked him how much it weighed. He said he didn't know, which I expected, as he had no scales.

"How long was he?"

"Is he, you mean; bring your measure."

We put the gaffhook under his gills and dragged him out of the sailboat, across the beach up to camp. He measured 6ft. 4in. over all, and easily weighed 140lbs. Bill's guide had stood dumb as an oyster during the proceedings. He was my former protegé whom I had without reluctance detailed to Bill, as he did not mind solitude in another's presence. He now delivered himself thus, "Played him like Captain Randall." This heaped over Bill's cup of happiness.

After a hasty dinner eaten in silence we stretched out by the fire, first hanging up the big fish as food for the eyes, and Bill began:

"We got down to work about 9 o'clock, with the tide dead low, and in four hours, when the tide was at its best, the reel ran off about forty yards and he broke water mad, throwing up barrels of it and making for the bay, apparently not going to stop this side of Sanibel. He had made four jumps aad seemed solidly hooked, when we got after him as quick as possible. Great Scott! How he tore the line out, spite of my best pressure on the brake. He got out a good 200yds. before I could get any control, so that the weight of the line alone would have been troublesome. During a momentary pause I took a furtive look at my watch to time the beast—20 minutes past one. Well, by hard rowing we got him reasonably close to the boat, when he commenced his short skips and rolled the line around himself so that I had to give him his head to shake it off. Then he began his eternal nagging and jerking, which, as I was too excited to sit down, pretty nearly upset me. In an hour we were somewhere near the middle of the bay and had him down to close quarters; he couldn't jump more than half out of the water. During these proceedings I became as wet as if I had fallen overboard. I nearly struck a snag when he began dodging around under the boat and had to hand Sam the rod for a few moments' rest. Then I took him again and put on my best strain, and a big silver log floated up astern of us, made a 20ft. run and came to gaff—just an hour and twenty minutes. We didn't fish any more, been taking us ever since to get back here."

"Well, Bill, I always said you were the luckiest man on earth; a green hand landing his first tarpon on his first day, and a big fellow, too; absurd! Sure Sam didn't do the handling in those 'few moments' that you were resting?"

Sam promptly repudiated the insinuation.

"Well, allow me to tender my congratulations; ably done, sir. By the witness's statement it could not have been better."

There is an example for you of what actually occurred and does occur every spring. The average luck is perhaps one a week. Two or three tarpon may be taken every day, and then again one in a month, as was my first experience. N. W. M.

ROCHESTER, N. Y.

A BIG THING ON ICE.

SOUTHBORO, Mass., March 8.—I have seen in most every issue of your paper this winter, short sketches descriptive of pickerel fishing through the ice. It has been very interesting reading to me to note the different kinds of traps or tackle advocated. I have done more or less ice fishing for the last twenty-five years, and my experience has been that in the mere matter of taking the fish (provided of course the angler pays strict attention to the two essentials in fishing, *i. e.*, keeps the holes free from ice, and the liveliest minnows on the hooks) it does not make much difference whether one uses the primitive bush with the piece of red flannel tied to the line, or the most improved spring trap. Strict attention to business will probably land as many fish in one way as the other, but I don't think the bush quite so convenient nor so pretty in its workings as the spring which throws the flag high in the air, so that it may be seen a long way off.

For twenty-five winters I have driven holes through the ice in most every part of New England for that tawny tiger of our waters, but never until this past winter did I realize how much pleasure and comfort combined could be crowded into a day on the ice. One evening early last winter, a party of six fishing cranks got together for the purpose of devising some scheme tending toward comfort and convenience on the ice during the winter fishing, and the result was, I think, the most complete, compact barge (suitable for both winter and summer work) that benumbed and weary angler ever regaled himself in. A short description may interest some of your readers. The body proper is 10ft. long and 4½ft. wide, the roof projects 1ft. at each end, forming hoods which add to its proportions. The sides from floor to plate are 5½ft. high, the roof is arched, and its highest point from floor is 6ft. The roof is made of ⅛in. narrow whitewood boards matched, covered with heavy drilling and thoroughly painted. Extending 1ft. from the plate on each side is a whitewood board wide, with 3 lights of 8×10 glass which serves sufficiently to light the interior when the ends are closed tight, and also allows a survey of your traps while taking inside comfort. Joining the 12in. whitewood board, and like it extending the length of the barge, comes a strip of heavy canvas 3ft. wide, securely fastened to a light hardwood frame which is hinged at the top and can be raised to any angle, thus forming a splendid awning for summer use. Beneath the canvas is a ⅞in. whitewood board 18in. high which forms the base of the body. The floor is made entirely of spruce, the frame being 2×3 scantlings firmly bolted together, and the floor proper being clear, ⅛ spruce matched. The ends are protected by canvas curtains which can be drawn perfectly tight, or thrown back for freer circulation. A small camp cook stove rests upon a sheet iron oven in the front end, (3in. pipe running 15in. through roof) and the driver's seat makes an admirable locker for wood and kindlings. On each side are individual lockers for four, they also constitute the seats at the table.

The table, which is the pride of the "ex-member of Congress," is a double-decker and works upon two upright gaspipes, it lowers to the proper height for eating or "old sledge" purposes, and when not in use is raised to the roof and is wholly out of the way. One roomy locker is zinc-lined, and in winter carries the fish nicely, and in summer it could be used as a cooler. Proper receptacles have been provided for shovel, broom, axes and ice chisels, also for kettles, plates, cups and saucers, knives and forks, in fact everything necessary for the comfort and rapid filling of eight or ten hungry men. It is very light, and a pair of good roaders will carry it (good sleighing or wheeling) six or seven miles an hour easily. Five minutes will suffice to change it from runners to wheels or *vice versa*. Its advantages are many, its cost trifling, and with proper care it will last many seasons.

Our most pretentious trip with it this winter was to Moosehead Pond, in Princeton, distant from this borough 30 miles. The sleighing was execrable, but nevertheless two horses took the barge and three men to a farmer's near the pond in about seven and a half hours. The other members of the party went by rail, and were there to welcome us. We retired very early, and not until morning did we realize that the hospitality of those people had prompted them to yield all their beds to us. We shall never forget that. Quite early in the morning we were all raised bodily from our beds by two or three fish-horn blasts which fairly made the sides of the house bulge.

Nate, the genial "hired man," had adopted that easy-going method to let us know it was nearly 5 o'clock. We were dressed when Nate announced that Henry was ready with horse and pung to take the advance guard to the pond. We decided the night before that four of us should start early, so as to have the holes cut and the lines set before daybreak, leaving the driver to follow with the barge and cook later and give us a hot breakfast.

A few minutes placed us upon the ice, and quite an expanse it was, the pond contains 130 acres. The location was soon selected, the traps distributed at proper intervals and soon the woods and hills echoed to the rapid "chuck" of two keen chisels. Two cut and cleaned out the holes, and two followed, set up the traps, sounded the depth, baited, and coiled the line near hole and trap. The morning was not very cold, but the water was, and those who baited the lines concluded that the chiselmen had a "cinch" on them. However, the work progressed very rapidly, and as the eastern clouds lightened up sufficiently to discern objects 20yds. away fifty traps stood ready to give the signal at the "strike" of the fish.

We hear a shout, and turning in the direction of the sound, see the barge come swinging on to the pond at a lively trot and heading directly for us, a long stream of smoke and cinders flying from the funnel, which indicated that the cook had been awake since the fish horn solo. As early as the barge reached us (and it was hardly clear daylight) we called their attention to the fact that four pickerel had already rewarded our efforts.

The driver detached the horses and took them to a nearby barn, and when he returned he shouted the welcome news that "Breakfast was ready." And what a breakfast that was, words of mine fail to do it justice, and the coffee and Deerfoot Farm cream—and the cook, just let me devote a few words to him. He is not an imported *chef*, but to a man we will back him against Mr. Vanderbilt's foreign article, everybody on the pond said so, and there were many there besides our party. And his urbanity and endurance were simply marvelous, from early morn till late in the afternoon we stood in that barge and dispensed hospitality with a lavishness that would have put a "billion dollar" Congressman to the blush. Let me enjoin all parties who in the future may follow our example to see to it that your cook understands his business, for upon him more than any one thing depends the success or failure of your outing.

Well, for two days we rang the changes on those pickerel, and our success was all that we could ask for. We got no large ones, but they ran very nicely for the table, and were extremely handsome in color. The trip and everything pertaining thereto was a fitting climax to our season's sport, and we voted our barge an unequivocal success. J. W. B.

BASS OF THE CHAGRIN.

ONE who has never fished for small-mouthed bass in a woodland stream under beech and oak boughs dressed in the rich foliage of autumn knows not the pleasure of bass fishing.

We left the city one day last fall on the morning train over the C. C. & S. road, and before 9 o'clock had reached the "Falls" village, where our friends were waiting for us with team, lunch, minnows and all the paraphernalia for an enjoyable day's outing.

Our ultimate destination was one of the last branches of Chaprin River, about six miles from the village, and our ultimate object was small-mouth black bass. We were in the midst of the most picturesque scenery of northern Ohio, and for most of the distance our way was along the narrow crest of a high ridge, which descending on either side formed wide valleys, which rising again rolled away in billows of high hills, so far as the eye could reach the view extending for miles on either side. The crops were all harvested, the corn was shocked in the fields and already brown from the touch of the early frosts. The cattle were roaming over the meadows endeavoring to eke out the fall feed in the pastures, which was growing scarce for want of rain, but the whole country was brilliant with autumn colors.

We reached the stream where it was crossed by the highway after an hour's drive, and turned into the yard of a deserted farm house standing close to the stream by the roadside. Two farmhouses with their outbuildings were in sight which a few years before had sheltered large families but now stood deserted with their windows and doors boarded up, the original proprietors and their descendants having passed from the scene, leaving the land to non-resident owners, probably the result of the pressure of heavy mortgages on light farms.

We were in a quiet valley, beyond the sound even of the locomotive whistle, with no buildings in sight save these deserted homes, which only intensified the quiet and seclusion of the place.

It took but a short time to adjust rods and lines and get to the banks of the stream for the first cast.

The stream at this point was not more than 30ft. in width and was made up of deep pools between the ripples. The one we reached first was long, but too shallow and exposed, for while the bass were there in plain sight we were in plain sight of the bass, and not one would touch the minnow. So we pushed on up stream and into the woods until we found a well-shaded spot with water deep and cool. On the first cast here the minnow had no sooner touched the water than it was seized by a hungry small-mouth, who made the line sing through the water and the split bamboo bend double before he was brought to grass under the willows bordering the pool. Here, concealed by the deep shadows of the overhanging willows, we could see nearly every

strike as we cast out into the pool, and had fine sport until long after the usual time for lunch. Finally, very reluctantly, the love of sport yielded to the demands of appetite.

How good that lunch tasted as we munched it sitting on the grass beside the wagon in the shade of the old deserted barn, and how quiet and restful it seemed to us after the rush of the city and the contentions of the court room.

After luncheon we started up stream, trying the waters for a mile or so, casting in the deep pools and occasionally taking a bass. The most of these were caught in small pools not more than 5 or 6ft. across, made by the current of the stream under the roots of large trees standing on the banks. The water was clear running spring water. In fact, we were fishing in one of the very few streams of northern Ohio, which were mentioned by Judge Potter in his letter to FOREST AND STREAM some time since. And taking small-mouth bass out of the same pools from which the Judge and the late Dr. Garlick took trout half a century ago.

The small-mouth bass are not natives of these waters, but are the result of stock placed in them some years ago by Messrs. Williams and Stranahan, of the village of Chagrin Falls.

They are not large, the heaviest caught weighing not more than 1½lbs., but they make up for size in gaminess, as they are long, slim and very active.

In form and color these bass differ very much from their brothers which I have caught off the reefs near the islands in Lake Erie, the lake bass being much thicker through the shoulders and heavier bodied for their length, and very much darker in color, many of them marked with stripes almost iron gray.

This is the same difference which, in a late issue of FOREST AND STREAM, was spoken of as being peculiar to wide-mouthed bass caught in different localities. And it has always seemed to me that this difference was the result of the conditions surrounding the fish or nature adapting herself to the situation. In the deep waters of the lake and on the limestone reefs the bass grows stocky, powerful and dark in color, while in the cool, running spring water of the stream he becomes slim, lithe and active. Still this may be only fancy, for occasionally we caught sight of a big fellow as he moved around in the dark corner of a deep pool, that no amount of coaxing would induce to bite.

The afternoon passed quickly, and all too soon we had to return to the village to catch the train back to the city, which we did, arriving home in time for a 7 o'clock dinner, thus adding another red-letter day to our list, the memory of which is a pleasure to this day. A. W. L.

CLEVELAND, Ohio.

CONNECTICUT TROUT.

Editor Forest and Stream:

Possibly trouting yarns may be a little out of season, but surely not out of order, so I wish to ventilate my views on the subject with the rest. As I look over the correspondence in the columns of your valuable journal I notice nearly all the sport with rod and gun is located outside of Connecticut.

Now, I have a word to say in behalf of our little Nutmeg State, and being withal an ardent disciple of old Izaak Walton, I wish to convince the many readers of FOREST AND STREAM that we are not all novices in the gentle art. I think the account of our big trout given in the New York *Sun* of July 26, 1890 (a partial list of that season's catch) is a record hard to beat. Our streams abound with genuine *Salmo fontinalis*, large and gamy enough to satisfy the most exacting angler; in fact, the trout of Connecticut may not be as numerous, but they average larger than any other of the New England States. During the open season from April 1 to July, there are the usual swarm of anglers upon most of our streams, but as the experienced fishermen are in the minority, the fish are really more scared than hurt; but still we have our share of good anglers who can get there with the best of them. During the close season our interests are well looked to by our wide awake game and fish warden, Zebulon Robbins, Esq., but owing to the nature of the country and the great number of small streams, as a matter of course some illegal fishing is done in the early spring before the open season.

The old town of Plainfield is the favorite stamping ground for the sportsmen of our locality. The country roundabout is intersected by a complete network of natural trout streams, and among the best of these is Mill Brook, always noted for its large trout. Ah, the sport I have had whipping the waters of that grand old stream; sport nearly always shared by my old chum, Fremont D. Palmer, a genial companion and ardent sportsman. How vivid in memory are the events that transpired in our last summer's outing; how pleased to recall that beautiful May morning when sunrise found us upon the banks of our old favorite stream, where we were nearly always sure of a full creel. This day its waters were fairly teeming with the beauties; as we entered the woods below the upper meadow we found a veritable playground for them; it being a warm, still morning, the gnats and wood flies were thick upon the water and the trout were busy reaping the harvest.

Their splashes resounded in all directions; now close to our rods and then faintly heard further down stream, their playful leaps causing circling waves, which, meeting and intermingling and growing larger with each receding wave, at last died away against the banks. Now and then a larger ripple is seen as a noble trout leaps clear of the water and falls back into the stream with a resounding splash.

Ye gods, what a sight for a sportsman to behold! Well, Freezy and I drew a goodly number of these playful fellows to land before leaving the woods.

There is a deep silent pool at the edge of these woods, and being a favorite spot there is always a friendly rivalry between chum and me as to which shall reach there first. This day we fished it shoulder to shoulder and landed five lusty trout, three for Freezy and two for the scribe.

These were taken with (now don't turn up your nose, my fancy fly-caster) worms, as the overhanging boughs would not admit of fly-casting.

The little meadow below furnishes rather indifferent fishing, as the stream runs swift and shallow, but just below where it skirts the edge of an old maple swamp is the very cream of the sport, the stream taking a winding course is a succesion of sharp turns and sandy shallows, causing numerous deep holes and eddies, regular trout pockets so to speak, grand lurking places for the big ones.

Upon entering this angler's paradise we determined to go over the ground slowly and carefully, and what fun we did have, from bend to ripple seldom failing to take at least one good trout from each eddy.

It was here an incident occurred, which, so to speak, broke me all up. At the last of these little pools Freezy at the opposite side hooked a large trout, and as the fun became interesting he yelled "I have something besides a shiner, this time" (this in reference to an episode that occurred on a former visit to this pool). "So have I," I called back, as I received a vicious tug at my line. We both reeled in together and landed just one trout between us, which, upon investigation, proved to belong to chum, the fish having in one of his desperate rushes in some way became entangled in my tackle. Wasn't he a beauty! 1¼lbs. My feelings were not a whit relieved upon seeing the provoking grin upon Freezy's face.

Leaving chum at this pool I crossed the road and walked down to an old willow tree, at the foot of which is an old mossy rock, around which the water sweeps, forming a splendid little eddy. This usually being a lucky spot, I felt sure of my game, and was not disappointed, the trout was there. Dropping the coachman lightly into the calm water below, I drew it gently up across the ripple once, twice, thrice, when at the third cast a dark streak shot out from behind the rock straight for the fly. With a quick turn of the wrist I planted the hook deep in his jaw and soon brought him exhausted to land, ¾lbs., and as plump as a partridge.

It now being near noon and quite warm, we sought a cool, shady spot to eat our lunch, and as we reclined at ease upon the greensward, the murmur of the brook at our feet, the birds flitting among the foliage overhead, and the green woods and meadows outlined against the blue hills, never before did I so fully realize the free and joyous life of the sportsman. After an hour's siesta we arose and went at the fun once more.

From here our objective point was west of the roadbed of the N. & W. R. R., well down toward the mouth of the stream, which ends at the pond in the little village of Packersville. This part of the stream widens out into a succession of broad, deep pools, and oh, my, what a record they have gained for large trout! Just where the stream enters the pond a trout was taken by Hiram Miner last spring that weighed 3lbs. 4oz.

Finding two or three live Dobsons or helgramites in an old can, left there by some fisherman of the day before; by way of experiment I attached one to my hook, and casting into a small pool where I had failed to coax a rise to my coachman, I hooked and brought to land a trout of 1lb. 6oz. Did any brother angler ever try this bait for trout? Just below where the Chapman Brook forms a junction with the main stream is a deep, black pool, as gamy a looking spot as ever a sportsman beheld. At this place chum took the last and largest trout of the day's catch. Upon hearing an excited exclamation from Freezy, who was busy at the aforesaid pool, I turned and soon realized that he had all the business he could attend to. Surely he had the father of them all. Great Scott! how that trout did fight; he made a bold rush for the opposite side of the pool, but Freezy turned him and guided him back; then away he went up and down, back and forth, in a series of evolutions that would have surprised an acrobat; once he leaped clear from the water, and I thought he was a gone fish that time sure. It was pleasure enough for me to watch the eager sparkle of chum's eye and the varied expression of his countenance as he surged back and forth at the side of that pool bound to win or die. But at last the struggle ended, and with aching arms he drew his fish to his feet, and reaching down gently lifted him from the water. What a beauty! 2lbs. 8oz. in weight. How his crimson-spotted sides did glisten as he lay quivering among the leaves and ferns!

It being now near dark and having some distance to go, chum and I unjointed our rods and reached the depot in time for the home train, well satisfied with our day's short. E. M. BROWN.

PRESTON, Conn., Feb. 10.

BOSTON ANGLERS.

A SHADE of gloom will be cast over the minds of many of the angling fraternity to learn of the death of Mr. Eugene H. Clapp, of Boston Highlands, which took place at his residence on Sunday morning. Mr. Clapp was 48 years of age, and as many happy hours of his life had been spent at his favorite pastime as usually fall to the lot of an intensely busy man. He has been a regular visitor to the Rangeley Lakes for many years, rarely missing a season altogether, and often paying two visits in a year. He was a dear lover of the rod and reel, and the capture of the monster trout, for which the Rangeleys are celebrated, was his especial delight. The annual trip of the Eugene Clapp party was one of the regular features of the season, and it has been often recorded in the FOREST AND STREAM. This party has many times been made up of Mr. Clapp, Mr. George W. Wadsworth, Mr. C. E. Haskins, Mr. W. Paine and a brother of Mr. Clapp, and these merchants will especially miss the genial Eugene when the ice is out and the trout season is at hand. Mr. Clapp was a lover of angling and a remarkably successful business man. He started with very little of the goods of this world, a country boy, with the love of the fish rod as strongly engrafted as that of making to himself a competency, and neither passion has ever been entirely sacrificed to the other. He comes to his grave worth nearly a million dollars, and yet never has the trout season come to hand but what he has yielded to its gentle persuasion, packed up his rigging and started. He has frequently been afishing when his time must have been worth hundreds of dollars a day in his business; but there were the trout to be caught, and they could not be resisted. One peculiarity of his fishing was his utter disregard of his tackle; that is, at times when he was hooking a fish or playing one. His friends say of him that his going afishing was a godsend to the tackle people, and that in later years the selling agent of one or two of the tackle shops has usually followed him on his trips. His success in taking the giant of the Rangeleys has been good at times, while at other times the rigging has had to yield. Mr. Clapp always felt the full advantage of his fishing trips to himself, both mentally and bodily; but alas, his periods of rest have been all too short, though constant each year, and he has fallen a victim to apoplexy, brought on by over work.

His Excellency Gov. Russell, of Massachusetts, with one or two of his staff, has stolen a few days from the cares of office for a trip to the home of the Commodore Club, on Moose Pond, in Hartland, Me. The club house was also visited last week by several members, all prominent Boston merchants. Among the number was Mr. John G. Wright, prominent in the wool trade; Mr. E. A. Adams, agent of the White Star and Red Star steamer lines; Mr. W. V. Kellen and Mr. G. W. Hasting, plate glass dealer. Mr. Wright says that this trip was largely to look out for the interests of the Commodore Club in the way of restocking the lake, though they doubtless should set their lines and try ice-fishing.

I hear that a new fish and game association has been formed in Boston for the purpose of leasing and controlling lands in New Brunswick, though I have not yet investigated the matter. It is reported that Dr. Heber Bishop is to be president, but only till the club is well on its feet, since he is devoted heart and soul to the interests of the Megantic Club. It is reported that the club is to lease and control for ten years some 10,000 acres, including lakes and streams. SPECIAL.

BOSTON, March 14.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

CHICAGO, Ill., March 9.—Mr. J. L. Wilcox of this city is now having mounted a 16ft. sawfish captured on his late trip in Florida. This is said to be the largest specimen taken in those waters. A number of the young, alive, were found in the body of the fish upon opening it.

The Chicago Fly Casting Club now numbers 50 members. Membership cards will be engraved, entitling bearers to practice in the city parks.

Expressions of opinion would be welcomed as to the proper length of fly-rods to be used in amateurs' tournaments, also to the weight. A gentleman speaks of using a spinning bait or a "small frog," on a "fly-rod." To me such terms seem incongruous, and a man who would actually so use an actual fly-rod would, it seems to me, be committing a desecration which good angling could not forgive him. The Fly Casting Club should make prominent among its rules one prohibiting the use of bait on a fly-rod. Then the novices may learn to catch fish on a fly.

The cold snap promised may freeze up the lakes again, and permit the old slaughter of bass by ice fishing. Let us hope for an early thaw. During the week the ice has been so rotten that planks were laid out by the market fishers to keep them up as they plied their trade. This is legal after March 1st. One man took 148lbs. of black bass in one day.

March 12.—The committee on protection, of the Kankakee Association, pursuant to earlier plans, yesterday went down to English Lake Club house to meet Hon. W. T. Dennis, the Indiana Fish Commissioner. There were present Messrs. Thos. C. Edwards, W. P. Mussey, A. H. Harryman and E. Hough of the committee, also Mr. Abner Price, president of the association. Mr. Dennis brought with him Mr. Borders, of Winamac, Ind., an attorney and sportsman who has rendered valuable help. A plan of action was at once formulated, and before this appears in print, it is thought, there will have been made an efficient raid on the nets that infest that portion of the Kankakee. Warden F. L. Buck will be sent down to locate the nets and county lines, and should start down the river next Monday night. Mr. Borders will have affidavits ready, sworn out in the circuit courts, and not in the worthless local justices' courts. By Wednesday the deputies will be seizing nets, unless the cold weather holds back the fishing. These operations are all in Indiana, and Mr. Dennis will be the prosecuting witness. The warden sent by the association will merely investigate and get facts. Mr. Buck will run the river and look after the fishways when done with the net work.

Mr. Dennis we found a very pleasant gentleman, with hair and beard silvered by years that have touched lightly as they passed. And now a bit of information. Who does not remember the old "Kingfisher" party, and who is there has not followed Dan, Old Knotts, Old Grizzly with pleasure after "Kingfisher's" fluent pen? Yet who knows who ever "Kingfisher" is? I shall tell that. "Kingfisher" is Mr. J. L. Hickman, of the Cincinnati Post Office, and "Old Grizzly," his long-time friend and companion on the Tippecanoe, is none less than Mr. Dennis himself, Fish Commissioner of Indiana, because he loves bass more than he does money.

On the 1st of June, if weather and fate permit, there will be a boat and tent party start from Ora, Ind., on the Tippecanoe, which will follow that lovely stream as far down as Winamac and perhaps on down to Monticello. Chief of the party will be Mr. Dennis, State Fish Commissioner, rather let us say "Old Grizzly." Mr. Borders will be another of the party, and myself another, I truly hope. Mr. Dennis will have along a certain curious camp gridiron, of which I hope to find something to say later on. He tells me it is made only for large bass, and insinuates that the bass I may take on the fly will be too small for his gridiron.

It will be matter of real interest to Chicago anglers to know that the recent efforts of Mr. Dennis along the Tippecanoe have greatly improved the fishing, which within the past six years had been practically ruined by nets, spears and dynamite. This is naturally the best and most beautiful bass stream of this adjacent region, being swift, clear and rocky. Much less in volume than the Kankakee, it is more suitable for work with the fly, since the angler can wade and swing an unobstructed line.

It is said that all of the Justices of the Supreme Court of Indiana, Justices Elliott, McBride, Coffee, Olds and Miller, are expert fishermen. E. HOUGH.

TEXAS.—The International Boundary Commission was encamped during the first week of March on the Rio Grande near El Paso, Texas. From Dr. Edgar A. Mearns we have learned that the stream was muddy and almost destitute of fish. The few that they were able to get for specimens were taken from the stomach of a great blue heron. Later on, when the river is in better condition, the fishing will doubtless improve.

TRIBUTARIES OF MCELHATTAN CREEK, one of the famous trout streams of Clinton county, Pa., received a plant of 40,000 brook trout fry from the hatchery at Corry on March 8.

THROUGH TO TWITCHELL.

AFTER about three weeks of rainy weather came a clear day, and after dinner, as I sat in the office of the hotel where I boarded, smoking and wondering if the rain had really ceased, Jim came in and said, "Doc, let's go." I knew this meant fishing, as we had been hoping to take another trip together before I left the town. I answered, "Water is too high," but Jim argued that we could not leave before the next morning and that it would take all day to "go in," so the water would have two days in which to fall. I said, "All right, we will go and see the country anyhow."

The objective point was Stillwater, twenty-nine miles from Lowville, our starting point. That night we got ready and the next morning, May 22, we were up early and almost the first thing we heard was, "You will have to go by way of Dayonsville, as the water is all over the flats:" this made the ride two miles longer, so the driver with his team was on hand at 8 A. M. We were soon aboard with our duffle and the start was made. Even by way of Dayonsville the water was so deep we had to hold our packs on our knees while passing through it. When we entered the woods the road became very rough owing to the recent continued rains.

The journey progressed without any particular incident until just as we were leaving Al Dunbar's, where we had an errand, when the buckboard gave a terrible lurch, and the driver dryly remarked that "the road right here on Main street is a blamed sight worse than it was back in the woods." As we were in sight of Fenton's place at Number Four, which is usually considered in the woods, the foregoing remark struck us as rather amusing.

We arrived at Fenton's shortly after 12 o'clock, ate dinner, and at 2 P. M. resumed our journey, arriving at Stillwater at 5:30 P. M. When we went in to supper we found Dr. G., of Lowville, who came in the day previous with his own rig.

After supper Jim, the driver and I rowed down to the dam, taking one rod along; found water about four feet too high for good fishing: our only catch was not a trout.

After returning to the house we made arrangements for the morrow, which were based largely on the fact that Jim Dunbar and a guide had that afternoon caught nine trout which weighed 9lbs., at and near the mouth of Wolf Creek, while Doctor G., fishing at the dam, caught only one of about ½lb. in weight. The evening passed very pleasantly with smoking and chatting, and on retiring the pureness of the atmosphere soon induced a refreshing sleep.

We breakfasted about seven the next morning, then Jim and I dug some bait, as we did not intend to do much of our fishing with the fly, and perhaps not any. Jim knows this country like a book, having sojourned in this section for a part of the last nine fishing seasons, so we did not need a guide to find the mouth of Wolf Creek. Dr. G. consented to join our party, so we got a boat and started. The high water made the landmarks more difficult to distinguish, but Jim steered us there without any startling breaks, and after traveling for a time we made fast to the branch of a tree, so that the boat would swing into the creek. Dr. G. was the first to get ready, but I followed him a good second and was rewarded almost immediately by a strike which fastened me to a half-pounder. Most of my readers know the rest, the struggles and breaks, the dashes and the scoop of the landing net, which lifts the trout from his native element into the boat.

Dr. G. followed me in the catching as I did him in the getting ready, with one only slightly less in weight than mine, then came Jim's turn with a mate to mine, then we were suddenly called to note the fact that Dr. G. had hooked a big one and we reeled in so he should have plenty of room to play him.

Before this I had not noticed the style and material of the rod Dr. G. was using, but when I did I was surprised and expressed myself freely of the belief that the trout would smash it. The Doctor was too much interested in the battle to answer me, but I could see that he eased the rod after I spoke on the subject and it was well he did, for it had all the strain it could stand before the landing net was slipped under the pound and a half of gamy trout.

As the trout was placed in the creel after being mercifully killed, Dr. G remarked that he "would be satisfied if he did not catch another one that day," but he was not done, and soon added another half-pounder to his catch; then Jim caught one of about the same size. After this there was a decided lull in the biting, but of course not in the fishing. It was quite cool and we were getting hungry and were just casting loose from our moorings when I hooked a quarter-pounder and got him safely into the boat, but he looked so small beside the others that as he was not injured severely I put him back for seed.

We then pulled down to the house, dressed our catch and dined. It rained almost continually during the afternoon, but this did not deter Jim and me from taking a stroll and doing some collecting. We brought in a Blackburnian warbler (female) and some beautiful specimens of mosses and wild flowers. We had left Dr. G. smoking and reading, and found him still at it on our return. Jim prepared the skin of the warbler, then I took the conceit out of him as a quoit pitcher, and after supper had been eaten two of the guides stopping there repeated the dose on Jim and compelled me to swallow a pill of the same description. Then another period of smoking and yarn spinning, then more of the same refreshing slumber we enjoyed the night before. After breakfast the next morning it was agreed by all that the prospect for fishing in that immediate vicinity looked mighty slim, so Jim got out the camera and shot the house and surrounding scenery. One of the guides, who happened to be in a group, calls all pictures "scenes," and said to Jim that he "would take a set of them scenes when they was fixed." They are "fixed" now, and one of them—of the house—is before me as I write. Jim and I took another collecting stroll, on which Jim found a nest of the hermit thrush, newly built, but no eggs; we marked it and left it. Jim shot another Blackburnian warbler and a black poll (male), the latter a fine specimen and rather rare.

We had started on our return when Jim spied a hedgehog. Now, on more than one occasion, these prickly beasts have destroyed camp duffle for Jim, as they have for almost every one who has ever camped many times in the woods, and Jim has acquired that hate for them which I have noticed nearly every guide or old woodsman has, so he promptly started for this one with a club, but the usually slow beast was too quick for him and had got well up a tree when Jim's club came down on him with such force as to break the club, but the only effect on the hedgehog was to accelerate his pace, so that before Jim could procure another club he was out of reach. Jim then fired No. 8 shot at him with his Stevens collecting gun, which only made him climb the higher. After Jim had fired several shots from various positions, including the top of a tree near the one occupied by the beast, without startling effect, we, as a last resort, pulled over a tall, slim sapling and with a pole made from this soon dislodged him and finished him with clubs. I took a few quills as a memento—I found them in a box to-day and they lie on the desk—then we dissected him, and after Jim had delivered a speech, showing his uselessness, we left him to nature's scavengers. Dinner was ready on our arrival at the house, and when the meal had been eaten and the after-dinner pipe lighted, Dr. G., Jim and I went down to the dam by boat and fished, but the water was still too high, Jim, however, being lucky enough to catch one half-pounder above the dam, but the other two rods were entirely unsuccessful, so we made a carry around the dam and floated down to the second rapids, fishing the while without a rise. Dr. G. tried the fly and I the bait, but Jim caught as much steering with the paddle. The carry around these rapids was under water, but we got ashore and, leaving the boat, floundered through the brush and mire until we were opposite the rapids, when we found the water so high that we could not approach near enough to fish. After this fact became apparent to our minds we floundered back to the boat and I took the oars.

As we came in sight of the dam again we saw T. Miller Reed, of Lowville, who arrived at Stillwater soon after we left for the dam, standing on a rock amid the rapids; but his hat was not pushed far back on his head, so we knew that his luck, which is usually phenomenal, had failed him. He is an expert with fly and bait, and usually can catch fish when the best of us fail.

When we had carried around the dam he came over with his boat, and after we had exchanged some remarks on the high water and consequent poor fishing, he took Dr. G. into his boat and we rowed to camp. As we arrived at the dock two men were unloading two pack baskets full of trout packed in moss, and on inquiry it proved that they had been caught at and near Twitchell Lake. We also learned that they were taking them out to sell. As I ascertained later that they were caught legally, I will merely declare myself decidedly opposed to such wholesale destruction of trout by legal or illegal means.

One of these men owns a camp on Twitchell Lake, but how can he hope to secure any patronage from sportsmen when he destroys the attractions in this way. A law can be passed none too soon prohibiting the sale of trout and game. If people want these things they should either go and procure them themselves or pay some poor relation's expenses, and let him bring them out a mess of trout or a quarter of venison. To resume the thread of my narrative, we supped, and then while smoking listened to yarns of which none were more spicy or better told than Miller Reed's. After we had talked out and smoked out we retired to dream of the big ones we had not caught. Next day was Sunday, and according to habit we all slept later than usual, but when we did arise we were greeted by a bright day cooled by a breeze fragrant with the scent of the woods.

Jim and I thought of going to Smith's Lake but gave it up, why, I do not exactly know, and after breakfast Jim proposed going to take a look at the thrushes nest he had found on our last stroll, in the hope of securing some eggs. I declined to go from sheer laziness, and Miller Reed offered to take my place. While Jim was waiting for him to change his footgear "High" Burke and his son Will came out and announced their intention of starting for Twitchell Lake for the purpose of painting a couple of boats "High," who is a guide, keeps there.

Will, not knowing that Jim and I came in together, asked Jim to go with them. Jim told him he did not wish to leave me alone, and asked if there was any objection to my going too, if I would. Will said there would not be. So Jim put the question to me, warning me that there was a seven mile carry. I made a few inquiries and said I would go, as I found there would not be anything to carry but our rods and rubber coats, "High" having blankets and grub enough over there. We hastily got our rods, coats, a tin cup and some lunch, which Mrs. Dunbar put up for us in a six-quart pail that her husband said "High" must bring back full of trout for the use of it. "High" and Will took their lightest boat, which only weighs about 35lbs., and Jim and I took one about twice as heavy and forty times more cranky, but easy to row.

The wind had freshened and was strong enough to make the waves uncomfortably high if one wanted to keep his duffle dry, but as we were going it *à la* "Nessmuk," *i. e.*, very light, we did not mind the water that came in. Jim had the oars and I paddled and tried to steer; I say tried to, because our boat sat very low in the water and steered like a log; when you wished to make a turn she refused, but when, after some persuasion with paddle and oar, she did turn, there was no stopping her until she was too far that way. Now any one who has been up the Beaver River from Stillwater to South Branch will appreciate the trouble we had with that boat, as there is not ten rods of straightaway rowing; it is all turns and at one place you come back within two rods of the same spruce tree three times after having gone two or three hundred yards each time. The foregoing may be easier to believe when I state that it is twenty miles by water and only seven by road.

When we arrived at the trail to Big Burnt Lake, half way to South Branch, we went ashore, emptied the water out of the boat, stretched ourselves and lighted our pipes; then I took the oars while Jim paddled and used strong language. From here to South Branch the current was very swift and strong, due to the high water. I objected very much to rowing around all the curves when I could look through the bushes and see the river only a rod or so away, while to follow the bed of the river I would have to row two or three hundred yards at times to get to the place I could see. The unusually high water made me think I could make some cutoffs that would save work, so at the next favorable opportunity I went through the bushes successfully; not so the next time, however, for I got stuck, the oarlocks stuck out from the gunwale about 4in., like short outriggers, and caught on the bushes, so that progress was very difficult, and just as we were emerging on the other side one of the oarlocks gave way, but luckily it broke the bolt furthest forward, so by being careful it only gave us a moderate amount of trouble. The other boat passed us here, having gone around while we were getting through. This ended the cutoff business for us, and we arrived at South Branch about noon, left out boats and went over to Harris's camp to eat our lunch. OSCEOLA.

[TO BE CONTINUED.]

ANGLING NOTES.

THE variety of snells used for tarpon fishing is without number. From the time Mr. Wood first used the chain snell innumerable changes have been made and many experiments have been tried. The chain snell was very expensive, costing about $2 each, and liable to be carried away by sharks. The great thing is to have a snell that the tarpon cannot grind off, and that the sharks can cut without carrying off several hundred feet of line. Porpoise hide, piano wire, braided cotton, braided linen, etc., have all been used with more or less success, and at last the tarpon fishermen seem to have settled on either of the following two snells: One is made of braided linen, fastened to a 10-0 bronzed O'Shaughnessy hook. The linen is protected by a winding of copper wire starting about 8in. above the hook. The tarpon, as most anglers know, are allowed to swallow the hook before striking, so that the unprotected part is inside of their gullet; while if a shark takes hold their sharp teeth soon part the linen snell close to the hook. This is the favorite snell of such anglers as Dr. Grymes, Mr. Prime and other veterans. The other is very similar, and consists of the same hook with 6in. of braided linen snell (for the shark's convenience), ending with jointed piano wire, say about four links of 5in. each, ending like the first, with a 4-0 brass swivel. This is the favorite snell of Mr. Rutherford Stuyvesant.

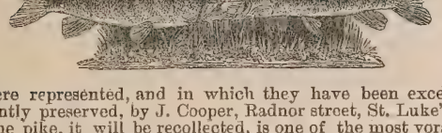
The grouper is one of the favorite Southern fishes, and requires strong tackle to manage. They live near the bottom and prefer rocky ground. As soon as one is hooked, it darts for a hole in the rocks and too often, unfortunately, succeeds in "getting there" and cutting the line against the sharp edges. To be at all successful with them one must put a sudden and steady pressure on the moment they bite. In fishing for these fish it is necessary to keep still in the boat. You can talk and laugh all that you want to, but any noise such as moving one's feet or dropping anything will stop them from biting at once. This also applies to pompano, and in fact to all kinds of bottom fishing from a boat.

Of all cool things, Mr. Plumley's proposition to petition the Legislature to restore to the farmers of Neversink Valley their right to fish in the private waters of the west branch is the coolest on record—the aforesaid farmers having sold the land and stream for a good round sum to the present owners, who bought and stocked the waters which had been fished out by visitors, who were in the habit of taking from 100 to 200 trout a day, and keeping all, big and little.

I feel as sore as any one at being deprived from fishing in that part of the stream, but must recognize the right of people to enjoy what they can afford to pay for. What is the matter with the east branch? That used to be considered the better stream. That is free from one end to the other. I will give the answer. The east branch of the Neversink is fished out. The upper waters of the west branch being closed to the public has resulted in increasing the stock of fish in the main stream below Claryville, and last year the fishing was better than it had been in several seasons.

It seems strange that it is so hard for people to recognize the fact that the supply of trout fishing no longer is equal to the demand. Consequently it is getting harder to find every season. The few open waters are over crowded, and the natural result is that those who own trout waters sell them to the highest bidder. It costs money to go trouting nowadays, either one must buy his fishing near by or else pay for it in railroad fares and loss of time at a distance, but in any case, to most of us it is an expensive pleasure, and more is the pity.

Mr. Plumley goes on to state that for many years the Neversink was stocked by the State. In the first place that has nothing to do with the question, and in the second place, "I have my doubts." Mr. Seth Green took thousands of small trout out of the west branch to stock other waters, but I never heard of his putting any in. Many of the anglers, including myself, contributed toward stocking the Neversink with California trout, and I was one of five who turned in 500 large trout which we bought of Mr. Annin (near Rochester), and which were turned into the upper waters of the west branch. None of us claim the right to fish on that account, however.



So I think Mr. Plumley might as well drop that nonsense, and admit that if a man can afford to buy a good segar he has a right to smoke it. SCARLET-IBIS.

ALDER LAKE.—Rondout, N. Y., March 11.—A deed was placed on record in the Ulster county clerk's office to-day by Dr. George C. Smith and wife, who convey to the Alder Lake Club 534 acres of land in the town of Hardenburg. The club's members will build cottages by the lake and will have their families there in summer and entertain their friends. Over 175,000 trout were hatched in Alder Lake last fall. The trout are lively and are just beginning to relish bits of liver.—*New York Times.*

HALIFAX RIVER CHANNEL BASS.—In his "Angling Annals," in the "Boyhood Number" of FOREST AND STREAM, our correspondent "S. C. C." was credited by the types with having taken a 25lb. channel bass in the Halifax River, Fla., in 1872. As Mr. Clarke was at that time high-hook for bass taken with rod and reel, the record is worth making correct, the weight should have read 37lbs.

PLAYING A TARPON.—S. J. Ryan, of Appleton, Wis., while fishing at Fort Myers, Fla., hooked a tarpon at 3 o'clock in the afternoon and brought it to gaff by moonlight at 6:20. The monster even then had enough vim left, after coming into the boat, to knock down Mr. Ryan and the fisherman. The fish weighed 130lbs. and was 6ft. 9in.

THE COMPLICATED PIKE, as here shown, are from an illustration of the London *Illustrated News*, one of the 1853 numbers, sent us by Mr. Henry Phair of New Brunswick. The *News* description ran: "Very many instances are related of the voracity of the pike, and the group here engraved adds a remarkable example. The two fish were taken in April last in the 'crystle Colne' (the Duke of Northumberland's waters), precisely in the position

here represented, and in which they have been excellently preserved, by J. Cooper, Radnor street, St. Luke's. The pike, it will be recollected, is one of the most voracious of fish, and it is said, will even eat those of its own species, of which ferocity this may present the first stage. It is a strange action of pike vs. pike. The two fish were swimming in the Colne, one with open jaws into which the other darted, and became transfixed, and *'faucibus hæsit,'* as we here see it."

FRANKFORT (N. Y.) ASSOCIATION.—On Feb. 26 there was filed with the Secretary of State of New York a certificate to incorporate the Frankfort Game and Fish Protective Association. The directors are Alonzo M. Lints, Chas. M. Rich, Edward Steele, Herbert Steele, Lansing E. Nipe, Leroy Budlong and Henry M. Wood. The officers are: Edward Steele, President; A. M. Lints, Vice-President; C. M. Rich, Secretary; Herbert Steele, Treasurer; H. M. Wood, Leroy Budlong, L. E. Nipe, Trustees; Edward Manning, Game and Fish Protector; J. J. Dudleston, Jr., Attorney. The association intends to have grounds nicely located and in such shape for trap shooting this season that those who enjoy such sport will be anxious to become members, and that this association will place a number of thousand trout in the Moyer and Budlong creeks this spring, as an application was filed with the State Fish Commissioner for the same and a notice was received stating the application was granted. There has been a law passed prohibiting fishing in any form in the Moyer and Budlong creeks and tributaries for three years, which will be strictly enforced and all offenders prosecuted to the extent of the law.

TARPON GUIDES.—Ft. Myers, Fla.—Judge Carman, of Long Island, and Mr. C. W. Wilson, of Brooklyn, wrote me to secure them a guide. I secured Alphonse Gonzalez at $6 per day. When Judge Carman and Wilson came I introduced the parties and the arrangements were made. Alphonse never showed up and the Judge and his friend were out a day's fishing besides the expense of hotel, etc. We have good guides here and there is tarpon to be caught, but when a guide fails I certainly shall take pains to warn my Northern friends. Frank Reckum, George Boyd and "Dode" or Prince Robinson are all to be depended upon. Thus far twenty-three tarpon have been taken on rod and reel, and our river is full of them. W. F. Powell and myself with Betsey Robbet brought in seventeen quail this afternoon; we left the office at 2 and got back before dark.—WALTER F. MICKLE.

SMELT ARE CANDLE-FISH.—An extraordinary run of "smelts" is reported in some rivers of Washington, choking the streams in some parts of their course. There is little doubt that the fish are eulachon or candle-fish, a delicious but oily little creature, which when dried may be burned like a torch. The eulachon, or ulikon, ascends rivers from Puget Sound to Alaska in enormous schools early in the spring and its coming marks a season of rejoicing and feasting among the Indians. As a pan fish this species has a high reputation.

THE MECHANICSVILLE FISHWAY.

Editor Forest and Stream:

In FOREST AND STREAM of Dec. 31 I again see fishways mentioned with a request for contributions. I was familiar with one fact contained in that editorial, and that was that after the fishways were built (and I suppose paid for), as mentioned by Mr. Wilmot, they were "perfectly useless, either from unsuitability of location or want of proper construction." Now, then, who is to blame for this state of affairs?

Mr. Robert Hockin reported that of those he examined "fully 90 per cent. were not in such a condition as to allow fish to pass within their spawning grounds, and that they were not fulfilling the purpose for which they were intended." Now if those fishways get out of repair and become blocked with small sticks and other rubbish, and no one looks after them, is it surprising that they fail to properly work?

I am so located that I can see the fishway built at this place daily if I care to, and during the warm season I inspect it weekly; many times I have taken out sticks, pieces of timber and floating trash, which if it were not removed would in a short time bar the progress of the fish. I have not heard that any fishway has been built which is a self-cleaner or self-repairer, and if those in charge of them neglect them it should not go into the papers that those fishways are useless.

The fishway at Mechanicsville is the Rogers patent, and I personally know that it passes all kinds of fish over the 16ft. stone dam of the Hudson River Water Power and Paper Co., without in the least injuring their dam. I have seen the fish lying in the pools formed by the buckets, and also seen them pass up and into the pond above. Before this fishway was built salmon would attempt to jump the dams, and could be seen by any one at all hours of the day during June and July; now they are seen trying the same thing at the falls 40 miles north of this place. Build a Rogers fishway, locate it properly, take care of it after it is built, and the fish will do the rest. A. C. JOHNSON.

MECHANICSVILLE, N. Y.

COD HATCHING.—The number of cod eggs taken by the U. S Fish Commission up to March 9 amounted to 77,000,000, and it is safe to say that the total plantings of fry for the season will aggregate at least 50,000,000. At Gloucester, Mass., the water in the hatchery a short time since reached the low temperature of 31 deg., and a serious loss of newly-hatched embryos was threatened, but Commissioner McDonald found that by connecting the salt-water discharge from the condenser with the main suction pipe the temperature in the hatching boxes could be perfectly controlled. After this arrangement was made the temperature was kept from 37.5 deg. to 41 deg., and the danger was averted.

The Kennel.

DOG SHOWS.

March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Littell, Sec'y.
April 6 to 9.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. C. Steadman Hanks, Sec'y.
April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.
April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.
Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

THE WASHINGTON SHOW.

THE Washington dog show opened on March 8 and continued till March 11. The dogs on exhibition numbered about 400. The quality in many cases was good, and competition quite up to the average. The board flooring was a great improvement on last year, nor was the building so cold. The officers of the club worked hard to make the show a success, and fully deserve all credit. Messrs. Stinemetz, Joseph H. Hunter, Henry E. Barrett, A. W. Hancock, G. S. Atwater, J. H. Gulick, W. R. Traves, M. J. Flaherty and the secretary, Mr. Frederic S Webster, were all conspicuously and busily engaged. They are nearly all dog fanciers and sportsmen themselves, and thoroughly understood their visiting exhibitors. The only drawback is the out-of-the-way location of the Riding Academy where the show was held. It is almost on the outskirts of the city.

FREDERIC S. WEBSTER.
Secretary W. C. K. C.

Mr. John Reed superintended the show, and when one says this we know that his part of the business was well attended to. The description of the dogs and the names of the judges will be found below:

MASTIFFS (*Judge, James Mortimer*).—There were fourteen entries in the several classes, but with two or three notable exceptions there was, as seems to be usually the case this year, very little quality apparent. Challenge dogs did not fill and only Menglada showed up in bitches. She is rather narrow and long in head, stands on good legs, but her body needs more depth. With Beaufort's Black Prince in the open class there was no need to look very far for the winner. He was a class to himself. He has not yet acquired the flesh he lost after Albany, still he looked very well and subsequently won the special for the best non-sporting dog in the show, the contest finally narrowing down to this good mastiff and the bulldog bitch Saleni. Merlin, second, has a good skull and nice depth of muzzle, in fact, were he not so straight behind would be a nice all round dog. Linkwood Chief is light in bone and eye, ears not carried right, has a fairly well-shaped head but is rather light in loin. Jefferson, vhc., spoken of in Philadelphia as being too "greyhoundy." Duncan, hc., has a small, poorly-shaped head and his feet turn out. In the bitch class of three entries the well-known Pharoah Queen won well in hand from Miss Beaufort; Queen is better behind than formerly, in fact now moves very well; she has a nice head and good body; her feet are not, however, up to the standard. Zoe, given c., is a weedy animal, whose owner must have played on the judge's good nature. Two dog puppies and McKinley was returned the winner, a nice-headed, promising dog. Second was withheld from a son of Linkwood Chief's, having most of the undesirable qualities of his sire. In bitches the prizes were rightly withheld.

ST. BERNARDS (*Judge, Miss A. H. Whitney*).—Last year the Washington City Kennel Club could truthfully boast of having had as grand a collection of St. Bernards, as far as quality is concerned, as ever appeared in this country, and the sight when the two Melrose Kennels showed their teams of eight apiece for the kennel prize was one not soon to be forgotten. Some such thoughts must have passed through the fair judge's mind as she reviewed the rather mediocre collection that passed before her last week. The well known winners from the New York and Col. Ruppert, Jr.'s kennels were present, and redeemed some of the quality of course; but the general run was not of a very high order. In the challenge divisions Kingston Regent and Republican Belle occupied their usual positions without competition, but Aristocrat's win in the open class now places him in the challenge class, and Kingston Regent will have to pull himself together should Aristocrat get his coat. In open dogs there were four entries, with Refuge II. and Knights the absentees, leaving the competition between Aristocrat and Comte, the former is well known now; Comte has improved very much since Chicago, 1891, and is a dog of nice type; small, but head is well shaped and pleasant in expression, good bone, rather short and chunky in body, is rather flat-ribbed and loses very much to Aristocrat in size and straightness of coat. Aristocrat won of course. In bitches the order was Lady Gladwyn and Altonette, but Ellen Terry had to give way to Duchess of Arlington for third place. How this can be I cannot understand, as Duchess of Arlington is miserable in body and coat, and her lack of markings and rather poor head hardly bring her into Mountain Queen or Ellen Terry's class. Mountain Queen took reserve; she stands on good legs, with plenty of bone, but her skull is narrow and muzzle weak, and her coat needs attention. Ellen Terry, vhc., could have claimed either of the two positions above her. Josephine Marie Sanderson's name I thought I should never have to write again, but she bobbed up serenely with another hc.; she is a pretty little bitch, much improved, but too weak in head and straight-faced, and her tail is still quite gay. Ida, c., is too long and narrow in head, weak in pasterns and straight behind; her body is her best part. Lady Marshall has little but her body—and that is a bit short—to recommend her; head has not stop enough and is too narrow. There were eight entries in this class. In puppies, Sir Melvale, a large hobble-de-hoy sort of a dog, with lots of good points about him, won easily; grand bone, good body, and were he as good in front as he is behind would be all right on his pins; head needs time to fill out and deepen. Second was withheld from the other entry. In novice roughs, Sir Melvale had to give way to Duchess of Arlington, who, in her present condition, did not deserve the position. Ida was vhc., and Dallas, also vhc., is a dog with no type or merit, a snipy-headed brindle.

In smooths, Empress of Contoocook was the only challenge representative, and was head and shoulders above the others in type and quality. Adonis II., described at Philadelphia, was the only recipient of a ribbon, Columbian Rex not being considered worthy of any honor. Psyche, winning second in puppies, first withheld, brought up the end of the St. Bernard classes; as may be supposed, she is not high class. Col. Ruppert, Jr.'s team won the kennel prize.

GREAT DANES (*Judge, James Mortimer*).—Not a very great collection, quality keeping well in the background. Tiger, a handsome colored dog, was the winner; he is throaty, fairly good in head, has fair bone, though not straight in front, fair body and moves well. Duke, second, is a blue dog, snipy in muzzle, not straight in front, is rather weedy in body, but cleaner in the neck than the winner. King, hc., has a bad head and is light in bone. There were five entries in this class. In bitches only one appeared, Stella, boasting a nice head and front, beautiful neck, clean and well arched, and nice body and legs, a bitch with whom little serious fault can be found. Lufra was marked. In puppies Stella won again, beating Bismarck II. in head and front.

BLOODHOUNDS (*Judge, James Mortimer*). — Jack the Ripper was the challenge entry and won, looking well. Victor, in the open dog class of two entries, won from a most promising puppy, Belhus, Jr., one of Mr. Winchell's breeding as well; the latter pup has an excellent head for his age, good wrinkle and length, and lots of loose skin, beautiful ears, capital bone and a trifle heavy in shoulders. A future winner no doubt. The well-known Judith was alone in bitches.

NEWFOUNDLANDS (*Judge, Miss A. H. Whitney*).—Only two poor ones, and Mayor Moore alone was considered good enough for a ribbon, and that only a red one; he is faulty in head and coat. Sir Carlo was given c., *pour encourager les autres.*

RUSSIAN WOLFHOUNDS (*Judge, James Mortimer*).—At no time in this country have two such good specimens, or what we should presume are good specimens, of the breed been shown before as Argoss and Leekhoi. It is a pity that the owner of Leekhoi should jeopardise both his chances of winning and the dog's life by exposing him to the dangers of travel and showing in his present condition. The dog is weak, thin, and a wreck to what he was at Chicago; he stood weak on his pasterns and without energy or spirit. Argoss, on the contrary, was in splendid condition and is a fine animal; though not so large as Leekhoi, he is better ribbed and his head is half an inch longer, has a capital front and his quarters and hindlegs resemble the greyhound more than any dog of this breed I have seen yet, his color black and tan with little white, and is in striking contrast to other dogs of the breed so far seen on this side of the water. Of course, it is a matter of taste, but to my mind it is rich in the extreme, and bred to the white and fawn bitches will, in all probability, produce some beautifully colored stock. Mr. Huntington must be congratulated on his new purchase. Seacroft Svodka and Flodeyka occupied their usual positions in the bitch class.

DEERHOUNDS (*Judge, James Mortimer*).—A poor lot, and the well-known faces were missed. Ron, in open dogs, was considered only worthy of third place, he is small, has bad feet, and is altogether a weedy specimen. There were no bitches. The novice class turned out better with three entries. Glimnarth, the winner, has a nice coat, good loin and quarters, is a bit heavy in shoulders and short in neck; Maida II. is out of coat, is loaded in shoulders but good behind, head could do with more length and strengtn; Ron was here vhc.

GREYHOUNDS (*Judge, James Mortimer*).—Quite a nice lot faced the judge, and Gem of the Season had to hustle in the dog class before the flag went up in his favor over his kennel mate Ornatus, whom he excels in head, ribs and loin, Gem losing a little to the other in hind action. In bitches the order was again Bestwood Daisy and Lilly of Gainsboro, with Lady Clare, third, losing in loin, ribs and quarters to the others. Lady Ringold, hc., is a weed. In novices, Sir Launcelot, a promising young puppy by Gem of the Season out of Lady Clare, won well over Ton in head, rib and bone; the former was also the only entry in puppies.

AMERICAN FOXHOUNDS (*Judge, James Mortimer*).—These were much mixed in type, the lot from the Deputy's being the likeliest under the title. Those from the Sandy Spring Hunt Club were a sorty lot and looked like going. In bitches Mollie and Fannie from the Deputy Kennels claimed both prizes. It is no use trying to criticise these hounds as the type is so mixed and the line so faultily drawn between the English and American hound that without a standard one is at a loss to correctly judge them. The only English foxhound present was a poor one, wide skull and altogether poor type and prize was withheld.

POINTERS (*Judge, Charles Heath*).—A capital collection, and the judge handled them in a manner that impressed one at once with the hope that he will in future often be called upon to act in the same capacity. Challenge heavy-weights brought out a good lot, the ribbon finally going to King of Kent, who is better in ribs, feet and shoulders than Pontiac, second. Tempest was given reserve, his ears need attention or the dog will soon lose his bloom. That capital bitch Lass of Bow was alone in her class. There were ten entries in the dog class, but outside of the winners the balance was a rather common lot. Graphite beat Westminster Drake, thus reversing the Philadelphia decision, where both dogs were described. Brackett's Lad, third, is rather plain-faced, light eye, ears are set on too high, is heavy in shoulders, light in loin and has not a good carriage of stern, is good in front and is well ribbed up; no commended cards were given. In bitches Revelation could not be denied in a class of seven, her kennel mate, Ightfield Madge, taking the red ribbon. As stated last week, the latter only beats the other in head a trifle and is herself beaten in other structural parts. Nellie, third, would do with more rib and is rather pinched in muzzle, good skull and body. Bev. R., reserve, could be improved in head; feet are open and she was shown too fat. In light-weight challenge dogs Duke of Hessen scored another win over Ossining; Duke would do with a little more flesh. Stella B. had no competitor in her class. In under 55lbs. dogs Inspiration won well from Black

Wonder, the noted field trialer. Now that the latter has put on flesh, he is not by any means a bad looking pointer, is stylish in action, head well formed, ears not carried quite correctly, stands on good legs, is well ribbed and possesses good propelling power behind. He is all black, so that the eye does not at once take in his numerous good points, for at first he strikes one as rather a plain dog. Axtell's King Don occupied the same place that he did at Philadelphia. Gun Gun, reserve, has good bone, but knuckles over at times; his head has too much stop, but otherwise is well formed; his peculiar tickings make him look something like a Dalmatian. Shot Echo, vhc., is not in the class with the others; out at elbows, ears not carried close enough, light in eye and needs more depth of chest, barring his throwing out of elbows, his legs are good and he is well-ribbed. Those two capital bitches, Lady Gay Spanker and Miss Rumor, occupied their Philadelphia positions, and the former afterward divided with the fox-terrier Blemton Victor II. the special for best sporting dog in the show. Ridgeview Bagatelle was third; it is a pity that a light eye and a rather dished, weak muzzle should spoil an otherwise good head; she is well-ribbed, stands on good legs and has good quarters and hindlegs. Irene, reserve, is light in eye but has a good head, good forelegs and is well sprung in ribs, but has not chest enough to carry them, and quarters fall away too sharply. Telie Kent, vhc., has a stary eye, not enough chest, well-sprung ribs, nice shoulders and stands on good legs, but has a poor set-on of stern. In dog puppies a stylish youngster in Westminster Ralph won nicely from Gum Gum, mention before. Ralph stands on good legs and feet, has a nice head but body needs time, but quarters and set-on and carriage of stern are very good. I trust that the club will have better luck with him than with Westminster Naso. Walstall's Dan, vhc., is a thick-skulled, coarse dog, leggy and straight behind. Croxie Kent was the winner in bitch puppies; she throws her elbows out a little and ears are badly carried, nice skull, weak muzzle. Mine, second, I did not see and the others did not receive much commendation. Black Wonder won pretty easily from Gus Thompson in the novice class; the latter has a stary eye, is leggy and moves badly behind, is well-ribbed and has fair bone. In the bitch class Black Wonder's Sister, a bit plain in muzzle, won over Ridgeview Bagatelle; the former has good body and quarters. Telie Kent, reserve, has been mentioned. Queeny II., vhc., is a gross coarse bitch with a fair head, was shown too fat. Several dogs were marked absent in these classes but were really present, but not being on their benches when wanted the judging rightly went on without them. This was, however, a little puzzling to the reporters afterward.

ENGLISH SETTERS (*Judge, Major J. M. Taylor*).—These dogs turned out in force though there was nothing very striking throughout the classes, though many whose names are familiar to us in the field were out in their holiday clothes, so to speak. Cincinnatus was looking well in the challenge dog class and Albert's Nellie was again in the front in her class. The open class was a crowded one for such a small ring, but the judge knew a good many of them and so was able to handle them better than a stranger would. Toledo Blade was soon picked out for first then, Don Gladstone, who recently did duty for a picture of Hope's Mark in a contemporary, getting second place; he is a workmanlike-looking dog, head not stop enough but otherwise well formed, stands on good legs and feet, body is a bit plain and tail is carried too gaily. The Corsair is rather broad in skull and muzzle not square enough, shoulders heavy, body good but he stands rather wide in front; a handsome dog nevertheless. Ightfield Rhewlas, reserve, got his deserts this time, as I mentioned he should have had more than c. at Philadelphia. Antonio, vhc., is not accustomed to play second fiddle to any dog in the field, but as a bench show dog he is not quite so high up, nor was he in good shape; he is a bit heavy in shoulders, stands on good legs and feet, but falls away too sharp in loin and quarters. Sir Dixon, hc., has a rather coarse, flat, plain face, good bone but wants more spring of ribs. The nicely-formed bitch, Gossip, won in the next class; she was in beautiful shape and has filled out nicely since her first appearance at the trials at Lexington, N. C. She has a nice head, though muzzle is a little pointed, a well-ribbed body, is a bit heavy in shoulders, but otherwise little fault can now be found with her. Peggy Dortch, second, has a round, plain skull, needs more ribs, does not stand true in front, but is a stylish mover. Laundress, third, is rather long and weak in head, has a nice front, is a bit long cast in body, but is good behind. Prima Donna, reserve, should have been higher up; she was first at Philadelphia. In the vhc. lot Belton's Princess has a nicely shaped head, but is a bit plain in body, not chest enough, good bone. Canadian Lily is well known. Winning Ways I could not find, nor Lady Beatrice. Although there was a notice up restricting the hours of exercise, the dogs were continually being taken off their benches and put in the exercising inclosure. Forest Heather got hc. again. Esmeralda and Fortune, of the Blue Ridge Kennels, arrived too late for competition. Mecca won in dog puppies; he is too fine in muzzle and slack in loin. Monk of Teesdale is of fair type but has the same fault as the winner in head. In bitches, Lady Breeze won over Nellie of Trinidad, who is snipy in muzzle and poor in front. Mecca won in novice dogs from Brighton Boswell. In bitches Roi D'I won over Pleasant Kelpie; neither will do in good company.

IRISH SETTERS (*Judge, Major J. M. Taylor*).—Many of the dogs in this breed have been seen out so many times this year it is only necessary to mention their positions. In challenge dogs Seminole again won over Kildare, with Elfreda the solitary representative of the bitch class. Duke Elcho and Exile II. again fought out their battle with the same result as at Philadelphia. Major Taylor indorsed Mr. Tallman's decision in placing Norna over Edna H., they were both described last week, and so was Alice Kent, who was again in third place. Nugget, reserve, won the Irish setter Derby last year, and is also a fair show bitch; rather plain in head, not correct type, but behind that is built for work, she is a little off-color. Flash Sarsfield, c., has little to recommend her. Puppies, with the exception of Avondale, were poor.

GORDON SETTERS (*Judge, Major J. M. Taylor*).—In challenge dogs, Ivanhoe beat Beaumont, he has, I think, a better eye and is better in tan; I have seen Beaumont looking much better. Leo B., reserve, is as well known as the others. A fine lot of bitches came forward in the next class, and it is a great feather in Janet't bonnet to beat such a lot of well-known animals as Duchess of Waverley, Heather Bee and Lady Waverley, placed in the order named. There is, however, no getting away from her sweet head, nice tan and excellent condition. In open dogs Rexmont, not correct in eye, but has a good head, not too heavy, nice body but might be better in color, beat Heather York, he has been fully commented on before. Rex, bitch-headed and rather light throughout, was third. King Noble, fourth at New York, getting reserve. In open bitches the second New York winner won nicely from Maid of Waverley, who loses in head and clearness of tan, has good legs and body; the well-known Countess Roxie taking third; and Princess Louise, faulty in head, tan and pencillings, getting the reserve. Waverley Girl and Waverley Boy were placed as named in puppies, and are two promising youngsters by Leo B.

CHASAPEAKE BAY DOGS (*Judge, James Mortimer*).—There were three Chesapeakes on hand, but all three were of different types. The judge withheld first in each class. In dogs I thought St. Peter, who was second, should have given place to Billy, better in muzzle and closer coat. Rose, second in bitches, has a weak, snipy head.

SPANIELS (*Judge, James Mortimer*).—There was only one field, and that looked more like a Chesapeake than anything else, and prizes were withheld. In cockers, challenge class, Rabbi again played second fiddle to Black Dufferin, who was looking a little better. I Say and Amazement occupied their usual positions in the next class, with Bessie W. and Novel reserve and vhc. Fascination, holding himself well for a pup, won easily from Adam, who is now a "rounder." Obadiah, third, has a better type of head. Jersey Obo received but vhc. All these have been commented on repeatedly. La La was rather lucky to find Eve absent, and so won without competition. The only novice entry was not considered good enough for a ribbon.

COLLIES (*Judge, James Mortimer*).—Collies were a fairly good lot with Mr. Carswell's kennel well to the front as he was last year at this show. There were no challenge dogs. Ormskirk Shep won the blue ribbon from Prince Wilkes, whose only material fault is his large size and faultily-carried ears; in true formation he bests the other dog, and especially in front and disposition; Dell Wilkes here took third and was placed about right, his short face being against him; Duke, reserve, has too much stop, a dense coat, nice front and body but is rather plain in coloring—black and light fawn. Rosslyn Charles, vhc., is a handsome collie, a little too much stop perhaps, but good in forelegs, lacks undercoat and quarters fall away too sharply. Don Scott, c., is light-boned and soft in coat. Nancy Hanks won in bitches; she is a little ragged in coat, feet could be closer; she has a nice head and gets her ears up well. Sadie Wilkes is a trifle round in skull and not quite straight in front, and is a trifle weak in back. Duchess of Fife, perhaps, should have changed places with her. Lady Moll, vhc., is a little weak in muzzle, has flat feet, and is a bit short of coat; but what there is is of good texture. Buzz was the only dog pup, and was third at New York. In bitch puppies Duchess was also alone; head inclined to coarseness, rather faulty in quarters but otherwise a nice puppy. Roslyn Charles was the only novice entry.

POODLES (*Judge, James Mortimer*).—Three fairly good poodles were shown, Margar, the winner, is a handsomely formed one, but a bit light, and not so good in formation of head as Dick, the second winner, who loses, however, in loin and quarters, where he is very plain. Paris, third, is well known and rubs the others close.

BULLDOGS (*Judge, James Mortimer*) —A very fine showing, with Pathfinder an easy winner over Handsome Dan, who loses to the other in chops and layback, and is not so good in depth or breadth of chest; nice body. Oswego, third, is not broken up enough in face and is too terrier-like in front. Trott, vhc., is too long in fore face, rather flat-ribbed and forelegs not straight in bone. Saleni was alone in her glory in the bitch class.

BULL-TERRIERS (*Judge, James Mortimer*).—Carney and Duchess of York were the only challenge representatives; the latter was not in show shape. Streatham Monarch walked away in the open dog class from Edgewood Flyer, who needs a dose of kitchen physic, his light body showing very tucked up now. Young Marquis, third, is cheeky, short-muzzled, a little slack in back and heavy in shoulder. Mr. Dick Bendigo is too coarse-fronted. In heavy weight bitches, Edgewood Fancy, the New York winner, won well over Maggie Cline, who stands a bit out in front, is weak in muzzle, but has a nice body. Queen Bendigo and Lady Vesuvius occupied their relative Philadelphia positions, third and hc. In light weight dogs and bitches, Young Victor won with something to spare from Mr. Dick, too short and thick in head and neck. Oxford, third, has a bad front, poor loin and quarters, and a full eye. In puppies the winners were Edgewood Flyer and Lady Vesuvius.

BASSET HOUNDS (*Judge, James Mortimer*).—A nice row of these quaint-looking hounds were on exhibition. Curve, the winner, has a nice head, could be better ribbed. Bow, the second winner, is better in chest and front, and not so fine in muzzle. Bent, third, has good length, but head is too fine in muzzle. Rowton Wags did not impress me favorably alongside the others, is soft in coat and light in body, wanting more ribs.

DACHSHUNDE (*Judge, James Mortimer*). — Windrush Rioter was on hand looking none the worse in the challenge division. Zulu II., second, made another win in open dogs; this time over the short-faced Dach II. Venus II., the only entry in bitches, was absent.

BEAGLES (*Judge, W. Stewart Diffenderffer*).—The classes were not very extensive and the judge had an easy task and repeated his Philadelphia decisions in many cases. Tony Weller beat June M. in challenge class, the latter was slack in loin. Roy K. and The Rambler were absent. Tomboy won again in open dogs, Brittle, the Boston winner, taking second, pressed him close; he is fine in muzzle, but is very cobby in body, with an excellent coat and good legs. Fairy's Lee was vhc.; he is commoner. This time the judge put Daisy II. over Forest Queen; they both have soft coats, but Forest Queen is better in body, bone and legs. The third winner, not on the catalogue, was shown too fat and is wide in front. Lady Vic was ae Philadelphia.

FOX-TERRIERS (*Judge, James Mortimer*).—Almost a repetition of Philadelphia, as far as the dogs were concerned. Blemton Victor II. scored well over the heavily-fronted Starden's Jack in challenge dogs, and New Forest Ethel took care of Blemton Brilliant. The dog class was warm, and "our only German's" face was a study when he grasped the red ribbon for Blemton Valor, Dobbin having been placed over him on account of his (Valor's) mouth, in other parts Valor is his superior. Ebor Spendthrift came third, followed by Raby Trigger, vhc., a reversal of Philadelphia positions. The Dean, c., is thick and chunky-headed. Only two came on in bitches, and the winner was the now well-known Damson, second going to Woodale Refusal, another reversal, who loses in ribs and front, but is better in head than the other. In dog pups, Sparkler, a nicely built one, won easily over the oft mentioned Harvard; the former excels in body, head and feet. In bitches Woodale Damsel was returned the winner Chinquipin; the former is not quite true in front, but is a nice all white pup. Blemton Valeria, light in body and weak in muzzle, won in the novice class. She needs a little more beef, and Woodale Damsel pressed her close for second, as she is better furnished.

Carlisle Vamp was the only wire-haired; is too short in head, has a good coat and fair front, wants more bone.

IRISH TERRIERS (*Judge, James Mortimer*).—In challenge class Dunmurry was alone. Open dogs, Hanover Boy did the tumble act this time, Boxer IV. being placed at the head of affairs. Hanover's light eye spoils him somewhat, and when it comes down to fine points Boxer has the cleanest head. Jack Briggs, vhc., and Dennis, Jr., hc., has a short, cheeky head but a good coat as a redeeming feature. The new bitch Crate made her first appearance here; she strikes one as a little fine in muzzle and did not get her ears down well; she has a good body set on good legs and feet and will do her share of winning.

BLACK AND TAN TERRIERS (*Judge, James Mortimer*).—Beaconsfield Sultan won again unchallenged. In the open dog class Prince Regent just wins; he loses to the other, Salisbury, however, in markings and condition. Merry Monarch is weak in pastern, leg color runs in, is light in body and was not in good shape. Lonie, in beautiful condition, was again placed over Broomfield Madge, who is beaten in tan, head and body by the other. Gypsy Girl had to be content with vhc.

DANDIE DINMONT TERRIERS, ETC. (*Judge, James Mortimer*).—In challenge dogs King o' the Heather was alone, looking as usual. Sarah, the Chicago winner, was the only representative of the open class; she is quite a nice terrier, with a good head and nice coat. In Skyes, Sir Stafford farmed his usual place. Bruce was alone in dogs and Bessie in bitches; the latter has a fair head and is good in coat. Kilstor was the only Scotch terrier. Strange to say, there were no Yorkshire or toy terriers on hand.

PUGS (*Judge, Miss A. H. Whitney*).—There were just nine entries in this breed, and so their judging did not give Miss Whitney much trouble. Robin Hood, the winner at Philadelphia, was again chosen for first place in open dogs, there being no challenge entries. Dandy, second, is long in muzzle and rather flat in skull. Lord Baltimore is now well known and took third; he has as good a skull, if not better, than any of them, and good depth of muzzle. In bitches second was withheld, and first went to Dolly, who, if her muzzle was broader, would be a good one; she has a good skull. Tiney, third, is a little runt that did not deserve a letter. There were no puppies, and Dandy was the only novice entry noticed, he took first.

TOY SPANIELS (*Judge, James Mortimer*).—The only King Charles present was the well-known Calumet Bend D'or. Blenheim spaniels had two entries, Tiney, mentioned at Philadelphia last week, and Poodle, not so good in foreface or coat. Italian greyhounds were drawn blank, and in Mexican hairless Duke was the only Simon-pure, the others being a chow-chow or something of a similarly edible nature.

In the miscellaneous lot the smooth sheepdog Beauty and a cracking good little very-light-weight bull-terrier, all white, were given equal first; Chi getting second, and the Pomeranian, Sheffield Lad, taking third. The specials not judged at the time we went to press were as follows:

SPECIALS.

Best dog puppy of any breed owned by a resident of District of Columbia, Geo. F. Pollock and C. T. Daly's bloodhound Belhus Jr. Best sporting dog in show, divided between Blemton Kennels' fox-terrier Blemton Victor II. and T. G. Davey's pointer Lady Gay Spanker.

POINTS AND FLUSHES.

WORLD'S FAIR matters, in so far as they pertain to the dog show, are progressing slowly, there being nothing new except that the whole live-stock catalogue is undergoing revision, and there will be some slight changes in the rules relating to the bench show, and some rearrangement of the prizes in some of the classes, which will not change the aggregate of the money appropriated for the bench show.

It seems to me that a show which assumes to have international standing is altogether too calm and quiet at this stage of what should be proceedings. I notice that in the reports of the numerous specialty club meetings held at New York during the bench show in February, there was no reference to any action taken or intended to be taken regarding the World's Fair bench show; in short, the whole matter was ignored entirely except that in one instance it was announced that fifty cents would be charged for certificates. If it is important that the charges for certificates should be settled at this time, it is quite as important that the specialty clubs should announce their intentions. If the matter had been pushed in a proper manner it would seem that every specialty club in this country would have announced its intentions at the late annual meetings.

Speaking of specialty clubs, it is an unpleasant feature of nearly all of them that they fall far short of their mission and pretentions. They all announce gravely in their constitution that their purpose is to improve the breeds of dogs, etc., yet their acts are almost invariably opposed to their pretensions. For instance, every medal or prize is in most instances restricted "to dogs owned by a member of the club." In other words, the club is confined to the improvement of the members' dogs; in short, while professing to be improving the dog at large it is for the benefit of individuals. The dogs owned by members of a club may not contain one high class specimen, yet a winner of a club medal which is almost a gift, is paraded before the world as the formidable winner of the club's medal; very rarely, however, is it mentioned in connection therewith that the competition was confined to club members. It can be said that any specialty club could not afford to give medals for open competition. Then why profess on one hand that the improvement is for the dog at large when it really is for the benefit and profit of members' dogs exclusively? There is no little amount of humbug about most of the constitutions and pretensions of many specialty clubs.

CHICAGO, March 12.—It is very gratifying to notice the general interest manifested in regard to the manner of conducting field trials and the theory of the true principles of a competition. Of more importance is the increase in the number of field trial associations, local clubs springing up here and there in places where they will accomplish much good as educators of sportsmen and the improvement of the field dog. Local organizations can cover a field almost entirely untouched by the larger ones with greater benefit to all; in fact, for novices, they would furnish a much-needed school in what constitutes the requirements of field trial competition.

I notice, however, a tendency to undervalue the ideas and rulings of the older associations by some of the younger ones. Impulsive action on such matters may retard progress.

Retrieving appears to be a matter of most general interest in respect to whether it should or should not be recognized as a competitive quality in a trial, or, if it is a competitive quality, whether it should be insisted on in both puppy and all-aged stakes, men of sound judgment and extensive experience holding conflicting opinions, some being for and some against all or part.

In regard to retrieving in the Derby, the experience of all associations is most positively against it, and trainers and owners are no less opposed to it, for the soundest of reasons. In the first place, the making of a good retriever is the work of two or three seasons, therefore it is absurd to expect that a puppy can retrieve well in his first or second season. Some owner may object to this on the ground that he once owned a puppy which was a perfect retriever at the age of three months. The simple act of picking up a bird and fetching it to his master do not constitute a retriever. While some dogs learn to retrieve much more quickly than others, the time required to make a good retriever is never less than two seasons; and, in the hunting experience of a setter's or pointer's first year, no attempt should be made to teach it. There are so many details, connected with hunting, which a puppy has to learn in his first season, that he will make quicker and better progress if retrieving is left out. Moreover, retrieving and hunting for birds do not harmonize when being taught together.

Setters and pointers are essentially pot hunters, nothing in hunting affording them so much gratification as the actual capture of their prey. Hunting for mere sport as an abstraction which has no dependence on capture, a distinction in regard to men most unreasonably made by some writers as distinguishing the sportsman from the pot-hunter, has no consideration in the dog's field ethics. He is out for pursuit with an earnest determination to capture, the manner being of least consideration so that it is successful.

Incidentally it may be suggested that the dog's ideas are right, for it hardly sounds humane or reasonable that a man, however costly his hunting equipments, would sally forth with his energies bent on slaughter and call the wanton destruction of life sport. The manner in which the game is killed should distinguish the true sportsman from the game slaughterer; but to justify the killing, all men should be pot-hunters, and in truth nearly all men are.

Returning to the consideration of teaching retrieving in a

puppy's first season, the following are the most important and sufficient reasons against it. The puppy should learn first to find and point his birds steadily. If he is allowed to retrieve or capture his birds, he is much more intent on the killing than pointing. From this, breaking shot and running riot follow, and this general unsteadiness may require punishment to correct it. In any event, it delays and impairs the general training. At this stage of training, that is, the first season, a dog's manner of hunting is not a fixed quantity. It requires careful management to so develop his powers that he will carry a high nose and work on his birds quickly, accurately and intelligently. In retrieving, there is always a tendency to carry a low nose and follow the foot scent, which in many dogs' methods result in annoying pottering. After the first season, the dog's manner of hunting has become in a manner habitual, he has learned steadiness and the purposes of hunting, and may then be taught retrieving as a supplementary brand of field work, although even then the same objections often hold good. Punishment for unsteadiness sometimes results in blinking and always in impairing the dog's ardor, and confidence in his trainer.

In regard to retrieving in an all-aged stake, the average field trial can not afford opportunities for retrievers. This probably appears to be a most unreasonable statement, but it is so nevertheless. To give a dog a real test as a retriever he must have five or six birds killed over him as in actual shooting, this being the only competitive feature of a field trial which can be conducted precisely as in an ordinary day's shooting, since when a dog is retrieving his competitor is ordered up and there is no competition in the sense of both working at the same time. To kill six birds over each dog in a heat would be impossible, yet a test cannot be done on less.

The manner commonly practiced at field trials is both misleading and harmful. The handler always misses till an opportunity is offered to kill a bird in an open, easy place, as close to his dog as possible. Even then the dog rarely retrieves promptly or well, yet this is usually considered satisfactory. Instead of insisting that a handler shall kill and attempt to get a retrieve whenever his dog can get a point, the most shiftless, imperfect and slovenly retrieve is accepted as good and satisfactory. Instead of setting up a high educational standard in respect to what constitutes retrieving, field trials have been valueless.

Aside from this, retrieving is no part of a field trial competition of setters and pointers. This should not be understood as implying that a dog should not retrieve in the field. On the contrary, a retriever in the field is absolutely necessary. But almost any dog can be taught to retrieve. It is not a quality peculiar to setters and pointers, and it is an acquired quality with all, the result of education.

B. WATERS.

MEETING OF THE CHESAPEAKE BAY DOG CLUB

Editor Forest and Stream:

The annual meeting of the Chesapeake Bay Dog Club was held in Baltimore, Md., March 2, at the office of the president, Mr. Edward L. Bartlett, in the Keyser Building.

The meeting was called to order by President Bartlett, and in the absence of the secretary, Mr. Jas. F. Pearson, on account of indisposition, Mr. F. E. Lamb was appointed secretary pro tem. Minutes of the previous meeting were read and approved. The report of the treasurer, Mr. T. J. Hayward, showed the club to be in a most flourishing condition, with a balance on hand of $270. The report was accepted.

Under unfinished business the proposed change in constitution, regarding the time of holding the annual meeting, was discussed, and it was adopted that the annual meeting and the election of officers take place hereafter "on the second day of the annual bench show of the Chesapeake Bay Dog Club."

Balloting for officers for the ensuing year was next in order, and resulted in the following gentlemen being chosen for the year 1892: President, Edward L. Bartlett; Vice-President, J. Olney Norrs; Secretary, Jas. F. Pearson; Treasurer, T. J. Hayward; Board of Governors, Edward L. Bartlett, J. Olney Norris, Jas. F. Pearson, T. J. Hayward, Jas. Swan Frick, J. D. Mallory, H. Malcolm, Isaac T. Norris and F. E. Lamb; Delegate to the American Kennel Club, F. E. Lamb.

Much enthusiasm was manifested by the members present at the excellent prospects for the coming bench show, to be held under dates assigned the club by the American Kennel Club, for the week following the Westminster Kennel Club show in 1893.

F. E. LAMB, Sec'y pro tem.

NEW YORK DOG SHOW.

Editor Forest and Stream:

Referring to Messrs. Cryer and B. Waters's remarks with relation to the special prize, awarded to Milwaukee Charlie, I am glad of the opportunity to explain what on paper appears a reversal of decisions. Neither Nank-i-Poo nor any other represenative of the Japanese variety competed for this special.

Continuing I will oblige Mr. Cryer with my views re Kash Jr.: Waddles and Saxon, Kash Jr., I placed second, for he exhibited himself to the best advantage, no doubt he is slightly plainer in face and not so good in color as Waddles, who could not be induced to show himself, hence his defeat. With regard to Saxon, surely Mr. Cryer cannot be serious. He is not only larger, plainer both in facial and skull properties, but also longer in body.

I took advantage of my visit to Philadelphia show to examine the pugs exhibited there, and was disappointed in not seeing a more representative group, and sorry to find Mr. Cryer in his generosity awarded cards to such sorry specimens as Bradford Ruby II. and Diamond Dot. The former, with the exception of his color, had hardly one redeeming property. As for the decision which placed Prentice Boy first in puppies over Tip Top, to me it appeared incomprehensible, provided shortness of face, depth of stop, massiveness of skull and looseness of skin are requisite properties in a pug. Furthermore, I considered Tip Top had a decided advantage in body and should have won easily.

GEORGE RAPER.

THE PHILADELPHIA SHOW.

Editor Forest and Stream:

In your report of St. Bernards at the recent Philadelphia bench show Mr. Lacy writes "Empress of Contoocook was the pick in smooths, and the only challenge entry. Mr. Raper says she ran Princess Florence close for the special, but I fail to see it."

In justice to myself I ask you to permit me space to most emphatically deny any such remark. Ever since her first appearance I have considered Princess Florence a most extraordinary specimen. In fact her super-excellence enabled Mr. Reick's team to secure the kennel prize.

Mr. Lacy commits a further error in accrediting me with having judged Yorkshire terriers and King Charles spaniels. These were handled by Dr. M. H. Cryer.

GEORGE RAPER.

Business.

STOCKBRIDGE, Mass.—I take your valuable journal every week and consider it the best sporting paper printed. I receive replies to my "ad." in nearly every mail. Accept thanks for promptness. —F. S. HEATH. [This was a 3-lines 1-time ad.]

DOG CHAT.

IT seems that when Mr. Harry W. Smith, of Worcester, Mass., who is to judge greyhounds, deerhounds and Russian wolfhounds at the coming Boston show, closed out his kennel of greyhounds, which, by the way, were then the best lot ever shown in America, he sold a litter of pups sired by champion Friday Night out of his celebrated bitch Mother Demdike, who was said to be the most typical greyhound in England before she was imported by Mr. Smith. The litter was sold to a syndicate of greyhound men in California, and although Mr. Smith thought them very promising, he had never been informed how they came out when put in the slips until a few months ago, when he learned that one of the pups was purchased by W. E. Wadans, of Santa Clara, and named Midnight. Midnight has been most successful in the West, and in 1889 won the Stake and Cup at Ocean View, beating Fenelon II. in the final, the previous winner of the Occidental Club Stakes. The following year he repeated his performance of 1889 at Ocean View. Mr. Wadans then retired Midnight to the stud, and the litter resulting from his union with Peasant Girl made him more than famous as a stud greyhound. There were four pups, and when they matured carried all before them in the West. Headlight won the stake at the Occidental Coursing Club, and later Twilight carried off first money at Merced, Cal., in the best company in California. At Ocean View, Moonlight, running over the same ground as his illustrious sire did years before, proved himself the best sapling in a large stake by easily defeating all who were drawn against him. Again at Ocean View, Short-Stop won the All-Age Stake, showing himself to be as good as any of his brothers. Mr. Smith must be very much pleased with the success of his stock in the West; for although he was invincible with his kennel on the bench, as coursing dogs only Memnon had been tried (he was runner up for the Waterloo purse, the second largest stake in England), we well remember that he always had a desire to test their capabilities in the field, for in Friday Night and Mother Demdike's pedigrees he found that almost one-sixth of the names were Waterloo Cup winners, therefore they could not have been bred on truer or more fashionable lines. It is gratifying to know now that the blood of Eastern dogs has been so well sustained in the coursing fields of the West.

Everything comes to him who waits, and now Mr. Harry Northwood, a sportsman and fancier, congratulates himself in the following words: "I take this means (the very best) of calling the attention of my friends and others interested in the gamy fox-terrier to the reverses of judgment at the late Westminster Kennel Club show. I imported Painter, at a long price, advertised him freely, showed him, to get him turned down, with sometimes a few comments that were unjust and misleading. Painter met and vanquished his Freeport, Rockford and Chicago antagonists at New York, under Mr. Raper, whose authority on fox-terriers is perhaps unquestioned. I am no kicker, neither am I seeking free advertising, as Painter's stud card appears in this paper regularly, but I paid a long price for my dog and knew his sterling worth, and my hopes that it would be recognized are now consummated. If this catches the eye of some of the gentlemen who have passed judgment on Painter they can feel assured of my kindest regard, but I owe it to my dog to notice the change of postion after so many contests."

Major J. M. Taylor has moved his office to 14 Vesey street, New York, where he has established a first-class purchasing agency and sportsmen's exchange. He will buy and sell dogs on commission, also examine and make public or private reports of dogs at bench shows or field trials. The Major has a large acquaintance among dog men, and such an agency should meet with every encouragement. The new book he is publishing, which will contain pretty nearly every bit of statistical information about shows and field trials, etc., promises to be a very interesting work, as it will be profusely illustrated with pictures of dog fanciers and their kennels. Major Taylor expects to have it out about May.

Lady—"Why did you have your dog's tail cut off?" Boy—"To make him more affectionate." Lady—"Hem! Did that do it?" Boy—"Yes'm. He can wag all the time now without gettin' tired."—*Street & Smith's Good News.*

Dr. Foote is having his annual "think" that he will dispose of all his black and tan terriers without reserve. At the same time we fancy the Doctor will find it more and more difficult, as the days roll by, to get away from the breed.

By some unaccountable mistake we gave Adonis II. credit for first place in smooth-coated St. Bernard dogs at Philadelphia. In this we did both the judge, Scottish Leader, who really won first, and his fair owner an injustice. However, in the report of the show our remarks plainly showed that Scottish Leader was the best dog. We presume that now our proposed visit to the Quaker City may be made in perfect safety.

We are exceedingly pleased to be able to say that the Washington show was a success in spite of the weather. A soaking wet day to start with and then on Thursday a regular blizzard. Still, when the weather gave them half a chance, the crowd just rushed in and soon filled the limited space between the benches.

The judging was all completed by evening of the first day. That is, the regular awards and many of the specials. The rings were well served and the only fault found in the judging ring was occasioned by several of the numbers on the tags not agreeing with the numbers in the judge's book or catalogue. This, however, was all remedied in due time. Several dogs were left out of the judging owing to their absence from their stalls when they should have been ready to go into the ring. A few more lessons like this and exhibitors will learn to keep their dogs on the bench till their merits have been passed upon.

It was a noteworthy fact that those dogs not accompanied by their owners or handlers were religiously taken off their benches twice a day and exercised; and there was always any amount of clean bedding in the stalls. The show was kept sweet and clean, and the interior rings not being used for exercising the dogs, there being one outside the building, the hall did not require so much disinfectant and was very much more sightly.

The Blue Ridge Kennels made a handsome display of their kennel and the various names over the dogs, and some of the familiar faces conjured up visions of the hills of North Carolina till one almost fancied one could smell the pine and fir-ladened atmosphere of High Point or Lexington. It was only fancy, however. Col. Ruppert's St. Bernards also made an interesting group. We suppose that it is impossible to ever hope for a bench show where the dogs will be numbered consecutively and not in kennels. One does not object so much to dogs of one breed being benched together, but when it comes to putting dogs together of different breeds to form a kennel display it is annoying to all, both the public and press men.

First Exhibitor (at Washington).—"I don't think it's fair that so many of these specials should be given to residents of the District of Columbia!"

Second, ditto.—"Oh, well! let them have some fun, they can't vote, you know."

We had to leave Washington before the close of the show, but a personal letter from Mr. Webster, the secretary, is so interesting, and will give a better idea than we can of the occurrences of the last day, that we do not hesitate to publish it:

"Our show is over and we have the satisfaction of knowing that we came out a little ahead. Considering the very great odds of an expensive hall and the most dastardly weather I ever saw in Washington, I think we did remarkably well.

"On Friday afternoon the President, accompanied by Lieut Parker and Mrs. Dimmick, attended the show. The party had the post of honor in the gallery and enjoyed the performance of Professor Hamptou's dog circus, and when it was over came down to the main floor and were shown every dog of character and note. Most of them were taken off their benches and displayed to the best advantage. Of all the dogs he admired Dr. Dixon's kennel of Gordon setters. There was also a parade of all the prize winners, which was enjoyed by all. The President was greatly pleased with the show, expressing his admiration of the character of dogs on exhibition and complimented the club on the admirable manner that everything was conducted, and expressed the wish that the club would make a barrel of money. After another look at the sporting dogs, pointers and setters, he left the building, followed by many persons of note.

"Among the distinguished persons who have attended the show several times were Justice Harlan and family, Justice Brown, Judge and Miss Cox, General and Mrs. Greely and little son, Mr. and Mrs. Gallaudet and Miss Gallaudet, Mrs. Tullock, Prof. and Mrs. Eastman, Senator Kenna, Mrs. Wilmerding, Miss Wilmerding, Mrs. Senator Blackburn, Mrs. Logan, the Misses Mendouca, of the Brazilian Legation, Mrs. and Miss Foster, Mrs. Enos, Mrs. L. Z. Leiter, Mrs. Hutchinson, etc. The Corean minister and wife were also present—their first experience of this class of entertainment. They sat for nearly an hour in the gallery, from which they looked down at the performing dogs. Mrs. Ye wore a most becoming new gown, fashioned in the prevailing style, and with her shoulder cape of seal skin and stylish little bonnet looked, in garments at least, a typical American. Both Minister and Mrs. Ye expressed themselves as delighted with this novel experience.

"We have had a great time. One thing is very satisfactory and it is the prevailing good nature of all in attendance. All the boys say they had a big time and that they would rather come to Washington than any show in the country—excepting, of course, New York. We have heard no grumbling and very little dissatisfaction as to the judging. Mr. Heath's awards were especially well received, and we commend him to other shows. He knows why he gives a dog a blue ribbon over another, and can give his reasons. We look forward to his report of his classes with much pleasure."

The competition between the sporting dogs for the special for best in the show was a keen one, and no division could be made between Lady Gay Spanker and the fox-terrier Blemton Victor II. Instead of talking the matter over between themselves when there are a number of judges to make this award—counted by all practical men as a very foolish one, by the way—it would be better to ballot for it. Each man name his choice on a slip of paper and have them opened by the secretary in the ring. If the first ballot results in a tie, look the dogs over again, and vote another time. When they get talking together the stronger minds influence the weaker as a rule, and a judge will often give in for the sake of harmony, when he morally believes the dog he has chosen out is the best. It is a foolish prize anyhow, and should be done away with.

The dachshund Venus II., owned by Mr. E. A. Manice and quartered in Mr. Frank Dole's kennels at New Haven, Conn., ran away from the kennelman the other day and has not yet been heard of. This is a valuable bitch, and as she is a noticeable one, there should be no trouble in finally getting on her track.

We should be sorry to think that any dogman would be guilty of writing such a scurrilous article on some of our best known dogmen as that which appeared in the *Sunday Mercury* the week before the New York dog show. There was no one who read it, and it was read extensively by visiting dogmen, but condemned it and wondered at the man who could fall so low as to pen such stuff and drag into publicity the private lives of his fellow dogmen, for that it was either written or inspired by a dogman is very evident from his knowledge of the men he writes of. All right thinking men will deprecate this airing of private grudges in the public press, as it only furthers the nonsensical ideas some people have of dogs and dogmen.

The FOREST AND STREAM was the only journal to call the attention of the A. K. C. to the obnoxious law of the customs department whereby after April 1 all animals imported to this country shall show a certified register of five generations on the sire's side and four on the dam's to entitle them to a free entry. As this will practically prohibit the importation of dogs, the A. K. C. has appointed a committee of three, Messrs. J. M. Taylor, James Watson, and Frederic S. Webster, to endeavor to have the order rescinded as far as it concerns the dog. With this end in view Messrs. Taylor and Webster called on the Treasury authorities last Thursday but found that the order was issued from the Department of Agriculture and applied more particularly to horses and cattle, though it includes all animals. These gentlemen were instructed to draw up a formal application to have the law remain as it is for the present in the case of dogs, and this will be done as soon as they can meet Mr. Watson and consult with him. There is no time for delay, as the order once in effect will probably be more difficult to change.

The A. K. C. showed wisdom at its meeting when it declined to either recognize the hydrophobia scare in the Gibier Institute or advocate the exhibiting and breeding of dogs in the zoological gardens. Let the dog shows educate the public with the best type of the different breeds kept in a proper manner and not in the degenerate way they would be seen in a menagerie. The A. K. C. can far better promote the interests of dogs and breeders by instituting those talked of A. K. C. medals to be donated at different shows. Let the A. K. C. devote its surplus to the advancement of the dog, and, depend upon it, it will draw good interest.

Mr. A. D. Stewart, of Hamilton, Ont., is getting out of his fox-terriers and intends returning to his earlier love, the bulldog. The whole of his kennel will be disposed of March 31. The dogs are good ones and of the best breeding.

Our suggestion, a few weeks since, that some one should take a selling team out to the California shows seems to have met with appreciation. Fred Kirby tells us he is thinking of doing the Denver and the above shows, if he can get a number of dogs to take out. Ben Lewis also has the subject under serious consideration, and has already about 15 dogs promised, he wants to take about 40 on a special car, if possible, and dispose of most of them before he returns.

Mr. Henry Northward has sold the noted English setter Benzine to Mr. Francis G. Taylor, and henceforth the dog

will be seen in the kennel that Breeze Gladstone has so ably represented abroad.

Mr. George Raper, now that the Preston (Eng.) show will not take place till May, proposes to stay over for the Boston show and to make his visit more interesting, he has cabled to England for his noble fox-terrier Raby Palissy. This dog was whelped March 1890, and is by Raby Poker out of Maize, by Raby Mixture out of Lonely II; Raby Poker by Pitcher out of Raby Myrtle. Raby Palissy has won first prizes, the last being at New Castle where he won the special for best fox-terrier and terrier of any variety, in the show.

Among the new announcements in our business columns are the following offers for sale: Greyhounds, A. E. Smith; setters, R. Rowland and W. K. Purington; bulldogs, John Rose; bull-terriers, Jas. Black; fox-terriers, Morey Kennels. C. E. Burr offers Ormonde at stud.

We are greatly surprised at the announcement, which Mr. Sears wires to FOREST AND STREAM, that he has determined to dispose of his entire kennel of St. Bernards, including Sir Bedivere and Hepsey. This decision, to which Mr. Sears has been forced by the pressure of business, will be received with regret by the world of fanciers; and a hope will be entertained that it may be reconsidered.

A dog show will be held at St. Louis, under management of W. G. Ingram, March 21 to 24. The entries received promise a successful exhibition.

The intelligence of the dog is being put to base uses. First he is taught to smuggle, then to steal chickens, now we see that an enterprising youngster has taught his dog some tricks that bid fair to land his owner in durance vile. The other day, in Philadelphia, this young thief, in company with another, was driving a wagon, when they stopped on the bridge that spans the Aramingo Canal. At this point is a small pond, on the frozen surface of which over twenty school children were skating and sledding. The dog, a large black curly animal, was liberated and dashed among the children. He siezed a bright-painted sled and was making off with it, when the boys beat him until he let go. Wagging his tail, he danced around among them until he suddenly siezed a bag containing a new pair of skates belonging to a little boy. Slinging the bag over his shaggy back the dog ran to the wagon and, leaping in, deposited his prize, and, after securing a few caresses from his owner, again ran among the children, and seizing a bag containing a pair of overshoes from another little chap took them to his master, and again leaping in the wagon deposited them at his feet. Blaney, his owner, affectionately patted the thieving dog, which again sprang among the now terror-stricken children, who had stopped their amusement and were holding on to their earthly possessions. The dog next seized a pair of skates and could not be induced to let go until a policeman, who, noticing something unusual, had gone over to the spot, forced him to release them. He promptly took Blaney into custody after restoring their property to the badly scared boys.

PITTSBURGH DOG SHOW.

[Special to Forest and Stream.]

PITTSBURGH, Pa., March 15, 6 P. M.—This show opened this morning in rather stormy weather, but toward noon it cleared up and the sun came out. Crowds of people have filled the building since noon.

The show is held in the old Auditorium, but the building has been renovated, and the benching, as it is now set out, affords more room and has a better effect. The gallery has been thrown open and the pet dogs put up there. This relieves the main hall considerably. There are two large rings on the stage, but the light is rather poor. Judging began promptly, and before the show closes to-night most of the awards will have been made. Several prominent dogmen are present and the show has every indication of being a great success. Messrs. Boggs, the well-known president, J. H. Lyle, W. E. Littel, J. O'H. Denny, John Moorehead, Jr. and F. H. Denny are working like Trojans, and all the arrangements under Mr. Read's supervision are very good, considering the lack of accommodations. The awards made up to 6 P. M. are as follows, and, as will be seen, the quality is on a par with any seen this year. There are in all 547 entries catalogued.

MASTIFFS.—CHALLENGE—*Dogs:* 1st, Edwin L. Kimball's Elkron; 2d, Chas. C. Cook's Moses. *Bitches:* 1st, Chas. C. Cook's Neuglads.—OPEN—*Dogs:* 1st, J. B. Nelson, Jr.'s Jefferson; 2d, Joe Myers's Major Sellers. *Bitches:* 1st and 2d, Chas. C. Cook's Pharaoh Queen and Miss Beaufort; 3d, T. W. Coon's Grace. igh Heom., S. W. Guthrie's Flirt.—PUPPIES—*Dogs:* 1st and 2d, Chas. C. Cook's Rodger and McKinley. High com., S. W. Guthrie's Raymond. *Bitches:* Prizes withheld.

ST. BERNARDS.—ROUGH-COATED—OPEN—*Dogs:* 1st, Edward Booth's Aristocrat; 2d, C. R. Diffenderffer's Comte; 3d, Dr. J. W. Dunlap's Othello. Reserve, Edward H. Radell's Willand. Very high com., Maryland Kennels' Sir Melvale and Niagara Kennels' Tristany. *Bitches:* 1st, 2d and 3d, Edward Booth's Lady Gladwyn N, Altonette and Helen Terry. Very high com, Niagara Kennels' Quinta Lomond. Com., E. E. Martin's Gladys. *Puppies:* 1st, Maryland Kennels' Sir Melvale.

ST. BERNARDS.—SMOOTH-COATED—CHALLENGE—*Dogs:* 1st, Hospice Kennels' Hector; 2d, J. B. Lewis's Lord Hector. *Bitches:* 1st, Edward Booth's Empress of Contoocook.

POINTERS.—UNDER 55LBS.—CHALLENGE—*Dogs:* 1st, Westminster Kennel Club's King of Kent; 2d, G. W. Lovell's Pontiac. Reserve, Tempest Kennels' Tempest. Very high com., J. R. Daniels's Lord Graphic.—OVER 50LBS.—*Bitches:* 1st, Westminster Kennel Club's Lass of Bow.—OPEN—OVER 55LBS.—*Dogs:* 1st, J. R. Daniels's Count Graphic; 2d, T. G. Davey's Westminster Drake; 3d, C. G. Stoddard's Ightfield Upton. Reserve, B. F. Seitner's Shotmaster. Very high com., E. Halbin's Bracket's Lad, H. W. Loefler's Don Croxteth and Ong & Suttleworth's Dude N. High com., E. Parker's Saxon, O. D. Thompson's Rapid Don and S. S. Van Patten's Spot.

ENGLISH SETTERS.—CHALLENGE—*Dogs:* 1st and reserve, Rockingham Kennels' Count Howard and Rockingham; 2d, P. H. Gotzian's Monk of Furness. Very high com., F. S. Brown's Edgemark. *Bitches:* 1st, Rockingham Kennels' Princess Beatrice II.; 2d, Dr. J. A. Hothmann's Albert's Nellie. Reserve, Mount Washington Kennels' Nia.—OPEN—*Dogs:* 1st and 2d, J. Brett's Model Yankee and Real English; 3d, Rockingham Kennels' Rockingham Jr. Very high com., Seminole Kennels' Sir Frederick, T. G. Davey's Ightfield Rhulas and F. G. Taylor's Breeze Gladstone. High com., Newell & McConnell's Count Eric and R. B. Burt's Rossmon R. Com., J. M. Clark's Captain Rex and W. S. Bell's Lustre. *Bitches:* 1st, T. G. Davey's Canadian Lillie; 2d and 3d, Mount Washington Kennels' Miss Frost and Maud B. Reserve, G. O. Smith's Liberty II. Very high com., F. Pastre's Nellie Kitson, P. H. Gotzian's Minnesota and T. G. Davey's Forest Heather. High com., Mount Washington Kennels' Moll Llewellin, Newell & McConnell's Princess Irma. Com., H. Northwood's Lady Dudley.—NOVICE—*Dogs:* 1st, T. G. Davey's Brighton Benwell; 2d, Newwell & McConnell's Count Eric. Reserve, Scotts Woods Kennels' Pembroke's Blue Grouse. Very high com., J. F. Bell's Roxie D. High com., J. A. Herron's Grousemont. Com., W. S. Bell's Lustre, J. M. Clark's Captain Rex and T. Sankey's Bear S. *Bitches:* 1st, Mount Washington Kennels' Maud V.; 2d, P. H. Gotzian's Minnesota. Reserve, H. Northwood's American Dart. Very high com., W. D. Henry's Alice McBeth, and Newell & McConnell's Princess Irma. High com., J. O'H. Denny's Hope's Lass. Com., Pittsburgh Kennel Club's Noblesse Gladstone and M. Harry's Emma.—PUPPIES—*Dogs:* 1st, H. Northwood's Wordsley Dude; 2d, A. L. Wilson's Rob; 3d, Newell & McConnell's Count Eric. Reserve, Chas. Howe's Frank Northwood. Very high com., J. A. Herron's Grousemount. High com., C. S. Schaeffer's Bob Wallace. Com., Geo. Bowman's Vick Gladstone. *Bitches:* 1st, Newell & McConnell's Princess Irma; 2d, C. Howe's Royal Princess; 3d, F. Milham, Jr.'s Rake's Creed. Reserve, R. T. Knox's Zoe. Very high com., G. R. Broadberry's Dot.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, W. Kuhns's Mack N. 2d and very high com., F. C. Fowler's Kildare and Seminole. Reserve, W. L. Washington's Dick Swiveller. *Bitches:* 1st, Seminole Kennels' Laura; 2d, Dr. Wesley Mills's Elfreda.—OPEN—*Dogs:* 1st, F. C. Fowler's Duke Elcho; G. O. Smith's Rex Smith; 3d, W. L. Washington's Troubadour. Reserve, C. T. Thompson's Rockwood Dandy. Very high com., Dr. F. K. Owen's Tom Owen, F. C. Fowler's Exile II. High com., F. Pastre's Red Biz, P. Demmel's Tippecanoe. *Bitches:* 1st, Mrs. S. H. Price's Norma; 2d and reserve, F. C. Fowler's Edna H. and Alice Kent; 3d, W. L. Washington's Molly D. Very high com, Curry Flower's Bess F. High com., G. F. Kuhns's Duck.—NOVICE—*Dogs:* 1st, W. L. Washington's Troubadour; 2d, F. C. Fowler's Exile II. *Bitches:* 1st, G. F. Kuhn's Duck; 2d, C. T. Thompson's Fly.—PUPPIES—*Dogs:* 1st, withheld; 2d, J. Fawcett's Young Sarsfield II.; 3d, W. L. Washington's Iriquois. *Bitches:* 1st, F. C. Fowler's Avondale; 2d, W. H. Beazell's Kildare Winnie; 3d, D. L. Savers's Roxi Darby. Reserve and high com., Jos. Mills's Nellie Whiffet and Lady Forest.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st and 2d, Dr. S. G. Dixon's Ivanhoe and Leo B. *Bitches:* 1st and 2d, Dr. S. G. Dixon's Duchess of Waverly and Lady Waverly.—OPEN—*Bitches:* 1st, H. F. Smith's Countess Roxie; 2d, Dr. S. G. Dixon's Maid of Waverly.—PUPPIES—*Dogs:* 1st, Dr. S. G. Dixon's Waverly Boy; 2d, W. E. Lippencott's Tom. *Bitches:* 1st, Dr. S. G. Dixon's Waverly Girl.

POODLES.—*Dogs:* 1st withheld; 2d, Dr. S. G. Dixon's Paris; 3d, C. Tegtmeier's Toby. *Bitches:* 1st and 2d withheld; 3d, C. Tegtmeier's Beady.

BULLDOGS.—CHALLENGE—*Dogs:* 1st and 2d, Illwiss Kennels' Harper and Bo'swain. *Bitches:* 1st, Illwiss Kennels' The Graven Image.—OPEN—*Dogs:* 1st, Illwiss Kennels' King Lud; 2d, Wheatley Kennels' Pathfinder; 3d, A. B. Graves's Handsome Dan. Com., C. P. Dixon's Little Monarch. *Bitches:* Wheatley Kennels' Salem; 2d, Frank F. Dole's Adiscombe Gipsy; 3d, Illwiss Kennels' Peckham Lass.

BULL-TERRIERS.—CHALLENGE—*Dogs:* 1st, Tubby Hook Kennels' Carney.—OPEN—OVER 30LBS.—*Dogs:* 1st, J. Moorhead, Jr.'s Streatham Monarch; 2d, G. W. Clayton's Sir Monty II.; 3d, Toon & Symonds's Como II. Com., W. D. Brereton's Barney B. and W. Wedgwood's Keno. *Bitches:* Tubby Hook Kennels' Edgewood Fancy; 2d, C. Mahler's Lady Dinah; 3d and very high com., J. Moorhead, Jr.'s Queen Bendigo and Lady Vesuvius. High com., W. D. Brereton's Topsy.—UNDER 30LBS.—*Dogs:* 1st, John Moorhead, Jr.'s Mr. Dick. *Bitches:* 1st, W. Wedgwood's Luce.—NOVICE—*Dogs:* 1st, R. Carson's Billy Bulger; 2d, Toon & Symonds's Como II. High com., J. H. Kramer, Jr.'s White Prince. *Bitches:* 1st, W. Wedgwood's Venus W.; 2d, W. D. Brereton's Topsy.—PUPPIES—*Dogs:* 1st, R. Carson, Jr.'s Billy Bulger; 2d, F. F. Dole's Edgwood Flyer; 3d, J. H. Kramer, Jr.'s Wills King. Very high com., J. A. Robison's Rex and J. Moorhead, Jr.'s Mr. Dick Bendigo. *Bitches:* 1st, J. C. Mahler's Pittsburgh Carmencita; 2d, W. Wedgwood's Beauty. Very high com., J. Moorhead, Jr.'s Lady Vesuvius and W. D. Brereton's Topsy.

BASSET HOUNDS.—1st, W. F. Rutter, Jr.'s Rowton Waggs.

DACHSHUNDE.—CHALLENGE—*Dogs:* 1st, E. A. Manice's Windrush Rioter.—OPEN—*Dogs:* 1st, E. A. Manice's Zulu II.; 2d, L. O. Seidel's Fritz K. High com., Bertha Backofen's Feldman K., Jr. *Bitches:* 1st, C. Klocke's Bessie R.

FOX-TERRIERS.—CHALLENGE—*Dogs:* 1st, John E. Thayer's Raby Mixer; 2d, James Mortimer's Suffolk Toby; 3d, Woodale Kennels' Starden's Jack. *Bitches:* 1st, John E. Thayer's Donu; 2d, Morey Kennels' Blemton Brilliant.—OPEN—*Dogs:* 1st, John E. Thayer's Starden's King; 2d, Toon & Symonds's Ebor Spendthrift; 3d, Woodale Kennels' Dobbin. Very high com., Harry Norwood's Painter. *Bitches:* 1st, John E. Thayer's Miss Dollar; 2d, Mount Washington Kennels' Rowton Safety; 3d, Woodale Kennels' Woodale Refusal. Reserve, Chas. Stedman's Hauk's Damson.—WIRE-HAIR—OPEN—*Dogs:* 1st, James Mortimer's Suffolk Grip; 2d, Robert Lyon's Risca. *Bitches:* 1st and 2d, James Mortimer's Suffolk Tassel and Suffolk Venus.—PUPPIES—*Dogs:* 1st, John Moorhead, Jr.'s Harvard; 2d, T. C. Foster's Teddy. Com., Hamilton & McGrew's Foxy H. *Bitches:* 1st, Woodale Kennels' Woodale Damsel. High com., Harry Northwood's Wardsley Rage and D. R. Lewis's Nancy Lewis. Com., Thos. E. Unks's Muncie Topsy.

IRISH TERRIERS.—CHALLENGE—*Bitches:* 1st, Walter J. Comstock's Dunmurry.—OPEN—*Dogs:* 1st and 2d, Walter J. Comstock's Hanover Boy and Boxer IV.; 3d, Toon & Symonds's Jack Briggs. *Bitches:* 1st, Walter J. Comstock's Crate; 2d, withheld.

SCOTCH TERRIERS.—*Dogs:* 1st and 2d, Toon & Symonds's Kilstor and Scotch Hot. *Bitches:* 1st, Toon & Symonds's Bella.

DANDIE DINMONT TERRIERS.—*Dogs:* 1st, E. Brooks's King o' the Heather. *Bitches:* 1st, E. Brooks's Sarah.

BEDLINGTON TERRIERS.—1st, Martin A. H. Thelberg's Qui Vive.

SKYE TERRIERS.—CHALLENGE—1st, Clifford A. Shinn's Sir Stafford.—OPEN—*Dogs:* 1st, Walter Scott Lieber's Sir Roger; 2d, Mrs. A. P. Smith's Bruce. *Bitches:* 1st, Clifford A. Shinn's Bessie.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, Rochelle Kennels' Broomfield Sultan.—OPEN—OVER 7LBS.—*Dogs:* 1st, Toon & Symonds's Prince Regent; 2d, Frank P. Comstock's Salisbury. This completes regular classes, with exception of beagles and foxhounds, up to press time. Dole and Thomas claimed winning cocker Woodstock Dora at $100. H. W. LACY.

OUR DOG SHOW.

Editor Forest and Stream:

After the lapse of many years there is going to be another dog show in St. Louis. At about the time when brief notices began to appear in the sporting columns of the daily papers an unusual state of affairs began to manifest itself. Dogs picked up. Dog men picked up. Niggers picked up. Niggers picked up dogs. Indeed, I am perfectly sincere when I state that, while I have not seen more colored men or more dogs, I have, nevertheless, seen more colored men and dogs since the show was announced than were noticeable theretofore. The darkies have a self-conscious air about them, and so have the dogs, and I believe they are going to be at the show. Some of the quadrupeds are coon dogs and some are white folks' dogs, although I understand that by special arrangement with the management, nearly all the white folks caught their dogs and tied them up the day before the show was formally announced. All I have to say is that the white folks will have to get a move on them if they wish to hold their own with the colored troops, for if my surmises are correct and these modest and earnest-looking dogs I have seen them with are to be entered in the show, they will take nearly all the money. I saw a middle-aged darky yesterday on 15th and Chestnut with a dog that had become much attached to him, by reason of its affectionate disposition and a piece of tar rope. You could see that he was an entry for "best dog of any known breed" as plainly as though you were reading the words on a card tacked over his stall in the show. He was the best representative of any known breed I ever saw. A while before that I was interested by a darky and a dog who came out of an alley that I was passing. That is, I was interested by the dog. After the dog had got out from between my legs I noticed in him a peculiar species of dog that I thought had become extinct. I also fancied for a moment that I recognized in this apparent canine a very dear friend, for he had hair so strikingly similar to my friend's that really my friend is on all fours with him. It was hair of that ignus fatuous kind that his wife cannot grasp nor his friends perceive, so that to all intents he is bald headed, at the same time a vigorous—a vigorous grove, we will say, of grayish hairs adorns him. You can see among them, and if one of them had the effrontery to stand slantendicular you could see its shadow on his polished pate. I say I thought as dogs they had all become extinct, because I only saw the phenomena in individuals of about forty who have led dissolute careers. But here was a bald dog; and if they don't allow any side shows he will probably be in the main hall, with no extra charge to see him. Up to 5 o'clock this evening the best exhibit had not been secured. I caught a glimpse of him as I crossed an alley at 18th and Carr. I also heard his voice, which is a high soprano. Of course the colored contingent were after him, horse, foot and dragoon, and if they can they will bring him in—the only dog on four legs that can balance a tomato can in the air and sing "Annie Rooney" at one and the same time. The show takes place on the 23d.

GEORGE KENNEDY.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

N. N. L., Canandaigua, N. Y.—The pedigree is correct as far as we can ascertain. Register blank forwarded.

E. H. M., Haverhill, Mass.—Treat for worms and give the following mixture: Ferri phosphas 2scr., tinct. nux vomica 1dr., water 3oz. Give one dessertspoonful three times a day.

M. J.—Please give the pedigree of the pointer dog Ranger, also bitch Belle of Cherokee. Give, too, the registered number of Hick's Turk and Currier's Belle II., both pointers. Ans. Neither of these dogs is registered.

G. M. H., Lacrosse, Wis.—Will you give me the names of sire and dam of the Irish setters Elcho, Jr. and Sarah, and of Jack and Jill? I want to register a dog from that stock. Ans. Elcho, Jr. by champion Elcho out of champion Noreen. Sarah is not registered. Jack by Barney out of Boget's Rhoda. Jill is not registered.

COM. WINNE has been in a position to see more of the members of the A. C. A. and to come into closer relationship with the men and clubs in their homes than any previous officer; and he has devoted the greater part of such time as he could take from business during the winter to visiting the leading canoing centers. He has not only done much in the Atlantic, Central and Eastern divisions to awake and keep up the enthusiasm of canoeists, but he has broken down the barrier of distance which has separated the Northern Divison from the others for the past three years, and by his visits to Montreal, Ottawa, Peterborough and other Canadian cities he has awakened a strong interest in the coming meet, and a large attendance seems assured from the Northern Division.

The A. C. A. Book is promised early this season by Messrs. Wackerhagen and Winne, who have been obliged to undertake the compilation and publication. Whether or no this promise is kept depends first on the pursers of the four divisions and then on the individual members. It is the duty of each purser to furnish the complete lists of members, canoes, etc., for his division, and if this is done promptly and properly the labors of the secretary-treasurer, already too heavy, are greatly lessened. It also rests with each member to send in his name, canoe, ect., early in the year if any changes are to be made in the lists.

The Butler sliding seat, facetiously called the "piazza" by American canoeists, has at last found its way into British canoeing, the Northern C. C., of Newcastle, having altered its rules to admit sliding seats not longer than the beam of the canoe; while the Royal C. C. will give a race for canoes with sliding seats at its annual regatta in June.

We venture the prediction that the trial of the Butler seat during the coming season, if it is at all thorough, will result in the general adoption of the seat in British canoeing, in which case there is hope for a renewal of international racing between this country and England.

A CANOE TRIP IN THE MAINE WOODS.

IN 1881 it was my good fortune to make a canoe trip down the West Branch of the Penobscot River, accompanied by three friends, whose excellent qualities both socially and under the more trying conditions of stream and carry have become a cherished remembrance.

I have written out these incidents from notes taken at the time, as a rest from severer labors, partly because such writing helps to recall the scenes of summer and out o' door life. Thus we can enjoy again something of the freshness of nature, and in imagination at least, breathe the resinous odors of the forest, or hear again perchance the muffled hoot of the owl, or the long shrill cry of the loon. With all comes something of rest and joy, which other pursuits cannot give.

Our party consisted of Mark, Mack, Steve and myself. Some of us had talked of this trip for quite a long time, but had not been able, till this year, to bring it about. Mack, who was a native of Bangor, and knew something of woodcraft, and I think the other members of the party had been in the woods before, as I left all preparations to them. On August 1, we started for Moosehead Lake. Mark on the steamer from Boston, and Steve on the night train. Mack had gone ahead to Bangor to see about guides, canoes and provisions. I had been in Auburn, Me., and knew nothing of the arrangements except the time of starting from Boston.

It was planned for me to meet them at Brunswick, Me., where the train from Auburn connects with the Boston train at midnight. On reaching Brunswick I inquired of the porter of the sleeping car, and learned that no such persons as I described were on board. After looking through the cars among the drowsy passengers, I concluded sleep was the best remedy for such troubles, and having secured a berth, I turned in, and awoke, or rather arose in Bangor; for sleep in a railroad car is at best a succession of prolonged rumblings, striking of hammers on the wheels, tramping of feet on the platforms, cries of "all right here," the flashing of lanterns, and again the dull rumbling, followed by a drowsy consciousness that you might sleep, perhaps, if you had a chance.

At Bangor no familiar face was seen, and I concluded sickness or some other cause had prevented my associates from starting, and after making careful search among the baggage and finding nothing, I resolved to carry out my part of the plan, and throw the blame on those who didn't.

Acting on this conclusion, I took the train for Blanchard, which was then the terminus of the railroad for Moosehead Lake. As we were nearing the end of our journey I was surprised to see one of our party going past my seat. Explanations soon followed. Only Steve was on board the train at Brunswick, and he was built on a style of architecture so composite that the porter had failed to make him out. But our party were now all on board, and on reaching Blanchard we soon got ready for our stage journey of nine miles to the lake.

About 3 P. M. we reached Greenville and mustered our forces, three guides, three canoes, with guns, fishing rods, supplies of flour, molasses, bacon, salt pork, sugar, coffee, condensed milk, etc. The landlord of the hotel was a pleasant man, and, as it was raining and blowing hard, I had made up my mind to spend the night with him. These anticipations were the result of inexperience, for our party had already resolved to be off.

When we were loaded and ready to start, and I saw the rail of my canoe within 3in. of the water, I had harrowing doubts, and wished I had taken some other conveyance. The boys laughed at my hesitation and said, "come on," and I came, but with fear and trembling. We intended to camp on an island about two miles up the lake, and headed accordingly, but soon found the waves coming over the sides of our canoes and were compelled to seek the shelter of some islands and work our way along in their lee. The camp ground was reached without any mishap, and my experience in camp life commenced. We had three tents, one for ourselves, one for the guides, and one for the luggage and provisions. In order to facilitate our work, we were divided into squads, each with a special duty, thus, while one party was pitching the tents, the second was gathering fir boughs for our beds, while a third was cutting logs of yellow birch or maple for our fire.

A camp-fire is said to require considerable art in its construction. Two logs of hard wood are placed on the ground side by side, on which the fire is built. This affords a good place for cooking, and the hardwood logs last till morning. The fir boughs for our beds have a fragrant and woodsy smell, and are believed by some to promote sleep and prevent colds. However this may be, one rarely takes cold in camping in the woods. I suspect this is due more to active exercise in June air. No doubt the wonderful appetites, of which we hear so much, are due to a similar cause. Properly prepared food tastes well in the woods, as well as out. If it is not properly prepared, camp-life will not help it much, although hard work and spare meals will tend to make one less particular anywhere.

The first trial of our canoes was a severe test. A canoe is not well adapted to a lake, as it is too light and too low. There is no danger of capsizing, but if there is much wind, the waves are liable to come over the side and fill it. But for river service probably no boat has ever been built that equals the birch canoe. It is light, convenient and safe, and has, moreover, great carrying power. There is no metal in its construction. All its materials are found in the forest. The canoe birch furnishes its covering, and the cedar its ribs. Roots of the black spruce are used for thongs, and pine pitch mixed with fat serves to stop the cracks. When injured it is quickly repaired with materials always at hand. As the draft is from 1 to 4in. it can be used in very shallow water and on small streams.

It has no keel and can thus be turned very quickly, and thrown around or off a rock by a quick motion of the paddle, which is a very great advantage in swift and dangerous water. It can readily be carried around rapids and, old or new, is never water-soaked, and with little care is always ready for use. Perhaps not least among its many merits is its shape, which tapers toward each end, so that a stroke of the paddle will propel it in the direction of the length without that constant recovery necessary in most boats. Owing to its extreme lightness and the absence of a keel it lacks steadiness in the water, and to a novice seems treacherous, for if rudely approached it shies like a maiden. The thoughtless intruder rarely escapes its swift rebuke. For me there is poetry in a canoe. Its graceful lines are suggestive of beauty, and its associations and perfect adaptation are sources of pleasure. It is not a thing of commerce. No boat-builder can furnish it. It knows naught of profits or discounts. It is born of the forest and is a part of it. While the bow and arrow of the American Indian has been fairly supplanted by gunpowder and the modern rifle, the birch canoe for forest use still retains its unquestioned supremacy.

Our next day was more favorable to lake travel and we camped near the mouth of the Kennebec River, which empties from the lake, on the west side, about thirty miles from its foot. A dam is thrown across here to control the waters of the lake, affording us a very likely place to fish, but we caught nothing. I found a few ruffed grouse, which were very tame and would almost beg to be shot. There is no real pleasure in hunting birds as tame as chickens. Our Melrose birds have learned a different trick from sitting on a limb till they are clubbed off. If they hadn't I would sell my gun for old junk and my dog to the sausage maker.

Our next day took us to Sandy Island, which is not an island, for it is connected on the west by a sandbar. This island, or promontory, extends half way across the lake, and affords a fine view of Mount Kineo, which lies about five miles north. When we reached here the wind was very high, and we were compelled to remain two days windbound. The first day we enjoyed very much, for it was a beautiful spot, warm, sunny and well protected from the cold wind. But as there was neither hunting nor fishing, it was getting a little tiresome waiting for the wind to go down.

On the second morning, as we were sitting on a log in the sun, watching Mark's futile attempts to set fire to a wet stump and listening to Mack's doleful sophistries of rent and population, I suddenly interrupted, and asked Mack if he would like to fish. "Oh, pshaw!" he said, "there hasn't been a fish here in the memory of the oldest inhabitant." This was, I thought, a safer statement than some of his conclusions of Ricado's theory; for there were no inhabitants, and never had been any, as far as I knew. Now, I have noticed that when a man begins to doubt, he is apt to prop up his weakening convictions by strong statements; so I didn't feel discouraged by his emphatic generalization, and replied, "Get your fish pole and a piece of salt pork, and come with me." Now, Mack especially prided himself on his skill in fly-fishing, and before leaving home had given me instruction in the gentle art and had kindly gone with me to Dame, Stoddard & Kendall's to select a rod and some choice flies especially adapted to Moosehead Lake trout. I had taken great interest in his disclosures of the secrets of the art, and I think he had taken some pride in me as a pupil; and now to hear me call his split-bamboo a fish pole and to suggest salt pork for bait made him groan. I think, however, something in my manner inspired confidence, for he came along slowly, and I led the way to a big pool or bog hole not far back of our camp.

Dead logs lay across and in it, some floating and some fast. A greenish skum lay in patches on the surface, and an unpleasant suggestion of malaria hung around it. It was a batrachian paradise. Frogs had pre-empted it. Or to speak more accurately, they were exercising the right of squatter sovereignty, and we emptied it, for we captured every frog in that pool.

Did you ever catch a frog with bait? A frog is not a fish, and any skill acquired in catching fish is lost on a frog. He does not seem to understand you. If you drop a fly softly before his nose he manifests no interest in your movement; you discover no nervousness nor agitation. He has an air of calmness and introspection that bewilders and baffles you. If the fly touches his nose, the eyelid nearest the source of irritations drops and rises. He has apparently solved the mysteries of this world and is once more at rest. He is cold, calm and incomprehensible. No tides of emotion ever stir the depths of his being. These peculiarities were new to Mack. A frog needs to be studied. He could catch fish, but he wasn't worth a cent on frogs.

We are not equally gifted, and each must wait the opportunity that calls for his special power. This was mine. I took an alder pole and fastened a cut line and hook to it, and attached thereto a piece of salt pork about the size of a backgammon die. Mack took a position on a stump near by and watched proceedings with evident disgust, while I dropped the bait about two inches from a frog's nose. This was, I think, a Christian frog; at any rate, judged by the pork test, he was neither Jew nor Mohammedan. There was a convulsive movement and the mouth opened and closed like the jaws of a tramp's gripsack, and he settled back into the same monumental calmness as before. The great bulges over his eyes, the aldermanic fulness of his person, helped to complete this picture of satisfaction and contentment in which there was no shadow of impending doom, although a string was even then leading from his mouth to the end of my pole. My heart shrank from my part in this act; but the thought of salt meat for supper stifled all feelings of mercy, and I landed him, kicking and sprawling in a way a contortionist might despair to imitate.

Mack soon became interested and we worked that pool for business. We captured twenty or more, without any distinction of race, color or previous condition. Meanwhile Steve had joined us and agreed to dress them if I would tell him how. I did this and also instructed him how to cook them, although I had never dressed nor cooked them myself. But Steve was a lawyer and inclined to have original notions about his food, so I didn't assume to judge of the competency of his witness in a case like this. I had heard that only particular colors should be used, and, not remembering what the correct color was, I advised to take all colors for fear we might not get the right ones. However, all went well and we all helped to eat them. The cook said they tasted well enough, but made him feel kind of squirmy. Steve said they had an oleaginous taste. I don't know what an oleaginous taste is, but presume it is something very agreeable from the number he ate. I think it was an excellent change of diet, and we slept with no more than usual restlessness, although I thought I detected in Mack's tones while asleep an extraordinary depth and sonority, and there seemed to be a want of regularity in the movement of Steve's legs, which led me to think the frogs had not preserved the same calmness as in their native pool.

Next morning we signalled the steamer that runs between Greenville and the head of the lake, and got on board, canoes and all, for Mt. Kineo House. The house, which has since been burned, stood on a point of land that extends from the eastern shore and cut half way across the lake. Mt. Kineo forms the western end of this cape and seems to rise from the center of the lake. The hotel stood at the southern base of the mountain, commanding, it is said, the finest lake scene in Maine. From the mountain may be seen nearly the whole lake, forty-five miles long. The views of Lake George, with their rocks, cliffs and forests scattered on the gray hillsides, backed by mountains, are more grand, but here, as in nearly all the inland scenery of Maine, the mountains are clothed nearly to their summits by spruce and cedar.

In the lowlands are maples and yellow canoe-birches, with the evergreens affording a fine contrast of light and dark-green. In the Umbagog basin one may look upon a hundred square miles of unbroken forest, where it seems as if the tops of the trees were the solid earth on which one might walk. For any one accustomed to the haunts of men, to cultivated fields, or even to our rugged shores, these scenes have a new and strange fascination. I wonder if it is a sense of nearness to nature that charms; or is it a taint of barbarism in us, derived from savage ancestors.

Why do we love the woods? Why do tales of the sea and forest have such a charm for children? Perhaps Plato was right. Who knows but the lisp of leaves from the groves of the infinite, and the sound of waves from the eternal shore may still linger in their young souls, and find responsive echoes in the groves, and on the shores of earth. However this may be, the sweet voices die too soon in us by hard contact with the world.

We were left at the Mt. Kineo landing, and camped in a little bay not far from the hotel. The lake widens south of Mt. Kineo, and forms a deep bay, extending eastward quite a distance into the unbroken forest. Just at dusk on the evening of our arrival, the wind had died out, and Mark and I took a canoe to explore the eastern shore and see what we might find. We paddled softly along, looking into every little cove and saw the mossy boulders marked by water lines, piles of drift wood and dry logs on the shore, bleached by the sun and worn by the beating of many waves. We glided over sandy beaches, as only a canoe can glide, and saw huge stumps thrown upon the banks, reminding us of the size of the trees that once grew on these shores.

As we rounded a small point on the easterly end of the bay, Mark pushed his paddle into the sand, and stopping the canoe, said "Look." Standing near the lake before us we saw a pine stub, dry and barkless, 2ft. or more in diameter and 40ft. high, with a single limb near the top reaching out toward the south like a giant arm, showing in majestic pantomime the way its companions had long since departed, and mocking in its grandeur the vandalism of man. There it stood, towering above the lake, round, smooth and dry, and there were dry sticks on the shore.

When I saw Mark fumbling in his pocket for matches I said "How about the laws of Maine?" He smiled, and an infant class in Sunday school could have read on his face, recent rain, moss damp, dusk, hotel a mile away. But let me look! Great Cæsar, if she were only hollow! We hauled up the canoe and examined. I crawled under the roots, where the water had washed out the earth, to see if any opening could be found in the center.

No opening could be found, and we sat down on the bank discouraged but thoughtful. After a while I noticed the pitch oozing out of some cracks in the side and told Mark I thought we could pile dry wood about the trunk, and thus reach the pitch. He at once became poetic:

"He who would quickly rouse a mighty flame,
Must begin it with weak straws."

As he quoted this from the great poet, he drew a match along the smooth portion of his canvas pants and applied it to a piece of birch bark, adding at first a few small twigs, which I had placed conveniently near, and then larger and larger ones, till soon a bright flame arose, which we, a little alarmed, attempted to put out by piling on roots and stumps until the trunk of that stub was wrapped in lambent flame, and its exposed roots were consumed with the fervent heat.

Soon with sputtering, crackling sound, the fire climbed the pitchy sides, while we launched our canoe and saw the lengthening column rise, till trunk, arm and crest were a mass of flame, which, topped by a blacky, pitchy smoke, rolled out into a murky cloud over forest and lake. Michael Angelo might have taken it for a scene of the Last Judgment, or Dante for the Inferno. Here were the fiends, the lake of fire, and the torch of Lucifer.

"There's a lantern for you, Mark. How would your Cape Codders like that to do their chores by?" This broke the spell. We realized that self-preservation is nature's first law, that the hotel with a hundred guests is in view, that a score of boats lie ready at the wharf with skilled hands to propel them. I do not remember that we felt guilty, but we thought it best to make a change. We moved, silently, swiftly moved, and darkness received us. Behind that wall of darkness we were as safe as if transported to the clouds. We were not any too soon, for immediately three boats from the hotel passed within 20ft of us.

We quickly paddled back to camp and, joined by Mack, returned in an hour to the scene. As we had expected, the hotel boats had gone. The flames were still brilliant, and the trunk was covered with glowing embers. It could now be seen that 20ft. or more of the top was hollow, and a rift had formed in the side, through which the fire had made its way to the interior and was blazing out at the top of this hollow cylinder as from a chimney. It looked like a huge upright cannon, sending forth a column of fire and sparks far above the highest trees. It was a furnace worthy of the gods. Vulcan could have forged the armor of Achilles there. The roaring of the chimney, the crackling of the flames, and the crash of falling pieces helped to complete the picture.

Soon a small seam began to open near the base of the great limb. We had been sitting on a log not far away, but we now quickly pushed our canoe out into the lake and saw the rift widen, showing the burning interior. Suddenly the huge limb began to quiver and shake as if wrenched from the trunk by some giant hand and then fell, making the forest and bay luminous.

Meantime the fire had undermined and burnt off the roots, and when the heavy limb dropped the trunk, relieved of its weight, surged in the opposite direction, and went down, crushing the trees and saplings in its course, and filling the air with sparks and splinters. The woods that had been light as day, were now suddenly dark, and glowing cinders floated out over the forest and fell hissing in the lake.

As the last act had ended, and the curtain of darkness had fallen, we returned to camp, leaving the hero of this tragedy upon the bosom of the forest that had nourished him so well, and at last had so kindly wrapped him forever in its solitude and gloom.

[TO BE CONCLUDED.]

THE A. C. A. MEET.

COM. WINNE has recently visited Ottawa, Montreal and Port Henry, N. Y., meeting with the most cordial reception in all three places, each promising a large delegation to the meet at Willsborough Point. We quote the following notices from our exchanges:

"Mr. C. V. Winne, commodore of the American Canoe Association, was dined in Cafe Parisien last evening by the members of the Ottawa C. C. and those interested in canoeing in this city. Those present were Com. Gisborne, of the Ottawa C. C., presiding; Sec.-Treas. W. B. Wackerhagen and W. Howard Brown, of the Mohican C. C. of Albany; C. Christie, Montreal, and Messrs. W. L. Scott, W. H. Cronk, R. W. Baldwin, Henry Roi, C. G. Rogers, A. Adamson, P. Pinard, C. W. Wiggins, J. A. D. Holbrook, Dr. Wicksteed, W. E. Black, P. B. Taylor, P. B. Symes and W. Wainright. After an excellent menu had been partaken of, several speeches, songs and recitations were given. Com. Winne, in response to his toast, said that he held most sanguine expectations that the meet of the Association next summer would be an unprecedented success

"Ledge Top, the palatial residence of Mr. and Mrs. W. C. Witherbee, was the scene of a brilliant reception Thursday evening given by them in honor of the vsiit of Com. Chas V. Winne, of the American Canoe Association, to the Bulwagga C. C., of which Mr. Witherbee is mate. At dinner supporting the host and hostess were the Commodore, Captain and Mrs. C. A. Neidé, Dr. and Mrs. Warner and Mr. and Mrs. Parker. At 8:30 sharp the members of the club assembled in the parlors. The old country fiddler was introduced, and set after set was formed and they went through the mazes of the merry dance until midnight, when a most tempting collation was served and the Commodore delighted the company by reciting "McFluffy's Canoe," which was followed by other recitations and songs, which closed one of the most enjoyable evenings of the winter in Port Henry.

Mr. W. H. P. Weston, of Toronto, having resigned as purser of the Northern Division, Mr. J. W. Sparrow, also of Toronto, has been elected by a vote by mail to fill the vacancy. Mr. Sparrow is one of the small delegation from the Northern Division who has been present at both the '90 and '91 meets, and is an enthusiastic A. C. A. man.

Com. Winne has appointed the following transportation committee: Chairman, I. V. Dorland, Arlington, N. J.; Wm. Stuart Smith, Captain of Rochester C. C.; Sidney Bishop, Bridgeport, Conn.; J. W. Sparrow, Toronto, Can. The site committee is not yet made up, but will be announced very soon.

The entire work of preparing and publishing the A. C. A. Year Book has this year fallen upon Com. Winne and Sec'y-Treas. Wackerhagen, and has demanded a very great amount of time and labor. They propose to make the advertising pay the cost of the book, so that the A. C. A. will be under no expense, and nearly enough ads. have already been secured, but more will be welcomed. Everything points to a large and successful meet.

THE W. C. A. MEET.

THE change of location of the W. C. A. meet promises to prove most beneficial, as the coming meet at Lake Winnebago will of necessity partake more of the character of a woodland camp than was the case at Ballast Island, and further, a strong interest in the W. C. A. is springing up in Wisconsin. One day last week Mr. N. H. Cook, of Chicago, and F. W. Dickens, of Milwaukee, and Sec'y-Treas. Woodruff met at Oshkosh and inspected Corn Point, Lake Winnebago, where the '92 meet will be held. A party of fifteen citizens, headed by the mayor, took us in charge, and many a good story was told and several good songs sang during the 8-mile ride in the big "'bus."

The point is a perfect spot for a canoe camp, 900ft. long and 85 to 100ft. wide. Beautifully wooded, and with an open circle near the end that looks as though o'd Winnebago himself had cleared it up and arranged the trees for a council ground. The beach north of the point is white, hard sand 150ft. wide, and there is good shallow bathing on this side.

On the south the shore is rocky and abrupt. The Association has secured a lease of the point for the month of July, and made arrangements with Mr. G. V. Craft, steward, and one of the owners of the Tremont House, Oshkosh (which provides one of the best tables in the State of Wisconsin). Mr. Craft will put up a cook house and mess tent, capable of feeding 100 at a time, on the narrow neck of the point which is near the shore. This will cut the camp off from the mainland and give a camp ground 90x700ft. The commissary will buy all meats in Chicago, except the chickens, which he raises on his own chicken farm.

The West and Northwest is showing the greatest interest in the coming meet and it is certain that there will be over 100 canoes in camp. Lake Winnebago is 30 miles long and 8 to 12 miles wide, and is one of the finest bodies of water in the country for canoeing and yachting. The shores are very picturesque and there are any number of interesting places to cruise to. The fishing is good in the neighboring streams.

NEWS NOTES.

One of the most energetic of the English canoe clubs, the Northern, of Newcastle on the Tyne, has just adopted the following amendments to its rules: 1. That deck seats be allowed to extend beyond the sides of the canoe, not exceeding its own width. 2. That the sail area for first class canoes be not more than 130sq ft. 4. That in Rule 26 (second class canoes) the words "and to be clench-built" (plank edges overlapping and forming lands) be eliminated. The first amendment is very awkwardly worded, but the intention as we understand it, is to allow a Butler seat, with a slide not projecting beyond the beam of, when run in, or a 30in. sliding seat for a 16×30 canoe.

The Massasoit C. C., of South Boston, has elected the following officers: Com., J. J. Kelleher; Vice-Com., J. R. Warner; Sec'y, R. S. Landers, No. 3, Winthrop Square, Boston; Treas., C. L. Ellis; Meas., E. T. Landers. The club has a membership of 35 and is rapidly increasing. The winter headquarters are at the foot of K. street, South Boston. The summer house is on Ragged Island, Hingham Harbor. Organized 1889; incorporated 1890.

The *Model Yachtsman and Canoeist* comes to us on white paper in place of the old buff color, and improved in appearance. The lines of Birdie, a fast British canoe, but of the American type, designed by Mr. R. de Quincy, R. C. C., are given, accompanied by a very fine photogravure of the canoe under sail.

The challenge cup race of the Royal C. C. will be sailed on Hendon Lake, on June 11, the annual regatta taking place at Kingston on the Thames on June 24-25. For this latter event Mr. S. F. Staples has offered two special prizes, first and second, for a race in which the Butler sliding seat will be allowed.

The following gentlemen residing in the Eastern Division have applied for membership in the A. C. A.: Howard M. King, H. S. Greenwood, Harry C. Raynes, Lowell, Mass.; John W. D. Brand, Robt. D. White, Springfield, Mass. Central Division: E. L. Shepard, Fulton, N. Y.

30. Dorchester, Dorchester.
30. Indian Harbor, Ann., Greenwich.

IN an interview with a representative of the *Evening Post* last week Mr. C. H. Tweed, the original owner of Minerva, for whom she was built at Fairlie, made the statement that he would have had a new 46-footer from the same yard ready this season if it were not for the question of light money, which might at any time tie his yacht up as Miranda was tied up for nearly all of last season. The question of duty was bad enough, involving a considerable outlay should the Conqueror case be decided in favor of the Government; but once paid, there would be an end to this matter.

The light money, however, was a much more serious obstacle, as an adverse decision in the Miranda case, now under appeal, would mean a fine of $50 for the new yacht every time she got under way; with such loss of time at each port she put into as would make it practically impossible for her to accompany the fleet on the annual cruise.

As matters are, but one new yacht has been built for the 46ft. class, while had it been known two months since that a new Fife boat with Capt. John Barr at the stick would be in the racing with Gloriana and Wasp, there would have been three or four new yachts under way before now in New York and Boston yards

It is time that the builders and shipwrights begun to realize that no man is their friend who makes yacht-owning and yacht-racing more costly and difficult; no matter what plea he may advance for so doing.

It is a most significant fact for builders and their workmen to ponder over, that yacht building has never been duller than at the present time, immediately following the efforts of Messrs. Bates, Frye and Fassett to exclude all yachts of foreign build, as well as to tax and hamper all American yachtsmen. A great part of the dulness in yachting may be laid to the Bates—Frye bill of last winter, and the attempts of last summer to collect duties and light money through which the owners of Conqueror and Miranda were deprived of the use of their yachts through a great part of the season.

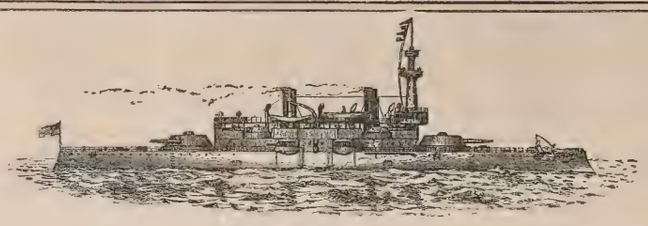
There are grounds for hope of late however in the recent decision of the courts in the Conqueror case; and particularly in the retirement, by special request of his superiors, of Commissioner Bates, the man who endeavored to prevent yachtsmen from flying the American yacht ensign over yachts of American build.

THE last number of the *Yachtsman* contains another letter from a New York yachtsman signed "Sandy Hook," which is still more severe than the one we quoted last week. We are not aware of the identity of either "Sandy Hook" or "Cringle Redivivus," but the *Yachtsman* adds this note to the last letter: "It is noteworthy that the only two letters which we have received anent the America Cup are both written by Americans of the highest standing, and both condemning the New York Y. C." The recent attempt at an explanation from Boston must be set down as the worst failure yet made by the friends of the new deed. It is announced now, however, that Gen. Paine is about to visit Europe on a pleasure trip, and while his position and ability as a yachtsman, and his personal attributes are sure to make him popular, it is not impossible that his shrewd tact may lead British yachtsmen to adopt the view so often set forth on this side, that the sole motive for the change of deed, including the dimension clause, was to protect the poor challenger.

THE latest designer who has volunteered to expound and demonstrate the laws of nature is Mr. A. G. McVey, who is to be represented in the 21ft. class by a yacht of 12ft. beam and with 60ft. on the base of her sail plan. It is not at all surprising under the circumstances that he is strongly opposed to such a mere technicality as a tax on sail, and an earnest advocate of the waterline alone. His plea for the removal of "restrictions on the designer" is rather amusing, considering that he has come into the class with a very large and powerful boat, after half a dozen or more boats of moderate power were practically completed. The last unsuccessful advocate of the laws of nature was content to pay for the power and size of his boat through her sail plan, but this new one apparently demands the right to beat a small boat by a much larger and more powerful one.

CORINTHIAN Y. C. OF PHILADELPHIA.

A NEW yacht club under the name of the Corinthian has just been organized in Philadelphia, the first meeting, at which the organization was perfected, being on Jan. 12, while the charter was obtained on Feb. 25. The officers are: Com., E. R. Coleman, sch. Norna; Vice-Com., O. D. Wilkinson, sch. Speranza; Rear Com. not yet elected; Secy., A. D. F. Bancroft; Treas., M. A. Viti; Meas. not yet elected; Board of Trustees, E. R. Coleman, O. D. Wilkinson, R. K. Neff, G. M. Freeman, W. Barklie Henry, J. Howard Gibson, Brereton Pratt, J. W. Brock, T. D. Whitaker, W. A. Parry, A. Van Rensselaer and G. B. Newbold; Race Committee, A. F. Bancroft, E. Johnson and G. M. Freeman; Committee on Admission, C. H. Brock, R. K. Neff, W. R. Henry, E. S. Farson and G. M. Freeman.



The club starts with a membership of about sixy and a fleet of twenty-five yachts. The limit of resident membership is 200, the initiation and dues being each $25.

At a special meeting on Feb. 25 by-laws were adopted providing that the control and management shall be vested in a board of twelve trustees; also, that there shall be a race committee of three non-yacht owners, a house committee to be appointed by the board of trustees, and a committee on admission of five.

This very important section was also adopted: "Any member or members of the club chartering a vessel for scientific or geographical research may fly the club burgee during the cruise of such vessel, but no vessel engaged in any commercial enterprise or cruise for profit or violating any of the rules of the club shall fly the club burgee."

The club signal is a white pointed burgee, with a red cross one-eighth in width of the hoist. The upper quarter, next to the hoist, is blue, in the center of which is a foul anchor, encircled by thirteen five-pointed stars in white.

The commodore's pennant is a blue field, rectangular in shape, with a red cross, one-eighth in width of hoist. The upper quarter, next the hoist, contains a foul anchor, encircled by 13 stars in white.

U. S. COAST LINE BATTLE SHIP

The vice-commodore's pennant is the same as the commodore's, excepting that a red for a blue field and a white for a red cross are substituted. The rear commodore's is the same as the commodore, with a white for a blue field substituted. The fleet captain, when in a boat, is to carry the private signal of the flagship in the bow.

The club has leased the Essington Hotel property, at Essington, Delaware county, comprising 12 acres of ground, extending from the shore to the railroad, which has a 14-room house, a very substantial wharf and a large barn. The house is admirably situated for a yacht club house, it being on a bluff directly on the shore, overlooking the entire harbor, and commanding a magnificent view of the islands and the Jersey shore to the southward, Chester and the Wilmington hills to the westward, and an uninterrupted view of the Delaware River from Billingsport to Deep Water Point, a distance of 20 miles.

The house will be entirely remodeled and handsomely furnished. On the first floor will be the office, library, dining room, billiard room and a large general room. The second and third floors will be used as dormitories. The basement will contain the kitchen, also storage rooms for small boats, sails, spars, etc. The grounds will be put in order for playing cricket, tennis, etc., and in the fall and winter months a series of shooting matches will be given.

The place will be in charge of a superintendent, and will be ready for occupancy by April 30.

One feature of the club's policy, as its name implies, will be to instruct and encourage its members in becoming proficient in the art of yacht designing, the science of navigation and all matters pertaining to seamanship, and particularly the personal management, control and handling of their yachts. To this end the members of the club have subscribed funds for the purchase, and the club have contracted with Messrs. Clay & Torbenson, of Camden, N. J., for the building of three yachts of the following dimensions, to be finished by May 1: Length over all, 19ft. 4in.; length on waterline, 17ft. 8in.; beam, 6ft 4in.; draft, 4ft. 4in.

By the Seawanhaka rule of measurement for time allowence and classification, which the club has adopted, their racing length will be 17 87-100ft. and sail area 322ft. These boats will be in charge of a competent man, and will be for the use of club members at all times. They will be perfectly safe and particularly non capsizable, and will be a good school for the younger members to learn the art of boat sailing. Races will be given for the smaller classes during the season restricted to Corinthian crews exclusively.

Essington, better known as the Lazaretto, is situated on Tinicum Island, ten miles from Philadelphia, and three miles from Chester. The Delaware River, bordering on Essington, is divided by Maiden and little Tinicum Islands, the main channel being to the southward of these islands. From Maiden Island to Hog Island the United States Government has constructed a stone dyke, making the north or back channel unnavigable from the upper end, except to those who are familiar with a small opening between the islands, thus making the back channel for a distance of two miles a natural and safe harbor for any size vessel.

It is within three miles of comparatively open water. Stores and supplies of all kinds can be obtained in the place, and it is within 25 minutes ride of Twenty-fourth and Chesnut streets, via the Chester branch of the Reading Railroad. These advantages and the locating of the Corinthian Yacht Club here, and it being the anchorage and headquarters also of the Philadelphia Yacht Club, will combine to make Essington the future headquarters of Philadelphia yachtsmen. —*Philadelphia Ledger.*

THAT FAMOUS OLD CUP.

UNDER the above title the *Marine Journal*, of New York, quotes in full our editorial of Feb. 11 on the new deed with the following comments:

"American yachtsmen must have discovered that since the New York Yacht Club made the new deed of gift under which an international contest for the America's cup must be adhered to, the public's interest in yachting has been on the wane. Yachtsmen may argue as other independent institutions and wealthy men have, that the public be —— blowed! What do we care for the public? We build and sail our yachts for our own pleasure, not for the public's. To that argument we would reply in the dignified phrase recently attributed to our present Governor: Rats! There is no person of common sense, or club in the country that does not covet the good will and approbation of the public.

"The New York Yacht Club has long been an institution that Americans have delighted to honor. But when it remodeled the deed of gift and made it out of the question for foreign yachtsmen to compete for it, the public were deprived of a rare aquatic treat, and their resentment has shown itself by their indifference to any of the New York Yacht Club races. By the public we do not mean the cousins and aunts and personal friends of the members of the club, but those who used to take pleasure in chartering steamboats and other craft to witness the annual regatta of this famous old club.

"An un-American act such as this will do more toward withdrawing the patronage and interest of our people in any organization than any other known cause. Here is what FOREST AND STREAM has to say about this matter in a late issue.

* * * * * * * * *

"The above, from one of the best yachting authorities in the country, places the blame of the breaking up of international yacht racing where it properly belongs and in language not to be mistaken.

"The international yacht races, in which our fleet of Boston sloops won, brought representatives from every State in the Union to this city, while thousands of men and women came from neighboring cities, filling our hotels, places of amusement and excursion steamers to their fullest extent.

"It is to be hoped that when the next generation get possession of that homely old mug, the America's Cup, they will give our British yachtsmen a fair show to compete for it."

YACHT DESIGNING AND YACHT DESIGNERS

IN spite of the very bad weather of March 9 an interested and attentive audience of yachtsmen were present at the Seawanhaka C. Y. C. house and listened for over two hours to Mr. W. P. Stephens's lecture on the above subject. After calling attention to the transition of the last dozen years by which the planning of yachts had passed from the hands of the builder to those of the designer, the lecturer outlined the work of the designer in providing a safe, comfortable, seaworthy and speedy vessel, and then proceeded to draw out the various qualities of floating bodies by means of small models in a vessel of water. A cylinder of wood was first launched, showing its buoyancy, the water displaced being caught in the pan of a pair of scales and balanced against the body itself. The addition of a mast to the cylinder caused it to capsize, but under the same conditions a rectangular block of wood floated upright. A fin of metal being added to the cylinder, it also became possessed of stability, but of a different kind from the flat block. In this way the various terms, buoyancy, displacement, stability, initial stability, range of stability, were explained.

The lecturer then dwelt on the necessity of the determination of the general features of the design by the owner and on the selection of certain qualities and the sacrifice of others, such work resting with the owner rather than the designer. The selection of the specific dimensions and elements was then taken up, including an explanation, by means of special models and diagrams, of the center of buoyancy, center of effort, etc. The subject of drafting was illustrated by a special model which called out general applause, a skeleton model in cardboard and wire of the yacht, in its proper position within the three planes of projection, in box form; the manner of projecting the water lines and sections being shown by silk threads. Finally the sides and back were folded out, making the flat design. The calculations and other technical details were briefly described, a large design and sail plan with a handsome half model of a modern 46ft. yacht being used. The actual work of designing was very carefully analyzed and discussed, the old method of building from the model was described in full and compared with the new, and the lecture closed with a very interesting historical sketch of the origin and growth of designing in America and abroad.

Ventura, 40 footer, has been sold by Mr. Waterhouse for S. J. Colford to T. W. King, of the Massachusetts Y. C.

THE NAVAL EXHIBIT.

UNIQUE among the other exhibits is that made by the United States Naval Department. It is in a structure which, to all outward appearance, is a faithful full-sized model of one of the new coast-line battleships. This imitation battleship of 1892 is erected on the lake front in the northeast portion of Jackson Park. It is surrounded by water and has the appearance of being moored to a wharf. The structure has all the fittings that belong to the actual ship, such as guns, turrets, torpedo tubes, torpedo nets and booms, with boats, anchors, chain cables, davits, awnings, deck fittings, etc., together with all appliances for working the same. Officers, seamen, mechanics and marines are detailed by the Navy Department during the Exposition, and the discipline and mode of life on our naval vessels are completely shown. The detail of men is not, however, as great as the complement of the actual ship. The crew gives certain drills, especially boat, torpedo and gun drills, as in a vessel of war.

The dimensions of the structure are those of the actual battleship, to-wit: Length, 348ft.; beam, 69ft. 3in.; and from the waterline to the top of the main deck, 12ft. Centrally placed on this deck is a superstructure 8ft. high with a hammock berthing on the same 7ft. high, and above these are the bridge, chart-house and the boats.

At the forward end of the superstructure there is a cone-shaped tower, called the "military mast," near the top of which are placed two circular "tops" as receptacles for sharpshooters. Rapid firing guns are mounted in each of these tops. The height from the waterline to the summit of this military mast is 76ft., and above is placed a flagstaff for signaling.

The battery mounted comprises four 13in. breechloading rifle cannon, eight 8in. breechloading rifle cannon, four 6in. breechloading rifle cannon, twenty 6lb. rapid-firing guns, six 1lb. rapid-firing guns, two Gatling guns and six torpedo tubes, or torpedo guns. All of these are placed and mounted respectively as in the genuine battleship.

On the starboard side of the ship is shown the torpedo protection net, stretching the entire length of the vessel. Steam launches and cutters ride at the booms, and all the outward appearance of a real ship of war is imitated.

YACHT BUILDING.

AT Bristol the Mayberry steam yacht is going together rapidly in the shop, the Clyde 21½ rater has been boxed and shipped to New York, where she will be put aboard a steamer for Glasgow. Mr. H. P. Benson's 21-footer is about completed, and the sister fin keel, for Alanson Bigelow, Jr., is in frame. The centerboard 21-footer, for an unknown Boston owner, is planked and decked, and the Morgan 35 and Kersey 25 are all ready put for their fins.

At Smith's yard, South Boston, the McVey 21 footer is well advanced. The Boston *Globe* publishes the following interesting description:

"In the first place, she is undoubtedly the broadest of the centerboard fleet, having an extreme beam of nearly 12 feet. Great sail-carrying power at small angles of heel is thereby attained, and from the fact that the base line of the sail plan will be about 60 feet, some idea may be gained of the big area of canvas which will rise above.

"Over all she is about 32ft., possibly a little more to the end of the stem head, and the 11ft. overhang is about evenly divided, fore and aft.

"Her greatest draught is at the sternpost, where it is a little under 2ft. Her midship section is quite well aft, and her lowest freeboard, a little aft of that, is 19⅝in. Forward her freeboard is 2ft. 9in. and aft is about 2ft. The stem is finished with a small reverse curve, and the stern will be about 2ft. across and deep enough to carry the word 'Snark,' the name by which the boat will be known.

"In model she is a little out of the true 'splasher' class, for her floor is not flat and she has considerable dead rise. Her true keel has a long and even sweep from stem to stern, and the water lines, as they round into it forward, give the rather full and overhanging bow which now seems the proper thing. The run is clean and the lines of the body very easy everywhere. The deadwood aft is merely built in to hold the big rudder and to make her steadier off the wind, something she is sure to need with her enormous sail plan.

"Her midship section shows a straight line from the garboard to the turn of the bilge, which is itself rather a hard one and is mainly above the water line. The boat has, therefore, to be considerably heeled before she realizes the full stability given her by her beam.

"Her mast will be stepped well forward, only 3ft. 9in. from the end of the load water line, and the centerboard, some 9ft. long, will be just aft of it.

"Extreme lightness has been aimed at in her construction, and has possibly been carried to too great an extreme.

"Her oak keel is, however, a solid one, for it is a 3in. plank, nearly a foot wide in the centre, and tapering to 4in. aft and 2in. forward. It is bent to place and has the slot for the centreboard cut from its centre. The bent oak frames are very light and are alternately of two sizes, the heaviest being sided 1¼in. and moulded 2in. at the keel and the lightest sided ⅞in. and moulded 1½in. at the keel.

"The planking is double and is of ⅜in. white cedar with white lead between the inner and outer skins. The inner planking is nailed to the frames, while the outer planking is fastened to the inner by galvanized iron nails clinched on the inside. The deck beams will be 3in. by ⅞in. and the deck itself will be ¾in. white pine.

"The whole effect of the construction is that of lack of sufficient strength to stand the heavy strain of the big rig, but practice may show this to be only an effect. The boat's displacement is light and she will not carry much ballast except that which is 'live' enough to get itself out to windward.

"Afloat she should be a good-looking craft. Her best racing play must be in smooth water."

The Borden 21, building by James McIntyre for himself, will not have a fin keel, as first stated, but a bulb keel, similar to Le Lezard, lately illustrated in our pages. She will be 21ft. l.w.l., 35ft. over all, 7ft. 6in. beam and 5ft. draft. Her name will be R. D., or Radical Departure, and she will be built on McIntyre's composite system.

Another 21-footer, for Mr. Merrill, of Boston, is building by Allan Hay, at Lynn; and at Quincy W. S. Faun is at work on a 21ft. sloop, designed by him.

It is predicted that Mr. John B. Paine will have a 21-footer in the class by the time the racing begins.

On March 11 the 21-footer designed by Stewart & Binney for Mr. Fowle was launched at Lawleys, and the centerboard 21 by the same designers is now under way in the shops, a shoal model with about 10ft. 6in. beam.

The Stewart & Binney schooner is in frame at Essex.

The Gardner schooner is well plated up at Lawley's, and only good opinions are heard of the model and the workmanship.

Mr. John B. Paine has lately received from Higgins & Gifford, Gloucester, an experimental dory, 16ft. 3in. over all, 12ft. l.w.l., 4ft. 2in. beam and 1ft. 9in. depth, to which he will fit a fin keel.

Mr. Waterhouse has an order for a 50ft. l.w.l. cruising schooner for a New Haven yachtsman.

ICE YACHTS ON LAKE CHAMPLAIN.

THE brief racing season on the Hudson and Shrewsbury closed several weeks since, but on Lake Champlain the ice is still in good condition, and a very exciting race was sailed on March 12 by the following yachts of the Excelsior Ice Y. C.: Calamity, Chas. Chiott; Volunteer, Crosby Brothers; Gloriana, Henry Chiott; Gossoon, John Benson; Lulu, Chas. La Plant; Jack Frost, Johnson Brothers, and Cyclone, Daley Brothers.

The course was 16 miles, the prize being a challenge pitcher and cup. The wind was very strong, capsizing Gossoon, Volunteer and Gloriana, and compelling Cyclone to withdraw.

Lulu finished in 31m. 30s., winning by an allowance of 37s. Jack Frost 31m. 26s., Calamity finished 32m. 1s.

It Reaches Them All.

My little ad. in the FOREST AND STREAM has put me in correspondence with boating men all over the country. E. W. DELANO.

ROCHESTER, N. Y.

THE NICE REGATTA.

THE first of the Mediterranean races was sailed at Nice on March 12 with seven starters, Valkyrie, Blue Rock, Castanet, Oretta (Deerhound) Noël, Cygne and Martial. Valkyrie won easily. Next day a race took place between the steam launches of the steam yachts Eros and Alva, the handsome launch built last year by Seabury & Co. for the latter yacht winning with the greatest ease. The sailing race was abandoned for lack of wind.

NEWS NOTES.

The sudden and unexpected deaths of two well-known New York yachtsmen were announced on Monday last, both dying at the Hotel Bon Air, Augusta, Ga. Mr. Francis Pares Osborn, who died of peritonitis on Saturday, was born in Brooklyn in 1841, and has been well known in the business and yachting circles of New York. He was a member of the New York Y. C., Corinthian Y. C., Royal Nova Scotia Y. S. and the Royal Southampton Y. C., and for the past two years has owned the steam yacht Golden Fleece. Mr. Osborn was not a racing man, but a keen and enthusiastic cruiser, the Golden Fleece, which he remodeled entirely, being in commission throughout the whole season. He had been unwell through the winter, but a fatal termination was unlooked for.

Mr. Edgar Stirling Auchincloss, whose death took place on Sunday, was well known and popular in business and club life, as well as in yachting, being a member of the firm of Auchincloss Bros. and of the leading social and yacht clubs of New York. With his brother, Mr. Hugh D. Auchincloss, he owned Mischief for several years, and afterward built and owned Katrina. He was an intimate friend of Mr. James Coats, the Scotch yachtsman, and when Madge was sent out here in 1881 she was under his charge. He built and owned a number of small craft. His death was due to consumption, at the age of 44.

On March 9 the Newark Y. C. elected the following officers: Com., W. H. Adams, yacht Triton; Vice-Com., F. J. Hespers, yacht Adela; Sec'y, Edward F. Atchison; Financial Sec'y, Thomas F. Cuff; Treas., Charles Schade; Meas., James Sanford. Trustees: Lysander Wright, Jr., A. Chapman, W. B. P. Urich, William Murray and Edward L. Phillips. Delegates to Yacht Racing Association: Charles E. Cameron, Edward L. Phillips and Charles Schade.

The New Haven Y. C. elected the following officers on March 10: Com., H. A. Seymour; Vice-Com., H. L. Holcomb; Rear Com., T. F. Hammer; Sec'y, William A. Chamberlain; Treas., G. R. Chamberlain; Meas., Frank H. Andrews; Fleet Surgeon, W. W. Hawkes. Trustees: George E. Dudley and Charles N. Holcomb. Regatta Committee: Lewis A. Elliott, William A. Foskett, Jr., and Charles E. Graham.

Messrs. Clay & Torbensen, of Camden, N. J., are about to move to their new works at Gloucester City. They are building several 18-footers, with sloop rig, from a design by Mr. C. H. Brock.

The Pavonia Y. C. has just appropriated $2,500 for the purpose of adding another story to its house at Atlantic Highlands.

Volunteer will be launched shortly at Lawleys', her bottom having been red-leaded, and will lie in the basin all summer. Gen. Paine will make a trip to Europe and so will not fit her out. Marguerite will take her place on the railway for alterations to her lead.

Alert, schr., has been sold by Mr. Waterhouse to John N. Luning, of San Francisco, who will fit her out at once for a cruise to Bermuda. Alert was designed by Mr. Henry Bryant, and her lines and interior were illustrated in the FOREST AND STREAM of Jan 12-19, 1888.

The Marine and Field Club has decided to change the date of its annual regatta from June 4 to June 11, as the Larchmont spring regatta takes place on the former day. This will bring the Marine and Field race on the Saturday after the New York Y. C. annual on Thursday, June 9.

On March 2 the Haverhill Y.C. elected the following officers: Com., Walter L. Hicks; Vice-Com., John Crassin; Secy., Albert J. Jackson, 10 Plummer street, Haverhill, Mass.; Treas., Elroy Dwinnell; Fleet Capt., Varnum Cobbourn; Regatta Com., John Crossin, Varnum Cobbourn, Wm. Wells.

On March 9 the Williamsburgh Y. C. elected the following officers: Com., Isaac Brush; Vice-Com., Theodore Meyer; Sec'y, George Simes; Treas., William Martin; Ass't Sec'y, Michael Toepel; Port Captain Ernest Shilling; Serg't-at-Arms, Caleo Barker; Steward, Henry Roth

Mr. N. L. Stebbins, so well known to yachtsmen through his photos and books, has joined the Art Publishing Co., of 182 Boylston street, Boston, as manager of the photographic department of the concern. Mr. Stebbins will continue his old business of marine photography at the new address.

Decoy, schooner sharpie, has been sold by the H. S. Wood estate to H. H. Cook, of New York.

Sunbeam, steam yacht, Lord Brassey, was at Kingston, Jamaica, on March 1.

Jas Hughes	25	25	25	24	24	23	23	22	22	21—231
Wm Weber	25	25	24	24	24	23	23	22	21	21—227
C Bauchle	24	24	24	23	23	23	23	22	22	21—227

The medal winners in their respective classes were: Class A, W. J. Hennessy, 234; Class B, C. L. Pinney, 240.

MILLER RIFLE CLUB, Hoboken, Wednesday evening, March 9.—The scores made in the shoot for weekly class medals are appended below. The conditions were 10 shots, off-hand, 25-ring target, possible 250:

First Class.

C Judson	25	25	25	25	25	25	24	24	24	22—244
D Miller	25	25	25	25	24	24	24	24	23	23—242
F Liell	25	25	25	25	24	24	24	23	23	23—241
A Meyns	25	22	25	24	24	23	23	23	22	21—235
E Fischer	25	25	24	24	24	23	23	22	22	22—234
F Brandt	25	24	24	24	23	23	23	23	23	21—233
Capt R Dewey	25	25	24	24	25	23	23	22	22	21—233
L Sohl	25	25	24	24	24	23	23	22	21	20—231

First class medal won by C. Johnson with a score of 244.

Second Class.

R Thurk	25	25	24	24	24	23	23	23	22	21—231
J H Kruse	25	24	24	24	24	24	23	23	22	21—231
R Zoch	25	25	24	24	24	23	23	23	22	20—231
F Kloepping	25	25	24	23	23	23	22	22	22	21—230
F Landolt	25	25	24	24	24	23	21	20	18	18—222

Tie for this class medal will be decided next week:

Third class.

A Stadler	25	24	24	23	23	23	23	23	20	18—226
H Seltenreich	25	24	24	23	23	22	22	21	21	19—224
H F Meyer	25	24	23	23	21	21	20	20	19	19—214
H Vanderheyden	25	23	22	22	22	20	19	19	19	19—210
J J Devett	25	23	22	22	22	19	19	18	18	18—205
F Kammel	25	24	22	20	20	20	20	19	18	17—205
F Dunsteadt	25	24	23	21	20	19	19	18	18	17—204

Third class medal won by A. Stadler with a score of 226.

A rather interesting ten-men team match took place in Jersey City last Wednesday evening, the 10th inst., between teams representing the Excelsior Rifle Club, of Jersey City, and the Puritan Rifle Club, of Newark. L. P. Hansen, of the Excelsiors, made the highest score in the match, 245; Ward Channing followed with a 240. C. Kopf made the highest score for the Puritans, 239. F. Danger making 237. After a tussle the Excelsiors proved the victors by 63 points. The team averages were none too good on both sides, the Excelsiors making an average of $230^{8}/_{10}$ and the Puritans $224^{3}/_{10}$. The scores made were, 10 shots, off-hand, 25-ring target, possible 250:

Excelsior Rifle Club, Jersey City.

F Danger	24	25	23	22	23	23	25	24	24	25—237—2245

The regular monthly meeting of the club took place March 2 at headquarters, 80 Hudson street, Hoboken. August Thurk and Henry Vanderheyden were elected members. The committee of arrangements for the club's coming annual festival, which takes place at the Union Hill Schuetzen Park on Decoration Day, meet regularly now and are as busy as bees, they intending to show the members, when the day arrives, that they worked hard to make the festival a success.

John Casper, a member of the Miller Rifle Club, Hoboken, and the Palisade Rifle Club, Jersey City Heights, died at his home, 52 Ogden avenue, Jersey City Heights, on Monday, March 6, of consumption. He was in his twenty-eighth year. His is the first death since the Miller Club was organized. He leaves a wife and three children. John had a way of taking hold of a learner of rifle shooting, and speaking to him, would convince him that by not following the rules laid out by him he would never become a shooter. His pupils were usually turned out shooters.

Blencker Co. No. 39, Germania, Schuetzen Bund, Capt. Albert Maehneking, holds its semi-annual prize shoot for moneys and medals at headquarters, Russell & Roedel's Schuetzen Hall, First and Jackson streets, Hoboken, on March 20. Five gold medals and $50 will be distributed as prizes among the marksmen. The committee of arrangements consists of Gustav Fiedler, Capt. Albert Maehneking, Claus Van der Lieth, D. Paasch, A. Czeggneck, John Helpert and A. Dahl.

J. Straubinger, a member of the Human Rifle Club, of Jersey City Heights, recently committed suicide by shooting himself in the head with his Winchester rifle. He had been out of work for some time and becoming despondent decided to end his life. He placed the muzzle of the rifle up to his head and pulled the trigger with his toe. He was 43 years old.

Palisade Rifle Club, Captain John Reinhardt, Jersey City Heights, Thursday, March 3:

A Malz	25	25	24	23	23	23	23	22	22	20—230
H Boddey	25	25	24	23	22	22	23	22	21	21—227
A Rossy	25	24	23	23	22	22	21	20	20	20—220
Capt J Reinhardt	25	24	24	22	21	21	21	19	19	19—215
J Kehrwald	25	23	22	22	21	21	21	20	20	20—215
C Burk	25	24	23	22	21	20	19	19	19	19—211
Jas Johnson	25	24	23	22	21	20	19	18	17	17—206
R Edgar Jr	25	24	23	22	21	20	19	18	16	12—200

The Palisades sent a handsome floral offering and a committee to attend the funeral of their fellow member John Casper, on Wednesday, March 9. The committee were Captain Reinhardt Jacob Kehrwald, Charles Burk and Adolph Rossy.

The Wm. H. Ellis Democratic Association, of Hoboken, recently distributed the prizes won at its last target shoot, which took place in Rock Cellar Park, Guttenburg, on Washington's Birthday. First prize was secured by President Wm. Kern, of the Jersey City Fire Commissioners. He took a handsome and costly pair of bronze statuettes. Geo. Johnson secured second prize, a $20 gold piece. Fire Commissioner Geo. Fuessel, of Hoboken, took the third prize, $15. Fifty-three others, who hit the target three times, secured prizes in moneys and useful articles valued at from $10 to $5 each. One hundred and four members hit the target but twice; they secured prizes worth $3.50. Thirty-eight who hit the target once took prizes of $3, and forty-four who did not hit anything were delegated to put their hand in a bag and draw for a choice for the rest of the prizes, which were valued at $2.50 each.

The Schuetzen Club, Hoboken, are arranging for a large prize shooting and bowling festival. Gold medals will be distributed among those who attend the affair and make the highest scores. A medal will also be presented to the most popular Schuetze.

A match was also arranged during the evening to take place between the Puritans and Greenvilles, which took place at the range of the latter, in Metropolitan Hall, Ocean avenue, Jersey City, last night. The result and scores will be given next week.

GREENVILLE RIFLE CLUB, Jersey City, Friday, March 12.—Ten shots, off-hand, 25 ring target, possible 250:

C Scheelein	25	25	25	24	24	24	24	23	23	24—241
C Boag	25	25	25	25	24	24	24	23	23	22—240
J Kaiser	25	25	24	24	24	23	23	23	23	21—235
H Chavant	25	25	24	24	23	23	23	22	21	19—229
H Spohn	25	24	24	23	23	23	22	22	22	21—229
J Cook	25	25	24	23	23	23	22	21	21	21—228
J Dodds	25	24	24	23	23	23	22	21	21	20—226
H Purkess	25	24	23	23	22	22	21	21	21	19—221

The club is becoming justly popular, thanks to the efforts of Capt. Wm. H. Robidoux and every official and member. A majority of the members can be seen at headquarters mostly every Sunday morning, choosing teams and shooting to see which team pays for the lemonade for the party. Once in a while the losing side generally asks for a recount.

Miller Rifle Club, Hoboken, March 2 The scores made to-night in the medal competitions are below, 10 shots off-hand, 25-ring target, possible 250:

First Class.

A Meyns	241	L Sohl	238	Dr F Simon	233	
G Plaisted	239	F Liell	237	Capt Dewey	232	
E Fischer	229	D Miller	235			

Second Class.

J H Kruse	234	J Carragher	226	F Kloepping	218
A Think	230				

Third Class.

A Stadler	223	H F Meyer	210	F Dunsteadt	203
H Seltenreich	219	F Kammel	208	H Vanderheyden	203
W Korback	218				

The regular monthly meeting took place to-night. August Thurk and Henry Vanderheyden were elected to membership. The committee of arrangements reported that the preparation for the coming shoot and festival were nearly completed. The printing, including tickets and posters, will be out this week.

The Miller Rifle Club is gradually receiving a larger membership. It now numbers 71, this being the correct count. Two more proposals have been received, the parties being P. Drewes, of New York, and John Kroog, of Hoboken. The books will close when the membership reaches 100.

The Schuetzen Club "Fidelia," of Hoboken, Captain Paul Schunke, is arranging for its first annual ball, which takes place at Russell & Roedel's Schuetzen Hall, First and Jackson streets, Hoboken, on April 24. A feature of the evening will be the presentation of a handsome gold medal to the most popular Schuetzen captain in New Jersey. The committee in charge are Lieut. John Stein, 1st Shooting Master Fred'k Kroeger; 2d Shooting Master Henry Wirth and Capt. Wirth. A match has been arranged for a $25 gold medal between John R. Havens and Judge Geo. F. Seymour, of Hoboken. Each man is to fire a hundred shots. The match will take place at Thurk's ranges in a week or so. Mr. Havens is the favorite in the betting.

Constable Thomas Wright defeated Louis Thiebault in Hoboken last Saturday evening, 476 to 473. Each man fired 20 shots. A match of 25 shots a piece followed between Wright and Thiebault on one side and John R. Havens and Counsellor Jacob M. Bretzfeld on another:

T Wright	596	J R Havens	611
L Thiebault	583—1,179	J M Bretzfeld	592—1,203

The present shoot for medals in the Miller Rifle Club closes in a few weeks and the winners presented with the medals and promoted a class higher; the latter, however, relates only to the winners in the second and third classes. Dave Miller will, without doubt, win the medal in the first class, he having won the medal eight times. J. H. Kruse will undoubtedly win it in the second, as he has won the emblem fourteen times, and Henry Seltenreich will prove to be the winner in the third class, he having already won the third class medal thirteen times. The shoot for weekly class medals is a favorite institution with this club. A medal is offered in each class to be up for a period of six months each. On a weekly shooting night the man making the highest score in his class wears it for a week, and the shooter winning it the most times in the period mentioned retains it, and, as already mentioned, the winner in the second and third class is promoted to a higher class.

JAY H. KAY.

The Greenville Rifle Club.

JERSEY CITY, N. J., March 12.—Scores shot on their range, Metropolitan Hall, 604 Ocean avenue, on Friday, 11th inst.:

J Kaiser	235	*J Spahn	229	G Purkess	221
*C Boag	234	*H Chavant	228	*J Hill	237
*C Scheelein	241	J Cook	226	*J Dodds	223
		W C Collins	228		

*Medal winners in respective classes.

For so young a rifle club (not having been in existence a full 12 months) the G. R. C. has a remarkably large collection of rifles of various patterns, makes, etc., and with one exception all new and first-hand. Each rifle is fondly prized by its owner for its particular merit or merits; but the palm-bearer of all this collection is the excepted one noted. It is acknowledged to be the pet of the club, and the high scores put up by it are attributed to its mascot-like qualities. The figure paid for this favorite would not buy a derby hat.

W. C. COLLINS, Sec'y.

Gallery Match at Marion.

J. Rebhan vs. C. E. Bird. Hudson R. C., shot on Hudson R. C. range March 8, distance 25yds., 50 shot match:

Wurfflein Rifle and Pistol Club.

PHILADELPHIA, March 12.—The 10-shot handicap match, 20 scores to count, for five prizes of 30, 25, 20, 10 and 5 per cent. of the entries, 10 per cent. deducted for expenses, proved very interesting for the month of February. The conditions were as follows: At 25yds. off-hand, two scores of 10 shots each to count, possible 500. Points allowed each contestant except Messrs. Travis, Mehard and Mountjoy. Wm. Wurfflein's scores of 242 in the early part of the month placed him beyond the reach of all other contestants, as the following scores will show:

			Handicap.	Total.
W Wurfflein	242	242	13	497
J J Mountjoy	245	246	0	491
H J Mehard	245	245	0	490
Dr Gardiner	239	240	10	489
E Travis	242	243	0	485

Scratching for first place seemed to be in order at the rooms of the Wurfflein Rifle and Pistol Association for this week's competition and several good scores were put up by the several "good ones" of the club at 25yds. off-hand, using Wurfflein rifles on ring-targets, possible 250 points:

J J Mountjoy	245	A J Yergey	241
E Travis	244	W Wurfflein	240
J G Dillin	244	Leslie Wood	238
H J Mehard	243	Dr Gardiner	236
J C Wurfflein	233		
T F Shonert	232		
R L Dubbs	224		

The Lischke Rifle Club.

JERSEY CITY HEIGHTS, N. J., March 9.—Scores of this week; 110it., 25-ring target:

J Scharly	25	24	24	23	23	23	23	22	22	21	—230
Capt A Lischke	24	24	24	23	23	23	22	22	22	22	—228
R Reicherz	25	23	24	23	23	23	22	21	21	20	—225
I Schulte	23	23	22	22	22	21	20	20	20	15	—208
A Lengenberger	25	23	22	22	20	20	19	19	17	17	—204
A Paetzold	24	23	22	21	21	20	10	18	18	17	—202
H Strater	25	24	23	23	20	20	19	19	15	13	—201
H Dyroff	24	23	23	22	21	21	19	19	15	13	—200
F Steidel	25	21	21	20	20	18	18	17	17	13	—190

AUGUST PAETZOLD, Sec'y.

Zettler Rifle Club.

NEW YORK, March 9.—At the regular weekly gallery shoot for the season's gold medal of the Zettler Rifle Club, held at 219 Bowery, on Saturday evening, March 8, the following excellent scores were made on the 25-ring target, possible 250 points:

H Holges	248	F Schmidt	245
B Walther	247	M B Engel	244
J A Boyken	245	C G Zettler	244
G W Plaisted	245	B Zettler	243
C Percival	245	Gus Nowak	241
F Hecking	241		
F Lindkloster	241		
F Ross	241		
M Dorrler	236		
M Tropp	235		

GUS NOWAK, Sec'y.

Gallery Match in Newark.

THE following scores were made in the return match between Bauder and Watts vs. Chapman and Berger, shot on the Howard range, in Newark, N. J., on March 9. Each man fired 50 shots on the 25-ring target:

Bauder	238	244	240	240	239—1201
Watts	242	241	245	239	238—1205—2406
Chapman	239	240	239	240	241—1199
Berger	237	244	241	244	235—1201—2400

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, March 8, at George McCune's shooting gallery, 146 South Halsted street, Chicago. Conditions were ,25yds., 25 shots each, open sights, free off-hand position, Massachusetts target, possible 300 points:

G McCune	267	J Hosie	258	C A Hankle	256
T Ford	267	M Tatro	258	W J Gibbs	256
A McBean	266	R Taylor	257	H A Parker	255

The English National Rifle Association.

THE English National Rifle Association has just published its report of entries, scores etc., of its last Bisley meeting. For the last few years certain of the Volunteer shots have been writing to the papers and objecting to the prizes given for civilian competitors and saying they were a loss to the association and had to be paid for by the Volunteers out of their own entries for the volunteer prizes.

It is interesting to find by the report that this idea is entirely erroneous; the civilian prizes have had many more entries this year than last (which means of course money made by the association), but there has been a great falling off in the entries for volunteer competitions, leaving a deficit on the year's working of over $75,000.

This shows that the best thing would be to increase the number of civilian competitions for revolver, hunting and sporting rifles, and cut out a lot of the volunteer Martini rifle competitions if the association wants to pay expenses.

The most paying competitions and those which had the largest increase of entries were the revolver competitions. the entries for which increased from 1,441 in 1890, to 2,762 in 1891, being nearly double; the Colt at the "running deer," for hunting rifles, had 147 entries as against 45 the year before; the Holland for double barrel hunting rifles at the "running deer," had 192 entries against 18 the year before; the sporting rifle (called "any rifle" in England) had 1,576 entries as against 1,473 the year before, in the competitions devoted to it. The Martini rifle competitions for volunteers had a decrease of over 2,000 entries.

In the revolver competitions, the scores were on an average nearly one point better than the year before, which shows an improvement in skill. The report says: "Revolver practice has proved to be so popular that a large addition to the number of targets will be necessary." A double set of rails is also to be provided at the "running deer" range, so as to enable both the "running deer" and "running man" to be run "at any time when desired," instead of on alternate days.

Beideman Rifle Club.

BEIDEMAN, N. J., March 11.—The following are the official scores made by members of the Beideman Rifle Club for the week ending to-day. Conditions, 21yds., ¼in. 25-ring target, 10 shots per string, off-hand.

E Gardner	237	E Gergev	229	W Gilbert	227
J L Wood	236	J Wurfflein	227	E McCoy	225
H Myers	231				

The "Forest and Stream" Tournament.

FOREST AND STREAM has received the versions of both the Hudson and Essex Amateur Rifle Club in reference to the disputed shots in match shot on the latter's range on Feb. 18, and as the members of each club are equally confident of their position in the matter, the FOREST AND STREAM considers it advisable to declare said match off. The scores are therefore void and the match will be shot again on Thursday, March 31, on the Essex Amateur range in Newark.

The Heidenreich Rifle Club.

NEW YORK, March 14.—Enclosed please find circular of our bullseye prize shoot, which was opened yesterday under very encouraging circumstances, the receipts being more than we anticipated. Our members have also made the following scores at the 25-ring target, distance 100ft.: Val Horn 236, John Aizeldinger 235, Ed. Winter 235, Wm. Dalton 233, George Schlicht 233. Daniel Dieneen 232, Louis Enders, 231, Wm. A. Hicks. 231, Chas. Bush 221, Geo. Eberhardt 216, Wm. Stuckel 214, Wm. Müller 206.

Empire Rifle Club.

NEW YORK, March 10.—The following scores were made by members of the Empire Rifle Club at their weekly shoot on March 9 at their headquarters, 12 St. Marks place, distance 100ft., 25-ring target:

W Rosenbaum	237	H Fetzer	207	A Rosenstraus	221
C Zettler, Jr.	232	W Fetzer	233	G Hillmeyer	191
H Zettler	228	B Zalm	230		

B. ZAHN, Sec'y.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

March 17.—Falcon Gun Club monthly shoot, at Dexter Park.

March 17 and April 16.—Atlantic Rod and Gun Club, semi-monthly shoot at West End, Coney Island.

March 18.—Jeanette Gun Club monthly shoot, at Dexter Park.

March 19.—New Utrecht vs. Amersfort Gun Clubs, team match, at Woodlawn Park.

March 19.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

March 19.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

March 19.—John Erb's Old Stone House grounds, live bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J. Ten bird sweep for 400 bs. hog.

March 19.—Sweepstake shooting at Watson's Park, Burnside, Ill.

March 19.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

March 19.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

April 21.—Essex Gun Club, monthly prize shoot, at live birds, for members only, Jersey City Heights Gun Club grounds, Marion, N. J.

March 19.—Open sweepstake, open to all, 15 live birds, $10 entry, birds extra. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J.

March 22-23.—North Side Gun Club tournament; one day at targets, second day at live birds, Queens County Driving Park, Maspeth, Long Island.

March 23.—Hackettstown Gun Club tournament, live birds only, at Hackettstown, N. J. Address James L. Smith.

March 23-24.—Jacksonville Gun Club third annual tournament, $500 guaranteed, Jacksonville, Fla.

March 23-25.—Emmettsburg Gun Club tournament, at Emmettsburg, Ia.

March 24.—Emerald Gun Club, at Dexter Park.

March 24.—Grand sweepstake, open to the world, 25 live birds, $20 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's "Old Stone House" grounds, Bloomfield avenue, Newark, N. J. Begin at 1 o'clock P. M.

March 25.—Eppig and Engelbrecht vs. Ibert and Schlieman, 50 birds per man, at Dexter Park, Long Island.

March 25.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

March 29-31.—Wilmington Gun Club tournament, at Wilmington, Del.

March 30.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

April 1.—Crescent Gun Club monthly shoot, at Dexter Park, Long Island.

April 7.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.

April 7-8.—Union Gun Club tournament, at Springfield, Ohio.

April 14.—Newark Gun Club, monthly prize and open shoot, at live birds, John Erb's, Bloomfield avenue, Newark, N. J.

April 15.—Fourth shoot of Connecticut Shooting Association, at Union Grove, Hartford, Conn.

April 16.—Parkway Gun Club, monthly shoot at Dexter Park, Long Island.

April 19-20.—Eagle Grove Gun Club tournament, at Eagle Grove, Ia.

April 19-21.—Elk Park Shooting Tournament, two days at artificials, third day at live birds, Royersford, Pa. Address H. E. Buckwalter, Royersford, Pa., or Harry Thurman, Germantown, Pa.

April 19-21.—Detroit tournament, Detroit, Mich. Address John Parker, Manager.

April 28-30.—Al Heritage's annual tournament; two days at targets, third day at live birds; Marion, N. J.

April —.—Second team contest of the New Jersey Trap Shooter's League, at Passaic City, N. J.

April —.—Ridgewood Gun Club tournament, at Ridgewood, N. J.

April —.—Territorial Sportsman's Association, first annual tournament, at Las Vegas, N. M.

May 2-7.—Fifteenth annual tournament of the Missouri State Game and Fish Protective Association, Kansas City, Mo. W. V. Reiger, Sec'y.

May 3-6.—Hill City Gun Club tournament, at Vicksburg, Miss.

May 4-6.—Canton Shooting Club tournament, at Canton, Ill.

May 10-12.—The Ohio trap-shooters' annual tournament, Columbus, O.

May —.—Knoxville Gun Club, annual tournament, at Knoxville Tenn.

May —.—Mankato Gun Club tournament, at Mankato, Minn.

May 10-12.—Geneseo Gun Club tournament, at Geneseo, Ill.

May 10-13.—Nebraska State Sportsmen's tournament, Grand Island, Neb.

May 16-19.—Capital Gun Club annual tournament, at Washington, D. C. Arthur S. Mattingly, Sec'y.

May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleck, Sec'y.

May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.

May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.

June 6-11.—Eighteenth annual tournament of Illinois State Sportsmen's Association, at Chicago. W. L Shepherd, Sec'y.

June 13-18.—New York State Association's Thirty-fourth Annual Convention, at Syracuse, N. Y. Chas. H. Mowry, Sec'y.

July 5-7.—Atlantic City Gun Club's tournament, at Atlantic City, N. J.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. —.—Hacketstown Gun Club tournament, at Hacketstown, N. J.

Aug. 23-26.—International tournament, Des-chre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hacketstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

Manufacturers' and Dealers' Association tournaments:
Staunton, Va.—Second week in April.
Savannah, Ga.—First week in May.
Pittsburgh, Pa.—Second week in May.
Brooklyn, N. Y.—Second week in June.
Watertown, N. Y.—Fourth week in June.

DRIVERS AND TWISTERS.

The Dexter Park Trap-Shooting League is now an assured fact, the Unknown Gun Club, Glenmore Rod and Gun Club, Parkway Gun Club, Emerald Gun Club and Linden Grove Gun Club having already signed the roll. Mr. Miller, proprietor of Dexter Park, will give a trophy valued at $150, to be contested for by teams of 10 men each, each man to shoot at 10 live pigeons. Fuller details will be given in our next issue.

* * *

W. H. Hartlove, the well-known sporting goods dealer of Third and French streets, Wilmington, Del., is one of the most enthusiastic members of the Wilmington Rod and Gun Club, and during the Baltimore shoot he did some lively hustling for the tournament to be held at Wilmington on March 29, 30 and 31. The shoot will be held on the Riverview Baseball grounds, which may be reached by the Riverview electric cars. This will be the initial venture of the club, and no pains will be spared to make it an enjoyable occasion. The programme comprises ten target events each day, and all purses will be divided into four moneys. The first day's events, in order, will be at 10, 10, 15, 20, 15, 10, 20, 15, 25 and 15 singles. Second day, 10, 15, 20, 20, 25, 10, 15, 20, 10 and 15 singles. Third day, 10, 15, 20, 10, 15, 20, 25, 15, 10 and 25 singles. The entries will be $1 for 10-bird events, $1.50 for 15-bird events, $2 for 20-bird events and $2.50 for 25-bird events. The chances are that an immense crowd of amateurs will be on hand to enjoy the sport.

* * *

Semi-tropical Florida is out with an attractive programme for a target tournament to be held at Jacksonville on March 23 and 24 by the Jacksonville Gun Club. The shooters will be divided into expert and amateur classes, the former to shoot at unknown and the latter at known angles. There will be three guaranteed purses each day, the aggregate amount for the two days being $500. Event No. 3 on the first day, at 15 singles, will have a $75 purse, the entrance being $4; No. 6, at 20 singles, has a $75 purse, and No. 8, at 25 singles, $5 entry, has a $100 purse. On the second day $75 is guaranteed, this being at 15 singles, $5 entry. A like amount is guaranteed for an event at 20 singles $4 entry, and $100 is the size of the purse for an event at 25 singles, $5 entry. On the second day there will also be a contest open to teams of any three men at 20 singles per man, $15 entry per team. W. F. Coachman, president, Jacksonville, Fla., will give any information desired.

* * *

A few lines in regard to the word "champion" will not be amiss. The title of "World's champion" is claimed by John L. Brewer. Whether his claim to the title is well founded or not has no bearing on the case. This I do know, however, that Brewer and Fulford never contested, and never pretended to contest for the title of champion. On the last day of the Brewer-Fulford matches at Marion, after the men had agreed to shoot a 250-bird match, Brewer said: "Mr. Fulford, if you beat me, I'll throw up my hands!" Not one word was ever said about the affair being a "championship contest." Mr. Fulford never used the word "champion" in connection with himself, nor did he ever sanction its use; so there is no reason for him being called a "dethroned champion."

* * *

Al Heritage, the well-known "Old South Paw" of Jersey City, informs me that he has concluded to run a big tournament on his Marion grounds on April 28, 29 and 30, the first two days at targets and the third day at live birds. A great big programme is being arranged and Mr. Heritage says it will open the optics of the shooters. There will be no barring and no handicaps in any of the events, but everybody will take an equal chance to win or lose. The big attraction on the third day will be an open-to-the-world sweep at 25 live birds, $25 entry, Hurlingham rules to govern. In order to create a little excitement Mr. Heritage will give a $10 gold piece to the best looking contestant during the three days shoot and another $10 shiner to the homeliest man. A third coin of like value will be awarded to the man who uses the poorest gun. A big restaurant tent will be pitched on the grounds and there will also be a comfortable tent for the use of the press representatives.

* * *

There was great scurrying at Acton Park, Baltimore, about 12:30 on March 10. The rain was coming down in torrents and the wind blowing at almost cyclonic speed. Nearly all the tents had flies stretched in front, and before the wind had been blowing for many minutes the flapping of the flies loosened the pegs and those in charge of the tents were obliged to brave the pouring rain in order to capture the aforesaid flies. This was by no means an easy task with the canvas controlled by a fifty-mile wind. Squires's tent suffered several rents before the unruly appendage could be secured. The writer attempted to get control of the fly of the FOREST AND STREAM tent, but at the very instant when he thought he was master of the situation there came an extra gust of wind which whipped the canvas away from his grasp, and this would probably have wrecked the tent had he not succeeded in pulling up two side pegs, thus striking the tent.

* * *

Hereafter the New Utrecht Rod and Gun Club will shoot at Woodlawn Park, Long Island, on the last Saturday of each month. On Saturday this club will pit a team of 10 men against a like team from the Amersfort Gun Club, of Flatlands. Artificial targets will be used.

* * *

Next Wednesday, March 23, some lively work will be seen at Hackettstown, N. J., when James L. Smith will hold an all day's shoot, with live birds as targets. About 600 birds will be on hand, and a big crowd of shooters have promised to attend.

* * *

John Erb's "Old Stone House Grounds," will be the scene of a big shoot on Thursday, March 24. The attraction will be an open to all sweep at 25 live birds per man, the entry being $20. There will be one money for every four entries so that all will have an equal chance at the purses. This shoot will begin at 2 P. M., and will be preceded and followed by impromptu events at the option of the shooters. Several Connecticut shooters are expected. On the same will occur the contest for the historical 400lb. hog.

* * *

After considerable discussion as to live bird shooting ability Robart Bare and William Kraemer, of the East Side Mutual Gun Club of Newark, N. J., have concluded to settle the question of supremacy in a contest before the traps, and have concluded arrangements for a 25 bird match for $50 a side, to be shot at Weidenmayer's Park on Saturday, March 19. Plenty of birds will be on hand to oblige those who wish to indulge in sweepstake shooting.

Our club directory is not quite complete and we would be pleased to receive the club name, secretary's name and address, date and place of regular competitions from those clubs who have not already supplied the same.

* * *

There has been considerable talk in trap-shooting circles both for and against the present expert rule, and FOREST AND STREAM would be pleased to see this question thoroughly ventilated through its columns. Write out your views, brother sportsmen, and see if it is not possible to devise some scheme by which all shooters can be placed where they have an equal chance to win or lose.

* * *

At the February shoot of the Trap Shooters' League, of New Jersey, the Rahway Gun Club drew the option for the March shoot. It was stated at that time that, although the Rahway club was a paid-up member of the league, it was positive that it could not be certain of mustering a team. I find that the club has decided not to accept the privilege of holding the March shoot on its grounds, and that the shoot will be held under the auspices of the Passaic City Gun Club, at Passaic. The club is a strong organization, with a membership of close to fifty, and has a well-appointed shooting house and grounds. Had the first shoot been held on any day other than a holiday this club would have come out with a team. The shoot will be held on Friday, March 25, the team contest to begin at 12 o'clock. This event will be preceded and followed by open sweepstakes. The traps will be in position at 9:30 A.M.

* * *

The initial tournament of the Wilmington Rod and Gun Club to be held at Wilmington, Del., on March 29, 30 and 31 will be a great affair judging from the hustling already done by the members and the "promises to appear" that they have received. The shoot will take place on the Riverview Base Ball Grounds, which can be reached by electric cars from any part of the city. Each day there will be ten regular events at ten, fifteen, twenty and twenty-five targets; the purses will be divided in four moneys; there will be no handicaps and no one will be barred. W. H. Hartlove, a prominent sporting goods dealer of Wilmington, who is one of the prime movers in shooting matches, was at the Baltimore tournament hustling in the interests of the Wilmington affair.

* * *

Going down to the Baltimore tournament on one of the Royal Blue Line trains the conversation naturally took on a shooting turn. In the party were Major R. H. Breintnall, of Newark, who had just returned from a trip to Florida, Enoch D. Miller, of Springfield, H. A. Penrose, of New London, Neaf Apgar, of New York, and a pair of sporting scribes. Incidentally Mr. Penrose remarked that he and C. W. Dimick, of Boston, had about completed arrangements for a series of best three-out-of-five competitions between teams of ten men each from Connecticut and Massachusetts, each man to shoot at twenty-five or fifty artificial targets for a purse of $100, the first shoot to be held on the grounds of the Wellington Gun Club, at Boston, the date to be fixed later. "If we win this race," said Hal, "we'll challenge a ten-man team from the State of New Jersey." As a matter of course a discussion as to the merits of the shooters of the "Wooden Nutmeg" State and New Jersey had to follow, and the upshot was that Messrs. Breintnall, Miller and Apgar agreed to get together a team of ten men "to show the Connecticut people how to break crockery." As soon as the Jersey team is selected dates will be fixed. The teams will probably shoot at fifty artificial targets per man.

* * *

Anent the above all the team members must be *bona fide* residents of the State they represent. The composition of the Jersey team will probably rest on Enoch D. Miller, R. H. Breintnall, Neafe Apgar, Ferd. Van Dyke, James L. Smith, Wm. Sigler, Ernest O. Geoffroy, Thos. Dukes, T. H. Keller, Eddy Collins, J. Warren Smith, Thos. Brantingham, W. R. Hobart, J. R. Beam and Frank Post. C. H. TOWNSEND.

Chicago Traps.

CHICAGO, Ill., March 12.—Mr. E. D. Fulford is still in Chicago and will probably remain till the end of the month. It is believed that he wishes to shoot a match or so to get even after the late defeats. He will probably secure the matches, and should his physical condition so improve as to give him a good cheek and trigger finger, he should win several matches, any or all of which could probably be arranged without much trouble just now. We should not under-rate a man for one defeat, nor over-rate him for a single victory. Some of the men who would shoot a race with Mr. Fulford within the week are Jack Winston, of St. Louis, who would beat him; Geo. Kleinman, who is shooting badly but might beat him; A. J. Atwater, who is shooting a strong gait in sweeps, and W. P. Mussey, who shoots between 85 and 90 in most matches. Either of the latter two might beat Mr. Fulford, though it is only very recently they could think so.

Mr. Fulford's average on the full number of pigeons he has shot at in Chicago is just over 78. On Wednesday he got in a tie in a miss-and-out with Dick Cox, and proposed a divide on the $20. Dick, who never shot anybody out in his life, made a large bluff, and said the $20 was too little to divide, and they would better shoot it out. Mr. Fulford missed his bird and Mr. Cox killed his, thus winning much glory and a huge contrst. After that bets were freely offered that Mr. Fulford couldn't fall out of a tree and hit the ground. It was also suggested that he couldn't beat a drum, and that it would be impossible for him to mak 90 with a lead pencil. This was, however, *sotto voce*. Such uncharitable remarks I do not think well timed. I think Mr. Fulford is off form, as well as being of a bit lower class than was claimed for him. He may recover part of his lost ground. Meantime he seems a very pleasant, gentlemanly fellow, and is popular among our shooters.

South Chicago Club shot last Wednesday in a heavy wind, and some of the birds were very hard. One bird started from No. 1 trap, flew against a flush stake and broke its neck. This sounds like a wild story, but they tell me it is really true.

Mr. J. L. Wilcox and Mr. R. S. Cox shoot a race, 100 birds, $100, next week. In reply to query, Mr. Cox remarked that selected birds were not wanted. "Plain cooking pigeons, at 20 cents apiece, are good enough for me," said he. Last Wednesday was a day of tribulation for John Watson. A part of his profit lies in the sale of the dead pigeons, and it was the exception that any of the South Chicago Club and visiting shooters killed a bird. That was what made John Watson jab his hands so far into his peajacket and walk around looking as if he had lost a friend.

To-day a big free bluerock shoot, under the management of Mr. R. O. Heikes and Mr. Grubbs, acting for the Cleveland Target Co., is given at Burnside, with live-bird sweeps also open. Mention of this in another column.

Kansas City has a new $10,000 shooting park, I hear, managed by a company. I do not get full particulars, but suppose this will be a very noticeable shooting place.

Chicago has one gallery where regular, full-sized bluerocks are shot with the shotgun—very pretty sport, by the way. This is at Conry and Duffy's Chicago Rifle Range, 120 Madison street. At this gallery there are also four 50-ft. tube-ranges for rifle target shooting. The whole gallery is modern and comfortable in the extreme. E. HOUGH.

Mr. Hartley Will Back Brewer.

Editor Forest and Stream:

I have been a constant reader of FOREST AND STREAM for several years and believe to-day that it is *the* sporting journal of America, and why it should ever publish such a muddled up account of two great men like Messrs. Budd and Fulford is something I do not understand. In looking over Mr. Hough's report I notice where he mentions Captain Brewer's rifle name more than once. Now to this I wish to call your attention and ask if any gentleman sportsman will criticise an innocent man without any cause.

Captain Brewer called at my office on Saturday. I asked him if he had met many of the Chicago shooters. He told me he "called at Mr. Mussey's billiard hall and met a large number of young gentlemen, who received him very cordially, and Mr. Mussey himself rather insisted upon the Captain's staying, and almost assured him a match should he remain a few days longer." I asked Brewer why he did not remain longer than he did. He told me "he had received a letter from home of important business," and I myself know positively that the business which called him home was more important than all the pigeon matches he could have made in Chicago or any place else. I then asked his opinion of the Chicago gentlemen as trap-shots. He said "he did not know so much about the rising generation, and it is reasonable to suppose they are good men with the gun." I then inquired about the Kleinman brothers. He told me "he did not suppose there was a family born which would rank so high as marksmen as the Kleinman brothers." Brewer also told me that Abe Kleinman at one time was considered the best man in America with the gun, and it is a sure thing that he was the best man in the world if he held such honors in this country; for all the best shots were Americans. We must be liberal enough to acknowledge that the veteran is competent to judge after his long experience in this and other countries; and one of the sweetest remarks I ever heard made by a sportsman came from Brewer's lips, when he told me that "were he to shoot a match with any of the Kleinman boys he would be satisfied for them to hold the stakes and judge the match themselves, knowing everything would be conducted in the most gentlemanly manner."

Now I will openly express myself as to the pigeon shooters of the world. I am tied down in business and cannot leave home very long at a time. It was I who authorized Captain Brewer to issue his challenge to the world, which is known to all your readers and which appeared some months ago. I wish to state further that I am ready and willing to back Captain Brewer $1,000 to $10,000 a side. It is not necessary to know the man at all, but the money must be up. I am very anxious to see a match, and have seen Elliott, Budd, Fulford and many more that I could name; but do not mind telling you that the "old man" can always play for my money up to $10,000. I will take the responsibility upon myself and will give any man $100 that will defeat Brewer. They need not post one cent of money, need only to pay for birds should they be defeated; or I will bet $100 to $500 that Brewer can stop any man in the world in a 100 or 200 bird match, birds strictly first class and loser to pay all expenses. Should any one accept this notice through your columns he will receive prompt attention; or should any gentleman like to try for my $100 I will forward the amount to your office immediately on notification.

As to the report, it is fair to presume that the gentlemen and sportsmen of the Eastern States do not want to be imposed upon on account of Mr. Fulford's defeat but the manner in which it was written was certainly an insult to all of our sporting friends in the East. If Mr. Budd is a better man than Fulford let us shake his hand and acknowledge it without any slurs or connecting disinterested parties. HARRY H. HARTLEY.

PHILADELPHIA, Pa., March 14.

Chicago Shooting Clubs.

OUR rich supply of live news this week compels us to defer the account of the Chicago gun clubs.

North Shore Gun Club.

PORT RICHMOND, March 14.—At the regular monthly shoot of the North Shore Gun Club the following scores were made, each man shooting at 25 singles from 3 unknown traps. We tried the new U. S. pigeons and they gave general satisfaction: Taintor 13, Rawson 17, Murray 16, Scofield 18, Zimmerman 8, Schabert 15.

L. SCOFIELD, JR., Secy.

The Trap on Long Island.

BROOKLYN, N. Y., March 7.—Monthly shoot of the Waverly Gun Club. First event, club shoot, 10 bluerocks, for gold medal:

G Helmstead	0100000001—2	H Gollman	0010100000—2
H Von Staden	0110011000—4	M Schmidt	0100000100—2
L Grane	1000000001—2	J Rathjen	0000100000—1
W Schumacher	0010100001—3	O Hilmer	0010101001—5
F Finklebeiner	0000000001—1	C Mohrmann	0011110100—5

On the shoot-off for the medal Hilmer won the competition. This was the wind-up of the medal season and the prize becomes the property of President Helmstead, who had previously won four competitions. Von Stader won it three times, Schmidt twice, Schumacher, Gollm and Hilmer each once during the year.

In a 5-target sweep which followed Schumacher took first on 3 breaks, second going to Hilmer. H. Gesenville, a visitor, broke 4.

Third event, 5 live birds, $1 entry, 3 prizes:

G Helmstead	01212—4	L Grane	00212—3
J Rathjen	11211—5	H Von Staden	20021—3
W Schumacher	21211—5	M Schmidt	12021—4
O Hilmer	12102—4	F Finklebeiner	12202—4
C Mohrmann	12122—5		

March 3.—The North Side Gun Club held a pleasant shoot for averages at the Maspeth Driving Park to-day, the conditions being 7 live birds per man, handicap rises. The scores:

C M Meyer	1101111—6	E Barlow	1111011—6
J Tiernan	1111111—7	J N Meyer	1111011—6
C Siemp	1110011—5	H Lampke	0001110—3
C Meyer, Jr	1110111—6	J Manning	1110101—5
A Duryea	0100101—3	C Mencke	1111101—6
J Grady	1011101—5		

The heavy rain and cold northwest wind bothered the shooters a great deal.

March 9.—Monthly shoot of the Fountain Gun Club at Woodlawn Park; weather fine, birds fair; conditions 10 birds per man, handicap rises, for club prizes:

Dr Shields	1221111222—10	W Gilman	0020000000—1
C W Wingert	1121112111—10	Dr Schwartz	0020021221—6
A Purdy	1121102011—7	H Blattmacher	2021001012—6
Dr Van Zile	1120202122—7	C Plate	1021012118—8
Maj Eastman	1122011000—6	M Lindsley	2222122010—8
S Ziglio	0000011001—3	"Wanda"	2220212022—8
A Crook	10.0110200—5	C Detlefsen	1121001001—6
C E Morris	2210011021—7	L C Hopkins	0002001001—3
J E Orr	2200212120—8	W Lair	2000110100—4

Sweepstake, 3 birds, $1 entry, 25yds. rise, two moneys:

Dr Shields	122—3	M Lindsley	020—1
C W Jones	112—3	Dr Schwartz	111—3
C Plate	101—2	"Wanda"	022—2
C Detlefsen	111—3	W Lair	010—1
C E Morris	201—2	A Crook	110—2
Dr Van Zile	202—2	W Gilman	012—2
J E Lake	000—0	Major Eastman	100—1

Morris and Cook div. second on shoot off.

March 9.—The monthly shoot of the Parkway Gun Club took place at the Dexter Park to-day, the weather and birds both being good. Each man shot at seven live birds, classified rises, for club prizes and season's averages. The scores, ties being shot off at 3 birds, then miss and out:

Class A.

E Helgans (30)	2211122—7	J Blake (28)	1111231—7
I Short (28)	1012011—5	P Leibinger (28)	1021101—5
S Bennett (28)	1121101—6	A Botty (?3)	2111031—6
G Remsen (30)	2112211—7		

Helgans won first.

Class B.

H Ehrichs (25)	0021120—4	H S Bookman (25)	1222122—7
A Andrews (25)	1121100—5	L Moeller (25)	1101012—5
E Steinheuer (25)	1111211—7	H Brons (25)	0111111—6
H Brannwell (27)	1111101—6	H Selover (27)	2101111—6
C Wissell (25)	1112121—7	H Krickman (25)	2112102—6

Wissell first in ties of 7.

Class C.

W Strasser (23)	2102022—5	J Link (23)	1010020—3
J French (23)	1210100—4	W R Hubbard (28)	1206111—5
G O Berry (21)	2102121—6		

The club badge and class A special prize went to Helgans; class B special to C. C. Wissell; class C special prize to W. Strasser.

March 10.—Unknown Gun Club, monthly club shoot, at Dexter Park. Strong southeast wind during first part of shoot, then heavy rains; birds good. Ties not shoot off on account of rain; 7 live birds, club handicap rises. The scores:

E Vroome	1202121—6	J Markhoff	2000011—3
H Knebel, Sr	1212120—6	L Kobb	1110221—6
J Rankin	0102120—4	D Snipe	1023121—6
H Van Staden	1020020—3	J Harned	0101002—3
J Skidmore	1202012—5	J Akhurst	1012111—6
M McGuinness	1212102—6	C Detlefsen	0112101—5
H Smith	0201200—3	C Plate	1121012—6
I Hyde	1212122—7	F Elfer	0012001—3
J Flynn	2102122—5	J Borkland	2210111—6
J Vagts	2102221—6	C Munch	2111012—6
L Deetjen	1212110—6		

Ike Hyde won the trophy for the second time this season. Referee, Mr. H. Knebel, Sr.

West End grounds, Coney Island, semi-monthly shoot of the Atlantic Rod and Gun Club, for the Newton diamond badge and special club prize, 10 live birds, club rises. Strong southeast wind; good lot of birds. The scores:

C E Morris (30yds)	1111210111—9	R R Street (25)	1101100210—6
J Scharff (27)	2100011122—7	G Roderick (25)	0000102100—3
C Furgerson (28)	1121111111—10	G Kleish (24)	0200202221—6
G Nostrand (28)	0021102101—6	D Monsees (30)	1201121110—8
R J Sutherland (26)	2000022201—5	R Dwyer (30)	2201011102—7
J B Voorhees (30)	1210202022—7	C Mohrmann (27)	0002011212—6
J Murphy (25)	2021202001—6	G Morris (25)	2011121211—8
R Burkhardt (25)	2002111012—7		

Furgerson won both the above prizes, this being the second time he has won the club prize. C. E. Morris won second prize. On shoot-off for third and forth prizes the results were as below:

Third prize tie:

Monsees	0222	G Morris	1200

Fourth prize tie:

Voorhees	1111	Scharff	210
Dwyer	1110	Burkhardt	withdrew

March 11.—Wauregan Gun Club, team match at 25 live birds per man, 25yds. rise, 80yds. boundary, for a consideration:

W H Brickner	1112202211111212011000102—20
J Fay	2121122101230222100320002—18—38
M Fay	1102121011222221000320000—18
J J Loonie	1102210220201012010101111—18—36

Sweepstake, 5 birds each, 25yds. rise, $5 entrance, all to winner:

W H Brickner	10100—2	G W Silberhorn	11101—4
M Fay	11001—3		

Match, 5 birds each, $10 and birds:

W H Brickner	12211—5	G W Silberhorn	11012—4

Sweepstake, 10 bluerocks, $1 entry, 3 prizes:

W H Brickner	0110001010—4	J Fay	0011011101—5
E Bornboeft	0001101101—5	M Fay	0111111101—8
F Kerker	0000110000—2	H Greenville	1110110111—8
G W Silberhorn	0111110111—7	J Loonie	0111010110—6

Match, $10, 20 blue rocks:

Brickner	01111101111101100101—14	Silberh'n	01101101010110011111—13

The wind blew a gale all the afternoon, this making the shooting extremely difficult.

March 12.—Clear weather, a light wind and a fair lot of pigeons were the combinations at Dexter Park to-day. The principal attraction was a team match between J. Schlieman and F. Ibert vs. P. Eppig and G. Engelbrecht, the conditions being 50 birds per man, Hurlingham rules, for $100 a team. The scores:

J Schlieman	11111211111211211211101—24
	12011012101111210010211111—21—45
F Ibert	11121110000010011022l0910—14
	22122001200102000010100000—11—25—70
P Eppig	02011111200120102110220022—17
	12011021206o10100191Ho1020—13—30
G Engelbrecht	11211121211121010101212201—21
	12111110111210101001021—19—40—70

Referee, Mr. H. C. Simenschloss.

The tie was not shot off, but another match similar to the above will be shot at the same place on March 25.

The following events followed the above match:

Ten bluerocks, $1 entry, 3 moneys: Eppig 8, Link 7, Greff 6, Short 6, Seeburger 6, Neir 3.

No. 2, same: Greff 9, Eppig 8, Short 8, Seeburger 5, Neir 5.

Baltimore Inter-State Tournament.

THE initial tournament for 1892 of the Inter-State Manufacturers' and Dealers' Association has passed into history. As stated in our last issue (and by the way, do you know that the FOREST AND STREAM was the only sporting paper that had a line in regard to the tournament last week? If you don't know this, just compare the various papers and draw your own conclusions as to which paper showed the most progressive spirit), the weather on Tuesday, March 9, the day set for the opening of the shoot, was such as to keep the shooters indoors. Early in the morning, before any one thought of leaving his comfortable couch, the god Pluvius took a notion into his somewhat erratic head that the country in the vicinity of Baltimore needed flushing down, and without consulting even the newspaper correspondents, he opened the rain valves and "let 'er flush." About 10 o'clock Hal Penrose, the manager of the Association, accompanied by genial John Parker, his efficient assistant, and half a dozen others, drove over to Acton Park to see how the grounds looked; but one short and quick look satisfied them in regard to the quantity of water over the grounds, and they returned to the Carrollton House with very long faces and made up their minds to kill time as best they could until "the clouds rolled by."

At this time there were over fifty shooters in town ready for the fray, but as soon as they found that the fun would have to be postponed a number of them started for their homes, having arranged to remain but one day. The members of the party amused themselves in a variety of ways and did their best to feel comfortable, but they were far from it. Toward night the rain stopped, but it was 9 o'clock on Wednesday before there was any positive and cheering break in the clouds. After that hour, however, the weather was fine and everybody felt in a holiday humor.

The shoot, which was held under the auspices of the old established Baltimore Gun Club, took place at Acton Park, a favorite summer resort in Anne Arundel county, just across from Baltimore, on the south branch of the Patapsco River. This is the favorite resort for Baltimore's young and old people during the summer months, and was formerly used by the Baltimore Base-ball Club for its Sunday games. Now, however, no Sunday ball playing is allowed. The place is owned by Samuel G. Acton and is provided with a homelike hostelry and lots of Coney Island paraphernalia for the amusement of the masses.

The traps, ten in number, were set in a line parallel to and about 75yds. from the bank of the Patapsco River, which at this point is fully 2½ miles in width. This gave a plenty foreground and enables shooting to be done much later than if the shooters had to face the hills in the rear. Early in the day the ground was wet and soggy, and fortunate were those who had forethought enough to wear rubber boots or overshoes. In the afternoon, however, the grounds were in good condition.

Immediately in rear of the traps was a semi-circle of tents, which gave the place somewhat of the aspect of a camp ground. The post of honor—the extreme right of the line—was occupied by the attractive and open-to-all-comers tent of FOREST AND STREAM. The left of the line—the second post of honor—was held by the striped tent of our Western contemporary. The third post of honor—the center—was held by the big tent of Henry C. Squires, "Little" Neaf Apgar being presumably in command, although it was extremely doubtful at times whether "Little" Neaf" or the army of shooters held the fort. On the right of FOREST AND STREAM'S tent was the large new one of the S. S. Powder Co, and to the left of this the American Wood Powder Co. had pitched its teepee, but where, oh! where was Milt Lindeley? And echo answers, low and sweet, "where?" Too much Mardi Gras, Milt! On the left of the Squires tent was the red and white tent of the W. Fred Quimby Co. Next to this was a space for the canvas mansion of the Colts Patent Fire Arms Co., but the tent failed to appear in time to be pitched. John Parker, boxer, wrestler, swimmer, oarsman, all-round athlete and talented tournament manager, came down from Detroit on the previous Friday and got everything in apple-pie order. Traps were in position, wires stretched, scoring board up and carloads of standard Keystone targets were on hand, this target having been decided upon by the Baltimore Gun Club.

It was nearly 11 o'clock on Wednesday before the shooting began, the shot which inaugurated the season of 1892 being fired by Enoch D. Miller, of Springfield, N. J., who scored a break. The opening event had 29 entries, three of these being experts; six semi-professionals and the remainder amateurs. There was considerable dragging in the first event, but after a little hustling by Hal Penrose and John Parker, everything moved along smoothly.

At this stage of the game there were on the scene Enoch D. Miller and Neaf Apgar, the former representing the Standard Keystone Company and the latter looking after the interests of Henry C. Squires; Wm. H. Wolstencroft, Philadelphia's pet expert, of gun-wad manufacturing fame; W. R. Fieles, the popular bonifacé and target smasher, of Christiana, Pa.; Major R. Heber Brientnall, of the South Side Gun Club, of Newark, N. J.; C. W. Tuttle, of the Auburn (N. Y.) Gun Club; J. Jones, of Bengies, Md.; P. F. Boudy, of Hagerstown, Md.; A. C. Krueger ("Blackbird"), of Wrightsville, Pa. Of the above the first three shot in the expert class and the others in the semi-professional class. In the amateur class there were John W. Fulford, of Williamsport, Pa., who is rapidly addept at targets or birds; Colonel W. Cleaver and J. Evans, of Camden, Del.; J. F. Bucher, of Hanover, Md.; J. Gordon, of Pittsbugh, Pa.; W. H. Hartlove, of Wilmington, Del., secretary of the Wilmington Gun Club; Captain J. R. Marr, also of Wilmington, Del.; E. V. Cordall, of Front Royal, Va.; W. Parks, of Wilkesbarre, Pa., representing the Wilkesbarre Gun Company and the Parry Gun; Walter P. Cady, of New London, Conn., treasurer of the Standard Keystone Co.; F. L. Somerson, of Staunton, Va.; W. Hicks, of Towson, M. D.; J. P. Hadden and H. W. McVicker, of Winchester, Md.; Eugene Denny, of Royal Oaks, Va.; C. E. L. Brelsford and Jas. M. Worden, of the Harrisburg Shooting Association; R. B. Clark, of Altoona, Pa.; and a number of local shooters.

The semi-professional rule, used here for the first time, seems to have been received in altogether a different spirit from what was expected considering the adverse criticisms advanced. Anent this question, how absurd it is for any one who shoots at the trap to say "put us all on an equal footing and we'll stay with you." On this, the opening day, Apgar averaged 89$^{3}_{10}$ per cent. under expert rules while Miller ran up 81.4; in the semi-professional class Feiles made 88 5 and Breintnall 81.4; in the amateur class Tuttle led with 85 and Fulford was next with 81.4. On this basis what chance for their lives would the bulk of the amateurs stand if they were compelled to shoot even with Miller, Wolstencroft, Heiker, Feiles, Hobart, Breintnall and dozens of others who are now in the upper classes. It must be confessed that Apgar's average of 89.3 under expert rules was phenomenal and that ordinarily the expert will not go far above 85, while the semi-professionals will probably run from 83 to 93, this of course referring to the best of these classes. These men, one and all, placed in the amateur class would cut the pace at 90 to 96 per

cent., and then where would the amateur's chances be? I am fain to say that at present the expert rules are *a little too hard*. The idea of handicapping is to place all on an equal footing, *i. e.*, to give all an equal chance to win, but after close study I am inclined to think that those in the expert class are handicapped to be sure losers in the long run. Of course where there are but two or three experts competing two of them have a chance to partially save themselves on average money, but the others have to go to the wall. What is needed is a rule that will be a compromise between the present expert and semi-professional rules, and the sooner such a rule is drafted the better. The semi-professional rule is all right and none of the men in that class are likely to complain.

The crowd at the grounds grew much larger after dinner, and the number of entries ran from thirty to forty, the scores also being up to the average. At one time during the afternoon there were fully six hundred spectators on the grounds, this being a good showing when it is considered that the shoot was held over three miles from the city of Baltimore. It was intended to run off a portion of the first day's programme after the current events were finished, but as the regular events ran up to 6 o'clock this project had to be abandoned. During the afternoon Dr. Weyman, while shooting in the amateur class, had a close call from a serious accident, the chamber of his gun being blown entirely out. Fortunately he escaped without a scratch.

A feature of the day's work was the splendid form displayed in the expert class by "Little" Neaf Apgar, who broke 89^{3}_{10} per cent. of his targets. This is a remarkably high average under these rules, and is seldom reached. W. R. Fieles also distinguished himself by running up 88^{5}_{10} per cent. in the semi-professional class. Willy Wolstencroft was away off in form, and did not seem able to pull himself together. During the day 4,460 targets were thrown. There was a guarantee in each of the ten events. In one of these the entries fell 20 per cent. short of the amount guaranteed, this being the only shortage. The unanimous opinion of those present, both subscribers and contestants, was that the future success of the association was assured. Had the first day been clear, there would certainly have been an average of fifty or more entries in the events. Below are detailed scores of the first day's work:

No. 1, 10 singles, $1 50 entry, $20 purse:

Expert Class.

Miller	1111011111—9	Apgar	1011011111—8
Wolstencroft	0001010110—4

The Second Day.

On Thursday morning the air was chilly and damp and the clouds heavy and threatening. There was that in the atmosphere that would tempt the traveler to equip himself with rubber boots, umbrella and other storm paraphernalia before venturing far. The crowd was at the Park at an early hour and soon the events were being boomed along in great shape. At noon one-half the programme was all but finished, when lo! there came a change; a sudden, startling change, not unlike that which came over Hal Penrose, when on the previous night, in the bathroom of the Carrolton House, after enjoying a refreshing douse and rub down, and donning fresh linen he accidently pulled the wrong knob and was treated to a cold shower bath. In this case, however, no knob was pulled, it was simply a matter of dropping the bottom and catching a flood. It began raining lightly shortly before 12 o'clock, but about twenty minutes after that hour the water began to fall in torrents, driving everybody to shelter and keeping them there for the best part of an hour and a half. Shooting was out of the question. Then the mercury fell, and instead of rain there was a veritable blizzard, the snow being fine and dry and seeming to almost cut when the forty-mile wind sent it against the face. This lasted for half an hour or more, when the mercury took another jump, this time upward, and the "Dakola sand" changed to the wet soft flakes that are a cross between snow and rain with the character of both and good qualitses of neither, just the kind to soak through shoe-leather and clothing and bring on an attack of pnuemonia. Everybody waited patiently for a lull in the storm until 3 o'clock, when, after a consultation it was decided to close the tournament. This was done without any blare of trumpets or roll of drum.

And here was the party, 3½ miles from their hotel and no conveyances at hand. The only thing to do was to "hoof it," and what a nice prospect. The wind was blowing a gale from the northwest, the wet snow was falling so fast that one could scarcely see across the river, and in order to reach a horse car line to take us to the city we had to cross an open bridge one mile in length, and have the merciless snow beat against our unprotected left cheeks all the way. But there was stern stuff in this party and they resolved to reach the horse cars or—stop for a smile. The trip across was made in safety and soon after the party had reached their hotels and were preparing to start for home. Up to the time the storm stopped the fun 1,750 targets had been thrown, this making a grand total of 6,210 for the two days. Everything went along in nice shape, and but for the weather the tournament would have been one of the most successful on record. The Baltimore Gun Club members worked hard for the success of the affair and deserved a better financial showing, but, of course, the chances of good, bad or indifferent weather have to be taken at all times. S. J. Martinet, Jr., the efficient secretary of the Club, performed the duties of cashier in a praiseworthy manner. Other members also exerted themselves in efforts to cater to the success of the shoot. Below will be found scores of the five events shot on this day:

A number of the shooters remained in town over night and on Friday they went out to the grounds and amused themselves by smashing targets in a very strong wind. C. H. T.

Frank Class will Shoot the World.

"I WILL back Frank Class against any man in the world in a 100 bird match for $250 a side," said Harry Piper, the Morristown boniface, on Tuesday, after the Class-Helgens match at Dexter Park, Long Island. And the genial Harry is fully justified in throwing out the above bold and broad challenge considering the brilliant form in which the New Jersey champion is grassing pigeons. He has shot three matches within a few weeks, killing in the first and second 94 each and on Tuesday he killed 92, this giving him an average of 92⅔ out of 100. Beside this he has killed 22 and 23 in two matches at 25 birds each. In the first and second of the 100 bird matches the birds were a fair lot, but on Tuesday they were, with a few exceptions, a cracking lot of match birds. Frank has come back to his old form for a certainty, and if he can be persuaded to stick to the gun and load he is now using he would make an exceedingly close race against even "Captain Jack" Brewer.

The match shot on Tuesday was at 100 live birds each, Class's opponenent being Elias Helgins, a member of the Parkway Gun Club and one of the most popular sportsmen on Long Island. The match was for $100 a side, the loser to pay for the birds. Class used a 12-bore gun and Helgins a 10-bore gun, both men shooting from the 30yds. mark. The race was witnessed by over 200 people, nearly every club on Long Island being represented. Jacob Pentz of the *Sporting Times* was referee and John Riggotts, of Rockaway, N. J., acted as official scorer.

Class was the first man to the score and he made a pretty first barrel kill of a fast left-quartering driver, Helgins following with an equally good first on a right-quartering driver. Helgins scored a miss on his fourth bird, a driver. His eighth and ninth fell dead out of bounds, as did his thirteenth. His twentieth and twenty-second soared away to freedom. Class' only loss on this round was his eighth bird, a rather soft incomer to the left, which fell dead just over the stakes. Score, Class 24, Helgins 19, and no chance for anyone to get a bet.

Class's first bird on the second round was an ugly zigzagging left driver, very fast, which was killed by a well-timed second. He lost his fourth and fifth, both drivers, which he should have stopped with single barrels. His eighteenth fell dead out of bounds. Helgins's first was a left-driving twister, which was hit hard, but went outside to die. His eleventh was another vicious twister that went away; his thirteenth fell dead outside; his fifteenth, twenty-first and twenty-third went over the hills and far away. Score, 46 for Class, 38 for Helgins. At this point it was seen that Helgins was outclassed (no pun) through his inability to shoot his second barrel effectively. He was also slow in getting on to his birds.

On the third round Class lost his ninth, tenth, fourteenth and twenty-fifth birds, the latter falling dead out of bounds. His work up to this time was of a brilliant character, his first being quick and effective and his quick second very accurate. Helgins on the other hand seemed to be gradually falling off, being exceedingly slow and getting behind his birds. He lost nine out of the twenty-five birds, his first, fourteenth and eighteenth falling dead just outside the stake line. The scores on the 75 was Class 67; Helgins 54.

On the last quarter Class killed his 25 straight, while Helgins lost 6, this ending the shoot with 92 kills for Class as against 73 for Helgins. While Helgins is a fairly good shot, about an 85 man, he was out of his latitude in shooting against the Pine Brook expert, who is now shooting the pace of his life. It is not likely that the two men will again come together at the traps.

The birds, as I have said, were a good lot. Some half dozen or so had to be put up by the roper, but these were all flyers once they found their wings. Some of them were veritable "screamers," birds that no man has any license to kill. From the fiftieth to the seventieth round Helgins had a trifle the hardest birds, but during the rest of the race the luck was about even.

The detailed scores of the contest are given below:

Class	12222	21o23	22211	21121	11221—24
	2220	1112	21211	o1211	21121—22
	21112	22220	11202	22212	2221o—21
	12112	11222	22212	22222	12221—25—92
Helgins	11101	22oo1	11o11	21110	20211—19
	o2211	21111	02o:0	22222	01012—19
	o2210	21220	121o1	02o00	22220—16
	20200	12211	10111	11021	11120—19—73

Class	11	9	11	18	18	1	4	7	5	16										
Helgins	5	9	8	28	8	..	8	3	3	28										

C. H. T.

Frank Class Still a Winner.

FRANK CLASS, of Pine Brook, shot a 25-bird match at Paterson on March 8, his opponent being J. Vermoral, one of the leading shots of the city of silk mills. The match was for $50 a side under Hurlingham rules. The score:

Frank Class (30)	1111111111111011111111011—23
J Vermoral (28)	1111011111111111101111011—22

On March 29 the two men will shoot a 50 live bird match at the same place.

Utica Tournament.

THE Oneida County Sportsmen's Association will give a grand shooting tournament at five birds and targets at Utica, March 29. E. D. Fulford and W. H. Booth shoot 100 live birds, exhibition match. H. L. GATES, Sec'y.

Trap at Watson's Park.

BURNSIDE, Ill., March 9.—The following is the score made here to-day by the South Chicago Gun Club, 20 live pigeons each, A. A. rules, for club medal:

F E Willard.....02100010020020101001w
A W Reeves.....20002100102022102021—11

The Newark Gun Club's Shoot.

THE monthly club and open shoot of the Newark Gun Club was held at John Erb's grounds in Newark, N. J., on March 10. Among the contestants was Allen Willy, editor of the Hartford *Globe*, who came away down from his wooden nutmeg home to have a crack at live feathers. The club event was at 10 birds a man, handicap rises, each putting in a five dollar note and shooting for three moneys in addition to the club prizes. The scores:

Castle.....1101011111— 8 Collins.....1212112121—10
Willey.....1112111111—10 Lindsley.....2222222210— 9
Smith.....1012111211— 9 J Smith.....1112211122—10

Shooting in a Hurricane.

THE live-bird match which took place at Yardville, N. J., on March 11, between Ed Hill, of Trenton, and M. H. Ruppell, of Milford, was shot in a terrific gale of wind, the weather being intensely cold as well. The conditions of the match were 100 live birds per man, $150 a side, 21yds. rise, H and T traps. The traps were set in an open field on the outskirts of the town. James C. Beebe was referee, Frank Mason official scorer, Mahlon Fox judge for Ruppell, and Chas. Huston judge for Hill. Ruppell reached the stamping grounds alone, and none of his friends, who had promised to be present, put in an appearance. This upset him from the start, and he was unable to pull himself into form, the result being a dire defeat. The scores follow:

Hill.....1111111001111111000111101—19
1101001100101111011110011—16
1011001101111101111011111—19
1111011111 — 9—63
Ruppell.....0110000011001001111111111—14
1111011100100101001001110—13
1110101111000000000101010110—12
0011000111 — 5—44

Plenty of Sport at Essington.

PHILADELPHIA, Pa., March 10.—*Editor Forest and Stream:* The few of us that took the early train for Essington yesterday morning were well paid as we saw three very good matches, not that the scores were extra high, but the matches were close and exciting all the way through. There was only about twenty spectators at the first match. Among the early arrivals were J. Alberger, R. Irvin, J. Watts, John Hanner, Mr. Hunsicker, and his daughter Rachel, (better known as Little Hawkeye,) Dick Wood and Ward Young.

The day was cloudy, with a good breeze blowing across the traps and the grounds being right along side of the Delaware River, and right opposite the famous rail and reedbird grounds (Tinicum Island), the air was very damp and anything but pleasant.

The first match was between W. Greenwood of Germantown, Pa., and A. Sheets of Camden N. J., for $50 a side, 50 birds each, Hurlingham rules, 30yds. rise. For this match they had a poor lot of birds, the most of which had to be scared up.

Greenwood.....1111c2101212121211121110210121112211c11211111100—43
Sheets.....2211122222202212111112212112021211202121112102102020—44

R. Irvin referee, Horace B. S. Young scorer,

By the time this match was through dinner was ready at the club house, and we all got clean scores at that. Another match was here made between the same two men at 20 birds each, for $50 a side, and as twenty pairs of birds had just arrived in one crate, they were taken out and they proved to be "rattlers," as good a lot as any one could want. As the start in the second match will show they were too fast for the shooters. After shooting at a lot of duffers, Greenwood again went first to the trap, and his first bird was a surprise party, for it went so fast that he hardly saw it, and as Sheets had one of the same kind both started with lost birds. It looked like another defeat for Greenwood, as he missed three out of his first four, but he was the first to learn the pace of the birds and pulled out winner by one bird. R. Irvin referee, H. Young scorer, same rules as previous match. The score:

W Greenwood.....01002110211212221012—15
Sheets.....02202222020202202 —13

Sheets shot only at 19 birds.

While the above match was in progress, J. Rothaker arrived on the grounds with a party of friends, among whom I noticed A. J. Rust and W. Garvin.

The third match was between J. Rothaker and Prof. Mench, of Essington, on whose grounds the matches were shot, for $50 each at 50 birds apiece, Hurlingham rules, 30yds. rise. After a little argument the following arrangements were completed: W. Greenwood, judge for Mench, A. Z. Rust judge for Rothaker, and Wm. Garvin referee. The money was put in the hands of H. Thurman, who also pulled the traps, and at 3:05 o'clock the first gun cracked for Rothaker with a clean first barrel kill, but Mench started off killing his first three birds with his second and both missed their fourth. At the finish of the first half of the match Rothaker was one bird in the lead, but his second half was miserable; he only killed 15 out of 24, not shooting at his fiftieth bird, while Mench ended up strong, killing 21 out of 24, and winning the race by 6 birds as follows:

Minch.....22201202221020212212220—20
01112120212212202222222 —21—42

Rothaker.....11200112221221222211010l—21
11012002012100111220100 —14—35

After this Greenwood and Sheets had another short go at 5 birds each for $10 a side. The score:

Greenwood.....01100—2 Sheets.....01120—3
H. T.

A Much Shot For Hog.

ON Saturday, March 12, occurred the third and fourth contests for the historical 400lb. porker which was the bone of contention on the Marion grounds for a couple of weeks. This time the scene of battle was shifted to John Erb's "Old Stone House" grounds, at Newark, N. J., and the attendance was rather light. Harry E. Smith won the hog the previous week at Marion, and as he was not particularly in need of lard (which is not a necessary adjunct to the pearl button industry) he concluded to give the country another chance to contest for it. Upon reaching the grounds it was found that owing to a miscarriage of a consignment of pigeons, John Erb's lofts were nearly empty, consequently the contest was cut down to 7 live birds per man, $7 entry, the hog being first prize, while a portion of the pot went to second and third men. The scores:

Collins.....2122221—7 Hilfers.....2002221—5
Lindsley.....1222222—7 Castle.....0010101—3
J Fulford.....1122102—6 Hedden.....2212210—6
Erb.....1011120—5 Hollis.....0021201—4
Smith.....1102122—6

On the two winners, like the previous owner, had no need for the hog, as Milt Lindsley declared that wood powder and pork are not a good combination, while Eddy Collins likewise declared that unless he could train the Fanwood animal to aid him in loading shells it was useless to him. So up goes the porker for the fourth time, this being a 4-bird shoot, $4 entry, first prize the hog, second prize some cash, third prize some more cash. The result:

	Tie.		
Erb	2221—4—22	Fisher	1210—3
Fulford	2122—4—11	Collins	0201—2
Hedden	2222—4—21	Hilfers	0110—2
Smith	1112—4—21	Castle	0101—2
Lindsley	4222—4—20		

On the second round of the shoot-off of the tie the birds were gone, and the men in the ruck were obliged to cry quits, until the coming Saturday, when they will again try their luck.

The rest of the day was filled in with target shooting, the conditions being 10 targets per man, $1 entry, 2 moneys in the first and last events and 3 moneys in each of the others. The results:

No. 1: Collins, Hedden and Fulford 7 each, Lindsley 6, Smith 5.

No. 2: Hedden 8, Lindsley 7, Castle 5, Collins, Hollis and Smith 4 each, Griffen 2, Erb 1.

No. 3: Hedden and Lindsley 7 each, Castle 6, Collins, Smith and Hollis 2 each.

No. 4: Collins 8, Castle and Lindsley 7 each, Hedden 6.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

N. C. L., Salem, Mass.—Who has hydrid trout for sale, especially in Massachusetts? Ans. Try J. W. Hoxie & Co., Carolina, Washington county, R. I., or the Berkshire trout hatchery, C. H. Sage, secretary, Great Barrington, Mass.

T. M. B., Lockport.—How far down the St. Lawrence River from Quebec are porpoises plentiful? What is the market value of a porpoise skin and oil? Ans. In 1890 twenty porpoise skins were taken at Ile aux Coudres; at St. Simeon eleven were obtained; in the Saguenay division 125 were captured at Tadoussac. The entire number of porpoise skins taken in the Province of Quebec, exclusive of the Gulf division, was 474. The value per skin was $4. The amount of porpoise oil was 27,360 gallons, valued at forty cents per gallon.

ANGLER, Elizabethport, N. J.—Where are the most sturgeons caught outside of New York, and what bait and tackle are required for its capture? Ans. Hallock has truly said, in "The Sportsman's Gazetteer," "As a game fish the sturgeon is not a success." If we are going in search of sturgeons, we should visit the Delaware River with clam bait and tarpon tackle. The reel, however, will be more ornamental than useful, since the fish when hooked is hard to start and harder to snub—a log moving in a 10-mile current is about as easy to handle. It is difficult to say where the most sturgeons are caught, because several kinds inhabit on seas on both coasts, ascending rivers, and one species lives permanently in fresh waters. The Delaware River is a famous sturgeon river and the fish are common down the coast to Florida. Sandusky, Ohio, and Green Bay, Wis., are celebrated localities. Sturgeon abound also in the Sacramento, Columbia and Frazer rivers.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will ma free on application a descriptive circular of Mr. Grinnell's boo "Pawnee Hero Stories and Folk-tales," giving a table of conten and specimen illustrations from the volume.—Adv.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisement must invariably be accompanied by the money, or they will not b inserted. Reading notices $1.00 per line. Only advertisements of a approved character inserted.

Address all communications:

HAND-LOADED SHELLS.

The great demand for Hand-Loaded Shells has led us to increase our facilities and improve our apparatus so that we can supply the Wholesale trade in addition to the Retail.

We have placed this department in charge of an expert trap shot, who has had some 15 years' experience in loading shells by hand.

We guarantee our Special Quality Hand-Loaded Shells equal to the best.

We are prepared to load with Black Powders, American Wood, E. C., Schultze and S. S. Powder.

We make a specialty of loading the Eley Schultze Shell; salmon-colored paper with long steel conical base and extra strong primers (these are made to our order by Messrs. Eley Bros., London).

Our shells are all packed 25 in a neat box, nicely labeled.

PRICE LISTS ON APPLICATION.

Charles Daly
HAMMERLESS SHOTGUNS

Lead the World for Beauty, Quality and Workmanship.

Copy of one of the hundreds of unsolicited testimonials received:

HOUSTON, Texas, Jan. 26, 1892.

Messrs. Schoverling, Daly & Gales:

GENTLEMEN—Enclosed find check for Diamond Daly Gun just received. I have taken it all apart and then tested it, and find it exactly made as I ordered it, and must say that it is the best shooting and most beautiful gun I have ever seen. If ever the Daly Gun needs any references, you can refer to me.

Yours truly, CAMILLE G. PILLOT.

Schoverling, Daly & Gales,

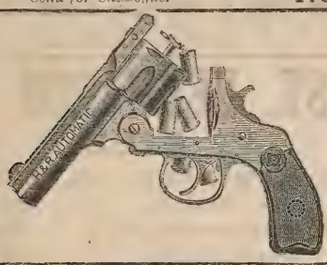
302 BROADWAY, NEW YORK.

STEVENS SPECIAL FIRE ARMS.

Wherever shooting is done, in all parts of the world, the **Stevens Rifles and Pistols** are being introduced, and on account of their superior accuracy are preferred.

STEVENS PISTOLS have made more brilliant records and have done finer work than any other pistol ever made.

STEVENS RIFLES have made records which were considered impossible.



STEVENS POCKET RIFLES are carried by ladies, anglers, tourists and hunters. They are marvels of accuracy, compactness and beauty.

STEVENS LADIES' RIFLE is the proper rifle for ladies. It is wonderfully accurate and has no recoil.

The .22 long rifle and the .25 rim-fire cartridges, the most accurate small-bore cartridges made, were originated by this company. These celebrated rifles and pistols are manufactured by

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work Cloth, 98 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 318 Broadway.

Seminole Kennels,

CHESTNUT HILL, PHILADELPHIA, PA.,

OFFER THE SERVICES OF THE FOLLOWING

STUD DOGS:

Rough-Coated Collies.

CHAMPION
The Squire,
(E. 15,757). Fee $50.

Roslyn Conway,
(A. 20,882). Fee $20.

Sir Kelpie,
(A. 14,735). Fee $15.

CHAMPION
ROSLYN WILKES,
(A. 20,883). Fee $50.

CHAMPION
ROSLYN DANDY,
(A. 17,577). Fee $35.

ENGLISH PUGS.

Kash, Jr.,
A. 17,804). 1st, Albany; 2d, N. Y., 1892. Fee $15.

IRISH SETTERS.

Champ TIM,
1st and special, N.Y., '92. Fee $25.

JERRY JARVIS,
(A. 15,347) litter brother to Duke-Elcho. Fee $20.

Extended pedigrees of any of the above on application. Bitches entrusted to us receive the best of care. Fine specimens of the above breeds for sale at reasonable prices, including several good stud dogs and brood bitches in whelp.

Young Stock Always on Hand.

IN STUD.

SIMONIDES,

No. 17,068. Black, white and tan.

Winnings: 1st, I. S. Derby, 1889; 2d, Southern Derby, 1889; 2d, All-Age, 1890; 2d, Inter-State All-Age, 1890; 1st, Inter-State All-Age, 1892; 1st, N. O. Bench Show, 1892.

Fee $50.

CAPTAIN BETHEL,

No. 16,147. Black, white and tan.

Is a wonderful field dog, very fast, runner-up Rowdy Rod Inter-State Trials, 1891. Sire of Wun Lung and Glenn. He transmits his qualities to his offspring. All of his get have proved remarkably good ones. Litter brother to Dimple, winner of Southern Derby, 1888.

Fee $35.

RETREAT KENNELS,
Hammond, La.

For particulars and engagements address
F. F. MYLES,
New Orleans, La.

BLACK WONDER.

No. 23,557. Whelped Jan. 30, 1890.

King of black pointers, and was the king of all colors at the United States field trials held at Bicknell, Ind., 1891, winning the Derby and All-Age Stake. He is a dog that knows how to hunt and not afraid of briers. **Fee $35.**
JOHN A. HUNTER, Sandborn, Indiana.

AT STUD. FEE $50

KING OF KENT

(A.K.C.S.B. 6264),
Sire of the phenomenal field trial winners, Rip Rap, Zig-Zag, Tapster and Maid of Kent. Pointer Puppies for sale.
Apply to JAS. MORTIMER,
Supt. Westminster Kennel Club,
Babylon, L. I.

DUKE OF DEXTER.

The finest pointer in New England. First prize, New York, 1892. For stud fee, pedigree, etc., address
STREBOR KENNELS, Dexter, Maine.

YORKSHIRE TOY TERRIER.
Champion Bradford Harry, described in show reports as "best Yorkshire in America." Pedigree and winnings free, photos 50 cents. A limited number of his puppies for sale. P. H. COOMBS, 1 Exchange Block, Bangor, Me.

First Lessons in Dog Training.
PRICE 50 CENTS.

In the Stud.

REFUGE II.

(Plinlimmon ex Recluse.)
Winner of over forty prizes, including the *medal for the best stud dog*, Agricultural Hall, London, 1891. He is the sire of Refugee, Recluse II., Rudyard Lady, Young Refuge, Highland Chieftain, Baron Clevedon and many other prize winners. He is the best-headed and heaviest-boned dog ever sired by Plinlimmon.
Fee, $60.00.

Champion
Kingston Regent.
(Prince Regent ex Lady St. Gothard,)
Fee, $50.00.

Marquis of Ripon.
(Prince Regent ex Lady St. Gothard.)
Fee, $40.00.

Prince Clifford.
(Prince Battenburg ex Lady Dolly.)
Fee, $20.00.

NEW YORK ST. BERNARD KENNELS,
138TH ST. AND THE HUDSON RIVER.
HENRY JENNINGS, Manager.

ST. BERNARDS
AT STUD.

Jim Blaine,	"	50
Ch. Plinlimmon, Jr.	"	40
Lord Dante,	"	25
Lothario,	"	20

PUPPIES BY ABOVE DOGS USUALLY ON HAND.
WYOMING KENNELS,
MELROSE, MASS.

MENTHON KENNELS'
ST. BERNARDS,

PHŒNIXVILLE, PA.,

AT STUD.

The Giant Rough-Coated St. Bernard
LORD BUTE, A.K.C.S.B. 22,029.
As a stud dog Lord Bute has no equal.
FEE $100.

The Handsome Rough-Coated St. Bernard
Lord Thorndale, A.K.C.S.B. 18,337.
A son of Champ. Hesper. A sure stock getter.
FEE $35

Stud Cards and Catalogues on application.

FOX-TERRIERS
IN STUD.

Champion Raby Mixer	$15
Reckoner	15
Brockenhurst Tyke	15
Pitcher	25
Starden's King	25

Puppies for sale from these celebrated dogs out of famous matrons.
HILLSIDE KENNELS,
LANCASTER, MASS.

AT STUD.

STREATHAM MONARCH,

The finest Bull-Terrier living.

JOHN MOORHEAD, JR.,
Pittsburgh, Pa.

A No. 1 Bull-Terrier Puppies for sale.

BLUE ROCK.
The dog for Elcho bitches. A first prize show winner and winner of more field trial prizes than any Irish setter dog in America. Perfect in color. Fee $25. ELCHO KENNELS, Claremont, N. H.

STUD POINTER.
Champion Pommery Sec
(Ch. Graphic ex Lady Vinnie).
For stud fee, list of winnings, etc., address
WM. H. HYLAND, North Tarrytown, N. Y.

BLUE RIDGE KENNELS.
IN THE STUD.

The celebrated champion stake winner **GATH'S MARK, GATH'S HOPE** and **DAN GLADSTONE.** The Blue Ridge Kennel has now opened its book for the fall season of 1891 and spring of 1892 for Gath's Mark and Dan Gladstone, limited to fifty services each. $2,000 is given away in premiums to the get of the above dogs, which win different Derby Stakes in 1892 or after. Particulars on application.

THE BLUE RIDGE KENNELS, Sperryville, Va.

MARCH DAYS.—II.

THE sunshine, the bracing air, the swaying boughs of the pines and hemlocks beckoning at the woodside, the firm smooth footing irresistibly invite you forth. Your feet devour the way with crisp bites, and you think that nothing could be more pleasant to them till you are offered a few yards of turf, laid bare by winds and sun, and then you realize that nothing is quite so good as the old standby, a naked ground, and crave more of it, even as this is, and hunger for it with its later garnishing of grass and flowers. The crows, too, are drawn to these bare patches and are busy upon them, and you wonder what they can find; spiders, perhaps, for these you may see in thawy days crawling sluggishly over the snow, where they must have come from the earth.

The woods are astir with more life than a month ago. The squirrels are busy and noisy, the chickadees throng about you, sometimes singing their sweet brief song of three notes; the nuthatches pipe their tiny trumpets in full orchestra, and the jays are clamoring their ordinary familiar cries with occasional notes that you do not often hear. One of these is a soft, rapidly uttered cluck, the bird all the time dancing with his body, but not with his feet, to his own music, which is pleasant to the ear, especially when you remember it is a jay's music, which in the main cannot be recommended. To-day, doubtless, he is practicing allurements for the coming mating season.

You hear the loud cackle of a logcock making the daily round of his grub preserves, but you are not likely to get more than a glimpse of his black plumage or a gleam of his blood-red crest.

By rare luck you may hear the little Acadian owl filing his invisible saw, but you are likelier to see him and mistake him for a clot of last year's leaves lodged midway in their fall to earth.

The forest floor barred and netted with blue shadows of trunks and branches, is strewn with dry twigs, evergreen leaves, shards of bark and shreds of tree-moss and lichen, with here and there a heap of cone scales, the squirrel's kitchen middens, and there the sign of a partridge's nightly roosting, and similar traces of the hare's moonlight wanderings, and perhaps a fluff of his white fur shows where they've ended forever in a fox's jaw.

Here and there the top of a cradle knoll crops out of the snow with its patches of green moss, sturdy upright stems and leaves and red berries of wintergreen, as fresh as when the first snow covered them, a rusty trail of May-flower leaves, and the flat-pressed purple lobes of squirrel cup with a downy heart of buds full of the promise of spring.

The woods are filled with a certain subtle scent quite distinct from the very apparent resinous and balsamic aroma of the evergreens and, eludes description but as a kind of freshness that tickles the nose with longing for a more generous waft of it.

You can trace it to no source, as you can the odors of the pine and the hemlocks or the sweet fragrance of the boiling sap, coming to you from the sugar-maker's camp with a pungent mixture of wood-smoke.

You are also made aware that the skunk has been abroad, that reynard is somewhere to windward, and by an undescribed, and so far as you know, unattributed pungency in the air, that a gray squirrel lives in your neighborhood. Yet among all these more potent odors you still discover this subtle exhalation, perhaps of the earth filtered upward through the snow, perhaps the first awakening breath of all the deciduous trees.

Warmer shines the sun and warmer blows the wind from southern seas and southern lands.

More and more the tawny earth comes in sight among puddles of melted snow, that bring the mirrored sky and its fleecy flocks of clouds, with treetops turned topsy turvey, down into the bounds of fields. The brooks are alive again and babbling noisily over their pebbled beds, and the lake, hearing them, groans and cries for deliverance from its prison of ice.

On the marshes you may find the ice shrunken from the shores and an intervening strip of water where the muskrat may see the sun and the stars again.

You hear the trumpets of the wild geese and see the gray battalion riding northward on the swift wind.

The sun and the south wind, that perhaps bears some faint breath of stolen fragrance from far-off violet banks, tempt forth the bees, but they find no flowers yet, not even a squirrel cup or willow catkin, and can only make the most of the fresh sawdust by the woodpile and the sappy ends of maple logs.

Down from the sky, whose livery he wears and whose song he sings, comes the heavenly carol of the bluebird, the song sparrow trills his cheery melody, the first robin is announced to-day, and we cry, "Lo, spring has come." But to-morrow may come winter and longer waiting.

THE CANADIAN SALMON PETITION.

BEFORE this number of the FOREST AND STREAM shall reach all of its readers, it is altogether likely that the celebrated petition of the salmon anglers in the Canadian rivers will be in the hands of the ministers at Ottawa. The petition has already been published in these columns in full. It asks that the time when the nets shall be raised, in the bays and rivers below, shall be increased, in order that the parent salmon may have more of a chance to reach the breeding grounds in the rivers above. Mr. D. Blanchard, of Boston, the originator of the petition, first published in the FOREST AND STREAM, has now 110 signers to the document, all owners and lessees of salmon rivers in the Dominion. Messrs. Geo. B. Appleton & Co., of Boston, have kindly assisted Mr. Blanchard in the work, making their tackle store the headquarters for the receipt of names. The petition is a most reasonable one; for the benefit of all concerned—the netter as well as the salmon angler. It is scarcely possible that the wisdom of the Canadian ministry will refuse the granting of a prayer so reasonable.

As further reason why the salmon anglers think that their petition should be granted, it may be added that these anglers spend many thousands of dollars annually in Canada. One club alone spends over $40,000 a year there, and the members of this club ore all signers of the petition. The anglers provide employment for the people of Canada, as guides, guardians and attendants, and the people in the vicinity of the salmon rivers are very largely dependent upon such employment for their support. Through the efforts of the petitioners, the salmon rivers are better guarded and protected than they could possibly be by any other system, because the inhabitants living along the shores, through the employment furnished them by the anglers, are made interested to preserve the fish, the destruction and extermination of which would be of incalculable damage to them, by reason of the loss of this employment.

Of late these people have become much alarmed at the scarcity of salmon, which they have observed to be rapidly growing worse. They very well know that this scarcity is due to the excessive netting carried on each season. When the salmon become so scarce as to leave it no object for the angler longer to visit the rivers, which time is very rapidly approaching, as witness the ill-success of last season especially, it is easy to see what will take place. The Canadian people along the shores, having lost their interest in the fish—their interest in preserving them—and feeling, as they will in that case, that their loss of employment is entirely due to the selfish course of the net fishermen—will then not hesitate in the least to take the parent salmon for their own use, and thus work the final completion of the utter destruction of all the salmon in the rivers. They would feel that this utter destruction had been begun by the greed of the netters below, and it would be impossible to prevent their action, begun in a spirit of retaliation. These men, employed as guides and guardians by the anglers, know every spawning bed in the streams they watch. Indeed they know almost every salmon, so familiar are they with the streams, and they could take even the last parent fish left, if moved, as there is danger of their being, by a desire to get even with the netters. Take away the motive of self-interest that the inhabitants now have, the interest they now feel in keeping the streams well stocked with fish, in order that the number of anglers may be greater and through these anglers greater rewards to the people, and put in its place a feeling of retaliation against the netters for having destroyed the source of their "bread and butter," as it were; and a regiment of soldiers along the borders of every salmon river could scarcely save the parent fish from destruction to the last spawning salmon.

The excuse offered by the net fishermen, and doubtless it will be offered against the granting of the petition, is that their nets, or trap nets now in use, are so constructed as to make it difficult to lift them during the weekly close time now in vogue. From this reasoning the anglers very naturally conclude that the short close time, already the law, is not observed, and that the nets are not taken up as they should be. If such is the case, then the law has to comply with the interest of the netters rather than that the netters obey the law.

The anglers would say to the net fishermen, "Please bear in mind that whatever we may say or do for the furtherance of our own interests in this matter, we cannot benefit ourselves without benefiting you also. We sincerely believe that if our petition is granted, by the wisdom of the Canadian government, it will require but a short time to prove that it is working for the interest of the government itself, the netters, the anglers and all concerned."

PROTECT THE BLACK BASS.

THE treatment of the black bass in different localities shows a wonderful amount of variation. In most of the States they are protected during the spawning season or what is supposed to be their spawning time, while in others no effort is made to protect them at any time. It is well known that the nesting season in New York extends certainly to the end of June, and in the northern portions into July, yet the open season in this State begins on May 30. Even in Indiana, which has a warmer climate than New York, the hatching of the black bass has been observed to continue after the middle of June. In New Hampshire it is very well known that the spawning lasts through June, but the anglers favor its capturing during that month because it will not readily take the fly in any other summer month, and this applies equally well in most of the waters of the Middle States.

The black bass is subjected to many dangers through certain of its habits. As it is frequently found in schools, the skillful anglers can often capture almost an entire school. Its innate voracity, also, is another cause of its own destruction, since the young bass devour one another with great relish during the first two or three weeks of their existence. Still another unfortunate habit of this fish is that of making its nest in shallow water near the shore where, owing to its large size and light color, it can be readily observed. The parents guard the nest and the young, and during this exercise of paternal care are often pounced upon and destroyed by poachers. Then too the male bass at the time of breeding fight among themselves and many are thus killled.

The black bass is not very prolific, the number of eggs to the female having been estimared at about 4,000, and when the parent fish are destroyed the young fall a prey to crawfish and minnows. According to observations of Mr. C. F. Holt, in Michigan, the young fish do not become perfectly developed until they are from one to two months old. During this time they are under the care of the parents, learning how to obtain food and to shelter themselves among the water plants from the attacks of their enemies. Kill the guardians of these tender broods and the pike and pickerel will do the rest.

SALMON SPAWNING WITHOUT GOING TO SEA.

THE note by Mr. Atkins in this number of FOREST AND STREAM, on the reproduction of migratory salmon which have never left fresh water, is a most interesting one. Until a few years ago it was denied that such spawning had occurred. Dr. Günther, in his recent "Introduction to the Study of Fishes," makes the following statement upon the subject:

> The question whether any of the migratory species can be retained by artificial means in fresh water, and finally accommodate themselves to a permanent sojourn therein, must be negatived for the present. Several instances of successful experiments made for this purpose have been brought forward; but all these accounts are open to serious doubts, inasmuch as they do not afford us sufficient proof that the young fish introduced into ponds were really young migratory Salmonoids, or that the full-grown specimens were identical with those introduced, and not hybrids or non-migratory trout of a somewhat altered appearance in consequence of the change of their locality. We have seen the experiment tried at two places in South Wales, and in both cases the salmon [*Salmo salar*] and the pure sewin [*Salmo cambricus*] died when not allowed to return to the sea. On the other hand, hybrid fishes from the sewin and the trout [*Salmo fario*] survived the experiment, and continued to grow in a pond perfectly shut up from communication with the sea. In that locality neither those hybrids nor the trout spawn.

As early as 1857, among a lot of salmon 22 months old which had been kept in a pond in France, some females were found full of eggs which were artificially fertilized and were carried almost to the point of hatching.

In December, 1880, Sir James Maitland obtained some salmon eggs from the Teith river, Scotland. In March, 1881, the eggs were hatched and the fry were placed in a large pond at Howietoun through which 1,000,000 gallons of water flowed daily. On Oct. 10, 1883, a female under 1lb. in weight was found to contain comparatively large eggs, of a deep reddish color. On Nov. 29, 1883, a male 11½in. long was seen to be full of ripe milt. On Oct. 4, 1884, a female 13in. long, which jumped out of the pond, contained eggs ⅛ of an inch in diameter, which is that of mature eggs. On Nov. 7, 1884, a female weighing 1¼lbs. was found almost dead beside the pond. From it were taken 100 apparently ripe eggs, which were milted from a Loch Leven trout. On Jan. 23, 1885, eighteen of these eggs hatched and on Feb. 10 the young were remarkably healthy and vigorous. This was said by Dr. Day to have been the first successful attempt in Great Britain to raise young from salmon eggs, the parents of which had never descended to sea, but passed their entire existence in fresh water.

On Dec. 1, 1884, two females in the pond at Howietoun yielded 1500 eggs, about 400 of which were hatched Feb. 21, 1885. On Dec. 9 about 4000 eggs were obtained and 2200 of them hatched Feb. 27. In Nov., 1886, Dr. Day exhibited in London a parr 5½in. long, taken from a fine shoal of salmon at Howietoun, which was hatched in 1885 from eggs and milt obtained from parents that had never gone to sea; the salmon was 20 months old and in excellent condition.

The experiment at Craig's Brook by the U. S. Fish Commission we think is the first successful one of the kind in the United States, and the development of the eggs now in Mr. Atkins's keeping will be watched with unusual interest. It would seem that landlocking can be safely and rapidly accomplished with the noblest of game fishes and most of the dangers to the species removed by man's watchfulness.

PISCATORIAL EXHIBITION IN LONDON.

FROM Feb. 18 to March 5 the Royal Aquarium, Westminster, was the scene of a most remarkable display of the appliances and trophies of the anglers of Great Britain. It is probable that the world has never seen a more elaborate and exhaustive exhibit of fish and angling apparatus, comprising collections for the proper installation of which the great building proved inadequate. The London and Provincial clubs entered heartily into the spirit of the exhibition. Upward of forty London associations contributed representative collections, and fine displays of fish were contributed from Brighton, Nottingham, Leeds, Bradford, Leicester, Sheffield, and other cities. Of the London clubs the Friendly Anglers, True Waltonians and the New Albion Piscatorials showed 301 cases. Many celebrated private collections were also sent to the exhibition, among them the singular Indian fishes belonging to the Prince of Wales and the beautiful display of Mr. R. L. Pugh. It has been stated officially that if the exhibition cases had been placed end to end they would have made a line 8 or 9 miles long, and yet many good collections were turned away for lack of floor space. The whole number of stuffed fish exhibited was 2,500, all of which had been caught with rod and line.

The mounted specimens were skillfully arranged and surrounded by reeds and rushes in imitation of their natural surroundings in the water, and it is certain that thousands of anglers who witnessed the display lived over again in memory many happy experiences on mountain brook and smooth-flowing river. There were pictures, too, in oil, water colors and crayon, and the tackle makers showed a very elaborate assortment of their goods, particularly in salmon and trout rods. In one portion of the building were exhibited the fowls especially bred for the manufacture of artificial flies.

Fish-hatching apparatus was not shown in variety, but Mr. Andrews of Guildford exhibited a new form of box for the transportation of trout eggs; he also had trout in various stages of development.

It will be somewhat difficult for American anglers to share in the enthusiasm of their English brethren over the large rudd, roach, chub, dace, bream, carp and other members of the minnow family, because their representatives in the United States are so generally small, bony and good-for-nothing; but they will be interested in the great pike, trout and salmon. The champion pike, contributed by the Duke of Newcastle, weighed 42¾lbs., and there were other specimens weighing 38, 35, 33, 32½, 28½, 26 and 25½lbs. A Geneva Lake trout of 40lbs., caught on the Rhone with a spoon bait last year, two Norway salmon of 52lbs., a Tay salmon of 40lbs., a Thames trout of 14½lbs., and a yellow perch of 4½lbs. were among the famous fishes exhibited. The pike-perch of Germany, which is a near relative of and bears a striking resemblance to the fish of the same name in America, was in one of the private collections. The American black bass also lent a familiar charm to the scene.

But best of all was the friendly rivalry which made this great exhibition possible and the fraternal spirit animating those who contributed to its success. The same rivalry and the same friendly spirit should enable American anglers to assemble at the World's Fair an exhibit which shall excel in scope and execution the best the world has seen.

THE DELMONICO WOODCOCK CASE.

THE case of the People against Delmonico on the charge of having served woodcock in July of 1890 is to-day precisely where it was a month ago; and where, according to Assistant District Attorney Townsend, it may remain for five or six months to come. Meanwhile the evil effects of the scandalous delay in bringing this Fifth avenue summer woodcock purveyor to trial are widespread and serious, and growing more widespread and serious every day.

Responsibility for the delay rests entirely with District Attorney Nicoll. The People being the plaintiffs, this is a preferred case; were the District Attorney so disposed, he could move for trial at once.

Two explanations are possible of this public prosecutor's masterly inactivity: He may have the time, but lack willingness to act; or, he may be eager to try the case, but not have time.

If the first reason be the true one, there is a remedy which was found effectual in a similar instance with one of Mr. Nicoll's predecessors, and would probably prove equally potent again if resorted to by the Commissioners of Fisheries.

If, on the other hand, Mr. Nicoll wants to see this case expedited but has no time for it because his office is crowded with work, why does he not say as much, and let somebody else try it? He must know well enough that the statute provides for just such an emergency; and that no Fifth avenue purveyor of untimely woodcock need go untried, even when the District Attorney's office may be too pressed with business to attend to the matter. If Mr. Nicoll and his assistants are overworked, let him so advise Protector Kidd; then the protector, as authorized by the statute, may engage other counsel, and go ahead with No. 6941 in the City Circuit.

Whichever of the reasons may be the true one, the responsibility for delay rests with Mr. Nicoll.

PARK GRABS.

JUST as the rulers of New York State and city are bent upon seizing for the advantage of themselves and a few others the city's pleasure ground, which belongs to the whole body of its citizens, and in which the meanest has the same rights as the most influential, so, at Washington, lobbyists and schemers are constantly striving to induce Congress to pass laws which shall turn over to a few specially favored individuals the greater park which belongs to the nation. As the people of New York are protesting against the seizure of a city park, so the people of the country at large ought to protest against the various schemes for robbing them of the Yellowstone Park.

A public meeting is to be held on Friday next, and every citizen who is interested in the preservation of the Central Park, whether he be rich or poor, ought to attend this meeting and by his presence and his voice protest against this encroachment on the public rights.

H. P. UFFORD.

Editor Forest and Stream:

I have felt no such sensation of sorrow, since the death of "Nessmuk," as I experienced on opening FOREST AND STREAM this morning, when the first thing that caught my eye was the announcement that "H. P. U." had also "passed over the dark river." Peace be with him. I never met either him or "Nessmuk," but I have long known both in spirit, by the words from their pens, and as "fellow rhymers" in a humble way, have been deeply drawn toward both of them. There was an esay, melodious flow to Ufford's verse that was perfectly delightful, and those "Southern Bird Notes" (I forget the exact name), which he sent to FOREST AND STREAM, a year or two since, were as charming as were ever the original warblings. VON W.

CHARLESTOWN, N. H., March 18.

Casually taking up my FOREST AND STREAM this morning, the first paragraph to attract my eye was that containing a Southern paper's tribute to the late H. P. Ufford. And this was the first intimation that this bright and entertaining contributor had finished the unequal fight to which there can only be one and the same inevitable conclusion.

Harry Ufford was a college friend of the writer in the pleasant university town of Delaware, of this State, during the years that immediately followed the war. The son of a distinguished Episcopalian clergyman, he had a fine literary taste, both by inheritance and acquirement, and some of his poems and sketches written during his college days would have done credit to a far maturer mind. After the breaking up of college life I lost sight of him for many years, and finally discovered his whereabouts through his first letters to FOREST AND STREAM, which bore date in Minnesota. At this time I hastened to recall myself to him, receiving a prompt and cordial reply, in which he expressed his surprise and gratification at learning that the "Jay Beebe" of his favorite paper should prove his old college friend. Later on I found an added enjoyment in his entertaining studies of outdoor life in Louisiana, to whose balmy climate he went in his unavailing flight from the dread specter of pulmonary disease that lurked ever in his rear. His was an original mind, keen, observant, analytic and mellowed with a ripened culture which made his letters among the most delightful contributions to your paper. But he has gone ahead upon the trail to join "Nessmuk" and "Hal of the Dakotas," who with a host of kindred spirits are resting in the land where there is no more night. To his memory, peace. JAY BEEBE.

TOLEDO, O., March 19, 1892.

THE CALF ON THE LAWN.

I'm goin to hitch this 'ere young caff out here in my front lawn,
He'll stay right here an' chaw the grass till the hull thing it is chawn,
He'll chew the corner off to-day until he's eat it bare,
To-morrow I will move his stake and he'll chaw over there.

Looks bad, yer say, to see a caff out in a man's front yard
An' blatting like a barnyard on this stylish boolevard,
But that air caff shall eat that grass until I get him fat
And if he feels like blatting w'y I reckon he will blat.

W'en I fust took my farm out here this wuz a country road,
Across the way wuz parstchure lan' ware huckleberries growed.
My caff wuz then hitched in my yard for the hull town's inspection
An' no darn enterprising dood cum roun' to make objection.

W'en this road growed a village street my caff wuz in the yard
A'n now the street it swells 'ith style—a city boolevard—
But I will hitch this 'ere young caff out here in my front lawn;
He'll stay right here an' chew the grass till the hull thing is chawn.

You say the way I carry on makes the whole city laff.
Wall, let 'em laff; this 'ere's my lawn an' this 'ere is my caff.
An' things hez reached the purtiest pass the worl' hez ever sawn
Ef an ol' duff can't let his caff chaw grass on his own lawn.

Wall, let 'em laff; this 'ere young caff shall stay here anyhow,
An' if I hear 'em laff too hard I'll trot out the old cow.
I'll hitch 'em both to the same stake right here in my front lawn
An' let 'em stay an' chew the grass till the hull thing is chawn!

—*S. W. Floss in Yankee Blade.*

Let him chaw the grass till all is chawn,
And blart his blart and soil the lawn,
Grow heavy in beef and long in horn.
He's built tu du it; we 'knowledge the corn.

BOSTON. REIGNOLDS.

'Twon't hurt nob'dy 'f they du some folks laugh
T' see a nat'ral mower in shape of a calf.
'F he's a fawn-colored Jersey jest cut off his tail
And call him a deer or a hare.
'F he's black the plan needn't fail
For then you c'n swear he's a bear.
So tony a critter 'u'd shet up the blower
An' though less of calf there'd still be the mower.
An' if some folks objec's tu his voice you can say
Your deer, hare or bear allus hollus that way.

FERRISBURGH, Vt. AWAHSOOSE.

He'll mek me laugh, me, 'Sene Le Blanc, to tink dose Yankee peop's
She'll picquet out dose bœuf p'ti, hees house biffore, lak sheeps!
Prob'bly he'll don't some patatoes got? So dass was mos' so worse!
He mek dose bœuf p'ti gahn starf, while he was hwrite dose verse!

LAKE CHARLES, La. H. P. U.

The farmer talks about his lawn,
Also about his caff.
The ijee of a farmer's lawn
'S enough to fetch a laugh.
A little blithesome silvery laugh,
A ha! ha! ho! ho ho!
A farmer's lawn! Where timothy
And dock and plantain grow
And fill the walk and go to seed
Till all the country round
Is filled with all the sorts of weeds
That ever crossed the ground.
The idea of a farmer's lawn
Feedin' a farmer's caff
Is calculated to projooce
A reverberatin' laff.

NEWTOWN, Pa. O. O. S.

Now if the grass upon that lawn is all he gets for rations,
That calf will stand a right smart chance of dying of starvation,
And if, as likely, he will he be a very lively bull
It's more than probable that he his picket pin will pull
And open-mouthed, with ears erect and meteoric tail,
He'll go careering round the town, in spite of fence or rail
He'll ramble through the flower beds and bust the early peas,
Tread down the vines, upset the hives and liberate the bees,
Who'll join him in his pilgrimage and hurry up his flight,
And make that bumptious "bullyard" "the devils own delight."
Till the man who thinks he owns him will a tender sorrow feel
To think he hadn't "slartered" him and sold his hide and veal!
"You bet your life," as certainly as ever you were born,
That calf is bound to be "the boss" if staked upon the lawn.

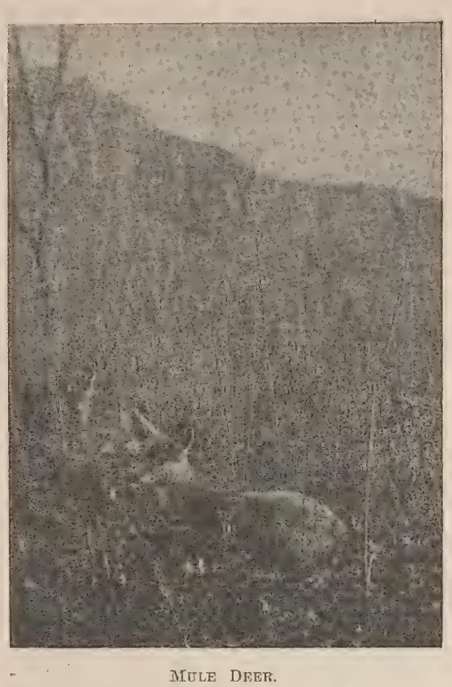
CHARLESTOWN, N. H. VON W.

Natural History.

CATCHING WILD ANIMALS.—V.

YELLOWSTONE NATIONAL PARK.

[*Continued from Page 248.*]



NEXT day I rode into the Springs, where I made arrangements with Captain Anderson, the superintendent, to turn the animals over to him, and for an attendant, who went back with me; the transportation to follow next day. When I returned Dolph reported one of the elk unable to stand. I went to the corral and spoke to it. It got on its feet and staggered to the fence. Poor thing, I gave it eggs, but could not save it; the change of milk killed it, and besides it was almost too old. I find that the very young animals stand the change best. I instructed the man sent out how to feed the animals.

The next day the team came. All camped in the cabin with me that night, which proved rainy and dark. Bruiser was at his post about 60ft. from the door, which was open all night. The cub had been rather quiet for him, up to about 10 o'clock, then he began to squall and fight his chain, or sit upon top of his post and yell, making all the disturbance he could. There was very little sleep for me. Toward two o'clock in the morning he was more noisy than usual. I thought the rain made him feel uncomfortable and that he was taking it out of us by keeping us awake. All at once he stopped his noise. I supposed that he had gone into his box to sleep, but keep still for half an hour he could not, and hearing no noise, I got up and went to the door to listen. Then I walked out toward the post, trying to make out his shape, but it was too dark. I then ventured within ten feet, expecting him to make a dive at me. It was so dark that I could not tell then whether he was there or not. I had been thinking he was choked, so I walked up to the post, reached out, felt the chain and pulled it, ready to spring back. It came; I could feel a light weight on it. This I raised between my eyes and the sky and could see that there was something black at the end. I dropped it and went to the house. I now knew what had happened. I lit the candle and made the soldier attendant come out with me without telling him what I wanted except to "show him something." When we got to the box we saw that there was very little left of Bruiser. Hanging in the collar was a little hide, a part of his skull with part of the lower jaw and nose. One eye was gone, the other lying outside. Down by the post was part of his brain, and 6ft. away lay his hindquarters still warm. I knew now why it was Bruiser did not make any more noise, and that he died as he had lived, fighting. We all felt very sorry over his untimely taking off. I went back to bed thinking of our loss. It was sure a large bear had been there and killed him, yet thought it strange. I had heard no other sound than the cub made, not even a growl or snarl from the old one, but a bear does not make any noise moving about. It can be as silent as the coming on of night, and one blow from the paw of a grown bear would end a cub's days.

Later in the night I heard a gold pan fall. There had been a mess of fresh trout in it belonging to the driver. I grasped my revolver and ran to the door, hoping to have revenge on something for Bruiser's death, but nothing could be seen, neither could the dogs find anything. I looked for the fish, there was one left out of nineteen. In the morning we found a fox track about where the fish were, and a bear's track 10½in. long in the road, and about the post where Bruiser died. The bear's track was seen along the road for ten miles each side of Yancey's. He was traveling, and stopped at the hotel long enough for a lunch off the cub. I gave what was left of Bruiser a burial, thinking while doing so that he had possessed in a remarkable degree that quality we all respect—courage. That day all the other animals went to the Mammoth Hot Springs. I saved one fox for company.

About a week later I rode over a high butte south of Yancey's, looking for anything in the way of animal. Toward evening I became interested in some petrified trees and geodes, and was walking along an old game trail leading my saddle horse and looking for geodes. I noticed a red-looking rock ahead with white specks on it. It was lying in among some sage brush. Just then I noticed something bright about one end, that looked like an eye, and that the rock, though lying very still, had hair on it, that was moved by the evening breeze. That red-spotted rock that lay so still was a black-tail fawn; just like one of those in the picture in the FOREST AND STREAM of Jan. 7, only not quite so old. I dropped my bridle rein, got a string from my saddle pockets, and went to pick up the fawn. Leo was close by, he had gone within 3ft. of it, but had not noticed it. When I was about 10ft. distant it jumped to its feet and started off like a streak, and I after it, but I soon saw that it would escape me, so I told Leo to catch it. He ran up beside it as it went into a quaking-asp grove and turned it back. I tried to catch it as it passed but it dodged me, and up hill it went with the dog beside it. The poor thing was terribly frightened and was making a loud cry, that soon brought its mother, who came running up through the quaking-asp grove. Leo turned the fawn, which made a circle above me, then started down a gulch past me, I encouraged the dog as he passed. A few yards further on he put his nose under its side and threw it over as it ran. It fell in a sage bush, and I ran up and picked it up. Holding it in my arms, I sat down on a rock to tie the string around its neck.

Now that I had my hands on it it was perfectly quiet. Leo was very much pleased with it, licking its face, neck and ears. He had not hurt it or offered to. It was a beautiful little doe. There was nothing awkward or ungainly about it, and it was not at all like either the elk or antelope when very young. The old doe came up pretty close, very much excited, and calling for the little one. As they generally have two fawns I watched her some time in the hope that she would discover to me the hiding place of the other. But no, she went off after a while, and I saw no more of her. I carried the fawn home in my arms, letting the horse guide himself. I named it Laura, in honor of one of the girls who helped catch Bruiser. It was beautifully spotted with white, its coat very silky, and inclined to curl a bit about its neck and along its spine. It showed none of the white mark on its hump so conspicuous in the grown deer. She was about three weeks old and very wild, but soon became used to me and would run beside me when out, daintily picking a blade of grass here, a willow leaf or flower there, and taking just a drop of water from the spring. Her step was as noiseless as a dream. I could not hear her move, only see her step. She was very watchful, and her great ears were always on the move, trying to catch every sound. Her nose would be in the air, at times the edges of her nostrils working as though feeling the air for danger. When she saw anything that she thought was dangerous she would drop like a shot to the ground, flattening herself out as much as possible, but not in such awkward positions as the elk or antelope. She would drop at the sight of a dog a distance off and when he was close by would try to fight him. She would walk up to him, holding her head high, put her neck over his and

MULE DEER.

Photographed from life by T. R. Ingersoll.

try to stamp on him. I had no trouble in inducing her to take food. She took milk from the bottle the first time I offered it. I sent her to join the others at the Springs as soon as I could get transportation for her.

A few days after sending Laura away, Mr. Yancey, the road agent, and I went fishing in the Yellowstone, a mile or so below the mouth of Elk Creek. Mr. Y. had his two hound pups, Pinkey and Green, and I had Leo as usual. We were all mounted on ponies, which we left tied to bushes while fishing. After getting about 30lbs. of trout we started back. The pups running about were soon out of sight. When we reached the plateau above the river we saw the pups jumping about a black object. I said "Bear! Let's see what the pups are doing." The

MULE DEER FAWN.

Photographed from life by E. Hofer.

bear was close to a very large granite boulder. We started forward on a lope, which soon became a run, when we caught sight of two black cubs. We made a great charge, and I sent Leo to help the pups. The old bear had started the cubs up a fir tree near by just as my dog got there to help drive the old one away. While one went back after hats and a fish-pole lost in the charge, I got ready to get the cubs out of the tree. Fortunately the tree was not over 30ft. high, but the two cubs were at the extreme top. I got them out by slipping a running noose over a hind foot with a stick just as I did with Bruiser. The first cub we got was quite a large one and a fighter. After tying him up, I got the other, a she one, quite small compared with her brother. She did not offer to fight at all. I suppose she was completely cowed by the old one and her big brother, and like some big brothers, he had taken more than his share of the milk, leaving her only what he could not use himself. We rolled the cubs up in saddle blankets and took them on our horses in front of us while one man took all the fish on his horse.

The male cub had made two dives at me while I was leading him out of the brush; he came at me with tooth and nail, but a few blows across the nose with a rope or switch made him change his mind. He soon learned he had not his little sister to contend with. I sent them to the Mammoth Hot Springs after having them at Yancey's a week. I had learned to like the little one, Sue, who was very gentle. I would hold her in my lap while she was eating, could do anything with her without her offering to fight. Not so her ugly overgrown brother; he was sulky and treacherous all the time he was with me. Not long after he reached the Hot Springs he escaped. I saw Sue after she had been at the Springs a few weeks; she was very much changed and had grown fat, large, and as full of tricks as Johnny.

The capture of the last two cubs ended work of that kind for me until October of that same year.

ELWOOD HOFER.

THE INSTINCT OF THE COWBIRD.

Editor Forest and Stream:

The books on ornithology tell us that the cowbird (*Molothrus ater*) is a common summer resident of New England, without regard to locality. However true this may be as to other parts, it is a fact that the bird was unknown to me in Penobscot county, Me.

Cowbirds are summer residents of Cape Ann, and I have studied their habits for six years. I commenced by requiring answers to the following questions:

Why do birds, when victimized, rear the young cowbird?

Why does the young cowbird desert its foster parents to associate with its own kind?

Why do young cowbirds lay eggs in other birds' nests instead of building nests for themselves?

How did the cowbird acquire this unnatural habit?

Writers on the subject usually answer the first question by the term "stupidity," and the other three by the word "instinct."

In all my life I have never found the birds stupid. They are as intelligent as to the requirements of bird life as man is as to the requirements of human life.

The theory of instinct is only a dream of the uninitiated. Nature's children are never troubled by such nightmares.

My first study of the cowbird happened in an unexpected manner. I was watching the nest of a pair of yellow warblers (*Dendroica æstiva*) that contained two eggs. While the owners were absent I saw a cowbird flutter on to the nest and add her parasite egg to its contents. When the yellowbirds returned they at once discovered what had taken place and acted as if wild with alarm and distress. For a half hour the birds flew wildly about, uttering plaintive cries, after which they settled down on a twig, where they could overlook the nest. They now seemed less excited, and were evidently holding a consultation. After a while they seemed to agree on a course of action, for the female went on to the nest and the male bird tried to sing away the trouble, but I thought his song less earnest than usual.

No more eggs were laid, which was somewhat remarkable, as the yellowbird's number is usually four.

I found the young cowbird hatched out just twelve days after the egg was laid. The next morning I found the two yellowbirds out of the shell. When the cowbird was two days old he crowded both the little birds out of the nest. When I found them one was dead and the other gasping as if fatally hurt. While I was watching the latter, the mother bird appeared with an insect. She offered the food to the dying bird, and appeared greatly troubled when it was not received. After a while she seemed to comprehend that the little one could not eat and she fed the insect to the cowbird. Before flying away she returned to the gasping bird and looked at it by turning her head from side to side, while she uttered a succession of low plaintive notes.

After this both yellowbirds had all they could do to supply the black giant with food. When he was old enough to fly, or at least was completely feathered, his foster parents coaxed him out of the nest after the manner of all bird kind. Birds know when their young are old enough to leave the nest, and withhold food until the little ones are downright hungry and then tempt them out with a dainty morsel. While tempting the young cowbird from the nest, the yellowbirds made as much effort and appeared as joyous when successful as if the labor had been performed for their own bright-eyed pretty birdlings.

The young cowbird when once out did not return to the nest for shelter. His growing appetite taxed the strength of both birds to the utmost. Every moment of daylight was occupied in catering to his wants. One day I missed the female yellowbird, and after a long search found her engaged in building a new nest. She had forsaken her former charge.

Heretofore I have neglected to state that I often saw the mother cowbird. I think she visited the nest several times a day after the egg was laid. Her frequent visits had accustomed the young bird to her presence, thus making possible what followed.

After discovering the new nest I looked up the young cowbird and found the male yellowbird feeding him as usual, but not alone. The old cowbird was acting as assistant, as if just aroused to the responsibility of maternal duties. For several days both birds fed the young cowbird, after which the yellowbird spent much of his time with his mate, gradually deserting his charge, to return no more when the second brood was out.

Thus my observations had answered two questions; my first and second. My first question, "Why the victimized birds rear the parasite?" was answered to my belief in this way: I believe that the yellowbirds had had experience with cowbirds before, and intelligently understood that they must sacrifice their first brood in order to raise a second brood unmolested. The actions of the birds when they discovered the parasite egg, their great distress, their consultation and prompt action, their neglect to lay the usual number of eggs, can be construed in no other light. It is far beyond the province of instinct.

My second question, "Why the young cowbird deserts its foster parents?" is already intelligently answered. It is no desertion. The foster parents turn over the parasite to its own mother, in a matter of fact way, and then go about their own affairs in peace.

My third question, "Why do young cowbirds lay eggs

in other birds' nests?" was answered the next season. I had fastened a bit of copper wire around the young cowbird's leg, while yet in the nest, as a distinguishing mark. The next year I saw this bird flitting about the nests of other birds in company with an old cowbird, undoubtedly the mother. Thus the young cowbird was educated not to build a nest, but to appropriate the nests of other birds.

My fourth question, "How did the cowbird acquire this unnatural habit?" could not be answered by my observations. My study of bird life, however, has led me to a theory which I will give for what it is worth. I do not claim that it is infallible.

I have often observed that birds will feed the young of another species, if such young are orphans. It is no unusual thing to see goldfinches feeding the English sparrows. The young sparrows, either purposely or by accident, keep on the same limb with a young goldfinch. When the mother brings food the sparrow begs with his wings and voice. She sometimes gives him a feed but not often. On this knowledge I have based my theory.

Let us suppose that at one time the cowbird was a nest-building species. Then it may have happened that a brood of young cowbirds, after leaving the nest, were deprived of parents. The birds in their immediate vicinity, hearing their cries of distress and hunger, would feed them until they could hunt food for themselves. The young cowbirds would hover about with their friends and would accompany them south, but on the return everything would be changed. All the other birds would mate, and whenever cowbirds approached a nesting site they would be repulsed. Thus they would gain no knowledge of nest building and would be likely to lay their eggs in the nests of others, choosing the nests of former friends. While this theory does not explain why all cowbirds are parasites, it is quite possible that the unnatural habits of the species was acquired in some way similar to the foregoing. M. A. WALTON.

TAMED HUMMINGBIRDS.

I WAS once the possessor of two of those tiny wonders, the ruby-throats—

"Is it a gem, half bird,
Or is it a bird, half gem?"

While walking in the orchard one day in June I espied a hummingbird's nest, (a fitting casket for the gem) on a horizontal limb about 5ft. from the ground. When I looked into it, two feathered mites flew out and fell to the ground. As there were pigs in the orchard, I thought I had better take the birds out of it. I carried them to the house, made a light frame for a cage, and covered it with lace: in this I kept them four months, letting them out every day. I fed them upon cracker soaked in Malaga wine and sugar, and brought to them all the honey-holding flowers that I could find. When I brought in a boquet they immediately flew to it, buzzing joyously.

I gave them a snuffer tray for a bathing tub, but one of them would never, voluntarily, take his bath, so the other would chase him around the room, take him by one leg, drag him to the tray and pull him into the water. He seemed to be doing this for fun; there was never any quarreling between them. As there was an open fireplace in the room I always had to cover it with a shawl when I let them out, but one day I forgot to cover it before I opened the cage door and one of them took a bee line for the fireplace, but, as though frightened at the dark chasm, he flew quickly back to me, alighted on my hand and sat there trembling for some moments.

When I came into the room, after leaving them for a while, they would fly to me, chipping and seeming very glad to see me. They never showed any fear of any one, and seemed to enjoy lighting on my finger, and would look in my face very intelligently. Sometimes they got out of the house, but always returned and usually alighted on the comb in my mother's hair.

In the fall after the flowers were gone they did not seem well. During the last weeks of their life there were no blossoms but those of a few clover heads under the apple trees. I was making a silkweed cape, and as the feathery stuff was flying about the house, one of them got some of it into his throat and died the next day. He had appeared stupid for some days before. The other, who had seemed a little better than this one, grew worse after the death of his companion, and lived only two weeks longer.

One warm day in the middle of October, as I was going into the orchard to get the few remaining clover blossoms, I took the bird in the cage with me, thinking the air might do him good. I held the cage in one hand and was picking clover with the other; but when I was going to put the clover in the cage I found the door open and no bird there. I suppose that the wind had blown the door open and he had fallen out and died. I called him by the pet names which he knew, and if he had been living he would have answered me. I searched long and carefully for him but never found him. I think they died for lack of their natural food, the honey of flowers. If I could have taken them to the Southern States early in September, I presume they could have lived through the winter. I had become very much attached to my beautiful tiny pets, and felt their loss keenly.

But I have the nest yet, a lovely wonder, of softest buff-brown felt, covered externally with lichens, and glued to the remnant of a broken twig, the nest forming one and the twig the other prong of a fork, and the lichen extending in an unbroken line from the nest along the twig—a tiny twig, no larger than a straw, supports it from beneath. Burroughs says "it is an event in one's life to find a hummingbird's nest." I was so much interested in the still greater event of finding and caring for the young birds that I did not think much about the nest until it was all that remained to me except the memory of my tamed hummingbirds.

While I had them these birds were like the adult female: but when a few months older the young male assumes a variety of plumage before becoming fully adult.

I once saw one which was very different from the adults—much lighter colored—pale bluish green, with buff breast. It was very beautiful.

JULIA M. HOOPER.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will ma free on application a descriptive circular of Mr. Grinnell's boo "Pawnee Hero Stories and Folk-tales," giving a table of conten and specimen illustrations from the volume.—*Adv.*

INTELLIGENCE IN HAWKS.—Our correspondent Mr. F. T. Webber, writing from Las Animas, N. M., gives the following instance of what would appear to be remarkable intelligence in hawks, a new habit, which is certainly worth recording. He says: "There is a telephone line near me running from Las Animas to a ranch. Along the line are flocks of small birds, much like a sparrow, which feed on sunflower seeds. Hawks are unusually plentiful along the line and utilize it to secure these small birds for food. By pursuing the larger flocks they drive an occasional one against the wire, maiming it so that they easily effect its capture." In response to our inquiry as to whether this driving of the birds appeared to be accident or design, Mr. Webber states that he has no doubt that the hawks start the birds with the intention of driving them against the wire, and that after a flock of small birds have passed the wire the hawks at once give up the pursuit, or else would make every effort to turn the flock and drive the birds back.

"NESSMUK'S" LOST STORY.

SEVERAL years ago "Nessmuk" wrote a story, which he thought the best work of his life, and sent it to the editor of a then famous and popular literary journal. He waited long for some tidings of his manuscript, but never got word of its acceptance or rejection, nor was he ever able to learn what became of it. He was sorely hurt by the careless treatment which his work had received and never rewrote it. All that is now known of it is the brief outline of it as told by him to a friend two or three years before his death. It was the story in which a faithful dog was the prominent figure, probably one of those nondescript mongrels without a pedigree such as "Pete," a fragment of whose life "Nessmuk" has graphically given us in the columns of FOREST AND STREAM.

From his days of sportive puppyhood to the years that brought soberness of mien, and on till age had grizzled his muzzle and stiffened his joints, this dog had been the friend and constant companion of a kind master. The man had no family and few friends; the dog, none but his master, for his ordinary looks, being neither handsome nor ugly enough to attract attention, nor at all indicating his worth and intelligence, drew no one to seek his friendship, while he in turn, being repelled or barely tolerated by mankind at large, felt a supreme indifference for all men but his master.

Between these two existed the fullest trust and friendship, and perfect understandidg. The man knew the dog's moods, wants and wishes; by signs unintelligible to others, could read as in a book the expressions of love in his bleared old eyes, and the yearning for the power of speech, scarcely needed to make known all he felt. The dog knew the man as well and could almost read his thoughts.

When it became necessary for the master to go across seas on some matter of business or fortune-seeking, long before the day of departure the dog felt the approach of some undefined loss, giving token thereof in alternate fits of dejection and extraordinary demonstrations of love. At last the woeful day came, when he followed his only friend down the long street to the wharf with the evident knowledge that he was to accompany him no further, for he manifested none of the signs of joy that he was wont to give when they set forth together. He trotted close to his master's heels with wistful eyes constantly upon him, as if he would not lose one moment of the little time in which he might yet behold him. His master bade him farewell at the foot of the gangplank and went on board of the ship, whither the dog did not attempt to follow at first, but finally, as if impelled by a power that his habitual obedience could not withstand, he rushed up on the deck, and throwing himself upon his master, lavished on him every expression of endearment that a dog can show. His master caressed him a moment and then ordered him back. Sadly the poor old fellow obeyed, slinking back to the wharf, and taking a place apart from the bustle of the crowd, he fixed his steadfast gaze upon his master, who high above him, leaned over the bulwarks. Presently a little tug laid hold of the great ship and towed her out beyond the throng of shipping, then one by one her white wings were unfolded, and with a fair wind she went sailing away down the curling waters of the bay.

Long after the form of his master had become undistinguishable on the crowded deck, and long after the last human leave-taker had withdrawn his lingering gaze and departed, the old dog's eyes were fixed upon the ship that bore his master, following her past jutting headland and green island, till her towering canvas was but a white speck on the blue rim of the ocean. When she had sunk quite out of sight, he moaned an almost human expression of grief and slowly went away.

The master had made provision for the dog's maintenance during his absence at their old lodgings, but the poor bereft creature did not return to what could no longer be home to him now that its light was gone. He wandered through the streets disconsolate and aimless, snatching now and then a morsel at the brink of starvation, not as if he valued life for itself, but for what its continuance might bring; while he took with like indifference the sunshine or the pitiless pelting of the storm.

Crueller than any stress of weather or pinch of hunger was the constant unfriendliness of mankind and of his own fellows, for the unowned dog seldom finds a friend among either. He was set upon by every dog of high or low degree with as little pity as by the rabble of street boys, more untamed and always readier than their elders to persecute the helpless and friendless, and he was driven by house owners and housemaids from doorsteps where he lay down to warm himself in the sun.

Then he disappeared for a time and perhaps found the country kindlier, it may be found a temporary home in some farmhouse to whose boys any dog was a welcome guest. At least he had the shelter of haystacks in stormy weather and sunny nooks to bask in through the bright, if brief, winter days.

Somehow he lived on, kept alive more by the mysterious power of hope than by any tangible sustenance, till upon a bright and perfect winter day he reappeared in the streets, a gaunt, unkempt, forlorn figure. Yet there was an unwonted light in his bleared old eyes as with reeling footsteps, yet holding steadfastly to his course, he made his way toward the wharf, from which he had seen his beloved master fade from his view.

He had not waited long when a ship that had climbed into sight over the blue edge of the horizon came beating up the harbor and at last with great clamor and bustle of incoming was made fast to her wharf. Worming his way through the crowd, the old dog was almost first to get aboard, and in a moment more was at his master's feet. With a final effort of his almost spent strength he threw himself upon his master's breast, once licked the beloved face, and with a cry of joy, uttered with his last breath, sank dead upon the deck, his glazing eyes still fixed upon the only face he loved.

It could not have been chance that brought him back, so hopefully confident, to meet his master on the very day of his return, and it must have been something more wonderful than instinct, second sight or a supernatural forecast of a coming event.

How pathetically "Nessmuk," who was as fully in sympathy with man's faithfullest friend as with man, must have told the story of which we have only the bald outline, we can imagine, but alas, never know. It is sad to think of his disappointment, of his long waiting for deserved commendation of his best but unheard story.

But it is all one to him now, as he sleeps in the shade of his beloved hemlocks. ROWLAND E. ROBINSON.

Game Bag and Gun.

Antelope and Deer of America. By J. D. Caton. Price $2.50. Wing and Glass Ball Shooting with the Rifle. By W. C. Bliss. Price 50 cents. Rifle, Rod and Gun in California. By T. S. Van Dyke. Price $1.50. Shore Birds. Price 15 cents. Woodcraft. By 'Nessmuk.' Price $1. Trajectories of Hunting Rifles. Price 50 cents Wild Fowl Shooting; see advertisement.

THE NEW YORK GAME BILL.

Editor Forest and Stream:

Thanks for your reprobation of the action of the Assembly, in striking from the game bill the clause permitting prosecutions for its violation in "an adjoining county."

Such action is in the interest of lawlessness. It is a direct drive at the most efficient provision the law ever contained for its efficient administration.

It is the experience of protective effort, generally, that but for the right to prosecute in a locality exempt from sentiment hostile to beneficent legislation, signal failure is invariable, with the law brought into contempt.

It was a wise thing to do, the extension about offenders of the lines of two counties, their own and their next neighbors', and so give them a chance, upon occasions, to know what their neighbors think of them. There invariably results an improvement in manners, and a diminution in crime. The most beneficent result of convictions secured in adjoining counties—by the very limited police force accorded to game protection—is the gratifying fact that the game laws are beginning to challenge general attention and respect in the State as a substantive and beneficent part of its polity.

And why let go so important a provision? Does it violate any principle? None, confessedly. It never encountered an objection on that score. It has been approved by the best sentiment, frequently expressed, in representative gatherings, notably the codification commission, and the late sportsmen's convention at Syracuse—that best expression ever given to protective sentiment in New York.

Is it a hardship on offenders to be compelled to answer across an imaginary boundary line? Such an objection was never urged by the law-abiding. It is safe to say that no abuse has attended prosecutions under the law as it stands.

Does a necessity exist for a retention of the provision? "Woodcock on Ice," cited by FOREST AND STREAM, a reproach to protective effort in New York city, is an answer. The action should never have been brought in that county to be sure. If the amendment of the Assembly shall prevail, an action can never be brought elsewhere. What then can prevent other similar scandals with the right to prosecute in "an adjoining county" denied?

And in the Adirondacks! How refreshing the appearance that "public opinion there sustains the laws." And as a "corollary" to so happy a condition, what thoughts must come of such law-sustaining sentiment, in vigorous vindication of itself, ridding the woods of infesting dogs "of a breed commonly used for hunting deer" when the proposed bill shall take effect; and so no more water butchery until later, when the hostelries are filled up by the *élite* of the sporting gentry.

Law-abiding people having personal knowledge of conditions in the Adirondacks ought, first of all, to let no false impressions of sentiment there get abroad. Nothing could be more hurtful to the little there is left of game protection there, and in other counties similarly affected.

May not the provision expunged by the Assembly be reinstated by the Senate?

Possibly. But be sure that mere supplication will accomplish nothing. It is not in line with the methods of the political boss. He and his henchmen mean business politics.

What was it that struck out of the game bill the clause against the slaughter of does?

What expunged the Supervisors' right to legislate additional protection to "wild deer," in their respective counties, and this in violation of principle and general policy?

Why have such accomplishments been supplemented by expunging the right to prosecute in adjoining counties?

Why, counter protection, rampant in the interest of the hostelries, and their swarms of patrons and purveyors in the gaurdianship of the potential political boss.

What matters it, that this is class legislation? nothing—it pays.

Detestable in its purposes and methods, making sacrifice of the noblest game in the State to glut the brutal greed of swarms from the cities and over the borders, how long will public sufferance tolerate a policy that by vicious legislation converts the protective force of the State into ministers and servants, in the exterminating crusade.

How long? Why, until the people, the delvers, beginning now to scrutinize a purpose that calls for additional protectors at enhanced salaries, in class interests, from which they are and must be forever totally excluded, shall kick it into splithereens, as it ought to be kicked.

MARCH 14. SAINT LAWRENCE.

ARKANSAS GAME AND FISH.—Little Rock, Ark., March 16.—Our quail season closed here March 1 and left us with plenty of birds everywhere for next year. The shooting has been excellent during the entire season. Deer and turkey have been very plentiful. Large bags of jacksnipe have been killed near the city the past week. Arkansas, as a State, is one of the finest fields for a sportsman in America with either rod or gun. Many fine strings of black bass and jack salmon have already been taken from our beautiful mountain streams.—ARKANSAS.

SHOOTING QUAIL AT HOME.

THE one thing above all others that the commercial traveler is always looking forward to is the time he will get to go home; and in the case of this traveler, to the time when he will be at home in the quail season, for my home is on a farm, and quail abound on it and on the neighboring farms. Last season it was the middle of November before I was able to get there; but at last came a bright, frosty morning, when I stepped out of the cars into the arms of the little wife who had waited two months for my coming. After inquiries for friends and neighbors, the next question was, "How is Joe?" "He is all right, only he goes hunting every day, and chases rabbits all over the farm. He is so full of burrs and Spanish needles you can hardly tell what color he is. He has been hunting so much by himself that you will have trouble with him."

"Are there many quail?" "I think so. Joe had a lot of them scattered about in the garden and cherry orchard a couple of days ago, and fifteen or twenty ran across the yard one day last week. George Clark says he has three coveys waiting for you. Arva Study said to tell you to come over there so soon as you got home, and Ed Ball says some of the Richmond fellows were over there and shot a hundred times and got twelve birds. Winston Harris says you can find lots of them on his place, and that the rabbits in the 'eighty' will average forty bushels to the acre."

By this time we are driving into the yard; and Joe is capering round the buggy, barking, jumping at the horse, and fairly frantic with delight. We drive straight to the barn, and Joe tries to carry my grip to the house. My wife finds some eggs and gives him one, which he is very proud to carry. He insists on walking right between us, and is uneasy all the forenoon, and no doubt wonders if we will ever get started. After dinner I begin to get ready, and Joe's capers and noise are such a nuisance that wife put him outdoors, but soon let him in again to keep him from scratching all the paint off the door. "Now," said my wife, "I'll give you a kiss for each bird you bring in. No birds, no kisses, my boy. And don't you stay out late, dear, for I want some quail for supper."

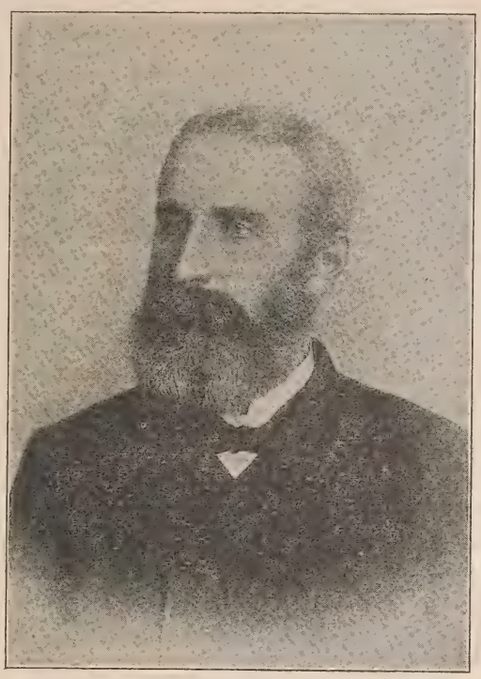
Joe and I betake us to the 18-acre stubblefield, with woods on two sides of it. Joe sweeps over the field in constantly widening circles, going at a rapid gallop. Look, here is quail sign. It is fresh too, soft and moist yet; must have roosted here last night. Joe, you need not hunt out there in the middle of the field this time of day. They are along the fence or possibly in the woods. We traverse three sides of the field, when Joe points and looks back to see if I am coming. All right, Joseph; the fun will begin right now. It was a large covey and they whirred away into the woods in great shape. Click, click, but no shot. Well now what's the matter? Opening the gun showed that no cartridges had been put in. As these birds were sure to walk back to the field for their suppers, and could easily be found a half-hour before sundown, we did not follow them, but went across the other end of the woods to another stubble.

Joe ran up a little hill in the woods, and just as he disappeared over the brow of the hill a hawk flew from the ground into a tree, and a second later tumbled to the ground riddled with shot. Just over the top of the hill Joe stood on a single bird, and was doubtless standing on it at the time the hawk was shot. The bird was killed, and Joe broke for it and flushed another one. Instead of shooting at the second bird, Joe was sharply ordered to charge, which he obeyed, and was then told to come back and be whipped, which he did, and promised not to do that way again. He was then told to fetch, and did it handsomely. He then began to hunt the ground closely and found eight more birds, one at a time, and five of them were bagged.

As we crossed the woods, Joe saw a fox squirrel very busy burying a hickory nut, and made a dash for him. As he ran along a cattle path, he made no noise and came so near catching the squirrel that it had barely time to get to the nearest tree, only a few feet away. Approaching the tree very quietly and throwing a club into some brush on the opposite side of the tree, I brought the squirrel around very quickly and he was bagged at once.

The next stubble field yielded no birds, although there were recent signs, and the dog found a trail, but was unable to make it out. The scattered birds found in the woods were probably the ones that lived in this field. We next tried a cornfield and found one covey. Joe trailed them 200yds. along the corn rows, and I got frequent glimpses of them as they were running. At last they rose wild and went across the creek into another cornfield. One bird was winged and fell into the corn. Joe found the spot where it fell, but it had run away and he could not track it. He hunted it for ten minutes and at last pointed it under a bunch of foxtail. It is a fact that Joe and many other dogs cannot track a winged quail, though they will follow an unwounded bird with no trouble. As it was now near the close of the short November afternoon, and the creek difficult to cross, this covey was not followed. A quarter of a mile further down the creek a large covey was found, and went across the creek, coming down in the border of weeds and bushes along the creek bank, a few going on and dropping in the weed field beyond. Two shots at this covey failed to get a feather.

I was about to start homeward when Ed Ball hailed me from the other side with, "Come over. I spotted a half dozen of 'em out there in the weeds." "Haven't got my rubber boots," said I. "I'll come and get you, then," said Ed. After carrying me across he said, "They are right out there about sixty yards. It's a good place for old Joe to get in some fine work, and I'd rather see him hunt than to eat when I'm hungry."



Joe pointed, then went slowly forward with head stretched forward and tail on a line with his back. After proceeding a number of yards he turned to the left, but soon came back to where he had made the turn, and kept on in the first direction. Ed said, "I'll bet the trail of another bird crosses this one where Joe made that turn. I'll lay my hat there to mark the spot, and we will bring Joe back after he finds this one and see what he makes of it." Joe trailed along forty yards further, stopping a number of times. At each stop Ed was sure he had the bird, but I said not. "How can you tell?" asked Ed. "Watch his tail. While he walks along as he is doing now he smells only the foot scent left on the ground and what scent may be left on the weeds where its body has rubbed them. It is what might be termed second-hand scent, and the dog is able to distinguish between it and direct scent. He pays no attention to the foot scent except enough to guide his course. His main efforts are to catch the direct scent, and his stops are made when he thinks he has caught a little of the direct scent. If the scent does not continue he moves on."

"Well now," said Ed, "what's his tail got to do with all that? He smells with his nose, don't he?" "Certainly, but his tail is an index to what his nose smells. So long as his nose smells foot scent only his tail is on a line with his back, but when he stops and his tail slowly rises about 2in. and stays there, he is smelling the bird itself."

"Is it that way with all dogs?" asked Ed.

"No, but every dog has some way of showing what he smells. Dogs have as strongly marked individual character as men have."

"I don't see why they shouldn't have them" said Ed, "for lots of dogs have a blamed sight more sense than some men. Some men—there! he raised his tail that time."

HON. JOHN G. SMITH,

President Iowa State Association for the Protection of Game and Fish.

"Yes," said I, "the bird is there." Two birds got up. The first one went down all in a heap, not 20yds. away. The second one lost a few feathers, and began to tower. Up, up, higher and straighter up, till at a height of 75ft., it turned over backward and fell. I have never known a quail to recover itself after turning over and starting to fall in this manner, but have frequently seen prairie chickens right themselves before reaching the ground and fly clear away. After retrieving the dead birds we took Joe to the place where Ed had left his hat. Joe took up the left-hand trail again, and traced it by a circuitous route to the point where the two birds had got up. Before it become too dark to shoot, five more birds were bagged, and several more shot at, that are still very good birds if no one else has got them. Ed. carried me across the creek and said, "Come over again, I'll leave the team right in the middle of the cornfield, and follow Joe if you come." Joe and I got into the road and trudged homeward; pretty tired, very hungry, but feeling more free from care and worry than I had for months.

The incidents of the afternoon were reviewed as I walked along, and if it had not been for one poor bird that had gone off with one leg hanging down, I would have voted a time of perfect enjoyment. The cheerful lights of home were shining when I reached the top of the hill, and the little wife met me at the door with, "How many kisses do I owe you?" "Fourteen," said I. "Oh, there will be enough for supper and breakfast, and dinner to-morrow, too." "Enough kisses?" "No! quails, you naughty boy. Turn them out here and we will have some for supper." Twenty minutes later we sat down to a meal that could not be duplicated in any city and with an appetite that could not be bought with money. For weeks past I had been unable to sleep more than four to six hours out of twenty-four, but that night at 9 o'clock wife remarked that somebody was getting sleepy, and she was correct, for the next ten hours were spent in dreamless, refreshing sleep.

At noon, next day, George Clark came up and said that as he came to dinner he raised a big covey in his east cornfield. "Yes," said I, "and they went south into the woods and came down at the head of the little branch." "How do you know they did?" asked George, "did you see them?" "No, but I've shot over that ground nearly every season for twenty years, and know the ways of the birds pretty well." "That's just where they went, any way," said George, "and I came up to tell you about it. I ought to gather corn this afternoon, but if you are going after the birds, I'm going along."

Of course I went after the birds and was glad to have George along, for he is pleasant company, and an excellent marker of birds. He never shoots any, but enjoys seeing it done. To give details of that afternoon's sport would make too long a story. It happened to be one of my shooting days and eighteen quail were bagged at twenty-three shots.

O. H. HAMPTON.

THE "KITCHEN GARDEN" GUN.

Editor Forest and Stream:

I have long been a reader of the only sportsman's journal that has ever come up to my idea of a paper that met the wants of the great mass, old and young, in fact all that they want or think they do; and I remember well when our friend Hallock, that genial sportsman, was at its head. I would rather go without my dinner than to miss my FOREST AND STREAM.

Once in a while I see something that both amuses and instructs, and in the issue of Jan. 28 I find an article headed "Short Gun Barrels," which states in part that the "enthusiastic sportsman who kept cutting off the barrels of a 10-gauge gun until they were reduced to 24in. may have a marvelous arm for duck shooting, but many of your readers accustomed to the usual length will, I fear, consider it better adapted for scaring away domesticated ducks from the kitchen garden." Now, we are told in the good book that there are wise men in the world and that there is nothing new under the sun. I must confess my ignorance as to the use, make and proper length of barrel of a thing they call a gun, but having been quite young when I first handled the tarnel gun, it being a double barrel flint-lock (length of barrel 28in.) and having used a gun for the last forty-seven years, have come to the conclusion that I have just begun to learn what a proper gun should be, and how to load one properly, and after all to shoot it.

The first bird I ever killed was at the first time I ever put a gun to my shoulder, and it was an old squaw. A prouder boy never walked on the face of the earth. Later on my uncle and guardian had the gun changed to a percussion; and many is the bird that I killed after. One time I came to New York city to visit some friends, and I bought in Chatham street an 11-gauge English gun of about 10lbs. weight, 34in. barrels. I found that it was muzzle-heavy, and had it cut off by the county blacksmith 4in., and killed a great many birds with it. As I grew older I had made in London an 8-gauge, 32in. barrels, expressly for ducks; and I found that I could kill just as many with the 11-gauge and without so much work. As time flew on, the breechloader came to hand. One was bought—a Parker 10-gauge 32in. After shooting it one season, I had it cut off to 30in., and found the results good. Then I bought a 30 Remington and found that in wildfowl shooting it shot a little close; so I had it cut to 28in.; and I think it is as good a shooting gun as one can wish; at least it suits me. One day I was in town and a friend of mine had a 10-gauge Parker weighing 10½lbs. in fine order, in fact new, but too heavy for him, so I bought it and had it cut to 28in., and for shooting qualities I do not find any of the "proper length guns" that kill any more or at greater distance than it does. One day I was conversing with an old friend, who is a gunsmith by the way, I said I had a mind to have Parker Bros. make me a set of laminated steel barrels to fit the 28 Parker stock, 24in. long, and full choke and of the same weight. Like your correspondent "T. H. G." many said it would be a failure, and would be worthless; perhaps do for a Fourth of July gun, etc. But they were made and paid for. Now for results. I soon found that the 30in. would burn 4½drs. of C. & H. powder, and that the 28in. would do the same; and the baby was equal to all. I will not say positively, but if my memory serves me right, the official test at the factory was 183 and 192 at 30yds., with 1¼oz No. 8 shot; at least that was on the card that came with the gun.

As to the kitchen ducks being scared off, I should be sorry to have "T. H. G." in the barn yard. I labor under an impression he would find out perhaps that it would do something more than scare. Since October, 1891, the opening of the season, to Nov. 16, I killed over two hundred good birds for the table within 60 miles of New York with a 24in. "barn yard" duck gun. I killed in one day on the south side of Long Island in the Great South Bay 50 black-heads from 10 A. M. until 3 P. M., with that same 24in. "kitchen garden" duck gun.

Why not go back a hundred years and have the old-fashioned Queen's Anne barrel that would stand 6ft. long. That was the proper thing, you know, then, but not now. Of course I would not, according to my experience, wish a 24in. cylinder barrel for general shooting; but notwithstanding all that, there is a gentleman on Long Island who has a Scott 12-gauge with a 22in. barrel, and kills about as many quail and rabbits as those who have the proper gun, you know. The load I use for geese (I killed a pair two weeks ago with the "kitchen garden" gun) is 4½drs. C. & H. and 1¼oz. BBB; same powder charge for ducks and broadbills, with No. 4 shot in left barrel and No. 5 in right; and I am satisfied with the results. I am not much of a shot, but somehow or other I get the birds all the same with the "kitchen garden" gun.

EZEKIL.

OREAN PARK ASSOCIATION.—A number of Passaic, N. J., gentlemen including Mayor Walston R. Brown, Gen. Bird W. Spencer, Judge Morrell and W. I. Barry, have purchased 2,500 acres of land in the Pequannock Valley, West Milford Township, Passaic county, N. J., which they propose to turn into a park and game preserve. An organization has been effected under the name of the Orean Park Association, and the following officers have been elected: W. R. Brown, President; W. I. Barry, Vice-President; Richard Morrell, Treasurer; Frederick Lowe, Secretary. An executive committee, consisting of W. R. Brown, B. W. Spencer and John J. Bowes; and a board of directors made up as follows: W. R. Brown, Dr. C. Van Riper, John J. Bowes, Joseph H. Wright, W. I. Barry, B. W. Spencer, Andrew McLean, Richard Morrell, Colin R. Wise and James T. Ball. The park will be stocked with grouse and quail.

CHICAGO AND THE WEST.

CHICAGO, Ill., March 19.—There is no part of a sporting paper so interesting as that which tells of country, new or old, where actual sport can be had right now, actually and in the present, where game or fish may still be actually found. Last week there appeared in these columns some account of a certain locality where upland shooting, and some marsh shooting and some big game shooting could be obtained from one central camp. The identity of this locality was concealed, wisely, I think. From what I have learned already, I do not think it will be difficult to fill to more than overflowing the quarters of my intentionally anonymous informant, though it is too early in the season to give anyone definite knowledge of the place. In regard to this I have received a letter, which I give below:

UNION LEAGUE CLUB, Chicago, March 16, 1892.—Several days since I read your correspondence in FOREST AND STREAM and was much interested, not to say amused, in your friend's description of his little game "pocket."

He's far too modest, I am sure, for a raconteur of hunting stories. While he was telling it he might just as well have rounded his yarn off by adding to his chickens, elk, moose and deer, buffalo and possibly kangaroo to make the *tout ensemble* effective.

You must know that chickens do not consort with elk and moose, nor is there any likelihood of either of the latter being near enough to a railroad to ship out.

I have been to several places where moose were said, by the natives, to be "plenty," but so far have never got nearer than old sign to the animals themselves.

I have seen hundreds of elk and can direct any one of the right sort to hunting ground where there would be a "sure thing" even for a tyro, but they are never found anywhere near a chicken country because the latter do not generally advance much, if any, beyond a settled and cultivated community.

I know of a region, told me in confidence by Mr. Charles Hallock, where moose can be had with tolerable certainty, and not far away possibly some chicken and goose shooting could be had.

I cannot even guess your correspondent's little private preserve unless it might be in the Turtle Mountain country.

Still, I would be glad to know of it and will return for the favor equally valuable pointers as to elk and bear.

HARVEY M. HARPER.

I am sure I am obliged to Mr. Harper for the knowledge that "chickens do not consort with elk and moose," etc., etc., for otherwise I might have been left in ignorance on this head. I have killed a little big game, not much, and shot a few chickens, not many, and I must say that I never found the two sorts of game together. Still, I am not prepared to call it impossible to find both sorts from the same camp, and with all allowance for the lack of personal acquaintance with this region, I am still disposed to think our correspondent's accouat of his locality not only within the range of possibility, but quite within the limits of temperate statement on his part. We may know more of this by another season. At present I cannot divulge this locality. Next fall I shall name it to a few, and Mr. Harper may be one of these, if he can show proper FOREST AND STREAM credentials, and if I happen to like him. Of course, I can't tell whether I will or not.

At this writing we are still having winter weather of a very unmistakable sort, and it is playing havoc with our sport. A few days ago there was a remarkable flight of ducks in all over the Kankakee and Illinois, and even at Fox Lake, north of here, and good bags were made in a dozen different directions. Mr. Ed Bangs, shooting at Swan Lake Club, averaged over forty a day for more than a week, which certainly is good shooting, and others on the Illinois had heavy bags. Now, however, we hear less flattering reports. The continued blizzard has driven the ducks out, and few are seen moving anywhere. Mr. H. D. Nicholls tells me Cumberland Club has sent no bags of consequence, although John Grey, a mighty man among mallards, has been down there, and others also.

Ben Dicks is back to-day from Mak-saw-ba, higher up the Kankakee, and says he only had three shots. George Davis is now down at Hennepin Club, on the Illinois River, above Swan Lake, and has sent up one bunch of a dozen ducks to his friends, but can not have had heavy shooting. All in all, our flight is over for the present, though a warm day or two may bring the birds back again. The month is very cold and backward for this region.

Last week I mentioned that Warden Buck was to start down the Kankakee on a trip of investigation looking toward a seizure of some nets. Buck started on time Monday, left Mak-saw-ba Tuesday morning and made the run of 23 miles down stream to English Lake in due season. He reported finding some few nets in the river, but the ice was so thick that only a few of the regular netters had gone to work and he therefore thought best to wait for a while. He said there were not many ducks on the river. The following letter from Mr. Borders, who was to have met Buck at English Lake, will continue the story. I presume all work will have been done before this sees print, and indeed thought the raid would have been made before this week's paper came out. Mr. Borders's letter:

WINAMAC, Ind., March 17.—I sent my partner, Mr. Dukes, to Greene's to make a trip with Buck; they found the river frozen worse than when we were there. I saw Buck last night; only a few nets are in the river, and but few will be put in while the weather is at its present temperature; it is not only unsafe to put the nets in the water because of the ice, but the water is so cold that the fish are not running. I sent Buck back to the river this morning to wait for warmer weather or for orders from you. I have the affidavits sworn to by Mr. Dennis and ready to be filed when we think there is a fair chance of getting enough nets, etc., to repay us. The warrants are all ready, and as soon as the nets are in the water again I will go to Knox and LaPorte and cause them to be issued. I think it will be well for Buck to stay at the lake until we are ready to act, and then make the trip with the officers over the ground. The wind is from the north and no indications of warmer weather this morning.—B. BORDERS.

On the 18th Mr. Buck wrote as follows:

The ice is so thick I can't get up or down the river. It is breaking some on the lake and is thawing to-day, so I may be able to get down to Wilder's to-morrow or next day. Mr. Borders told me they only wanted me to locate any nets, and did not care for the names of the owners. There are no ducks flying, and you can't get around for the ice, so I have done no shooting.—F. L. BUCK.

This morning, Saturday, the temperature is rising, and we hope for a thaw and break up. A cold spring means delay and danger both to our sport with rod or gun in this section.

An interesting action in protective matters will this spring be taken by two of our stronger clubs, Mak-saw-ba and English Lake, by which each club will appropriate $150 for the purpose of "employing a warden for the Kankakee River." This does not mean that such warden shall spend his time upon the grounds of either club, but shall go where he is needed. It is practically a side-loan to the Kankakee Association, though not affecting other contributions to that society, and will be looked upon as a club expense from the general fund, such as fencing, building or other improvement. I am far in advance on this statement, for neither club has yet actually taken such action, but it is nearly certain they will both do so, and I am sure I do not see why Cumberland Club should not do likewise. The actual expense of cleaning out the netters and illegal shooters along the Kankakee would be slight, and $450 a year, with the addition of perhaps nearly that much from the Kankakee Association, would practically make a clean sweep of the whole business. The Kankakee has long been open thieving grounds for law breakers, and it is indeed specifically favored, or rather hurt, by certain clauses in the absurd Indiana law, but there is no reason to believe that the illegal men will be in position to make a long fight. We have few records to show that illegal shooting or fishing has lasted long on any stream where the sportsmen have shown a disposition to close right in and do a little actual fighting. It is the long range talking which brings protective work into disrepute. When you sift out the actual fights from the verbal paper fights, it is astonishing to see how little you have in your sieve. Instance the Tippecanoe. No stream was worse ridden of the lawless. Yet Commissioner Dennis did a little real work there, and broke up the lawlessness. The same story is easy for the Kankakee. A little sense and a little sand, and the fight is over. The prize is worth the struggle.

The only difficulty about freeing a given stream or locality of illegal methods lies in the fact that there are not interested and active sportsmen enough to go around. This makes the warden system good in the specific, but bad in the general. Under this system there is no doubt that active local societies, banded into general controlling unions for States or large given regions, present the most favorable chances for practical success. We can protect the Kankakee, the Tippecanoe, the Illinois, until what time we know millennium, and see game and game fish put under an operative taboo for the dealers who are *au fond* responsible for their untimely taking off.

Meantime the patient sportsman spreads his sails for any probable wind. Duck shooting, for instance, has grown almost pathetic in some of its aspects. Some of us were figuring the other day, and we made it out that it costs a duck shooter, if he fires say, 150 shots in a day, about $15 a day to go out hunting. The Chicago shooter who has good sport, and who hires a pusher, will spend more than that figure unless he is economical. Thus it is easily seen that the birds come high. The worst of it is, they so often don't come at all.

Dr. J. W. Hutchinson is back from Florida. It is most pleasant to state that his hand, injured by the gunshot wound, is nearly healed. He can use it now in writing.

E HOUGH.

ADIRONDACK GUIDES' ASSOCIATION.

SARANAC LAKE, N. Y., March 18.—*Editor Forest and Stream:* The first annual meeting of the Adirondack Guides' Association was held in this village on the 2d inst. There were present somewhat more than 200 guides, gathered from different portions of the Adirondacks. Verplanck Colvin, honorary president, of Albany, was present and delivered a very interesting address.

Officers for the ensuing year were chosen as follows: Honorary President, Verplanck Colvin, of Albany; President, Fitz Green Hallock, of Saranac Lake; Vice Presidents, Thos. Redwood, of Paul Smith's, and Alonzo Dudley, of Saranac Lake; Secretary, John H. Miller, of Saranac Lake; Treasurer, F. D. Kilburn, of Malone. Executive Committee: Simeon D. Torrance, Benjamin R. Moody, Calvin Brown and Lucius Evans, of Saranac Lake; Elverdo Patterson, Ross Hayes and John McLaughlin, of Paul Smith's; George Alford and Miles Kennedy, of Lake Placid; Earl Derby, of Saranac Inn; Isaac Kenwell, of Indian Lake; Robert W. Nichols, of Keene; Ernest H. Johnson, of Tupper Lake, and John J. Richards, of Raquette Lake.

The Adirondack Guides' Association was organized June 27, 1891, and its objects are:

To promote and facilitate travel in the Adirondacks; to secure to the public competent and reliable guides, thus assuring the welfare of tourists and sportsmen; to aid in the enforcement of the forest and game laws of the State; to secure wise and practical legislation on all subjects affecting the interests of the Adirondack region; to establish a uniform rate of wages of guides; and to render financial assistance to its members in case of sickness or other disability, or to their families in case of the death of such members.

The increase of railroads and the rush of travel into the Adirondacks has brought among us unknown persons who offer themselves as guides. Such persons may or may not be competent. This association proposes a registration of all competent and properly-equiped guides, who will hold cards of membership, issued by officers of the association, after such persons have been passed upon by local committees of guides of established reputation, each committee acting for its own section of the Adirondacks.

The cards of membership have been prepared by the American Bank Note Company, handsomely engraved from a special design made for the association by the company.

Besides the membership composed of guides, there is also a class known as "associate members," constituted from those who are friendly to the association and may desire to enroll themselves. They are admitted by ballot in the same manner, and pay the same fees and dues as guides, but are not empowered to vote.

The following is a portion of the address of Verplanck Colvin, honorary president, made at the first annual meeting of the association:

And now, that you are to have a permanent organization, may I offer you one word of advice? Let your organization be as simple as possible. Do not tie yourselves up with a multitude of new laws and rules. Do nothing that you will have to undo. Have a few good rules and as little government as possible, remembering that, when occasion requires, you can bring in by-laws and rules to correct any evils that may be found to require such treatment. Do not burden your minds with troublesome things.

What were your objects in forming this organization? Your card of membership says: "To insure the comfort and safety of travelers." As you are yourselves, all of you great travelers, I assume that it is also to insure your comfort and security as well as that of those whom you guide through the wilderness.

The Adirondack region of savage men is a thing of the past. The decay of savagery commenced in the days of the French and Indian war; and you, by your labors and exertions have made the wilderness the safe health resort of a new civilization.

Many of you will remember the stories told of your brave forefathers; how they entered this forest to carve out a livelihood for themselves and their posterity. How they fought with wild beasts and wild men; how they endured every privation, cold and hunger—you know full well.

And now you find, in the last phases of the civilization—for which you have cleared the way—a danger to yourselves and your employers in the incoming of unknown men; who are not to the manor born; who may or may not be safe or good men; and you of the olden time—who know one another—draw more closely together (you and those who have employed you in the years gone by), so that the old associations may be preserved—the same safety and security shall exist in the woods as heretofore, and that the lack of police supervision may not permit dangerous characters to impose upon the public and upon you, you now associate yourselves in this organization. You secure yourselves and friends from the bad elements—the decay and froth of civilization which often make their way to remote places over new railroads.

This appears not only to be wise and proper, but may have many beneficent features. You may, to some extent, form a friendly mutual benefit society for life insurance or protection for one another and your families.

Have wisdom, therefore, in your councils. Adopt no rules hastily or without referring to committees; taking kindly and gentle council of one another for the good of all, and this association will be of the greatest benefit to you. Then you, who have learned to love, to venerate the gift of mountains and forests and lakes, will retain the benefits of your own labors and of those of your ancestors. You will preserve the forests and be to New York State a race loftier than that of the Scottish Highlands, more fortunate in your advantages in life and knowledge, with all the possibilities of the intellectual development of our race and the freedom which only belongs to Americans—that great heritage secured by constant battle. You are unquestionably the best body of riflemen in America—a very safeguard to the State should war arise, we will hope that such emergency may ever be deferred, and that your victories may be the victories of peace and good will towards men; this must and cannot fail to be your great desire. Then with true hearts, faithful work and kindness toward all—you cannot fail to obtain every reasonable good you may desire.

JOHN H. MILLER, Sec'y.

PENNSYLVANIA STATE ASSOCIATION.

To the Sportsmen of Pennsylvania:

I present a few of the reasons why every shooting organization in the State of Pennsylvania should become members of the Pennsylvania State Sportsmen's Association:

1. The organization is formed for the purpose of combining to secure proper legislation for the progagation and protection of our game birds and animals.

2. The consolidation of the shooters of the State means a power, and through it there is no reason why we should not receive an appropriation annually equal to that received by the State Fishery Commission for stocking our State with game.

3. It makes every individual member of a club joining the Association a member of the organization, eligible to compete for any and all of the valuble prizes donated and contested for annually, and a police officer or game warden who will report to the officers of the Assocation any unlawful hunting or trapping, thus it will be seen that we will have thousands of men who will, through their aid, see that game is protected in accordance with the laws of this Commonwealth.

4. It only costs, if you are a club or an association, five dollars to join, and your annual dues thereafter are one dollar. If an individual, one dollar, and annual dues fifty cents. The expense to a club is but a trifle, and the benefits to every true sportsmen are incalculable, and your children's children will thank their grandfather that he was and ever may remain a member of the Pennsylvania State Sportsmen's Association. Send along the required fee, and let us by union of thought and action make the Association an honor to the State whose name it bears. Yours fraternally,

HARRISBURG, Pa. JAMES H. WORDEN, Secretary.

A TYPICAL IOWA SPORTSMAN.

IN all the broad domain of Iowa it would be difficult to find a truer representative of the highest type of sportsmanship than the subject of our illustration on page 273, President John G. Smith, of the Iowa State Association for the Protection of Game and Fish. Mr. Smith is an all-round sportsman with the gun, but his special forte is duck shooting, a branch of field sports in which he has great skill and rich information gained from more than forty years pursuit of the game in nearly every State of the Union from the Atlantic to the Pacific. He is also well known as a trap-shooter, of which sport he is very fond; and he enjoys a wide acquaintance among the trap-shooters of the country. He is a close friend of Mr. C. W. Budd, with whom Mr. Smith makes his home while in Des Moines, in attendance upon the Legislature.

Mr. Smith has always been warmly interested in game protection and has ever been unsparing of effort to advance the cause in public estimation, giving freely of both time and money. He was one of the founders of the State Association; has attended every one of its meetings, and for five years has been honored as its President. Mr. Smith is a member of the Iowa Legislature, and has been active in promoting game and fish protective legislation. His home is in Algona, and the portrait shows him to be in the prime of life.

ESQUIMAU CARIBOU HUNTING.

THE ancient method of taking caribou by the Esquimaux was by means of pitfalls. These were dug in the snow along the banks of rivers, where the snow lodges in immense quantities, and wherever there is a sloping place down which the reindeer can travel. The pits were covered with thin slabs of snow strong enough to hold their shape, but if trod upon by the animal it was immediately precipitated into the cavity. As an extra attraction for the caribou to walk into his parlor, a bunch of moss was gathered and pinned with little sticks to the center of the slab covering the pit. The old people say they used to work very hard digging these traps, the women working as well as the men. They would examine the pits every day, remove the game that was caught and dig others. They say the natives labored so hard that in the spring they were all very much reduced in flesh, but strong and hardy.

This method is still employed by the old men who are unable to travel rapidly. Of course when this plan was in use their only weapon was the bow and arrow. It will be seen that where the banks are steep, any place at which the snow drifts in such a manner as to make a passable way would be chosen by the caribou in passing from one side of the river to the other in changing their feeding grounds.

E. P. HERENDEEN.

Mr. Eubank Finds Plenty of Game.—Jas. T. Eubank living in Middle Park, has just passed through an awful experience. His house is far removed from his neighbors, and last Monday night, while alone in his cabin, he was awakened from his sleep by howling noises and scratching at his door. Looking through his one small window he saw many different animals prowling around in the snow. He lost no time in securely barring the door, and getting his Winchester rifle, awaited developments. All night long he stood guard, listening to the roaring of three large mountain lions that had taken up their quarters on top of his cabin, apparently hugging the huge chimney for warmth, while other animals were walking and snarling around the house. At daylight Mr. Eubank proceeded to make a sortie upon his uninvited guests, but found himself cut off at the first step, for on opening his door a small distance he found a large grizzly had taken possession of his doorstep, while two others, almost as large, were clamoring for the same warm position. From his single cabin window all he could see was his barnyard. The two milch cows he had put in his small log barn the night before were walking around the yard to keep from freezing, while the barn itself contained a herd of elk that had driven the cows out. All day Mr. Eubank sat waiting for his animal neighbors to return to their mountain homes, but they had come to stay, at least until the weather moderated. Occasionally an elk would venture outside of the barn and make for the haystack in the yard. As soon as one of these showed itself outside of the barn Mr. Eubank would send a ball through its head, and in a moment there would be a scramble between the bears, wolves and other animals for its carcass, which would be consumed or carried off in a moment's time. Just how many wild animals had taken shelter with him he could not say, but he says he killed at least half-dozen elk, and their carcasses were consumed with the same rapidity that the first was. On Tuesday morning the sun came out bright, and as the weather moderated the growling and pawing around his house became less. Finally when Mr. Eubank did venture out, all he found was one crippled bear, a broken-legged elk, and a few wounded wolves that he had hit with stray shot while shooting at the elk. Mr. Eubank is thankful for his escape from injury from the animals, but it seems they were too dazed by the intense cold to do anything but try to keep warm.—*Standard Springs, (Col.) Inter-Mountain.*

"Hoodlums" Again.—I note Mr. Flower's criticism on my comments on "Hoodlums," and beg him not to make the mistake of supposing that my experience is any more limited than his own, or is confined to New Hampshire. I have lived pretty much all over New England, and traveled pretty widely, east of the Mississippi, to say nothing of having seen quite a slice of Europe. I know something of Maine as well as himself, and know that there are plenty of good fellows there in the camps, and I also know that there are some blackguards among the city visitors, but they were not the men who killed the warden down in Aroostook, or tore down the weirs at Sebago Lake. These native poachers get not only "their share of the game," but destroy wilfully a good deal more. I have been talking of sportsmen, not "sports," when I spoke of visitors, and there is a difference. I am not likely to change my views or go over to anybody's "side of the fence" now. After half a century and more of enjoyment by flood and field, the few years that are left me are not likely to ripen my observation or mature my judgment. When a man is closing in rapidly on his allotted "three score and ten" he does not often change his opinions materially unless the "new light" is very strong and the new proof very convincing.—Von W.

The Lake View Association.—Topeka, Kan., March 16.—The Lake View Shooting and Fishing Association, of Topeka and Lawrence, Kansas, filed its charter yesterday, and the directors held their first meeting last night, when the following officers were elected: President, J. C. Clark, Topeka; Vice-President, Wm. Bromelsick, Lawrence; Secretary, W. S. Metcalf, Lawrence; Treasurer, A. B. De Bost, Topeka. The capital stock of the association is owned in Topeka and Lawrence and the property owned is a black bass lake located between the two cities. This lake will be stocked with lake trout, if possible, and will be planted with wild rice and celery for the benefit of the ducks which formerly swarmed here, and which it is hoped will return when the shooting is properly restricted. This lake has been one of the best duck grounds in Kansas, but the ducks have been driven off by market-hunters and that class of so called sportsmen who shoot at everything in sight, in the hope of killing once in twenty-five shots, and who will shoot just as late as they can catch a glimpse of a wing in the darkness. The lake will be policed at once, and a club house and other improvements put in so as to be ready for the fishing season.—E. E.

Sportsmen's Association of Cheat Mountain.—The fishing and shooting during the past season was better than ever before, and most of those who visited the preserve were successful. There is now good prospect of having a bridle road made from Winchester bridge to the upper end of the this now trackless and almost impenetrable forest. The association is financially in good condition, and is in other respects a great success. The club house was crowded to more than its real capacity last season.—Deacon.

Spring Shooting.—On March 9, on the south side of Long Island, Amityville, I killed ten broadbills, on investigation two were cocks and eight were hens. After close inspection it was found that seven of the hens contained eggs, six of the seven were impregnated, showing conclusively that the birds had recently mated, and should not be killed after the first of March.—Ezekil.

Words of Appreciation.

That admirable weekly journal, Forest and Stream, has been enlarged. It appeared as full of diverse and interesting sporting subjects—that is genuine, generally guileless sport, such as shooting, angling, canoeing, yachting, dog fancying and breeding—as was possible before the increase in size, but now it is brimming over, and without any addition to price, too.—*Toronto Empire.*

Another year of the late progressiveness and the Forest and Stream will be out of sight—which means, I believe, in more cultured vernacular, that it will have a cinch on the hull shootin' match.—*Art in Advertising.*

Sea and River Fishing.

Angling Talks. By George Dawson. Price 50 cents. Fly-Rods and Fly-Tackle. By H. P. Wells. Price $2.50. Fly-Fishing and Fly-Making for Trout. By J. H. Keene. Price $1.50. American Angler's Book. By Thad. Norris. Price $5.50.

The full texts of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

THE HISTORY OF A DECOY FISH.

Editor Forest and Stream:

Did you ever fish through the ice with a decoy fish? I do not mean as the Indians do, down on your knees on the edge of a hole in the ice with your nose within a few inches of the water and three or four thicknesses of an old mackinaw blanket over you to shut out the light, and then in that position play the fish with one hand and hold the gaff in the other until you get so stiff and cold that when you want to gaff a fish you can hardly use a muscle; but rather with a well constructed fish box and a spring spear such as were often used thirty or forty years ago before their use was generally prohibited? If not, you have missed an experience not only charming in itself, but intensely instructive as to the habits of fish. Let me give you a little experience of my own in the days "long gone by."

During the fall of 1856 and early winter following, I happened to be in Fon-du-Lac, Wis., and at that time there were many Indians still living in the neighborhood. The lakes and ponds abounded in pike and perch, and during every winter the Indians were constantly fishing through the ice with their decoy fishes and gaffs in the manner described above. These decoys were whittled out of a pine stick, so as to resemble in shape a fish about six or seven inches in length; the wood was then stained a dark color, a few places were then scraped or chipped so as to give the fish a mottled appearance, a couple of pieces of tin stuck in each side answered for fins, and a groove was made in the fore part of the belly and filled with lead, which was kept bright. With a string in the head the fish could be jerked to the surface of the water, and the lead would carry it down head first when the string was slackened, and so a very natural motion could be given to it. What was most remarkable was the fact that the less the decoy fish resembled a real one, within reasonable bounds of course, the more successful it seemed to be.

Some two or three years previously an old Indian had whittled out a fish which soon had the reputation of being the most killing and successful decoy ever made in that vicinity, so successful, in fact, that for a long time he refused to sell it on any terms, but at last a friend of mine through the offer of a considerable sum, tempted its owner to part with it and became its possessor. When the Legislature of Wisconsin soon after prohibited the use of such fish, it was sent to me as a souvenir of my trip. The record of one day's sport will show the killing qualities of this fish. On one morning in December, 1856, I visited with a companion, Lake Horicon, a lake some fifteen miles long situated a few miles distant, for a day's sport at catching pike. We cut a hole in the ice nearly four feet in diameter, and over it placed our fishing box with the open side down. This box was 4ft. square, lined with heavy paper to exclude the light; we entered through a door in the side which was fastened with an inside button and sat opposite each other, each resting his feet on the ends of the narrow boat occupied by the other; our spring spear had a handle some 15ft. in length which passed through a hole in the center of the top of the box. The decoy fish was played with the left hand and the spear held in the right. The water was about 10ft. deep, and the light shone so clearly through the ice that everything in the water, even to the smallest fish, could be seen with perfect distinctness.

In four hours we took twenty-one pike, which weighed a little over 70lbs., and we took every pike that came within sight except one small one. As I sat looking under the ice I saw a large pike chasing a small one, which darted across the hole, but as soon as his pursuer saw the decoy fish it ceased the chase and turned around and seized it with such force that he came partly out of the water right between our feet, and I speared him in the head above the water with the decoy fish in his mouth His weight was over 5lbs.

During all this time two Indians were fishing for pike only a few feet distant and on equally good grounds, and together they took just two fish, their decoys failing to attract the fish.

The box, which to the fish appeared like a dark spot on the ice, afforded an elegant opportunity to observe the habits of the pike in taking its food. Once on this day a large pike missed the decoy and he came with such force that he went perhaps 20ft. beyond us, but he turned and came back slowly near the bottom and stopped right under the decoy fish and then began to rise very slowly toward it, but he was speared in deep water before he had a chance to make a second rush. Usually, however, the fish would approach cautiously until near the decoy and then make a sudden dash for it.

On Lake Winnebago, where we usually had good success, my companion and I both took yellow perch quite freely and they manifested none of the caution of the pike, but the black bass which abounded in that lake never came near enough to be taken; curiosity sometimes led very large ones to approach within sight, but they always kept close to the bottom and soon slowly swam away.

I have never been able to reconcile the results of my fishing with this decoy fish with the theory of many anglers for trout, that the more closely we can imitate the flies which then abound upon a stream or lake, the more sure we will be of sport, as in my experience the reverse is very often the case.

I have often observed that when I have been using a certain fly with success, the same fly has suddenly made its appearance in large numbers on the water, and that immediately my sport almost wholly ceased for the simple reason that my fly then constituted but one of say 10,000 of the same kind; and I, therefore, had but one chance in 10,000 that mine would be taken, which was, of course, relatively diminished by the artificial character of the fly. May it not be so with a decoy fish or artificial minnow? The closer the imitation the more we put it in competition with the natural fish, while if we use one which will attract although it is different from the fish inhabiting the same waters, may it not prove to be very successful?

With this article I send to you for your inspection this old relic of past sport, although I fear it will sorely test your faith in the veracity of your correspondent.

Poughkeepsie, N. Y., March 9. V. C.

TROUT AND WORM.

During a camping trip last spring in Potter county, Pa., on that famous stream known as Cross Fork, I had an experience with the wily brook trout that revealed, to me at least, a new trait in their character. Leaving camp one fine morning I determined to have some high sport fly-casting. The morning was bright and cloudless, and as the previous five days of our stay had been likewise fine and dry, I found the stream very near low water mark, but felt confident that if I could keep at a sufficient distance from the pools, say 45 or 50 feet, I could fool the sly fellows into taking my flies.

Noon found me seated on a log near a most beautiful pool, sad and hungry, and as I believe, with the conceit thoroughly taken out of me. One lone little trout lay parched and dried in my basket. As I sat and gazed at it and thought of the five hours' hard work it had cost me, it occurred to me that my partner, who had gone up stream, was fishing with bait. In all probability he had been successful; why not? It very often happens that when fly-fishing is a failure bait-fishing is a success. It was probable that at this very moment he sat munching his cold ham and bread, gazing into a basket well filled with fine, large fish. Yes, I can fairly see them, some still gasping and giving an occasional flap of the tail.

After some consideration I untie my flies and tie on a sprout; having threaded on a fair-sized worm I leave my lunch on the log and steal cautiously forward. Until now I have not approached near the pool, and as I do so I behold a sight that makes my heart stand still. There before my very eyes are twenty or thirty of the largest trout I had ever seen in a wild stream. I stood for a moment, my rod trembling and shaking as if I were afflicted wtth palsy, considering what I had better do. The stream was well shaded at this point with dog brush. I finally decided to push forward a few paces further and then attempt a "reach" from behind an old beech standing close to the water's edge and leaning slightly forward over the pool. What a delightful pool that was. Some time in the remote past a gigantic pine had succumbed to the rage of the storm and had fallen prostrate over the stream, forming a fall about three feet high. On account of low water, there was but little flow over the log, the stream principally finding its way through the dam. The pool, or rather pond, below us clear as crystal, the pebbles and twigs on its bottom being as plainly discernible as if on land. But as may be guessed, these were not what rivetted my gaze. With great care I crept forward and stationed myself behind the beech. After a mement's pause I ventured a cautious peep.

There they lay peacefully fanning themselves with their fins. Now was my time! Very carefully I lowered my rod until the hook was within an inch or two of the surface of the water, holding it there a moment to note the effect. But as there came no sign of their having seen the tempting bait, I allowed it to sink gently into the water. Down, down, it went, until directly over and within an inch or two of one of the largest trout in sight. Now came another painful pause. I had done my part, made all the advances I could, all there was left for me to do was to stand and patiently await developments. At last, after what seemed an age, the trout, over which my hook was hanging, began to slowly move backward, stopping when about 2ft. from the bait. My heart sank, only to rebound, when, an instant later, I beheld him advance, open his ponderous mouth and leisurely suck in the worm. In an instant it was out of sight and I struck. After a few minutes' struggle I landed him and had the extreme satisfaction of feeling him flop in my basket. I repeated this performance three times, each time taking a large trout. After waiting from fifteen to twenty minutes each time they would come out; the fourth time they came out as before, but would take no notice of the bait.

I spent the balance of the day further down stream and in much the same way as described above, and took about thirty more, mostly large ones. It was with a proud heart that I found my way out to the road that evening and plodded slowly campward.

Contrary to my expectations, I found on reaching camp that my partner had met with very poor success. After supper, as we sat smoking and discussing our day's experience, an old settler stepped from the fast growing gloom into the circle of light made by our camp-fire.

"How d' you do, boys?" said he; "what luck to-day?"

"As for me," replied my partner, "luck has been against me to-day. Only got a few small ones, but my partner here seems to have had some good sport."

On seeing my catch the old gentleman said, "Wall, yes, you must 'ave 'ad some fun a-takin' some of them fellers, but I wouldn't give much fer them leetle ones. I alars throw 'em back, considerin' as how it's more fun to ketch 'em w'en they's grow'd up."

Upon saying this our rustic visitor opened his basket and displayed forty or fifty trout, ranging, I should judge, from 9 to 12in. in length. We gazed in astonishment. "There's one thing," the old man went on, "thet some folks don't know concernin' trout fishin' in low water. Now, I've saw fellers afore now git right into a stream when the water wus low an' clear, as it is to-day, an' run out six er eight feet o' line an' fish like as though they wus a-hoein' corn; but I never know'd 'em to have any luck worth mentionen. I'll tell you, boys, the only way to fish w'en the water's low an' clear is to git right down on your honkers an' crawl up to a pool; you kin alars figure that if the trout don't see you there's generally some bait as'll fetch 'em."

C. G. D.

BELLE'S PICKEREL.

THE wind blew very hard from the north all the day before and was blowing nearly as hard from the south. Shortly after dinner Charley Sumner, who was tenting across the driveway from Rushmore, said to me, "I think this wind will drive the fish in out of the deep water, and my friend and I are going to try them." In a short time they were off and trolling faithfully between Gardner's Island and the south shore. I tinkered around camp as usual, not failing to notice how persistently they kept at work, and finally told Belle we would go out and try to beat the camp record, 5½lbs. We rowed up and down by the big patch of weeds, first getting a little fellow of a quarter-pound, which was allowed to shake off, then one a trifle larger and one of 2½lbs. After this we rowed for some time without a strike, and had just turned to go up on the south side of the island when Belle said, "Hold on, papa, I'm hooked!" Telling her to take in the slack, I commenced to back up, to loosen the spoon, when the imaginary snag commenced to stir around and pulled her arm clear out over the end of the boat. "Hold him tight till I get the boat off the shore!" I shouted; then, getting out in deeper water, took the line from her hands.

The boys had lost two spoons and pieces of line trying to pull in some of these big fellows by main force, so I took my time with this fish. "Ain't he a whooper, papa! he'll beat the record; don't let him get away! There he goes! My! can't he swim fast!" As the fish darted off about 20ft., the line sissing through the water as if it were red hot.

So busy was I with the fish, I had not noticed that we were fast drifting on the rocks that make up from the end of the reef east of the island, but my ear caught the swash of the seas. "This won't do, for to go on there means a capsize. Grab the paddle, quick, Belle, and work her off!"

"All right, papa, I'll try;" and with red cheeks and eyes ablaze with excitement she took the stick in her little hands and slowly, foot by foot, worked us off into an even fighting ground. Two more rushes, a little sulking, then another little rush or two and old green Jack came up to the top on his side; drawing him alongside the boat I inserted my thumb and finger in his eyes and slid him into the boat.

"Quick, Belle, the paddy stick," and giving him a few sharp raps between the eyes he lay in the bottom of the boat dead. Then I hollered, then Belle hollered, then we both hollered, and for a few minutes we thought we owned Lake Champlain and the Green Mountains besides, while it seemed as if the man of 35 and little girl of 9 were both boys together. Once more we took up our old course and had almost despaired of another strike when she had a desperate tug on her line in about the same spot, and the way that fish acted left no doubt as to his being no snag.

"Hold him steady, little girl, and I will work the boat through the passage between the island and the rocks."

When this was accomplished she had the fish nearly up to the boat and we saw him to be fully as large as the first. Taking the line from her tired hand I was having fine sport playing him, and what a fighter he was! Now jumping out, shaking like a bass, then darting away with 20 or 30ft. of line, it seemed as if he would never tire. Did one ever see pickerel fight so? But finally he came alongside and I assisted him into the boat. I thought then he would get away before I could quiet him, but after lying full length on him and using a little forcible argument from the paddy stick he succumbed. As the sun was nearly down to the top of the mountains in the west we decided our share of glory for one day was complete, but Belle wanted to row over and show her prizes to the fat man and the preacher, who were fishing perch north of the island, and I, nothing loth, gratified her. It was dark when we reached the shore and I strung them on a piece of rope and hung them over the paddle, that she might carry them up to the camp; but she had bit off more than she could chew and I had to help her. We took them all down, as we appeared to them through the trees, and the fish weighed 6lbs. and 6lbs. 10oz. without any gravel on them.

ALBANY. DEXTER.

LARGE-MOUTH AND SMALL-MOUTH.

I HAVE been very much interested in the article by Mr. Hobbs on his trip "In the Mascalonge Country"—interested because it is a region with which I am familiar. I have been over the same route, stopped at the same "hotel" at Manitowish, have "put up" with Perry Powers, the keeper at the big log house at the dam, have shot that same ugly rapid in the river where Br'er Hobbs got so wet, and part of our outfit got "spilled" at that same place, and have fished and paddled all through the whole chain of lakes the length of the Manitowish and Turtle rivers. Mud Lake, the despised little sheet of water to which he refers, gave us some excellent mascalonge fishing. Passing through into Clear Lake, where we were led to expect some fine fishing, our only reward for a day's hard work was a 2lb. bass.

We ate our lunch on the shore at old Dan Devine's "clearing," with copious draughts of clear spring water—by the way, it was the only white water that we saw on the trip, except the waters of Presque Isle Lake, all the rest being coffee-colored from the tamarack swamps—and finished off with rutabagas out of his little garden patch, for dessert.

We interviewed his brood of half-breeds and his strapping big squaw, and can easily believe the tale of her powers in packing the birch bark over the trail and outstripping the whole party.

Br'er Hobbs's remarks in regard to the fighting qualities of the large and small-mouth black bass are not exactly in accordance with my experience. Every one judges from his own experience, and as mine is so different from Br'er Hobbs's I will relate it. We were fishing in Presque Isle Lake—the finest lake in that part of the country, a beautiful lake, and it affords the very finest bass fishing—but more of that another time.

As we were fishing for count this day, we did not waste any time in playing our fish. They were mostly large-mouths, running from 3lbs. to 4½lbs. in weight. We used an 8oz. split-bamboo rod, silk line, small Skinner spoon, and quadruple casting reel. When we would have a strike we would "put on the screws" and bring the fish to the boat as quickly as possible, slip the net under it, and lifting it from the water would chalk one down on the score, unhook it and return it to the water, unless it had been injured by the hook, in which case we would save it for camp.

After scoring about twenty-five fish, all taken near a couple of small islands lying close together on one side of the lake, we decided to try some other points and slowly rowed along the shore. As we passed around a little point which concealed a deep bay we noticed an old pine snag well inside the point and about 50ft. from the shore.

We told the guide to take us as close to the "snag" as he could without fouling our spoons "and we'll get a strike there." Just as our hooks reached the "snag" I had a glorious strike, and almost immediately after my companion was also fast to a fish. And then the fun began. I attempted to reel in but it wouldn't work. I glanced at the reel and then at the rod to see what was foul, but everything was all clear and then I realized that "it wasn't that kind of a fish." I had to play it for a long time, and not until after a most stubborn fight could I bring it to the net, and then I found that it was a small-mouth, a 3-pounder. Meanwhile my companion was having the same kind of a "circus," and when we finally got them both in the boat we were both decidedly of the opinion that there was no question as to the superiority of the small-mouth black bass as a fighter. We took another turn by the "snag" and hooked two more and had the same kind of tussle over again. We hooked 14 fish there at the "snag" all about the same weight, all small-mouths, and had the same sort of experience with every one.

Inside of a circle of about 40ft. in diameter, with the "snag" for the center, we caught nothing but small-mouths—and every time we trolled our spoons within 15 or 20ft. of that "snag" we would each get a strike—and just outside of that circle we caught nothing but large-mouths. Before we had discovered that it was only in this one place that we could catch the small-mouths we had fully satisfied ourselves as to the respective fighting qualities of the two species, and the moment we would feel of the fish with the reel we would tell each other which kind it was we had on our hook, and not in a single instance did we make a mistake.

Here were fish in the same waters, within a few feet of each other, with the same surroundings, and food under the same conditions, and it would seem if ever there was an opportunity to determine the relative merits of the two species it was right then and there. I do not pretend to say that I could tell what kind of fish I had on my line anywhere else or under other circumstances, but that was our experience there, and if Bre'r Hobbs or "S. W. S." could go with us to that "old snag" in Lower Presque Lake they would change their opinions most decidedly.

Now I do not want to be misunderstood; I did not write this article with the idea of attacking Bre'r Hobbs or anybody else. I am simply giving my experience, and from that I have formed my opinion. I know full well that "circumstances al er cases," and there are many others who are firm in the opposite belief, or that there is no relative difference in the fighting qualities of the two species, and this belief is based upon their own experience, but taking the number of fish that we did, and all the attending circumstances, I think our experience was as fair and thorough a test as could be made.

Now I have given my reasons for the faith that is in me. Cannot some of our old and experienced anglers give their experience? BARON.

THE CASTALIA CLUB OPENING.

THE season of the Castalia Trout Club opened March 15, and the first two days' fishing was done in a cold, raw east wind, that at times drove a part of the fishermen to the shelter of the club house. Here are some of the scores made for the first two days by members of the upper (Toledo and Sandusky) club: John A. Waite 17 fish, weight 7½lbs.; J. W. Oswald 18 fish, weight 12lbs.; Clarence Brown 18 fish, weight 5½lbs.; Joe Spencer (one day) 10 fish, 3½lbs. Mr. Oswald landed safely a fine specimen of 1¾lbs., and Mr. Waite one of 1¾lbs. All the weights are taken by the keeper at the end of each day's fishing, and under the rules no man is allowed to take more than 10lbs. in a day. It is not an uncommon thing for a member to find his limit before the end of his day is reached. The upper club this spring put in 300,000 fry of their own hatching, and this year begin to reap the benefits of their three miles of artificial stream constructed about two years ago. JAY BEEBE.

TOLEDO, Ohio, March 19.

The trout season opened March 15 in the State of Ohio, and notwithstanding that I have always preached against going too early, I could not resist a pressing invitation from the president of the Castalia Sporting Club to attend their opening ceremonies. I arrived at Cleveland on time, where I was joined by my host, and about two hours later we found ourselves at the snug little club house near Castalia station, which is not over five or six miles from Sandusky. Here we found everything in good order and a rousing fire of hickory cordwood blazing in the great fireplace. Notwithstanding the cold weather the stream seemed to be in excellent conditon for fishing; and as we strolled along the bank we got an occasional glimpse of big trout, highly suggestive of the sport in store for us.

The evening train brought other members, and after a good dinner and a smoke before the open fire all hands retired early. I awoke next morning after dreaming of icebergs and Newfoundland, and found some one had left my bedroom door wide open, and the thermometer down to 7. I bolted down stairs, where the big fire soon thawed me out. As soon as we were dressed Mr. Miller, the popular and efficient superintendent, came in and performed the opening ceremonies, we all said "How!" and proceeded to enjoy an excellent breakfast. The morning was clear and freezing cold, and it seemed to me absurd to expect trout to rise to a fly in such weather, but the members assured me that it would be all right.

We rigged ourselves out until we looked like polar bears and started for the stream. At first the trout seemed disinclined to put their noses out in the cold, but toward noon we began to find them less shy, and to my surprise many a fine fish was landed.

We were continually troubled by the lines getting coated with ice and freezing in the rings. If the flies were left a moment in the air they became lumps of ice and fell like pebbles on the water.

This stream, so often described in FOREST AND STREAM, remains at nearly the same temperature the year round, so there is always more or less insect life to be found in the moss and grass all winter. Mr. Miller told me that he had seen flies hatching out under water when the thermometer stood at 40 below zero. But it was cold work, and no mistake, and I was not sorry when we got back to our big hickory fire.

The next day it was a trifle warmer but the wind soon changed from the south and blew freezing cold from the north. Still we did very well and caught some fine fish, mostly on the Abbey and Professor. I had great sport with a brace which I hooked under a log, and it took my friend and myself and two landing nets to capture them; they weighed a pound each and were beauties. Our largest fish, and we had a number of them, weighed one and a half pounds each, and none were basketed under eight inches in length. The robins sang, the blackbirds twittered and the golden-winged woodpecker could occasionally be heard but they all had a cold look and must have wished themselves back in the "Sunny South."

The next morning we sadly took our departure and I arrived home just in time to find good sleighing, very much pleased with my early fishing trip. W. H.

WHERE SALT-WATER FISH HIDE.

SUCH eminent success has attended deep-water seining off the coast of North Carolina during the past six weeks, since Feb. 1, as to astonish the natives. By sinking the nets from eight to ten fathoms, so as to approach the bottom, immense quantities of weakfish, (vernacular, trout), spots, croakers and channel bass have been caught, aggregating millions in numbers and hundreds of tons in weight. In one week, between Feb. 1 and 8, ten men caught a half million trout and croakers off Morehead City. On Feb. 16, the weight of fish caught off Morehead and Beaufort was estimated at forty tons, equal to 400 barrels of pork. These were chiefly spots and trout. Another day's catch in the same locality realized 57,000 croakers and trout. Four or five hauls were made each twenty-four hours, and the work is prosecuted day and night.

This deep-water method is entirely new; and as I have said, the results astonish the natives. Yet few persons besides natives seem to have been apprised of the proceedings, or if cognizant thereof, appreciate the importance of the discovery. That a complete revolution in sea fishing must presently ensue, will impress itself upon any intelligent mind which will give it serious thought. Something besides immediate emoluments and present gain is conspicuously in sight. Valuable economic and scientific results must develop speedily. Discoveries have already been made regarding the habits of several natives of our shore fishes which are of more practical worth than all the speculative surmises which have been emitted in the course of half a century. Periodical appearances and absences are herewith intelligently accounted for, and their whereabouts in the interim ascertained by direct observation; the metes and bounds of their natural habitats are determined and the limits of their uttermost vagaries and deviations discovered.

Movements of marine fauna are no more erratic and desultory than those of land animals and birds. Of the three genera animals are most restricted. Fishes and birds can alike sail over the tops of mountains or descend into the depths of their valleys, and they can adapt themselves momentarily to the density or rarity of their respective surroundings without detriment to their respiratory organs. It is manifestly a fallacy that shoal-water forms cannot endure the atmospheric pressure of profound depths if they are permitted to gradually adapt themselves to the change. It is the sudden transition that kills.

But habitats of fishes are fixed by the physical conditions of their permanent environment, so that it is as unreasonable to look for certain species outside of their climatic belts and geographical areas as it would be to look for prairie fauna among the mountains, or denizens of arid tracts among swamps. Littoral species are not likely to wander aimlessly about the wide ocean or migrate to the uttermost parts of the sea. When the estuaries are warm and teeming with aquatic life, the shad, salmon, herring, striped bass, menhaden, weakfish and other kinds of anadromous fishes come inshore in multitudes, attracted by the food, and the bluefish, Spanish mackeral, bonito, porpoise and other kinds of predatory and pelagic fishes follow them. In like manner their analogues on land act and behave in the vernal and summer seasons. In winter, or when the weather is cold and the multifarious life of the waters is chilled and torpid, the fishes settle down into the adjacent depths and lie dormant. Just as the buffalo, elk and deer go into the foothills and parks of the mountains for shelter and pasture in winter, so the weakfish, shad, salmon and menhaden seek the indented corrugations of the sea bottom adjacent to the coast. And in these seclusions, two and three miles from land, the fishermen of North Carolina have recently found them out.

Cape Hatteres affords an effectual barrier against the fierce hyemal winds from the north, and in the deep hollows under its lee the bluefish and menhaden assemble in great numbers in winter, and there the porpoises descend upon them like wolves on the fold, and the fishermen in turn capture them in seines, often taking 200 at a haul, and realizing handsome profits from their oil and hides.

Having thus ferreted out and discovered the quotidian haunts of many of our most valued economic fishes, it is manifest that a signal revolution in sea fishing is at hand. Hereafter, instead of waiting for their periodical appearance, as has been the custom till now, or trusting to the precarious chances of hook and line, our fishermen will simply visit the places of their temporary seclusion and dropping their inclosing seines into their clustering midst draw them out until their desire is surfeited or their nets are broken. Nor will this innovation in fishing be confined to species or localities. It will include the red-snapper of the Gulf of Mexico and the cod and halibut of the banks of Newfoundland; the drum of the Carolinas and the shad and salmon of the eastern coast line, for both of these anadromous species will perchance be found lying perdu in the hollows abreast of their respective rivers, waiting for the warning of the waters or the impulse of the procreative instinct. No more will the seafarer follow a precarious livelihood nor suffer the inevitable hardships which attend a protracted voyage. There will be

small risks of life and property. Vessels will fill up in a day instead of occupying weeks or months. Food will be cheapened. Domestic conditions will be ameliorated. Relief will give place to anxiety in the seaside homes, and general contentment and prosperity will prevail.

Some such picture the optimist could outline for the future occupation of the toiler of the sea, if present promises continue. A happy combination of sound, river, estuary, ocean and inflowing creek, and a meeting of tidal and fluvial currents has made the waters of eastern North Carolina the prolific nursery and pasture ground of no less than eighty varieties of edible fish. Most of these were exhibited simultaneously at the Newbern Fish and Oyster Fair held the last week of February just passed. If man be not improvident or prodigal the natural supply will not fail, but it will replenish itself as fast as drawn upon.

There is small probability of depleting the ocean, though local colonies may be temporarily decimated. It will remain to be proved what will be the ultimate result of this recent development in the fishing industry.

CHARLES HALLOCK.

NEWBERN, N. C., March 12.

MANITOWISH WAY.

WE are reminded that the time is approaching when it would be pleasant to repeat our trip to the muscallonge region, a trip which formed the basis of very many pleasant recollections. Mr. W. S. Allen and myself made an extended tour of the lakes of northern Wisconsin, our headquarters being near Trout Lake, while we did our fishing in neighboring lakes tributary to this beautiful body of water. Our catch in all of the lakes proved better than during the previous year, the conditions of water and weather being more favorable. At the close of the most successful day's sport we counted nine muscallonge, and while the largest weighed but 15lbs. we were quite well satisfied with the results. The bass fishing was excellent and our score book made a very satisfactory showing.

The waters in northern Wisconsin abound in fish of a superior quality. The lake trout, found only in certain waters, are very plentiful in the spring and fall and afford abundant amusement for those desiring fishing of this nature. We camped on a beautiful rise of ground overlooking the Manitowish River. Our guides were capable and were informed as to the waters. The weather was perfect, the air clear and cool, and we left this delightful region with many regrets, mingled with the hope that the future might afford us an opportunity of repeating an experience replete with numberless enjoyable features.

W. E. WILLS.

CHICAGO, Ill., March.

ONONDAGA ANGLERS.

A MEETING of the Anglers' Association of Onondaga County, held in the rooms of the Business Men's Association last evening, was well attended, and a lively interest was shown in the work of the Association for the coming season. The election of officers for the next year resulted as follows: President, Richard W. Jones; Vice-President, John N. Babcock; Secretary, Walter S. McGregor; Treasurer, Charles Morey; Executive Committee, Geo. B. Wood, Wm. Everson, H. Edward Robbins, Amos Padgham and M. J. French. The Association has on its rolls 250 names, and these were added last evening: Dr. Chas. Barnes, Leonard Baldwin, J. D. Minturn, L. E. Ford, W. S. Morey, Frank B. Macumber, Myer Liberman, Chas. Laberdie, Geo. H. H. Adams, C. S. Fowler, Chas. H. Miller, D. M. Lefever and J. R. Harlow.

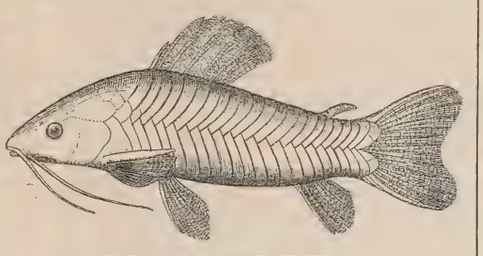
John N. Babcock and Horace Kendall were elected a committee to draft resolutions and present them to the Fish Commissioners asking them to use their influence in procuring fishways in the Seneca and Oswego rivers. John N. Babcock addressed the Association. He said:

If the public fully understood the objects of the association the membership would soon be doubled. Theirs is not a selfish interest, but the whole object of the association is to secure good fishing to the hundreds of people who can not afford to make long excursions in search of a day's fishing, whether for food or for sport. More fish, perch, pickerel, pike and bass have been taken from Onondaga Lake and its tributary streams by hook and line during the past year than ever before, and it is because nets have been to a great degree excluded and the spawning fish protected. The association has been untiring in its efforts to give the workingman, who now and then tries his luck, a chance to get a good mess of fish. Most of the members of the association are fishermen who fish in many different waters and would care nothing about our lake here were it not for the fact that they wish to see everybody have a chance to get a mess of fish in a sportsmanlike way and not allow a few unprincipled people to take out all the best fish in nets.

The association doesn't confine its work to Onondaga Lake alone, but all the near-by waters are protected, and many people from the surrounding towns and villages who make no effort to help on the good work reap the same benefits as the members of the association. The cost of membership is very small, and everybody who takes an interest in the sport is invited to join the association and help protect the fish in neighboring waters.

Efforts are being make to have fishways put into the dams in the Oswego and Seneca rivers, which would give the large fish from the great lake a chance to come up into our small streams and lake and make good fishing for every one. These arrangements would be a great benefit to the poor man who fishes in home waters, and who could then have good fresh fish on his table at slight expense. The first and second wards of this city have a great many fishermen who take large quantities of fish by hook and line, and but very few of them are members of any association. They are especially requested to join the association and help to protect themselves.

Mr. Babcock seemed to express the sentiment of the members present, all of whom expressed a determination to bring in all the fishermen in the county. Walter S. McGregor said that last year $3,000 had been appropriated by the State to build fishways, but the Canal Superintendent had neglected to have them built so the money was refunded to the State. Wallace Tappan championed the bill in the Legislature. There are several fishways now in the Oswego River, he said, but they are worn out and are of no use. There is a bill now before the Legislature appropriating $3,000 for the same purpose.



The secretary was directed to have circulars printed and addressed to all its members giving a detailed account of all the nets and spears captured, cases prosecuted for illegal fishing and the like.

The association's fish protector, Harry Jackson, reported that during the past season he has captured and destroyed thirty-one nets, fifteen spears, and has prosecuted forty-one actions, many of which have been successful, and had also taken fourteen nets in conjunction with Constable Hawn. The secretary reported that most all the amendments suggested by the association in the bill revising the fish laws had been accepted by the Fish Commissioners. Votes of thanks were tendered President R. W. Jones and Vice-Presidents John N. Babcock, Walter S. McGregor, Henry Loftie, Edward Robbins, Charles Phelps and the executive committee for the good work they had done during the past season, and to the Business Men's Association for the use of its rooms.

It is expected that the next meeting of the association will be a large one, and many new names will be added to the rolls.—*Syracuse Herald.*

A CATFISH IN ARMOR.

THE cascadura of Trinidad or round-headed bassar of Demerara, one of the mailed catfishes, is a most remarkable animal. The term round-headed is applied to this species in distinguishing it from an allied fish known as the flat-head. The cascadura in general shape resembles our common catfish, but along the sides of the body are plates, arranged obliquely, 25 to 27 on each side. From this peculair structure the term mailed-catfish is derived, and the body resemblance to the mailed knights of long ago is very striking. Its nest-building habits and the protection it affords both its nest and young are also highly interesting. These habits are fully recorded in the accounts of Dr. Hancock and M. Vipan. In the London *Zoological Journal*, No. XIV., July to October, 1828, Dr. John Hancock states that "the flesh of this bassar is yellow, firm, and very savory, especially esteemed by the Creoles in their soups, which they prepare with the addition of several vegetable articles, such as the okra, calabo, and fou-fou, arum, and plantains, boiled and pounded into a sort of plain pudding. The whole is seasoned with pepper, salt and lime juice, and forms in reality one of the best dishes of the country, although many Europeans, out of a most ignoble pride and affectation, pretend to dislike it for no other reason, however, than its being a common dish amongst the slaves and lower orders. There are Creoles also who affect the same dislike to the fou-fou and okra soup, and yet swallow it enormously in private." Dr. Gill tells me that there is a tradition in Trinidad to

THE CASCADURA OF TRINIDAD.

the effect that any one having once tasted of the flesh of this fish will never leave the island. This, it is supposed, means that the meat is so good that no one would be willing to move out of a neighborhood in which the fish can be obtained, for we have Dr. Hancock's statement that the flesh is eatable and, therefore, not rank poison.

Dr. Hancock states that the nest is formed of grass and leaves, the eggs laid in a flattened cluster, carefully covered over and protected by both male and female. The negroes are well acquainted with this habit, and by placing their hands near the nest attract the attention of the fish, which courageously attack the intruder and are easily captured. During the dry season when the pools dry up the round-head is said to bury itself in the mud, while the flat-head is said to march overland in quest of water, whole droves having been seen on the land.

In the Proceedings of the Zoological Society of London, for the year 1886, Part III., pp. 330-331, the following account of the breeding of the cascadura in an aquarium is given by J. A. M. Vipan: "Two cascaduras (*Callichthys littoralis*), from Trinidad, that I have in my aquarium, commenced making a nest on June 6th; but that, and the one they made on June 9th, they soon pulled to pieces. On the night of the 11th they began a new one; it consisted of pieces of *Valisneria*, all the leaves of the *Nymphæa* that were growing in the tank, which they bit off close to the roots of the plants, and a great quantity of river moss (*Fontinalis antipyretica*), each piece being two or three times the size of the fish, so that they must have had hard work to bring them to the surface. They worked these materials together by some mucous substance until the outside was hard, the whole being under a quarter of an inch thick; they next buoyed up the structure with a quantity of mucous foam until it was raised three-and-a-half inches above the water. The whole nest was nine inches long and seven inches wide, and somewhat resembled a finger glass turned upside down on the top of the water, with the interior filled with froth. The fish kept swimming close under it all the time on their backs and filling it with foam. When finished, on the 12th, the female shed her spawn between her ventral fins, which were clapsed tight together, and when full, swam to the nest, and, turning on her back deposited the spawn in it; this occurred several times, the male each time putting the spawn in its proper place and covering it with froth. As soon as the female had dropped all her spawn the male took entire possession of the nest and would not let his mate go anywhere near it, and treated her so badly that I had to place her in another tank to save her life. Unfortunately the spawn was not good, only a few eggs hatching and the young fishes dying soon afterwards.

"I have bred great quantities of the little *Callichthys punctatus* from the Amazons, but they never made the slightest attempt at making a nest, always depositing their spawn all over the tank, and even on the floating thermometer kept in it."

The fresh waters of Trinidad are for the most part confined to creek and brooks, there being but few ponds and lakes. These streams are similar to our own, not wide and from six to eight feet deep in their deepest parts. Dr. Gill, who reported upon the fishes of this island in 1858, says that the cascaduras like the quiet places near the borders of vegetation, and are often found in company with the *Rhamdia* (another genus of this group of catfishes). The maximum size of the cascadura is 9 or 10 inches; those usually taken are from 6 to 8. The fish are usually taken with a cast-net, which when skillfully thrown or cast spreads out so as to cover considerable water. Dr. Gill is under the impression that small hooks are also used in the capture of this fish, with earthworms as bait. The sketch presented is from a fish seven inches long, recently received from Trinidad.

It will be observed that Dr. Hancock says the male and female both protect the young, while M. Vipan states that the male drives the female away as soon as the eggs are deposited in the nest and will not allow her to approach them. In our common channel catfish of the Potomac river it was ascertained by Drs. Ryder and Gill that the male alone takes care of the young. (See Bull. Fish Commission, 1883, p. 226.)

BARTON A. BEAN.

WASHINGTON, D. C.

WASHINGTON ROD AND GUN CLUB.

THE Washington Rod and Gun Club held its first annual meeting on Thursday evening, March 17, in its club rooms, 1237 Pennsylvania avenue, N.W. The following officers were elected for the ensuing year: President, S. W. Stinemetz; Vice President, Joseph H. Hunter; Secretary and Treasurer, John B. Peyton; Captain, Thomas F. Doyle; Lieut., John Wanstall. The foregoing, with Charles L. Burgess, constitute the executive committee. Hon. W. D. Bynum, M. C., was appointed chairman of the committee on the preservation of game. Quite a number of new members were elected, among them six Congressmen. The traps are located by the Potomac at the foot of Twenty-first street and are put out every fair day. Tuesdays and Fridays are regular days. As many as 3,800 clay birds have been used for one day's shoot.

This club was organized about one year ago for the encouragement of legitimate sport with the rod and gun, and has representative and enthusiastic members in both branches. Commissioner McDonald has at the request of the club promised liberal plants of game fishes in the waters of the Potomac above Washington, and the committee for the preservation of game, under the efficient leadership of Mr. Bynum, can be relied upon to take proper measures for prohibiting the illegal killing and traffic in game so prevalent here.

The club has very convenient and comfortable rooms, lacks anything that might be called luxurious, as every sportsmen's club should, and they are well able to look after the comforts of any bona fide sportsman, though stranger, coming to Washington. The reading tables are well supplied with various journals, and your correspondent was apprised of the fact that FOREST AND STREAM is always there and appreciated by the members. Among the numerous pictures and stuffed specimens a badly mutilated quail is to be seen. The label attached reads: "The only bird ever shot by Martin Flaherty was chewed by his dog." It is a forlorn looking object. Andrew Hancock is the champion crow hunter and a fine bird attests his skill.

BOSTON ANGLERS.

THE law making an annual close time on smelts comes on in Massachusetts March 15. This year just previous to that date the boys made some good hauls. One of the best catches mentioned was that of Mr. Claude H. Tarbox, already mentioned in the FOREST AND STREAM as one of Boston's greatest lovers of angling. Mr. Tarbox loves to fish so well that even going alone is not a hindrance to him. He is a grain salesman for A. P. Aldrich & Son, and frequently, when on the road, opportunity is offered for his favorite pastime. But usually it is not easy to find company, and hence Claude has learned "to go it alone." On the smelting trip in question he was alone. The result was 344 smelt, some of which tipped the scales at just half a pound. The mess completely filled a bushel basket. The trip was to Rowley's River in the night time, on Saturday previous to the 15th. Armed with a lantern and rubber boots the fisherman took his way up the middle of the stream, running with the cold snow water. His fishing tackle was his hands. A smelt or a body of smelt was seen, when a pass with the hand is made and the fish or fishes are thrown to the shore, to be gathered into the basket later. Claude describes this as "rare sport," and his friends are equally enthusiastic over the elegant fried smelts that graced their tables the next day.

SPECIAL.

Another sportsmen's club has been born in the Hub. Its name is the Magaguadavic Fish and Game Club. About thirty devotees of the rod and gun make up its present membership. The preserve lies in New Brunswick, and the club expects to control eventually about 75,000 acres. The capital stock will be fixed at $20,000, consisting of 400 shares of $50 each. The club house is situated on the shores of Lake Utopia, N. B. The fishing will consist principally of landlocked salmon and trout, with game enough to furnish good sport. The officers elected at the organization of the club are Dr. Heber Bishop, president; C. C. Powers, vice-president; Henry Lovejoy, secretary and treasurer; Messrs. A. M. Robinson and L. D. Chapman, house committee; Messrs. G. W. M. Guild, W. L. Davis, John E. Avery, E. B. Whittier, and H. A. Hoak, executive committee.

W. R. S.

NEW HAMPSHIRE CAMPS.

LANCASTER, N. H., March 18.—*Editor Forest and Stream:* Colebrook, N. H., the point from which all the hunting and fishing resorts in northern New Hampshire are reached, seems to be getting an abundance of good things. First is the lease of the Connecticut Lake hotel and camps by O. C. Bumford, a Colebrook man: and last Saturday Hell Gate Camp on Diamond River (Amasa Ward's old camp) was sold to a party of Colebrook gentlemen, who propose to fit it up in good shape and place it under first-class management for the accommodation of sportsmen as heretofore. "Brad" Bailey is to have charge, and that means that all will be done to make the stay of visiting sportsmen a pleasant one. "Brad" is thoroughly familiar with that region, having spent the last three seasons there.

I understand that it is proposed to change the names of the camps from Hell Gate Camps to Deer Lick Camp. Why the change should be made I fail to see. The camps are at the foot of Hell Gate Falls; have always been known as Hell Gate Camps ever since Amasa built his first "stake down" there, the name Hell GateCamp being given it by him. I think it the most appropriate name that could be applied and I am sure this feeling will be shared by all who have visited the place. I hope the sportsmen who have been in the habit of visiting these

camps each season will enter an emphatic protest against the change.

Information in regard to these camps may be obtained of E. G. S. Ricker, Portland, Maine, and all arrangements for guides, transportation, board, etc., may be made by addressing Charles Colby, Colebrook, N. H. I shall doubtless find other items of information of interest to the readers of FOREST AND STREAM from this point later on.

Still another enterprise in which Colebrook is greatly interested is the building of a fine summer hotel on Lombard Hill overlooking the village. Colebrook is destined to become a famous summer resort, and it is perfectly proper that it should; for nowhere in the State can there be found more beautiful scenery or finer drives, at the same time possessing attractions for the sportsman unapproached by any other summer resort in New Hampshire, because of the close proximity of the best hunting and fishing in New England. ROB.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

WAUWANSEE CLUB, of Turkey Lake, northern Indiana, is building a $35,000 club house. This is a fishing and summer club more especially, and its location is described as delightful. This is rather around the bend of Lake Michigan's foot, and not many of our anglers get over that way, though it is very probable that by not doing so they miss some of the best bass fishing in Indiana, which is a most blissfully bassful State, take it all in all, of this northwestern portion of the State. Commissioner Dennis in his admirable report for the past year says the following:

"The system of lakes in northwestern Indiana is a very striking characteristic in the topography of Indiana. It is entirely safe to say that there are in the counties of Steuben, Dekalb, Lagrange, Noble and Kosciusko more than one thousand lakes, having an area of ten acres or over. There are by actual enumeration three hundred and twelve lakes in Noble county, with an area of five acres or more, in every one of which nearly all the varieties of our best fish are found and in almost all black bass abound.

"These lakes occupy the highest grounds in the State, geographically, and seem to have been huddled together there in the corner of the State as if to keep them out of harm's way. It is worthy of remark that not a single lake is found south of the Wabash or in that part of the State occupied by our river system."

Of the streams of his State Mr. Dennis says a few words which may serve as pointers:

"While the rivers of Indiana are not to any great extent navigable, yet their length and the volume of their sparkling waters constitute them as among the finest in the world for fish production.

"The Wabash, White River, Kankakee, St. Joseph, Elkhart and Tippecanoe in the north, with Whitewater, Blue River, Flat Rock, Clifty and Driftwood in the south, and the east fork of White River and its tributaries in the southwest, make up a net-work of fine running streams, which drain a stretch of country not excelled in all the attributes of fertility of soil, wealth of improvements or intelligence of population.

"All these rivers and streams and all their tributaries and sources are inhabited by the bass family and are adapted to their unlimited production."

Then Mr. Dennis gives some figures:

"Indiana has 33,800 square miles or 21,632,000 acres. One and one-half per cent. of this amount would reach 319,000 acres, and it is certainly a conservative proposition to assume that one and one-half per cent. of the area of the State is covered with water.

"The logic of these figures is simply this. The waters of Indiana have a capacity for producing annually 600,000,000 of pounds of fish food, and are exclusively under the guardianship and control of the General Assembly.

If one-half of the natural production of our waters should be utilized every year, and rating the value at five cents per pound, it would equal $15,000,000. This princely annuity can be secured to the people of our State by an expenditure of $5,000 annually under a wise and careful administration of salutary laws."

That should be something worth working for. This is the simple method simply and plainly recommended for that work by the commissioner:

"Protection should consist in restricting the taking of fish to hook and line alone. The streams should be kept pure by making it unlawful to allow the flow or escape into any lake, river or running streams of any and all substances injurious to animal life."

We should not leave Mr. Dennis's report without a word to show the difficulty of the Indiana work when he took hold of it. Speaking of the general lawlessness which prevailed and the manner in which it was regarded, he remarks:

"This unfortunate state of affairs continued during the period from 1881 up to 1889, eight years, and came near depopulating the running streams of the State, while in the lakes where these murderous accessories could not be brought into use the deadly spear or gig was made to do its fated work. The consequence was that this long course of destruction left all our waters in a depleted condition, and, which was far worse, it left the country full of nets, traps, etc., in the hands of parties who became imbued with the idea that the laws were powerless, and who, by long practice, had become experts in capturing fish and emboldened to persist therein. Added to this was the unfortunate fact that the first Fish Commissioner, in his first annual report of 1883, says, page 6: 'At present I incline to the belief that the Commissioner should not be connected with any system of protection.' This official announcement gave additional encouragement to the law-breakers and brought forth an increased crop of depredations."

Naturally such an announcement would. But it is a comfort to say that Indiana doesn't have that sort of a Commissioner now. They give him $1,000 to cover salary and expenses. Magnificent liberality! Magnificent judgment!

April 1 draws near, opening day on trout in many waters. The season on trout in Wisconsin opens April 15, closes Sept. 1. The trout season in Michigan opens May 1, closes Sept. 1, for both peninsulas. Minnesota trout season opens April 1, closes Oct. 1.

The hook and line bass season in Wisconsin opens April 15 and closes Sept. 1. For Michigan the law reads: "No person shall catch or take any muskallonge, or any black, strawberry, green or white bass, by any means whatever, except by hook and line, from any lake, river or stream, from the first day of March in each year to the first of July following thereafter." This, I presume, means that bass have no protection against hook and line in Michigan. Illinois, Indiana and Minnesota have no close season for hook and line on bass. Iowa hook and line season on bass opens May 15, closes Nov. 1.

Mr. W. C. Thomas, of Sheboygan Falls, Wis., spent some time in this city this week. Mr. Thomas is a trout fisher, and promises to direct me to good fishing for that wily animal away south of the places in Wisconsin where most of the trout angling is done.

Mr. A. M. Fuller, president of English Lake Club, is a persistent and successful angler with bait or fly. He made six trips to Gogebic last year, held high record for the season, 92 pounds of bass in one day, no fish less than 2 pounds.

To-day I saw a pretty instance of the zeal and ingenuity of the genuine angler and lover of fine tackle. In company of Mr. A. Hirth, of Spaldings' Chicago house, I went out to see the outfit of Mr. S. D. Thompson, which I have previously mentioned as being perhaps the finest in the city. Mr. Thompson has a trunk which is a very magician's box. He took all his articles down to the trunk maker, and the trunk was built around the articles, each piece having its own snug and perfect case. Six fine Kosmic rods in cases, a 20-gauge Scott Premier and a Marlin. 22 lay in view in the upper tray, and below that and above it, came tier on tier carrying everything an angler or camper could need, from a flannel shirt to a fine file, from a Ferguson lamp to a frog bucket, and so on, ranging through the entire gamut of angling paraphernalia, so far as that is known. If there is a single implement known to angling which Mr. Thompson has not in his trunk, and in a separate nest at that, I should be glad to hear of it by way of curiosity. This wonderful trunk is about 4ft. long, made of raw hide, and when packed weighs about 300 pounds.

"I leave this at my central camp," said Mr. Thompson, "and it's so heavy nobody can steal it." Then he showed us one of Comstock's Protean tents and a compact cooking outfit of his own get-up. "When I want to go anywhere on a side trip," said he, "I just take this light stuff along and I'm all right. My boat is decked over just far enough to take in the tent, blankets and plunder, and I can sail her to any corner of the lake I want to visit, and stay as long as I like." Mr. Thompson's boat was made by the Detroit Boat Works, on their canvas-lined system, and is a beauty, 15ft. long, made to sail or row. Mr. Thompson's favorite stamping ground is Lake Gogebic, and he takes into that lately wild country appliances which should certainly astonish the natives. His outfit is all of the best, and I never realized so fully before how good the best is in these days of modern equipment. "I just like to fool around with these things," said he, "odd times, whether I'm out fishing or not. I take 'em all out and then I put 'em all back again." E. HOUGH.

FROSTFISH OR CHIVEY.

THOSE who have read Mr. Cheney's article on the frostfish, in our issue of Jan. 14, will recall the fact that the same fish is known in Maine as the chivey. Prof. Leslie A. Lee, who put us in the way of getting this information, also induced Mr. Dennis M. Cole to send us more recent items on the chivey as it now appears. Mr. Cole, writing from Farmington, says the fish is being taken in a pond there, with the hook only, through the ice. It is not seen at any other time of the year as far as he can learn. The spawning has not been observed. It is known that the fish occurs in deep parts of the lake during the summer months, since it is found in the stomachs of lake trout or togue and black bass.

While we are upon this subject it may be as well to say that we now know three very distinct kinds of small whitefish which are called frostfish. Two of these are native in Adirondack lakes, the frostfish of Mr. Cheney's interesting article and the Labrador whitefish, which is sometimes styled whiting and Musquaw River whitefish—an inhabitant of cold, clear lakes of the Adirondacks and White Mountains, the great lake region; and extending northeastward to Labrador. The third frostfish is Hoy's whitefish of western New York lakes, and deep waters of lakes Michigan, Ontario, and neighboring lakes. We mention this fact to show the need of caution, in observing the habits of any one of the frostfish, lest a mistake occur in identifying the fish. Hoy's whitefish is figured on Plate 197B of the Fishery Industries, U. S., Sec. I., from a specimen about 9in. long, collected at Seneca Lake, N. Y.

SALMON IN OREGON.—Ashland, Ore., March 10.—The annual migration of the salmon trout has begun, and although the season is closed until April 1, small boys and men are gigging them whenever they can see one. The salmon run has also begun, and reports tell of the fish quite a distance up the Columbia. Officials have been very lax of late years, and the law has been badly warped; but it is proposed this year to punish every violator who can be spotted. Mountain trout are found in almost every stream, and if I'm here the first of April I propose to call on them. Plenty of Dolly Varden and rainbow trout over east of the Cascades, but only the black-spotted here.—O. O. S.

SHAD FLY-FISHING.—West Point, Va.—I have seen the shad take fly in James River, Va. I had that pleasure on one occasion when I was in the boat with Capt. Eastman, commodore of the ironclad Ajax, at that time stationed at Lower Brandon. From what I remember he used a fly of medium size and rather a bright color and a 18oz. split-bamboo rod. We were out about one hour and caught five, I think, large roe shad. He said the roe-shad took the fly much better than the bucks. I hope this may be of some value to our friend.—J. V. SHARP.

WASHINGTON, D. C., March 13.—Alewives and suckers are taken daily in the Eastern Branch of the Potomac River and white and yellow perch are beginning to take the hook. The U. S. Fish Commission will no longer hatch shad at Fort Washington, but has leased a shore at Bryan's Point and will prepare at once for the season's work. Four million whitefish eggs are now at the Central Station of the Commission and will be shipped to Sackett's Harbor, N. Y., hatched out in a week or two and planted in Lake Ontario. —B.

SEA SALMON BREEDING WITHOUT GOING TO SEA.

AT the Craig's Brook Station of the U. S. Fish Commission the rearing of Atlantic salmon in artificial ponds has been carried on continuously since the spring of 1888, and while the bulk of each year's brood has been liberated before reaching the age of one year, a few have been retained until the present time. The salmon hatched in 1888 are now nearly four years old. They are kept in a small pond with only about two feet of water, and have been feed on artificial food of various kinds. Their growth has undoubtedly been slower than would have been the case had they been allowed to go to sea at the usual age. Probably none of them exceed 2½lbs. in weight; yet they have already developed spawn and milt, and several of them yielded well. Developed eggs in November, 1891, being then three years and seven months old.

The eggs were nearly of the usual size for Atlantic salmon (not so large as in the landlocked variety), but very pale in color—more so than any other salmon eggs that I ever saw. This paleness gives the impression of weakness; but they are now nearly ready to hatch, and the embryos appear to be about as well developed as those obtained from salmon that came from the sea last summer.

It is proposed to carefully rear the fish obtained from these eggs, and the phenomena that they exhibit during their growth and development cannot fail to be interesting.

FIXTURES.

DOG SHOWS.

April 5 to 8.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. C. Steadman Hanks, Sec'y.

April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

PITTSBURGH DOG SHOW.

THE Pittsburgh show, which opened March 15 and closed on the 19th, must be counted a distinct success, notwithstanding weather, which would have disheartened almost any other committee but that of New York. Last week's FOREST AND STREAM contained particulars of the opening of the show, but space and distance forbade giving the names of many who were present. Among the prominent breeders and fanciers noticed were: Charles C. Cook, J. B. Lewis, Chas. and W. S. Diffenderffer, J. Sheubrookes, Ed Booth, John Marshall, Thos. Blake, A. V. Bradrick, C. G. Stoddard, B. F. Seitner, T. G. Davey, John Hawkes, Chas. Klocke, John Fawcett, Joe Lewis, Frank Windholz, James Mortimer, Frank Dole, Harry Northwood, John Brett, Fred Pastre, W. L Washington, W. N. Kuhns, E. A. Woodward, J. C. Mahler, Al Eberhart, Donald Monroe, R. Stickey, George, Thomas and Ben Lewis, H. A. Spracklin, Joe Meyers, W. Conners, Harry L. Goodman, John Naylor, F. A. Howard, Ed Probert, and, of course, the judges, Miss Whitney, George Raper and John Davidson, and the press was represented by Major J. M. Taylor, Hildebrand Fitzgerald, E. Bardoe Elliott, and the writer. Pointers, setters, bull-terriers and fox-terriers led the quality in the show. Other comments will be found in "Dog Chat." The judging was on the whole well done and there was little grumbling.

MASTIFFS (*Judge, Geo. Raper*).—With the exception of one or two notable specimens there was not much quality present. Elkson and Moses were placed as named in challenge dogs, the former beating in skull, body and condition. Menglada was alone in bitches. The open class dogs were only moderate animals; Jefferson, the winner, carries his ears badly but has a fair head, in which he beats Major Sellers, second; he is also a good-sized dog, feet and hind parts could be better, and he shows too much dewlap. Major Sellers is rather long-headed, a little short in loin but good in forelegs and an active mover. The well-known Pharaoh Queen won in bitches over Miss Beaufort, from the same kennel; it was a near thing, for in head only does Pharaoh Queen beat the other, Miss Beaufort being much better in chest, legs, body and quarters. Grace, third, is too fat and has small pretensions to type, long weak muzzle, and is light in bone, and ears carried badly. Flirt, hc, has poorly carried ears, is snipy in muzzle and was shown heavy in whelp. Mr. Cook showed two dog pups and quite a fair one in Rodger, the winner, but his second winner, McKinley, I thought had a more typical head, but he loses so much in size to his little brother that the decision cannot be cavilled at. Raymond, hc., is but a plain one. A bitch puppy not deserving of recognition finished the list. Mr. Cook won the kennel prize and Elkson took care of two of the Mastiff Club cups and Menglada the other.

ST. BERNARDS (*Judge, Miss A. H. Whitney*).—There were two or three well-known kennels represented, but the bulk of the dogs on exhibition were not up to first-class form. To begin with there were no challenge roughs out. In open dogs the best was Aristocrat, getting his coat and improving in condition all the time. Comte was placed as at Washington and looked if anything better; he is a handy little dog. The well-known Othello came third; he has a typical head and is well-marked, and it was a feather in Comte's cap to beat him. Willand, reserve, has a fair head, though not muzzle enough, nice coat and bone. Tristan G., vhc., an old Rochester and Buffalo acquaintance, has improved, filled out more and shows lots of quality, muzzle would do with more depth, but skull markings, bone and body are good. Sir Melvale was well-entitled to his three letters; he was at Washington last week. Only five turned up in the female division, the order being as usual, Lady Gladwyn, Altonette and Helen Terry, all belonging to the Duchess Kennels, who had a good innings at this show. Quinta Lomond, vhc., has a pleasing head and expression, though a trifle long, with a blaze that looks as if it had been painted, so symmetrical is it, body too light. Gladys, c., is a snipy, leggy, altogether-weedy specimen. Sir Melvale was alone in the dog pup class.

Father and son competed in the smooth challenge class, Victor Joseph being out for specials only, Ch. Hector had little difficulty in beating his son Lord Hector in size, bone, head, and pretty nearly everything except his bark, in which they were identical; the old dog afterward beat Aristocrat, Victor Joseph, and others for best dog in the show. Empress of Contoocook stood alone in all her glory in the next class, and afterwards was considered the best St. Bernard in the show, though Lady Gladwyn runs her very close, as she beats her in several essential points. The typical Mascot Royal won somewhat easily from Keystone Mars, better behind and excelling in head properties, the latter is good in

front, but too straight behind, and muzzle could be improved with more depth; Adonis II. is now well known, and was well placed in third position. Ben L. has a Victor Joseph type of head and is the best part of him, coat betwixt and between. Keystone Monarch, vhc., is a rather plain dog, fair body, but has a temper that brooks of no interference. An old timer, Alpine Queen, too fine in muzzle and faulty behind, but good body and bone, won in bitches, followed by Fernwood Goldy, vhc., with light body and a narrow head. These were the only two entered, and no puppies were shown. The rough kennel prize went to the Duchess Kennels, and Mr. J. B. Lewis' smooths took the other kennel prize.

RUSSIAN WOLFHOUNDS (*Judge, George Raper*).—Argoss, looking in fine fettle, was alone, Leekhoi being absent, as he is sick. Seacroft Svodka upheld the bitch class alone, Flodeyka, her kennel mate, being absent.

NEWFOUNDLANDS (*Judge, Miss A. H. Whitney*).—With the exception of Mr. Marshall's dogs there was little of merit. Prince Hal, well known, won the only prize awarded in dogs, the others not deserving recognition, and the nice little bitch Troy Lass II. repeated her New York performance. The only bloodhound present was the old rounder Jack Shepard, that was third at New York.

GREAT DANES (*Judge, Miss A. H. Whitney*).—Quite a fair showing, though no challenge entries were made. In open dogs Pedro this time received his just desserts. I said at Chicago he should have been in the money, though he was not recognized. Second went to Favor, the winner at Chicago. Duke, third, is a blue dog, with a nice clean head, but his body is shelly and could be improved with more bone and rib. Pasha or Brutus, so entered in the catalogue, reserve, loses considerably in head. Tannhauser, vhc., is rather weak in muzzle, but stands on good legs and feet, and has a good body. Siegfried, hc., is coarse in skull, snipy in muzzle, stands very wide in front and is bad behind, hardly deserving his letters. Ultima Plavis won nicely over Nellie B. in body and that is all. Minca III. is short faced and small-sized and rather short in body. Mingo, vhc., is not very typical; short, thick head, good legs. Lufra was absent. Minca III. was alone in puppies. Two Ulmer dogs were shown and looked like heavy great Danes.

DEERHOUNDS (*Judge, John Davidson*).—All Mr. Thayer's entries, and there was little change in their position. Robber Chieftain and Clansman in the challenge dogs, but Theodora and Wanda, in bitches, was a reversal of most decisions. Hillside Warrior's good head, legs and feet placed him well over Hillside Rover, who loses in head and neck, but gains a little behind over the winner; Alpin, third, would be higher up if he was better behind. Romola, Sylvia and Ruth was the order in bitches, the winner overtopping the second in size and bone, Ruth loses to the others in forepart—head and shoulders. No puppies were shown.

GREYHOUNDS (*Judge, John Davidson*).—Most of the winners are too well known to criticise them, they having been done to death at the shows. Mr. Purbeck's dogs as usual cleared the deck. In challenge dogs Gem of the Season again snowed Ornatus under. No challenge bitches. In open dogs, Pious Pembroke, now that his kennel mate Ornatus has moved out of the way, has a chance for challenge honors and won; Victor Hugo, second, is not a bad-headed dog, in fact better than the winner, but when it comes to body and legs he is "not in it," feet open and flat, or, as "Honest John" put it, "If he only had web feet he could walk on the water." Rector, third, is a thick-headed coarse dog. In bitches, Bestwood Daisy, Lily of Gainsboro, looking much better, a pity it is she is not better in forefeet and pasterns, and Lady Clare was the order, a repetition of Washington. Sir Launcelot, looking as if he had been better left at home, was the only puppy with any pretensions to merit.

FOXHOUNDS (*Judge, John Davidson*).—Willie B., the winner in open dogs, there being no challenge entries, has more bone and substance than Parson, and is truer formed in head. In bitches Modest Girl beats Beauty in head, bone, coat, ribs and quarters. Bess is weak in muzzle, nice skull and ear, and is fairly well off for bone. Femur, reserve, was second at New York and well deserved her position, Swift, vhc., is rather weak in pastern and head would do with a better muzzle, has a fair hound coat. Classes were made for shaggy foxhounds, but there was only one bitch present and that was shaggy in name only, ears are badly hung and she is snipy in muzzle.

POINTERS (*Judge, John Davidson*).—Mr. Davidson more than holds his own in popularity judging by the entries he receives. There is one thing about it he is consistent and sticks to the accepted standards so that there is some degree of certainty in showing under him. The quality in this breed was very good on the whole and a number of noted dogs were on hand. Challenge heavy weight dogs had four entries and the winner turned up in King of Kent he beating Pontiac again, who in turn was placed over Tempest who beats Lord Graphic in head and is of better quality throughout. Lass of Bow was alone in challenge bitches. Open dogs had a class of thirteen and in the bad light it was no easy matter to place them. Count Graphic proved the winner, he has rather a plain head, muzzle should be squarer and deeper, and his ribs better sprung, stands on good legs as a rule but knuckles a trifle over at times; Westminster Drake pushes him very close if he is not a better dog; Ightfield Upton, good in head and front, came third, needs more rib but is a handsome liver ticked dog; Shot, reserve, has a plain head, not well formed, is heavy in shoulders, but has good body and bone. Bracket's Lad, vhc., was at Washington. Don Croxteth, in the same division, could be better in muzzle, is too broad in skull, a rather coarse dog with excellent forelegs but should be better sprung in ribs. Dude, hc., is light in eye, coarse in skull and is short and pinched in muzzle. In the hc. lot, Saxon is badly dished-faced and skull too broad, pasterns rather weak, otherwise all right. Spot is faulty in front, muzzle not square enough, good body but heavy in shoulders. Revelation could not be denied in bitches and the same owner's, Mr. Davey, Ightfield Madge came second, repeating her Chicago performance. Nell of Idstone, third, is rather plain in head, muzzle faulty, has very good legs, chest, ribs, loin and front. Belle of Naso is a bitch faulty in head but good in legs and body, moving well. Lord Graphic's Gem is too prominent in brow, good forelegs and body, and neck is especially well formed. Nellie, hc., carries her ears too far back and has only a fair front. Belle of Kent has a thick, short head, and ears not hung close enough, evidently partaking more of its dam's form than that of its sire. In the light weight challenge division Ossining was alone. In dogs, Inspiration won handily over Bow of Idstone, who is a little weak in muzzle but has a good skull, excellent front and body. Graphic's Topic, third, is heavy in shoulder, could be better in eye, and muzzle is not square enough. Axtel King Don, reserve, was at Washington, vhc., Duke of Idstone, has not stop enough, and is not ribbed up sufficiently. Foxchase, hc., is not straight enough in front and to have a good head shows too much stop. The trim and full of quality bitch Lady Gay Spanker could not be denied in the ladies' division, beating her kennel mate Miss Rumor once more, which she can do with something in hand. Patti Donalif, third, is a bit long cast, plain in muzzle, ears set on too far back, straight behind. Lew Nellie Croxteth Fawcett, having to carry such an absurd name, is a little wide in front; her muzzle is too sharp. In the vhc. division, Grace Croxteth is too broad in skull, weak in muzzle, narrow-fronted and heavy in shoulders; Fan has hardly stop enough and muzzle is too fine, legs are not straight, otherwise a nice bitch; Pride of Idstone is too round in skull to have a good head and is in muzzle too much cut out before the eye, and her quarters fall away too sharp; Siberian Girl, third last year, met a little better company this time, she loses in head and ears. This was a rattling class of thirteen entries. The novice winners have been chiefly named in the regular classes. Doc Daniels, the winner in puppies, has a stary, light eye, not a bad head, but neck is not clean enough, good bone. Don McBeth came second and Dick M. vhc., neither of which were in their stalls. Miss Fawcett won in bitch puppies; her feet turn out and her muzzle is not deep enough. Vic of Idstone, second, is plain in head, needs time in body, and is a promising pup. Mr. T. G. Davey won the kennel prize.

ENGLISH SETTERS (*Judge, John Davidson*).—This breed always comes out strong at Pittsburgh and this year proved no exception, and even surpassed other years, I think, especially in the number of good young dogs of American breeding. The judging was, on the whole, well done and, at least, according to the good old standard, with just enough modernism and concession to field form as was consistent with type. Challenge dogs had six entries, but Paul Gladstone was waiting for the specials only. Count Howard and Monk of Furness fought it out again with the decision as before, in favor of the former, Rockingham, carrying his ten years well, securing the reserve from Edgemark, another good one in his way. Princess Beatrice II.'s nice head and good symmetrical form served to put her over the well-known Albert's Nellie, Nia getting the reserve. All these are too well known to need further mention. Sixteen entries showed up in the dog class and it was Rockingham's day all over the money; one, two, three from one litter is certainly a record any stud dog may be proud of, but at the same time we must say a good word for the dam, Myrrha II. Mr. Raper's new purchase, Model Yankee, that was

PRESIDENT S. L. BOGGS, SECRETARY W. E. LITTELL, Pittsburgh Show.

not considered of any account at New York, was placed first here; he has a head beautifully modeled, is well ribbed up, strong in loin and quarters, hindlegs will, no doubt, improve and tail hardly as well carried as it might be, and neck would do if it was a trifle longer, a capital young dog that will improve yet, of good size and plenty of bone, without being coarse. The same criticism to a great extent will do for his litter brother, Real English, a darker-colored one; he is a little throaty and not so wide in quarters as the winner, has well-sprung ribs with plenty of room for forelegs to work, a very handsome setter. Rockingham, Jr., is not so well sprung in ribs as the others, has just as good a head and I think he beats both of his competitors behind, was shown in fine shape and moves very well. Reserve went to Benzine, well-known. Sir Frederick got vhc.; he is now quite a rounder. Ightfield Rhwlas is another old face in this division. Breeze Gladstone was marked vhc., but I am told he was not present. Tony Gladstone has hardly carried out his early promise; he is not very good behind. In the hc. lot Brandon, Jr., has a fair head, but is not true in front. Count Eric is too round in skull and stands a bit back on pasterns, falls away in quarters, but has good bone and coat. A hard class to handle in such uncertain light. An excellent lot of sixteen bitches faced the judge in the next class, and Canadian Lily was returned the winner and received better recognition than has usually been her share. Second went to Miss Frost, a well built bitch, as far as body is concerned, but a bit plain in head. Maude V., third, has a nice head, but loses to the others in shoulders, and feet are thrown out at times. Liberty II., reserve, has a long, snipy muzzle, could be improved in loin and quarters, but stands on good legs. There were several in the vhc. crowd. Forest Heather, whom I described at Philadelphia; Minnesota, too light in body and faulty in quarters, but possessing a capital head; Nellie Kitson, rather too fine in muzzle and faulty in set on of stern, but a good mover. Princess Irma, hc., is a little round in skull, but has not by any means a bad head; is a trifle faulty in loin and turns her elbows out a little. Moll Lewellin is rather long in back, has a fair head and good quarters, moves well. The winner in novice dogs proved to be another from the London Kennel, Brighton Benwell, who has a fairly good head, ears should hang better, excellent front, but is too flat in loin. Count Eric I have already noticed, and Pembroke's Blue Grouse took second in puppies at Chicago. There were several others, but I cannot mention them all. Maude V. and Minnesota was the order in the bitch class. In dog puppies a cracking good pup in Wordsley Dude was well to the front; with time he will, I am sure, make a name for himself. Hus, second, droops in quarters too much. Count Eric was third. Princess Irma, mentioned before, won in bitches from Royal Princess and Rake's Creed, both promising youngsters. Mr. Frank Windholz scored again with another kennel prize in this breed, having a very typical team.

IRISH SETTERS (*Judge, John Davidson*).—This breed was fairly well represented. The challenge class dogs drawing out four good ones, headed by the typical Mack N., the winner last year. This dog has a most typical head, and Irish setter breeders would do well to study it; Kildare beat Dick Swiveller for second place, the latter looking light in body and harsh in coat, Seminole taking vhc., pushing the other hard. Laura B. and Elfreda was the usual order in bitches. Open dogs had a class of eight, Duke Elcho adding another win to his score; Rex Smith, second, has a fairly good head, is rather narrow fronted and quarters drop too suddenly; a new one in Troubadour took third place, has not stop enough, rather light in body, and neck should be cleaner; Rockwood Dandy, reserve, is a nicely built one, needs to be a little squarer in muzzle, but stands on good legs; Tom Owen, vhc., was first at Jackson, and is but a fair dog, rather plain head, and color could be better; Exile II., also vhc., is well known; Red Boy, vhc., took second here last year; he has a typical head, but does not show up so well in body, especially in quarters. The well known winner Norma scored again over Edna H. in bitches, third going to Molly D., a little broad in skull, light in bone, but body and legs well formed, rich color; Alice Kent got the reserve number, with Bess F., vhc., ears are too broad and hang out from the head, is broad in chest and head only fairly good, nice color; Duck, hc., is fair only. Troubadour and Exile II. took care of the novice dogs, and Duck and Fly were placed as named in bitches, the latter pushes the other closely, having a typical head, is rather faded in color, but nice body and legs. In dog puppies first was withheld, and this denotes the quality of the others. Bitches were better, Avondale, the New York winner, having again the post of honor, with Kildare, Winnie and Roxy Darby in the order named, the latter shows too much stop, and is faulty in skull. The Oak Grove Kennels took the kennel prize.

GORDON SETTERS (*Judge, John Davidson*).—There was hardly a strange face among the lot, the Dixon kennel having the prizes well in hand. Ivanhoe and Leo B., in dogs, Duchess of Waverley and Lady of Waverley was the challenge order. Rexmont repeated his Washington triumph in dogs, Rex taking second, the latter's body and hind parts are the best of him, head rather short and thick and he throws elbows out at times; Bob H., third, the winner at Philadelphia, is, as I said there, rather coarse. Two well-known bitches were the winners in the next class, Countess Roxie and Maid of Waverley. In dog puppies, Waverley Boy beat Tom in squareness of muzzle and skull, the latter's being too thick and round, and also in color of tan. Waverley Girl was alone in bitch puppies, Of course Dr. Dixon added another kennel prize to his records.

SPANIELS (*Judge, George Raper*).—The Irish water spaniel was no Irish water spaniel at all, something like a leggy Sussex. In Clumbers, Boss III., in dogs, and Lady Bromine, in bitches, won in their respective classes. It is astonishing how these dogs have improved under Mr. Spracklin's care, their coats are profuse and glossy, and when the coloring, due to the preparations used to get them fit, wears off they will be very handsome; Our Joan was second in bitches, losing to the other in head, squareness of muzzle especially, and body.

Samson and Rideau Rab were placed in that order in Fields, Samson's superior quality, head, body and straighter front sufficing to put him in the premium position. The well-known Bridford Gladys was the only representative of the weaker sex.

Some well-known faces appeared in the cocker classes, Black Dufferin taking care of Red Roland in the challenge dogs, winning in head, depth of body and front, and I Say and Amazement occupied their usual positions in the next class. That pup of the year, Fascination, could not be denied in open dogs; it is a wonder he stands the racket so well, and he has now a record well nigh, if not quite, unsurpassed for a youngster of his age. Jersey Boy was placed a peg or two too high, I think, as he is undershot, dish-faced, not straight in front and rather thick in skull. Obadiah, reserve, can beat him, as well as Jersey Obo, vhc.; though the latter is faulty behind, he is better in head, front and body. Woodstock Daisy, entered as Woodstock in this class and Woodstock Dora in the puppy class, scored a somewhat easy win over May, though she is not square enough in muzzle, a little long in body, and might be straighter in front; still, she is a very pretty animal, showing lots of quality and was in nice condition. May, second, has a bad, snipy head, body not quite short enough, but legs are good. Maud S. II., reserve, is a trifle wide in front and rather wavy-coated, but her head will do. Verra, vhc., the winner last year, loses considerably in squareness of muzzle, and La La, in the same order, is now well known and deserved her position. Fascination and Woodstock Daisy were the only entries in puppies, and each drew $10.

COLLIES (*Judge, George Raper*).—Champion Roslyn Wilkes and Cora II. were the challenge entries and both looked well. Open dogs—Ormskirk Shep was considered good enough to beat Renown, a rather coarse dog, more truly formed than the other, but not showing so much quality. Roslyn Conway, third, could be get into coat, would be hard to beat. Reserve went to Sir Walter Scott, whose gay carriage of tail may have spoiled his chances. Fletcher, vhc., is a nice stamp and well deserved his letters. In bitches, the well-known winner Mother Shipton won somewhat easily from Dot, who is too small. Lady Bruce, faulty in head and body, came third. Bessie, vhc., would do with more length of head and better coat. A nice youngster, Russell, won in dog puppies; is well-coated and has a good head, where he beats Squire Scott. Nancy Scott and Vignette in bitch puppies were rightly placed. Seminole Kennels won the kennel prize easily enough. The entry all through was not very large.

BULLDOGS (*Judge, George Raper*).—The entries were small but choice, comprising the best we have. Champion Harper made his appearance again and succeeded in downing Bo'swain by his superior body and front. The Graven Image was alone in the next class and could not have looked better. King Lud and Pathfinder met again and were placed as named, the former beating in depth of chops and underjaw, skull, body and action, but there is little to choose between them. Handsome Dan, third, has a good foreface but is not out enough in front and body could be better shaped. Little Monarch, c., lacks bone and substance, stop not broken up enough, light in loin and quarters, narrow in head but fairly well out at shoulder. Saleni could not be gainsaid in bitches and Addiscombe Gypsy scored well in beating such a good bitch as Peckham Lass; the former's ears are rather large but well carrried, nice layback and depth of jowl, though hardly broad enough; fairly out in shoulder, but it is in body and quarters that she lays over Peckham Lass, and the latter's feet are open and she is both narrow in muzzle and not out enough in shoulder. The puppy Nobby Twist has gone where many another good one has preceded him.

BULL-TERRIERS (*Judge, George Raper*).—Pittsburgh has always had a penchant for bull-terriers, and I have seen some funny ones shown at different times, of all colors and shapes, but I believe there was only one of the originals shown, and he looked funny among the pure whites and thoroughbreds. The classes were very much better than anything that has yet appeared in Pittsburgh shows. Carney was the only challenge representative. In dogs Streatham Monarch scored his last win in the open class and has been kept in excellent trim through the circuit. Sir Monty II. is well known. Como II. loses in head and body to the others, but is a nice terrier. Keno and Barney B. are two fairish dogs and well deserved their letter. Edgewood Fancy won with something in hand from Lady Dinah in the bitch class, the latter is too much cut out before the eye, drops a bit behind the shoulder, but is otherwise quite a nicely turned bitch. Queen Bendigo, third, and Lady Vesuvius, vhc., are now well known. In light-weight dogs Mr. Dick was alone, and Luce, the Chicago winner, the only representative in bitches. Novice classes were nicely filled and Billy Bulger was returned the winner in dogs, beating Como II. in head and body. Venus W. and Topsy were the only two in the bitch class; they are only moderate. Billy Bulger won another first in dog puppies, but were Edgewood Flyer in better shape would be beaten by him. Willie King loses to both in forelegs. Mr. Dick Bendigo was vhc. Pittsburgh Carmencita was returned the winner in bitch pups, a nicely furnished bitch, a little weak in muzzle. Mr. John Moorehead, Jr., won the kennel prize.

POODLES (*Judge, George Raper*).—The well-known Paris was the winner in dogs, second was withheld and third given to a rather poor white one. In bitches first and second were withheld but Beady just saved her stakes by getting third, very poor.

DACHSHUNDE (*Judge, George Raper*).—Windrush Rioter and Janet were the challenge winners and the same owner's Zuly II. was placed over Fritz K., who loses a bit in quality, length of head and coat. Feldman K. is too chunky for this class. In bitches quite a good one in Bessie K. was the winner; she is well known, is rather short in body and weak in muzzle, good crook, chest and loose skin.

BEAGLES (*Judge, John Davidson*).—The challenge classes were a repetition, Tony Weller and June M., neither up to good show form, but they are having the luck of it just now. The well-known large one, Don, was returned the winner in dogs, he is too big; Pomp, second, is better size, is weak in muzzle but skull and ear are nicely formed, coat a little too soft. Forest Prince has a thick, coarse head, heavy shoulders and is none too straight in front. Duke Bannerman, vhc., is thick and cloddy-looking, too wide-chested and weak in muzzle, coat of fair texture. Betty R., the winner at Chicago, was returned the winner in bitches, she is strong in loin and quarters and has a good front, head could be improved; Fitzie, second, has a nice straight front, but is pinched in muzzle and skull is too broad: Snow, the Jackson winner, is rather long-cast, needs more back rib, feet could be better, but has a nice head and ear. Mollie, vhc., is rather large and not straight enough in forelegs, but moves well, all the same. Puppies were divided, Hustler winning in dogs over Ruffian, the former is leggy, but the latter more so and coarse besides. Mollie L. won in bitches over Phyllis, but neither are of much promise.

FOX-TERRIERS (*Judge, George Raper*).—The Blemton entries were absent enjoying a well-earned rest. This let Raby Mixer in for the dog challenge prize, followed by the well-known wire Suffolk Toby, Starden's Jack's thick shoulders and faulty head putting him back to reserve. In bitches, Dona had little difficulty in accounting for Blemton Brilliant, scoring heavily in front. Open dogs was a good class of eleven, with two absentees. Most of the winners are so well known now it is needless to say more than where they were placed. Starden's King, hardly looking so well as at New York, won easily from Ebor Spendthrift, Dobbin taking third, following the former as usual; Painter coming well up with vhc. Hillside Ruffian, also vhc., stands a bit wide in front, needs more back rib and muzzle could be stronger: a nice "terrier," though. Miss Dollar was well in front of Rowton Safety, who has filled out somewhat, but is still round in skull and rather leggy and light in body. Woodale Refusal pushed her close, with Danison reserve. Betsy Splauger, hc., is faulty in head and body, but quite a terrier.

In wire-hairs, Suffolk Grip, faulty in ear and eye, but nice head, loses only to the second, Risca, in coat, though the latter has too much of it, but it is harder. The other two entries were absent. In bitches, Suffolk Tassel beat the same owner's (Mr. Mortimer) Suffolk Venus in muzzle, coat and bone. Puppy classes showed good entries, the well-known Harvard winning in dogs over Teddy, too fat, full in eye and weak in muzzle. Woodale Damsel was the only good one in bitch puppies, taking premium position, but second was withheld.

IRISH TERRIERS (*Judge, George Raper*).—A capital lot of "dare-devils," but most of them have been out before. Dunmurry won in challenge bitches and afterward beat Crate for the special. Hanover Boy once more beat his kennel mate Boxer IV., reversing the New York decision again, and Jack Briggs fell into third place again. Crate was the only bitch considered worthy of the money, second being withheld from a wooly-coated wheaten terrier called Saidie.

ROUGH-HAIRED TERRIERS (*Judge, George Raper*).—In these I include the Scotch, Dandies, etc. In the former breed Kilstor still kept his pride of place despite his new kennel mate's best efforts; he is shorter in back, stronger and better in front, smaller ear than the other, but heads are almost equal. The others were poor ones. Bella was alone in bitches; she has a nice body and coat, but is rather large in ear. In Dandie Dinmonts Mr. Ed Brooks's representatives each claimed $10 in their respective classes without competition. Qui Vive, the only Bedlington, is good in head and body, but a bit light in bone. Skyes are coming to the front, though Sir Stafford is still invincible and won another challenge prize and special in dogs. Fred Kirby had his revenge with Sir Roger, who beat Bruce by his better length and body and stronger muzzle. Bessie, well known, was the only bitch entered and won.

BLACK AND TAN TERRIERS (*Judge, George Raper*).—Prince Regent again just managed to get in ahead of Salisbury; there is very little between them when shown right. Prince, vhc., has gone to pieces, but still has a typical body. In bitches, competition between Broomfield Madge and Louie was keen, and the judge reversed his New York decision by placing them as named, Louie was in good shape and should have won, beating the other in front and color. Gypsy Girl occupied her accustomed position in reference to the other two. The light weight prizes were withheld for want of merit in dogs, and a fair toy, Lady Clyde, by old Sir Wallace, was the only entry in bitches. In puppies, Rochelle Majestic, the only one showing any merit, won; shows good markings, little dark yet, is slightly breeched good tail, only fair head, nice body. Yorkshire terrier prizes were withheld. It seems a pity the Salem Kennel has deserted the breed, for the ground gained the last two years is being lost very rapidly.

PUGS (*Judge, George Raper*).—Penrice and Sprake had it nip and tuck in challenge dogs, with Bob Ivy holding the bottle, and were placed as named. Sprake loses to the other in head principally. In the bitch class competition was very close between Sateen and Beauty II., the latter loses to the former in eye, body and foreface, but both are very good ones. In open dogs Bonsor easily disposed of his competitor, Little Duke being his nearest rival, both are well known and so is Kash, Jr., who is quite a degree behind these two, beaten in head and markings. There was no denying Nobody's Baby in the bitch class. I spoke well of her at Philadelphia. Sara Bernhardt, second, has made up considerably, though still rather light in body. Toadie, third, must have gone off considerably since New York, where she won ahead of Sara. Bonita, vhc., has a nice head, fair body and curl. She also won in puppies, beating Penrice Boy in head only.

Calumet Ben d'Or was the only King Charles present and won.

In Blenheims Tiney, a past winner, too short in ear, was not considered good enough for first place.

ITALIAN GREYHOUNDS (*Judge, John Davidson*).—Always a good show here with Joe Lewis's string around. Sprite won in challenge bitches and the well known Spring in open dogs. The same owner's Sprite, ears carried too flat on head, scored over Lady Lee, last year's winner, in head and front. Two promising pups were shown by the Lewis Kennel.

DALMATIANS, WHIPPETS (*Judge, George Raper*).—Two moderate Dalmatians only secured second and third in their classes; spots run in too much. The Campbell & Blake Kennel came out strong in whippets, but in dogs Tip was only considered good for second money. A nicely made one in the new Boston Model, in bitches, won well over Maggie, beating in head and front. Nellie Grey and Bessie were given hc.

A capital lot of Mexican hairless were shown. In the miscellaneous class heavy-weights, Lead, a serviceable looking "Coon" hound, "treed" the blue ribbon, and Toon & Symonds's Pomeranian Sheffield Lad scored again in the light-weight class. With the withholding of prize from Chichina, a hairy Mexican on the chow-chow order, the judging closed.

H. W. L.

SPECIALS.

MASTIFFS.—Mastiff Club specials.—Westminster challenge cup for best under three years, E. L. Kimball's Elkson, and also for best dog, challenge cup. Best bitch, challenge cup, C. C. Cook's Menglada. Best kennel, C. C. Cook. Best dog or bitch and best dog, E. L. Kimball's Elkson. Best winning third, T. W. Coon's Grace.

ST. BERNARDS.—Best kennel, roughs, Duchess Kennels. Best kennel, smooths, Fernwood Kennels. Best dog or bitch, Duchess Kennels' Empress of Contoocock. Best dog, Hospice Kennels' champion Hector. St. Bernard Club medals: Best American bred smooth dog over 12mos., A. Lackman's Mascot Royal. Best bitch ditto, Duchess Kennels' Empress of Contoocock. Best rough dog ditto, F. S. Haslage's Keystone Mars. Best bitch ditto, Niagara Kennels' Quinta Lomond. Best American bred rough and smooth dog under 12mos., Maryland Kennels' Sir Melvale.

GREAT DANES.—Best kennel, Wolverine Kennels. Best dog in show, Shoquocuon Kennels' Pedro.

DEERHOUNDS.—Best kennel, Hillside Kennels. Best dog in show, Hillside Warrior.

GREYHOUNDS.—Best kennel, A. W. Purbeck's. Best dog, A.W. Purbeck's Gem of the Season. Best bitch, same owner's Bestwood Daisy.

FOXHOUNDS.—Best kennel, the Field Kennels'. Best dog, Field Kennels' Willie H.

POINTERS.—Best kennel, T. G. Davey's. Best pointer that has started in field trials of 1891-1892, T. G. Davey's Lady Gay Spanker, also special for best bitch. Best dog in show, Westminster Kennel Club's King of Kent.

ENGLISH SETTERS.—The Stroup trophy for best owned in western Pennsylvania, Dr. Hartman's Albert's Nellie. Best kennel, Frank Windholz's. Best dog never shown before, Harry Northwood's Wordsley Dude. Best bitch ditto, Mt. Washington Kennels' Miss Frost. Best that has started in any open field trial of 1891-1892, F. S. Brown's Edgemark. Best dog or bitch, F. Windholz's Count Howard. Best dog owned in Allegheny county, J. A. Herron's Grousemont. Best bitch ditto, W. D. Henry's Alice McBeth. For second-best bitch, Fred Pastre's Nellie Kitson.

IRISH SETTERS.—Best kennel, Oak Grove Kennels. Best dog in Allegheny county, Kildare Kennels' Dick Swiveller. Best dog, W. N. Kuhns's Mack N.

GORDON SETTERS.—Best dog owned in Allegheny county, W. E. Lippencott's Tom. Best kennel, Dr. S. G. Dixon's. Best dog, Dr. S. G. Dixon's Ivanhoe.

SPANIELS.—Best Clumber dog, Mercer & Middleton's Boss III.; best bitch, same owners' Lady Bromine. Best cocker dog, Geo. Bell's Fascination; best bitch, Geo. Bell's I Say.

COLLIES.—Collie Club silver medal best American collie, Seminole Kennels' Roslyn Wilkes. Bronze medal for best dog or bitch puppy, McEwen & Gibson's Russell. Best kennel, Seminole Kennels.

BULLDOGS.—Best kennel, Illwiss Kennels. Best dog, Illwiss Kennels' King Lud; best bitch, Wheatley Kennels' Saleni.

BULL-TERRIERS.—Best kennel, John Moorehead, Jr.'s. Best puppy, Tubby Hook Kennels' Edgewood Fancy. Best dog (4), J. Moorehead's Streatham Monarch. Best owned in Allegheny county, Streatham Monarch. Best bitch, Tubby Hook Kennels' Edgewood Fancy.

DACHSHUNDE.—Best dog, E. A. Manice's Windrush Rioter; best bitch, same owner's Janet.

BEAGLES.—Best dog (2), W. H. Child's Tony Weller; best bitch, Field Kennels' Fitzie, the latter N. B. C. specials.

FOX-TERRIERS.—Best kennel, Hillside Kennels. Best dog or bitch, Hillside Kennels' Starden's King.

IRISH TERRIERS.—Best in show, W. J. Comstock's Dunmurry.

DANDIE DINMONTS.—Best dog, E. Brooks's King o' the Heather.

SKYE TERRIERS.—Best dog, C. A. Shinn's Sir Stafford.

BLACK AND TAN TERRIERS.—Best in show, Rochelle Kennels' Broomfield Sultan. Best pair, Broomfield Sultan and Madge.

PUGS.—Best kennel, Howard Kennel. Best in show, A. E. Pitts's Bonsor. Best winning second, Mohawk Kennels' Sprake.

ITALIAN GREYHOUNDS.—Best Kennel, Joe Lewis's (2).

WHIPPETS.—Best dog, Campbell & Blake's Tip.

MEXICAN HAIRLESS.—Best dog, Mrs. Malmeke's Don. Best kennel, Dr. J. and Mrs. Wangh's. Handler with largest and best collection, Ben Lewis. Second best ditto, Joe Lewis.

HAMILTON DOG SHOW.

MANY breeds of dogs of all sizes were exhibited at the local show of the Hamilton Kennel Club held in the Palace Rink March 10, says the Hamilton *Spectator*. The show was a much greater success than the promoters anticipated, an unusually large exhibit being made, and the dogs were mostly all well bred. There were 164 entries, the classes best represented being greyhounds, English setters, field spaniels, cockers, fox-terriers (smooth). All the arrangements were well carried out. The dogs were tied around the rink, all breeds being together, with the number of the entry above them. When they were being judged they were brought into the rings, and after the prizes were awarded they were returned to their places and the prize cards placed upon them so that the spectators could inspect the winners. W. B. Palmer, of Woodstock, was judge of the sporting dogs. R. B. Harris and John Hackett had charge of this ring. The other dogs were judged by George Bell, of Toronto. This ring was superintended by A. D. Stewart, Dr. Griffin and F. R. Close. In most cases the decisions of the judges gave satisfaction, but, of course, some were displeased because their dogs were thrown out or pronounced "no good."

The attendance was large, many ladies being present. Nothing could be heard above the deep bass barks of the St. Bernards and foxhounds, and the shrill yell of the terriers. They kept it up all evening.

So successful was the show that another one will likely be held. The prizes had no intrinsic value, but the exhibitors were satisfied to receive the awards. The prize winners are:

MASTIFFS.—*Puppies:* 1st, Jas. McFarlane's Barton.

ST. BERNARDS.—*Dogs:* 1st, H. Sweetman's Bruno; 2d, Jas. Weller's Nero. Very high com., T. Thomson's Sancho. *Bitches:* 1st, H. P. Breay's Mary Jones. *Puppies:* 1st, T. J. Senior's Help.

NEWFOUNDLANDS.—*Dogs:* 1st, J. Baine's Joe. High com., G. Small's Prince and Jas. Omand, Jr.'s Jim. *Puppies:* Com, F. Priestland's Pompey.

WOLFHOUNDS.—*Bitches:* 3d, J Stevens's Gyp.

GREYHOUNDS.—*Bitches:* 1st, R. F. Wodehouse's Swift; 2d, W. Tulk's Jess; 3d, S. G. Moor's Jess. High com., W. Wright's Hamilton Belle. *Puppies:* 1st, M. TenEyck's Oscar; 2d, W. Richardson's Tiger; 3d, F. Kellond's Dick. High com., Rev. T. Geoghegan's Rob. Com., S. G. Moore's Barney.

FOXHOUNDS.—1st, 2d and com., Wesley Vansickle's Ranger, Stormer, Blucher and Wellington.

BEAGLES.—*Dogs:* Dr. Mole's Punch and A. Barnard's Whiskers. No prizes. *Bitches:* 1st, H. P. Breay's Juno.

HARRIERS.—*Dogs:* 1st, A. Barnard's Ranter. *Bitches:* Com., Alex. Archibald's Nancy. *Puppies:* 2d, L. H. Battery's Daisy.

POINTERS.—*Bitches:* 1st, Hunter & Smith's Lady Landsdowne.

ENGLISH SETTERS.—*Dogs:* 1st, J. Hall's Tom; 2d, G. C. Hore's Bohemian Laddie; 3d, J. Bowman's Reppo. Very high com., B. Whitling's Rover. High com., J. W. Judd's Rover, Richard, Martin and Towser. *Bitches:* 1st, 2d and 3d, G. C. Hore's Blue Dora, Queen Don and Ella Kent.

IRISH SETTERS.—*Dogs:* 3d, J. W. Blasdell's Sandy.

RETRIEVERS.—Prizes withheld; S. Bautenheimer's Jack and Jim.

WATER SPANIELS.—*Bitches:* 1st, H. Bryant's Tiny.

FIELD SPANIELS.—*Dogs:* 1st, H. Woodhouse's Victor; 2d, C. Wilson's Reuben; 3d, J. D. Reynolds's Tony. Very high com., G. Y. Bellhouse's Smut, B. P. Dewar's Banjo, E. Seeley's Dash. *Bitches:* 1st, C. A. Bucke's Topsey. *Puppies:* Very high com., R. Harley's Bruno.

COCKER SPANIELS.—BLACK—*Dogs:* 1st, A. Murdoch's Fritz, Jr.; 2d, W. J. Wallace's Black Jacket; 3d, J. Kennedy's King Raven. *Bitches:* 1st, J. Kennedy's Molly Bawn; 2d, H. Tyson's Daisy; 3d, A. Murdoch's May Brant. Very high com., T. Clappison's Hamilton Jet, J. Kennedy's Lady Raven. *Puppies:* 1st and 2d, D. E. Turner's Lady Brock and Brock, Jr.; 3d, G. A. Truman's Nellie. Very high com., J. Kennedy's Jay Kay.—OTHER THAN BLACK—*Dogs:* 1st, H. Dawson's Bounce; 2d, A. Barnard's Ginger; 3d, W. T. Ramsay's Chip. *Bitches:* 1st and 2d, W. McDonald's Queenie and Gipsey Queen. *Puppies:* 1st, W. McDonald's Hamilton Red Jacket; 2d, F. Sturdy's Beauty; 3d, W. Tocher's Dot.

COLLIES.—*Dogs:* 1st, J. M. Lottridge's Jack. Com., J. Watt, Jr.'s Prince. *Bitches:* 2d, T. R. Bellett's Barton Ella. *Puppies:* 1st, A. L. Gartshore's Scott; 3d, R. S. Bull's Glen.

DACHSHUNDE.—*Dogs:* 1st and 2d, F. H. Mills's Combat and Sport. *Bitches:* 1st, F. H. Mills's Vixen.

BULLDOGS.—*Puppies:* 1st, A. D. Stewart's The Dude.

BULL-TERRIERS.—*Dogs:* 1st, Mark O'Rourke's Jacko. The only prize in five entries. *Bitches:* 1st, Dr. Griffin's St. Clair. *Puppies:* 2d, D. Foley's Jack.

FOX-TERRIERS.—SMOOTH-COATED—*Dogs:* 2d, Hugh Gawley's Trimmer. Com., H. McCullough's Muggins and Henry Feast's Jerry. *Bitches:* 1st and 2d, A. D. Stewart's Hillside Baroness and Suffolk Riot; 3d, Henry Geiger's Fan. Com., E. Johnston's Topsy. *Puppies:* 1st, A. D. Stewart's Bonally Breda; 2d, W. P. Lindsey's Quiz; 3d, Jam's Crooks's Bonally Blink Bonny.

FOX-TERRIERS.—WIRE-HAIRED—*Dogs:* 1st, Geo. Johnstone's Jack; 2d, J. Hendrie's Wentworth Twig. *Bitches:* 3d and high com, John Hendrie's Nell and Wentworth Belle.

BLACK AND TAN TERRIERS.—2d, Richard Crooks's J. M. Gibson. Very high com., John Brick's Fly.

SKYE TERRIERS.—2d, Rev. Thos. Geoghegan's Skye.

BEDLINGTON TERRIERS.—1st, Geo. C. Thompson's Danger.

YORKSHIRE TERRIERS.—*Dogs:* 1st, Thomas Church's Jack. *Bitches:* 1st, Thomas Church's Beauty; 2d, C. J. Fitzsimmons's Jackie.

PUGS.—*Dogs:* 1st, Miss Dodman's Barney; 2d, Harrie Brown's Laddie. *Bitches:* 1st, W. McAllister's Herb; 2d, Miss Grieve's Birdie; 3d, George Elliott's Floss.

BLENHEIM SPANIELS.—1st, Miss Hartfield's Romeo.

KING CHARLES SPANIELS.—1st, Henry Bawden's Daisy.

RUBY SPANIELS.—Very high com., Mrs. Turner's Jaspar.

TOYS AND PETS.—UNDER 7LBS.—*Dogs:* 1st, William Applegath's Tiny; 2d, M. Galim's Tiny. *Bitches:* 1st, M. E. Bessey's Minnie; 2d, Mrs. Doun's Dolly; 3d, Mrs. Bessey's Tiny.

MISCELLANEOUS.—2d, F. Sturdy's (cross St. Bernard and Newfoundland). High com., Henry Bawden's (Russian bloodhound) Tiger.

THAT IRON-CLAD COURSING RULE.

Editor Forest and Stream:

Having a special interest in the final decision of the executive committee of the American Coursing Club on the Pearl of Pekin protest, that being the direct cause of the discussion as to the construction of Rule 30, which is so ably maintained by many as against Mr. Wade, I have followed the various articles in your paper, as well as in others, very carefully. I have such special interest in their final decision because Pearl of Pekin is owned by my younger brother, and because I desire to see justice given to him.

Messrs. Flower, LeMoyne, Gower, "Courser" and others have so ably upheld the rule, that it seems that anything more said in defense of it would be superfluous. Mr. Wade however makes several assertions that merit a reply.

He informs us that Mr. Flower is the only one who has advanced any argument to sustain the rule, and that all the rest have merely demanded their pound of flesh. Mr. Wade is certainly the only one who has attempted to advance any argument against it. Isn't it rather egotistical for him to say, that no one has advanced any argument, merely because he takes an opposite view? He brings forcibly to mind the old saying "A man convinced against his will, is of the same opinion still." The arguments advanced to sustain the rule are the same that have sustained it from its incipiency. Now that the Hulton Sage has passed upon these arguments, they will undoubtedly be rejected in the future.

I admire Mr. Wade's spirit of fairness, as to when the rule should apply, but cannot admire it in passing upon the arguments advanced to sustain the rule.

To denounce the rule as "Draconian," and the interpretation of it by the majority as "Draconian," seems rather severe. Strange, is it not, that this rule, being so severe, has stood so long, become "hoary with age" and commanded respect on account of its "gray hairs?" He has undoubtedly advanced some arguments to sustain his position, but does it not occur to your readers that he relies principally upon "If," written with as large letters as you like? He writes, "IF the account given in FOREST AND STREAM is correct, and to that is added the fact that Mr. Edmonds was in a proper position, he clearly cannot be punished for the fault of a dog who was contesting with his." How can he assume that Mr. Edmonds was in a propor position? Can any one familiar with coursing conceive it? By what right may an owner be so close as to be in the way of an opponent's dog? I presume that he will argue, that the dog was in the way of the owner of the opposing hound. One can imagine almost any kind of a hypothetical case as having taken place, but not such a one as Mr. Wade suggests above.

In your issue Jan. 28, he informs us that the rules visit no penalty on an owner of a hound on account of the contesting hound running into him. Why should there be any such rule? Would an occasion ever arise to which it could justly be applied? If the owner is in his proper position, the hound cannot run into him. To suppose such a case, he must have the coursing take place in the midst of a crowd of people, the hare running between and around them; the hound following, dodging and running around the people, in order to reach the hare. And then, if the hound should run into the owner of the opposing hound, he shall be penalized. Is it not absurd on the face of it? I have always, in my limited experience in coursing, understood, that the hare and hounds have the right of way and are entitled to a clear field; that the owners might follow close after, but not so close as to interfere with them in any way. If one knows so little about coursing as not to be able to keep out of the way of the hounds, I would most heartily indorse Mr. Wade's suggestion, that such party be compelled to see his hound compete against another from a "captive balloon," lest the penalty imposed by Rule 30 be visited upon him. Does not Mr. Wade display his knowledge of coursing by offering such a suggestion? How strange some one has not been called upon to use a balloon long ere this, to avoid the rule, that has grown so hoary with age and which commands so much respect on account of its gray hairs?

In what way can the rule, strictly enforced, work any hardship at any time? Does it not impose the penalty upon the party at fault? Or would he have the innocent party suffer for the act of the opponent, even though that act be unintentional? Would that be equitable?

Again he writes, "If the rule is to be broadly interpreted and an inquiry permitted into all the circumstances, then it might very properly attach to a hound colliding with the horse, and an inquiry whether the collision was the fault of rider or hound. But it must not be forgotten that the contention is that the interpretation of Shylock [Wade's synonym for "mandatory"] must be given to this rule, and if this is the case, most unquestionably it cannot be widened at pleasure." No one contends that it should be widened at pleasure, nor would an inquiry as to whether it was a collision, or riding over, be widening it at pleasure. If it was a collision the rule would apply, because the rider is clearly out of place and therefore the fault must be put upon him. When a brace of hounds are coursing a hare, on ground over which, from the nature of the sport, they have the right of way, and the owner of one of them, riding at full speed, on such ground, where he is clearly out of place, collides with his opponent's hound, the fault must be put upon the rider and not on the hound. Would Mr. Wade inquire as to whether the hound ran into the horse or whether the horse ran over the hound? And if, after such inquiry, he ascertained that the hound ran into the horse, what dispo

sition would he make of the case? Basing his decision on his past articles, he would undoubtedly decide that the owner of the hound would have to suffer for the act of his opponent, because he was unintentionally out of place. Rather hard on the innocent party, is it not?

He takes every opportunity to call the rule "Draconian" and the almost universal construction "Draconian." Is not his denouncement of such construction the more "Draconian?" His statement, that those who uphold the rule, merely demand their pound of flesh and that they insist upon the interpretation of Shylock is in my opinion rather far fetched. However, if Shylock is a synonym for mandatory, we will insist upon such a construction. "I thank thee, Jew, for teaching me that word."

Give us argument, Mr. Wade, and not mere statements. If the rule is too severe, point out to us in what way it is so. There is an old saying that "the best and quickest way to repeal a repulsive law is to enforce it;" but if Mr. Wade is right in his denunciation of this rule, it cannot be applicable to this case. When a rule is violated, the penalty provided by such rule ought to be imposed rather than that we should try and find some reason why it should be violated.

Mr. Wade informs us that the final decision of the American Coursing Club *in re* Pearl of Pekin vs. Chicopee Lass, can be of interest to but very few. That is just as true as is the fact that Mr. Wade's or the writer's opinion of Rule 30 is of interest to even a much smaller number.

L. F. BARTELS.

DENVER, Colo., Feb 4.

Editor Forest and Stream:

The difference between Mr. Wade's views concerning the much-discussed coursing rule, and mine, seems to originate chiefly in our definitions of "riding over." Mr. Wade apparently considers riding over as confined to the act of overtaking and colliding with a hound. I call a ride over, a ride over, whether the result of wilfulness, carelessness, or overeagerness of the rider, or his failure to keep out of the way of the hound. I think my view right. When two vessels collide at sea, we say the one inflicting the damage runs the other down, regardless of the question of who was to blame. If a "run-down" is a run-down, why isn't a "ride-over" a ride-over?

The reason a hound colliding with a horseman is not mentioned in the rules, is, in my opinion, because the hound cannot hurt the horseman, and the latter has no business in his way. The hound makes the sport, and should be protected by the rules from outside interference. This, the rule in question, if literally interpreted, will do.

We do not construe "running into" as "riding over;" we do claim that riding over is the result of running into.

We don't have to draw any line; the rule draws a good, plain one. Mr. Wade's hypothetical case of punishing a dog for barking at a man, under a rule penalizing for a bite, is not parallel, inasmuch as in the supposed case the dog does not touch the man; but in the case under consideration, the man does literally ride over the dog.

That a collision on a course seldom occurs, is good enough proof that it is easy to avoid; and when it does, it is the result of some one of the qualities mentioned earlier in this letter, which it is not the function of coursing rules to foster or encourage. The man who cannot see a course without getting so far into the thick of it that he endangers the dogs, reminds me of thousands of others, who act as if a seat on the bass-trumpet were an essential to the hearing of the music of a brass band.

I write this in no spirit of antagonism to Mr. Wade. His letters have impressed me as those of a man who stands fearlessly up for the right, as he sees it; and who, when espousing the cause of the under dog, considers not the size of the one on top. That is the kind of man I like.

That two men, with no personal interest in the issue and equally friendly to fair play, should hold diametrically opposite views on a question like this, is the strongest possible plea for rules that will bear literal construction. It is a poor law, or rule, that will not.

L. I. FLOWER.

MCDONALD'S CORNER, N. B.

FOX-TERRIER TERROR FIZZ.

Editor Forest and Stream:

It is perhaps somewhat late in the day to congratulate you on the enlarged edition of your paper, but my good wishes for your success are none the less sincere. I have noticed that some lament the time honored green cover, and doubtless the eye did at first miss its familiar tint, but I think most readers will agree with me that both in appearance and quality, the enlarged FOREST AND STREAM cannot be excelled. I am a fairly old reader, if not an old subscriber, to the paper, having read it for some eight years, and now that it is better than ever, I hope to be spared yet a little while to enjoy it. Am I not indebted to its pages for many a pleasand hour? and was it not through the medium of its advertising columns that I became the possessor of a fox-terrier, which is at once the joy of my life and the desolation of my pocketbook? That dog was described in the catalogue as being a thorough workman, and I must confess the meaning of the term for a long time puzzled me. In my innocence of heart I immagined such a phrase referred to rats, cats, rabbits etc., but such I found was not the case. Rats he knew not, and with cats he exemplified the millenium when the lion shall lie down with the lamb (outside). Perhaps thought I, he has been trained on "Psoovies" in a ten acre field. I will write to the breeder some day and find out. But one afternoon a friend of mine left his bitch in my room, and when we returned the question was solved. The bed quilt resembled a sieve, the table cloth was a wreck; holes had been dug in the carpet, two pair of trowsers were damaged beyond regain, and many small articles such as gloves, slippers etc., had gone the way of all flesh. But the thoroughness of his workmanship was more particularly emphasized in the case of a fine horsehair sofa: of this little remained save the woodwork. Horsehair was scattered all over the room, and smuggled in a large heap in front of the fire lay Mr. Fizz, a smile of conscious rectitude brightening his features.

Truly it never rains but it pours, for the very next day the house cat, taking advantage of his good nature, dealt him a felon stroke on the back of his head. In two minutes Thomas was a grisly corpse. That uncalled for blow was like the spark to a powder magazine. It so completely soured a once amiable temper, that since then he has waged deadly war on cats and pets of all sorts to such a degree that the old maids of the neighborhood have risen in a body and called him accussed. 'T'was only a few weeks ago that my servant came to me with a long face and said. "Av ye plaze, sor, the dogs been after bitin' the head off Mrs. Carther's (my landlady) gander, and it's $5 she says wont buy the likes of him." "Not as far as I am concerned" I answered, "but why did you let him get into her garden?

"Sure its her own fault entoirely. Bedad, says she, 'oi'll put the little baste in with the ould gander, and its mighty little foightin' there'll be left in him, I tell ye, says she. He'll chase my cats will he." "Mrs. Carther, says I, it's roast goose and tough at that ye'll be afther havin' for Sunday's dinner. And roast goose it was.

H. CASEY.

All communications must reach us by Tuesday of the week they are to be published; and should be sent as much earlier as may be convenient.

POINTS AND FLUSHES.

THERE is no limit apparently to the causes which produce a fatal ending to the life of a dog. Some are exceedingly novel and rare, but few exceed in either respect the following account of a violent death, which appeared in an issue of the Chicago *Herald* of recent date. It reads as follows:

"ST. MARY'S, O., March 12.—Charles Barber, who lives near this city, lost a valuable hound in a remarkable manner this morning. Mrs. Barber had cut a lot of biscuits out of dough and placed them near the stove to rise. Her household duties called her away, and when she returned she found the dog had eaten the biscuits. The miserable canine was terribly bloated, and Mrs. Barber tried to relieve him, but the leaven in the biscuit dough was getting in its deadly work. Within less than half an hour the hound became too big for his hide, an explosion followed and the dog was torn to pieces."

The effects of the diet appear to be heartrending, yet I am constrained to believe that the dog was a newcomer to that locality; for any dog to the manor born would not have shown any annoyance at a diet of that kind, much less then would he show such thin-skinned sensitiveness to a vegetable diet. Any well-ordered dog, in Chicago, particularly one which has had a Western boarding-house experience, would have grown fat and frisky on such food, one which is not at all uncommon in this city to the dog's best friend, the man.

The season for arranging for a setter's or pointer's education is now approaching; and later in May or June, is the time when the dogs are usually put in the trainers' charge. Owners can assist a great deal in giving their dogs a good start in training by plenty of exercise and good food; in short, by sending their dogs strong and healthy to the trainer. If this is not done, it is work which the trainer has to do; and its absence may set the dog's training back in a great measure for some weeks. If the dog is excessively fat, he is usually thick in wind and easily fatigued. He suffers so much bodily discomfort on the slightest exertion that his lessons are disagreeable, and he takes no interest in them. When so out of condition, becomes overheated and tired when taking lessons. If he is thin in flesh and weak, he is quite as unfit to receive lessons which are always tiresome and disagreeable to him. For training purposes and work, a dog can not be too well prepared physically.

In respect to the qualifications of kennel editors, a full vocabulary and an inexhaustible power in its use are essential in the transitional stages of doggy matters which exist at present, but some ideas which come from across the pond are a little lumpy and jerky. For instance, the following, from the *Stock Keeper* (Eng.), is a good illustration:

* * * "Fullerton certainly proved to the spectators that he possesses a full modicum of grit," etc. "Full modicum" is an unusually happy phrase; at least, it sounds well, even if it means nothing.

There is no end to the interest of man in the welfare and merit of the dog; this interest only needs opportunity to develope. Any one who has had the pleasure of "talking dog" at a few bench shows will concede this without reservation. A man may be tongue-tied, or incapable of talking on every-day matters, but once let him get interested in dogs and he has a multiplicity of ideas and fluency of language which are inexplicable and admirable. Nothing could illustrate this better than a circumstance which occurred at New Albany during the late field trials held at that place. The hotel is built in a cheap manner, the inner partitions being light boarding (some guests made the same complaint of the food), consequently the acoustic properties of the hotel are unusually good or bad. Beside the guests who were in attendance at the field trials there were a number who were not interested in dogs and were entirely without knowledge of dogmen and their fluency of speech. One of the strangers had the good fortune to occupy a room next to two enthusiastic dogmen. He heard voices engaged in earnest conversa- the whole night long, but he could not distinguish the words —voices which would grow earnest or pathetic betimes and then sink into the ordinary pitch of conversation. He bore the annoyance patiently during the entire night, for he thought they were two long-lost brothers who had been separated forty years and who had met for the first time on that night since their separation. The next night there was no falling off in the conversation nor abatement in its time. They talked all night again. The sufferer made some inquiry the next morning. It was not a tenable theory that two long-lost brothers would talk two whole nights in succession. He soon learned that it was not an uncommon occurrence—it was simply two men "talking dog."

The Southern Field Trial Club is considering the advisability of adding a pointer stake to its trials. If they decide to do so, it would tend greatly to increase the interest in the breed in that section, and there would be more effort to bring pointers to the front. If some such measure is not adopted, the setter will drive his short-haired rival entirely out of the field in the South, the stronghold of the pointer.

B. WATERS.

KENTUCKY FIELD TRIAL GROUNDS.

LOUISVILLE, Ky.—*Editor Forest and Stream:* For some time past there has been a quiet movement on foot among some of the local lovers of the hunting dog, to induce the United States Field Trial Club, which is now looking for a new place to locate, to come to Kentucky and hold their annual trials at some point in this State in the future. The first thing to be done was to find a suitable tract of land to be held as a reserve to hold the trials on, lying near some point on a railroad, that is not only easy of access from any part of the country, but where also good and sufficient accommodations, such as board, riding horses and conveyances, can be had for the several hundred visitors who yearly attend the trials from all over the United States and Canada. To find such a place having all the necessary requirements, was no small undertaking, as can be easily seen, but the gentlemen who had taken hold of the matter, being of that well known old Kentucky stock of gentlemen sportsmen and devotees of every branch of amusements in the field, were nothing daunted and determined to succeed, feeling that the time had arrived when highly prized hunting grounds of the Indian in past years should now become the home of a field trial club, and that among some of the many ideal hunting grounds to be found within its borders, a place should be secured to hold trials on in the future.

After looking to the advantages offered by several different points where preserves could be secured, Elizabethtown was finally decided upon, as being the most suitable in every respect. Lying on two of the leading Southern railroad systems, it is very accessible from all points north, south, east and west, and possesses all the necessary facilities in the way of accommodations, etc. The next question was what lands could be secured as a reserve and were the owners in favor of holding the trials there. At this point Mr. James Montgomery, of Elizabethtown, stepped forward and kindly offered his services, which were gladly accepted by the local gentlemen, and how well he succeeded may be inferred from the fact that at a meeting of the gentlemen owning the lands, that was held in his office a few days ago, he was not only instructed to write offering the use of their farms, which cover a tract of land comprising over 40,000 acres, as a reserve, but all present promised to do all in their power to make any club that would locate at Elizabethtown a thorough success. This offer coming from a body of wealthy Kentucky gentlemen, landowners and sportsmen as it does, means a great deal.

An invitation has been sent to the United States Club's committee on grounds to come to Louisville and go down with a party of gentlemen from this city to inspect the above reserves, and a reply was received from Mr. P. T. Madison, of Indianapolis, one of the committee, saying they would accept the invitation, although at present it was impossible to appoint a time for their visit, but they would come down at as early a date as possible.

While among those gentlemen who have become interested in this movement it is hoped that the United States Club will locate at Elizabethtown, yet should that club fail in the end to come to Kentucky, it has been decided to organize and start a new club on a broad and liberal basis that will hold its inaugural trial on the Elizabethtown reserves next fall, so whether the United States Club comes to Kentucky or not, hereafter field trial meetings will be annually held in this State that will be second to none, if good accommodations, good grounds, liberal purses and good fellowship can make it a thorough success in every way.

J. B. ALEXANDER.

LOUISVILLE, Ky., March 12.

A SERIOUS CHARGE.

Editor Forest and Stream:

At the Chicago bench show of 1891 my dog won second in the open and puppy classes, and when competing for the Great Dane or German Mastiff Club's special prizes, Mr. Fox, the president, and Mr. Hagans, the secretary, sent in to compete against me a dog belonging to Mr. Thos. Dennehy, who at that time was not a member of the Great Dane or German Mastiff Club of America, and the club's specials were awarded to him. I thereupon entered a protest with the Mascoutah Kennel Club and with the Great Dane or German Mastiff Club. A meeting was called for Friday night, the 11th of April, at which meeting the president, Mr. Fox, made a motion that Mr. Dennehy be elected to membership, and that his membership begin the previous meeting, which was held on Feb. 4 preceding, and at which there were but five members, which was no quorum, and which meeting ante-dated Mr. Dennehy's application for membership; in other words, he was elected before he had made application at a meeting which had no quorum. Under the constitution of the Great Dane Club seven members are required to constitute a quorum.

I attended this meeting myself, and entered my protest to the club against allowing Mr. Dennehy to compete when he was not a member; but the chairman, Mr. Fox, overruled everything I said and fixed Mr. Dennehy's election as aforementioned. Mr. Dennehy was thus paid $30 in prizes which he was not entitled to. I would ask any fair-minded man if this is a square deal? I was one of the organizers of the Great Dane Club and did all in my power for its success, and was always one of the first to contribute my share toward the specials given by the Great Dane Club and was elected one of the directors for three years, but I resigned at the meeting of April 11. If necessary, I can make affidavit to the above facts. I was invited during the show of this year to join the club, but refused to do so. The foregoing are my reasons for declining. This action of the club was the cause of a number of others remaining out of the club; in fact, I had five applications to present for membership which the makers withdrew on account of the foregoing illegal acts.

JOSEPH ZILLIGEN.

CHICAGO, Ill., Feb. 15.

JUDGING AND HANDLERS.

Editor Forest and Stream:

With much pleasure I note the improvements that have been lately made in your valuable journal, both in regard to contents as well as general make up. What the sportsmen need in this country, and that very badly, is a journal that has for its motto, "Favors to none, equal rights to all;" and in the FOREST AND STREAM we have the one. Among others, I heartily indorse what your Mr. B. Waters says in the issue of Feb. 25 in regard to an abuse which is rapidly becoming an evil—the artificial and sometimes silly posing practiced by some handlers.

Mr. Waters strikes the nail on the head with his remarks, and every lover of the dog will support his sentiment and try to have this evil abolished. But there is another evil which should be remedied, and that is, the professional handler as well as the owner being in the ring while the dogs are judged. According to my idea, all dogs to be judged should be brought into the ring by the regularly engaged and uniformed attendants. This will give everybody who owns a good dog a fair chance; it will not happen very often that the man is judged instead of the dog, as it is now and then the case; every one stands the same show. By having the dogs brought into the ring by the regularly appointed attendants, it will in the future not occur so often that a dog is placed, as it is now sometimes the case, for the simple reason the judge has no idea who owns the dog. We all know that it is natural with everybody, when we come to a critical point, to lean toward our friends. Defects, if they are not too big, will be overlooked, even if the judge intends to do his beast, as soon as he knows who the owner is. With the attendants leading the dogs, the judge is at a loss to know who owns the dog; the best will win. The letters of commendation, which are now given by some judges so freely, especially when the dog is entered for the first time and owned by a large kennel as exhibitor, will fall off, and many a dog will be relegated to the rear, where he really belongs.

With the above enforced I admit that the entries will decrease; but is it not the quality instead of quantity we are looking after? Dogs which are now brought to the show and through the kind-hearted judge receive a place on account of their ownership, which they really do not deserve, will be left at home as soon as their owners know that th , won't "get there."

A. A. BOGEN.

NEW ULM, Minn.

KANSAS.

Editor Forest and Stream:

Kansas has her blizzards and there are more States that experience a similar discomfiture.

Four days in the week are warm. I am too close to the Indian Territory to call it "Indian summer," so will name it Florida weather. There are many residents of your city that would like to inhale its pure air winter and summer—what long breaths they would take! It knocks the bottom out of the great Atlantic and its pleasure in ball rooms at the fashionable watering places, and where the dude's idea of shooting is gained at the shooting galleries. At the same time, in justice to the dudes that go out beautifully dressed with their $300 and $400 guns, I must say that many are good shots and can kill their birds as readily as a market hunter, and some are old friends of mine. When we go out for a hunt down this way if a man has a good pair of overhauls and a canvas jacket with even a muzzleloader he is happy. They know what a gun and dog are meant for, and the quail that gets up before most of them can safely be called "Dennis" and lands in the frying-pan eventually. Clever people they are here. Lovers of dogs and gun; use both at every chance, and neglect their business to have field pleasures. Birds are as thick as the hair on a man's head; rabbits, both cottontail and jack, too numerous to mention; deer, coyotes, wolves and other "varmints" enough can be found in the Indian Territory (only two and a half miles from here) to satiate any sportsman's sanguinary appetite. Come down here, "Dog Chat," and I will prove it. There is considerable being published about the Irish setter

just now that involves the interests of all lovers of the breed. You thought enough of them to attend the trials, and I guess you had lots of fun down there—if one can correctly judge from the reports. I wish I could have shared it with you.

In the grand collection of dogs that ran in each stake it looks as if all should have won, but the peach or peaches were pulled down by the lucky ones. What luck there is in a field trial! The "bye" dog seems to have all the best of it in many of the trials, as the reports show. Why is it? While I have heard a great deal about field trials and read more, it strikes me as being singular. At any rate the trials are established on a firm and solid basis, and a good beginning will not make a bad ending in this case.

You accused me of changing my mind "Dog Chat." I don't regret it at all. The little Irish lady brought back enough money to pay expenses, and why the dog did not do better I saw when he returned from High Point. No apologies for either, none at all for the work they did.

Please permit me to state that imported Finglas is a private stud dog, and that Sarsfield and self parted company months ago.

We want all the boys to start their dogs in the trials, as well as the large kennel owners; the more entries we have the merrier the sport will be. It is the expectation of many that the "round up" of reds will be in Ohio.

We are having too much field fun to attend bench shows this year. E. B. BISHOP.

COFFEYVILLE, Kan.

RABIES OR WHAT?

Editor Forest and Stream:

Until a few weeks ago my kennel consisted of two setter dogs, five beagle hounds and one Newfoundland dog. On Jan. 14 a stray pointer dog came to my house and had a fight with nearly every one of the beagle pups; the dog did not seem to be rabid but manifested an unusual disposition to fight. I did not molest him further than to have him driven off, which was done without difficulty. On Feb. 10 one of the beagle dogs became very cross toward the others and had many fights, some of them with dogs that had heretofore mastered him; his disposition to fight increased until the night of Feb. 11, when he disappeared from my premises. On the morning of Feb. 12 he was shot for a mad dog five miles from home. The dog was perfectly obedient to me up to the time he left home and ate a hearty supper the night he left. On being notified that my dog had been killed, I confined all the rest of my dogs in comfortable quarters except a little beagle bitch, which to the best of my knowledge and belief had not been bitten at any time. On Feb. 22 she became restless, had a slight cough, with high fever, and on Feb. 24 was entirely crazy, so much so as to jump through a glass window to the room in which she was confined, after tearing up a broom which was in the room and nearly gnawing in two the window frame. She had been in the habit of sleeping in this room all her life. Her brain and spine seemed to be the seat of trouble. She had become, in a short time, almost entirely paralyzed in the hindlegs, and as her case seemed hopeless and she was suffering greatly, as dearly as I loved her, I had her shot. She at no time showed a disposition to bite and was entirely obedient to me to the last. I still have all the rest of my dogs in confinement, where they have been for the last fifteen days, and all of them are perfectly well and hearty so far. Now can you tell me what this disease is, how long I will probably have to keep my dogs confined and what will probably be the final result, and if I can do anything for them? This trouble with the dogs is widespread over the State and many scores of them have been killed in consequence. I have heard of a good many instances recently where domestic stock of different kinds have gone mad after being bitten by dogs and have had to be killed. Can it be the grip that has attacked the dogs? L. S. PENDLETON.

FREDERICKSHALL, Louisa County, Va.

DOG CHAT.

IT is a pity the Pittsburgh people do not possess a building well adapted for a dog show. There is another building, Machinery Hall, in which a hundred dogs could be benched, but there is no facility for heating it and so the idea of having the show there had to be abandoned. The arrangement of the benches, however, in the old Auditorium was much better than last year, the aisles were shorter and so the great crowds could get about much better. The judging being done on the stage allowed the spectators a good view of the proceedings. We might here remark that, as was the case last year, too many people were allowed upon the stage during judging as the space is none too much with clear decks. The light is very poor in this hall and Mr. Davidson's ring was worse than the other.

The catalogue was well arranged although there were a good many provoking typographical errors in the names of dogs, showing that some one with a good knowledge of the principal dogs' names should have the task of revising it. There was some delay in the issue of the catalogues on Tuesday morning but this was fully atoned for by having marked catalogues out on Thursday afternoon in which the awards and even the specials were marked with very few mistakes.

Messrs. Boggs, Littel, the Denny brothers, John Moorehead, Jr., and J. H. Lyle were particularly noticeable in the management of the show; the two first named literally "labored" hard for the show, and we must thank them for their courtesy during our pleasant visit to the Smoky City. Under the veteran John Read's superintendence the aisles and stalls were kept as clean as could be expected with such a dirty and altogether ramshackle sort of a building.

There was nothing occurred to mar the pleasures of the show, if we may except that Tom Blake felt somewhat sore over the fact of his Gordon setter Buck being allowed by the doorman to get out of the building the first day, and though a reward was offered the dog was not forthcoming till next day. The judging of the open dog class was delayed till Wednesday morning, and it is said that as soon as the handlers of the opposing dogs heard Buck was on his way to the hall they kicked against any further delay and demanded that the dogs be judged, and this was done. Mr. Blake appealed afterward to the committee, but nothing came of it and the dog was marked absent. As far as we can learn, it was the fault of the doorkeeper that the dog got away, so it seems as if Mr. Wittington's, the dog's owner, rights should have been protected to the full extent. Buck won first at Jackson 1891 and 1892.

The Pittsburgh club is noted for its generosity and feeling for visiting dogmen, as evinced by their kind conduct in the case of the death of the handler last year. Mr. Goodman's good nature rather led him into trouble this time. It seems an attendant (drunk) had been ordered out of the show, and as he was passing out of the door he fell and Harry Goodman helped him to his feet; an officious policeman thinking there was some sort of a shindy arrested both of them. Despite protestations Mr. Goodman had to give bail, but the club stood sponsor, and sooner than Mr. Goodman should be delayed returning home that night they put up the money, willing to lose it rather than Goodman should incur any further unpleasantness. Such acts as these endear the men of the Pittsburgh committee to their fellow fanciers.

Several important sales took place at the show. Mr. E. H. Morris sold his greyhound bitch Lady Clare to Mr. A. W. Purbeck, and the noted poodle Dexter being part of the deal, will now be shown at Boston under Mr. Morris's name.

Messrs. Dole and Thomas joined forces in claiming that nice little cocker bitch Woodstock Daisy at catalogue price, $100.

Mr. McKnight purchased the well known fox-terrier bitch ch. Village Belle, by Volo out of Beauty, from the Oxford Kennels. Besides being a noted winner she is now celebrated as the dam of Veni and great grand dam of Vesuvienne and Venio. She is showing in whelp to Rifleman.

During the show Mr. Parker's, Waynesburgh, Pa., Irish setter bitch Red Rose was bred to Oak Grove Kennels' good dog Duke Elcho. Red Rose is noted as the dam of Kildare, Seminole and Beau Brummell, so that her owner expects to have something good as a result.

It is not given to every one to breed such a promising bulldog puppy as Nobby Twist, the Chicago puppy winner, and Messrs. Woodward and Mariner are to be sympathized with. After the show he was sent to Harry Goodman's kennels, but had already contracted a cold, which settling on his lungs, carried him off.

Somebody, a stranger of course, asked the only Kirby what business he was in. "The Silver Question," he answered quick enough.

A meeting of a committee of councils was held in Boston once to devise the usual stupid measures that crop up during a hydrophobia scare. One prominent citizen testified that "Three times dogs had jumped over my garden wall and chased me into my own house." The pungent comment of the Boston *Herald* was "We always knew the dog was a very sagacious animal!"

In sending the awards from Pittsburgh last week we stated that Breeze Gladstone was vhc. in the open class. Breeze, his owner tells us, was not present, and the mistake no doub arose from his dog Benzine being wrongly entered in the challenge class and afterward transferred. Breeze Gladstone's number had vhc. opposite it in the steward's book, at any rate, when we took the awards.

Mr. Symonds writes us that the new pointer bitch Ruby VII., who has cost a little sum in entry fees which she has allowed to pass, arrived at last in good condition at Boston on Thursday last by S.S. Lake Nepigan. She appears to be in whelp to Mr. Geo. Raper's noted dog Naso of Strasburg, so her produce will be valuable. The bitch has won 60 firsts and 30 seconds in England, the seconds being chiefly to the noted Barton Don. Devon Bangor has been amiss, but will be all right for Boston show. He was too well fed on the boat coming over and is now paying the penalty. Mr. Symonds will soon have to build new kennels. They have about fifty dogs at the kennels now and those "George" brings home from Pittsburgh will crack the roof. Several bitches are whelping, so there are busy times in the Salem Kennels nowadays, and Mr. Symonds appreciates the fact that the world do move.

Mr. Jos. H. Hunter's noted pointer Black Wonder having had his little diversion at Washington show, has now been shipped to his home at Sanborn, Ind., where he will stand till the field trial season.

The Leamington (Ont.) Pointer Kennel has bred the following bitches: Duchess Graphic (20234), litter sister to Count Graphic, winner of first and special, Cleveland, 1891, and first, Chicago, 1892, to Beppo III., full brother in blood to the great King of Kent and sire of champion Tribulation and Tempest; Lillie Lansdowne was bred to Lord Graphic, sire of Promotion, the absolute winner of the Central Derby, 1891, and Count Graphic, winner of first and special, Cleveland, 1891, and first, Chicago, 1892. The issue of these two bitches, bred as they are, should be of great improvement to the pointers of Canada.

The Toronto Kennel Club held its second annual meeting at Richmond Hall March 17, there being a good attendance present. The reports for the past year showed that this young organization was surely and slowly progressing in its work. These officers were elected for the ensuing year: President, J. B. Sweetman; First Vice-President, R. C. Forshaw; Second Vice-President, F. H. Elmore; Secretary, H. B. Donovan; Treasurer, H. J. Hill; Surgeon, Dr. Campbell; Executive Committee—J. Smellie, P. J. Keating, H. B. Donovan, H. Howard, T. J. Fitzsimmons, F. Stuart. The treasury showed a balance of $98 on hand. The retiring president of the club, Mr. R. W. Boyle, was presented with a meerschaum pipe by the members.

Mr. Herbert J. Watson has started a peculiar case in the National Coursing Club (Eng.). Mr. Watson purchased Drytime in England and afterward sent her back to be served by Burnaby, and she whelped in America. At a recent meeting of the National Coursing Club (Eng.) he wished to know if her produce could be registered in their Stud Book. After some discussion their reply was that they could be registered on being brought back to England.

Several men are hankering to pay a visit to the Pacific slope, and some who can command good teams are negotiating to have the California Kennel Club help bear the expenses of the trip.

A meeting of the National Greyhound Club was held on the 14th and the following officers elected: N. Q. Pope, President; L. C. White, First Vice-President; H. W. Huntington, Secretary; C. F. R. Drake, Treasurer. A bench show committee was appointed to make arrangements for a show in Brooklyn in October, 1892, Messrs. George Shepard Page, Chairman, H. W. Huntington, C. F. R. Drake, H. Osborn and J. H. Watson.

A quarterly meeting of the National Beagle Club will be held at 266 Washington street, Boston, Mass., April 1, at 7 P. M.

Mr. L. C. Whiton's greyhound bitch champion Spinaway that is to visit Fullerton, arrived all safe on the other side. In writing to a friend over here Mr. Douglas, who has her in charge, says "she is much admired and is a grand bitch." This should be some little satisfaction to Mr. Whiton, particularly as it is said she has not come in season as soon as expected. This may be another instance of the delaying effect of a sea voyage.

The English *Fanciers' Gazette* makes this kind comment on the New York Dog Show Extra: "Other features of the show are referred to in another column. Our American contemporaries have done their best to cope with the undertaking, and of them, FOREST AND STREAM, in a 'Dog Show Extra,' published on the last day of the show, gives a very good account of it. The issue is profusely illustrated with portraits of the judges, and of some of the most noted winning dogs. The letterpress is supplied by Messrs. H. W. Lacy and G. Raper (and we should add B. Waters), and forms a fair and thoroughly readable critique. Mr. Lacy's in particular is a most exhaustive and carefully compiled contribution. Altogether, FOREST AND STREAM has rather stolen a march on its contemporaries at this time, and by getting up this 'Extra,' at what must have been considerable labor and expense, has placed its readers under a deep obligation."

All dogmen, and especially beagle breeders, will sympathize with Mr. F. W. Chapman, the president of the N. B. C., in the loss sustained through the burning of his kennels, in which several dogs were destroyed. The fire arose from an oil stove in the kennels, always a risky article anywhere. The dogs which met death in this agonizing manner were Countess Juno, a bitch belonging to a Mr. Ogler, of Cleveland, O., that was waiting to visit champion Bannerman; Cora, dam of champion Royal Krueger; Glenrose Mollie, by Tenor out of Skip, a half sister to Tone; and of more consequence than all, the noted field bitch Tone, due to whelp to Frank Forest in a few days.

The coyote chase at Greensburgh, Pa., on Mr. Hacke's farm, was a sorry exhibition, and hardly carried out in a sportsmanlike manner. Mr. Hacke owned his farm, the hounds and the coyotes, therefore the question naturally arises why all the publicity was given to the affair so that an unmanageable crowd was a direct result. True sportsmen shun a crowd and the whole affair is in keeping with the way it was carried out. The only redeeming feature was that the three-legged coyote was left in peace.

Just as we go to press comes this word from Rochester: "The kennel club in this city are bestirring themselves with the idea of holding a show following Boston or a week later. This is to be decided at once, and all minor arrangements are being made. It is proposed to enlarge the kennel interests by forming an associate membership which shall be liable only for annual dues; also to follow Philadelphia by having local classes. Look out for the dates and send us entries.—O. S. BEE."

Among the new kennel advertisements we notice this week that Henry N. Howell has a field broken pointer for sale; Hercules Kennels, Great Dane pups; L. Daniels, St. Bernard pups; Glenmore Kennels, Irish setters; J. M. Kelly, two English setter dogs. We also draw particular attention to the sale of Mr. Sears' (Wyoming) Kennels) St. Bernards. This is an opportunity seldom offered for breeders to secure some of the very best specimens of the breed, and one, Sir Bedivere, that stands at the top of the list. In the stud, Gordon setters, Beaumont and Heather York; Donald McVicar draws attention to his boarding kennel.

The English Setter Club will have a dinner at Hotel Boylston, Boston, April 6, at 8 P. M. Members and all sportsmen should order tickets at once so that proper arrangements can be made. Write to Wilson Fiske, 102 Chambers street, New York, for tickets.

NEW YORK SHOW.—Philadelphia, Pa.—*Editor Forest and Stream:* Mr. Raper, in answer to my comments on his awards in the challenge class and special for toy spaniels at New York show, says that "Neither Nank-i-Poo nor any other of the Japanese variety competed for this special." Why did they not? They were all eligible to do so, just as much as Nank-i-Poo had to compete for the challenge prize against Milwaukee Charlie. The two prizes were given on exactly the same conditions and they should have gone to the same dog, provided there was not a better one in the open classes. Even the owners of the Japanese variety could not have withdrawn their dogs from competing for this special without they had complied with the A. K. C. Rule XXI., by stating on their entry blank, "Will not compete for special prizes." Mr. Comstock, the owner of Nank-i-Poo, did not so specify on his entry blank; on the contrary he wished the dog to compete for any prize to which he was eligible. Mr. Raper in his letter says, "I took advantage of my visit to Philadelphia show to examine the pugs exhibited there and was disappointed in not seeing a more representative group." Why should he have made this remark? Was it because he did not judge them? Why did he not make a similar remark of those at the New York show? for those at Philadelphia were the better group of the two, according to his own judging, for at Pittsburgh he placed the Philadelphia dogs over every first prize winner at the New York show except one. His description of the head of Tip Top puts me in mind of that in the pug standard he sold to the *American Field*, and over his own signature he says, "Head should be proportionately large and square, the skull large and round." I would like to ask, what is the line of demarkation between the head and skull? Mr. Raper cannot use these names as synonyms, for he says one is round and the other square. Mr. Raper is mistaken when he says I judged the Yorkshire terriers at Philadelphia.—M. H. CRYER.

MILLERTON, N. Y.—*Editor Forest and Stream:* Your report of the dog show in New York does me some injustice. My dog Sport was shown in the pointer open class and was the only dog marked on the board as vhc. Your report says but one, Tory White, received vhc. Now, my dog is only a pup, but I do not think you can produce a better as a field dog. There was no attempt made to put him in condition for a bench show. He is half brother to Lad of Kent, by Volton—Reni. You will please do me the favor to correct your statement, and if your reporter will come to my kennel I will show him my dogs, also my vhc. from the W. K. C. and his sister, third, W. C. K., another sister first at two shows.—D. S. CHAPMAN.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

KRANK.—1. Why is it that so many dogs are called champions? 2. Why is it that in some pedigrees some of the sires and dams are numbered and others are not? If it is because they are registered, how is a buyer to know that those that are not numbered are all right? 3. Can you give me the address of Rev. R. O'Callaghan? Ans. 1. The title is rather too indiscriminately used. No dog is entitled to the title of champion unless it has won three first prizes in the challenge class, and to compete in the challenge class a dog must win four first prizes in the open class. 2. In pedigrees when a dog is numbered it denotes its number in the Stud Book. You must take the unnumbered ones for granted unless you can prove by inquiry of breeders or owners that the pedigree is incorrect. Many of the principal breeds have specialty clubs, and the pedigrees are submitted to them for verification before they are published in the Stud Book, or at any rate are supposed to be. 3 Rev. R. O'Callaghan, Borstal House, Rochester, Kent, England.

C. T. B., New Bedford, Mass.—Give pedigree of Geo. Reed's champion Gordon setter dog Flash, winner both in Boston and New York, in the years 1885 or '86, I think. Ans. Flash (958, Vol. II. A.K.R.), by Crown out of Dell's Cute, by Rosa's Don (Pelhemus's Duke—Bramster's Queen Bess) out of Kirby's Nellie, by Chandler's imported Sailor out of his imported Fannie. Crown, by Brownell's Dash (Doane's Tom—Doane's Chloe) out of Handy's Trix, by Doris's Don out of Rodman's Nellie.

B. D. T.—The dog might be able to do so, but it is not advisable.

INFLUENCE OF PREVIOUS SIRE.—Du Bois, Pa.—*Editor Forest and Stream:* I should like to have the views and experiences of some of your readers on the following: Will the crossing of a thoroughbred bitch with a mongrel dog effect or show the cross in any other than this one litter? If so, how long will it take to run out or is it likely to show itself at any time? I had a setter some years ago which through carelessness had this experience and when she came around again I bred her to a well-bred dog but half her pups were like the first lot. In the fourth litter (I think) her pups were true to color, but in breeding some of them have thrown back. I now have a fine Scotch terrier bitch, given to me by a friend on this account, but I do not feel like wasting time breeding her if no dependence can be placed on her pups.

PUGS AT PHILADELPHIA.—Cincinnati, O.—*Editor Forest and Stream:* Mr. George Raper's card as to pugs at Philadelphia show needs correcting, as it does our good dog Bradford Ruby II. a great injustice. "Rube" was at home earning a stud fee, and was not even entered for that show; therefore, Mr. Raper did not see him. He meant a pug that was there with the same prefix as our Bradford Ruby II.—EBERHART PUG KENNELS.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Edgewood Mark. By V. L. Bassa, New Canaan, Conn., for blue belton English setter dog, whelped Feb. 15, 1892, by Gath's Mark out of Nellie Hunter.

Edgewood Gath, Edgewood Girl and Edgewood Rose. By V. L. Bassa, New Canaan, Conn., for black, white and tan English setters, one dog and two bitches, whelped Feb. 15, 1892, by Gath's Mark out of Nellie Hunter.

Edgewood Rock. By V. L. Bassa, New Canaan, Conn., for chestnut, white and tan English setter dog, whelped Feb. 15, 1892, by Gath's Mark out of Nellie Hunter.

Edgewood Count, Edgewood Nellie and Edgewood Daisy. By V. L. Bassa, New Canaan, Conn., for lemon belton English setters, one dog and two bitches, whelped Feb. 15, 1892, by Gath's Mark out of Nellie Hunter.

Aristos. By Miss Grace Decker, South Orange, N. J., for brindle and white St. Bernard dog, whelped Feb. 10, 1892, by Weiland (Barry—Rohma) out of Blossom (Albert Plinlimmon—Hazel).

Olinto. By Mrs. Couillard, South Orange, N. J., for orange and white St. Bernard dog, whelped Feb. 10, 1892, by Weiland (Barry—Rohma) out of Blossom (Albert Plinlimmon—Hazel).

Rhea. By W. Decker, South Orange, N. J., for orange and white St. Bernard bitch, whelped Feb. 10, 1892, by Weiland (Barry—Rohma) out of Blossom (Albert Plinlimmon—Hazel).

Rose Mack. By Blake & Herbertson, Detroit, Mich., for black and tan terrier bitch, whelped Dec. 1, 1891, by Sir Wallace (Mahomet—Lady) out of Flossie (Prince—Nanoo).

Corktown Count and Corktown Cleo. By Corktown Cocker Kennels, for black cocker spaniel dog and bitch, whelped Dec. 12, 1891, by Tim Obo (Bob Obo—Cleo) out of Dot Smirle (Bob Obo—Touch).

Edgewood Kennels. By V. L. Bassa, New Canaan, Conn., for his kennels of English setters

BRED.

☞ **Prepared Blanks sent free on application.**

Bell Mark—Sir Edward. Warwick Kennels' (Bridgeport, Conn.) English setter bitch Bell Mark (Reverdy—Princess Belton) to their Sir Edward (Belthus—Wonna Gladstone), Jan. 6.

Christina—Warwick Rake. Wm. Scofield's (Bridgeport, Conn.) English setter bitch Christina to Warwick Kennels' Warwick Rake (Gun—Victoria Laverack), Feb. 22.

Bess II.—Sport K. Ringwood Beagle Kennels' (Brockton, Mass.) beagle bitch Bess II. (Bunny—Bessie) to their Sport K., Jan. 7.

Skipp H—Sport K. Ringwood Beagle Kennels' (Brockton, Mass.) beagle bitch Skipp H. (Flute M.—Haida) to their Sport K., Feb. 2.

Bess K.—Sport K. Ringwood Beagle Kennels' (Brockton, Mass.) beagle bitch Bess K. (Hammer's Sport—Flirt) to their Sport K., Feb. 6.

Sunbeam—Blemton Shiner. A. L. Cresswell's (San Francisco, Cal.) fox-terrier bitch Sunbeam (Rustic Royston—Silverdal) to J. B. Martin's Blemton Shiner (Blemton Rubicon—Blemton Brilliant), Feb. 22.

Corktown Chip—Tim Obo. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Corktown Chip (Hector—Jet) to their Tim Obo (Bob Obo—Cleo), Feb. 4.

Corktown Bebe—Tip Obo. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Corktown Bebe (Bounce—Œnone) to their Tim Obo (Bob Obo—Cleo), Feb. 13.

Œnone—Tip Obo. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Œnone (Obo, Jr.—Tough) to their Tip Obo (Bob Obo—Cleo), Feb. 16.

Tough—Tip Obo. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Tough (Wildair—Belle) to their Tip Obo (Bob Obo—Cleo), Feb 21.

Fairy Lois—Pommery Sec. J. Rhoades's (Fishkill, N.Y.) pointer bitch Fairy Lois to W. H. Hyland's champion Pommery Sec (Graphic—Lady Vinnie), Feb. 10.

Fan N.—Pommery Sec. W. H. Hyland's (North Tarrytown, N. Y.) pointer bitch champion Fan N. (Fauster—Corsicana Tobe) to his champion Pommery Sec (Graphic—Lady Vinnie), Feb. 23.

Clio—Fritz. M. W. Reid's (Amsterdam, N. Y.) poodle bitch Clio (—— —Masil) to his Fritz (Styx—Juliet), Feb. 9.

Veno—Black Duck. C. O. Curtis's (Lima, O.) cocker spaniel bitch Veno (Hector—Cleo) to his Black Duck (Obo II.—Althea), March 5.

Nina—Black Duck. C. O. Curtis's (Lima, O.) cocker spaniel bitch Nina (Obo, Jr.—Woodstock Flirt) to his Black Duck (Obo II.—Althea), March 10.

Fauchion—Roy K. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Fauchion (Mac—Fanny K.) to their Roy K., March 14.

Fanchette—The Rambler. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Fanchette (Mac—Fanny K.) to their The Rambler, March 11.

Waldina II.—Windrush Rioter. Rockland Kennels' (Nanuet, N. Y.) dachshund bitch Waldina II. (Fripon—Waldina I.) to Mr. Manice's Windrush Rioter, March 14.

Flora K.—The Rambler. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Flora K. (Lee—Topsy) to their The Rambler, Feb. 28.

Belle of Rockland—Racer, Jr. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Belle of Rockland (Chimer—Countess) to their champion Racer, Jr. (Racer—Vickey), March 13.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Blossom. H. B. Murchie's (South Orange, N. J.) St. Bernard bitch Blossom (Albert Plinlimmon—Hazel), Feb. 10, thirteen (eight dogs), by E. Rsdel's Weiland (Barry—Rohma).

Chloe, Jr. O. Backus's (Detroit, Mich.) cocker spaniel bitch Chloe, Jr. (Dandie W.—Chloe K.), March 5, three (two dogs), by J. Herbertson's Brownie B. (Newton—Pansey).

Nellie. Robt. Leddle's (San Francisco, Cal.) fox-terrier bitch Nellie, Feb. 23, five (two dogs), by J. B. Martin's Blemton Shiner (Blemton Rubicon—Blemton Brilliant).

Rosabo. E. H. Blake's (Brockton, Mass.) cocker spaniel bitch Rosabo (champion Obo II.— ——), Nov. 28, four (one dog), by Victor.

Dot Smirle. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Dot Smirle (Bob Obo—Tough), Dec. 12, seven (one dog), by their Tim Obo (Bob Obo—Cleo).

Rural Nova. R. H. Alberts, Jr.'s (Hoboken, N. J.) English setter bitch Rural Nova (Pride of Dixie—Fairy Bell), Feb. 15, seven (three dogs), by his Belthus (champion Rock—Cockerton's Meg).

Gwynnie. R. H. Alberts, Jr.'s (Hoboken, N. J.) English setter bitch Gwynnie (Belthus—Wonna Gladstone), Jan. 29, nine (five dogs), by L. L. Ingram's Soudan (champion Druid—champion Ruby).

Psyche. Jas. B. Blossom's (New York) Gordon setter bitch Psyche (Roy—Doi), March 1, nine (five dog), by his champion Beaumont.

Dixie Berwyn. Warwick Kennels' (Bridgeport, Conn.) English setter bitch Dixie Berwyn (Mack B.—Pet Berwyn), Feb. 1, three (one dog), by their Sir Edward (Belthus—Wonna Gladstone).

Nellie Hunter. Edgewood Kennels' (New Canaan, Conn.) English setter bitch Nellie Hunter, Feb. 15, eight (four dogs), by Blue Ridge Kennels' Gath's Mark.

Marguerite. Manatary Kennels' (Marblehead, Mass.) greyhound bitch Marguerite, Jan. 7, five (one dog), by Albrak.

Grace. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Grace (Frank Forrest—Fanny I.), Feb. 10, six (three dogs), by their champion Racer, Jr.

Emeline. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Emeline (Lee II.—Flirt), March 12, four (one dog), by their The Rambler (champion Marchboy II.—Lizzie).

Betty. Rockland Kennels' (Nanuet, N. Y.) beagle bitch Betty (Rush—Clara), Feb. 10, three (one dog), by their Roy K. (Rattler III.—Dora).

Midget Nellie. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Midget Nellie, March 8, five (two dogs), by A. E. Pitts's Bonsor.

SALES.

☞ **Prepared Blanks sent free on application.**

Sir Edward. Orange belton English setter dog, whelped June, 1890, by Belthus out of Wonna Gladstone, by Warwick Kennels, Bridgeport, Conn., to A. Booth, New York.

Proctor. Black, white and ticked English setter dog, whelped Aug. 25, 1891, by Shenstone out of Nell o' Warwick, by Warwick Kennels, Bridgeport, Conn., to M. Ganson, same place.

Sir Dick. Black and white English setter dog, whelped Dec. 16, 1890, by Bravo out of Vic, by W. H. Hyland, North Tarrytown, N. Y., to John Rogers, Mount Holly, N. J.

Corktown Chance. Black cocker spaniel dog, whelped Sept. 22, 1891, by Bob Obo out of Tough, by Corktown Cocker Kennels, Ottawa, Ont., to C. H. MacGarigar, same place.

Queen Nell. Liver and white pointer bitch, whelped Feb. 1, 1891, by Pommery Sec out of Lady Judy, by W. H. Hyland, North Tarrytown, N. Y., to H. Wagner, Monticello, N. Y.

Ruth Cleveland. Orange, perfect white markings, rough St. Bernard bitch, whelped Aug. 14, 1891, by Nicholson's White Chief out of Juno, by A. Helfers, Steinway, L. I., to Ritter's Ravenswood St. Bernard Kennels, Long Island City, L. I.

Signo. Cream fawn pug dog, whelped Sept. 19, 1890, by Bradford Ruby II. out of Pearl, by Eberhart Pug Kennels, Cincinnati, O., to S. L. Williams, Chicago, Ill.

Tobie. Silver fawn pug dog, by Spokane out of Lady Verne, by Eberhardt Pug Kennels, Cincinnati, O., to Mrs. E. A. Orr, same place.

Kilmarnock Tam—Lady Carlo whelps. Collies, by Manatary Kennels, Marblehead, Mass., a sable and white dog each to Silver Spray Kennels, Clay City, Ill., and G. G. Mitchell, Little Valley, N. Y.; sable dog to S. Cunningham and sable bitch to H. B. Usher, both of Marblehead, Mass., and black, white and tan dog to W. H. Lord, Boston, Mass.

Landmark. Lemon belton English setter dog, whelped Aug. 21, 1891, by Reverdy out of Nellie Hunter, by V. L. Bassa, New Canaan, Conn., to F. W. Bennett, Killingly, Conn.

Mark II. Lemon belton English setter dog, whelped Aug. 21, 1891, by Reverdy out of Nellie Hunter, by V. L. Bassa, New Canaan, Conn., to A. T. Latta, Jr., Monroe, N. C.

Reverdy—Nellie Hunter whelps. Lemon belton English setter bitches, whelped Aug. 21, 1891, by V. L. Bassa, New Canaan, Conn., one each to Dr. J. E. Hair, Bridgeport, Conn., and J. H. Johnson, Carlisle, Ind.

PRESENTATION.

Reverdy—Nellie Hunter whelp. Picket, lemon and white English setter dog, by V. L. Bassa, New Canaan, Conn., to the New England Field Trial Club.

OUR correspondent, Mr. Clapham, touches on several very interesting questions, for one of which, at least, we must depend on him for an answer, as he professes to be able to furnish it. Another question he asks, "What is the *size* of a yacht?" is much easier to ask than to answer, in fact it is very difficult to give a clear, concise and satisfactory definition of "size" as applied to a yacht. It is, however, very easy to give a negative answer and to say what is not size, and in practice such an answer may be almost as useful as a complete definition.

The principal thing that is not "size" is length, whether of waterline or any sort of "mean length." Contrary to an idea which was once quite general but is now confined mainly to the Boston *Herald* and the New York Yacht Racing Association, length is no more a measure of the size of a yacht than it is of the cubic capacity of a box, and, save in the case of craft of similar model and nearly the same length, it is absolutely useless as a basis of measurement. We had fondly hoped that the world had moved so far within the last ten years that it was no longer necessary to go over the old story, but it seems that there are still a few who object to those reasonable restrictions which have been almost universally accepted by owners and designers.

As convincing proof that length is no measure of either size or power, there is Liris as compared with Minerva, of precisely the same length, but of 3ft. more beam, 1ft. 3in. more draft, some 6 tons more displacement, of which 4 tons is in the lead keel, and with 33 per cent. more sail. The absurdity of calling these two boats of the same size because each measures 40ft. on the waterline needs no demonstration. The comparison might be carried still further in the case of a fin keel of 40ft. l.w.l., with about half of the displacement and sail of Liris.

The futility of taxing any one or two dimensions may be seen in all the past history of yacht racing, and for a long time the ingenuity of yachtsmen has been directed toward a tax on all the elements which go to make up the size and power of a yacht. In doing this many different methods have been devised; the tonnage has been used, the displacement, the cubic contents of the whole hull, the product and the sum of the length, breadth and depth, the length and girth, and various other combinations. Most of these have been wrong both in theory and practice, and the best of them in theory have proved useless when put to the test; mainly because they encourage some one type of boat to the exclusion of all others, and that type an undesirable one. An instance of this is found in the displacement rule, which almost inevitably produces a yacht of extreme beam and draft, with a large sail plan, a minimum of internal accommodation, and a lack of sea-going qualities.

The best rule yet devised is entirely empyrical and unscientific, it is based in part on an assumption which we know is incorrect, but at the same time it gives in practice a very fair gauge of a yacht's size and power. This rule is the one in such general use in America under the name of the "Seawanhaka" or the "length and sail area" rule, found abroad in a different form but involving the same principle, in the present rating rule of the Y. R. A. In it the waterline length, the only dimension of a yacht which can be measured and its true value estimated, is taken directly. The other dimensions and elements which it is difficult or impossible to estimate correctly, the beam, the depth or draft, and the amount and position of the ballast, are all measured approximately, but on the whole quite accurately, through the sail plan. Each of these elements is an important factor in the sail-carrying power of the yacht, and though we cannot give any exact value to each separately, the combined result of beam, depth and lead is measured by the area of sail which the yacht will carry. Thus in the length and sail area we have a very fair gauge of the "size" of the yacht, and no other method of grouping yachts together for racing purposes has proved so fair and equitable as this rule.

It is true that under it the designer is limited; but to limit him is the object of all rules. At the same time he is less hampered and fettered than under any other rule which pretends to measure more than one dimension. His choice of dimensions, type, model and mode of ballasting under the length and sail area rule is as free as it can possibly be, and he is far less restricted in experiment than under the length, displacement or tonnage rules of the past. He may select such proportions of length, beam and draft, with such an amount of ballast and sail, as seem to him likely to give the best results, and he may combine them in the keel or centerboard type, or he may push his experiments further in the direction of the fin keel, the scow, the sneakbox or even the catamaran, and there is nothing to compel him to adopt one special type on a given waterline and to base his chances of winning on his capacity to outdo other designers in the extreme development of some one feature.

What he cannot do (and this is what some are finding fault with) is, on some nominal measurement of one element which is falsely assumed to represent the size, to build a yacht much larger in reality than her competitors through added beam or draft and carrying a greater driving power, while at the same time she is not called upon to pay for these increased advantages.

THE FOREST AND STREAM has carefully refrained from giving credence to the many groundless rumors of new 46-footers from the Herreshoff shops for Messrs. Iselin, Morgan, Work, Maxwell and other well-known yachtsmen, there being no reason to believe that any of them had the slightest foundation in fact. *The Yachtsman* has recently credited us with a similar statement, to the effect that a 20 rater was to be built at Bristol for a British yachtsman; but we must decline the responsibility for such a report. What we said, and this on the authority of Messrs. Herreshoff, was that inquiries had been received concerning a new 20-rater and it was possible that an order might result. In this case, as we were informed by Mr. N. G. Herreshoff, the yacht would be a fin keel, similar to Dilemma, thus being readily transported on a steamer's deck (the hull and keel separately), which would not be possible with such a yacht as Wasp or Gloriana. No such yacht has been started, so we may conclude that nothing came of the negotiations. The other 46-footers announced at times by certain daily papers have proved as mythical as that new Fife yacht for Mr. Tweed which has been announced for several seasons.

The fame of Gloriana has brought to her builders a number of inquiries from foreign yachtsmen, but only two, we believe, have resulted in possible orders. One yacht, a 2½ rater for a Clyde yachtsman, has already been shipped. The other will be a tiny craft, a half-rater, ordered by Mr. Blair Cochrane for Miss Winifred Sutton, for racing in the Bembridge (Eng.) Sailing Club. She will be a fin keel and her name will be Wee-winn. Another inquiry was from Lord Dunraven, for a 5 rater, the order being subsequently placed with Messrs. Summers & Payne, of Southampton. Still another, for a 5 or 10-rater, was from the famous old yachtsman Prince Batthyany-Strattman, now of Vienna, once owner of the racing cutter Kriemhilda. So far as we are aware nothing will be built to this latter inquiry.

A GREAT part of the present commotion among British yachtsmen is due to the introduction into the smaller classes of the so-called canoe-yawls of the sharpie type. The defeat of two of the crack boats of this type by a canoe of half their rating, through the aid of the American sliding seat, opens up a wide range of possibilities if the canoe-yawls themselves should be allowed to use this important adjunct to all lightly ballasted craft. Fitted with a 5ft. slider and manned by three men, one of them at least of good weight and active in his motions, the "half-rater" canoe yawl might be made to sail still faster, and with no more real danger of a capsize than at present.

At a meeting last week the Atlantic Y. C. abandoned the singular provision of its rule, by which but 90 per cent. of the sail area was taken, and the rule is now uniform with the other large clubs. We have never heard of any reason for this peculiar form of the rule, and the club is lucky in being rid of it.

A NEW ERA IN PHILADELPHIA.

THE Philadelphia Y. C. is determined to give to this city an organization second to none in this country, and besides the many improvements and attractions at its river house at Tinicum, and at its city rooms, 1715 Chestnut street, it has arranged for a series of addresses by the most prominent yachtsmen, yacht designers and builders.

Mr. William E. Waterhouse, of Boston, associate of the late Edward Burgess, and his chief assistant in the designing and building of the famous yachts Puritan, Mayflower and Volunteer, which won the international races in the defense of the America's Cup, and of many other notably fast yachts, addressed the club a few weeks ago. The second talk of the series was given on March 16 by Mr. Thomas Clapham, of Roslyn, Long Island, before a large and enthusiastic audience of members and friends, and comprised almost all of the leading yachtsmen of this and neighboring cities. Mr. Clapham is prominent in the building and designing of shallow draft boats. As the designer and builder of the Chippewa, the Bouncer and other unrivaled prize winners, Mr. Clapham is known to every yachtsman in the land, and hence was greeted by a most enthusiastic audience, which represented every type of boat that is used for yachting purposes, including several steam yachtsmen. Mr. Clapham illustrated his lecture by the use of numerous models and drawings and blackboard sketches, and proved to the satisfaction of all present that he could produce speed as well as safety in a yacht of shallow draft equal to a boat of greater depth.

The Chippewa was designed after the Bouncer, a little 12ft. boat built by Mr. Clapham, which beat everything of her size, and many boats much larger in the vicinity of New York in 1890. The Chippewa measures 34ft. over all, but is classed as a 25-footer, the latter being her water line length, but when she is slightly heeled has a water line length of nearly her whole over all length. She draws but 14in. of water, and sails her races without any ballast. These boats can be made uncapsizable and unsinkable, which fact he has proven by actual test in a boat 60ft. long. Among his many models he exhibited a most beautiful one for Mr. Geo. D. Gideon, one of the club's trustees, which will be 40ft. over all, 24ft. water line and draw about 16in. water. Mr. Clapham's chief theory and principle is in the use of true circles wherever possible. He stated that this had been done thousands of years ago by the Japanese, and that he but applied, with but few modifications, these old ideas.

It was for Mr. Clapham that John Herreshoff, who was the founder of the firm of Herreshoff Bros., built his first boat the Qui Vive. Mr. Clapham gave the sketch of this boat, her record, and pleased the club's Commodore, Francis Shunk Brown, by informing his audience that this boat, with an unbeaten record of twelve years, was finally defeated by the Commodore's yacht the Schemer, and that it so disappointed him that he immediately sold the yacht.

Although Mr. Clapham made no pretensions as a public speaker, and it was his first appearance, he delivered a most interesting address and delighted all present.

Among the audience were Hon. Wm. B. Mann, Richard P. White, Esq., Arthur Coburn, Clarence Bement, Mr. Gibbons, Dr. Tuttle, Dr. Hollingsworth, Henry J. Hancock, Esq., McBride brothers, owners of the Yankee Doodle, formerly Buzz, Mr. Parvin, Wm. H. Magoffin, Dr. Richard M. Jones, Mr. Button, of the Royal Thames Yacht Club,

Saml. B. S. Barth, Frank Bement, Alfred Box, Wm. J. Davis, Chas. E. Ellis, Geo. W. Fite, G. D. Gideon, Geo. T. Gwilliam, Samuel B. Haines, John A. Lehman, H. Pearson Lloyd, Jas. W. McFarland, Thos. S. Manning, Michael Matthews, Jos. L. McDaniel, John J. Molony, M. Richards Muckle, M. Richards Muckle, Jr., John S. Muckle, J. Jos. Murphy, J. Willis Martin, Brereton Pratt, Horace F. Smith, Carpenter T. Smith, Thos. C. Stelwagen, Wm. J. Stockinger, Robt. P. Thompson, Newkirk N. Wents, Horace L. Williamson, Chas. I. Wilson, Samuel A. Wood, John M. Wood and many others.

The rooms were crowded to their utmost capacity and after the address refreshments were served. The club was never in a more prosperous condition and numbers among its members the principal yachtsmen of this city and vicinity. With a membership of a hundred, and with the best club house and anchorage on the Delaware River, this club starts the season of 1892 under the most favorable circumstances.

SIZE VS. LENGTH.

Editor Forest and Stream:

In your editoral comments of March 17, on a 21-footer by Mr. McVey, it is plain enough for all to see that you fail to do the subject justice even from your own point of view. The criticism above referred to closes as follows: "But this new one (the McVey boat) [not the boat but her designer.—Ed.] apparently demands the right to beat a small boat by a much larger one," Will you kindly, for the benefit of many who are waiting, define what you mean by a "larger boat"? In what respect is size different, when boats are in question; from what size is in other things? Why do you call a boat "large," because she is wide and carries no weight, yet call another boat small because she is deep and carries several tons? Of course I can answer the question, but have the best of reasons for knowing that hundreds of yachtsmen want the enigma solved by somebody who indorses the "rating" fad. THOMAS CLAPHAM.

ROSLYN, March 18.

We fear that our correspondent is over the line before the gun this time, but we shall be glad to have his answer, even though the question he asks is based on an entirely groundless assumption. In the article alluded to, we called the McVey boat "large" because, on the same waterline she has 3ft. more beam than the Herreshoff centerboarder, 2ft. more beam than the Cape cat designed by Mr. Small, 1ft. 6in. more than the Burgess boat, and 1ft. 6in. more than the Stewart & Binney boat; her depth being as great or greater, and her sail area much in excess of the others. All of these are centerboard boats of the same general type, and there is no question of narrow beam and deep ballast. According to Mr. McVey, the smaller boats in the class will carry about 700ft. of sail, some others, such as the Fowle cutter, carrying about 900, and his boat probably more. If we include the Herreshoff fin keels, their beam is about half that of the McVey boat, their sail area is at least 200ft. less, and even admiting the power derived from the lead-loaded fin, they must be set down as smaller in every way than the very wide and over-rigged centerboarder.

We fail to see how what Mr. Clapham calls the "rating fad" has any bearing on the case; there is no question of rating or of classification by sailing length; it is merely the old question of measuring (not classifying) boats by length alone or by length and sail area combined. This question has been settled by the almost unanimous action of American clubs in favor of the Seawanhaka rule for measurement, by which length and sail are assumed to be of equal value, and there is not the most remote possibility of a return to any form of mean or waterline length measurement.

The question whether it is further desirable to classify as well as to measure yachts by the Seawanhaka measurement is a very different one, and yet remains to be decided by the clubs, with every prospect of an affirmative answer in time.

The Boston *Herald* deals with our comments as follows: "As the McVey centerboard 21-footer is the first boat built to be raced under a sail area and waterline length rule, now adopted by nearly all our local clubs, the designer does not see how his boat would be benefited by a waterline length, no sail tax. Just the same, yacht designers, if left alone, would turn out faster boats under the latter rule than the former. The former rule stops fixed length boats from doing their best."

According to Mr. McVey's figures, the boats with the larger sail spreads (carried by virtue of extra size) will have to allow the smaller boats from 3 to 4 minutes over an average course of 7 miles. Under a waterline rule, with no tax on sail, his 21-footer of 12ft. beam would race on even terms with the Herreshoff 21-footer of 9ft. beam; thus being benefited by the extra sail carried by the excess of 33 per cent. beam.

The Seawanhaka rule has been in use in the past by some of the Eastern clubs, and its general adoption, which recently took place, has been a foregone conclusion through the winter. Two Herreshoff boats and several by other designers were well advanced before the McVey boat was begun, and we cannot understand how, save by a mere quibble, the latter is the first boat built under the rule. Very possibly with nothing limited but the water line, faster boats on the same length might be produced, but that they would not be better boats in any way is proved by any amount of experience in the old sandbag classes under length rules.

The result of producing the fastest boat on a given length was very plainly illustrated in the Southampton length classes, now fortunately extinct. In these classes the designer was unhampered by "technicalities," waterline length alone being limited, and the result was a type of wide, deep, overrigged and unmanageable monstrosities, fit only for the local racing; and through their draft, big sails and lack of sea-going qualities, unfitted for use as cruisers when their racing days were over.

Under a waterline or mean length rule the result is to obtain speed under local conditions in boats of exaggerated type, either wide and shoal or wide and deep, and with sail plans in every way undesirable.

NEW YACHTS.

AT Bay Ridge Wintringham is at work on a 21ft. jib and mainsail boat for F. A. Perret, of Brooklyn. She will be 31ft. 3in. over all, 21ft. l.w.l., 8ft. 7in. beam, 4ft. draft, with 2½ tons of lead on keel.

Mr. Thos. Clapham is at work on a 2½ rater of his own design for Mr. George Work. She will be 36ft. over all, 23ft. 6in. l.w.l., 10ft. beam and 1ft. 8in. draft.

The new 21ft. class about Boston thus far includes 12 boats, two keel, three fin keel, and seven centerboard. Beside these, the Boston papers have decided that Mr. John B. Paine shall build a fin keel of his own design. The first keel boat is a cutter of moderate type, designed by Stewart & Binney for W. P. Fowle, former owner of Saracen 1 and 2, and Saladin. She is of course intended for racing, and will carry a large sail plan. She is now afloat and ready. The other keel boat was designed by J. Borden, and will be built and owned by James McIntyre. She will have a bulb keel, similar to Le Lezard, and will be of composite construction. Two of the fin keels are for Messrs. A. Bigelow, Jr., and H. P. Benson, designed and built by Herreshoff. They are about 7ft. beam, of elaborate construction, double decker, with mahogany outside, and of easy form and moderate sail area. The third was designed by Waterhouse, and is building by Higgins & Gifford for C. A. Prince, of Beatrix and Helen. The keel is of a peculiar shape, and the construction was specially designed for this boat. The smallest centerboard is building at Herreshoff's for Messrs. F. L. Dunne, J. S. Brown and A. P. Hunt, all old racing men. She will have about 9ft. beam, and in form is very similar to Dilemma and the other fin keels, her lines all being convex, though her altered proportions make her more of a spoon shape. The largest centreboard was designed by A. D. McVey for Dr. John Bryant, and is building by Wm. Smith, at City Point. She will be 32ft. over all and 12ft. beam, with a very large rig.

Another centerboard of about 10ft. 6in. beam has been designed by Mr. Sidney Burgess for Augustus Hemmenway, owner of Chiquita. Still another has been designed by Stewart & Binney, her beam also being 10ft. 6in., with 8ft. overhang. Another centerboard will be built from his own design by Allan Hay for Mr. Morrill, while there will be two Cape boats, one by Hanley and one designed by her owner, J. F. Small, and built by Cranby. Lawley will build the Burgess boat, and also one of 21ft. l.w.l. and 25ft. sailing length, designed by Waterhouse for Mr. Young of New York.

THE OUTLOOK ABROAD.

AT present the racing outlook is quite as bad as it was last season, so far as the large classes are concerned, and the democracy of small yachts and boats will sway the clubs entirely their own way. The racing of 80ft. or 90ft. yachts, which we had to deplore last season, no longer arrests the interest or even attention of the current yachtsmen, although no doubt to the spectator, who does not know a knighthead from an archboard, a Thistle and Iverna racing would be vastly more interesting than a whole fleet of Babes and Windfalls. However, the yacht owners themselves are the founders of the pastime, and they must be left to develop it in their own way; and the conservative admirers who can remember 190-ton cutters in the forty odd years ago, or 100-ton cutters within the last ten years, need not waste their breath in lamenting over the manners and customs of latter-day yacht owners. One thing, however, neither the old-way yachtsmen nor the yachtsmen up to date would have ventured to predict in 1890, and that is the utter, complete, and ever-to-be-lamented collapse of the 20-rating class. But, as Lord Dunraven recently said, classes and yachtsmen come and go in the most inscrutable manner; and as Clara shut up the last of the old 20-tonners in 1884, so has the Dragon 20 rater convinced all other 20-raters of the futility of their existence in 1891. Her owner, Mr. F. C. Hill, had, we believe, intended to fit her out to see if any of the others could be drawn; but, as a course of many monotonous "sails over" appeared likely to be his only reward, he determined not to fit out, as sailing over is not the occupation that Dragon was built for. Her skipper, however, will not be resting the while, as he has been lent to Mr. T. B. C. West for the new centerboard 40-rater building on the Clyde for that gentleman.

There is no doubt that the 40 rating class is the one that will demand the attention of clubs this season, and, as prizes have not ruled very high of late years, the clubs should bestow a little agreeable pampering on the 40-rating class by way of a change. This class has been made to suffer very much in the value and quality of its rewards; but the men who represent it have thought so much of the sport that they have paid but little attention to the inadequacy of the prizes they were competing for. Now is the opportunity of the clubs to make up for all past deficiencies. The large class is, we will say, in abeyance, and the 20-rating class is in the sulks, and also in abeyance; and also, with the exception of the handicap class, which does not promise to be numerous, there will be nothing but the 40 raters to make a regatta at the important yachting stations. 5 raters and 0.5-raters are all very well for Wednesday and Saturday afternoons; but, in spite of the profound interest they excite among themselves, they will hardly make a regatta for a Royal Thames, Royal Northern or Royal St. George's Y. C. The 40-raters will, as they did in the good old days of the Cymbas, Glances and Nimrods, thirty odd years ago. Of course, the chief interest in the 40-rating class will be centered in Mr. West's centerboarder, but we believe the owner of the redoubtable Thalia is prepared for a long struggle before giving in. Then there will be two other new vessels of 40 rating and the Creole, and these will make a very pretty half-dozen when all together.—*London Field.*

CHANGES AND PUBLICATIONS.

THE U. S. Coast and Geodetic Survey announces the following changes in New York Harbor:

The extreme point of Sandy Hook has been gradually making to westward, until at present it extends about 250yds. west of the point heretofore shown on the charts. The change is indicated on the charts now issued from this office. This affects charts 369, 120, 121, 52, 8, and A.

The black bell-buoy recently substituted for black can buoy No. 5, marking the spit making out to the northeast from the Hook beacon, is in a position from which Sandy Hook Light bears S.S.W., distance $1\frac{1}{16}$ miles. (See N. to M. No. 148.) This affects charts 369, 120, 121, 52, and A.

The following new publications are also announced by the U. S. Coast and Geodetic Survey:

Conversion Tables, giving the relation between Customary and Metric U. S. Weights and Measures.

Appendices to the Annual Report of the Coast and Geodetic Survey for the fiscal year 1890:

No. 8. Results of the Magnetic Observations recorded at Los Angeles, California, 1882-1889. Part 1—Absolute Measures.

No. 13. On an Approximate Method of Computing Probable Error, and the Determination by Least Squares of the relation between two variables.

No. 14. On the Use of Observations of Currents for prediction purposes.

No. 16. The Relation of the Yard to the Metre.

No. 17. Address of Assistant George Davidson, Coast and Geodetic Survey, at the Ninth Conference of the International Geodetic Association.

No. 18. The National Prototypes of the Standard Metre and Kilogramme.

No. 19. Early Expeditions to the region of Bering Sea and Strait.

No. 20. Notes on an Early Chart of Long Island Sound and its Approaches.

NEWS NOTES.

The sixth annual race of the Cooper's Point Y. C. to Reedy Island will start from Cooper's Point on May 14 at 3 o'clock. The following cabin boats have entered: Cutter Elfreda, keel Nance, centerboard Comfort (flagship), centerboard Hilda, centerboard Beth, centerboard Isabelle. Four new open cats and three open jib and mainsail boats have also be enenrolled in the club, names hereafter. George D. Gideon (yacht Nance), W. S. Rothery and G. Calhoun have been elected as regatta committee. The cats will make a fight for the Grant trophy for the fastest time over the course. This is the only club on the Delaware River that makes extended races into the lower bay of more than 100 miles. The open boats range from 15 to 18ft. over all and the races are sailed in early May. The new 16-footers, Kinsey, Humphries, Linderborn, Clarke and Humes, will be finished in time for the race. At least twenty boats will be in line. The club contemplate giving another open race in the near future.

The Roberts safety watertube boiler is meeting with increased favor from yachtsmen as its merits become better known on trial. Mr. H. B. Moore, who has used one for three years in his fast launch Pampero on Lake George, will have one in his new 112ft. yacht, now building. Another will be used, with a Riley & Cowley engine, in the new launch building by the Gas Engine & Power Co. for the Dock Department of New York city. The new yachts Evelyn and Theresa will each have a Roberts boiler, and the present boilers of the yachts Bo-Peep and Fra Diavolo will be replaced by Roberts this spring. The steam yacht Hornet, 100ft., building for J. R. Fales, of Pawtucket, will have a Roberts boiler. her owner having used one in the Countess, formerly owned by him, while the new yacht building by the Detroit Boat & Oar Co for Mr. Mark Hopkins will also have one. The boilers of this make recently placed in the yachts Say When and Fanita have given perfect satisfaction.

The annual meeting of the Plymouth Y. C. was held at the club house on March 15, and officers were elected for the coming year as follows: Com., N. Morton; Vice-Com., T. N. Eldridge; Fleet Captain, H. P. Bailey, Measurer, C. F. Bradford; Sec'y, A. L. Barnes, box 567; Treas., G. E. Benson. Executive committee, N. Morton, Geo. D. Bartlett, W. T. Eldridge, A. L. Bailey, W. B. Spooner. After adjournment a special meeting was held and a number of new members were admitted to membership. A building committee was chosen and given full powers to enlarge and improve club house, where $600 or $800 will be expended. For a young club the Plymouth Y. C. is making great gains. During the past year it has nearly doubled the number of honorary members and increased the active membership fifty per cent. Many new applicants and a successful season are expected.

The Yacht Racing Calendar and Review for 1891, the fourth volume, comes to us in a new and handier form, an octavo volume of over 600 pages, containing a reprint of the yachting and canoeing portions of the *Field* during the past year. It forms a complete record of the racing in British waters during that period, and is most useful and convenient for reference.

Com. Forwood, of the Corinthian Mosquito Fleet, has appointed Messrs. Thornton Smith, Sidney Bishop and Dr. F. S. Grant as regatta committee. At a recent meeting of the executive committee the thanks of the club were tendered to the Larchmont Y. C. for its offer of hospitality.

"Loyalty."—Your letter will appear next week. Will you kindly send name and address, as both have been mislaid some time since.

OCTOBER.

1. Springfield, Cup, Springfield.

THE question has lately been asked us by a club about to purchase a war canoe as to the A. C. A. limits and the best size. As yet no limits have been laid down, and there is a wide diversity in sizes, so that the question is a difficult one to answer. As there is a fair prospect of the war canoe race becoming a popular fixture in the future, it is desirable that a limit of size should be fixed as soon as possible, and to that end we will be glad to hear from all who have had anything to do with these novel craft, especially from the builders. The proposal made by Mr. Barney some time since was that the canoes should be made in three sections each, for economy and convenience in transportation; a plan that is perfectly practicable. If this were done a length of 30ft. could easily be had, say one 16ft. section and two 7ft. ones, the longer one forming the middle of the boat and the others the ends. By this means the smaller sections could be packed in the larger, the whole stowing easily in an ordinary box car, and when in use the greater part of the weight of crew would be carried in the single large section, relieving the strain on the ends. A canoe 30ft. over all and 4ft. beam would carry easily a crew of fourteen paddlers and a steersman, enough for racing purposes, and divided in this manner it would be easily transported. Some of the canoes in use are larger than this and some are smaller; those familiar with each kind can probably give some valuable information. It is hardly probable that all, if any, of the divisions will own war canoes, but there should be plenty of clubs within each division owning canoes and willing to bring them to the meets for racing, so that four of nearly the same size might be had. For the present at least the racing will have to be on this basis, but in order that this branch of the sport may reach its fullest development it is desirable that all new canoes to be built should be of uniform size.

THERE is still much work to be done in the divisions before the A. C. A. book can be given out to the printer by the Secretary-Treasurer, and prompt returns from the division officers will greatly aid the work. In two divisions new pursers have just been elected, the resignations of their predecessors having already caused some delay; and members of these divisions can hasten matters by replying to all communications at once, not forgetting to enclose a dollar.

THE first race of a canoe fitted with the Butler sliding seat in British waters has resulted in a most decided victory for the Yankee "piazza," (be 30in. canoe on which it was used being a new craft, sailing her first races, and her opponents being much larger craft with established reputations as racers. The general adoption of the Butler seat is likely to follow at as early a date as the rules will permit of.

A TRIP IN THE MAINE WOODS.

[*Concluded from page 259.*]

BY the laws of Maine a heavy penalty is imposed for lighting fires in the woods except for camp purposes, a very wise provision against the destructive fires that sweep through these regions, often destroying thousands of acres of valuable timber, and leaving many miles of blackened, desolate-looking tree trunks. It is but just to our good sense to explain that we spent quite a time after our fire in digging up the wet turf, and only left when all was safe. We spent the night in our camp at the foot of Mt. Kineo, and next day went on the mountain and visited the hotel. We tried to make ourselves familiar with the guests, who seemed to take an unusual interest in us. The proprietor was very obliging and did everything he could to aid us. We obtained from him an additional supply of provisions for our future journey at quite reasonable terms, but he declined to take any pay for his kindness and trouble, a somewhat unusual thing under the circumstances, as we paid no direct tribute to the house.

I was reminded of the story of Mr. Toodles and the bear. Mr. Toodles was a poor man with a large family of small children, that showed by their ragged and dirty appearance the results of poverty and neglect. A showman was going to exhibit his bear in the neighboring village and the children made great ado to go and see him. Mr. Toodles had ten children and could not afford it, but when the man came along past the house Mr. Toodles made a bargain at a reduced price for him to take the bear around into the back yard and give a private exhibition to the children. When the performance was over Mr. Toodles offered the price agreed upon, which the man refused because, as he said, it was worth as much for the bear to see the children as it was for the children to see the bear. Perhaps the interest the guests took in us could be accounted for in the same way.

The next morning we put our luggage aboard the steamer again and went up the lake 15 miles to Northeast Carry. Across this carry of three miles we launched our canoes in the West Branch of the Penobscot and were fairly in the Maine woods. When Thoreau in 1853 went over the route, rails were laid across the carry and the load was drawn by a horse and an ox. Traces of the rails still remained, but I presume, judging from the prices demanded of us, that a more profitable way had been found. The proprietor of the house at the head of the lake evidently regarded all persons crossing the carry as sources of revenue, for when we refused to pay his prices and employed some one else he tried to collect a dollar a piece for landing on his wharf. We claimed that our tickets on the steamboat included landing somewhere, and since the company had chosen to land us on his wharf he must look to them unless they would take us and land us somewhere else, in which case we should still refuse to pay, since the implied contract in purchasing the ticket was for one landing only. This was not satisfactory and we left him to collect of the steamboat company, which he must have done if he has yet been paid. When a man sees ten dollars as plain as he did and doesn't get it he is deeply affected.

From Northeast Carry our course was down the West Branch about 20 miles to Chesuncook Lake; then turning northward we ascended Caucomgomoc Stream about ten miles to a lake of the same name. The Umbazookskus River enters the Caucomgomoc River not far north of Chesuncook Lake and is, I think, the ordinary route to the Allegash and St. John regions. Two of our party had taken this way the year before and had reached the St. John River by way of Mud Carry, Mud Pond, Chamberlain and Allegash lakes and Allegash River. This is, no doubt, a delightful canoe trip which I hope sometime to take. Caucomgomoc Lake, as I remember it, is six or eight miles across and is one of the most northerly tributaries of the Penobscot. We camped several days on its northerly shore and spent most of our time in looking about the lake and woods, in hunting and fishing. Our success was not great. We saw no large game on the entire trip. Our party carried two shotguns and two Frank Wesson rifles; the latter were chiefly for amusement. Shotguns are very useful in shooting ducks for food, but if one desires to see large game it is better to keep the guns quiet. The deer and moose have increased very rapidly in the last five years, and by exercising great care can be seen frequently in and about the rivers.

On the other hand, small game is very scarce except in favorable localities. The season may have been an unfavorable one with us, but if I was obliged to depend upon my gun for food I would rather stand my chance in Massachusetts or the settled portions of Maine than in the deep woods. You may go for miles and not see a ruffed grouse, but when found they are very tame and easily shot. Ducks are frequently found, but when the distance traveled is considered, I think that as many could be found on less remote rivers, such as the Concord. I hope this will not discourage any one, for there is shooting enough to make it interesting, and if you have the sportsman's spirit you will be sure to think you are just going to find something. A good many ducks breed on the marshes, and, when about two-thirds grown afford good sport, and if properly cooked make an agreeable change from salt pork. Our guides called them dippers, no doubt from the way they go fluttering along the water in their attempt to fly. They seem to get ahead quite fast, but are unable to leave the water.

On our return down Chesuncook Lake we drove quite a number of these ahead of us, hoping to force them into a bay and thus get near enough for a successful shot. At the outlet of the lake there is a dam across the Penobscot River and a fall below. When we got there no ducks were to be seen, and we concluded they must have gone over the falls. In a short time Mack, who had crossed the river, cried out that he had found them in a shallow basin that was connected with the river by a narrow channel close to the dam. I took a canoe from the shore, where our party had landed, and hurried over to a point of land near the channel and directly above the falls. I hoped he would delay operations till I could get to my position, past which they must come in getting out; but things did not work as I hoped. Mack could not see me and did not know what a nice thing I had not quite got, and fired just as my canoe touched the shore. Before I

could get my shells in the procession arrived. Of course I became excited and felt in the wrong pocket for shells, and did what a well-rattled man always will do under similar circumstances, snapped my gun once or twice on an empty shell and made derogatory remarks; but on the whole gave them a warm greeting, and knocked over four or five, which, with one exception, went over the falls and were lost. We saved one apiece. If I could have got my canoe around the point we could have bagged the whole lot. In fact, we had them already bagged, but the string was not on.

On these lakes and rivers one rarely tires, for there is frequent change both of scenery and conditions. First there is a dead water, then rapids to shoot, or perhaps a fall that must be carried. A carry affords a chance to recover from the cramped position of the canoe, also an opportunity to pick blueberries, which may be found in abundance in their season. The ground along the trail in many places is blue, and the berries grow in bunches as large as a walnut. This was the first time I had seen blueberries when I felt sure some one had not been there before me. This sense of freshness is a great pleasure. In excursions about home you see little that others have not seen, but here you take nature first-hand, and by going one or two miles from the rivers you can find regions that have not been visited at all.

I have been used to the white cedar or arbor vitæ from boyhood, but I had no idea of the possibilities of this tree till I saw it in these woods. One day we went about three miles away from Caucomgomoc Lake, beyond an almost impassable range of hills, hoping to reach some spot the lumbermen had not disturbed. Near the streams large enough to float logs in the spring freshets the pine and cedar have mostly been cut, but in spots more remote and in valleys surrounded by steep rocky hills the original pines and cedars have been spared. Such spots are rare, but they may still be found. It is simply a question of dollars and cents. If the hauling will cost more than the trees are worth at the landing, they are left. In such an inaccessible spot we found the cedar at its best, often 2ft. in diameter and 30 or 40ft. to the limbs. Sometimes the trees were so close together that the tops touched. I think the lumber on one acre, if on the Merrimac, would be worth $5,000.

The pine is a fit emblem for Maine, and has no peer among New England trees. I hope again to see such pines as our fathers used to haul to the sea for masts. I have seen a pine log nearly 4ft. in diameter at the butt and 100ft. long, a shaft like the wand of Milton, hewn on Norwegian hills to be the mast of some great admiral. Maine has still a good deal of pine timber, and it is increasing every year. Young trees are fast growing to take the place of the old growth. I think it is generally believed that when a pine forest has been cut off a hard wood growth follows and the pine are not renewed. I am convinced by observation that this is not true. Our deciduous trees, when cut, send out a multitude of suckers about the stumps, and thus for a few years have a great advantage over the pine which starts only from the seed. In five years after the land has been cut over hardly any pines can be seen, but in ten years the pines begin to appear, and in twenty and thirty years take the lead; and finally the regions will be heavily timbered with pine. I think Maine will again become worthy of its name—the Pine Tree State—and I hope some wise legislation, such as freeing growing forests from taxation, may help to save this noble tree from the almost universal greed of gain.

Another very interesting tree of the Maine woods is the canoe birch, which grows to be 2ft. or more in diameter; our guides cut one on Caucomgoinoc Lake and took from the trunk an unbroken piece of bark 6ft. wide and 16ft. long and large enough to make an entire canoe without a splice. This birch, which is not common in Massachusetts, as far as I know, is plentiful hereabouts, and on one occasion afforded us a rare exhibition. Close to our camp was quite a grove of these trees, which were unusually large and tall. The bark, unlike the black or gray birch, is thin and papery, and curls up along the trunk and branches into soft rolls, giving the tree a shaggy appearance, and causing them to look much larger than they really are.

One night things were getting rather dull about camp, and I called Mark's attention to these trees and their combustible habiliments. He took fire at once, and started for them with me as an active second. I think Mark could enter upon an enterprise of this kind with more enthusiasm than any other person I have ever met. He would never leave a dry stump till the last root was burned, nor a wet one till his last match had been tried upon it. When I say he took fire, I mean it in a double sense, for we made a torch of a roll of bark and a green stick, and lighting it ran from tree to tree, setting fire to the light papery bark on the trunks. The result was surprising. For a short time the gloomy aisles of that old forest were lighted as no theater ever was. Imagine if you can a half hundred columns of flame branching out into a luminous network, and forming a canopy of fire with a background of pale, beautiful green, such as is never seen by the light of day. It was indeed an inspiring scene, and I question whether there was ever anything like it before. It is said there is nothing new under the sun, but under the moon, the pale, retiring moon, things have happened which the sun in all his boasted splendor never looked down upon. Mark stood beaming against a big shaggy birch, and as the darkness began to fall, stretched out his hand over an imaginary audience with the impressive gravity of a professor addressing his first class in physics, and said: "Gentlemen, you will observe by what simple means these extraordinary pyrotechnic phenomena are produced." He touched his torch to the tree behind him, and with a loud crackling and roar the fire climbed the trunk and limbs, and rolled out a vast cloud of smoke, making the forest once more as light as day, while we retired from the scene, he like Prometheus after he had taken fire from heaven, and I like little Julus toddling behind his father, *non passibus æquis*.

About half a mile below us on the lake, a party had been camping for several weeks. Upon inquiry we found the prospect for fishing was very poor. They had tried various places about the lakes, and had gone up the stream with no success. We asked them about Avery Pond of which we had heard favorable reports, and found they had tried it in vain. Avery Pond is connected on the north to Caucomgomoc Lake by a small stream three miles long. In spite of the unfavorable reports we concluded to go up and see the country. At that season the stream was very shallow, and only one person could be floated in each canoe; so the most of us made our way along the tote road bordering the stream. As I carried the only gun in the party it was suggested that I with my guide and canoe push on and see if I could not shoot some ducks in the pond, of which we were in need to help out our stock of provisions. So we hurried on, and found a small pond of about a dozen acres which we crossed, hoping to find some ducks in the water-grass that grew along the shore. We approached quietly, but found no ducks. A small brook entered here, making an open channel among the lily pads, and as we came near, I saw frequent ripples such as a swallow makes when he touches his wings to the water. But there were no swallows, and I told the guide to stop.

He thought I saw a duck, and expressed surprise to see me unload my gun, and take my fishing rod. He pushed the canoe into the lily pads, and around near the open channel, where he quietly tied the canoe to the setting pole thrust into the mud. Meanwhile I had got my rod together, and found Mack had put a fly on my line; although I had fished from boyhood with a bait, I had never attempted to cast a fly. Being naturally ingenious, I took a piece of salt pork, which the guide had in the canoe, and put a bait on the fly, so that a fish could take his choice. This idea I think was entirely original and I give it freely to my brother fishermen. I'm not the kind of a man to keep a thing like that to myself, I hesitate to tell what happened when that combination struck the water, but I cannot trample on the truths of history. Dozens of trout weighing from 1 to 2lbs. came for it, making the water boil for quite a space around, and when I drew in the first one, several followed almost to the canoe. My bait was seized as soon as it touched the water. It reminded me of throwing a kernel of corn to hungry chickens. Perhaps the other canoes came up in about five minutes, during which time I had caught eleven of the size mentioned above. From that spot we caught forty-four, and I have no doubt we could have caught more, but we had all we wanted both for ourselves and our neighbors in the other camp.

Some ten days later while we were camped on Ripogenus Carry, having visited a small lake, I found a nice lot of trout and tried in vain to catch them. I told Mark of my discovery and he found but little difficulty in getting quite a number of them.

There is as much difference in fish as there is in men. One of the best places for fishing on the West Branch is said to be near the mouth of Sourdnohunk River, or just below at the mouth of Aboljacknagesic Stream. A portion of our party had great success here the year before. Thoreau found good fishing in the same spot in '57, and an acquaintance of mine in '85. We caught nothing.

Opposite the Aboljacknagesic is a fine camp ground in full view of Mt. Katadin. From here is the best road to the mountain. The path is six or seven miles through the woods, ascending gradually to the foot of a slide, by which the ascent is made to the summit. Thoreau went up the mountain in '46, and speaks of going up a stream. So I concluded the slide must have taken place since that time. We made the ascent in one day, but were not fortunate in a view, as it rained nearly all the time. Still there were occasional breaks in the clouds, and we caught glimpses of the unbounded outlook from this mountain, which, in a sense, is an isolated peak, rising from a vast plain overlooking a larger area than any other spot on the Atlantic coast. The top is a plateau bordered by wild ravines and gulches. I had hoped to give some attention to the geology of the region, but my time as well as ability was limited. The horse-backs (so-called) were no doubt the most interesting formations in Maine. An excellent work upon the geology of Katadin was published a few years since by the late Prof. Hamlin of Harvard.

Four of us came near spending the night on the mountain, but were prevented by the size of the feet of one of our guides. The guides and a portion of our party started to go down, thinking the rest could easily follow. But when we tried to find the path we somehow lost it, and drifted aimlessly about in the dense fog. It was getting toward night and we had just time to reach camp. Any time lost in starting would at best compel us to spend a rainy night in the woods without shelter. The prospect was not cheering. One of us had been on the mountain before and he became convinced we were on the wrong side of the plateau, and two started for the other side, an experiment which would certainly have cost us a shelter for the night. Mark and I were inclined to hunt the region where we then were, and by accident we found a hole made by a staff in the soft, wet moss, and beside it a foot mark, which we at once recognized as belonging to one of our guides. Fortunately the others were not out of hearing and by following the footprints we soon found the place of descent, which was not thirty rods away. To say we were glad is using a very feeble adjective. I have never spent a night on Mt. Katadin in a driving storm, with no coat, no matches, and no food. If any one is ambitious to try it, he need not secure our guides, for they said they would never leave a party again under such circumstances, and I believe it.

The falls and rapids are a serious obstacle to many, as they cause a great deal of labor in carrying and involve not a little danger. One soon gets used to them, and with a good guide the feeling of fear soon gives place to an excitement, the pleasure of which is intensified by a little danger. But a guide in whom you have confidence is of great importance. To pick your way while moving like a racehorse among visible and invisible rocks is no mean accomplishment. The path must be selected rods ahead, and no mistake made; a boulder must be avoided on the right and a sunken rock on the left. Sometimes a course must be selected between two rocks just far enough apart for the canoe to pass. But suppose the rocks are too near or that no suitable channel can be found. The guide, who stands in the stern, must see all this, and be prepared for it. But if a mistake is made, what then? The setting pole is always at hand and the canoe may be stopped with it if the water is shallow enough; if it is not he must jump to the nearest rock and stop the canoe, and if that fails there is still a trust in Providence. I do not wish to underrate Providence in such a crisis, but would say that a setting pole is considered a very good reliance.

Our guide said that I once saved our crew from a wetting, if not worse, and modesty does not prevent me taking for myself that credit which I think I deserve. The guide stood in the stern and I sat in the bow. Two men that are used to it act independently and at the same time with a perfect understanding of each other, but a green hand in the bow is always told to paddle straight ahead, no matter what happens, in order that the guide may know what to depend upon. I was so instructed, and meant to do it. We were in the midst of a rough place that was making lively work for the guide, as there were rocks all about us and the water was very swift. A big rock lay directly before us, over the top of which the water was running, entirely covering it on our side but making a wild gulf below it. We were heading for it and going fast. I could not imagine what it meant, but paddled straight on till the bow of our canoe began to rise, and my hair also; then with a quick stroke I reached well out and threw the bow 8ft. to the right, and we shot like a pickerel over the shoulder of that rock into the white water below. It was a breach of orders, but it succeeded, and I didn't have to wait as long as Fitz John Porter for justice and restoration. The guide hadn't seen the rock. I had seen it, and meant to do just what I did do when the time came. I had used a paddle since I was a boy and knew just what I was doing. This sounds like brag, in fact it is brag, but no matter. Although I can handle an oar or a paddle better than a Latin verb, I could not, like our guides, take a canoe through a rough place without danger. It requires an intuition born of experience in handling a canoe.

I well remember an exhibition of skill and activity on the part of Steve and Frank Davis, his guide, that commanded our admiration. We had just crossed a carry and had launched our canoe, preparatory to running some bad rapids. The river was very high, making the descent more dangerous, and the guides were not acquainted with the locality except in low water. Frank Davis was the older and more experienced guide, and he and Steve had the lightest canoe; so they went ahead while the rest of us waited to see them through and learn the best route. For a short distance the water was comparatively smooth, but near the head of the rips it ran quite swiftly and soon became feather white. They took the right shore directly below where we were waiting, and when they had fairly entered the swift water Frank discovered dangers he had not suspected and turning in an instant shot directly across the river and held his canoe on the very verge of the rips in water running like a mill tail till he reached the other shore, where he went down in a safer channel. It was a brilliant feat of skill and judgment which I have rarely seen equalled, and which won both for himself and Steve our cheers and plaudits.

Mark and I followed in calm water well above the rapids, and safely took the same channel on the left shore. Mack and his brother Angus, who acted as guide for him, delayed till we had reached the shore below the rapids, where we were waiting to see them cross and follow our course. But for some reason they took the channel Frank and Steve had declined. They were soon in the wildest part, and we could see them darting among the rocks with their paddles flashing in the sun, until they had nearly reached the foot, when the canoe disappeared and we thought they were lost; but in a moment they darted out at the foot of the falls, each sitting upright in the canoe, which was filled and floating level with the water. Mack had lost his paddle and Angus had his across his knees, while they came down like a log. There was a high fall not twenty rods below, which they were rapidly approaching. The guides quickly sprang into a canoe to assist, but they were neither afraid nor injured, and soon reached the shore. I never knew just how the accident happened, but supposed a wave must have filled them, as their canoe was too heavily loaded for such a dangerous place; they should have known better.

Our course from Mt. Katadin was through Pamedemcook, South Twin and Quakish lakes. To avoid Grand Falls there is an ox carry to Milinockett Stream, which empties into the Penobscot not far from Fowler's Farm. Ten miles below Fowler's the East Branch unites with the West Branch of the Penobscot, below which point there is not much of interest, as it is partly settled. Having made a quick trip to Metawamkeag, we took the train and sent our canoes and guides by way of the river to Oldtown.

SLIDING SEATS IN ENGLAND.

IN spite of the cold and misty weather that prevails in England, the racing has already begun, the Oxford University B. C. sailing two races on March 2 and 3. On the first day two canoe-yawls, Snake and Gipsy, started against a new "sharpie canoe," as she is called, Battledore. She is one of two new boats, the other being named Shuttlecock, built this winter, 16×30, but with a midship section similar to a sharpie or skipjack. Both are fitted with sliding seats 4ft. long. The canoe yawls are of .6 rating and the canoes of .3. The course was 4 miles in a N.E. breeze, very fresh, and Snake at once came to grief through too much canvas, retiring.

The canoe covered the course in the best recorded time—35m. 20s.—for 4 miles, her actual time being 5s. better than the canoe-yawl.

Next day the wind was strong N.W. and very cold, the water freezing on deck during the race. Snake and Gipsy again started against Battledore, Gipsy leading over the course and finishing 1m. 30s. ahead, but both she and Snake failed to save their time on the canoe.

VESPER B. C.

THE annual meeting of the Vesper Boat Club, of Lowell, Mass., usually the embodiment of perfunctoriness, was this year characterized by all the active interest the most enthusiastic could desire. It was held around a camp fire at the boat house on March 17. All the annual reports made a good showing. The club had an income of about $3,000 and came out with about $100 to the good. Then the officers were elected: President, Paul Butler; Vice-Presidents, A. G. Swapp and D. S. Goddard; Treasurer, C. E. Goulding; Secretary, R. F. Hemenway. Directors: J. A Gage, S. T. Whittier and G. H. Stevens. The routine business was hurried through, and then Commodore J. W. Cartright, of the Eastern Division A. C. A., described with the skill of a second Stoddard some stereopticon views of A. C. A. meets, not omitting to preach a little sermon to Vesper men on the duties and pleasures connected with A. C. A. membership. The Vesper club has been represented at the annual meets by some dozen to fifteen members at various times. This is hardly more than 10 per cent. of the club's membership interested in canoeing, however, and in this strong contingent Commodore Cartright's missionary work found a fruitful field. This year's meet will see more Vesper men present than have attended heretofore. During Com. Cartright's little talk the interest among the 100 or more men present gradually worked up and when at the close an extemporized fife and drum corps with a big transparency marched into the midst of the men, they let themselves go in the fun of the moment, following the music with applause and laughter to the lunch table. Afterward there was more talk, banjo and guitar music and singing.

During the evening the matter of the purchase of a piano came up, and although the club has a contingent fund in the bank, the men would not allow it to be touched, and starting a subscription paper raised $220 within a short time. The amount will be made up to about $400 easily. During the past winter, while many other clubs have had the privilege of open water and all the season canoeing, the Merrimack has been frozen to a thickness of 12 to 15in., and the embargo will not be off probably until the latter part of April. In the meantime the members have taken up bowling, supporting a club in the Massachusetts League, that has done some splendid work, and carrying on two club tournaments on its own alley. These tournaments, bringing the larger part of the membership in contact with mutually pleasant results, have had a very important influence on the *esprit du corps* of the club. In its fraternal spirit, and indeed in all other respects, the club is stronger to day than it has ever been during its something like 14 years' existence. There are now about 180 members.

NEWS NOTES.

The Miquononus C. C. was organized on Oct. 31, 1891, at a meeting held at the Colonnade Hotel, in Philadelphia, at which were present Messrs. C. H. Elliott, J. A. Barten, Dr. F. W. Buckingham, N. Bruce Miller and M. D. Witt. The following officers were elected to serve for one year: Com., M. D. Witt; Vice-Com., C. H. Elliott; Purser, Dr. Buckingham, 1,806 Chestnut street, Philadelphia. The club now numbers ten members, with a strong probability of more in the near future. Temporary headquarters at the foot of Second street, Camden, N. J., have been secured and the house put in fair condition of repair. The flag of the club is a pointed burgee, 12×18in., with white field, a blue stripe 5in. wide bearing three white circles 3in. diameter with the letters M. C. C. in blue.

The following invitation has been received by Sec.-Treas. Wackerhagen: "*To the Members of the A. C. A.:* I cordially extend an invitation to hold your annual camp on an island I own in the north end of Lake Huron at as early a date as consistent with existing arrangements. I will provide shelter for any number you desire, good camp grounds, docks, fuel, steam tug to connect with the mainland, and any other necessary features to make the camp enjoyable. I will also assist in getting rates of transportation, suitable assistants, etc., etc., gratis. Respectfully, M. C. MCINTOSH."

The Eastern Y. C. has in preparation a very interesting series of races, to be sailed off Marblehead late in July, for the 21ft. l.w.l. class and also the New York 2½-raters of 25ft. sailing length. Efforts will be made to induce such representative boats as Io, Needle, Nameless, Smuggler and Pixie to visit Marblehead and race with the 21-footers, the sailing lengths of the various boats being from 24 to 27ft. The regular fixtures of the E. Y. C. are: June 18, spring regatta; June 27, annual regatta; Sept. 10, fall regatta; all off Marblehead. The club house on Marblehead Neck will open on May 28.

The visit of Com Winne, Sec'y-Treas. Wackerhagen and W. Howard Brown to Montreal on March 7 brought together a number of canoeists to meet the visitors at the City Club. A very pleasant reception occupied the evening, enlivened by much canoe talk and a number of songs and recitations. Com. Winne spoke earnestly to the Montreal canoeists concerning the Association and its aims, and of the best means of enlarging its membership and at the same time of increasing its value to each member.

Mr. J. W. Sparrow has been elected to fill the vacancy caused by the resignation of W. H. P. Weston, purser of the Northern Division, and F. L. Dunnell, ex-secretary-treasurer of the A. C. A., and purser of the Atlantic Division in 1889, has been elected to fill the vacancy caused by the resignation of Purser J. K. Hand. Purser Sparrow's address is 87 Yonge street, Toronto, Can., and Purser Dunnell's is 180 Jerolamon street, Brooklyn, N. Y.

The idea has been suggested of a harbor of refuge at Chatham, on Cape Cod, and if carried out the scheme will be of great benefit to yachtsmen, making a break in the long passage between Vineyard Haven and Provincetown. The chief difficulty lies in the doubtful durability of any breakwater in the shifting sands of the Cape.

PORTRAITS OF 46 FOOTERS.—Yachtsmen will find in Part V. of Peabody's *Representative Yachts*, a collection of very handsome photogravures of Gloriana, Beatrix and all the 46ft. class. This part bound separately in cloth can be had at this office.—*Adv.*

One good result of the Seawanhaka rule in the small classes in the East is shown by the cutting down of the boom of the Mudgekeewis, which was of abnormal length. It is not improbable that the yacht may be improved all around by the alteration.

The New York C. C. and the Marine and Field Club have agreed to exchange dates in order to accommodate the yacht regatta of the latter club, the New York C. C. taking June 11 and the Marine and Field June 18.

Dare, sloop, once owned by Mr. Maturin Ballou, was sold at auction by his assignee on March 16, being purchased by Vice Com. Jos. H. Sterling, Larchmont Y. C., for $3,650.

The Yorkville Y. C. will remove from its old anchorage, foot of E. 104th st., to the former station of the Knickerbocker Y. C. at Port Morris.

Choctaw, the Burgess 40 footer, has been sold to E. S. Wallbridge and others of the Rochester Y. C., and will go to Lake Ontario this spring.

Isis, cutter, designed by Mr. A. Cass Canfield and built by Poillon in 1885, has been sold to C. G. Miller, of New Rochelle.

Cricket, keel sloop, has been sold by J. T. Mott, present owner of Pappoose, to J. S. Thompson of the Buffalo Y. C.

The Clyde 2½ rater reached New York from Bristol last week, and sailed on the Ethiopia for Glasgow on March 19.

The special sailing regatta of the American Y. C. will be held on July 6 off the club house, Milton's Point.

Rifle Tournament.

DURING the continuance of the shooting in the FOREST AND STREAM rifle tournament, a time judge, who will also act as referee, to decide shots upon which the team captains can not agree, will be present at each match. This official will be a non-member of the contesting teams. Within a few days a circular letter will be sent to each club, this giving the dates for matches yet to be shot, and a list of clubs who are requested to furnish an official as above at each match. In case of a failure on the part of any club to furnish such an official the team captains have the privilege of selecting a non-member of either team to perform the above duties.

New Jersey Rifle Shooting.

[*Specially Reported for Forest and Stream.*]

MILLER RIFLE CLUB, Hoboken, Capt. Richard W. Dewey, Wednesday evening, March 16. The scores made to-night in the medal competitions in the three classes are below. The conditions were 10 shots, off-hand, 25-ring target, possible 250:

First Class.

D Miller ..... 25 25 25 25 24 23 23 23 21—239
L Vogel ..... 25 25 25 24 24 23 23 22 21—237
F Liell ..... 25 25 24 24 24 23 23 22 22—236
L Sohl ..... 25 25 25 24 23 23 23 23 22 22—235
G Schlicht ..... 25 25 24 24 24 24 23 22 21—233
F Brandt ..... 25 25 25 24 23 22 22 22 21—230
H D Hencken ..... 25 25 24 24 23 23 23 22 21—230
Capt R Dewey ..... 25 24 24 23 23 23 22 22 20 20—226

First class medal won by D. Miller with a score of 239.

Second Class.

J Carragher ..... 25 25 24 24 24 24 23 21 11 20—232
J H Kruse ..... 25 24 24 24 24 23 23 22 21 21—230
R Zoch ..... 25 25 25 24 23 22 22 22 21 21—230
D Peters ..... 25 24 24 23 23 23 22 22 21 21—226
F Kloepping ..... 25 24 24 24 23 23 22 21 20 19—225
A Thurk ..... 25 24 24 23 23 22 20 20 20 19—220
W Forkel ..... 25 25 22 22 22 21 20 20 19 19—215

Second class medal won by J. Carragher with a score of 232.

Third Class.

H F Meyer ..... 25 24 24 24 24 23 22 21 20 20—228
A Stadler ..... 25 24 24 23 23 23 23 22 20 19—226
H Seltenreich ..... 25 24 23 22 21 20 20 19 19 19—212
F Kammel ..... 24 23 23 22 20 20 20 19 19 18—208
H Vanderheyden ..... 25 24 23 22 21 20 20 19 18 16—208
F Dunstedt ..... 24 23 22 21 20 20 20 20 19 19—208

Third class medal won by H. F. Meyer with a score of 228.

The Hoboken Schuetzen Club, Capt. Henry Wirth, have completed all arrangements for the first annual ball of that organization, which takes place at Russell & Roedel's Schuetzen Hall on April 24. A feature of the evening will be the presentation of a handsome medal to the most popular Schuetzen captain. The affair promises to be well patronized.

EXCELSIOR RIFLE CLUB, Jersey City, Tuesday, March 15.—The scores made for the weekly class medals are appended below The conditions were ten shots off-hand, 25-ring target, possible 250:

C Boag ..... 25 25 25 25 24 23 23 23 23 23—239
W Weber ..... 25 25 25 24 24 24 24 24 23 21—239
L P Hansen ..... 25 25 25 25 24 24 23 23 22 21—237
C L Pinney ..... 25 25 25 25 24 24 23 23 23 20—237
W J Channing ..... 25 25 25 24 24 23 23 23 22 22—236
W J Hennessy ..... 25 25 25 24 24 24 23 23 22 21—236
Wm H Hallowell ..... 25 25 25 24 24 24 23 23 22 21—235
Geo C Varick ..... 25 25 24 24 23 23 23 22 22 21—233
J Hughes ..... 25 24 24 24 23 23 22 22 22 22—231
T Hughes ..... 25 24 24 23 23 23 23 22 21 21—220
C Bauchle ..... 25 24 24 23 23 23 22 22 21 21—228

The medal winners in their respective classes were: first class, Wm. Weber, 239; second class, C. L. Pinney, 237; third class, G. C. Varick, 232.

The Greenville Rifle Club, of Jersey City, and the Puritan Rifle Club, of Newark, ten men teams met in a match at the range of the former in Metropolitan Hall, Jersey City, last Wednesday evening, the 16th inst. which resulted in a victory for the former by 43 points. Colin Boag, of the Greenville held the high score of the evening 237, Carpenter of the Puritans was a close second with 236. Outside of these the scores were ordinary. The scores made by both teams are appended below:

Greenville Rifle Club.

H Gotthardt ..... 23 24 23 25 23 22 21 21 23 20—224
J Dodds ..... 23 24 25 25 22 21 22 23 20 20—225
J Purkess ..... 25 24 24 23 22 23 21 21 23 23—229
W C Collins ..... 24 23 23 22 23 22 21 22 22 21—222
J Cook ..... 23 22 22 21 21 23 24 25 23 19—223
H Chavant ..... 24 23 24 21 20 19 19 20 22 24—216
J Kaiser ..... 22 25 23 24 22 22 21 23 22 22—227
Capt. W H Robidoux ..... 24 23 25 25 23 21 21 24 22 23—231
C Boag ..... 24 25 23 25 24 24 23 25 22 22—237
C Scheelein ..... 23 24 24 25 25 23 22 21 21 20—228—2262

Puritan Rifle Club, Newark.

F Danger ..... 25 24 21 23 22 21 21 22 20 22—224
C Kopf ..... 23 23 24 25 24 23 22 22 21 25—232
Morris ..... 23 23 20 20 19 18 18 17 23 22 21—203
Capt A Sauer ..... 24 24 23 22 23 21 22 23 20 21—223
E Helb ..... 23 24 22 22 23 24 25 21 21 24—230
Weiler ..... 24 23 23 22 23 23 23 22 21 21—223
J Woods ..... 25 23 22 21 21 22 24 23 23 18—222
C Carpenter ..... 24 25 25 25 23 23 22 23 21 25—236
J Clark ..... 24 22 21 21 20 22 20 23 21 23—217
J Doherty ..... 23 23 21 19 18 20 19 18 21 19—200—2219

The average per man heretore was: Greenville's 222⁹⁄₁₀, Puritans 221⁹⁄₁₀. An interesting social session followed the clearing away of the battle's smoke, and the scene of carnage was changed to that of both teams mingling together in a social way. A return match will take place in a short time.

The tournament arranged by FOREST AND STREAM for New Jersey rifle clubs continues briskly along, it already being half over. The Miller Rifle Club, of Hoboken, is in the lead. The Our Owns, Howards and Essex Amateurs are close behind. The Jefsens and Palisades, of Jersey City Heights, are making a valiant struggle for last place. The closing matches will take place on June 1, these being the ones scheduled for Feb. 22, Washington's Birthday.

HOBOKEN SCHUETZEN CLUB.—Capt. Henry Wirth, Thursday, March 17. Ten shots, off-hand, 25-ring target, possible 250:

Chas Weilman ..... 25 25 25 24 24 23 23 22 22 21—234
Capt Wirth ..... 25 25 24 24 23 23 22 21 21 21—229
F W Koeger ..... 25 25 25 24 23 23 22 20 20 19—226
P Schunke ..... 25 25 24 24 23 22 22 20 20 19—222
J Stein ..... 25 24 24 23 23 23 21 20 19 18—220
C Herman ..... 24 23 23 22 22 21 21 20 19 19—214
F Flugentaler ..... 25 24 22 22 22 20 19 19 18 18—210
C Schadel ..... 25 23 23 22 21 20 20 19 18 18—209
Wm P Smith 23 23 23 22 20 19 18 18 17 17 200
C Wiskow ..... 25 24 24 21 20 19 18 17 16 16—200
C Wallert ..... 24 23 22 21 20 18 18 17 16 15—194

The club has purchased a pair of fine rifles, and the members expect to do better work with them in a very short time. They meet at Russell & Roedel's, 223 First street, Hoboken, every Thursday evening and Sunday morning.

Blencker Company, No. 39, Germania Schuetzen Bund, Captain Albert Molbmking, held its semi-annual shoot at Russell & Roedel's Schuetzen Range, 223 First street, Hoboken, on the 20th inst. Fifty dollars and four handsome and costly gold medals were distributed among the Schuetzens present. The medals, open to the company members only, were won by John Hilpert and Claus Von Der Lieth, with scores of 25, 24, 23—72, and 25, 25, 20—70, and 25, 22, 21—68; 24, 23, 20—67, respectively. The shoot for medals, open to guests, resulted in a far prettier race. The first was won by Lambert Schmidt of Freischutz Company N. Y., 53, with score of 25 24,23—72, and 25, 24, 22—71. The second was secured by John Meyer, of General Herzog Company, with scores of 25, 25, 23 —73, and 25, 23, 21—69. The first and second money prizes were divided by Lambert Schmidt and Frederick Brandt of General Herzog Company, with scores of 25, 25, 24 each. A reception followed in the evening. The shooting committee were composed of the following gentlemen: A. Paasen, A. Hilpert and Claus V. D. Lieth.

The Palisade Rifle Club's 10-men team were defeated by the Hudson Rifle Club at the range of the former on Palisade avenue, Jersey City Heights, on Monday evening, March 21. The clubs were scheduled for a match in the FOREST AND STREAM tournament, but as the Hudsons had withdrawn on account of their case with the Essex Amateurs, and having withdrawn, a 10-men team match was the result. John Rebhan with a score of 232, A. Malz 230 and Chas. E. Bird 229 led the Hudsons in the scores, while J. H. Kruse and Geo. P. Herrschaft did likewise for the Palisades with scores of 228 each, with Geo. W. Graf trailing close behind with 227. The averages, however, were poor on both sides. The Palisades attaining only 208¹⁰⁄₁₀ and the Hudsons 217⁹⁄₁₀. The scores made were, 10 shots, off-hand, 25-ring target, possible 250:

Hudson Rifle Club, Marion.

A Malz ..... 25 25 25 24 23 23 23 23 21 18—230
T A Reynolds ..... 24 24 24 23 22 22 22 21 21 21 20—223
A Braun ..... 24 24 24 24 24 23 22 22 18 18—224

J Buch ..... 24 24 23 20 19 18 17 16 16 15—192
J Rebhan ..... 25 24 24 24 23 23 23 22 22 22—232—2176

Palisade Rifle Club.

J H Kruse ..... 25 25 25 24 24 23 22 21 21 18—228
C Burk ..... 24 24 23 23 22 22 21 21 21 20—221
Capt J Reinhardt ..... 25 24 24 23 22 21 19 19 17 15—209
H Rosenthal ..... 24 24 23 22 21 21 18 17 17 16—202
H Boddey ..... 25 23 23 23 22 22 22 21 19 19—219
A Rossey ..... 24 22 21 19 17 17 16 14 12 12—173
G Graf, Jr 24 22 22 22 22 22 20 17 15 0 187
G Herrschaft ..... 25 25 24 23 23 23 23 22 22 21 20—228
G W Graf ..... 25 23 24 24 23 22 22 22 21 19—227
J Kehrwald ..... 23 22 21 20 19 19 17 17 16 15—190—2084

This gives the victory to the Hudsons by 92 points. Refreshments followed. Matches of 10 shots a man followed between J. Smith and Henry Baddey. The scores were: Smith 232, Boddey 234. Other matches were: J. Rebhan 241, C. E. Bird 244, J. Buch 240, A. Heidorft 227. J. Rebhan 223, C. E. Bird 228. A return match will shortly follow, to take place at the range of the Hudsons, in Marion, when the Palsades expect to have sether team. During the evening John Rebhan exhibited a handsome medal, presented to him recently. It is a beauty, and John is consequently proud of it.

The Herman Rifle Club, Capt. Herman Neuman, has changed its headquarters to 354 Palasade avenue, Jersey City Heights. A new board of officers will be elected at the next meeting. Their weekly shoots will take place every Saturday evening.

The Hansa Rifle Club, of Hoboken, are fitting up their spacious headquarters, in the Hansa Hotel. The club is rapidly becoming large in membership and promises soon to be in line with more representative clubs in Hudson county. It contains quite a lot of good material, who promise to become excellent shooters.

Already New Jersey rifle shooters are preparing for the out-door season, and the rifles of larger caliber are being carefully looked to. Just as soon as the out-door season commences, indoor shooting will practically be given up until next winter.

A tournament for Hudson county rifle clubs, to take place next winter, is already being discussed. Several clubs have already expressed their desire to enter. The Hudson Rifle Club is working to get the clubs together, although it will not take place for quite a long time.

The Palisade Rifle Club has completed all arrangements for its first annual shoot at Berg's Park, Jersey City Heights. The affair is in the hands of an efficient committee, with Captain John Reinhardt at the head.

JAY H. KAY.

Dominion Rifle Association.

OTTAWA, March 16.—The annual meeting of the Dominion Rifle Association was held in the railway committe rooms, House of Commons, this morning. Lieut.-Col. Kirkpatrick, M. P., presided. On his right was seated his Excellency the Governor-General. Among others present were Major-General Herbert, commander of the forces; Major Ibbottson, 4th Royal Scots, Montreal; Major Stark, Victoria Rifles, Montreal; Capt. Laurie, R. S. I., St. John, N. B., and Lieut.-Col. Massey, 6th Fusiliers, Montreal.

The annual report of the association was laid upon the table by the president. It stated that the association has had a most successful year, the attendance at the annual competition at Ottawa, 426, being the largest since the inaugural meeting at Laprairie in 1868. The time of competition was thought to be too short, and the Council this year will consider the advisability of extending it over another day. Special reference was made to the match between teams from the Senate and House of Commons. The Canadian team at Bisley was more successful than in any previous year, having won a total of £800 in money prizes, also the Prince of Wales prize, which was taken for the first time by a Canadian, the winner being Capt. McMicking. Lieut. Davidson was fourth in the competition for the Queen's prize, a higher place than was ever won by a Canadian before.

The financial report showed receipts amounting to $19,415, and an expenditure of $18,469, leaving a balance of $945 in hand.

The president, in moving the adoption of the report, congratulated the association upon the progress of the year, and said that the success already achieved at Bisley showed that they might hope at any time to hear of a Canadian winning the blue ribbon at that meeting.

The following officers were elected for the ensuing year: President, Hon. G. A. Kirkpatrick, re-elected; Vice-President for Ontario, Lieut.-Col. J. M. Gibson; for Quebec, Robt. Hamilton; for New Brunswick, Lieut.-Col. A. E. Botsford; for Nova Scotia, Lieut.-Gen. Laurie; for Manitoba, M. A. Girard; for British Columbia, Lieut.-Col. W. J. MacDonald; for Prince Edward Island, Hon. A. A. McDonald. Members of the Council—For Manitoba, Major Hugh John Macdonald, T. M. Bailey and Robert Watson, M. P.; British Columbia; Lieut.-Col. Ross and Capt. W. H. O'Grady, Quebec; Lieut.-Col. Massey, Senator J. A Ogilvey, Lieut.-Col. Henshaw, Majors Stark and Ibbotson, New Brunswick; J. D. Hazen, M. P., Josiah Wood, M. P., and Captain J. T. Hart, Prince Edward Island; Lieut.-Col. H. R. Smith and Capt. W. DeC. O'Grady, Northwest Territories; D. H. McDowell and Major Mason, Ontario; Lieut.-Col. Panet, Major Delamere, Major Teller, Lieut.-Col. White, Capt. Denistoun, Major Wright, Lieut. Sutherland, Nova Scotia; Major Weston, Lieut.-Col. Curren, A. D. C., Lieut.-Col. Walsh. At a meeting of Council held subsequently, Lieut.-Col. F. C. Henshaw, of the Victoria Rifles, Montreal, was elected chairman in the place of Hon. Col. Ouimet, who had resigned.

The Beideman Rifle Club.

BEIDEMAN, N. J., March 18.—The following are the official scores made by members of the Beideman Rifle Club for week ending to-day; conditions, 21yds., ¼in. ring target, 10 shots per string, strictly off-hand:

J L Wood ..... 238 E L Gardner ..... 230 W Gilbert 228
A J Yergey ..... 231 J C Wurflein ..... 229 C Meyner 225

WALT GILBERT, Secretary.

Empire Rifle Club.

NEW YORK, March 16—The following scores were made by the members of the Empire Rifle Club last night at 12 St. Marks place, distance 100ft., 25-ring target:

W Rosenbaum ..... 235 H Fetzer ..... 208 J Grim 230
A Rosenstraus ..... 231 B Zahn ..... 233 Meisenholder 226
C Zettler, Jr 230

B. ZAHN, Sec'y.

The English Revolver Rules.

THE following is the first official notice of the new rules of the National Rifle Association of Great Britain governing future revolver competitions:

REVOLVER COMPETITIONS—BISLEY, 1892.

The following alterations are made:

Targets.—Circular, on a square card, subdivided as follows:

Bullseye, 2in. diam. (no white disc in middle), counting 7 marks.					
3 in.	"	ring, ½in wide	"	6	"
4½in.	"	" ¾in.	"	5	"
6½in.	"	" 1 in.	"	4	"
9½in.	"	" 1½in.	"	3	"
12 in.	"	" 1½in.	"	2	"

Corners not to count.

Revolvers.—Two classes—Military (*a*), Any (*b*).

(*a*) Military revolvers. Lead sights not allowed. Other conditions and ammunition as per 1891 rules.

(*b*) Any revolvers. Minimum caliber .320. No restrictions as to weight of pistol, length of barrel, sights or ammunition.

Minimum trigger pull 4lbs. for both (*a*) and (*b*).

No claim for a second bullet having passed through a previous bullet hole without leaving any trace of a second circle shall be allowed until some method is devised by which such passage of a second bullet can be clearly proved.

The details of the competitions and the list of prizes for each class of revolver will be published in the programme of the meeting. By order.

W. MACKINNON, Colonel, Secretary N. R. A.

12 PALL MALL EAST, March 3.

Wurflein Rifle and Pistol Club.

PHILADELPHIA, March 19.—The high score for this week's competition was 247, made by E. Travis, which target I send you, made at 25yds., using Wurflein rifle, off-hand position, left hand fully extended, ¼in. ring target, ½in. bullseye, while the balance of the members had to be satisfied with the following scores:

E Travis ..... 247 J J Mountjoy ..... 243 Dr Gardiner 236
A J Yergey ..... 244 W Wurflein ..... 240 J C Wurflein 233
H J Mehard ..... 243 Leslie Wood ..... 237 J Dankheimer 220
J G Dillin 243

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday, March 15, at Geo. McCune's shooting gallery, 146 South Halstead street, Chicago. Conditions were: 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 500 points:

A McBean 274	R Taylor 265	M Tatro 255	
J Hosie 266	C A Hankle 264	T Ford 253	
G McCune 266	W J Gibbs 263	H S Burley 252	

Mr. McBean is a new member, joining the club but a week ago. He came from St. Louis, and has the reputation of being a first-class shot at both long and short range.

After the regular shoot the boys made up a handsome purse, 10 shots each, 25yds, open sight, off-hand, Massachusetts paper target, winner to take the purse; possible 120:

C A Hankle 107	G McCune 103	H S Burley 101	
R Taylor 105	W J Gibbs 102	A McBean 99	
J Hosie 104			

It will be seen by the scores that Mr. Hankle took the purse. A tendance was large and the boys had a lively and pleasant time. There will be another purse shoot next Tuesday evening at the same place. The Garden City Rifle Team is the largest and best short-range team in this or any other city, as we are open to any team that may wish to shoot us a match. C. A. HANKLE.

Lischke Rifle Scores.

JERSEY CITY HEIGHTS, N. J., March 16.—Scores of the A. Lischke Rifle Club practice shooting, 110ft. distance, 25-ring target:

A Lischke ..... 25 25 25 24 24 24 23 23 22 20—235

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

Manufacturers' and Dealers' Association tournaments:

Staunton, Va.—Second week in April.

Savannah, Ga.—First week in May.

Pittsburgh, Pa.—Second week in May.

Brooklyn, N. Y.—Second week in June.

Watertown, N. Y.—Fourth week in June.

DRIVERS AND TWISTERS.

A GREAT, large time is expected at Passaic, N. J., to-morrow when the second team contest of the Trap-Shooters' League of New Jersey will be held under the auspices of the Passaic City Rod and Gun Club. The contest is open to any and all clubs in New Jersey under certain conditions, the teams to be comprised of 5 men each and each man to shoot at 25 artificial targets, under the five-trap rapid-firing system. The traps will be worked by the aid of the Paul North electric trap-pull, which is giving such general satisfaction wherever tried. Bluerock targets will be used. The team match will begin at 12 o'clock. The traps will be in position ready for active business at 9 o'clock A. M., and sweepstake shooting will be in order from that time to the start of the team contest. The grounds may be reached via the Erie or D. L. & W. railroads from New York. On the former road shooters may take the 8, 9:50, 10:30 A. M., 12, 1, 1:50, 2:40 or 3:07 P. M. trains, and on the latter the 7:20, 9:30, 10:30 A. M. or 4:10 P. M. trains for Passaic. Plenty of ammunition and an abundant lunch will be on hand.

* * *

Anent the above, the Newark shooters who desire to avoid the necessity of traveling to Hoboken in order to reach Passaic are advised that Carl von Lengerke has arranged for a stage to leave the store of Von Lengerke & Detmold, 843 Broad street, Newark, N. J., at 9 A. M., and that all who desire may take this method of going to the shoot.

* * *

There will be some lively work at Wilmington, Del., next Tuesday, Wednesday and Thursday, at the first tournament of the Wilmington Gun Club, to be held on the Riverview baseball grounds. The events, ten in number each day, are open to all comers, and everybody will shoot on the same plane. There will be no favoritism, and each man will be obliged to win or lose on his merits. From past experience with the Delaware people, I am justified in saying that those who attend the shoot will be accorded a hearty welcome and given a grand time by the members and friends of the club. The grounds are conveniently located and are reached by the Riverview electric cars, which carries its freight to the gates.

* * *

What astonishing assertions we do hear at times. Now we are given to understand that in the western portion of this great and glorious republic it is the strength and speed of a bird, *not its course*, that makes it hard. In the vicinity of New York, where there are a few men who shoot at live birds occasionally, it is considered that the course of a bird is a very powerful factor. No one is foolish enough to say that the strength and speed of a bird are not factors, but still the shooters in the locality mentioned are fain to say that they would much rather have a very fast straight-driver or quarterer than to be compelled to pin their faith on a bird of medium pace that persisted in performing corkscrew gyrations through the air. Coming down to sober earnest, New York and New Jersey trap shots, claim that a man who cannot "grass" drivers and quarterers is not a shooter. These men claim that the course of the bird comes first in consideration, and that the strength and speed are secondary considerations.

* * *

A few excerpts from the lay press. You pays your money and you takes your choice:

"E. D. Fulford leaves on Monday for Utica, N. Y., where he is to be married."

"E. D Fulford has decided to remain in Chicago a few days longer."

"E. D. Fulford has decided to make Chicago his permanent abiding place, and will shortly remove his family there."

* * *

Who will be the first man to post a forfeit for a 100-bird match with Frank Class, the Pine Brook (N. J.) expert? Frank tells me that he means business and wants to shoot any man in the world for $250 a side. This is a plump and plain offer, and should draw something. If any one cares to take up the gauntlet, let them send a forfeit to this office, and Frank says it will be covered before it gets cold. He is shooting the race of his life and should be able to shoot an interesting match against even the doughty "Captain Jack."

* * *

March 29 will be a red-letter day at Utica, N. Y., when the Oneida County Sportsmen's Association will hold a great tournament at kingbirds and live pigeons. The first event will be at 10 kingbirds, $1 entry. Then will follow in order, 15 kingbirds, $1.50 entry; 7 live birds, $3 entry and 20 kingbirds, $2 entry, with $30 guaranteed. Next in order will be an exhibition shoot at 100 live birds each, between E. D. Fulford and Dr. W. H. Booth, president of the Oneida County Sportsmen's Association, this match to be called promptly at two o'clock P. M. After this there will be the following contests in order: 7 live birds, $3 entry; 10 kingbirds, $1 entry; 7 live birds, $3 entry and 20 kingbirds, $2 entry with $30 guaranteed. The kingbirds will be shot under the rapid firing system. Live birds will be shot from five ground traps. In all events ties will be divided. The grounds are one minute's walk from the West Shore depot.

* * *

The Auburn (N. Y.) Gun Club announces a grand bluerock tournament to be held on its grounds on Thursday, March 31, under the personal supervision of Paul North. The new bluerock targets, expert traps and Paul North's electric trap pull will be used. Hot coffee and lunch will be found on the grounds.

* * *

From Cazenovia, N. Y., the following letter has been received: "The Cortland County Sportsmen's Club (this includes the village of Horner, which has some good shots, as well as Cortland,) have let the contract for building a club house on their grounds, situated on the Tioughoughua river, about midway between the two places, among a grove of oaks, whose shades furnish a pleasant place for club meets. They intend to hold a large tournament as soon as it is completed. HAMMERLESS."

* * *

Secretary W. H. Fowle, of Staunton (Va.) Gun Club writes as follows anent the coming tournament at that place: "The Staunton Gun Club, assisted by the Manufacturers and Dealers' Association, will hold a big shoot here the second week in April. The club have beautiful grounds, located within a mile of this city, which can be reached by street railway. The citizens here are taking great interest in the shoot, which we hope to make a grand success. Our railroads are giving us half rates for the occasion, and quite a number of applications have been made for programmes from all over the country, which will be promptly furnished to anyone who addresses the secretary. Lunch will be furnished on the grounds each day by the ladies of this town. No pains will be spared by the citizens generally to give visitors a good time."

* * *

The fourth contest for the Connecticut trophy, donated by the Standard Keystone Target and Trap Co., will be held on the Colt Hammerless Gun Club grounds, Hartford, Conn., April 15, under the following conditions: Three-men teams from any club in Connecticut, 30 birds per man, entrance free, the winning team to hold trophy until the following monthly shoot. These shoots to be held by the different clubs in the State. Every club invited. Sweepstake shooting before and after the team shoot. From 9 A.M. until dark we will have pigeons in the air.

* * *

At the annual meeting of the Capital City Gun Club, of Washington, D. C., the following officers were elected for the ensuing year,: Pres., J. Henry Gulick; Vice-Pres., B L. Osborn; Sec'y, Arthur S. Mattingly; Treas., James M. Green; fifth member of the executive committee, O. E. Hart; Capt., F. A. Happer.

C. H. TOWNSEND.

Down Mamaroneck Way.

AN interesting series of shoots were held at Erickson's Hotel Mamaroneck, on March 18. The first event was at five birds each, for the birds and a fair sized purse, between teams comprising Lawrence, Groltz and McKlusky of New York, and Erickson, Stuber and Kolte, of Mamaroneck. The result:

Lawrence	11011—4	Kolte	10011—3
Groltz	01000—1	Erickson	01111—4
McKlusky	00000—0—5	Stuber	11111—5—12

Match No. 2, repetition of above, except that each man shot at four birds:

Lawrence	1111—4	Kolte	0010—1
Groltz	1101—3	Erickson	0111—3
*Fenn	1010—2—9	Stuber	1000—1—5

*McKlusky's substitute.

In a few weeks a big shoot will be held at this place, and shooters from all over this section will be invited. Full particulars will be given in these columns as soon as the details are arranged.

Big Sweep at Dexter Park.

DEXTER PARK, L. I., March 21.—Sweepstake shoot at 100 bluerocks each, with nine entries, at $3 each, three moneys—$14, $8 and $5. The snow seriously affected the shooting, making a strong glint on the gun. P. Liebinger was an absentee from the original team of ten:

F Pfaender	61	T Short	64
C Stuetzle	70	P Kunzweiler	50
J Birmel	39	J Link	59
C Horney	35	M Schoettler	52
W Vorbach	34		

Referee, Mr. W. Siemering. Scorer, Mr. Walter.

Shooting at Pine Brook,

THE following matches were shot at Frank Class's Hotel, Pine Brook, N. J., on March 21. The conditions were 21yds. rise, 80yds. boundary, old Long Islands rules to govern:

No. 1, 10 live birds, $25 a side:

A Martin	1101010111—7	E Cluis	0100111100—5

No. 2, 15 live birds, $30 a side:

F Townley	111101011011001—10	A Kayhart	001111101001011—9

No. 3, 15 live birds, $25 a side:

T Martin	111010010111011—10	J Donnelly	011101100111101—9

Final Decision for the Peters Cartridge Co.

THE case of Hisey vs. Peters, which was a legal battle between the Standard Cartridge Company of Chicago, and the Peters Cartridge Company of Cincinnati, for the ownership of an important patent on the most improved form of cartridge-loading machine, has just been decided in favor of the Peters Cartridge Company by the Commissioner of Patents. There had been two prior decisions by other tribunals in favor of Peters, but the Standard Company had appealed, and this final decision has been made against them from which there is no appeal under the law.

HALL & BROWN, Attorneys for the Peters Cartridge Co.

Lawrence and Topeka.

TOPEKA, Kan.—There has been some talk of a live bird match between Lawrence and Topeka, ten men to team, but no definite arrangements have been made as yet. It takes about as much talk to get up a match here as it does in Chicago.

Three of our boys got hold of some pigeons not long ago and took them out and shot them from one trap. They won't tell the scores but the boy from whom they got the birds is still offering some of them for sale. F. E.

Virginia Pigeons at John Erb's.

IT is very seldom, indeed, that a party of shooters are obliged to stop shooting on account of the scarcity of birds on the "Old Stone House" grounds, on Bloomfield avenue, Newark, N. J., but last Saturday was an exception to the general rule. John Erb had a fair supply of birds early in the week, but they were all used up by private parties. On Saturday there were just 40 birds in the coops, and these were shot before 2:30 P. M. After that the small party present were prevailed upon by Captain Wm. Cranmer to wait until the New York and Bloomfield express reached the place, when he promised that they should have some rare fun.

"My friend, Billy Ives, of Norfolk, Va.," said Captain Cranmer, who runs a three-masted schooner between that port and New York, "sent me three boxes of Queen Anne pigeons, which reached New York this morning. As soon as I got on track of them I ordered them sent up here, and expect to see them before 5 o'clock. You all know," continued the genial Captain, "that your birds are all 'duffers,' soft, in fact, around this locality, and that all the real hard ones are in the wild, weird, wooly, whistling West, so of course you'll not expect to see real hard ones from Virginia, but still I think they will keep you guessing."

At 5:10 the Southern birds arrived; at 5:15 shooting recommenced, and at 6.10, when the fun closed, over 100 birds had been trapped. The Southerners were a rattling good lot throughout, some of them being exceptionally fast and others most terribly tricky in their flight. Five events in all were shot during the afternoon, each of them being at 5 birds, $5 entry, 2 moneys. The first two were at Erb's birds and the last three at the "Cranmer importation." Below will be found the scores in detail:

	No. 1,	No. 2,	No. 3,	No. 4,	No. 5,
Canon	22212—5	11201—4	11111—5	21112—5	12010—3
Hollis	11111—5	12o12—4	02212—4	10111—4	21o12—4
Castle	11112—5	12121—5	22222—5	12222—5	2Co01—3
Cranmer	12111—5	11111—5	11111—5	21112—5	10121—4
Lindsley	...	...	210o2—3	o2222—4	22212—5
Erb	...	...	11212—5	12201—4	22211—5

In event No. 3, Canon drew his pro rata of first money and the others shot off their share in No. 4, the money finally going to Castle and Cranmer. Canon, the famous one-armed expert was shooting a great race despite the fact that on five consecutive occasions when he pulled his first barrel on a bird both barrels would go off simultaneously. It can be understood that the explosion of seven drams of powder will cause somewhat of a recoil.

The final shoot was a $1 miss and out, with five entries. This was a walkover for Cranmer who killed his first bird, all the others missing.

While the party were waiting for the importation of Cranmer birds the captain shot several Keystone matches. In the first he tied with Canon on 8 breaks, the latter winning on the shoot-off. Cranmer then defeated Castle in three matches at ten Keystones each.

Atlantic Rod and Gun Club.

SOME good birds were shot at by the members of this lively organization at West End, Coney Island, on March 17, when the members of the Atlantic Rod and Gun Club had their semi-monthly outing. The first event was a match at twenty-five birds each between Richard Dwyer at 30yds. and F. W. Bauer at 21yds., the stake being $25 a side. The result:

Dwyer	1222220231211110o0010001o—15
Bauer	1112112122210100111101000—18

The next event was at 5 birds each for $10 each and the birds. The score:

W Weber, 25yds	20211—4	W Caldwell, 27yds	210o1—3

Gustav Freche, of the Newark Gun Club was referee in the above matches. The third event was a sweepstake at 5 birds each, $1 entry, 3 moneys, shoot-off at 5 birds. The scores:

	Ties.		
Caldwell	21122—5—21121	Bonden	02101—3
Morris	11111—5—22211	Freche	01110—3
Nichols	11121—5—10223	Bauer	00020—1
Voorhees	11210—4	Balzer	00002—1
Shields	01111—4		

Long Island Sportsmen's Club.

THE Long Island Sportsmen's Club held its monthly shoot at Dexter Park, March 14, each member shooting at 20 bluerock targets in the prize contest. The scores follow:

C Stuetzle	11111111111101111011—18
Schoettler	10011101100011101111—13
C Rieber	01111000011110111100—12
S Kunzweiler	00110011010111111111—14
L Rausch	01111111100001011—13
N Gentzlinger	00101100010010060100— 6
A Fliegel	11010110011011000001—10
Maj Guenther	00101001100101001010— 8

C. Stuetzle wins medal.

A number of sweepstakes at 6 bluerocks each were also shot. In the first Monier scored 5, Beeber and Schoeller 4 each. In the second Monier and L. Biebes broke 5 each, the latter winning the pot on the shoot-off; C. Beeber and Helgins 4 each; Schoeller and Lamset 3 each. In the third Stuetzle broke 5, Kunzweiler 6, Schoeller 5, Lamset 4, Fliegel 4 and C. Beebes 3.

The Hamilton Gun Club.

HAMILTON, March 14.—The Hamilton Gun Club held its regular monthly shoot to-day, notwithstanding the wind, which was blowing a hurricane across the traps, and the thermometer at zero. The contest was keen from the fact that two valuable gold medals were up for competition for the first time. The conditions are 25 singles per man, rapid firing, the individual winning for fourth time to own same, with Wilson handicapped 2yds. In the competition for the club challenge medal Hunt won with comparative ease, as the following score will show. Shoot for challenge medal, 15 singles, 5 pairs:

G Hunt	11001111111000 11 11 10 10 11—18
Wilson	10001100111101 11 10 00 11 10—14

First class shoot for two gold medals, 25 Hamilton bluerocks, rapid firing system:

Wilson	1001111111110111101111111—21
C Hunt	1100101111011010110010111—16
Bowman	1111010111111111011010110l—19
Clifford	0111111111111010101111111—21

I Smith	1001110100111111101110011—17

Auburn Gun Club.

AUBURN, N. Y., March 17.—Neither snow storms nor snow banks will prevent the average Auburn shooter from answering to roll call when the time for a regular club shoot arrives. The attendance at our club shoot Wednesday was fully up to the average, and the sweepstakes were even larger than common. Trap-shooting interests in this part of the State are booming, and we learn of the formation of new clubs all around us. Paul North has arranged to give a day's shoot here March 31, when he will show the boys how he throws birds with his expert traps and his celebrated electric trap-pull. We expect shooters from many parts of the State, as this is the only shoot he will hold in this State at present. Scores made at our last shoot:

Class A.

Whyte	1111111111101111111—19
Carr	1011111111011111111—18
*Tuttle	1111111111010101011—17
Devitt	1111110111010110011—15

Class B.

Nellis	0111111111111111111—19
Garrett	1111101111111011111—19
Vanderlool	1111110111101111110—16
Brister	1100001110011111111—13
Sinclair	0101011010110111100—13

Tie:

Nellis	1111111111—10
Garrets	1110111111— 9

Class C.

Egbert	1111111011110011111—17
White	1111111101101110001—15

Barnes	1011001001001110101101—11
Webster	0011110011101101100—11

* Handicapped 2yds. C. W. B.

Rochester Rod and Gun Club.

ROCHESTER, N. Y., March 16.—The following scores were made at the semi-weekly shoot of this club to-day. Conditions, ten Peorias, five traps, A. S. A. rules: Meyer 8, 10; Stewart 10, 8, 7, 9; Kimball 7; Moore 4, 2, 5; Brinsmaid 3, 7, 4; Mallory 4, 7, 7; Brown 7; McVean 9, 9; Schleger 2, 5, 8; Smith 7, 8, 8, 6, 2; Newton 9, 10, 7, 10; Norton 7, 6, 7; Hicks 8, 9, 10; Borst 6, 8, 9, 9, 9, 8, 9; Rickman 7, 9, 4; Holton 9, 8; St. George 6, 3; Beger 7, 6, 9.

The Union Gun Club Tournament.

THE historic town of Springfield, N. J., where the Union Gun Club holds forth was the scene of a Keystone target and live bird tournament on March 15 and 16, and the work done on each of those days was exceedingly creditable. The shoot was under the direct management of Enoch D. Miller, and the smooth-running of the affair was largely due to his executive ability. As usual when a shoot is held on these grounds the weather had to be tricky. On the opening day it was very cold and the wind blew almost a gale. Despite these drawbacks the shooting was good, the averages being very high. All the shooting was at Keystone targets, under the five-trap rapid-firing system. Special prizes of $5 and $2 were offered for the first and second best averages in the regular programme events. First average was won by Eddy Collins of West Hoboken, who broke 113 out of 130 targets. In the first event he broke only 5 out of 10, but afterward pulled himself together and shot a great pace. E. D. Miller also broke 113 out of 130, but did not compete for the average. Second average prize went to Neaf Apgar, who broke 110 out of 130. Sigler broke 107; Breintnall 103; Brantingham 102; C. Smith 95, and J. L. Smith 70. The scores in detail are shown below. Events Nos. 1 and 2 were at ten Keystones, $1 entry, three moneys. No. 3 was at fifteen Keystones, $1.50 entry, three moneys.

	No. 1.	No. 2.	No. 3.
Breintnall	1011111111—9	1110101111—7	111110111010011—11

Lindsley	000011010110010— 6	0010011110— 5
Ayres	110111111110001—11	

Six extra events were also shot, the first two opening the day's sport and the last four being run off after the regular programme. Each of these events was at ten singles, $1 entry. The scores:

No. 1: Sigler 10, C. Smith 9, Miller 9, J. L. Smith 9, Brantingham 8, Breintnall 5.

No. 2: Miller 9, C. Smith 9, Breintnall 7, Sigler 7, Apgar 7, J. L. Smith 4.

No. 3: Collins 9, Breintnall 8, Miller 6, C. Smith 6, J. L. Smith 4, Apgar 4, Lindsley 4, Terry 3

No. 4: Breintnall 8, C. Smith 8, Apgar 8, Miller 6, Collins 6, Lindsley 5, J. L. Smith 3.

No. 5: Miller 9, Collins 9, C Smith 9, Breintnall 7, Lindsley 6, J. L. Smith 2.

No. 6: C. Smith 8, Collins 8, Breintnall 8, Miller 7, Lindsley 6.

The Second Day's Shoot.

Wednesday morning opened up with weather conditions that were anything but favorable. The earth was covered with a thick mantle of snow, which had begun falling about 1 A. M. and did not cease until 11 o'clock, when the sky cleared and the sun came out bright and warm. Had it been clear in the early morning a number of Pennsylvanians would have been on the scene and so would a larger number of local experts. As it was, the attendance was good in the afternoon and everybody seemed to have plenty of fun. Among those who were present were Mr. and Mrs. M. F. Lindsley, of Hoboken; P. J. Zeglio, of Warrenville; W. G. Hollis, of Kearney; C. M. Hedden, W. L. Canon and S. Castle, of Newark, and Wm. Sigler, of Montclair. About 250 birds comprised the stock on hand and these were shot off in quick order as follows: Events Nos. 1 and 2 were warming sweeps at four birds each, $1 entry, two moneys in each; No. 3 was at six birds, $5 entry, three moneys; No. 4 was at ten birds, $10 entry, four moneys; No. 5 was a miss and out, $1 entry.

	No. 1	No. 2.	No. 3	No. 4.	No. 5.
Cancn	1120—3	2121—4	121122—6	2121102212— 8	10
Sigler	1212—4	1121—4	111102—5	1211111100— 8	
Collins	2122 4	2222—4	120202—4	1221011220— 8	1100
Mowder	2201—3	0200 1	222220—5		0
M ller	12 2 -4	0210—2	111212—6	2211211212—10	12011211
Hedden			210222—5	2222211022— 9	0
Castle			101122—5	2112211211—10	0
Hollis			112220—5	0101221210— 7	11011220
P Jay			110022—4	2021130000— 5	21021212
Lindsley				1222212222—10	10
"Wanda"				2001210220— 6	
Jones					120110
Drake					20

In the above miss-and-out the pot was divided by Miller and P. Jay on the eighth round, when the birds were gone. It was rather curious that on the third round each contestant missed a bird.

The rest of the day was devoted to Keystone smashing, the conditions in each event being 10 singles, $1 entry, 3 moneys. The results follow:

	No. 1.	No. 2.	No. 3.	No. 4.
Lindsley	0100001001—4	0110101111— 7	1001100311— 6	1111001101— 7
Hedden	1111010101—8	1110111111— 9	1100111111— 8	0111110010— 6
Drake	1101101111—8	1111111111—10	1110111101— 8	1111111111—10
Sigler	1101111011—8	1111111111—10	1111111111—10	1111111111—10
Collins	1110011101—7	1111111110— 9		0101111111— 8
Canon	1100011101—6	1010101000— 5	1111010031— 6	0011111101— 7
Jones	1111111110—9	1011111111— 9	1111111111—10	1111101111— 9
Hollis	0010100003—2	0110010110— 5		
Miller	1111110011—8	1111111111—10	1111011111— 9	1111111111—10
Castle	1110111030—6		1100110111— 7	
Mowder	0100000111—4	1110030111— 6		
P Jay		1110000110—10	0031110011— 5	

No. 5, same as above: Collins 9, Jones 9, Miller 9, Drake 8 Sigler 8, Hedden 7, Lindsley 5.

C. H. T.

Essex Gun Club' Monthly Shoot.

THE monthly shoot of the Essex Gun Club took place at Marion N. J., on March 17. In the regular club event each member shot at 10 live birds, club handicap rises, for three prizes. The opening event was at 4 live birds, $3 entry:

Hayes	1112—4	Hedden	2212—4
Breintnall	2121—4	Hope	2201—3
Walter	2112—4	Green	1111—4

The tie was shot off in the next club shoot, which followed:

Hayes	2112011220—8	Tillou	0101022011— 6
Walters	2012212111—9	Terrill	1101101120— 7
Hedden	0212222111—8	Hope	2112021011— 8
Breintnall	2121111210—9	Green	1212221121—10

Green's score of 10 kills gave him first money from the previous sweep. The following sweeps wound up the day, 4 birds, $3 entry:

Hayes	1211—4	2022—3	1001—2
Breintnall	2210—3	1221—4	1111—4
Green	1212—4	2110—3	1110—3
Hope	0012—2	2212—4	1011—3
White	1011—3	2101—3	1011—3
Walter	0122—3	2202—3	....
Hedden	2011—3	....	....

CHICAGO TRAPS.

CHICAGO, Ill., March 19.—Mr. Thorne, one of the great firm of Montgomery Ward & Co., is going in for trap shooting, in a personal as well as a business way. He and fourteen friends have just laid out elegant private shooting grounds at Fifty-first street and from now on the ground out there will sink out of sight under broken bluerocks. "We won't shoot for money," said Mr. Thorne, "but for fun, and lots of it, likewise a few medals."

The above-mentioned firm is absorbing a lot of shooting talent of late and putting it to practical use in building up their already phenomenal trade in sporting goods. Ed. Bingham, Charlie Grubbs and H. W. Skinner, all of more than local reputation, are now marshalled over there under the veteran department head, Mr. G. M. Holt. All three of these gentlemen, assisted by Mr. R. O. Heikes, took a hand in the free bluerock shoot given by Montgomery Ward & Co. a week ago to-day, scores for which went in to-day. The occasion was very pleasant, thirty-five to forty entries, and all might have been called successful had not Mr. Grubbs lost his voice in calling "lost" for Mr. Skinner, who only got one bird out of his first ten, much to his surprise. Unknown angles and the Paul North trap set the running, as was stated earlier.

At live birds a little goes on, nothing startling, and the scores show it. J. L. Wilcox beat W. P. Mussey in a practice run at 50 birds, 28 to 37, and also defeated R. S. Cox on Thursday with a score of 80 to 75 at 100 live birds. The birds in this race are described as very hard, the squalls of snow and wind making them exceptionally ugly shooting.

The Chicago Shooting Club's semi-monthly brought out 16 men and many non-members, for a 20-bird sweep, $10 entry, and this turned out to be very spirited. Mr. Atwater kept up the chinking gait he has been going all season through, and he and Percy Stone tied on 18. E. D. Fulford, Roll Organ and George Kleinman tied on 17, and Mr. Organ shot both the others out on the first round on a miss-and-out tie-settler.

A match at 500 artificial targets for $250 a side, to be shot on or before March 29 at Watson's Park, was arranged last Tuesday between E. D. Fulford and Rolla Heikes, under the following conditions: The first 200 each to be shot at from unknown angles and traps, the second 200 each from known angles and three unknown traps, the last 100 each to be shot in pairs of 50 each, known angles and traps, the loser to pay for the birds. Each posted a forfeit of $25 and the balance, $225 each, was to go up on the day of the race. Before the week has passed, however, Mr. Fulford withdrew from this race and forfeited. He has been shooting targets very nicely. As for Rolla Heikes he doesn't eat anything but bluerocks with a little powder on them, and his game is a hard one.

Matches were also announced as concluded this week between Mr. Fulford and Mr. Organ, 100 birds, and between Mr. Fulford and Mr. Geo. Kleinman, 100 birds, both to be shot the coming week, I understood. Later Mr. Fulford wished to postpone the Organ match till after April 15 but objection was made. All these matches are off now, and George will have to challenge again if he cares to shoot for Mr. Fulford has gone East. He shoots Mr. Moore in Utica, March 29, or at least plans looked toward that lately.

Within the week Mr. Fulford announced his intention of making Chicago his home, as his work on the telephone lines will for the coming year or more bring him toward or near Chicago. He will be welcomed very cordially by our shooters. Understand, as soon as Mr. Fulford has really moved his trunk to Chicago, that changes the case. After that, if he beats a man, it is quite another matter, don't you see, and if another man beats him, that's different. Chicago takes care of her own; though, really, Chicago hasn't an ill wish in her head for any white, unpainted man on earth. We are ready to naturalize a few more shooters out here, and it seems to me that the blower of the effete East, grafted upon the wild and woolly stem of the exuberant West, ought to make a good sort of combination. Send 'em along. If they're up to sample, we'll take a whole lot. E. HOUGH.

Trap at Watson's Park.

BURNSIDE, Ill., March 12.—Scores made here to-day in open sweeps, 6 live pigeons, entrance $2, divided 60 and 40 per cent., all the events of this date under American Association rules:

Geo Kleinman	111111—6	111112—5	02112—4
C Eastman	111011—5	12101—4	00100—1
R O Heikes	111111—6	21011—4	22102—4
J Church	111111—6	22020—3	00102—2
V L Brahm	111111—6	12200—3	10112—4

Sweep No. 3, 5 birds, $3:

Kleinman	21111—5	Brahm	20221—4
J O'Brien	22101—4	Church	11201—4
A J Atwater	00121—3	Heikes	02113—3
A W Reeves	22012—4	Bob White	20111—4
E D Fulford	22222—5	Eastman	10123—4
W L Cox	00111—3		

Shoot off for second, miss and out, White won by killing one bird.

Sweep No. 4, 10 birds, $5, divided 50, 30 and 20 per cent.:

Kleinman	1122102010—7	E M Gardner	2102222220—8

March 15.—The following is the score made here to-day by the Chicago Shooting Club for club medal, 20 live pigeons each, Illinois State rules, $mall sweep added:

W P Mussey	16	E M Gardner	15
A J Atwater	18	R B Wadsworth	17
Geo Kleinman	17	L M Hamline	9
R O Heikes	16	M J Eich	15
Ed Bingham	16	A W Reeves	16
P F Rock	18
*W L Cox	15
*E D Fulford	17
*C E Willard	16
*Bob White	4

*Guests. Atwater and Rock div. first money and will decide medal tie next shoot. In shoot-off for second Wadsworth won. Ties on third div.

Shoot of the Chicago Shooting Club for target medal, 25 targets each, from expert traps and electric pull:

M J Eich	3 out of 6	B Rock	1 out of 6
Geo Kleinman	8 out of 12	A W Reeves	10 out of 20
A J Atwater	4 out of 9	*C E Willard	7 out of 12
R B Wadsworth	1 out of 3	L M Hamline	5 out of 12
Ed Bingham	7 out of 12	E M Gardner	15 out of 20
R O Heikes	22 out of 25	*E D Fulford	20 out of 25

*Guests. Heikes won the medal.

Same day, W. L. Cox vs. W. P. Mussey, 50 live pigeons each man, A. A. rules, no consideration named:

RAVELRIGG.

Plenty of Fun at Plainfield.

THE Independent Gun Club, of Plainfield, N. J., held one of its pleasant shoots on March 9, the attendance being fair, both live birds and artificial targets being used. The regular club event is usually at 50 targets, each man being allowed a given number of broken birds in order to even up the chances. On this occasion the number was cut down to 15 targets each, and the usual handicap allowed. The scores are appended:

C Smith	111111111001100—12	0	W Terry 111101000011110— 8 2
Branting-ham	111111100111110—12	0	W Pierson 111101101101001—10 3
Loper	101111100110101—10	0	W Force 001101010100001— 6 2
Trust	010011000110101— 8	1	S Terry 010001011010101— 9 5
Voehl	111110111111110—14	2	Darby 101101101101110— 10 4
			Keller 011110111101111—12 0

Voehl took first place, S. Terry and Darby tied for second, Pierson was third, Keller and Brantingham a tie for fourth.

The following sweepstakes at bluerock targets were shot:

No. 1, 10 bluerocks, $1 entry: T. H. Keller 9, C. Smith 6, Trust 4, Brantingham 9, Voehl 7, Loper 8, Cramer 8, Terry 9.

No. 2, same: T. H. Keller 7, A. Trus 6, H. Voehl 7, T. Brantingham 6, Loper 9 C. Smith 9, Cramer 8, Case 6, W. Terry 3.

No. 3, same: Smith 7, Brantingham 8, Loper 10, Voehl 5, Trust 8, Cramer 5, Darby 6, Keller 8

No. 4, same: Smith 6, Brantingham 8, Loper 7, Cramer 5, Voehl 6, Trust 7, Keller 7, Darby 4, Terry 7.

No. 5, 6 live birds, $5 entry, 3 moneys, American Association rules:

W Force	100211—4	J Darby	111201—5
G Cramer	20212o—4	J McCarty	o10002—2
C Smith	0112o1—4	T H Keller	102221—5
Brantingham	011111—5	J Voehl	121101—5
W Terry	120210—4	S Terry	221112—6
R Loper	2ooo12—3	D Terry	111110—5
A Trust	102220—4		

Darby, Keller and D. Terry div. second on shoot-off. Scott Terry, who won first money alone, is obliged to shoot with one hand, having lost his left arm.

No. 6, 4 live birds, $3 entry, 3 moneys:

Pierson	2211—4	Voehl	0111—2
Smith	1211—4	Trust	0010—1
Forest	2111—4	Keller	1102—3

Miss and out, $1 entry:

Forest	211	Pierson	21
Voehl	111	Smith	10
Trust	12	Keller	0

Forest and Voehl shot at one extra bird each for their share of the pot and then concluded to div. with the others.

Team Match at Passaic.

ON March 12, was shot the third of the series of matches between teams of ten men each from the Passaic City Rod and Gun Club, and the Boiling Springs Fish and Gun Club of Rutherford at twenty-five artificial targets per man. A high wind greatly interfered with the shooting. As the Boiling Springs team had previously won two matches the tie was not shot off.

THE TRAP CLUBS OF CHICAGO.

CHICAGO, Ill.—Any story of the trap clubs of this city which claimed absolute completeness and accuracy might perhaps be open to criticism, for Chicago is a large place, and among the many suburban towns there may be some local trap organization which could easily escape notice, or which may have sprung up subsequent to the inquiry, which was instituted some weeks since. The following account is thought to be accurate, and certainly covers the essential features of the sport as practiced at this point.

CHICAGO'S OLDEST CLUB.

Mr. Abner Price, now president of the Illinois State Sportsmen's Association, himself fairly the Nestor of our trap-shooters here, and a man much respected by us all, tells me that the first trap club of Chicago was the old Audubon Club, long since dead. This takes us back to the times of John D. LeMoyne, R. R. Clark, John Lyon, John Milward, Gen. Geo. Strong, and others whose names we do not now see in the shooting pages. Of course, too, those were the days of wild pigeons and plunge traps.

THE PRAIRIE GUN CLUB.

Famous in its day and generation was the old Prairie Gun Club. It was autocratic. Its sway was felt over the entire region hereabout. This was the crystallization of the trap-shooting idea here. The Prairie Club formulated a code of rules for itself. In the last edition before the present one lately issued by FOREST AND STREAM of Capt. Bogardus's book, "Field, Cover and Trap Shooting," the old Prairie Gun Club rules still stood in print, a monument of the past, standing over the grave of the club itself.

THE KINNICOTT CLUB.

Next in sequence, so my informant tells me, was the old Kinnicott or Kennicott Club, named after the ornithologist of that name who dwelt at Kinnicott's Grove. Here we are still in the sea of oblivion, but certainly still in the days of plunge traps.

THE AUDUBON CLUB.

The present Audubon Club is the oldest existing club in Chicago. It was made up of the remnants of the Prairie and Kinnicott clubs. Still the days of plunge traps, but after that all the modern improvements and developments in live bird shooting. The Audubon is essentially a live bird club. When this club fails to enter a team in the regular great annual shoot of the State Association, there shall sad days have befallen. Go to the Audubon for your old timers, and select one, and expect confidently to see the art with all its courtesies in full illustration. The officers of the Audubon Club are president, Chas. Kern; Secretary, W. L. Shepard.

The Club shoots fall on Wednesdays and are held at the old Chicago grounds, Watson's Park, now located at Burnside, on the Illinois Central Railway. At these grounds the great bulk of the live bird shooting of this city is done. The veteran owner and manager of these grounds, John Watson, is a man who understands the art of keeping and handling birds. He has far more than a local reputation, and deserves it. So far as known, Mr. Watson's portrait has never appeared, and it is a pleasure to send in a good photograph of his rugged Scotch features, obtained after some demur. Clubs may come and go, but John Watson furnishes birds for them all, has done so immemorially, and I doubt not always will. It is believed that the class of birds shot at John Watson's traps is exceptionally hard.

THE GUN CLUB.

We may now abandon historical sequence, and indeed, forsake grade of prominence in the arrangement of our clubs. Usually at the annual tournament you will see a spacious tent bearing the bourgeon, "The Gun Club," Within you will find hospitality and will meet sportsmen. You will be glad you have seen this tent. The brief facts about this goodly organization may be seen as follows in the reply to query of the club president, Mr. F. C. Donald, vice-chairman of the Central Traffic Association:

"Appreciating the earnest, aggressive, and highly successful efforts toward enhancing and broadening the already capable efforts of our paper, the FOREST AND STREAM, I beg to give you the information you request relative to the Gun Club, which is, briefly, as follows: Your humble servant is its presiding officer. Mr. F. H. Lord is its Vice-President; Mr. C. E. Willard is its Secretary. The Executive Committee consists of Mr. C. E. Burton, Mr. Frank Place, and Mr. W. L. Shepherd.

"For the current year its contests have been regularly held on the first Thursday and last Saturday of each calender month. The meetings have been well attended and have taken place at Watson's Park, Burnside, the trophies in jeopardy—not the pigeons—being the conventional live bird, ground trap and bluerock medals. The membership is limited to sixty, and at the annual meeting of January, if my recollection serves me correctly, there were forty-three members in good standing.—F. C. DONLAD."

THE CHICAGO SHOOTING CLUB.

Another good body of shooters, and one whose team has more than once won the annual club team championship of the State. Mr. R. B. Organ is a leading member in this club, and is sure it can beat the world, if not more. Among the 25 men, to which the membership is confined there will always be found a good number of good shooters. This club shoots the first Friday and third Tuesday of each month from October until March, and on the third Tuesday of each month from June till September. Its ground is Watson's Park. The club's president is Mr. R. B. Organ, when he wins the medal, R. B. Wadsworth, when he doesn't. Secretary, Mr. John Matter.

FORT DEARBORN CLUB.

This is a young club, but one which has drawn its membership from among the best shooters of the city. Its success has been very rapid and pronounced, and it is a goodly factor in shooting matters. The membership was lately increased to 40. The club shoots at Watson's Park, the first Thursday of each month. Mr. H. D. Nicholls is president, Mr. C. K. Herrick secretary. This club won the State club team championship in its first year, 1891.

WASHINGTON PARK CLUB.

This organization is much like the more exclusive private clubs of the East. The Washington Park Club proper is a racing association with a large membership. Some of the members, perhaps 30 or 40 in all, or half that will cover the more earnest, love a gun as well as a horse, and shoot pigeons when they feel so disposed. Some pretty stiff wagers are made here on some pretty stiff little races. The regular cup day is Saturday. The holder of the cup is subject to challenge and must defend his trophy forthwith. There is no regular shooting club organization.

THE PRAIRIE GUN CLUB.

This is not the old Prairie Gun Club, but the new Prairie Gun Club. The Hofmann family is near the throne in this club. A. M. Hofmann is the present president, Mr. H. B. Meyers, secretary. The club shoots the second Thursday of each month at Watson's Park, and it has some good shooters, 25 of them.

THE FORESTER GUN CLUB.

Another name familiar to the inspector of the annals of the State tournament. Mr. Abner Price is president, and the club secretary is Mr. John Gillespie, our old friend, who has for so many weary months been the victim of paralysis and confined to a narrower circle than was once his wont. The club day is the first Saturday of each month, and the grounds are at Watson's Park.

LAKE COUNTY ROD AND GUN CLUB.

Another fixture for the tournament. In this club we get away from Chicago further, for the club grounds are located at Liverpool, Ind. All trap shooting is done at Burnside.

SOUTH CHICAGO GUN CLUB.

There is usually a pretty good line of Willards in this club. The president is Mr. L. C. Willard, secretary, Mr. E. I. Reeves; captain, Mr. F. E. Willard. The club shoots at Watson's Park the second Wednesday of each month. There are only about a dozen members now. This club is always heard from at tournament time. It is often called the "Yellow-leg Club," because of their dwelling near and hunting much on the marsh country below the town; but the South Chicago boys shoot well and can afford to laugh at this nickname.

PULLMAN GUN CLUB.

There are thirty-seven members of this club, close neighbors of the South Chicago, and the club is one of the regulars also. The president of the club is Mr. C. Schieeth; secretary, T. W. Walpole; captain, Mr. W. Dallyn. The shooting days are the first and third Saturdays of each month, and the grounds are at 107th street, in the thrifty village of Pullman. During the winter there are no regular shoots, the club missing the hard winter bird practice. The club shoots live birds at Burnside.

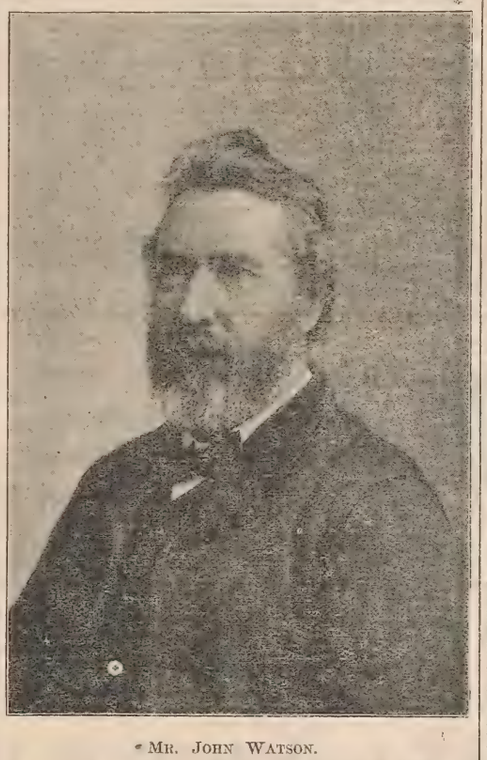
EUREKA GUN CLUB.

The foregoing clubs are all "South Side" clubs, or shoot on grounds to the south of the city. Practically all of the live bird shooting done by these clubs is done at Watson's Park, and with those which do shoot at Watson's Park the live bird is the favorite target, although nearly all of the clubs have a medal for inanimates as well as live birds. We shall presently come to clubs which divide favor between the live bird and inanimate shooting. One of these is the Eureka, also a South Side Club, though not on the Illinois Central road, as are all of the foregoing. Eureka Club grounds are at Tracy and Western avenues, six miles or so west of Burnside. The club shoots on Saturdays and holidays. Mr. W. H. Ferguson is president. Mr. John T. Glover secretary and Mr. A. J. Atwater captain. This is a young and vigorous club.

BLUE ISLAND GUN CLUB.

Blue Island is a suburb a few miles further out on the Rock Island road than Tracy and Morgan Park, which villages hold much of the membership of this and the Eureka Club. The Blue Island is an old club of more or less intermittent activity, but Br'er George Airey always manages to shuck a team out when called on, and the club has done yeoman service both at targets and birds.

LAKE GEORGE CLUB.



This formerly vigorous club was located in the sand hill country on the south, whence the growth of the city drove it. It is now, in its shattered condition, looking for new grounds. It will practically reorganize and settle at Fourth Lake, in the Fox Lake district, where its members have held some pleasant shoots, as mentioned heretofore. Such a shoot occurred on Washington's Birthday. Mr. J. W. Sheahan is president of the club, Mr. J. S. Orvis Secretary.

AUSTIN GUN CLUB.

Another suburban. There are several well-known shooters who live at Austin, for instance Mr. G. M. Davis, Mr. W. W. McFarland, Mr. C. D. Gammon, and others. There are 14 of these in the little trap society which shoots at Austin, on the C. & N. W. Ry. The President is Mr. E. Canfield; Secretary, Mr. R. A. Trafil; Captain, Mr. G. M. Davis. The shooting is on the second Tuesday of each month.

GARFIELD CLUB.

You take the cable cars on West Madison street, go to the end of the line, transfer to the electric car line, and a few minutes' run brings you to the wide, open strip of prairie, not yet inclosed, cut near Garfield Race Track, whereon stands the snug shooting quarters of the Garfield Club, a very healthy and pleasant organ-

MR. JOHN WATSON.

ization of trap shooters, about 50 strong. These shoot Saturdays and holidays, at live birds and targets. Our city game warden, Mr. M. R. Bortree, belongs to this club, and so does Mr. F. S. Baird, attorney, known in protective matters also. The President of the club is Mr. M. R. Bortree; Secretary, Mr. J. W. Meek; Captain, Mr. S. Palmer.

WEST CHICAGO CLUB.

Within sight of the Garfield Club grounds is the shooting box of the West Chicago Club, an organization much similar in many ways. These grounds are at 49th and Harrison streets. This club is sometimes erroneously spoken of as the "West End" Club. Its President is Mr. A. E. Pugh; Secretary, Mr. W. L. Stevens; Captain, Mr. E. Green. The days of shooting are the first Thursday and third Saturday of each month. The medal shoots are held on the third Saturdays.

DOUGLAS GUN CLUB.

In sight also of both the two preceding clubs is the box of the Douglas Gun Club, again of similar intents, purposes and practices. This club was formerly known as the Acme Gun Club, but at the annual meeting, held Dec. 28, it was decided to change that name to the above. The shooting days of this club are special and not regular. President, Mr. E. Hart; Secretary, Mr. John Sherman. Mr. M. J. Eich is a prominent factor in this club.

NORTH END GUN CLUB.

If you are not afraid of death, and have nerve to tackle one of Mr. Yerkes's cars, bound Clybourne avenue way, you can get off at Larrabee street and step to Mr. Chas. Burmeister's undertaking establishment, located near the cable line. Mr. Burmeister will be away attending to a funeral, but you can go a few steps more, to Mr. Louis Warneke's place, and there you can learn all about the North End Club. The grounds of this club are inside the city limit, on the Kimball vacant tract, at Fullerton and Kimball avenues. Shooting is on the first and third Saturday of each month, beginning with the first Saturday in May. The North End Club also has grounds on its game preserve of 240 acres, located on the Kankakee, near De Motte, Ind., opposite the famous Grape Island of the Kankakee, where the large wild grapes are found. The club house on this tract is two stories, seven rooms, comfortable. There is trap-shooting here also. The club limit is 25, 20 members now. The officers are: President, Mr. Louis Warneke; Secretary, Mr. E. Schwiecker; Treasurer, Mr. A. Kurtz; Board of Directors—Messrs. Al Baldwin, F. Helmberg, Chas. Cainet.

EVANSTON GUN CLUB.

Still further north, across the dangerous flood of the Chicago River, in the emotionally virtuous suburb of Evanston, is the Evanston Gun Club, which shoots right along, and has done so for fourteen years. Mr. Geo. W. Franklin is president of this club, Mr. Geo. Peterson secretary. The regular day is the second Wednesday of each month. There are 23 members at this date. Live birds preferred. The grounds are on the prairie just west of Evanston.

PRAIRIE CLUB OF EVANSTON.

Near by the above club's traps is the box of the Prairie Club of Evanston, which is not the old Prairie Gun Club, nor the new Prairie Gun Club, but the Prairie Club of Evanston. This organization does not shoot so regularly as it might, but has done good work at live birds. It entered a team in last June's tournament, and it is to be hoped it will do so for this year's tournament.

N. W. GUN CLUB, OF IRVING PARK.

This is a thriving little suburban shooting club, whose inclination is for summer days more especially. This club shoots each Saturday afternoon during July, August and September. The present president is Mr. S. S. Kimbell; secretary, Mr. H. E. Turner; captain, Mr. J. Jefferson. The grounds are at Avondale. Targets mostly.

JEFFERSON PARK CLUB.

A small club, new, targets chiefly, no regular days.

HAVELOCK GUN CLUB.

Now practically out of existence. Formerly shot at Ravenswood.

The foregoing clubs are trap clubs only, except the duck shooting Lake County Gun Club, and barring Lake George Club, which previous to its eviction was a trap club practically, the duck shooting having been injured so much. We shall not, however, have closed the full field of trap-shooting around Chicago unless we look into the great shooting clubs which own tracts of land for game shooting purposes. At the club houses in Indiana, and about Fox Lake and elsewhere, live bird and target traps have come to be fixtures. This is the most pointed commentary possible as to the status of duck shooting, and as to the probable trend in practice of the man who wants to shoot a shotgun.

TOLLESTON CLUB.

This club is too often mentioned to need comment. At the grounds are live bird and target traps, the former more used. On special days and holidays the live bird shooting here is very spirited. Mr. F. A. Howe is president and Mr. S. P. Brown secretary.

MAK-SAW-BA CLUB.

Mak-saw-ba club is nearly always worrying over some live bird or target medal, a pair of opera glasses, a suit of shooting clothes or something of the kind. This mainly in the winter, on Saturdays and holidays. Some very good birds go down here at times. Mr. T. Benton Leiter, president; Mr. C. S. Petrie, secretary.

CUMBERLAND CLUB.

Cumberland Lodge has been the scene of many a hard-fought battle at the traps, live bird and artificial. The grounds are pleasant, the location delightful all around. Saturdays and holidays. President, Mr. H. D. Nicholls; secretary, Mr. W. L. Shepard.

DIANA HUNTING CLUB.

Another Kankakee club, and one that is shooting more and more at the trap, live and inanimate. Mr. Henry Ehlers, Mr. John Press, Mr. Stafford are prominent here. A regular medal is now established for live bird shooting. Mr. John Press is president, Mr. A. Kreutzberg, secretary. Grounds near Thayer, Ind.

GRAND CALUMET HEIGHTS CLUB.

This club is unfortunately threatened with eviction by the real estate men in the sand hills south of town. It has been and is one of the very pleasantest of the summer clubs. It has shot desultorily at the trap, more targets than birds, and there is talk of reorganizing into a trap club pure and simple. It may be that the club will be left undisturbed for years in its quarters on the shore of Lake Michigan. President, Dr. A. W. Harlan; secretary, Mr. F. R. Bissell.

THE NICKEL PLATE CLUB.

Practically the same may be said of this as of the other Kankakee clubs.

COLUMBIA CLUB.

Not properly a trap club. Grounds at Fox Lake. Occasional shooting.

There are thirty odd clubs in Chicago which shoot at the trap more or less. Probably there are 1,000 men who practice this form of sport here more or less regularly.

Chicago has not until lately been thought much of a trap-shooting town. Target shooting has never been so popular here as live bird shooting, but within the past two or three years has grown, more especially in the smaller clubs and among the suburban towns.

Chicago's records at live bird shooting, for her first ten and twenty shooters, can best be seen in the late Kansas City races. The performances of her individual match shooters have been duly recorded as they occurred. The tournament reports show the rest. Chicago has few shooters of championship form. Shooting here is democratic. The men are hearty, cordial and pleasant. We do not grade the gentlemen of these clubs. We call them all sportsmen.

Chicago's trap news can best be found in FOREST AND STREAM.

E. HOUGH.

Under Old Long Island Rules.

THE Falcon Gun Club, which held its monthly club shoot at Dexter Park on March 17, is one of the very few organizations in this country which adheres to the old-time style of shooting. All its shooting is done under the Old Long Island Rules., H. and T. trap, gun below the elbow until bird is on the wing, 25yds. rise, a kill with the second barrel counting one-half a bird. Each member shot at 7 birds, the scores being appended:

J Lager	1 ½ ½ 1 1—6	J Moeller	0 0 1 1 1 1 1—5
H Miller	0 1 1 1 0 1—5	J Vagts	1 0 1 1 1 0—4
C M Meyer	1 0 1 0 1 1 1—5		

Sweepstake, 3 birds:

Lager	1 1 1—3	Vagts	½ 0 1—1½
Miller	1 1 0—2	Moeller	0 0 1—1
Meyer	½ 1½—2		

Sweepstake, 10 bluerocks, 3 prizes, high scores to win: Meyer and Knebel, Jr., 7 each, div. first and second; Vagts and Monsees 6 each, took third; Moeller and Miller 5; Lager 6.

Ten bluerocks, classified, 3 moneys: Bigoney, Gilman and Meyer tied for first on 9 each and shot off in succeeding event; Richmond and Knebel, Jr., got 8 each and split second; Moore took third alone on 3 breaks.

Ten bluerocks, same as preceding event: Richmond, Knebel, Jr., and Meyer tied for first on 8 each, shot off miss-and-out, Meyer securing first money from this as well as the preceding event; second went to Bigoney on 7; third went to Moore and Gilman on 6.

Ten bluerocks, 1 prize: Won by Bigoney, who tied with Moore on 8 and won the shoot-off; Richmond broke 6 and Gilman 5.

The Kings County Gun Club.

DEXTER PARK, Long Island, March 16.—The Kings County Gun Club held its regular monthly shoot to-day for club medal and four prizes, 20 Keystone targets, 18yds. rise, gun below the elbow, the best average scores to count during the season. The scores:

Zirkel	10111110190100100010—10	Beagel	11010101100001100001— 9
Greiner	10000100100010000001— 5	Lindstedt	10010000010001000011— 6
Thiel	00011010110000000010— 7	Keller	00000001110000031000— 4
Link	11010101011010000001— 9	Dethloff	00000011011111011100—10
Roehn	10010001010100000101— 7		

Team shoot, 6 targets per man:

Team No. 1.		Team No. 2.	
C Dethloff	010011—3	J Yorkel	011011—4
J Link	001011—2	A Baegel	100010—2
C Lindstedt	001000—1	H Greiner	110000—2
J Thiel	000011—2	T Keller	010011—3
C Roehn	111000—3—11	S Short	011101—4—15

Sweepstakes, 6 targets per man, 50 cents entry, three moneys. No. 1: Link 4, Zerkel and Gioner 2 each.

No. 2: Link 4, Giener 3, Thiel 3, Linstedt 3, Zerkel 4, Roehn 2, Baegel 2.

No. 3: Roehn 5, Baegel 4, Thiel 3, Giener 3, Zerkel 2, Link 2, Linstedt 1.

In No. 1 third was won by Linstedt on shoot-off. In No. 2, on shoot-off Thiel won second and Roehn third.

Down at Wiedenmayer's Park.

LAST Saturday afternoon Robert Baar and August Craemer, both members of the East Side Mutual Gun Club, of Newark, N. J., shot a match at Wiedenmayer's Park for $25 a side, the conditions being twenty-five live birds per man, Baar to allow Craemer five dead birds. As will be seen by the following figures Baar had a walkover, shooting Craemer out.

Baar	2011011221211112111—17
Craemer	1111110202000100200—10

Several four bird sweeps were shot, the conditions being $5 entry, two moneys. The scores:

	No. 1.	No. 2.	No. 3.	No. 4.
Baar	1111—4	1120—3	2211—4	2121111211
Schrafft	2210—3	0121—3	1120—3	0
Hedden	1122—4	2022—3	2222—4	2211222210
Koegel	0200—1	0101—2	0112—3	1110
Hilfers				

No. 4, was a $1 miss and out, the pot going to Baar.

The live birds being gone the party amused themselves by shooting bluerocks, the scores in the two events being as follows:

Baar	8 8	Schrafft	9 4
Craemer	7 3	Hedden	3 5
Perment	5 5	Hague	4 6
Koegel	5 7		

Matches at Rochester.

ROCHESTER, N. Y., March 9.—The following scores were made here to-day in a match between the regular team of the Rochester Rod and Gun Club and 12 members styling themselves the "Unknowns." Each man shot at 25 artificials:

Rochester Rod and Gun Club Team.

Hicks	1111111101110111010111111—21

Adam Eppig's Fourth Victory.

THE monthly shoot of the Coney Island Rod and Gun Club took place at Woodlawn Park, Long Island, on March 16, each member shooting at 7 live birds, club handicap rises, Hurlingham rules, for a diamond badge and money prizes. The weather was good and so were the birds. For the fourth time this season Adam Eppig captured the diamond badge and first money. The badge will become the property of the member winning it the greatest number of times during the season, and Mr. Eppig appears to have a first mortgage upon it. The scores follow:

Dr Van Ord (28yds)	1111111—7	C E Morris (30yds)	1211012—6
J E Lake (26)	1212012—6	P Ward (25)	2022201—5
I Hyde (29)	1121100—5	H Blattmacher (27)	2022201—5
H McLaughlin (25)	0111000—3	D Monsees (27)	1112222—7
C Detlefsen (27)	1210211—6	F Ibert (25)	2200020—3
J Schliemann (25)	1121201—6	W Scheeljes (25)	0121202—5
A Eppig (30)	1111212—7	G Kleist (25)	1000110—3
L Eppig (23)	1100120—4	M Bonder (21)	0011002—3
C Englebrecht (25)	0100211—4	S Northridge (25)	1012101—5
W Lair (25)	0021211—5	J B Collins (25)	1120111—6
C Plate (28)	1021201—5	F Pfaender (27)	1220210—5

Adam Eppig won badge and first money on shoot-off, second went to C. E. Morris, third to F. Pfaender, fourth to L Eppig and fifth was divided.

Sweepstake, 3 birds, $1 entry, 25yds. rise, three moneys:

W Law	011—2	A Eppig	111—3	Dr Van Ord	111—3
C Plato	011—2	J Schliemann	101—2	I Hyde	111—3
C E Morris	111—3	L Eppig	100—1	W Scheeljes	111—3
C Detlefsen	111—3	C Englebrecht	011—2	F Pfaender	110—2
J B Collins	111—3	S Northridge	101—2	H McLaughlin	111—3
F Ibert	000—0	J E Lake	101—2	D Monsees	011—2

First was won on shoot-off by C. E. Morris, Van Ord, Scheeljes and McLaughlin, the second men shot one round on the tie and then divided. H. McLaughlin was referee and J. C. DeFra'ne scorer.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

TXOS Malone, N. Y.—Write Wm. R. Hobart, care Von Lengerke & Detmold, 8 Murray street, New York, who is an authority on the subject you mention.

A., Fulton, Ill.—Both P. and W. are said to be reliable by those who use them. Do not know the name of any shooter in your locality using the W. Write to C. W. Budd, Des Moines, Iowa, and he may be able to enlighten you on the subject.

H. C. BACHMANN, South Bethlehem, Pa.—In case a bird is shot at with both barrels, falls and is gathered within the boundary, the referee calls in a "dead bird." If any competitor challenges the bird for shot marks and none can be shown, it becomes a "lost bird."

H. B. M., Childwold Park, Childwold, N. Y.—Can you tell me where I can purchase a barrel of wild rice for sowing? Please answer in your answers to correspondents and oblige. Ans. You cannot obtain it now as it is out of season. Chas. Gilchrist, Port Hope, Ont., and Richard Valentine, Janesville, Wis., supply it.

CORRESPONDENCE.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work Cloth, 98 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 318 Broadway.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

The Chubb Eight-Strip Split Bamboo Rods are pronounced by Anglers to be the "King of Rods;" they are unexcelled for quality of material, workmanship, beauty and balance. Printed guarantee goes with each Rod which warrants them for one year. Rods are put up in an elegant case.

Price each, $15.00.

All lengths, weights and styles are described in our New Chubb Catalogue of Fishing Tackle for 1892. The Catalogue also contains elegant Lithographic Plates of Split Bamboo and Lancewood Rods, and over 100 varieties of Artificial Flies in colors, and describes, illustrates and gives prices of Fishing Tackle used by anglers of to-day.
Send 25c. for Catalogue. This may be deducted from first order for goods amounting to One Dollar or more, by enclosing Coupon which accompanies Catalogue.

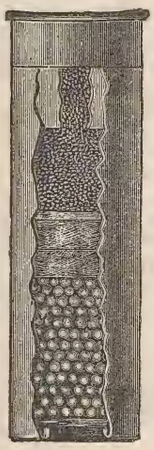
FRANK MILLER'S

STANDARD OF THE WORLD.



HARNESS DRESSING

For Harness, Buggy Tops, Saddles, Fly Nets, Traveling Bags, Military Equipments, Etc.
Gives a beautiful finish, which will not peel or crack off, smut or crock by handling.
SOLD BY ALL HARNESS MAKERS.

WHAT'S YOUR OPINION?

The relative merits of machine loaded shells against those of expert hand loaded shells form a fruitful topic for discussion. Some are satisfied with machine loads, others will have none but hand loads. We made some experiments ourselves and are

STILL ON THE FENCE.

We sell both—as many as anyone, as good as anyone, and on closer margins than anyone.

We have half a million machine loaded shells in stock of the best makes, in all loads and powders. An inquiry for prices will have our prompt attention.

HAND LOADED SHELLS.

In this department we employ none but experienced men. Orders are filled

Quickly, - - -
Carefully,
- - - Intelligently.

We load all grades of powder; black, Wood, S. S., E. C. or Schultze in any kind of a shell, from U. M. C. Trap or Eleys Gas Tight down to a paper shell at 50c per hundred.

Send for HAND LOADED Shell Card.

Answers to Queries.

For Prospectus and Advertising Rates see Page 313.

Any person who cannot find the "Forest and Stream" for sale at any news stand in the country, is requested to report the fact, with location of stand and name of dealer, to the Forest and Stream Pub. Co., 318 Broadway, New York.

A REASONABLE REQUEST.

THERE is nothing of sentiment in the movement to secure more adequate protection for Canadian salmon rivers; on the contrary, it is a step fully justified by the rules which govern in ordinary business relations.

The Dominion Government leases to Canadian and American clubs and individuals a number of rivers for salmon fishing. It asks and receives for these fishing privileges a substantial rental. Those who pay the rents are quite reasonable when they demand that they shall receive that for which they pay. This means not only rivers to fish in, but fish in the rivers to fish for. Nor is it unreasonable to ask the abatement of any unduly destructive agencies which interfere with the maintenance of the fish supply.

As a matter of fact, the salmon have been decreasing and the fishing has been growing poorer and poorer, until the lessees of many streams have naturally come to feel that the Dominion Government is—unwittingly it may be, but none the less effectually—perpetrating an imposition on them when it takes their money and gives them no fair return of fishing opportunities. The netting as now carried on, practically without intermission, is recognized as the destructive agency. In their petition, which we reprint in our angling columns, the lessees request that the netters be required to raise their nets during three successive days and nights of each week, instead of for the interval from Saturday night until Monday morning, which is now the regulation, whether or not the practice. As pointed out by the petitioners, if such added immunity from netting shall result in an increase of fish, this measure will benefit all alike—anglers and netters, while it is none the less certain that a continuance of the destructive system now in force will work growing harm to the interests of each alike and ultimately destroy them.

The petition is not based on sentiment, but on common sense. It is reasonable. It should be granted.

The list of signatures is a notable register of the salmon anglers of Canada and the United States. Such a list should carry weight.

We sincerely trust that the Minister of Marine and Fisheries will appreciate the urgent necessity of action in this matter, and will not hesitate to apply the remedy.

Too much credit cannot be given to Mr. D. H. Blanchard of Boston, by whose personal endeavor this subject has been brought to the attention of the public, and to whose large-hearted activity is due the preparation and completion of the signed petition. In undertaking this labor of love—by no means a light one, we may be sure—Mr. Blanchard has been prompted by higher and worthier motives than of self interest alone; he has labored for the benefit of others more than of himself; and it is because of just such acts and services freely undertaken by individuals, and such manifestations of brotherhood, that anglers the world over are spoken of as constituting a fraternity.

NATIONAL PARK LEGISLATION.

THE bill introduced by Senator Warren, of Wyoming, fixing the boundaries of the National Park, has been favorably reported from the Committee on Territories, to which it had been referred. This bill cuts off the northeast corner of the Park, thus providing a way for the railroads to reach Cinnabar from Cooke City without passing through the Park. While every one must regret to see any portion of the National Park thrown open, it is undoubtedly better that this should be done than that a right of way should be given to a railroad to pass through the Park.

Senator Warren's bill also provides for cutting down one-half the forest preserve established by Executive proclamation about a year ago. This is a provision which must be wholly disapproved by every one who is interested in the Park, in forest preservation in general, and in the great question of the water supply of the West—a question which is each year becoming more pressing.

There is no reason for reducing this forest preserve except to benefit some railroad or to throw the country open to miners, for the region is not fit for settlement by agriculturists or stockmen. There can be no question that the national interests involved in this matter of water supply are infinitely more important than any private interests can possibly be, and it is a serious matter to expose these National interests to danger. If we are to begin a system of cutting down the rights of the public every time some railroad wants a right of way, or some contractor wishes to cut ties for a new railway line, or some prospector desires to sink a hole in the side of a hill, we might as well throw open at once all our public reservations and parks.

We believe it was a Kansas Senator who proposed to lease the geysers out to Chinamen to be used in connection with their laundry business, and this spirit of practicality seems now to have found lodgement in the brain of Senator Warren. It is a pity. The trees which cling to the rough mountain sides of this forest preserve—now only a year established—are worth more to the country and to Wyoming than the land can ever be without them, and if the preserve is now to be cut down one-half, all its timber is endangered. Wyoming is arid enough as it is. For years its interests have suffered through drouth. Cattle have died, stockmen have gone out of business and rancher's crops have failed to start because there was no snow in winter and no rain in spring. To endanger the forests of this preserve, by throwing it open to the public, is to endanger the water supply for a large part of that State.

SNAP SHOTS.

TARPON fishing is booming this year, and the record of fish taken is far ahead of the score of 1891. To March 17 of last season there were caught thirty-four fish. This year, to the same date, seventy. The proportion of fish hooked to those taken in as shown by the record of one day is as 31 to 11.

Next week we shall give a description of the singular whitefish known as the tullibee. This we believe to be the first account of this fish since that of Richardson.

In his interesting account of Florida pelicans in our Natural History columns to-day, Dr. Morris Gibbs relates that it is a favorite "pastime" with the winter tourists in that State to shoot pelicans on the beach. This is a practice which requires the exercise of no skill, can be excused on the ground neither of utility nor of sport, and is altogether unjustifiable and censurable. The senseless cruelty of the average Florida tourist who carries a gun is indecent and disgusting. It is a tremendous pity that some means cannot be devised to put a stop to the slaughter.

With the first of April, the trout season will open in California, Colorado, Connecticut, Iowa, Massachusetts, Minnesota, New Jersey, New York (in the Forest Preserve May 1) and Virginia; and some thousands of lines will be hung up to dry to-morrow night. The plain everyday trout fisherman will be out *en masse*—to employ a poetical expression of the late Walt Whitman; that personage so frequently alluded to in angling literature and so infrequently encountered in real life, the "true disciple of old Izaak," will be there too; and ahead of him—a week ahead, for the matter of that—will have been the small boy with the pole and the letter in the post-office and the fabulous string of big ones. Each and every one of them, to whom those lines shall come, the FOREST AND STREAM congratulates on the privilege of getting away; and wishes for all of them a full day of satisfaction. Better is a small string of trout and contentment therewith than a pack-load of fish and the trout-hog's greed.

GEORGE SHEPARD PAGE.

HERE and there an individual stands out as an admirable type of American sportsmanship. Such a one was George Shepard Page, who died at his home in Stanley, N. J., last Saturday. A successful business man of wide and varied activities, Mr. Page was an enthusiastic fisherman, shooter and hunter of large game. But with all his devotion to field sports he found most satisfaction in fostering and replenishing and enlarging nature's resources of wild life, in stocking the waters with new species of fishes, the restoration of game to depleted areas, the introduction of song birds into fields and woods now first answering to their melody. For such public-spirited, provident and substantially successful endeavor Mr. Page will be remembered with honor.

From the FOREST AND STREAM of April 13, 1882, we reproduce the following personal sketch:

Mr. Page was born in Readfield, Kennebec county, Maine, on July 29, 1838, and in 1845 his family moved to Chelsea, a suburb of Boston, where he was educated in the primary, grammar and high schools.

At an early age he manifested that interest in matters piscatorial which has since made him so well known among American anglers and fishculturists. In 1857-8 he visited St. Anthony, Minn., and was one of the early visitors to Lake Minnetonka, in which famous lake he captured many large pike. In 1860 he made his first visit to the Rangeley Lakes of Maine, by invitation of his cousin, Hon. Henry O. Stanley, Fish Commissioner of the State, and here took his first trout, which weighed two and a half pounds, from the apron of the upper dam. During this trip he caught a seven-pound trout, and observed the spawning habits of the fish. A pair of large trout had a nest which he watched for several days, and even approached and stroked them gently without alarming them, so intent upon their business were they. The Rangeleys were then in an almost unknown country, and Mr Page wrote them up in the daily press and recommended them to his friends and the public, and kept up his visits from year to year. In 1862 he moved to New York city.

In 1863 Mr. Page brought down brook trout of five pounds and more and presented them to William Cullen Bryant, Henry J. Raymond, George Wilkes and Genio C. Scott. These fish created a sensation among anglers, many of whom denied the genuineness of the species, until Agassiz pronounced them to be true brook trout. In 1867 Mr. Page organized the Oquossoc Angling Association, of which he was president for ten years, and which built what was then the finest angling club house in America. In the same year he took 30,000 eggs of the Rangeley trout, packed them in moss and transported them to New Jersey, where he hatched them—the first instance we know of where eggs of wild trout were taken and transported 500 miles. In 1867 he took the great ten pound trout—which for upward of ten years was the largest *Salmo fontinalis* on record, and which was mounted and exhibited at the Centennial Exhibition at Philadelphia, and subsequently at Mr. Blackford's annual trout openings. This male trout, which weighed probably twelve pounds when captured (it weighed ten three weeks after), and a female of eight and a quarter were transported alive from Maine to his ponds in New Jersey.

Black bass were first introduced into Maine by Mr. Page, who took thirty-one live ones from Newburgh, N. Y., to Winthrop, Me., in 1869. In the same year he carried brook trout eggs to England and France. Those taken to England were hatched at South Kensington by Frank Buckland, and those to France at the Jardin des Plantes, Paris, under the Société d'Acclimatation. These are believed to be the first eggs of American trout which crossed the ocean.

In 1870 Mr. Page was made an honorary member of the Société d'Acclimatation, Paris, and corresponding member of the Deutsche Fischerei Verein. In this year he discovered an account of the "Dry Impregnation of Fish Eggs" in a Russian paper, which he caused to be translated and published in the New York *Citizen* this being the first announcement in this country of that process.

In 1872 he attended the second meeting of the American Fishcultural Association at Albany; and introduced a resolution asking Congress to appropriate money to erect a salmon hatchery on the Pacific coast and to undertake shad hatching on the Atlantic rivers. He was made chairman of the committee to present the same to Congress, and upon doing so asked for an appropriation of $10,000.

In 1874 Mr. Page was elected Vice-President of the American Fishcultural Association, and built a hatchery on Bema Stream, Oxford county, Me. For the three years previous he had caught and liberated many adult trout in the Rangeley Lakes with their weight and the date attached to them on platinum tags, and in 1873 one was taken by the artist Thomas Moran, which had gained one and three-quarter pounds in two years.

In 1874 he transported black bass from the Delaware River to the Passaic, in New Jersey. In 1877 he directed the construction of a trout hatching works at the outlet of Rangeley for restocking those waters. In 1881 he suggested to Prof. Thos. H. Huxley

Inspector of Salmon Fisheries of England, the introduction of the American shad in England. On April 1, 1882, he was elected president of the American Fishcultural Association.

The subject of our sketch has been in active business since he was twenty years old, mainly dealing with the chemical products of coal tar. His house has extensive chemical works in the United States and in France, with important connections in London. In this department of research he has invented several useful articles, and has taken out some valuable patents. He introduced into this country the method of creosoting for the preservation of wood. He is a member of the American Gas Light Association, the American Chemical Society, and the American and the New York Pharmaceutical Societies.

Mr. Page has figured largely in Christian, philanthropical reform and temperance associations. He is vice-president of the Howard Mission and Home for Little Wanderers in this city, and was one of the four original founders of the New Jersey State Temperance Society, of which he was president for seven years—a staunch cold-water fishculturist! Sunday school work has also claimed a share of his attention, and he has been a superintendent and teacher for twenty years, being a member of the Congregational Church. When abroad he represented the Smithsonian Institution by appointment of Prof. Baird.

Mr. Page is a great advocate of education. He believes that it should be free, non-sectarian and compulsory. When he made his home at Stanley, N. J., in 1867, there were no schools within two miles of the village. He immediately established one, employed teachers, and furnished books, furniture and other appliances. Later he built a fine school house and expended several thousand dollars for the benefit of the children of the poor during ten years. In 1870 he delivered addresses at Manchester, England, at the invitation of the National Education League, in Free Trade Hall, and elsewhere, in which he described the free school system of the United States, for which he received the thanks of the League for his assistance in securing the enactment of the present free, unsectarian and compulsory education law.

We have dwelt larxely upon his angling and fishcultural career, but his sportsman's laurels are not solely those of an angler. During a tramp of 200 miles in October and November, 1877, from Rangeley Lakes, in Maine, to Lake St. Francis, in Canada, and return, he shot a magnificent caribou, which weighed 600lbs., and stood nine feet from the ground to the tip of his antlers. The latter were three feet long and had twenty-seven prongs and branches. The head is now a prominent decoration of his hall. A graphic account of his hunt appeared in our columns and was copied into many papers. It was on this trip that at the French Canadian village of St. Vital du Lampton he met with Urban Therriault, a lineal descendant of the Acadians, whose ancestor, warned in season, escaped from Grand Pre in 1755, carrying an infant son in his arms, fleeing through the forest from Nova Scotia to the St. Lawrence. Mr. Page secured the autograph of Mr. Therriault in the pocket copy of Longfellow which he always carries on his angling and hunting tours. On his return he called upon the poet at Cambridge and described the interesting discovery, to the delight of Mr. Longfellow, who added his autograph to that of the Acadian.

The Sportsman Tourist.

THE APRIL TROUT.

MOUNTAIN lake and rushing stream,
Waking from a troubled dream,
Sighing pine and maple dumb,
Know that spring at last has come—
In the clear depths hidden now,
Fontinalis, where art thou?

Soaring osprey, screaming gull,
Alcyon's chatter, ocean's lull,
South wind gently blowing from
Sunny lands whence spring has come,
Ask thee, reckless rover, now
Fontinalis, where art thou?

Bluebird's carol, robin's song,
Gurgling notes from blackbird throng,
Bursting buds and bees' low hum
Swell the greeting, "Spring has come"—
'Neath the sheltering alder bough,
Fontinalis, where art thou?

Come! I call thee once again,
Through the drops of summer rain
Wearily I wend my way
Where the torrents madly play,
Woo thee, tempt, implore thee now,
Fontinalis, where art thou?

T. H. B.

CAMPING IN THE BELT MOUNTAINS.

ALL things considered there is no better region for the sportsman than the mountains of northern Montana, consisting of the main range of the Rockies, the Big and Little Belts, the Snoweys, the Judith, the Moccasins, the Little Rockies and the Bear Paws.

The natural entrance to this section is via the Great Northern Railway, with Great Falls as the head center and natural outfitting point, where everything in the line of supplies, teams and guides may be had at reasonable rates.

After the first of July one can be assured of good roads, freedom from storms and intense heat, an abundance of fish of the finest quality, game in season, both feathered and fur bearing, and immunity from the herds of winged pests, that are so vexatious in all the lower levels at this season of the year. The climate is such that one can safely count on six months, in which life in a tent will be entirely comfortable.

Would more definite information be desirable? if so brief references to a recent September trip will be made. Throughout these mountain ranges, and at intervals of from one to three miles apart, are rapid flowing brooks, having their source in the springs fed by melting snow. These brooks adjoining each other, form larger streams or rivers; such are the Smith, Teton, Sun, Belt, Judith and Marias rivers. The headwaters of these streams are all noted trout streams, and in making our selection Smith River was chosen as being the most accessible, and the region it penetrates being famous for its grand and rugged scenery.

Smith River rises in Meagher county, Montana, is a very rapid flowing stream, having a fall of perhps 6,000 feet from its source to where it empties into the Missouri River, a distance of about 100 miles, the principal part of the fall however being in its cañon, which is 20 miles in length. The width of the stream will average 100ft. and the depth 2ft., this being varied by long still pools that have been cut ages ago in the living rock into holes from 4 to 10ft. in depth, thus affording superb cover for trout and grayling of mammoth proportions.

Our party was small, consisting of the wife and son, a lad of 14 years, and the writer, our conveyance a Studebaker mountain wagon, was drawn by a span of Montana horses, the best roadsters in the world. In our outfit was a camp stove and furniture, a wagon sheet, a side saddle, guns, tackle, and an abundance of bedding and provisions. Smith River lies due south of Great Falls, 20 miles, and 9 hours out, we came to one of its principal tributaries, Hound Creek, up which stream our route lay for three miles.

Soon after striking this creek a pair of young mallards was flushed, and as they were going our way it was decided to secure their company if possible. On reaching a point above where their flight seemed to have taken them, I took the Colt 10-bore to look them up, and as an attractive pool was convenient, the kid set up his jointed rod to try the stream during my absence. In the first bend below the ducks were flushed and were dropped into the stream in one, two order. The creek had cut its way through a minature cañon some 12ft. deep, and being unable to get to the water's edge, and the current being very strong I was compelled to travel nearly a mile before the game was secured. Concealing them in my pocket I returned. The kid was still patiently fishing, and to his inquiry if "I had killed the ducks?" I made answer "they had flown down stream." I then asked him whatluck? "There are plenty of whitefish in this hole; shall I get a mess for supper?" was his reply. To which I said. "We haven't come up here to catch whitefish." By this time I had reached the wagon where the better half was patiently waiting. To my query as to whether we had not better move on and make camp she replied, "Rene wants to fish a little longer." The reply excited my suspicions, and observing a gunny bag in the bottom of the wagon I lifted it, and was dumbfounded at what it concealed. While I had been on what was almost a wild goose chase, Rene had landed two mountain trout, the largest I had ever seen, and fearing my return before he had them safely cached, and his sport thus lessened, he had not taken time to cleanse them from the sand and grime incident to landing them. I washed them in the brook and laid them side by side on a newspaper, and feasted my eyes upon their beautiful proportions.

Twenty years' experience with the trout of Minnesota and Wisconsin had in no wise prepared me to expect such fish. The larger of the two weighed 3½ pounds and the smaller a pound less. Their style and general appearance is altogether different from the trout of the Mississippi Valley. The swiftly flowing streams, in many places exceeding that of a milltail, has caused a muscular development that makes them much heavier and stronger, while the pure cold waters, clear as crystal, has gilded the gold of their markings and made of them creatures so gorgeous as to be indescribable in brilliancy. The mouth of the mountain trout is much larger than the eastern trout, and they are vigorous and hard fighters.

Supplied as we were so abundantly with fish and fowl, we prosecuted the sport no further for that day, but made our way to a beautiful camping grove, where we enjoyed a dinner fit for a king, after which the preparations for night being completed, we were lulled to sweet sleep by the rhythm of the swiftly flowing waters, well pleased with our introductory to a mountain stream and its occupants.

An easy drive the next day brought us to Two Creek Cañon, through which our way to Smith River Cañon led. The length of this cañon is between one and two miles, and the fall from the beach land, at the head of Two Creek, to the foot on Smith River is about 600ft. Remembering this, you can draw your own inference as to the kind of a road we found in the bed of this stream. The further we went the more difficult the going, until toward the last I was compelled to stand on the axle on the upward side of the road to prevent upsets; but the descent was made in safety, and at the foot we found three important things essential to the campers—good water, plenty of fuel, and the balsam fir, from which we cut boughs to make our beds.

It is well worth getting weary to have a prime evergreen bed; nor is it every one that knows just how they ought to be constructed. The large boughs (those from from 4 to 6ft. in length, the main limb being an inch or so in diameter,) should be spread on the ground, the butts to the head of the tent, and the bough side up, all one way. Another course should be spread over these, shingle fashion, the butts of the second course being tucked in out of the way and under the first course. These two layers when piled sufficiently thick and close furnish the necessary spring to the bed, and on these may be piled (remembering to have the boughs all the same way) smaller boughs, and over all the finest limbs, or rather the feathery ends of the boughs, may be cut and strewn. With a heavy pair of blankets spread over this and a pair to use as covering, he who occupies such a couch needs not the sympathy of any one. With the fragrant balsamic odors of the evergreens, and the pure open air, health and life are drawn in with every inspiration of the lungs.

The mountain parks or open spaces are covered with a splendid growth rich, nutritious grasses, and the Montana horse that has been trained to feed on a picket rope (namely, to graze when tied by a 40ft. rope), will not thank you for grain, provided he is picketed where grass is abundant. Our horses had no grain while in the mountains, and gained flesh each day while out.

Our objective point when leaving Great Falls was the mouth of Tenderfoot Creek, the main tributary of Smith River. This is four miles above the mouth of Two Creek cañon, and this distance was passed early the next A. M. On reaching Tenderfoot we met a rancher who was acquainted with the country, and had been up the stream fishing and hunting stray horses. He recommended that we make our way up stream as far as we could, as the fishing grew better the further up we went. When asked how the road was, he replied that there wasn't any road to speak of; a man had gone up in the spring with the front wheels of a lumber wagon, and he reckoned we could go with our light rig where any one else could.

I attempted to get him to particularize as to the worst places, and he said if we could get down on to the creek level from the beach on which we then were he was confident we could go on up from five to six miles. We inspected the road down and decided that if we once were headed down the hill no power on earth could prevent our going, as the distance was about 100ft. and almost a sheer descent. By rough locking the wagon we reached the bottom safely, and started on our picturesque way. Inside the next three hours we could have cured the worst case of dyspepsia on earth if the patient had remained in the wagon. It and everything else would have been completely jolted out of him. We made more than thirty fords, the stream averaging 30ft. in width and 30in. deep, and finally at the last ford, in pulling up an extra steep pitch out of the stream, the double-tree and three tugs broke at one and the same time. There probably never was another so speedy an unhitching as then occurred.

Camp was pitched, and early the next morning we made up a light outfit for packing, and putting the side saddle on to one of the horses and the wife in the saddle, and bedding and cooking utensils, provisions, etc., on the other horse, Rene and I being equipped with rubber boots, we moved on up stream some three miles to our permanent camp ground.

We were soon at home and ready to receive company, and so far as comfort was concerned we were as well fixed as if we had a car load of impedimenta to use.

We were exceedingly fortunate in the selection of a camping ground. It was a natural meadow, scattered over which were clumps of trees, both deciduous and evergreens. The feed for the horses was excellent. The fishing was superb; and the only difficulty was not wantonly to waste them; we were much relieved to find that the pointer dog would eat fish when fried brown and crisp.

In Tenderfoot and Smith rivers are found trout, white fish and grayling. Our preference was decidedly for the grayling. He is a gentleman among his kind, it requires no coaxing to induce him to bite, does not take the sulks, and has no quarrel with you which prompts him to lie sullenly in the deep pools, and evade your best attempts to interest him in the new selection of flies. He rises beautifully, and eagerly takes the fly, and is game to the last. Has it ever been your good fortune to capture a two-pound grayling from a swiftly flowing mountain stream where all your skill is called into play to lift from the boulderstrewn stream your prey with a fragile fly, line and pole as means to our end? If not, there is much of joy and satisfaction ahead of you.

The grayling is a much more finely built fish and fashioned on more slender lines than the trout, the mouth is not as large, and in place of the black and golden spots as on the trout, the marking or spots are not nearly so numerous, and are a deep slate green on silvery green sides. These spots run up and down the sides in three lines, shading off at the head and tail, and are heavier in the middle of the body. The dorsal fin is much more prominent, and it is this fin which is his crowning glory. It is covered with the most beautiful and iridiscent of spots, which are as gorgeous as the eyes in the feathers of the peacock's tail. Such is the grayling as found in Montana streams; and he will bear with credit a closer test by acquaintance of the fry pan. The flesh cooks up crisp and dry in flakes, and is the extreme opposite of the soggy, watery fish of warmer latitudes and waters. The settlers along the streams say that the grayling are rapidly increasing.

For grandeur of scenery Tenderfoot Cañon is incomparable. The valley or cañon is very narrow, rarely exceeding two hundred yards, and frequently narrowing to as many feet. The stream is fringed with willows and cottonwood, these in turn being bordered by pine and fir. As a rule the wall of the cañon is washed by the stream first on one side then by the other, and from the water's edge the precipices rise hundreds of feet into the air, and are carved into every conceivable shape. Here a sudden turn in the cañon brings you face to face with lofty heights, in which the imagination easily traces resemblances to majestic cathedrals, with lofty pinnacles, columns and towers. Frequently at some sharp angle the walls are pierced by openings through which the blue sky may be seen, adding to the wonderful scene the effect of arched windows. These stupendous walls of rock are of every form and color, the soft grays variegated with browns and chocolate, relieved by bright bits of coloring, resulting from copper and iron stains, these with the soft green of the lichens all constitute effects that are calculated to run an artist wild in the vain attempt so transfer to the canvas the vivid hues so harmonious in results.

When wearied with hunting and fishing we made explorations which always resulted in interesting finds of petrifactions, curiosities in the way of shells, and specimens of various kinds.

One bit of wonderland in this vicinity is the sheer face of a precipice some 300ft. high, composed almost entirely of crystallized quartz; and when seen with the rays of the setting sun shining upon it, bringing into effect the wonderful play of the light upon the facets of the quartz rock the effect is dazzling.

Not far from the head of Smith River Cañon is the location of the recent remarkable find of the expedition from Princeton College the past season. They unearthed and secured very perfect specimens of camels, the three-toed horse, the rhinoceros, and other prehistoric quadrupeds, all in a petrified state.

Our trip was destitute of anything especially thrilling. We were out 19 days and nights, our only covering for this period being a wagon sheet drawn tightly over a center pole, and securely fastened down at the sides, open at each end. During this time an occasional sprinkle threatened us, but we were entirely comfortable in an improvised tent.

Each morning fresh signs were to be seen along the stream, where elk, deer and bear had passed. A black bear was killed in the meadow in which we were camped while we were on the stream.

Our wants outside of fish were satisfied with ducks, partridges and sharp tail grouse; our party was too small and the season too early to kill larger game.

By the lovers of the grandly beautiful, by the enthusiastic sportsman, by the man or woman who may be worn out with the cares and worries of business life, by all such nothing is to be lost and everything to be gained by a tour of inspection in the Belt Mountains by way of the Smith River Cañon.

S. M. E.

GREAT FALLS, Mont.

STORIES OF THE OZARKS.—I.

IN the fall of 1871 six hunters, with covered wagons, crossed the Big Muddy at St. Charles, Mo., for a four weeks deer hunt among the Ozarks in southeast Missouri. A fine pack of hounds had been provided for the trip and none of the little essentials so necessary to our comfort had been overlooked. We had driven in a southerly direction for several days, prospecting the route pretty thoroughly for deer, but without the occurrence of any incident worth noting. The weather was fine and the roads dry and game alone was wanting to make us happy.

In the afternoon of the fifth day we stopped for camp on the banks of a turbulent tributary of Current River in the Ozarks. It was rather early to go into camp, but we had had a hard day's drive and the teams needed rest; besides, there was plenty of wood and water and that settled the question, as we might have driven until sun down and found neither.

An early supper was eaten with a relish that alarmed our cook. A hard day's tramp over the mountains and across the valleys had given us a ravenous appetite and we hungered for the flesh pots. Indigestion and kindred ills had gone glimmering. The tents were stretched, the beds were made and the cool night wind sighing through the trees gave promise of refreshing sleep. Every breeze was redolent with the odor of pines freighted with health to the invalid and balm to the tired toilers of the brain. Every breath was a tonic. What a glorious sanitarium, without money or price and free from the trammels and caprices of fashion. The horses were quietly munching their hay and oats in the feed boxes. The huge camp-fire sending a column of sparks skyward, threw into relief the canvas-covered wagons and the gaunt trunks of the towering pines, which threw fantastic shadows across the rushing stream into darkness beyond.

The scouts reported unfavorably and we decided on another day's drive toward the lower waters of the Current, where we learned that there was plenty of mast and we would be certain to find game.

The full moon occurred during our second day out and we were anxious to make permanent camp during the dark of the moon, that is when the moon was on the wane and could be seen during the day, for it is religiously believed by deer hunters in this section of the West that when the moon is up the deer are feeding and moving about, and when the moon is down the deer are lying down to rest; but whether this is a superstition or a fact the doctors must decide.

To relieve the tedium until bedtime some one proposed telling a hunting story and called on the youngest man in camp to lead off.

"No, boys, I'm tired to-night. You spin your yarns and I'll listen and applaud at the proper places. Experience should lead. The oldest first."

The stories began, and as their individual skill and prowess was the subject of the narrations each man told his tale vieing with those who preceded him in startling incidents and dramatic situations. Some of them drew the long bow to the fullest tension. Most of the recitals were met with a chorus of oh's and ah's and other scurrilous expressions of incredulity that had a chilling effect on the narrators.

"Come, young man, it's your turn now. Come up to the scratch. No shirking."

"Boys, I can't enter the ring with you and you know it. You carry too many guns."

"Oh, go ahead; it's your turn to be chaffed and you must stand up and take your medicine. It is a good hour until bedtime, and you are sure to have a story or two tucked away somewhere. We've told all the yarns we know and some we don't know."

"Yes, that goes without saying. One would think we were a camp of fishermen instead of hunters."

"Gentlemen, suppose I tell you a true story, in which I'm only a lay figure, as it were."

"All right, anything goes in camp."

So the story was told:

For several years previous and up to the breaking out of Civil War between the States, I was connected with a mercantile house in one of the principal cities of eastern Virginia, and among our patrons were several wealthy planters living in the Shenandoah Valley and Blue Ridge region, who made half-yearly trips to the city to lay in supplies for a large force of plantation hands as well as to provide for the more immediate wants of their respective families. Among the number was a Colonel G., with whom, for some reason, I was evidently a favorite, and he had often invited me to spend the Christmas holidays with him on the plantation, or, if I could get a vacation during the dull season, to make him a visit and he would insure me a welcome; and besides, we would have a deer hunt in the Blue Ridge. Accordingly, one bright morning early in November found me on the train speeding away toward his hospitable roof, with anticipations away up in the nineties.

The fields were white with the frosty rime of the previous night; the many-hued frosts were shimmering in the morning sun and the thickets and hedge rows, clothed with the tints of departing summer, were spotted here and there with patches of bright green holly laden with a profusion of crimson berries, soon to decorate the ancestral halls of the neighboring planters, where good cheer awaited the approaching Christmas-tide. As the morning advanced we passed scores of whitewashed negro cabins, with the usual complement of pickaninnies and fat old mammies, with the inevitable colored handkerchief on their heads and arms akimbo, gazing with open-mouthed wonder as the train rushed by. At the stations where the train stopped to take on or put off passengers were the usual number of idlers and aged and indigent negroes, one of whom was heard to remark: "I doan' see how on de yeth dem kyars kin go 'thout any hosses hitched to em."

The Colonel met me at the station; my hunting traps were put on board and our colored Jehu mounted the box for a long afternoon drive toward the plantation, where we arrived about sunset, and after removing the dust of travel, I was introduced to the Colonel's family and greeted with that hearty Southern hospitality so characteristic of ante-bellum days. Supper was soon announced, and we sat down to one of those old Virginia meals which were the pride of the mistresses of that period.

The Colonel's family besides his wife consisted of two sons, two grown daughters and a niece, who was on a visit to the family. The elder son was a fine, manly fellow, a few years past his majority, and had graduated at college with the honors of his class. After a pleasant chat with the ladies, two of whom were the reigning belles of the season, just returned from the White Sulphur Springs, the Colonel and I repaired to the wide, cool verandah, so common to Southern mansions, for an after supper smoke, when he brought a box of fine old Havannas, brown and mellow, and with that delightful aroma so much prized by the lovers of the fragrant weed. As the darkness came on the lamps were lighted and the family repaired to the large and well furnished parlor, where the evening was pleasantly spent in conversation with music, whist and dominoes. Every succeeding day during my visit I was indebted to each member of the family for some renewed evidence of their kindness so delicately bestowed that one could not feel he was a trespasser on their hospitality.

The night was well advanced when we separated, and with a cheery "good-night" to all we retired to pleasant dreams. Little did we think that in a few brief months the red surges of civil war would sweep with ruthless fury over that quiet valley, leaving death and desolation in their track. The ancient roof tree, the home of so many generations, was to become a heap of ashes blown about by the winds; and the once happy family that dwelt beneath its shelter is broken up and scattered, some here, some there. Two of their number have passed over to the silent majority. A son fell at the head of his regiment in the shock and din of battle, and mother and son sleep side by side in the family burial place on the old plantation.

I look back on that happy week as a rift of sunshine between the clouds; and wherever fate and fortune may lead them their name and memory will remain forever green in the heart of the stranger who sojourned within their gates.

There is such a flood of recollections crowding upon me, gentlemen, that I almost forgot I started out to tell a hunting story; and if you will bear with me I'll get there yet.

The next morning after breakfast, during a chat on the verandah, a few more of the Colonel's cigars went up in smoke. What a lovely place to dream away the golden days of autumn. Here were books, hammocks, reclining chairs and lounges, everything indicating refinement and luxury, inviting one to dreamy indolence and forgetfulness of the petty cares of everyday life. In the distance the beautiful Shenandoah glistened in the sun or darkened in the shade as it wound its way in and out among the hills and stretches of woodland on its banks. In the foreground lay the luxuriant valley checkered with well-tilled fields, and beyond and over all rose the mountains, peak on peak and ridge on ridge, fading away into the distant and limitless blue.

In the afternoon the Colonel, his son and myself took a ride over the plantation, and made arrangements for a deer hunt the next day.

Early the following morning horses were saddled and brought to the door by a sable son of Ham, with a broad grin on his face in anticipation of the sport to come, and followed by a half score of eager baying hounds struggling in their leashes. It was the Colonel's boast that he had the finest pack in the State, that the stock was of the best, and kept so. That this was only a small part of his pack was evident from the howling within the inclosure containing his kennels, and a deal of jealousy was felt by its occupants for not being bidden to the feast. Hastily getting into my hunting togs, we mounted the horses and started for a gap in the mountains, where our host said we would be likely to get a shot or two at least, with many chances in our favor of bringing back some venison. The ladies waved us good-bye as we galloped away across a well-kept lawn toward a grove of elms in the distance, now yellowing with the tints of autumn. Like all greenhorns, I was just dying to kill my maiden deer, and expected to cover myself all over with glory or gore before the sun went down.

It was nearly noon when we got to the hunting grounds and the Colonel's son proposed to lunch before putting out the dogs, but the Colonel wouldn't listen to the proposition until he had looked over the ground for sign. He returned after a half hour's absence with his hat in his hand, and it was easy to see from his looks that he had found sign; and now lunch was indefinitely postponed.

My host put me on a stand on a long open ridge and his son was placed half a mile further back while the Colonel himself went in another direction.

After waiting nearly half an hour the Colonel blew the horn which was the signal for the darky to turn the dogs loose. His latest admonition to me was to "keep cool; don't get excited, and under no circumstances leave the stand until the horn blows." I did not at that time understand the twinkle in the Colonel's eye as he left me, but I did later on. You see, gentlemen, the hunting instinct was strong within me, but it had yet to be developed.

I confess that my thoughts were about equally divided between the deers we were hunting and the dears we had left at the mansion, for I was then heart-whole and fancy free and had formed no entangling alliances. But a few moments later the baying of the hounds awoke me from my reverie and I found that one deer at a time was all any man ought to attend to.

What a volume of sound comes from their musical throats. Treble, tenor, bass, all the intervals of the scale blending in one grand chorus. They've struck a hot trail. I believe they're coming this way. I was on the tiptoe of expectation. Nearer and nearer came the hounds; and now my agitation became intense. My heart beat like a trip-hammer. With craning neck and eager eyes, I looked in the direction from which the hounds were coming. I shook a little. I think I had a chill. I leaned against a tree to steady myself for a shot and looked through the sights of my gun, but they looked hazy and indistinct, and the gun wobbled in spite of me.

"Oh, I know how you felt, old fellow, I've been there."

"Now you just hold on; who's telling this story, anyway?"

The hounds swung off to the right, the deer had changed its course and soon the sharp report of the rifle awoke the echoes across an intervening ridge, and a long blast on the horn told that my host had bagged the game and the hunt was over. In a few minutes the Colonel made his appearance, followed by the darky, with the deer slung over his shoulder shot-pouch fashion, and the hounds crowding close to his heel. It was a buck, a five-pointer, a splendid fellow; and I envied my host his good fortune. After stopping a few moments for congratulations we started back toward our horses.

"I reckon I'll go dis way, massa, dis deer is gittin' mighty heavy to tote, shuah's yo' born."

"You'd better come with us, Jack."

"No, massa, I knows a nigh cut roun' yon ledge and I'll git to de hosses foh you does."

With a blast on the horn, calling the dogs to follow, we went one way and Jack went another. We had gone but a few hundred yards when we heard a lively scrambling among the brush and gravel on the side of a steep ridge off to the left, and looking in that direction we saw the darky and deer rolling one over the other like the spokes of a cart wheel, first the deer on top, then the darky on top, deer and darky, darky and deer, until they go so mixed up we couldn't tell one from the other; but finally they brought up against a clump of bushes some thirty yards below, where Jack had stumbled from the path.

We hurriedly retraced our steps and went to his assistance. He had released himself from the deer and stood scratching his woolly pate and muttering to himself: "Foh de Lawd, if I didn't think dat ar deah had come to life agin an' was des kickin' de very livah out o' me, 'deed I did. How's I gwine ter git back dar, dat's w'at I'd lak ter know, dat's wat bodders me now. I's a mighty fool niggah, dat's w'at massa allus said, an' now I knows hit to be er fac."

This soliloquy broke us all up; and if laughter promotes digestion, we were safe from dyspepsia for weeks to come.

"Yaas, heap o' fun foh you white folks up dar, I 'spec. Come mighty nigh bein' a dead niggah down heah, did for a fac."

"Are you hurt, Jack?"

"I dunno, massa, I 'spec I's hurt some, but I doan' know 'dzactly whah 'bouts. If I'd bin a year ob co'n, dar'd bin nuffin' lef ob me but de cob. I feel mighty like cussin', 'deed I does."

After a little delay we got him back in the path, and found he was but little the worse for the accident, if we except a gaping rent in his unmentionables. The path Jack had taken ran along the base of an overhanging ledge of rocks, and was barely wide enough for a careful footman to pass in safety, while below it was a steep declivity covered with loose rock, debris and brush, ending in a deep ravine at the bottom. In toting the deer he did not consider his additional breadth of beam, and the horns of the buck striking against the face of the ledge toppled him over, with the result that he went through some ground and lofty tumbling that were the finest acrobatic feats of his life.

After replacing the deer on his shoulders he concluded to follow his master's advice and found there was truth in the saying that "the longest way around is the surest way home." On reaching the horses, our sharpened appetites reminded us of lunch; and on the banks of a spring that came bubbling up from beneath the rocks we disposed of the creature comforts amply provided by the good ladies at the mansion. While the dogs were quarreling over the remnants of the lunch, the buck was tied on one of the horses behind the darky and we started back on the route over which we had come in the morning, until we came in sight of the plantation.

"That's a fine gun you have there," remarked the Colonel. "Yes," I replied, "the maker staked his reputation on it for fine workmanship and accuracy of shooting. I had it made to order but have never fired it."

The Colonel at once bantered me to shoot at a target with him for a small wager to be paid the next time we met in the city. No sooner said than we dismounted and hitched our horses, sending the darky on to the plantation with orders to Aunt Sally, the cook, to have some venison steak for breakfast the next morning.

The sun was slowly sinking behind the mountains and the lengthening shadows were creeping over the valleys laden with the dewy coolness of approaching night. The eagle was soaring to its eyrie in the cliffs, the birds were seeking the shelter of the coverts and the day was drawing to a close veiled in the haze of Indian summer that hung like a mist over valley and forest and stream.

The Colonel was arranging the target. If I could clip his wings now, I fancied, a pair of bright eyes at the mansion would grow brighter as they looked into mine. Now was the time to immortalize myself and make a shot that would get into print and roll on down the age like Tell's shot at the apple on the head of his smiling son. Now, good rifle, do your duty and make yourself famous and me a name to be envied among men. Ha! by the Fates, what's that with coat of golden mail swinging idly from the top of yonder thistle? A bumble bee, as I live. Now, nerves, be firm as steel, and good trigger answer to the touch.

The muzzle of the gun came up slowly from the ground (I always shoot on a rising sight) and when the alignment was perfect, crack! went the rifle, and down went the bee. I ran up to it and found I had shot it right in the eye.

"Oh, that's no trick for a man who had the buck ager so bad he couldn't hit a forty-acre field if he stood in the middle of it. I'm some on bumble bees myself."

"Did you ever hear of Ananias?"

"Did you load that bee on your horse and have it cooked for breakfast?"

"One question at a time, gentlemen."

"Better salt that down or it will spoil on your hands."

"I've often heard of the Prince of liars, but I never camped with him before. Why didn't you tell that story at first?"

"Well, boys, I'm a little too old for that. I've camped out a heap in the last few years, and I've always noticed that the man stands no show who tells the first lie in a crowd like this."

"Then you didn't go deer hunting in the Blue Ridge nor have the buck ager?"

"And you didn't chat with those fine ladies, nor smoke the colonel's cigars?"

"And the darky and deer didn't roll down the mountain together?"

"Boys, it's all as true as the book, except the bumble bee business, and I threw that in simply to trump your tricks."

"Yonder comes one of the natives, perhaps he can give us a pointer on game." CAMERON.

[TO BE CONTINUED.]

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

Natural History.

THE BROWN PELICAN.

IN America there are two species of pelicans, known as the white and brown. The white pelican is more extended in its range, having been found breeding as far north as 45° north latitude, and is taken on the coast as well as in the interior. It is a migrant to the northern parts seasonably, and is found occasionally in all the States in the great valley of the Mississippi in more or less numbers, while in the Dakotas it breeds each year in large rookeries. It has been taken in Michigan in both peninsulas, but is not known to breed here. The white pelican (*Pelecanus erythorynchus*), which is the larger of the two birds, is therefore a consumer of fresh-water fish, a habit in which it differs radically from its cousin, the brown pelican (*P. fuscus*). During the past winter and spring I had an excellent opportunity of observing the habits of the brown species, at a point on the Indian River, Florida, where there was an extensive breeding resort.

The brown pelican—on the Atlantic coast at least—is not accustomed to migrate north of 35° north latitude, and is much more abundant well to the south of this parallel. The species is found on the southern coast of California, I am informed, but is much more common on the Gulf of Mexico and on the eastern shores of Florida. Pelicans, like cormorants and nearly all other aquatic birds, are gregarious, and the brown pelican, especially in breeding season, which, by the way, lasts over six months of the year, is noticeable in this respect. This habit of massing in vast numbers to rear their young will in time militate against the bird, and if protection by law is not afforded them, the species will be exceedingly rare during the next half century. Some accounts by reliable writers which I have read seem hardly credible, but after visiting a large breeding ground the past winter, I am willing to admit that I can believe any amazing tale of the past regarding this peculiar bird, familiar as I am with the fact that there are only tens now where there formerly were thousands.

The brown pelican was formerly abundant on the Georgian coast, and a goodly number may still be found in certain quarters. A large colony used to nest yearly near the mouth of the St. John's River, but the site has about been broken up. From St. Augustine south, birds may be seen in increasing numbers as we get further away from the settlements. On the Gulf coast, as with the east Florida coast, birds may be found throughout the year, and in certain spots in large numbers, but they are nowhere as abundant as formerly. The methods of their taking off are many and various; but it may be doubted if any one method of extermination can equal the butchery of the shotguns. Not far from Galveston, Texas, there was located a few years ago a factory for the rendering of pelican oil from the bodies of the birds taken at a famous nesting ground near, and this pelican oil factory was allowed to run unmolested by the State, finally shutting down busines when the supply of birds ran out, and the few which escaped butchery left for another quarter.

During the past winter I found it was a favorite pastime with many of the tourists, who brought their guns with them, to shoot pelicans on the beach, and in the course of ninety days, it is fair to say that I saw ninety birds destroyed. The flying bird presents a grand mark to fire at with a rifle; but for a shotgun, no skill is required, as the birds tumble easily, even to No. 6 shot at 40yds.

All the birds going from the island, where they were nesting, were found to have empty gullets, while those returning to their nesting ground were almost invariably loaded with fish. The largest number of fish contained in one bird was thirteen, the smallest of which was four and a half inches in length and the longest one eleven and and a half inches. The weight of the load was one pound, five ounces. Another load that we weighed scored only seven fish, but indicated two pounds, four ounces, the fish being of even size and heavy. I was informed by a man in whom I place much confidence that he took from a bird's gullet a mullet which weighed over three pounds. This does not seem unreasonable when one watches pelicans eating fish in the city parks. I kept specimens of each kind of fish taken from pelican's gullets, pouches and crops, in order to have an exact list, but the jar containing the fishes was unfortunately destroyed before I had succeeded in identifying all the species. The following species were identified, however: Mullet, porgy, sailor's choice, sheepshead, catfish, toadfish. Mullet predominated, while only two catfish were found and but a single swell-toad. Not one of all the pelicans dissected by me contained a particle of anything excepting fish in either pouch, gullet, crop or elsewhere. The gizzard, as would be expected from the nature of food, is very soft and much like the stomach of some reptiles.

In fishing the pelican generally sits on the water and secures its prey, apparently without effort. Diving its head suddenly as it floats or swims slowly about, it widely opens its great bill, making a quick motion, and engulfs its prey. The pelican is a very slow swimmer and cannot get out of the way of even a slowly rowed boat. So far as I have seen it never dives to avoid a hunter, but always takes wing in ample time. When the head emerges from the water, after the bird has made a sudden movement beneath the water, there is no indication that it has secured its prey. From the fact that the pelican never holds the fish between its mandibles as do the herons and kingfishers just after a catch, and that it is not noticed as being in the pouch, I have been led to think that it does not seize its prey as do other aquatic birds, but that it swallows the fish at once and under water. This conviction became stronger after I had seen many pelicans repeatedly diving into a school of mullet, and when it was known that the birds had just come from their nests with empty crops. Not a fish was to be seen between the mandibles, and yet when one of the birds was shot a little later, several lively mullets were found in the gullet. My conclusions may be given here, which, if not new, are certainly entirely unlike anything which I have ever heard or read about. The pelican's upper mandible is hard and firm and capable of being bent only to a limited degree. The lower mandible, on the contrary, although when closed against the upper one strongly held in position, is, when lowered from it, capable of a great variation in shape. This may be best seen by examining the bill of a newly killed specimen. The lower mandible, it will be found, can be shortened fully three inches by pressing on the point and toward the head, the sack or bag thereby becoming greatly widened. The lower mandible, although only slightly over an inch broad when collapsed, may be spread to a width of fully five inches. If, then, when the bird dives, as we may call it, although the pelican rarely goes as fully under the water as the fishhawk or kingfisher, it desires to secure a fish it opens its net by spreading its lower jaw, and with the sharp edges of the upper mandible just above to snap up any mullet which attempts to escape, rushes through the water and thus secures its meal. I have read that pelicans toss up fish from their bills before finally swallowing, but could never verify this statement, but I am satisfied that they must, at least occasionally, do this, for the reason that they stow the fish in the pouches without regard to system, and either head or tail toward the gullet. Having always found the swallowed fish head down in the gullet and crop, I am satisfied that it is their custom to swallow fish head first, probably to avoid difficulty with the fins. Therefore a fish placed head toward the tip of bill in the pouch would have to be turned before being finally swallowed. Pelicans possess a great distensibility of gullet, and I doubt not an adult could swallow a ten-pound fish with ease, although the ultimate disposal of it might trouble him.

When flying, they draw up the long neck so that they look to me much like a gigantic woodcock with its long bill protruding. They are unsuspecting birds, and may be easily approached unless much disturbed, and this characteristic too often leads to their destruction, as persons are constantly visiting their grounds and shooting them as they fly by.

Down on the Indian River we learned of a rookery, and having heard that the birds were in the midst of nesting, we resolved to visit them. Accordingly the morning of Feb. 17, 1891, six of us set out in the yacht Lida for the resort. The island, two or three acres in extent, is very low, barely above the water. It is situated about twenty miles south of Melbourne, Brevard county, Fla., and has been known for many years as an assembling ground for the brown pelicans. There are not as many birds to be seen about the place as were there formerly, but a sufficient number still nest there to warrant a few remarks about their breeding habits.

When our craft came within 300yds. of the shore, the birds began to get uneasy, and when we had approached within 50yds. of the island, an immense number rose from the ground and the few stunted trees and flew about with nearly noiseless wings. It was not, however, until a gun was fired, that a good idea of the size of the colony was had. Clouds of the clumsy creatures arose from the ground and in a short time settled on the shallow water all about the island; those nearest land undoubtedly being the parents of the young birds, as they occasionally flew about and over the nesting site. By a careful estimate, we agreed that there were at least 4,000 birds present, while undoubtedly a great many were away on fishing expeditions, as they are known to feed twenty miles or more from home. Some of our party placed the estimate on the assembled birds as high as 10,000. The condition and size of many of the young gave evidence that nesting must have begun by the first day of the year if not as early as Dec. 15. A few of the young were quite three weeks old and as incubation occupies from three to four weeks, a reasonable inference may be drawn as to the beginning of nest building.

Nearly all the nests were built on the ground, and though a few were still empty, about all contained three or four eggs or young. Three eggs appears to be the average set, although many nests contained four and quite as many only two. A few black mangroves at the edge of the island held thirty nests or so on their bare irregularly shaped limbs from 5 to 15ft. from the ground. They differed from those built on the surface in having many heavy sticks in their construction and in being stronger and with a greater hollow. Those nests built in trees were evidently occupied first, as they all contained young. The nests on the ground were often built to a height of 9in., and one or two quite a foot high, but the majority were not above 5in. in height and some were not over 3in. As a rule the nests were about 2ft. in diameter, but some were larger by 4 or 5in., and some were considerably less in size; those evidently built by inexperienced birds. They were all composed of dead grass and rushes, very coarse, and from a distance much resembled little bunches of straw. Some were constructed very shiftlessly and again some were very neat affairs of their kind, well built and deeply hollowed. It was evident from examination that the birds when setting always occupied the same position, the head generally presenting toward the water. In those nests containing large young, the structures were usually much disarranged and beaten down, and were in some cases almost entirely pulled to pieces.

There must have been 200 nests containing eggs and young birds. Many contained both eggs and young of at least a week old. In some nests could be found birds of ages that varied a week or ten days, and in one case dissimilarity was so great that the larger bird was endeavoring to swallow his diminutive squab relative. We were informed that when the eggs roll from the nests there are frequent fights among the old birds as to right possession, and from their anxiety to secure all the eggs they can for their nests. This theory would seem wrong when we consider that in no nest were there found over four young or eggs, for some bird, more pugnacious than the rest, would certainly secure much more than its share, but still the habit may obtain and the pelican know full well when the complement, four eggs, is attained. At any rate the eggs get changed about in some inexpicable manner and the emerging of the young varies much in time.

The young when first out are without covering and are disgusting looking things; in fact, at no time in its existence can we in any way allude to the brown pelican as handsome in any degree. When the birds are about a week old they are covered with down, and at this time they present a ludicrous appearance, heightened by their attempts to waddle out of the observer's way, or later, when they sit upright in the wreck of a nest and hiss spitefully at the intruder, making stupid lunges with their long, ungainly necks.

The old birds feed the very young, as I proved by dissection, with very small pieces of fish, which are fed by being disgorged by the parent, as I know some of the herons to feed their young. As soon as the youngsters are of sufficient size they are allowed to swallow full-sized fish, and the amount that a three to four-pound nestling will gulp down would astonish one not familiar with a pelican's habits. Many of the young were seen sitting bolt upright, with the tail of a fish sticking out of their beaks, and the sight of one uncomfortably full is enough to provoke a laugh from anybody. All these squabs which were too full for utterance of their hisses immediately attempted to disgorge upon our appearance near their nests, but many succeeded only after the most remarkable contortions, writhings and wrigglings that it has ever been my privilege to witness. Several had gulped down fish 10 to 12in. in length, and as the old ones are in the habit of dropping the fish into the eager mouths head first, it follows that the spines of the fins were difficult to overcome. One bird, only 19in. long by actual measurement, was found outside of a 12½in. mullet, the tail of which alone showed outside the young pelican's mouth, where it was vigorously waved by its captor which was vainly trying to disgorge.

We secured some fresh eggs for our oölogical cabinet, and also attempted to cook some. The eggs are white but soon get stained, and are provided with a thick calcareous coating. They are, in capacity, about twice the size of a domestic fowl's egg, but vary much in size and shape. We secured excellent specimens from the eggs we took for our collections, and have made presents to many of our friends at the North, but the eggs, as a food, proved an utter failure. The flavor is rank and strong, and I cannot imagine any person but a starving Indian who would eat them.

The pelican must have remarkable powers of digestion, as it manages to digest all the fish bones which it swallows. Although I looked carefully about the nests containing good sized, as well as small young, I could not find the slightest evidence that the bones were disgorged after the flesh was digested. This evidently proves that the bones are all digested.

In conclusion I may offer a tabulation of figures which if only half correct will prove conclusively that the brown pelican is undoubtedly the greatest enemy to salt water fish which we have among the birds of America. If a single bird eats and destroys sixteen fish a day, each weighing four ounces, we find that the allowance reaches one thousand four hundred and sixty pounds of fish a year, and these figures are probably very reasonable. One colony of pelicans embracing five thousand individuals would consume three thousand six hundred and fifty tons, or over seven million pounds of fish annually. These figures are sufficient, and it is needless to call attention to the fact that there are hundreds of these colonies of pelicans. On principle perhaps it is well to kill off the pelicans and save the fish, but I for one say no to this proposition. If it is done, then kill off the fishhawk, herons, kingfisher and all other piscivorous beasts and birds. But it is better to let Nature take its course.

MORRIS GIBBS, M. D.

KALAMAZOO, Mich.

A WORD FOR THE EAGLE.—The FOREST AND STREAM has mentioned in late issues the taking of the eggs of the eagle, in one instance to the extent of 36 pairs. Although the intimation is given that they were for scientific purposes, it seems to me that science does not demand the total extinction of this noble bird, which must ensue if they are destroyed in embryo as well as at maturity. Your last issue mentioned the killing of an eagle on the North River, the bird measuring 9ft. from tip to tip, and the man was to have the same "mounted." About the first eagle I ever saw in my youth was "mounted" on a stuffed sheep to give the representation of having just killed the same. I remember I had less pity for the sheep than for the eagle. Now, if the man who killed the eagle on the North River will only have the same set up or "mounted" on the skin of a stuffed donkey, I think it would not be inappropriate. This bird is becoming rarer with each year, and as our national bird should be protected by national laws, otherwise it will be added to the list of the auk, bison, etc., very soon. Congress seems intent in adding to the value of its coin namesake. Why not at the same time protect the original?—REIGNOLDS (Boston).

A CALIFORNIA BUFFALO FARM.—Buffalo farming at Monterey promises to become a big success. It will be recalled that some days ago another buffalo, captured near the borders of Yellowstone Park, was added to the herd of W. C. Winslow, near the site of the historic old town. "Queerly enough," said Thomas J. Wilson, of Monterey, yesterday, "these buffaloes take to their new place remarkably well. There was some doubt about it at first, especially as the buffalo is not indigenous to the Pacific Coast. His real country is the desert region of the interior. We did not know at first but this was too warm and enervating and too near the seashore, and furthermore that the buffalo, being essentially wild, might not, like the Indian, thrive near civilization, but he does. The buffaloes crop the tame grass and appear to like it and keep in as good condition every way as on the bunch grass."—*San Francisco Examiner, March 10.*

EARLY BIRDS.—Beaver, Pa., March 14.—On the morning of Feb. 16 I saw a flock of nine turtle doves (*Zenaidura macrourà*). Feb. 18 the robin (*Merula migratoria*) gave us his first notes, and on the morning of the 26th (in a beautiful snow storm), down in the garden corner (on his old perch, a wild blackberry bush, which we have left there for his special benefit) sat my little friend, the song sparrow (*Melospiza fasciata*), singing as if he would burst himself with gladness upon reaching home. He is two days ahead of time. Bluebirds came next day. On the 29th a snow storm set in and they left us for a few days. March 3 the purple grackle (*Quiscalus quiscula*) arrived. In a trip through the country the other day I found my seed flocks of quail and many ruffed grouse still in good shape. The winter has been comparatively open and they have fared well.—G. A. SCROGGS.

ALBINO QUAIL.—Arroyo Grande, Cal., March 14.—I send you by mail to-day the head and wing of an albino California valley quail. It was killed near here, but was torn by the dog so that only the head and wing were saved.—W. B. P.

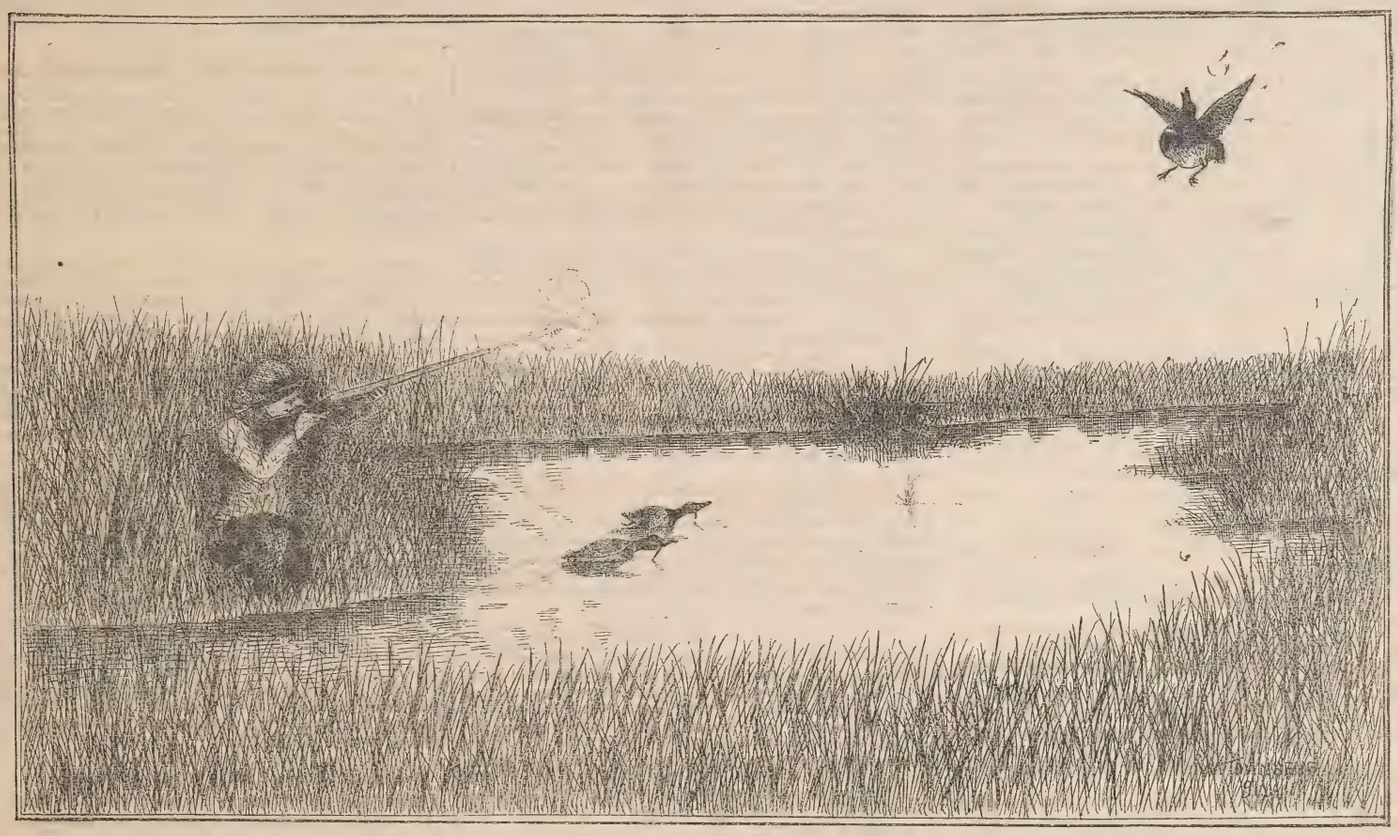
Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

A CLIMB FOR A MOUNTAIN CAT.

IT was February. The low temperature of mid winter had spread on icy covering over lakes and rivers; and a 2ft. depth of snow covered the hills and valleys. It was early one morning while I was trying to study out some plan to break the monotony of shop life for one day at least, when my shop mate A. F. broke in rather abruptly, somewhat excited over the fact that the track of a big mountain cat had been found leading up the creek on the ice. Our muzzleloading rifles had hung on the pegs since the end of November, and our two dogs had lain in the shavings until they had grown fat and lazy. We felt just then that we were spoiling for an outdoor tramp, and so were the dogs. In an hour we were following the track of the cat. There was an inch of snow on the ice, and the track showed the animal to be one of the bigest. We had occasionally been in the wildcat business before and knew pretty well the nature and quality of the game.

Our best dog we had picked up as a stray a year or two before. Where or how he was raised we never knew; and like Nessmuk's Pete, he had no pedigree. A lack of courage was not among his failings. Color, a reddish drab, short hair, short legs, heavy breasted, unusual length of head and jaws, light hind quarters and slim tail. He was true on track but slow; gave tounge well, and his yelp had rather a musical ring. The other dog was a half-breed shepherd which A. F. had raised; was no hunter, and was not remarkable for anything unless for fighting or killing house cats with little or no provocation.



We followed the tracks up the creek a half-mile or more, when the trail led off at right angles up a small brook, thence up through a gorge, then turned up the southern slope of the mountain spur. Here our best dog began to chafe, and we let him go. In five minutes we heard a perfect jingle of yelps. He had started the cat (as we learned later) from under the tops of some bent saplings, a whole thicket of which had been bent and weighted down by the heavy snows. The cat and dog led off quartering up the western slope, and were soon out of hearing. We made no attempt to follow, but made slow headway up the spur, the distance of nearly a mile, where we patiently waited for the cat to come back over the ridge, a fact that we were about sure of for two or three reasons. If the snow had been only 4 or 6in. deep, he would have been driven up a tree in less than an hour; but in such a depth of snow it was easy play for the cat to keep ahead of that short-legged dog. But we knew his staying powers, aud we knew that a wildcat never ran on a straight trail very far when a dog was behind. That cat could have turned back at any time and wiped out the dog in less than four minutes, and gone on as though nothing had happened; but they don't seem to be made that way. They won't fight a dog except when cornered or wounded and they can't get away, in which case the dog gets whipped, no matter what his size or breed may be. I am speaking of the largest of the species.

After waiting a reasonable time we heard the dog coming back. He had settled down to a slow, steady yelp and seemed to be coming directly toward us. They soon crossed our track below in good shooting distance, but a blinding snow squall which was just falling thick and fast beclouded every object which was more than six rods distant. We then moved up the spur or point another half mile, where there was a narrow bench twelve rods wide and directly across the ridge. Here we believed the cat would cross when going back over the mountain again, and here seemed to be our last chance for that day. So we took a stand one on each side of the pass. A. F. still kept his dog at heel. At last we heard the dog slowly coming up the eastern side of the mountain. Next came that mountain cat, leisurely loping along, and evidently going through the middle of the pass if not stopped. The snow was falling thick and fast, making it nearly impossible to get a fine sight, but I let him come up at short range when I drew up and cut loose. There was a bent sapling six inches in diameter which stood a few feet ahead of the cat when I shot, the top of which had been bent to the ground by the falling of a larger tree, making a half circle, the center twelve feet high. This he mounted with some difficulty and I saw one hind leg swinging. He had hardly made the center when a shot from A. F. on the other side dropped him in the snow, where he lay apparently helpless when A. F.'s dog pitched in. The cat had but one foreclaw that he could use, but he sunk that one deep in the dog's foreshoulder and he was hugged up and chewed up quicker than I can tell it.

By this time the other dog came up and pitched in. Now the dog Shep fought under protest, that is, fought himself loose as soon as possible. Not so with the other, he went in to kill or get killed, and the latter result would probably have been his fate had not the cat got his quietus from other sources. The mystery was that the whole thing was done so quickly, for less than five minutes from the time that I first saw that feline monster he had been shot twice and had thoroughly "chawed up" two dogs, and been knocked on the head with a piece of dry hemlock limb. On examination we found that the first shot had broken one hip and apparently crippled the other, and the second shot had broken one shoulder.

The mountain cats that were found in that region were mostly of a reddish gray color, except under the belly, which was whitish, with dark spots. But this one was an exception, having lightish gray and black stripes running crosswise and bluish white belly with black spots, and having comparatively shorter body and stood higher on legs. I never saw more than two or three animals of this type, while I have seen scores of the other variety.

GRAND VIEW, Tenn., Feb. 23. ANTLER.

AMONG THE WILDFOWL.—XVIII.

A PRAIRIE POND-HOLE. DEAD DUCKS MAKE GOOD DECOYS.

MISSOURI QUAIL.

Editor Forest and Stream:

Next May there will be a gathering of the representative sportsmen of this State. The Missouri Fish and Game Protective Association will hold its annual tournament in this city, May 2 to May 7, inclusive. It is hoped that some valuable work will be done in the way of improving the game laws of our State. Thousands of quail are killed unlawfully every winter. As the law now stands quail are illegal game from Jan. 1 till Oct. 15. Well, that is very good so far as it goes. But how about rabbits? We have no law protecting them at any season. What we need is a clause inserted making it an offense to kill or attempt to a kill a rabbit from Jan. 1 till Oct. 15. Not that we need the rabbits protected, but they must be protected in order to save the quail.

Since the first day of January we have had several good tracking snows, and as a result, hundreds of quail have been illegally slaughtered by rabbit hunters. And to make matters worse, we have had enough stormy weather to satisfy the most implacable pot-hunter. Whole coveys of quail have been wiped out of existence at one shot. Then let us have a law to protect rabbits and once more we can have quail plenty for us and our friends.

Years ago it became a law that no man could net quail on his own or any other person's property. To-day, without a doubt, hundreds of quail have been driven into nets and had their heads pinched. Last winter and every winter for that matter, quail have been netted, then shot and sold in the market. Sometimes the person doing the netting would not waste the ammunition to shoot them, but would stick each quail with a sharp instrument to make an apparent shot mark. The price realized for these quail is usually $1.25 per dozen. This is not an overdrawn story, but something that happens saregularly as the winter comes.

It is easy to see that if a law were made to prohibit the sale of game, these needless butcheries would in a great measure be stopped. There would be but very few persons who would object to game not being sold. We might expect opposition from the hot tomollo man and others who care but little what they eat so it fills up. Of course some real nice clean people eat commission house game, but they have but little idea what they are wrestling with.

This idea of prohibiting the sale of game is not by any means a new one to the readers of the FOREST AND STREAM, but it is one that has most of your readers supporting it. I hope that the sportsmen who come here next May will make a move in this direction, and not rest until it becomes a law. BRINKSTINE.

KANSAS CITY, Mo.

GAME IN TOWN.—Rockland, Me., March 17. The weather for nearly a week has been unusually cold, the mercury ranging from 8 above at 7 A. M. to 20 at 12 M. It would take a sharp pick and a strong arm to make any impression on the frozen ground, yet on the 15th inst. one poor woodcock was seen flying through one of our principal streets. How queerly we are made up. My heart went out in pity to this bird, and I would have given $5 quicker than a wink to have saved it from a miserable death by cold and starvation; and next autumn I would be just as eager to take his life as I had been to save it now. On the same day that the woodcock was seen a beautiful dark colored mink gave quite a crowd of men and boys a race through Main street, the mink making his escape through a cesspool.—JAMES WIGHT.

FOXES CLIMBING TREES.—I have on one or two occasions jumped foxes from live-oak trees, and while cow hunting one warm day last month, I saw two lying along the horizontal limb of a large live-oak, apparently sunning themselves after the manner of raccoons. I wondered at their allowing me to approach to within 10 or 15yds. of them, but never having heard their ability to climb trees doubted, was not surprised to see them where they were.—G. P. V. (Sisterdale, Texas).

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth. 220 pages, price $2,50. For sale by FOREST AND STREAM.

TREED BY A "MAD'AWG."

THIRTY years ago shooting partridges on the wing was a rare art in our part of North Carolina. A man who could hit a bird flying was about as much of a wonder then as Dr. Carver or Buffalo Bill are now.

The partridge, as we still call the quail, was taken in traps, coops, and by driving them from on horseback into long, funnel-shaped nets. Pointer and setter dogs were scarce, though a few were used by the netters.

Just then my father's brother, who was something of a sportsman, came from some distance to pay us a visit, bringing his gun and setter in the buggy with him.

I had been old enough for a year or more to carry a gun, but had so far confined myself to shooting robins and squirrels, or, to be exact, in shooting at them, the terms being by no means synonymous in my case.

Uncle Rufus's accounts of his exploits in partridge hunting fired my imagination the first night. As he felt too tired from the effects of his long journey to hunt the next day and was also an exceedingly kind and indulgent man, I very readily obtained his permission to use his gun and dog, Old Richmond, myself.

The next morning after an early and hurried breakfast I was off accompanied by two little negro boys, Ben-Jake and Black Sam, my inseparable companions and backers in every undertaking.

It was mid-autumn, and all nature toned down by the frost to tenderest brown was set in a framework of pale blue sky. For a while we trudged on through the fields and thickets without event, but keeping a sharp eye on the dog, who bounded and circled over the land with the greatest buoyancy.

Never before had we seen a dog so tractable and obedient, so affectionate and so playful. Three happier, merrier boys could not have easily been found. We sang, whistled and shouted, and occasionally I fired the gun off in the air to encourage the dog.

But our joy and glee was of brief duration and came to a sudden and startling end. Old Richmond, while plunging and bounding over the fields in our front, the embodiment of health and activity, stopped as short as if he had run against a rock wall; almost turning a somersault in the act. Instantly he became as rigid and motionless as a dog of stone. His head was thrust forward; his tail extended like a rod; even one of his forefeet, which was raised when he was seized, remained lifted from the ground. A moment later a faint shiver ran through his frame.

We were dumbfounded. To our minds the faithful creature had been smitten with some strange and terrible malady. Our hearts went out to him in his distress; but we were afraid to go to his relief, not knowing what a dog of that kind might be capable of in extremity.

As soon as our wits returned a little we held a hurried consultation as to what was best to do; speaking in whispers lest the dog should overhear us.

"He's bound to be mighty sick or paralyzed, or something," I ventured.

"He's got de trimbles!" blurted out Ben-Jake.

"He done been conjured sho's yer born!" quivered Black Sam.

"Let's go atter Unc' Butler. He's had mo' dawgs dan ar man in de Nunited States, en he'll know what to do," urged Ben-Jake.

"Let's run en fetch Marse Rufe, case it's his dawg, en he'll know what he ought to take," plead Black Sam.

"Let's shoot off both barrels of the gun at one time and bring help," I suggested.

But we were afraid to do anything. Not for worlds would we have gone an inch closer. To fly we dared not, lest we should break the spell and bring the dread canine on us. So with wild eyes and trembling frames we huddled together in about 40yds. of the rigid dog, and did nothing.

Presently there came an eruption that seemed to shake the earth to its foundation. The explosion of a keg of powder could not have been more sudden and temendous. A huge covey of quail had burst from the ground at the dog's feet and sped off down the branch like a whirlwind. After they were gone I remembered that I had a gun, and what I brought it for.

At the next glance Old Richmond was himself again. Boundless was our relief to find him on the go and disporting himself as of old. The fuss the birds made in taking wing had cured him or brought him to, we agreed after no little argument.

So onward we went, though with ardor considerably diminished. Anxiety had now to some extent taken the place of joy, for we knew not what moment Old Richmond might be taken again. And then suppose there should be no covey of partridges handy to bring him around with the noise, what would happen.

However, we comforted ourselves with the argument that a dog could hardly get as bad off as that twice in one day, talked about something else and tried very hard to forget all about it, although we couldn't try hard enough to succeed.

By and by, in crossing an old field seamed with deep gulleys and covered with brom straw, Old Richmond disappeared entirely. In vain did we call, coax and threaten. He came not, nor any tidings of him.

At length, despairing of ever finding the dog, we started home with heavy hearts, discussing what excuse we should give Uncle Rufus for having lost his pet. Imagine our amazement when on scrambling in a body out of a deep gulley we ran almost upon Old Richmond standing in the rank brom sedge.

Half a glance showed us that the old fellow's strange ailment had come back again. No friendly forty yards now intervened. An extended arm could almost have touched him. We were possessed with terror. Any other, even the fiercest bulldog, we might have faced, but there was something eerie about a setter, and a setter's way before which all our courage became as fear.

Again a whispered consultation was held, though in a much lower key than the first one. Shooting the dog was proposed, hurriedly discussed and for weighty reasons unanimously rejected. First, the gun might snap and miss fire, we might miss the dog, we might wound him just enough to make him still madder. Then it was Uncle Rufus's dawg, too. Maybe he knew a medicine that would cure his dog.

A bright idea struck Ben-Jake. "Thunder make mud turkle break his hold. Racket fotch Ole Richmond to des now. Less make it thunder!" he whispered.

This was agreed to, and make it thunder we did with a vim. Peal after peal of the artificial thunder rumbled and muttered through the old field. In the midst of it all Old Richmond's head swung around as if on hinges. Then we saw that his eyes were rolling and quivering as if in the last agonies of death.

"Fits! Fits!" screamed Ben-Jake.

"Fits! Mad'awg (dog)! Mad'awg!" exclaimed Black Sam; and in a twinkling we were bouncing over gullies and tearing through the old field like deer. A covey of partridges rose with a loud rumble in our rear, and glancing back over our shoulders as we fled we saw Old Richmond coming with wild leaps straight toward us.

Before we had been running; now we flew. The branchless trunk of a pine tree, owing to its scaling bark, is next to impossible to climb, and I have never been up one before or since; but twenty seconds later I was in the top of one 30ft. above the ground with two sable youngsters keeping me close company.

Old Richmond was already at the roots of the tree bounding and barking as if he was determined not to be cheated if we climbed to the moon. Our lofty perch gave us a wide prospect, enabling us to see that we were not more than a quarter of a mile from the road.

Now and then men rode by on horseback, and we signaled frantically with our hands, or hats having been abandoned in the flight, and shouted "Mad'awg! Mad'awg!" with might and main. But the distance was so great that the horsemen must have though that we were guying them, for they only shook their riding switches at us and jogged onward.

Midday came. We had been in the tree full four hours and had signaled full half a hundred people with the same results. Driven to desperation, all of us now pulled off our coats and shook them at every passer-by till the pine swayed and cracked dangerously.

Finally it had effect. An old negro man plodding along the road, staff in hand, stopped, listened, looked our way, and then leaving the road hobbled slowly and lumberingly toward us. About a hundred yards from our perch was a high rail fence, fringed with cedars and pine bushes, forming what was termed a hedgerow. Climbing this fence and balancing himself on the lofty top rail, the old man shouted:

"My blessed goodness, chillun, is yer 'stracted? Don't yer know yer mus'n' 'sturb de neighborhood wid all dat outlandish racket en ca'in' awn? You'll skyeer de women en chillun to def at dat rate."

"Mad'awg! Mad'awg! Mad'awg!" we hollered back.

"Whar!" he ejaculated.

"Here! Right under this tree!" we said.

Just then the dog gave a high bound and a loud bark. The old man tumbled off the fence on the further side like he had been shot. Indeed, I was sure he must be seriously hurt, till in an incredibly short space of time I saw him emerge from behind the hedgerow half a mile distant, hat in hand, stick gone and running like a racer.

After that only one more person passed the road. A man came from a farmhouse at which the old negro took refuge, and rode under whip and spur down the road, shouting a warning to every house as he shot by. A panic seized the neighborhood. People, leaving plow and grubbing, fled from work in the fields. Mothers hunted up their children, dragged them in the house and barred the doors.

The evening crept by with leaden feet. Despite our alarming predicament we grew ravenously hungry. True, we had started from home that morning carrying lunch with us, but boy like, finding it a hindrance, had eaten it the first half hour to get rid of it. Since then we had neither food nor water. Toward sundown a motley body of negro men and boys accompanied by a few white boys came in sight. Some bore pitchforks, some axes, some mauls, clubs and fense rails. They halted on a neighboring hill and shouted. The dog bounded off in that direction. The crowd wavered, and before Old Richmond was half way to them broke and fled in wildest rout, and I saw them no more.

Another long pause followed. The pine limbs grew harder; we grew hungrier every minute. The sun set. A brilliant after-glow bathed the brown world in glory. Just as this had given way to the weird glare which heralds the coming of night, a small squad of men came trudging rapidly forward. I saw through the dusk that they bore guns in their hands. Old Richmond sprang toward them. Instantly there came the click of half a dozen gunlocks and as many leveled barrels gleamed in the twilight.

Just as we were expecting a flash and report a man in front beat down the guns and rushing forward caught the dog in his arms.

"Where's the mad'awg?" they shouted, halting at the fence.

"There he is with you. Mind he don't bite," I faltered.

"Why did you think he had run mad?" asked a familiar voice.

I described his strange condition from which nothing arouse him until the thunder of bird wings broke the spell. A roar of laughter was the response. Men laid down their guns to laugh. They could not do justice to the occasion until entirely disencumbered.

'Come down out of the tree, boys. Come down. That's a bird dog's way of letting you know that game is about. He was only pointing a covey," said Uncle Rufus sympathetically, as soon as he could get a hearing.

We slipped down, hunted up hats and gun and slunk home, a crestfallen trio.

"Ef it makes ev'y dawg es sick es dat 'en puts him in dat much mis'ry to smell er bird it oughter be ergin de law to p'att'ige hunt. Hit ought," said Ben-Jake, and we agreed with him.

DAVID DODGE.

NORTH CAROLINA.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

Of all the numerous adaptations of electricity, perhaps none is prettier and more useful in a small way than the newly invented Electric Lighter. This is a beautiful ornament for the parlor, dining room or chamber, always ready at an instant's notice to produce light, and useful in many other ways. It is ornamental, entirely simple in construction, perfectly safe, and it costs practically nothing to keep it in operation. Besides its use as a lighter it can be made to serve other purposes. Gentle or sharp shocks can be given for medical purposes, or by another attachment a burglar alarm attached to all the doors and windows can be had. The article is one of use and beauty, and the Barr Electric Co., of 17 and 19 Broadway, New York, have found that it is a "quick seller."—*Adv.*

PREPARING TO RECEIVE CAVALRY.

WE were bringing a drive of logs down Sheet Harbor waters. The boss took off two men to cross the stream in order to take care of a wing jam rapidly forming on the other side, by logs coming from the rear of the drive. One of the men, Charles Campbell, had seen much active service during the Civil War, and was also a good stream driver. After reducing the wing jam sufficiently to let the rear logs pass rapidly by, they took a short stroll up the bank of the stream, when they discovered a young moose asleep in the dry grass that fringed the margin of the river. To catch the young animal and fasten him to a tree with the belt that log drivers usually wear was but the work of a few moments; they intended in the evening to ferry him across to the camp. The bleating of the calf brought the mother in furious haste. Campbell saw her rapid approach and thought it time to prepare to receive cavalry. Ordering his companion to place the small end of peavy on the ground, with the pick part pointing toward the coming moose, then firmly awaited the charge. They had not long to wait before the animal was in close proximity, striking at the pointed weapons with her forefeet and twice knocking them out of their hands. One lucky blow, however, hit the belt and broke the buckle, which released her offspring, and mother and calf soon disappeared. Campbell, in relating the adventure that evening before the whole crew at camp-fire, said he had many times faced the charges of Southern cavalry with less tremor than in the defense against that frantic moose. J. H.

SHEET HARBOR, N. S.

NOTES FROM THE GAME FIELDS.

OTTAWA, Kan., March 23.—A great amount of rain and snow has fallen here during the past two weeks, and all the ponds and creeks are full of water, insuring an abundance of waterfowl this spring. Last week a number of ducks were killed around here, and this week they abound everywhere, though they are very wild. Yesterday and to-day the weather was very warm and pleasant, but I think we shall have plenty of ducks for some time yet.—F. B.

CENTRAL LAKE, Mich., March 24.—The winter has been mild, with no great depth of snow, and much like the three which preceded it. It seems as if the climate is growing milder. The deer and other game have had a capital chance, and should have wintered well. An unusual number of ducks have been reported during the past week. I have not seen them, but those who have, call them "pintails." I think this can hardly be, as I never yet happened to see a pintail here. Some of these ducks have been shot, but I think that there is an increasing respect for the game laws in this region.—KELPIE.

ST. LOUIS, March 26.—Duck shooting has been better this spring than for many years past, and the slaughter of this bird at all the club resorts has been something terrific. Scores of 50, 75 and 100 in one day are not uncommon. But if all the old ducks are killed in the spring, where are the young ones to come from for succeeding years? The Ellsberry Fishing and Hunting Club has been organized with the following officers: President, E. C. Jansen; Vice-President, A. Russell; Secretary, P. Koehler; Treasurer, N. Staits. Some 2,000 acres of land have been purchased on the Keokuk and Northwestern road not far from Ellsberry station. The new grounds will afford both fishing and hunting facilities, and a club house will be built in the spring. At this writing the weather is getting much warmer and duck shooting will soon be over.—ABERDEEN.

INDIAN GAME FOR AMERICA.

MACOMB, Ill., March 14.—*Editor Forest and Stream:* The following letter from the U. S. Consular Agent at Karachi, India, pertaining to the Caccabis chukor, the India partridge, was received this date. This is a beautiful game bird, about the size of an American pheasant or partridge. Col. Ramsdale, of the English Army in India, writes to me that they are very hardy birds and will stand snow and any climate in America or the cold world. They are often found on the highest hills of India, and he thinks they will do much better in America than the black partridge which is found in the valleys where the climate is much warmer. The black partridge I imported from Calcutta last year have stood the climate here where the mercury fell to 15° below zero, and they are doing nicely; but I do not think they would stand our Northern States, though they would do well in the Western and Southern States. I have ordered five pairs of Caccubis cukor partridge, and shall look for them here about Aug. 1.—W. O. BLAISDELL.

UNITED STATES CONSULAR AGENCY, Karachi, India, Feb. 10.—Dr. W. O. Blaisdell.—Dear Sir: The Caccubis chukor are obtainable in the Northern Scind hills and in Beloochistan, and I am waiting to consult with the government official of the district as to how best to obtain the number you desire. When I procure them I propose locating them under the care of the superintendent of the local zoo. I can arrange for them us far as Liverpool. You will have to take delivery of them there. The cost of birds and carriage to Liverpool I estimate at 5 rupees per bird. The black partridge can be obtained in Scind. They would, I think, cost about 4 rupees in Liverpool. Yours faithfully, JAMES CURRIE, U. S. Consular Agent.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

CHICAGO, Ill., March 20.—Last winter John Jacobson, in northern Wisconsin, set a spring gun for deer. Ed Sweeny stepped on the string and was shot and killed. Jacobson was tried for manslaughter. Yesterday a jury found him not guilty and he was discharged.

A press clipping has the following: "B. C. Howell, of New York city, has contracted to pump dry Lake Angeline in the upper peninsula of Michigan. The lake covers a large bed of iron ore, and is estimated to contain 180,000,000 gallons." I do not know anything about Lake Angeline, and it is in order for some Michigan man to tell us about that.

Lincoln Park, of this city, is to have added to its stock of wild animals all those kept at South Park, among

these a grizzly and a black bear. This will make Lincoln Park still more noteworthy as a zoo.

Mr. Maurice Thompson has lately published a poem in one of the literary peridocals. The title of it is "Ho for the Kankakee." This will make the Kankakee feel real good. In the poem Mr. Thompson ho's for the swales, the sloughs, the pools, and also for the fens of the Kankakee. I never saw any fens along there, but a good many of us are ho'ing for those other things, especially the sloughs, about now. It has turned warmer, and yesterday a good flight was reported coming in on the marshes. At Cumberland Lodge, however, the top bag of the week was Mr. Henry Stephens, ten birds. Geo. Farmer only got one duck day before yesterday, but reported a good flight further out in the marsh.

"Ah," said Jacksnipe, as he looked over 12,470 acres of marsh, of which he seemed the sole inhabitant, "this is what I call a Snap. There are none to Molest, and I shall Eftsoons gather Four Bushels of Tender Worms."

So he alighted and Inserted his Flexible Beak into the soft Earth, and he said, "The Earth is Mine,"

But there came a Cold Wind, which Froze everything as It came. It froze the Tender Worm Crosswise in the Jacksnipe's Flexible Beak, so that neither Worm nor Jacksnipe could get away, and in a few Short Moments there was a Frappé Jacksnipe on the Marsh.

"This is what I call a Snap," said the Cold Wind.

MORAL.—It is a poor snap that won't work both ways, especially in a backward spring. E HOUGH.

Camp-Fire Flickerings.

"That reminds me."

A LONG, hot, dusty day's drive brought us to the shores of Cranberry Lake, in the North Woods, where we put up for the night. Bright and early the next morning found us in the peak of the barn looking for our canoe left the year before. There must have been twenty other boats up there left by other anglers like ourselves. After putting our boat in the water our expectations were fully realized—she leaked like a basket.

At 11:30 A. M. we found the craft sufficiently tight to start for our first camp, fourteen miles of a paddle. It did not take us long to load, two pack baskets, a rod and an ax comprising our outfit for three weeks, but the hardest article to put in was my 220 pounds. Three P. M. found us at Camp "Doe," well up through the floe and within ten rods of the foot of the falls of Cranberry Inlet. We were not unpacked before I was taken with a severe attack of sickness, more evidence of the shaking up of yesterday's ride. Rip put things in order and then asked me if I would go and catch some trout for supper; but there was no game in me; I was played and ready to lie quiet. "Where's the rod?" he wanted to know, and I pointed to it leaning against a tree. He found the fly-hook and reel, then disappeared down the bank. How many of the fishermen of Cranberry Inlet remember the old pine log at the foot of the falls? I think it has been there for over fifteen years, at all events it was worn flat by the crossing of animals and man. There was where Rip went; he was back inside of thirty minutes, and afterward told me he made four casts. As he came up over the hill he asked how I felt. "No better. Any luck?" says I. "Not much, only two," and he brought from behind his back on the crotch of an alder limb two dressed trout. I rose up on my elbow and looked at them. I produced a fish spring-scale—"7¾lbs., great Scott!" I was up and dressed and helped cook supper, and for twenty-six days with over 400 miles to our credit I had no more ailments. I had missed too good a thing.

PACK BASKET.

Sea and River Fishing.

AN ICY TIME.

Editor Forest and Stream:

Given a ten-inch hole through two feet of ice, forty feet of water reduced to a very low temperature, a cod hook of generous proportions, and hand-line, a heap of evergreen brush (supposed always to be on the windward side of ye), thermometer with the mercury (all of it) in the bulb; wind blowing forty miles an hour—that's about the size of it. Oh! I forget, there is a possibility—if you wait long enough—that a trout may condescend to rub against your bait; and you are expected to jab your hook into him, anywhere, run him up at a "forty clip" to the surface, snap him off your "iron," and with a supercilious smile of contempt at the supreme ease of the thing, calmly rebait for a "repeater."

Oh! yes, it's fun; but where do or did I come in? That's what I wish you to decide when my "tale of woe" is told.

Del. and Harry and I had, at last, made arrangements to try it, in a luxurious way: Man to have the holes all cut; holes "ground baited," "slosh" holes fixed for the live bait; all the et ceteras. Well, we got there. Only five changes necessary to reach Wolfboro. Only twelve miles ride up hill and down dale to the eastern shore of Long Island. And then it must begin to rain.

Our man was on hand, our holes were all cut, so our first job was to set fifteen pickerel traps we had brought. No sooner than accomplished, it was discovered to be too late to "bob" for trout, and we decided to lower the lines to the bottom for cusk, and leave them until the following morning. We went to supper and passed the night with a most hospitable friend, whose residence is on the island, and retired quite early.

Next morning, bright and early, repairing to our fishing ground, we found our baited lines engaged, that is to say, a cusk had appropriated each one of them (disgusting looking gourmands, aren't they?) They really made quite a string, but we had come for trout.

Resetting the traps for "pick," we each manned one of the aforesaid ten-inch holes and awaited developments. Waited? Well, I guess we did. Bobbety-bob, bobbety-bob, hour after hour, and if we had whiskers, the wind would have certainly blown through them.

Did you ever try to find a needle in the dark when there wasn't any there to find? I felt that way for three solid hours, when suddenly I heard a yell of triumph. Ye gods and little fishes! Harry's got one. How he did derrick him out, and he's a stunner. That is certainly encouraging. Now to business. Bobbety-bob, bobbety-bob-bob. Wow! I felt something gently trifle with my line way down in the depths of nowhere. Didn't get 'im. "Oh, well," says Harry, "he may come again sometime; you oughter struck 'im." "Struck 'im", says I "with a brick?"

But why weary you. 'Twas the same old story. A rub once in about every two hours, and just when I was feeling for my *mouchoir*, or filling the old corn-cob. Harry, who was a veteran, and to the manner born, captured another laker, and still another the next day—three in all. We came away with five trout and twenty odd pickerel and cusk. I haven't mentioned the particulars of the capture of the other two trout, as story writers aver that if nothing be left to the imagination, the popularity of the writer is jeopardized. You fishermen well know that some one "ketched 'em." *En rapport* with the lamented G. W., I too, cannot lie, I didn't.

To see Del. and me swelling with pride of a yesterday, while exhibiting our string of fish to admiring friends, you could hardly trace the mortification we really felt at our individual experiences, but way down beneath the surface of a placid exterior there was a "feeling of unrest" at the ignominy of our position.

You may put this in your pipe and smoke it. I will hereafter do my fishing through the ice in warm weather, and if I must needs fish through a hole, I'll work a well curb. A. T. BOND.

BOSTON, Mass.

PIKE COUNTY TROUT SEASON.

PHILADELPHIA, March 23.—*Editor Forest and Stream:* From the numerous inquiries received from all parts of the State in regard to information respecting the law for taking brook trout, the Pennsylvania Fish Protective Association requested an opinion from the Pennsylvania Fish Commissioners concerning the same, of which the inclosed correspondence is a copy. As it may be of interest to your readers to be informed on this subject, we ask your assistance and submit it with a request that it may occupy space in your valuable paper.—EXECUTIVE COMMITTEE PENN. FISH PROTECTIVE ASSOCIATION, M. G. Sellers, Sec'y.

PHILADELPHIA, Jan. 28.—Henry C. Ford, Esq., President Pennsylvania Commissioners of Fisheries: Dear Sir—In compliance with a resolution passed by the executive committee of the Pennsylvania Fish Protective Association, in session this date, I am instructed to communicate with you for the purpose of obtaining your views as to the exact laws of Pennsylvania relating to the open season for catching brook trout in the streams of Pike and other counties of the State, that the same may be published in various papers for the information of the general public. Very truly yours, MARION G. SELLERS, Sec'y.

PHILADELPHIA, Jan. 29.—M. G. Sellers, Esq., Secretary Executive Committee Pennsylvania Fish Protective Association: Dear Sir—In reply to your inquiry as to the exact laws of the State in reference to the season for catching brook trout, I would say that the act of June 11, 1885, prohibits the catching of brook trout save only from the 15th day of April to the 15th day of July, under penalty of $10 for each trout caught. This act applies to the whole State with the exception of Pike county, where, by special enactment of the Legislature of June 3, 1878, the season for catching trout is from May 1 to Aug. 1.

As there seemed to be some doubt as to whether this special act had not been repealed by the general act, the Fish Commissioners asked the opinion of the Hon. W. U. Hensel, Attorney General, in reference to it. His answer was as follows:

HARRISBURG, May 27, 1891.—Henry C. Ford, Esq., President Pennsylvania Commission of Fisheries.—Dear Sir: I have your communication of the 23d inst. requesting my opinion as to the open season for trout fishing in Pike county. The act of Assembly, approved June 3, 1878, entitled "An act for the protection of game and game fish in the county of Pike," etc., Section 11 provides, "that no person shall catch, sell or expose for sale or have in his or her possession, after the same has been caught or killed, any salmon or speckled trout, save only between the 1st day of May and the 1st day of August following."

As the title shows, this is a special and local act for the protection of game and game fish in the county of Pike. The general act, approved June 11, 1885, entitled "An act to prevent the catching, killing, exposing for sale or having in possession speckled trout, except from the 15th day of April to the 15th day of July," provides in Section 2 that "All acts or parts of acts inconsistent with the above are hereby repealed."

The only question then is whether or not the repealing clause in the act of June 11, 1885, is so comprehensive or explicit as to repeal the provisions of the special act for Pike county.

The Legislature having fixed, by a special law, the time during which trout might be taken in the county of Pike, in my judgment, it would require the legislative intent to be manifested by an enactment equally clear and precise to repeal the prior special and local act. The general repealing clause would not affect prior legislation on the same subject matter, and the local act for Pike county would therefore contine in force. Very truly yours, W. U. HENSEL, Attorney General.

With the publicity given to this opinion of the Attorney General of the State, none can in future plead ignorance of the law. The Pennsylvania Fish Commission have instructed its wardens to arrest all parties fishing for brook trout in Pike county prior to May 1, and in the rest of the State prior to April 15. Very truly yours, HENRY C. FORD, President Pennsylvania Commissioners of Fisheries.

The Association is doing excellent work by sending out this:

Fishing Notice: All persons desiring to promote the increase of fish in this locality, will bear in mind that it is important that the laws providing for a close season shall be strictly observed, so that the fish may have time to spawn, and thus provide for a continuance of the natural supply, without which the waters will soon become depleted. Fishing with nets and set lines is positively prohibited by the laws of the State. Penalty, $100, with forfeiture of nets, boats, etc. Fish weirs and fish baskets are prohibited by the laws of the State. Penalty, $50 for first offense and $100 for second offense.

The catching of black bass and wall-eyed pike under 6in., and trout and rock bass under 5in. in length, is prohibited. Penalty, $10 for each fish. The keeping of Penobscot salmon under 3lbs. weight is also prohibited. Penalty, $50.

Trout fishing is allowed only between April 15 and July 15, except in Pike county, where the season is from May 1 to Aug. 1. Penalty, $10 for each trout taken out of season.

Black bass fishing is allowed only between May 30 and Jan. 1. Penalty, $10 for each fish taken out of season. Rock bass same close season as black bass.

Wall-eyed pike (pike-perch or Susquehanna salmon) same close season as black bass.

Fish wardens, constables, or any officer of the State, is authorized to arrest, without warrant, any person violating any of the fish laws. One-half of penalty goes to the informer.

For further information apply to the Pennsylvania Fish Protective Association, 1,020 Arch street, Philadelphia. A. M. Spangler, President; Wm. S. Hergesheimer, Secretary.

ON THE GAULEY RIVER.

ONE August day two of us started from Union Depot, Baltimore, for a fishing trip to Gauley River, W. Virginia. We had heard so much about the magnificent black bass fishing in that river, that we did not consider the distance, 396 miles, as any obstacle if we could only capture with the fly some of the two-and three-pounders that we were assured rose at every cast. Our trip was uneventful with the exception that we passed through two freight wrecks of the night before.

We reached Kanawha Falls, where we left the rail road at the delightful hour of 2, A. M. The only person visible at the depot was a darkey with a lantern, who proved to be night clerk, watchman, and porter of the only hotel at the place. He gave us a large room with two beds, and we were soon snoring away, being tired out from our long journey. We were up at seven and ready for our breakfast. Hygienists tell us that it is good to always leave the table feeling that your hunger is not entirely satisfied, and that you could easily eat more. We certainly carried out the hygienic idea that morning, for what with tainted beefsteak, muddy coffee, and sour bread, we arose from the table with a feeling of utterly unsatisfied hunger. We crossed the Kanawha River in a small boat, and were met on the other side by our driver with a buckboard, called in this part of the country a hack, and started for a twelve-mile drive up the Gauley.

We had made up our minds from the condition of the water in New River, and in the Kanawha, that we were not going to have any fishing, as both these rivers were very muddy. We were assured, however, that the Gauley was clear, and that it never got muddy. As we proceeded we noticed a clear streak in the muddy Kanawha, and learned it was Gauley water coming down. This clear water increased in volume as we neared the mouth of the Gauley, which we found was clear but rather high. It is a remarkable fact that this river, many miles long, runs through such an uncultivated country that it rarely gets muddy. There is not cultivated land enough on its whole couse to cause muddy water to run into it when it rains. We found we had entered a country of surpassing beauty and wilderness. Mountain after mountain rose on all sides of us, and frequently there towered above the road rocky bluff hundreds of feet high. At one place the road winds around a mountain, with the river below reaching at its higest point an altitude of 500 feet above the water. Our driver regaled us with stories of parties who had gone over the cliffs along this road, generally remarking that their necks were broken. He, however, showed us one place where a two horse wagon, with a man and woman in it went over and none of them were hurt. The wagon was a little broken, but was fished out of the river, and the parties continued their journey in it. We could distinctly see the track they made crashing through the bushes that grew on the face of the cliff. Our ride of twelve miles was very tiresome, and we were glad when we arrived at our destination, Beech Glen. After eating dinner we donned our wading clothes, and started on a tour of inspection of the river. We found the river very full, and just a shade milky, and were informed that the bass were biting at bait, but not rising well to flies. We took a boat, and a few minnows, and caught eight bass in a few hours. We made arrangements the next morning to visit a portion of the river about four miles up called "The Little Rough." We had a good boatman who sent us spinning through the quick water. We trolled our flies most of the way up, and caught several fine bass. We frequently had to leave the boat, and wade the shallow riffles, while our guide, who also had to wade, dragged the boat through. We reached "The Little Rough," and found it a little rough indeed. The bed of the river is filled with immense boulders and detached rocks, and boils and rushes through the narrow passage as though impatient at the obstructions to its course to the sea. We fished carefully all the way back, wading every foot that it was possible to wade. The bass at first would not take kindly to our flies, but after changing several times we found that a Seth Green and a Ferguson was about the best cast. The wading was quite deep, in many places above the waist, and the bottom awfully rough. The next day we made a trip down the river to a creek called Twenty Mile Creek. We found the wading much better below although quite deep. We caught a good many fine bass, some of them while trolling our flies through the deep pools. Most of the fishing is done on this river by trolling and bait-fishing, very few parties who visit it using flies. While wading a very swift place, in water up to my chest and bottom composed of broken boulders as large as flour barrels, I struck a fine bass. He was well hooked, and gave me splendid play. Just as I had made up my mind to bring him to the net, another one equally strong struck my other fly, and hung himself fast. This instilled new life into the first one, and for five minutes, I had a circus with the rapid current, diabolical bottom, and two strong fish tugging at my line, and trying the metal of my Leonard rod I had all I could do to keep my feet. At last I felt sure the fish were mine, and giving them the butt, and reeling in so that I could net the lower one I reached out, perhaps too hastily, and with one last and desperate effort on the part of my captives, they parted my leader, and were off. In a few minutes both of them came to the surface with the flies still in their jaws, gave one feeble jump, and I saw them no more.

We spent a week on the river, meeting with varied success. One day we climbed the mountains and visited a burning vein of coal, ignited by one of the numerous fires that occur yearly in these woods. Our host Mr. Levingood, was from Pennsylvania, but has lived in this secluded region for many years. He has a fine brick house, and quite a large family of boys and girls, who are very musical and who helped very materially to while away the time between supper and bed time by their sweet singing. The general inhabitants of this region are very low down in the social scale, living in log huts without windows and with dirt floors. We visited on Laurel Creek a cave in which a colony of thirteen souls live for nine months of the year. They are called Sangers, from their occupation, which is digging ginseng root. There was an infant, two days old, at home with its mother when we called. The Gauley River is an ideal bass river, and I have no doubt that what Mr. Levingood told us about it is true. He said that very many fish of two to four pounds weight were caught with bait and by trolling when the river was at the proper stage. We were unfortunate enough to get there when it was high, or full as they call it, so we did not catch many large fish. E. A. R.

BALTIMORE, March, 1892.

THROUGH TO TWITCHELL.—II.

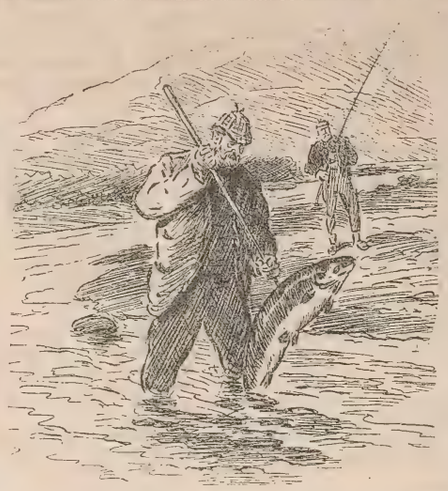
[Continued from Page 254.]

OLD man Harris and his camp are worthy of an article by themselves, so I will merely note a few facts. The camp is shingled and then hung with bones all over, inside and out, the collection consisting of skulls of bears, otters, martins, minks, coons, hedgehogs, muskrats, deer and numerous birds; also antlers of almost every conceivable size and shape, including a pair which are locked together; and claws of birds of prey, teeth of many kinds, several mounted heads, only needing a few human skulls and bones to complete a collection unique and interesting. On the barn were two bear skins, the result of last month's trapping. The old man is very pleasant, and by questioning those who pass his camp manages to keep quite well posted on the affairs of the day, but lives a sort of hermit life, rarely going out to the settlements. He has hunted and trapped in Michigan, and I believe elsewhere, but now expects to spend the remainder of his days in his present location. We purchased a bottle of maple syrup of him, and started on the seven mile carry to Twitchell, with a rise 100ft. to the mile after the first. We only rested once by a brook, where we slacked our thirst, as the day was warm.

We had a key to a camp at the head of the lake, so Jim and I could get a boat to use, and when we arrived at the trail, which leads directly to "High's" camp, he and I took it, while Will and Jim went for the boat at the other camp. We left them at the foot of a big hill, and I inwardly hoped that this was the last, but I hoped in vain: and another hill loomed up before us, but when the top of this was reached I was gladdened by the sight of Twitchell, and "High" said "There she is." The camp was at the foot of the hill, and a model camp it was, so even at the risk of being thought tedious I shall attempt a brief description. There are two log buildings, one contains regular sleeping accommodations for three, but accommodated four nicely. Three single woven wire springs surprised us, but were very comfortable. The fourth man slept on a large net which had been used in catching trout for the Fulton Chain hatchery, the front of the building was used as a sitting room. There is no stove in the building, instead a huge fire place in front, with a screen of bark back of it to throw the heat toward the camp, and it answers the purpose admirably. The kitchen is a separate building, and tumbling down the hill back of the camp is a cold spring brook, which runs within a rod of the kitchen; about three rods above the camp it is joined by another brook, which "High" says is not nearly so cold, so he very ingeniously brought the cooler water direct to camp by means of troughs hollowed out of spruce, and set on blocks of pine, these small troughs are placed just back of the kitchen. "High" takes down his "water works," as he calls them, and stores the trough each time he leaves.

There is also an open dining room, which is covered by canvas in wet weather.

Jim and Will soon arrived with the boat, and "High" told Will where to paddle us after a mess of trout for supper. Following "High's" directions we were soon skirting the shore with about thirty feet of line out, a light sinker and worms for bait.



Twitchell is a beautiful sheet of water, cool and clear; in contour it somewhat resembles a crescent, about two miles the longest way by an eighth mile wide in the center, the shore is irregular in outline, and the lake is surrounded on all sides by mountains; these are studded with the virgin forest not yet despoiled by the lumberman's axe, and in places presented charming views which held our attention as we were silently paddled along, almost forgetting our rods, until a sudden movement by Jim and an expression called forth by his having missed a good strike, recalled us to our senses, Jim let the tip of his rod go back and Will slowed the boat, with the result of another strike, and this time he had him fast. The fish was gamy and left the water several times before he was got into the boat, he would go close to half a pound. Jim's luck continued with three more to his credit, without my having a strike. We crossed the lake now and passed between a small island and the shore, but with negative results. We followed the island's shore to the opposite side, and just as we had got fairly around I hooked one, and after a royal fight landed him safely in the creel, a good half-pounder. Almost before I had him safe Jim had another on the hook, and soon added him to the catch.

We were ravenously hungry after our walk and it was late, so we went to camp with over 2 lbs. of trout.

"High" soon had these cooked to the "Queen's taste," also a liberal supply of flapjacks. This, with coffee, butter and maple syrup, was our diet while in camp, not elaborate, but it suited us exactly. After "High" had cleaned up the dishes he came into the sleeping room, where we were lazily stretched on the bed smoking, and opened two boxes in which the extra blankets were stored. These boxes had been packed by a gentleman from New York, who goes to Twitchell twice a year and employs "High" as guide; this gentleman had left, unknown to "High," about a quart of Jockey Club in one of the boxes, and when "High" came across it he was somewhat surprised, but said, "We won't drink any unless we get sick," adding almost immediately, "I have got a mighty sore throat now;" however, the bottle remained undisturbed for all that. After we were rolled in our blankets it did not take us very long to join the chorus Jim started almost immediately. Ah! that sleep in the woods, how different from that in the haunts of men!

We were routed out at 6 A. M. with the injunction that more trout was needed for breakfast; this started us, and after a refreshing bath in the cool spring water we lighted our pipes, and with Will again at the paddle we went over nearly the same ground as the night before, and in about an hour had nine trout averaging about ½ lb. each. I was more lucky this time, having caught four of the nine.

These trout, as those caught the night previous, were better fighters, brighter colored and much more pleasing to the palate than the fish caught near Stillwater in the flow. We had plenty for breakfast, so returned to camp and were soon enjoying the fruits of our sport. What a difference between those trout and others we have eaten; they are like the salmon, they should be killed, cooked and eaten at once to be duly appreciated from an epicurean point of view. We had observed that the clouds had a threatening look, foreboding rain, and before breakfast was over the sky darkened still more and rain drops began to fall thickly, which assured us of a ducking, as we did not propose to let a little rain spoil our sport.

GAFFING A SALMON.

This illustration is declared by Mr. Charles Hallock, in his "Salmon Fisher," to be "the only truly correct representation of the art that I have ever seen." The cut first appeared as a vignette on the menu card of the Fly-fishers' Club of London.

Breakfast disposed of we all went to the old camp where "High" had his boats stored that he intended to paint and Will and Jim dug worms, while I assisted "High" in getting the boats in position to paint.

At about 10.30 A. M. the rain "let up a little," as "High" termed it, and we went fishing, Will paddling from choice. We had not been out very long before rain began to fall again, and continued all the time we were out, varying from a light drizzle to a smart shower.

We had rather poor luck until about 1 o'clock, when after we had explored the outlet to the lake with the result of losing several hooks, which caught on the brush in some of the likely looking holes, we were paddled along the lower shore of the lake, although it looked like a better place for floating than for fishing. But it proved far better than it looked, and strike after strike came with the result of adding several half-pounders to our catch. Our supply of worms gave out and we resorted to fins and eyes with still better success, as the fish could not get these without getting hooked, while they would snap the worms off nearly as fast as we could put them on. Jim had caught five more trout than I when we started out that A. M., but I caught up and passed him, but did not remain there long, as he soon evened up the total and there it stayed.

Perhaps you glory in a big score, we do not, and after three hours of excellent sport only had 21 trout to show.

We were now hungry and wet to the skin, and I am well aware that it would take an angler to see where the sport came in, but it was there and plenty of it; in fact up to that time I had never caught trout that were such hard fighters. When hooked they usually unreeled 40 to 50ft. of line, then as one gave them the butt they would leap from the water, turn and come towards the boat with such speed that we wished for an "automatic" to take up the slack, then off again in another direction, a series of leaps, a downward plunge, and all the while the line must be kept taut, no giving an inch to those fellows, or they would give their heads a spiteful toss and say good day, as many of them did.

My rod was a new 7oz. lancewood, and right well it behaved, although I did not learn its full worth until one of those fellows attempted to go under the boat to the side where Jim was fighting a near cousin of his, then I gave him the butt until with the hand grasp held nearly perpendicular the tip went down almost to the water and began as if to wrap around the boat, but the rod was too much for him, and as he gave up the fight brought him to the surface with a spring which showed its backbone, and he was soon in the creel.

"High" was at camp when we arrived and had a fire started for cooking supper, or rather a 6 o'clock dinner, and the big fire was replenished with wood, but had not got fairly started, so Jim and I went into the kitchen ourselves, he on a box in front of the stove and I on a pile of bark kindling at the side. The stove-pipe was not made to order, and the diameter of the two lengths composing it did not correspond, and as a necessary result the upper length was balanced on the lower, the junction being at the roof. Somehow my sitting down on the bark displaced this arrangement, the first notice of which I got in the shape of a bump on the nose, and heard at the same time a horrid shrill screech, caused I found out later by the upper length falling through the hole in the bottom of the tin pail which served as a collar. At the first bump I put up my hands and the second length slid down on to my left arm as smoothly as a big cuff fresh from a Chinese laundry fastened with a patent button, and mind you that pipe was hot.

"High" came rushing in, relieved me of my hot cuff and set the pipe up again. I escaped with a burn on my wrist, but I fought shy of that stove after that.

We discovered after supper that our stock of tobacco was getting low, so low in fact that it began to look like a tobacco famine. We did not relish this state of things, so Will and Jim rowed over to a camp at the head of the lake where two gentlemen were stopping with Sam Innigan, of Fulton Chain, for guide.

Will knew Sam, so felt no compunctions about asking him for some tobacco. The gentlemen who were with Sam heard the request and at once kindly offered enough of the weed to supply us for several days, as they had plenty and were "going out" the next day.

While talking with them the boys elicited the information that they had been at one of the small lakes near Twitchell that day and caught about 20 lbs. of trout to take out fresh. When the boys returned and while we were filling our pipes they told us of the catch the other party had made that day. "High" said after he had finished painting the boat the next morning he would take Jim and me over to that lake, and that he had a boat there also, so we would not be obliged to "back" one over. Anticipating a good catch, and as my family had left Lowville and Jim had only his mother to think of, we at once told "High" that if he would allow us to take a few of the big ones we would turn over the majority of the catch to him, as we knew he wanted some for "Jim" Dunbar, the fact being that on account of the small catches near Stillwater it was a hard matter to keep the hotel table supplied. "High" said we had better wait until we knew we had trout to spare, but we had faith in his knowledge of their whereabouts, and time proved that our faith was not misplaced.

It was rather early that night when "High" said it was time to turn in, and it seemed still earlier when he called us to turn out the next morning, and that breakfast was ready.

The morning repast disposed of and the dishes cleaned up, we all went over to the old camp, where Will and "High" went at the last boat with the paint brushes, while Jim and I dug for bait, but with poor success. This job over with we had to wait only a short time before the others were ready, when we all returned to camp, put up a lunch, got aboard the boat and started for the crrry.

Jim and I intending to fish on the way down the lake, I had rigged a cast of flies, a red-ibis and a grizzly-king, while Jim had impaled a worm upon his hook.

Now I had never cast a fly while sitting in a boat, but as I had cast frogs for bass successfully in that posture and had done some fly-casting while wading brooks and rivers, I expected no difficulty in this instance, but I was soon disabused of my erroneous notions, and at the third cast an unsuccessful strike caught the pack basket in the bow of the boat with my red-ibis, and Will's kind attempt to loosen it resulted in the parting of the snell where it joins the hook. As this individual fly was my favorite, having been used successfully by me in several States, I felt somewhat aggrieved, and this feeling led me to at once remove the leader with the fly on and replace it with one having a bare hook attached. This was soon trailing alongside the boat baited with a worm, but neither Jim nor I were again rewarded with a rise before we left the boat. Arrived at the carry we left Will with the boat as he did not care to accompany us, and unjointing our rods—always unjoint your rod before going over a carry of any distance, that is for some men I know who don't—we started for the other lake which proved to be about one mile distant.

OSCEOLA.

(TO BE CONTINUED.)

BOSTON ANGLERS.

APRIL 1 is here again, and with it comes the opening of the trout season in Massachusetts. With the exception of the celebrated Cape Cod district, conditions are not very favorable to a very successful opening, as there is considerable snow back in the country, and most of the streams high and full of snow water for some time to come. In spite of the discouraging outlook, numbers of Boston anglers are awaiting the day with patience, and will be out bright and early in search of the speckled beauties. There are a few good brooks quite close to the city, and they will be well lined with expectant fishermen during a good part of the month of April. Some of the men who are anxious to begin, and who will probably be found outward bound during the early days of the month, are Messrs. G. N. Talbot, W. S. Peel, Frank Simpson, Waldron Bates, A. H. Wood, Q. A. Atwood, L. R. Howe, F. M. Abbott, E. A. Brigham, J. C. R. Peabody, Dr. H. W. Bradford, and many others. The Monument Club, who own some old and well stocked streams down on the Cape, will be out in full force. This is one of the oldest angling clubs about Boston, and its membership includes some of the most prominent gentlemen in the city. Many good trout streams are found on the Cape, and as most of them empty into salt water, the trout possess that peculiar and delicous flavor so much prized by the epicure. Very few of these streams are open to the public. The fishing always opens up early in this section, as the soil is mostly of a sandy character which quickly absorbs the melting snow. This leaves the brooks in an almost normal condition from the very first of the season, a state of affairs which is difficult to find anywhere else in the State.

Few cities in the country contain more trout fishermen for its size than Worcester, Mass., and when the first of April looms up, a small army of anglers will start forth, fully equipped for the battle. Ware Brook, Quinapoxit River, the Holden Poor Farm and Ball Brook, are some of the most prominent streams in that vicinity. Some of the Worcester anglers who fish them are C. Harry Morse, O. A. Benoit, Joseph Smith, Thos. Smith, Robert Mason, Gilbert Rugg, Uncle Nathan, Dr. Higgins and Vernon Printiss.

One of the expected results at each season's opening is the capture of a great trout weighing from 2 to 3lbs. at Lake Quinsigamond by Mr. David Earle of Worcester. This has been accomplished each season for some years, and without it the boys would not consider the season fairly inaugurated. Mr. Earle's performance acts as a mascot, and is now expected as regularly as the year comes round. Some of his friends have had the cruelty to say that he gets them out of a well, where he keeps them stored; others assert that they are caught on a silver hook. Mr. Earle does not mind these little yarns, but goes calmly on his way, and each successive year brings in his fish, and receives the congratulations of his friends.

Nat. Hoxie of Plymouth, whose resort is such a favorite place for trout and bass fishermen, was in Boston last week, and says the streams are all in good condition down his way, and the outlook is very favorable indeed. Mr. Hoxie is one of the old landmarks for anglers, and is known to every lover of the rod in this section of the State.

One of the most successful of Boston anglers is Mr. B. F. Dutton, of the firm of Houghton & Dutton, dry goods dealers. Mr. Dutton has been in Florida for a month past, and a gentleman of his party who has just returned reports great luck with the rod and line. He is located at Homosassa, and will probably stay in the South a few weeks longer. Mr. Harry Dutton (a brother of B. F.) is also devoted to the sport, and together they have a splendid camp at the Rangeley Lakes, Maine, where they spend a good part of each summer.

WM R. SCOTT.

WHERE?

EACH year as April approaches I ask myself the same old question, "Where shall I go for a day or two of trout fishing?" and each time the answer only comes after much questioning and investigating. At last I find, according to all accounts, just the place; and with a friend start out, being in debt to some tackle shop to no small amount for sundry flies and fixings in general. We have a royal time, are treated with invariable politeness by the little hotel keeper or whoever happens to entertain us, tickle our seven senses with the exquisite odors, colors and shapes of the hills and woods, burn our noses nearly off and return home, healthier and happier, and, yes, wiser, for we generally have about five fish of the sardine-box size. Some years ago I made a solemn vow that I would always assist others who might be with me in this kind of experience, by telling of any pieces of good luck which might befall me on fishing or shooting trips. Last spring I sent a few lines from the Natural Bridge, Virginia, telling of the trout fishing I found within three miles of the hotel, and which was about the best I have ever had (barring the snakes), but the place is too far for me this year. Why do not sportsmen, those between whom there is such a strong though invisible tie, woven by nature, exercise a little more generosity of feeling, and when they send their experiences aflood and afield to the FOREST AND STREAM, remember now and then to affix the name of the railroad station to the last sheet, so that some others may eat the crumbs that they have left? Surely there must be in Pennsylvania or New York or in Connecticut some streams within three or four hours of New York city where a man can or may for a fee catch a dozen eight or ten-inch trout if the fates so ordain. But here is the rub —— where? F'LIN.

A WARNING AS TO SALMON STREAMS.

Editor Forest and Stream:

Salmon fishing has of late years got to be such a favorite sport and pastime, that the number of persons seeking to obtain it has been gradually increasing every season. Many travel thousands of miles and spend large sums of money, in order to enjoy a few weeks' sport with this noble fish. As there are only a limited number of good salmon rivers in Canada, all, or nearly all of which are now private property, the majority of anglers are forced to accept any chance that offers to secure a river or a part thereof for a season. It is for this less fortunate class that my letter is intended.

The increasing demand for angling rights and the high prices paid for such has led to speculation, and a number of unscrupulous persons reap a rich harvest in this way. Where a person really owns a good river and has probably more fishing ground than he requires, it is quite right, if he be so inclined, to induce others to join him and thus lessen his expenses or even make a profit. It is just a mere matter of business, and about these I say nothing; but when it comes to inducing sportsmen to undertake long journeys at considerable expense and inconvenience, and then find that no salmon has ever been seen in the river they have leased, I think it is rather too much. I know of several parties who have been duped in this way during the past few years. The *modus operandi* of these men is to secure from the Government, at a trifling cost, any of the numerous rivers or parts of them, that are left over every year as not worth renting; and afterward to sub-lease them. These rivers are puffed up on every occasion, and various reasons are assigned for the previous scarcity of fish in them, such as overnetting or want of proper guardianship; new pools are discovered, and so on. Friends, sometimes very respectable persons, are unwittingly made the instruments through which this object is attained and the angler reached. I would therefore advise all intending salmon fishers who are not personally acquainted with the proprietors of such rivers, to be very careful how they accept their statements, and to pay no money in advance, that being generally one of the first conditions.

Thoroughly reliable information can be obtained from the Fisheries Department at Ottawa, Ont., or from most of their officers and overseers. A list of the names of these last and the divisions under their charge can be found in the report published every year by the Fisheries Department. AN ANGLER.

CARP IN NIAGARA RIVER.—Last Monday, March 7, a fisherman gave Judge Braunlein, of the Municipal Court, a fish which many old-time anglers looked at and failed to name. It was taken in Niagara River near Grand Island, doubtless by a seine, so the man declined to give particulars. But the carp sucker, as the specimen proved to be, although credited to the Great Lakes by the Century Dictionary, is new to Buffalo and the first I ever saw. Health Commissioner Wende now has it in alcohol. It lived nearly forty-eight hours in a wash-basin. The fish weighed about 2lbs., is plump, 16in. long and about 12in. in girth. I understand there are two varieties. This one has scales only under the dorsal line and around the gills. The sides are smooth and devoid of scales. —EBEN P. DORR. [The fish is evidently a leather carp.]

THE TARPON RECORD at Fort Myers includes the following catches with rod and reel:

*Length and weight not given.

VERMONT FISH WARDENS, two in number, were appointed by Pres. J. W. Titcomb at the Burlington meeting of the fish commission March 20. Their names, however, have not been made public, as it is hoped they may be able to arrest some dynamiters and other illegal fishermen before the wardens are known. The Burlingham Rod and Gun Club will coöperate with the officers in enforcing the laws.

CANADIAN SALMON RIVERS.

THE full list of signatures to the petition last week sent to the Canadian Minister of Marine and Fisheries is a noteworthy roll of names, and it will impress most people as a very reasonable request.

To the Honorable Sir Charles H. Tupper, Minister of Marine and Fisheries:

The undersigned, owners and lessees of fishing privileges in Canada, respectfully represent that of late salmon have become more and more scarce each year in the Canadian rivers, and that unless the Dominion Government shall promptly adopt some decided and effective measures to enable a larger number of salmon to safely reach their spawning grounds, great danger of extermination of the species will be incurred.

We believe the present requirement, that the nets shall be raised from Saturday evening till Monday morning, affords inadequate opportunity for a fair proportion of the fish to safely reach their spawning grounds. Considering the great extent of shore line along which the perfected net appliances now in use are set, the proportion of fish which can escape them must be small. This is sufficiently proved by the fact, observed by all anglers, that a large percentage of the salmon which reach fresh water are disfigured and scarred from contact with the nets from which they have escaped.

We therefore respectfully petition that all salmon nets and traps be hereafter raised during three successive days and nights of each week, which shall be the same stated three days and three nights for all nets.

We believe that the ultimate interests of the net fishermen (by whom alone objection would be offered) would not in reality be prejudiced—should our petition be granted. Eventually they must be actually benefited by allowing a larger number of fish to cast their spawn and thus increase the now diminishing supply.

We beg your attention to the fact that anglers pay liberally for their fishing privileges, and are compelled to guard and protect the salmon whilst in fresh water; and in consequence of the very small proportion of salmon taken by anglers, as compared with the large numbers taken by net-fishermen, we believe we are entitled to a more favorable consideration.

In presenting this petition, we submit therefore that we ask nothing but what coincides with the interests of the government, as seeking the greatest good to the community it represents, and nothing more than a fairer division of the time between netters and anglers.

And we respectfully pray that our petition be granted for the common benefit of all concerned.

[In further support of this petition, we inclose herewith an article on the subject, reprinted from FOREST AND STREAM, to which we ask your attention.]

PROPERTY ON THE GRANDE BATISCAN.

WE call the attention of sportsmen of means to the advertisement in to-day's issue of the tract located in the Grande Batiscan district of Canada, eighty-six miles north of Quebec.

This tract is in the northern part of the Province of Quebec. It can be reached in twenty-two hours from New York city by rail, without change of cars. It is thirty miles long by twenty-five miles wide, containing some 480,000 acres, of entirely wild land, covered with green woods. The tract has upward of one hundred lakes and rivers upon it, full of trout weighing up to ten pounds—*Salmo fontinalis* only. Moose, caribou and black bear, as well as most of the fur-bearing animals, are fairly plentiful. The photographs accompanying the prospectus give a general idea of the scenery, which is grand in the extreme, and an official map also shows the exact locality. All statements made are corroborated by official reports which we have examined.

The present lessee has held the property single handed, for the past seven years, and made many improvements, at an expense of about $1,000 per annum. He would like to get some sportsman well known in this community, to join him in getting up a club, or he would sell out to such a person at a reasonable figure, and if a satisfactory club was formed, would take part of the price in stock, if desired.

The sum asked to put the purchaser in full possession is but $14,000; this includes fifty miles portage roads to be made and four small club houses in addition to the two already there.

Should a club be formed to consist of 100 members—not too many for so large a tract, as all never go at once—the yearly expense for rents, guardians and maintenance is but $12 for each member.

The lessee is well known to us, and is highly reliable. We have no hesitation in recommending this tract to the attention of investors, for it appears to be one of the best things, in the club line, we have had brought to our notice. This opinion is corroborated by Mr. Wakeman Holberton, of Messrs. Abbey & Imbrie, who writes: "We have seen the prospectus, maps and photos of this property, and consider it the best club property ever offered." Mr. Holberton has given permission to the lessee to refer to him, and the maps and papers can be seen at this office, where also the name and address of the lessee can be obtained.

SKANEATELES LAKE.—A correspondent of the Syracuse *Herald* says of the work done in this lake by members of the Glen Haven Game and Fish Protective Association: "While there were enrolled about thirty members at the first meeting, some with honest purpose and avowed intention of protection, this association was no exception to the usual rule, that the effective work must be done by the few. From this membership there came boldly to the front E. D. Crosley, Hosea Randall and Jefferson J. Brown, who with State Game Protector Harrison Hawn made a full hand—since known as the 'Old Guard'—and who from that time have been the men who have faithfully, honestly and successfully protected Skaneateles Lake as it never before was protected, thereby keeping within its waters tons of trout, perch, bass and other fish that otherwise would have been taken indiscriminately, and particularly in spawning time, when, of all other times, they should not be disturbed. As the result of the magnificent work of these men done in inclement weather at personal risk under denunciation and threats of bodily harm and of actual destruction of property, there are today in Skaneateles Lake more fish than have been known for years; that will enhance its many and varied attractions, make it still further a summer resort, increase the value of its bordering land and thereby add to the assessed value of lands occupied, decrease the general per cent. of taxes in townships bordering thereon. The 'Old Guard' are the men who are entitled to the credit for this change."

THE CARPENTER BROOK FISHING ASSOCIATION, of Syracuse, elected these officers: President, R. W. Jones; Vice-President, John Bacon; Secretary, Harry Rice, of Elbridge; Treasurer, J. M. Halstead, of Elbridge; Attorney, C. W. Smith. The association is composed of 31 members, eight of whom are Syracusans, R. W. Jones, John Bacon, Conrad Loos, William Woese, C. W. Smith, A. A. Howlett, Pierce Brayton and Harrison Hoyt. Their preserve includes seven miles of Carpenter Brook, extending from near Half Way to Black Bottom Creek, near Auburn, and is well stocked with brook trout, 10,000 spawn having been put in last year. The association's officers made several arrests last year for illegal fishing on their preserve. Carpenter Brook is a beautiful trout stream and is a source of great pleasure to the members of the association. A great deal of money has been expended in caring for the stream and it is now considered one of the best preserves in the State.

HELL GATE CAMP.—Southboro, Mass.—*Editor Forest and Stream:* Will you allow me to enter, with your Lancaster correspondent, a vehement protest against the proposed charge in name of Hell Gate Camp. I am utterly at loss to understand what benefit the new proprietors expect to derive from such action as that. Surely all the credit the camp and its surroundings ever deserved were brought into prominece by "Old Injun," and why not let his memory be perpetuated (if nothing else will do it) by the name he gave his creation. I think I voice the sentiments of 99 per cent. of the old visitors to the camp, when I say that I think it only a just and proper recognition of the services he did every lover of the rod and rifle, that to the end it be known as Hell Gate Camp.—J. W. B.

TO THE ANGLER the mountains and valleys along the Erie Railway present unusual attractions. There are many charming resorts for summer resting, and many localities within easy reach of the great centers of business, places which can be visited for two or three days at a time, where one can be thoroughly comfortable and yet have fair sport with rod and reel. Milford, Port Jervis and Lackawaxen are historic spots to men who used to make fishing excursions from New York thirty years ago, but since that time hundreds of new localities have been discovered, at each of which the fishing is good. Among these may be mentioned Hawley, Hancock, Paupac, Dingman's Ferry and Sparrow Bush. At some of these points the angler can take his choice of sport and fish for pickerel in the lakes, bass in the river or trout in the mountain streams. Good hotels and boarding houses are found almost everywhere, and one can be comfortable and enjoy himself not only while on the stream but after the day's work is done.—*Adv.*

CHICAGO AND THE WEST.

CHICAGO, Ill., March 25.—The coming meet of the Western Canoe Association on Lake Winnebago in July next is an event which ought to attract a great deal of attention among anglers and outdoor men of all sorts, whether or not they be now included in the canoe cult. The grounds of the association will belong to the canoeists properly, but Lake Winnebago is wide and many camping spots will be found, even if the fellowship of the men of the little boats were not even wider than Winnebago. For an outing in which angling, camping, boating and plain breathing may be combined, this occasion offers an opportunity seldom surpassed. It is a proverb that the angler always catches fish in Winnebago. I hope there will be many who will go to see this canoe meet, even though they may not properly take part in it. Thus may the fire of the canoeists enthusiasm spring a light in other souls and the craft so gain new converts. This meet has heretofore gone to Lake Erie and few outside the actual canoe men went from here. Winnebago is more accessible. We shall see a fleet of tiny craft upon its shores such as rarely flitted around Ballast Island in the larger sea, shall see set forth in its most spectacular form one of the most beautiful and pleasant varieties of outdoor sport. Let us have audience as well as actors at Winnebago in July, for it is from out the audiences that all actors must come.

Gen. Geo. R. Davis, director-general of the World's Fair, is a man of whose like there are too few. He has just sent his check for $50 to Mr. Cole, president of the Fox River Association, for use in the work of that body. With this sort of a director-general, the World's Fair cannot fail.

Dr. S. P. Bartlett, secretary of the Fish Commission, was in town to-day. Dr. Bartlett has for over a month been afflicted with an obscure nervous ailment which quite unfits him for active physical exertion, though he suffers very little from it when in quiet. He is feeling better now, and we hope will soon be well. He is one of the ruggedest-looking men one would be apt to meet, and till this winter never knew what it meant to be enforcedly still and careful of himself.

THE STATE LEAGUE MOVES.

After ample time for deliberation, the committee appointed to draft constitution and by-laws for the State League announces itself ready to report. The following correspondence has passed, and this is offered in order to give the formal call a wider publicity. A circular letter embodying the following will at once be mailed to all persons likely to be interested:

Geo. E. Cole, President, Chicago, Ill:

SIR—Pursuant to the instruction of the meeting at the Sherman House, Chicago, Jan. 13, 1892, at which meeting you were elected president of the preliminary body, there being present members of the Fox River, Kankakee River, Illinois Valley and Vermilion Co. Associations, also of the leading angling and protective clubs of all sections of the State, we the undersigned, of the duly appointed committee on constitution and by-laws, have duly deliberated, and now beg to state that we are ready to submit a report to the meeting for permanent organization, the same to be called at such date as in your plasure may seem best.

[Signed] HENRY L. HERTZ, Chairman of Com.

March 24.

E. Hough, Secretary, Chicago, Ill:

SIR—Herewith I hand you a communication from the committee on constitution and by-laws, suggesting a call for the meeting for permanent organization of the State League of the Fish Associations and clubs of Illinois, at whose preliminary meeting you were elected secretary. Let the call be issued for Wednesday, April 13, at the Leland Hotel, Springfield, Ill., and do you use every means to put this call in the hands of every society and every man interested in the preservation of the fish of this state.

[Signed] GEO. E. COLE, Pres.

March 25.

To Any and All Anglers of Illinois:

In accordance with the above and foregoing advices, you are summoned to be and appear in actual person at the League meeting, at the Leland Hotel, at Springfield, Ill., at the hour of 2 P. M., Wednesday, April 13, 1892. The purposes of the League are too noble to be slighted. These purposes will be set forth in the constitution and by-laws then and there to be adopted.

It is hoped that all the associations and clubs of the State will be represented at this meeting, but no lines are drawn, and the individual who loves angling, and who wishes to see our game fish preserved for the use of the people and not for the gain of a few, is the man desired at this meeting, whether he belongs to any club or not, and no matter where his residence in the State.

The main purpose of the State League is to band together in one active central organization all the lesser protective societies and protective men in the State. A general union of this kind will, at a trifling expense pro rata, give a working fund which will render the body the most formidable tool in protective work ever known in the history of the State. By its means the illegal and destructive killing of fish, which has long disgraced this State, can be broken up on every lake and stream within its borders.

Success can only follow a good start. You can help at the start. Be at the meeting without fail. Excuses do no good. Be there yourself.

Please return inclosed postal card, and let us know whether we can count on you at this meeting. Yours respectfully,

E. HOUGH, Sec'y.

No. 175 MONROE STREET, Chicago, Ill, March 25.

The placing of the meeting at Springfield will give the men of the lower country a better chance to attend. The success of the enterprise depends upon these lower country men, and not upon Chicago. This meeting will be well advertised. Upon its quality and numbers will instantly depend the future of this league. If the meeting is puny and of genuine interest, then it will, in the minds of the leading men in the enterprise, be better to drop it altogether. But this, let us hope, will not be found necessary.

Warden Buck has now been on his net hunt at English Lake for ten days, and as the weather grows milder there appears promise of success. On the 19th he had only found one net below the lake, and it had apparently been torn out by drifting ice. On the 22d, however, he wrote as follows:

ENGLISH LAKE, Ind.—I came back up the river from the county line to-day. There are seven nets between here and there, three on LaPorte side and four on Stark county side. It rained hard last night and all of the ice is gone. They will most likely commence putting in nets now. Mr. Greene told me there were four men up in the lake on Sunday night with jack lights spearing. I am going up the river to-day, may go as far as the Nickel Plate R. R. I will be here again about Thursday. I have only killed five ducks since I came, but ought to kill some to-day, as it is storming. Yours truly, F. L. BUCK.

Yesterday Mr. Buck wired, "Nets to be taken to-morrow." It would appear that the raid will be successful, and if so, the Kankakee Association is much to be congratulated.

Mr. F. L. Rockey, a veteran angler of the Kankakee at "Kellys," near Lorenzo, was up from his home in Joliet this week, buying tackle for his first fishing trip. I presume the first bass fishing of this region comes on the rocky riffs below the State dam, at Kelly's place. Mr. Rockey told me that he intended to try it this week, and fully expected to find the bass running and biting. They take the fly here on the very first run, better then than later. Mr. Rockey is to inform me what success he has on this early trip. I am afraid we cannot highly commend this early bass fishing under a dam, as the fish are then doing their best to get up stream to spawn. It is a mistake to think that fish trying to get over a dam in the spawning run will not bite, for they will. The fly, artificial minnow and spoon are better than live bait at Kelly's on this early run.

It was currently reported that that lovely fish, the grayling, was extinct on the Au Sable, in Michigan, and indeed all through the State, so far as sport was concerned. This is hardly the case. Last year I reported some grayling catches, and many were made of which no word got out. Last year a party of Chicago gentlemen, Messrs. R. Traill, Taylor A. Snow, E. F. Thorndyke and Dr. Chas. E. Jones, floated the Au Sable almost from head to mouth, and they made some fine catches of grayling.

This summer, probably in July, the above party, with the exception of Mr. Snow, who is replaced by the irrepressible Dave Oliphant, will go up to Lake Gogebic, and go down the Ontonagon River clear to Lake Superior, boating it in canvas boats. Should they not find good sport they will take a lake boat to Cheboygan or some point on the south peninsula, and thence drop down to Au Sable. There is little doubt as to the trout fishing in the Ontonagon, though of course there are no grayling. When on the Brulé last summer we were told by a wealthy lumberman, who fishes all that northern country, that the best fishing he had had was on the Ontonagon; and he added that one needs a boat to fish that stream properly.

We have still a few tarpon anglers down in Florida, but most of them are back. I have already mentioned the trip of Dr. Hutchinson and Mr. Wilcox, and spoken of the huge swordfish now being mounted here by Dick Turtle for the latter gentleman. Dr. Hutchinson tells me that up the south fork of the St. Lucie, 25 miles or more above Jupiter Inlet, he found the bleaching bones of a good-sized manatee, or "sea cow." The skeleton was perfect, about 10ft. long, the flesh nearly all gone. Above the skeleton was the placard "No sportsman will appropriate a single. This is the property of the Smithsonian Institute and will be duly claimed by the man who killed the specimen." This warning to all sojourners in the wilderness had so far been effectual, and the skeleton was untouched. It is to be hoped it will arrive safely at its destination.

Mr. P. Lorillard, of New York, was in Florida at the time the above two gentlemen were there. He had a floating stable which he towed behind his naphtha launch, and by means of fifteen men and several horses was managing to have a good time fishing.

Mr. C. F. Silvester, Western agent of the Winchester Repeating Arms Co., has been a resident of Chicago only about a year, and does not yet know all the angling attractions hereabout. He has, however, determined to send his family up to Fox or Geneva Lake for the summer. Mr. Silvester is perfecting a repeating bass rod which is an interesting piece of mechanism.

March 26.—The following telegram was received from Warden Buck last night. It seems hard to understand, as a haul of 100 nets is something unprecedented:

ENGLISH LAKE, Ind., March 25.—Over one hundred nets seized to-day; more to come. F. L. BUCK.

Further word will be awaited with much interest.

March 27.—In regard to the large seizure of nets at English Lake and vicinity, Warden Buck writes the following in description:

WILDER'S STATION, Ind., March 25.—We took up out of English Lake 23 nets and found about 75 or 80 in two men's houses who do fishing for a living; these the officers searched. I then came down the river to the county line and back as far as this place, and will return to English Lake to morrow and take a run up the river. The cases will more than likely be called Monday and I will have to attend. All of the nets are out of the river and English Lake from the west line of the county to six miles above English Lake. I don't know what they will want me to do after the trials, but think it will be a trip down to Momence. I will let you know the outcome of the trials. I have not killed many ducks as I have not hunted them. Everything is all free of ice and any quantity of geese and ducks to be seen flying, and I understand some good bags have been made, but I was after other game.—F. L. BUCK.

This is a most decisive blow at the netters, and must unfit them for active operations this spring, as it destroys their reserve ammunition. The work of this association has been singularly successful, and this is the greatest *coup* it has yet made. The Fish Commission of Indiana must feel highly pleased at the result of the aid the Chicago men extended. The whole campaign, simple and rapid as it has been, only shows how much more a little actual work will do than a whole lot of talk.

These nets should be destroyed. If burned, they will take no more fish. If the courts say wrongfully burned, time then to talk of paying for them. The fine is $50 a day for having nets of this character in possession. The penalty could be made very severe. This severity ought not to be fully exercised, but the nets ought to go. It is safety for the fish, and not vengeance on illegal fishers, which the Kankakee Association desires. Let the fight be over the ashes of the illegal nets. The saving in bass will buy the nets, if the netters have a case. This they do not have. E. HOUGH.

LANDLOCKED SALMON IN PEABODY POND.—Dixfield, March 28.—*Editor Forest and Stream:* I send you copy of letter just received from Judge W. W. Virgin, of Portland, Wis.: "PORTLAND, March 24.—*My Dear Stanley:* Frank Libby, of Bridgton, caught a black spot (landlocked salmon) at Peabody Pond day before yesterday that weighed just 12lbs. I was there last week and caught a red spot (trout) that weighed 2lbs., and another man caught one that weighed 3½lbs. Yours truly, W. W. VIRGIN." I have just looked up my statistics and find that we put the first salmon fry in Peabody Pond in June of 1886, making the fish less than six years old, a growth of over 2lbs. per year. The stock came from Sebago Lake. —H. O. S.

New Fishing Tackle.

Rudolph's Ventilated Tackle Boxes, Pocket Tackle Box, Glass Minnow Trap, Adjustable Bait Box, Chain Fish Stringer, Floating Minnow Buckets, Floating Live Fish Net, Floating Minnow Pocket. Ask your dealers to let you look at these, it will pay you, or send for illustrated circular to RUDOLPH MFG. CO., Chicago.—*Adv.*

KENTUCKY FISH AND GAME CLUB.—Secretary H. C. Forsman writes us from the headquarters at Louisville that the club now has about 800 member. During the past six months the farmers and countrymen have been awakened to the importance of fish and game interests, and the club has received from these sources an accession to its numbers of about 500 members throughout the State. General enthusiasm has been aroused in the protection of fish and game. A convention will be held at the State capitol at Frankfort on April 19. The General Assembly is in session, and effort will be made to impress upon the Legislature the importance of passing good laws. Mr. Forsman states that fishing promises to be good this spring, but owing to the drought last summer and the work of rascally dynamiters and seiners during the low stages of the streams, the supply of fish will be short. Hereafter the club expects to have no such trouble, as the laws will be enforced to the letter. By means of the convention it is hoped also that the game bill will be passed.

A FLOOD'S POND TROUT in Hancock county, Maine, has been pronounced identical with the golden trout of Sunapee Lake and Dan Hole Pond in New Hampshire by Mr. S. Garman, we are informed, and we are willing to admit the probability of this statement. When the lake systems of New England and the adjacent regions northward have been fully explored we shall expect to hear of golden trout in many of them, and it will be admitted that no question can arise as to their being a native and not an introduced trout. In Flood's Pond the fish was known many years before the introduction of the European sälbling.

DEEP SEA NET FISHING.—Newbern, N. C., March 25.—The new methods and practice of deep net fishing are being pursued and extended along the coast of North Carolina with profit and success. The nets used are purse nets and gill nets. The latter are 75yds. long and 6ft. wide, weighted and sunk to 8 to 10 fathoms. At Southport last week a quantity of fish said to be altogether new to the fishermen were caught. They averaged 8in. in length and were striped vertically like sheepshead, but the head is of an entirely different shape. I have not seen any specimen however.—CHARLES HALLOCK.

POTOMAC RIVER PIKE have made their appearance in the Eastern Branch near Washington, D. C., and many have been taken by night seining, much to the disgust of anglers.

Fishculture.

NEW HAMPSHIRE FISHCULTURE.

IN their report for the year ending Dec. 1, 1891, the Fish and Game Commissioners of New Hampshire state that "the year has been the most successful one since the formation of the Commission." Owing to fine weather during the month of October, in which the eggs of the trout and salmon are procured and hatched, also to increased facilities obtained through practical experience, a larger number of young fry have been placed in the waters of the State than ever before. As a result of the planting of brook trout fry within the past three years, aided by an abundance of water and plenty of food, the fishing has been very good in many trout brooks. An unusually severe drought in September and October, during which many large streams were reported nearly dry, must have killed large numbers of fish. New Hampshire has over 350,000 acres of water, and during the year various bodies were examined to ascertain the kind of fish suitable for them. Sunapee and Newfound lakes are among the best adapted for fish life. At the hatching houses good results have generally been obtained. Hundreds of spawning fish were secured on the beds, producing a large number of eggs, the fry from which have been planted in these lakes, besides large numbers transferred to other waters of the State.

The expense of procuring eggs has been very small in comparison with the cost of purchasing them as heretofore. The introduced smelts are very abundant in Sunapee and Newfound lakes, and this accounts for the rapid growth of the landlocked salmon and lake trout. The salmon and trout have been taken weighing from 12 to 18lbs. each. The Commissioners state that they believe there is no better fishing in New England than in Sunapee and Newfound lakes. People residing along the borders of these lakes are given credit for assistance in stopping the unlawful practice of taking fish from the spawning beds.

The white perch, heretofore unknown to New Hampshire waters, has been successfully introduced. A pond in Manchester, covering an area of twenty acres and whose waters are said to be peculiarly adapted to this fish, has been secured for its propagation and the Commission expects to be able to plant hundreds of white perch in suitable waters this spring.

The necessity of a fishway in the dam at Exeter, to allow alewives to pass up the river to their spawning grounds, is pointed out. Five new and additional hatcheries were erected at Sunapee, Newfound, Laconia, Keene and Colebrook.

Many complaints were received about the spearing of trout in Squam Lake, while on the spawning beds, depleting its waters to a large extent. Lake Winnipesaukee has furnished more trout this year than for many years. This is due, it is thought, to the plants made three or four years ago, and to the better observance of the law in regard to spearing and netting trout on their spawning beds. While there have been complaints of illegal fishing on some parts of the lake, as a whole there has been much less wanton destruction than heretofore.

For Plymouth hatchery Superintendent Hodge reports that the run of salmon in the Merrimack during 1891 was the largest known since the work of restocking the river began. This was attributed to the large plants made in 1887 and 1888. Salmon from 20 to 30lbs. weight were taken and placed in the reservoir of the hatchery at Plymouth. Twelve hundred and fifty-one small wild trout have been added to the stock of breeders in the ponds. Many of the large female trout spawned in July and August, causing a large loss of eggs, as no ripe males could be secured until the first week in September, and then the milt was not fully developed.

The receipts of eggs at the Plymouth hatchery were as follows: Jan. 19, 10,000 eggs of the California trout. Jan. 26, 10,000 eggs of the Loch Leven trout. Feb. 20, 132,000 eggs of the Penobscot salmon; purchased by the State of Massachusetts. March 6, 50,000 eggs of the landlocked salmon, presented by the U. S. Fish Commission, as were the eggs of California trout and Loch Leven trout.

Twelve thousand brook trout fry were planted in Whitcomb Mountain Pond, in Odell. The total distribution of trout fry to various towns was 548,000; landlocked salmon, 90,000; Penobscot salmon, to the Pemigewasset river, 332,000;

California trout, to Perch Pond at Campton, 10,000, making a grand total of trout and salmon fry from the Plymouth hatchery of 980,000, not including 20,000 transferred to Sunapee station. There were 550,000 lake trout fry distributed from the Bristol station; 710,000 from the Laconia station besides 50,000 transferred to Keene. Sunapee station distributed 68,000 brook trout; 75,000 golden trout; 75,000 landlocked salmon; 10,000 Loch Leven trout, and 10,000 California trout. Keene station distributed 50,000 lake trout.

In the appendix State detective, B. P. Chadwick reports upon the enforcement of the fish and game laws. A number of parties charged with violations of these laws were taken before the courts and fined in sums ranging from $10 to $120, and costs. Mr. Chadwick concludes that the "business of killing trout while on the spawning grounds does more injury to our lake fisheries than does the taking by hook and line of all the fish caught. The subject is an important one, and I trust your honorable board will take active measures to further protect the fisheries in the spawning season."

The report is signed by George W. Riddle, Elliott B. Hodge and Willard H. Griffin, Fish and Game Commissioners.

ARTIFICIAL LANDLOCKING OF SCOTCH SALMON.

I SENT FOREST AND STREAM a communication the other day on the spawning of Atlantic salmon that had been artificially reared at the Craig's Brook station of the U. S. Fish Commission and had never been to sea.

I find an impression prevails that this is something entirely new in fishculture, and knowing this to be incorrect I have taken pains to look up what information I had on the subject of a prior achievement in the same line of fish-cultural effort. My only accessible authorities are the commercial circulars of the Howietoun fishery in Scotland, from which I make the following quotations:

December, 1888. "A salmon hatched from ova obtained from the Forth District Board in December, 1880, and reared in the ponds, having spawned three seasons, was found in the first week of November this year to be clean. It weighed just under 3lbs., was very silvery, with about thirty jet black starlike spots. The flesh cut pink and the flavor was that of a fish a week in fresh water. This salmon had been fed exclusively on clams *(pecten)* and was a fair specimen of those still alive at Howietoun of the same spawning. The smolts and grilse which have been bred from these fish are growing more rapidly than their parents, and we hope to show that although the first generation of artificially landlocked salmon are usually dwarfed yet their progeny may attain to the size of Loch Leven trout—viz., 6 to 10lbs. weight."

December, 1889: "The experiments on artificially landlocking salmon have been successfully continued, but, however interesting from a biological point of view, do not appear likely to lead to any direct results of commercial importance. Indirectly, however, as providing subjects suitable for crossing with *levenensis* or *fario*, they are of value. The American landlocked salmon has at last been reared from ova obtained at Howietoun, but does not appear to have any advantage over the artificially landlocked salmon and is markedly more delicate at Howietoun. Depth of water in which above experiments are being conducted is about ten feet."

Two later circulars, dated October, 1890, and November, 1891, are at hand, but contain nothing on this subject.

CHAS. G. ATKINS.

EAST ORLAND, Me., March 23.

FISH COMMISSIONS.

THE New Jersey Commission was reorganized at a meeting in Trenton, March 18, by the election of George Pfeiffer of Camden, as president, and R. D. Foote, as secretary and treasurer. Thos. Meskell of Morristown, was made State fish and game protector. The State was divided into three districts. An appropriation of $3,000 was made to stock the Delaware with shad and other streams with trout and black bass.

The California Commission has now in its Bear Valley hatchery 350,000 fry of the eastern brook trout, which will be ready for distribution about the last week in March. The eggs were obtained from the Nevada Fish Commission. Carp are spreading everywhere and cause much uneasiness to owners of fishing waters by their unwelcome fertility and voracity.

The U. S. Fish Commission, on March 21, planted 1,230,000 young cod in Squam Pond, Gloucester, Mass. by way of experiment in rearing them in surronndings wherein it is believed the dangers to the fry will be greatly lessened. Salt water anglers have begun to reap the benifit of the hatching operations at Gloucester and Woods Hall.

The Kennel.

FIXTURES.

DOG SHOWS.

April 5 to 8.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. C. Steadman Hanks, Sec'y.

April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton (Ont.) Kennel Club. A. D. Stewart, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

RETRIEVING AT FIELD TRIALS.

Editor Forest and Stream:

I have read with great interest Mr. Avent's article published recently on retrieving, and also the various replies thereto, and have been hoping to hear from some of the professional trainers at more length, as I know many of them have most decided views on this important matter. The question as presented by Mr. Avent is, "Does teaching a bird dog to retrieve injure his field qualities?" and he proceeds to argue the question from the affirmative point, citing two dogs, only one of which he trained, or attempted to train, as proof of his position. There are only two ways by which to teach a dog to retrieve. One the natural or "goody, goody" method, the other by force. I have tried all methods in turn, from patting on the back and coaxing, through all the various gradations of nose-twisting, foot and lip-pinching, choking, etc., and long ago settled to the use of the spike-collar as the surest, most effective, and in the hands of an expert, the most humane method of making a dog—what all sportsmen require—a quick, cheerful, and tender-mouthed retriever. Unless a shooter has a dog of some description to seek and find the dead birds, he will lose a large number of the birds he kills, and all cripples. In England a special dog is used for this purpose, which is kept at heel until his services are required. If the English custom ever becomes general in this country, it will be time to quit teaching setters and pointers to retrieve, but I question if such custom ever becomes popular here, as there are but few sportsmen who will care to keep two dogs to do the work of one. The question then is, does teaching a dog to retrieve injure his field qualities? more especially, does teaching by force do so? I say, most emphatically, No. And where such cases arise as Mr. Avent has cited in Antonio and Roderigo, the fault lies not in the system but in the application, or rather misapplication of the system. I have seen numbers of dogs in field trials retrieving tirelessly and cheerfully and yet going well up in the competition. The milk in the cocoanut is just here.

When field trials were inaugurated and well under way, some of the more shrewd of the handlers quickly discovered that a well-trained, obedient dog had no show in the competition against one half trained, who at every opportunity would steal his opponent's points and whose handlers could make sufficient noise to "break up" the other dog without rattling his own. Consequently their aim from that time was to produce a dog such as I have sketched, which they proceeded to dub "a field trial dog," and all strictly obedient dogs of good training were "not in it" at all. Some of these handlers have been eminently successful and have gained great reputation, but the field dog has suffered in proportion and the notion has become quite widespread that field trial dogs are unfit to shoot over. Well, there is a great deal of truth in the idea, but such should not be the fact, and when I remember the work of such dogs as Gladstone and Sue, over which brace the Messrs. Bryson did their shooting for years, I begin to think the "natural quality" fad has been carried far enough and some recognition should be given to useful acquired qualities. It is true all field trial rules insist on perfect training, but how do they insist? There is only one way, and that is to penalize poorly-trained dogs to such an extent that they cannot win. I see dogs each year in the trials refusing to back and retrieve under rules that insist (?) on perfect training, and winning simply because their not doing so gives them a decided advantage over their better trained opponents, who possess as fine natural qualities but are handicapped in running against such wild dogs. When I find a handler advocating such training I set him down as working for purely selfish ends and not in the interest or the advancement of sportsmanship or the good of the dog.

There is a wide difference between a handler and a trainer. It is true a man may be both a good trainer and good handler, but it does not always follow that because he is a good handler in field trials, he is a good trainer also, as many persons have found to their cost who have purchased field trial winners expecting to have perfect shooting dogs. In fine the very qualities required by all field trial clubs are the qualities required to made a high-class shooting dog, viz.: Pace to carry the dog along rapidly, range to find coveys, style—which includes grace in movement and on point—and obedience and disposition so as to be easily handled, etc. As a matter of fact, if an unsophisticated handler goes into a trial with such a dog he will be greatly disappointed. Let us have an imaginary heat between such a dog and one trained by an expert to win with. The first thing the new handler notices, the expert has his whistle in his mouth, and between toots, while waving his arms frantically, is shouting "get away there, Duck," at the top of his voice, and as he has already "caught on" to the new chap's whistle, produces one of the same tone and proceeds to "break up" his dog whenever he shows indications of game. After waiting in vain for the judges to call the expert to order, he expostulates with him, and is coolly informed that he (the expert) always whistles to his dog to send him on and keep him out at his work. He then appeals to the judges, with no better success. Finally, with his dog entirely broken up in his work at every point, only because he is well trained in accordance with the requirements of the rules, he sees his dog beaten by one he knows is inferior to his own both in training and natural qualities, and resolves that in the future, if he expects to win at all, he will be obliged to bring his dog to the start in the same condition as to training, and handle in the same manner. I do not think I have overdrawn the picture of many trials that I have seen, though under the present system of spotting, and with skillful judging, there are not the same opportunities for jockeying as in the past, but some of the old jockeying handlers can never forget their old tricks, and still continue to use them as the opportunity presents itself.

I have wandered away from my original subject, and wish to say a little more on the question of retrieving. Force in teaching retrieving does not mean cruelty, but simply forcing the dog to do something he is unwilling to do, and would not do if left to his own devices. I may be pardoned for speaking of my own kennel, but I each year teach from fifteen to twenty-five dogs to retrieve, some of them old, tough cases, and have never seen the dog I cannot make a cheerful, willing retriever, and have never trained to retrieve under the whip. There are now in my kennels twenty dogs that have "passed" under the spike collar this season, and any one of them will bring a bird, either in the field or yard, with no tail-tucking or desire to crawl under the bed or elsewhere. One may teach a bulldog or mastiff to retrieve with a whip or club, but the high-class nervous setter and pointer require different treatment, being a different subject; and it takes patience, tact and industry, together with a careful study of the dog's disposition coupled with the manual dexterity, only acquired by practice in graduating the punishment, to accomplish the end in view. My desire in the present article is to provoke discussion, bring the question up, so as to get the views of all handlers, owners and others interested in field trials in a free and full discussion of the matter.

NAT. B. NESBITT.

CHESTERVILLE, Miss.

Editor Forest and Stream:

Mr. B. Waters under head of "Points and Fiushes" says, that the great interest taken in the conduct of field trials and the theories advanced for competition, are very gratifying to him, and adds that the ideas of the younger associations have a tendency to undervalue the rulings of the older ones. Very likely. History often repeats itself. It was universally accepted in the early ages that no good could come out of Nazareth, and that Wendell Phillips in '56, who advocated the abolishment of slavery and had only sixty-five followers who dared to deposit a ballot even secretly in this State, was too "impulsive" and "retarded progress," and also that the female portion of the human race should only be the ones to toil and bear the burdens. I think we have sufficient evidence that some good may come from the younger associations yet. He says that there is more general interest taken in retrieving, whether it should be recognized as a competitive quality in a trial, and if so, should it be insisted upon in both puppy and all-age stakes, and that men of sound judgment and extensive experience hold conflicting opinions. He then proceeds to argue against retrieving in all classes, which surprised me very much. If I remember correctly he has been the strongest advocate for a well trained dog in the public field trials, writing against the idea that it was necessary to have two dogs in order to compete in a public trial and to enjoy an ordinary day's hunt. All field trial associations as well as all other institutions in dogdom claim that their object is to teach the people about the best kind of dog. If a pointer or setter puppy two years old or a little less, cannot be taught to retrieve without impairing his usefulness in the field among the very high class breeds we now have, let us look a little further for blood, for we want something practical. The high-toned Englishman might say, "Ah! you must have your retriever, you know," to bring in your bird after your high class pointer or setter has stood it in such superb form after running until his poor staying qualities has obliged him to slow up enough to catch on to the game that he may have come upon. I saw a cut on the back page of one of our sporting papers that amused me very much. The high class dog had started for the next county showing great mettle and speed, while our common sense and more practical dog had lifted his nose and taken in the scent of whatever might be in the air and had located a flock of birds near by. I'll guarantee that this useful and practical dog that is represented standing the birds will, when one of them has been shot down, at the command "dead bird," go and retrieve it in a very careful manner and come and sit before you, ready to deliver in the most becoming way imaginable, which is his greatest reward, after doing all his other duties in such an agreeable and practicable fashion. But this is not the fashion, it makes me sigh to say it, for we are told by Mr. Waters, the best authority in the land, "that a well trained dog is handicapped in any public field trial." The same authority also says that the more training a dog has the better work he will do with less pottering, etc. I therefore think it the best evidence we can have that retrieving and hunting for birds do harmonize when being taught together on account of the reward the pups get by retrieving, after doing all their other work in a proper manner. I want all my puppies taught to retrieve on the force principle before they are put into the field, and while teaching them make them seek in every conceivable place the object desired, without their having any information in regard to its locality. If any one thinks this cannot be done without injuring his industrious habits, his steadiness on the point or causing him to break to shot or wing and running riot, it is because they have not as good a handler as I can introduce them to. What are pointers and setters bred for? Are they only for those who have not yet found the tint for their gloves delicate enough, nor the speed of their dogs great enough to win by getting into the next county first? I think not. I think they are bred to assist a man in the most enjoyable way to get a few birds, to be so trained that they will respond with a certainty, when beyond the hearing of the ordinary voice, by the blast on the whistle, and when their attention is secured you can direct them where you will. Call me a butcher, murderer, pot-hunter, or what you like, I have never seen a man so unlike me, however scientific, but would do his best to kill a bird when flushed before the point of his dog, even though he had more than he needed for his supper. Then Mr. Waters says the field trials cannot offer opportunities for retrievers even in all-age stakes, for to test them, six birds at least, must be shot over each, and no handler will try to kill except in a clear field, and then when the bird will drop near his dog. This only shows up the trickery of the past, and what may be expected in the future. We poor novices have spent much money in getting and in breeding to these field trial winners, supposing we were getting the best, but it seems by this exposé that we were only getting the dogs that are handled by the most adroit, instead of the dog best qualified for the work he is intended to perform.

S.

NEW HAVEN, Conn.

THE IRISH SETTER TRIALS.

Editor Forest and Stream:

A number of bench shows have come and gone since our greatest of all, Westminster, yet it lingers fresh in the minds of most of the Irish setter men. I mean those intimately interested in furthering the breed as a field dog, that by the negligence of a few members not being present caused at least some people throughout the land to think that the club may have gone by default, and that there would be no Irish setter trials this year. If there are such doubting Thomases I think it would be wise for Dr. Davis to come forward and say to the world at large that he holds over for this year and that by the assistance of those interested, same as last year, there will be a much more successful trial than the inaugural one.

After the trials last year many somewhat prejudiced people had their "eyes opened" and were willing to admit that really the Irishmen were better field dogs than their "wins" or "starts" in field trials would indicate. Now it need not take long before the special club can be dispensed with in so far as the red dog is concerned and the Irish Setter Club can open its stake to all comers. Indeed I am of the opinion that a trial should be made this year of having an additional free-for-all stake, and by having the trials in connection with some other club, the Southern being preferable, I am sure the entries would be large and many of all breeds would participate.

What most concerns the handlers and owners now is where and what time to hold the coming trials. Some three months ago a number of letters appeared in a Western sporting journal strongly urging a location in Ohio, and when the worthy secretary was called out by Mr. Bishop, replied that he was not prepared to say just how their claims should be passed upon. If the Eastern interest, influence and patronage is the strongest and must be catered to, then let the club call upon the Central Club and see if they will do for them what the Eastern did last year—grant their grounds and let the trials be held about the middle of January.

But, gentlemen, listen to me; the claims of the West should not be passed by without careful consideration. There are many lovers of the red dog all through the West, North and South, and it would not be without good results to give them a fair show this year. There are many owners who cannot send their dogs to High Point or Lexington on account of the distance and expense, and yet I think many of them could arrange to send them South in care of the handlers who spend all of the winter South anyway. To hold the trials upon the same ground used by the Southern Club would be the best that I know of for this year. All the handlers will be there, and the extra stake that I have mentioned would add materially to the interest centered in the club's trials. Let the dates be from Jan. 25 to Feb. 15, before or after the Southern meeting. This would give ample time to get the young dogs in fine condition to enable them to compete with any dogs they might meet. There is no denying the fact that Feb. 1 is the best time to hold the trials and the grounds at New Albany, Miss., the best yet used. The Carolina grounds are not good, having too much cover, and often a good dog at either the Eastern or Central is put out of the race more from lack of opportunity to range and find game than anything else. The Eastern and Central grounds are by no means ideal ones.

All dogs should have equal chances. Several of the dogs started last year had no chance to show what they could do, and the owners of dogs, not having a chance to point during their heats, can justly feel aggrieved at their misfortune.

J. L. SHUMAC.

NEW YORK.

BLACK AND TAN TERRIERS.—Buffalo, March 26.—*Editor Forest and Stream:* Mr. Raper, in his report in FOREST AND STREAM of the New York show, said of the black and tan terriers, that Louie won from Broomfield Madge with consummate ease, and that Madge had "gone wide in front." Your report of Pittsburgh show says Louie was shown in good condition. Now, if she won so easily at New York and was in good condition at Pittsburgh, there must have been a wonderful improvement in Madge to have changed Mr. Raper's opinion. What was it? Has she grown narrower in front since the New York show? There have been so many queer things done in black and tans in the past three years that a spectator wonders which is right. Many of us naturally supposed that Mr. Raper would enlighten us, but if a dog can beat another "with consummate ease" at one show, and be beaten by the same dog in three weeks, when the first winner is in good condition, I would like to know what caused the change of positions.—A. W. SMITH.

POINTS AND FLUSHES.

CHICAGO, March 26.—It is rumored here that Mr. G. H. Goodrich, of Chicago, who has been prominent in the management of the Mascoutah Kennel Club's show in the last two years, has been invited to superintend the World's Fair bench show, and that he has accepted.

Concerning the invitation to arrange for a pointer stake to be run after the Southern Field Trial Club's next meeting, Dr. M. F. Rogers, of New Albany, Miss., writes me, under date of March 24, as follows: "By the way, quite a number of parties are anxious that we have a pointer stake here at the close of the Southern Field Trial Club's Stakes. It should be run here on our grounds, because they are the best in the world, and, from the expenditure I am authorized to make on them during the year, they will be unapproachable next season by any club's grounds in existence. I am having a small patch of sorghum planted around every thicket, on the entire grounds, which is liable to hold a covey of birds. There are as many birds on the grounds now as when you were here, none having been shot. The grounds will be thoroughly protected, and it is safe to say that when the first brace of dogs go down next year they will be on the best grounds, in every respect, in existence.

"I give you herewith my ideas of arranging the pointer stakes, to be run on the grounds of the Southern Field Trial Club, Monday, Feb. 12, 1893: All-age stake, open to all pointers which have never won first money or special in a regular field trial. Entrance $10, with $10 additional to start. Entries to close Oct. 1, 1892.

"Derby, open to all pointer puppies which have never won first or special at any regular field trial, and which were whelped after Jan. 1, 1891. Same entrance and starting fees as in the All-Age Stake. All forfeits and entrance money to go to their respective stakes. All added money to be equally divided between the two stakes. The running rules to be left entirely to the judges, the FOREST AND STREAM to name one judge, the American Field one and the Pointer Club of America one."

Dr. Rogers starts the endeavor with the liberal subscription of $25.

This proposition for a pointer stake, coming as it does from a sportsman so highly esteemed, skillful and influential as Dr. Rogers, is worth the serious consideration and effort of all owners of pointers. With all the advantages offered in the way of magnificent grounds and plenty of birds, the owners and admirers of the short-haired dog should subscribe liberally to make the trial a success.

The interest in pointers as field dogs has fallen off a great deal in the South in the past few years by negligence, the setters having almost entirely supplanted them. Unless the admirers of the pointer make more effort to exhibit their favorite's working capabilities, they will fall into a low place in public esteem, and will gradually lose all prestige if the apathy is continued. Of course there are some active, energetic pointer men, but they are few in number compared to the whole, and the active work in maintaining the reputation of the pointer or striving for his ascendency over all competitors should not be left to a few individuals. No matter how good the qualities of a breed may be, or, for that matter, those of an individual dog, the only way to convince the public of genuine worth is by actual exhibition or competition in public field trials. The high reputation of the English setter to-day would never have been acquired but for uniform, strong competition year after year.

In competing in open stakes with English setters, the pointers always contend against large odds, which, if they were all in every respect quite equal to the setters in performance, would be impossible to overcome. Of course, a pointer will now and then win against the odds which are against him, but he will, on the other hand, in many cases lose. It would be much better for the breed of pointers if the owners would arrange more trials specially for them in different sections of the country. B. WATERS.

PHILADELPHIA FIELD TRIALS.

Editor Forest and Stream:

At a meeting of the field trial committee of the Philadelphia Kennel Club, held Monday, March 14, the following matters of interest were acted upon:

Fourteen hundred dollars in purses will be offered in the Derby and All-Age stakes, divided up as follows: $400 to the winner of first, $200 to the winner of second and $100 to third in the Derby, and the same division in the All-Age Stake.

In the Derby the entries will close May 15. A forfeit of $10 must accompany each nomination in this stake, a second or additional forfeit of $10 must be paid Sept. 15 and the remaining $10 must be paid on night before the starting of the stake.

In the All-Age Stake the entries will close Oct. 1. A forfeit of $10 must accompany each nomination and the remaining $20 must be paid on night before the starting of the stake.

In the Members' Stake, open only to the members of the P. K. C., entries will close Nov. 1, $10 to enter and $10 to start. Prizes, $50 to first, $30 to second and $10 to third. In addition there is the *Item* bowl to be competed for in this stake, together with other cups and special inducements. FRANCIS G. TAYLOR, Sec'y.

ADVISORY COMMITTEE MEETING.

A MEETING of the advisory committee of the A. K. C. was held at 44 Broadway, New York city, March 26, with all members present except Mr. Reick, who is absent in Europe.

The following matters were submitted and acted upon: The charges preferred by Mr. Thomas Shillcock against Mr. G. W. Patterson were laid over for further evidence.

Re charges preferred by F. H. F. Mercer against J. L. Little. It was found that Mr. Little was not guilty of any fraudulent act and that Mr. Mercer did not prove his case.

The rules which are to govern the dog show of the World's Fair were adopted.

There were two fox-terriers and two Italian greyhounds shown at the Pittsburgh shown in violation of the rule governing the age of puppies and said dogs were duly disqualified.

The A. K. C. has purchased the London *Field*, Vols. 1 to 22 inclusive.

A PRIZE FOR THE BEST MOVING MASTIFF.

Editor Forest and Stream:

I offered the Boston show a special for the best moving mastiff at their coming show, puppies and animals not getting as high as vhc., excluded, and with the condition that Mr. John Davidson judge it, sending at the same time a letter for publication that my selection of Mr. Davidson was not meant in the slightest degree to express distrust of Mr. Mortimer or his ability, but that I wished this point decided entirely free from any connection with the show merit of the dogs, and a verdict on this point alone would be more pronounced coming from one who had not judged the animals in their regular classes. The Boston committee, however, decided that they could not accept this condition, as it would be certain to "make hard feelings." I had explained my reasons for this selection to both Mr. Mortimer and Mr. Davidson, and both were entirely satisfied with them, but after thinking the matter over and considering the number of his proper victims among dogmen that the fool-killer has most negligently passed by, I have concluded that our Boston friends are right after all, and that while Mr. Mortimer appreciates my reasons, a lot of fools would say, "Oh! It's just some of Wade's spite at Mortimer," and therefore Mr. Mortimer will judge this special. I wish to give notice, however, that at the first opportunity I will offer such a special again, and I will insist that the judge of mastiffs, be he who he may, shall not judge it. I don't want a mastiff judge's opinion, I want an outsider's, and I will take it in very ill part of the show committee that objects. Perhaps the dogmen's fool-killer will have wakened up to a sense of his duty by that time, and to the chatterings of those he overlooks I will be indifferent. W. WADE.

HULTON, Pa., March 26.

NOTES AND NOTIONS.

A FORCIBLE illustration of the growth of kennel interests came under my notice recently. In looking over the Seeger & Guernsey Encyclopedia, a work designated for the guidance of buyers who may wish to learn where any article of commerce or manufacture can be bought, I was surprised to find the names of so many of our leading kennels, as Mr. Moore's, Mr. Winchell's, the Hillside, etc. When we recall how very absurd it would have appeared a few years since to find information in a business directory of where to buy dogs, the march of kennel interests is strongly impressed on us.

* * *

The "Onlooker" begs to present his compliments to the English *Stock-Keeper* for its very considerate "letting down" of him over his stumble over that new canine artist, Mr. W. W. Lloyd. The vulgarian always manages a correction in a way to instill envy, hatred, malice and all uncharitableness in the mind of the corrected, but the *Stock-Keeper* manages the task in a way that makes correction a luxury. The "Onlooker" hopes that that journal will favor us by such sequel to its discovery as *Home Words* may furnish after reading the comments of the *Stock-Keeper*.

THE ONLOOKER.

DOG CHAT.

EIGHT hundred and seventy-five dollars for a King Charles spaniel. This is the sum that Mrs. Pestell of Southsea (Eng.) has just sold her crack dog Laureate for. *Stock-Keeper* says this dog is a grand animal and has carried everything before him in the show pen. Mrs Forder's celebrated King Charles Ch. Ben d'Or is dead. He was born in 1882 and had won everything in the way of prizes that he could win.

Mr. E. B. Sears is rather annoyed at the rumor that he will not show at Boston. On the contrary he has entered a team of thirteen, and we are told that Sir Bedivere is once more entirely himself.

Collies are looking up; another newly imported one has arrived, this is Scotland's Best, by Christopher out of Maid o' Fortune, purchased from Mr. Scott of Edinburgh, by Mr. R. E. Tod of New York city. He took second in good company at Dunfermline a few weeks since. He came over on the Teutonic.

A note by our correspondent, "The Onlooker," of his discovering an unknown canine artist in Mr. W. W. Lloyd, who furnished some doggy illustrations in *Home Words*, a London monthly, has led to a most comical issue. The London *Stock-Keeper* says that this mention by our correspondent led it to investigate, and on procuring a copy of *Home Words* found canine pictures of unusual merit, life-like, spirited and thoroughly artistic, noted as "Drawn by W.W. Lloyd," but a close examination developed, what our correspondent evidently overlooked, the inscription in a corner of "R. H. M., del," the initials of Mr. R. H. Moore, the noted canine artist. Thus through a mention in far-off America the editor of *Home Words* is put in a very equivocal position by appending the name of another to Mr. Moore's work.

When Dr. M. H. Cryer, of Philadelphia, was called upon to judge at the Eastern Coursing Club's first meet the question was asked by more than one what Dr. Cryer knew about greyhounds, when to the present generation of dog breeders and exhibitors his name had been usually connected with pugs and pet dogs. Dr. Cryer tells us that in his younger days he was an enthusiastic lover of coursing, and if we are rightly informed, the noted slipper Tom Wilkinson was either brought up or lived for some time on one of his father's farms. The following bit of what now must be called ancient history, and Dr. Cryer must have been a pretty young man at that time, will be interesting reading to some of our modern greyhound men and will show that at a very early date in American dog annals there were some good greyhounds in the country and whose progeny, we believe, found their way eventually to the Pacific slope. In the *Turf, Field and Farm*, Sept. 2, 1870, we find the following: "We learn from the *Sporting Gazette* of Aug. 20 that Mr. Cryer, of Salem, O., has made a valuable importation of greyhounds. Dogs are tested in England in races arranged especially for them, and those imported by Mr. Cryer have been successful in the courses. The *Sporting Gazette* says: 'The well known greyhounds Saladin and Bettelheim started for America in the steamer Wisconsin, having been consigned to Major M. H. Cryer, of Salem, O. Saladin, by Flapdragon out of Miss Orrit, beat Belligerent in the final course for the Scarisbruck cup at the last Southport meeting, having won all his previous courses like a good greyhound. He also ran twice—in 1864 and 1865—for the Waterloo cup. His staying powers are undeniable, and no doubt he will make a good stud dog. Bettelheim is by Rienzi out of Note. In 1867 she ran into the last four for the Waterloo cup, beating Maniolana, Constable, Desperation and Rather Improved. After her clever victory over the latter she was thought to have a good chance, but was bowled over in the fifth round by Lobelia, the winner of the cup'."

Mr. A. H. Heppner draws our attention to the fact that the great Dane Pedro, who won at Pittsburgh, was not entered at Chicago for competition, consequently an injustice was done to Mr. Heppner, as judge at the latter show, in our remarks in the Pittsburgh report.

Lovers of toy dogs, including toy spaniels, will have a chance to show their pets and their millinery once more, as a show for these dogs will be held May 3 to 5, in St. Stephen's Hall, Westminster Aquarium, London.

An application was recently made to a magistrate in London respecting the right of a landlord to seize a dog for arrears of rent. The complainant believed such seizure to have been contrary to law, but the magistrate soon disabused him of this idea for he told him the seizure was justifiable, for "a dog being a chattel, the landlord can seize your chattles if you do not pay your rent." No doubt this would hold good in some of our States, and it remains for an impecunious breeder to select his dog with some degree of forethought, so that if any intruding marshal should unfortunately have occasion to make a raid, the seizure part of it would be on the other leg.

There is always more or less conjecture among exhibitors as to "how Boston will come out this year:" but somehow, without making much stir, the New England Kennel Club always manages to, in polite parlance, "get there with both feet," and this year they seem to have added a fifth wheel.

At Pittsburgh there were numerous complaints among the regular handlers that, owing to there being no money in the challenge classes, it would not pay to take their teams to the city of culture; many of their best dogs having become candidates for challenge honors. Whether they have carried out their intentions or not we cannot tell, but the entry of 702 is a capital one and quite an advance over the year 1891, when 629 was the number catalogued; and further, we are told that some of the best dogs in the country will be on hand. Several breeds show a marked increase over last year, especially in pointers, St. Bernards, Boston terriers, Irish terriers, there being 25 of the latter against last year's 11, black and tan terriers and pugs. With 60 "round heads," the judge will have no easy task in turning the sharp corners of local aspirations, and his position is not to be envied. The list of entries in the different breeds follow: Mastiffs 14, St. Bernards 69, great Danes 3, bloodhounds 4, deerhounds 12, greyhounds 14, Barzois 5, Chesapeake Bay 3, pointers 73, English setters 55, Irish setters 42, Gordon setters 28, spaniels 37, beagles 39, dachshunde 11, foxhounds 15, collies 35, poodles 5, bulldogs 9, bull-terriers 21, Boston terriers 60, fox-terriers 60, Dandie Dinmonts 5, Scotch terriers 5, Irish terriers 25, black and tan terriers 6, Skye terriers 3, Yorkshire terriers 6, toy terriers 3, pugs 17, toy spaniels 2, King Charles 4, Blenheim, Prince Charles and Ruby 2, Japanese 3, miscellaneous 6; total 702. The show will be held April 5 to 8, as usual in the Mechanic's Building, a building than which there is none in America better adapted for a dog show.

Mr. Walter J. Comstock of Providence, R. I., seems determined to get together a winning team of Irish terriers. He has just made an important addition to his kennel by purchasing from Mr. E. A. Wiener. The Elms, Sunderland, England, the noted "Trishman" Merle Grady, considered one of the very best Irish terriers on the other side. He is a red dog, whelped Dec. 6, 1889, and is by Billsticker out of W. Galley's Biddy, by Bellman out of Biddy. He has won a number of prizes at prominent shows, including the Irish terrier Juvenile challenge cup 1891, and first and special at Derby, first Darlington, first and special Leeds, first Liverpool. The latter win alone stamps him as a good one, and with Boxer IV., Hanover Boy, Dunmurry and Crate, Mr. Comstock can place a team of terriers of this breed on the bench such as American exhibitors have not seen before. Merle Grady, should he arrive in time, will make his American debut at Boston

A Miss Hulscher, of Amsterdam, Holland, has just purchased Mr. Mayall's famous dog Chutney for $500. Chutney is by Breda Mixer out of Iris. Iris is a daughter of Breda Florence, that Mr. Comstock so unfortunately lost two or three years ago, and is now owned by Mr. Geo. R. Krehl. Iris won first in a strong class at Birmingham, 1891.

The question of size in Irish terriers is now being agitated in the *Stock-Keeper* (Eng.). The prevailing opinion seems to be that 24lbs. for dogs and 22lbs. for bitches, the standard size, is the limit. It would certainly seem as if dogs that are required to go to earth, to bolt the otter and badger, should not be burdened with the "props" that some of the Irish terriers possess that have been placed in the money in this country. Though these "dare-devils" are not used, to any extent, in America, as they are in Great Britain, simply from lack of time and opportunity on the part of their owners, still the characteristics of the breed and the knowledge of what they are required to do should not be lost sight of.

Mr. A. Knoblauch, Jr., of the Central Kennels, Jersey City, has purchased the King Charles spaniel Royal Roy from Mr. Burkhart, Brooklyn, N. Y., who in turn imported the dog from Mrs. E. Forder, of England. This toy spaniel is said to be a good one, though rather large, and is by Jumbo II. out of Olivette, his pedigree thus running back to Countess, Queen of the Fancy, Jumbo, Young Jumbo, etc. Royal Roy was whelped Nov. 27, 1889.

As usual after our spring circuit, the death roll increases and many dogs are lost that breeders and owners can ill spare. Irish setter men especially will be sorry to hear of the death of Mr. H. B. Anderson's Irish setter Nugget from distemper and pneumonia, contracted at the late Washington show. Nugget had already made a name for herself, especially in the field, where she won first in the Irish setter Derby at High Point, N. C., last year. On the bench she scored hc, at New York and reserve at Washington, D. C., this spring. Mr. Anderson feels her loss very keenly, as he intended to run Nugget in the All-Age Stakes this fall, and from her good performance last year expected her to give a good account of herself in competition with the older dogs.

Still another promising dog has joined the increasing majority. Mr. W. Stewart Diffenderffer writes us that his young St. Bernard Sir Melvale, by Scottish Prince out of Hepsey, died Wednesday last from distemper and pneumonia, contracted at either Washington or Pittsburgh shows. Sir Melvale was only sick three days, and though two "vets" were in attendance, the inevitable had to come. Our correspondent adds, "No more showing pups for me." How many others have made this resolution, but still the puppy classes continue to claim their victims. Mr. Diffenderffer cannot quite get rid of the fever, try as he will, and has now purchased from Mr. Sawyer, of Menominee, Mich., a useful bitch in Mascot Bernie, registered in England as Urith, by Sargano out of Floss. She has already had one litter by Scottish Prince, and if the "influence of a previous sire" goes for anything, he expects to breed something good from her by the aid of one of the cracks.

The owner of the Ingleside Kennels, Mr. Geo. W. Glazier, Salem, Mass., believes in keeping his dogs up to the work they are intended to do, and last Saturday indulged in a little fun in the way of a man hunt, or, more correctly speaking, a boy hunt. The kennels are situated about two miles from Marblehead, on the outskirts of Salem, and possess every requisite for the raising and training of his mastiffs and bloodhounds. In this small pack there were some noted animals, Belhus, for instance, whom the police of Scotland Yard used to try and pick out the trail of "Jack the Ripper" in Whitechapel, and a son of Burgho, who was also used for the same purpose, and which latter dog is now known by the name of the mysterious criminal that his sire failed to run to earth. Another one is Bennison, a bitch recently imported, and who has whelped a litter of eleven since her arrival, to Mr Brough's famous dog Bono. The bitch Delfan, by Belhus ex Rosemary, completed the pack. Mr. Glazier was the master of the hunt. A youth of some thirteen summers was provided with a few pieces of broken meat and sent off in the direction of the Canadian Dominion; five minutes' law was given, and then off went the hounds, and in a few seconds Jack had picked the boy's trail out and was after him at such a pace that it would have taken a good horse to keep up. The rest followed close behind. The boy had passed from sight over a neighboring hill, and the dogs tracked him foot by foot, following each turn with unerring certainty, until they came up with him. The boy then rewarded them, and came back to the kennels with the dogs at his heels. Twice again was the youngster started off, each time following the old track for a short distance and then striking out afresh, and each time did the dogs pick out the most recent scent and follow it until they came up with the lad. It must be clearly understood that no drag was used and the boy merely ran over the ground, his feet being incased in rubber boots. The sagacity, tracta-

bility and wonderful powers of scent of the bloodhounds were admirably shown by these experiments, which, by the by, are about the most exacting Mr. Glazier has so far asked his dogs to attempt.

A meeting of the executive committee of the Toronto Kennel Club was held at Richmond Hall March 24, when the following members were present: Messrs. Williams, Thompson, Forshaw, Stuart, Mead, Elmore, Keating, Kelly, Mitchener, Donovan, Stone and Millichamp. Eight new members were elected and it was decided to hold a show for all classes of dogs in the second week of May, open to Toronto and suburbs.

"Wasn't your dog sick the other day?" "Yes." "How did you treat him?" "Made him swallow a dose of tartar emetic." "How much?" "About a gill." (Next day.) "Didn't you tell me you gave your dog a dose of tartar emetic?" "Yes." "Well, I tried it on a sick dog of mine and it killed him in two minutes." "That's right. Fetches 'em every time. Nasty day, isn't it?"—*Chicago Tribune.*

It is said now that the Rochester Kennel Club will defer holding a show until September. This we should say is a good move, and if it can be held a week or so before the Canadian show, a good entry should be forthcoming, as the handlers can take it in on their way up.

Mr. E. H. Moore, Melrose, Mass, has sold the rough-coated St. Bernard Safford, by Ben Lomond out of Saffron, to Mr. G. A. Joslyn, Omaha, Neb., for, it is stated, $750.

Mr. Sears, in dispersing his kennel, has already sold the St. Bernards Paul and Mount and the bitches Hilda, Flora, Nellie and another youngster.

The Bulldog Club, of England, will hold their next show at the Westminster Aquarium, London, May 24 to 26.

In the issue of Dec. 10 we spoke of "The Retreat," a sporting domain at Hammond, La., owned by Gen. F. F. Myles and John A. Morris, also mentioning the fact that Mr. McCartney had been engaged to take charge of the place. From all accounts the estate, which comprises 10,000 acres, must be a hunter's paradise, and the noted dogs Simonides and Captain Bethel, which have been placed at stud in our business columns, find every opportunity to exercise their well known field qualities. Simonides's record is an enviable one, having won first, I. S. Derby, 1889; second, Southern Derby, 1889; second, All-Age, 1890; second, Inter-State All-Age, 1890; first, Inter-State All-Age, 1892. He is also a well made dog, as his first at the late Nashville show will prove. Captain Bethel is another English setter that is valued by field men, as besides being a first-class performer himself, is he not known as the sire of that little wonder Wun Lung, and also the late Wun Lung's Sister, Glenn and others. Setters such as these, to the manner born, are bound to reproduce stock whose natural field qualities are highly developed.

Mr. Shillcock, of Birmingham, Eng., has just made a notable purchase in St. Bernards whereby his well-known kennel is materially strengthened. Earl Roseberry, Duke of Armadale and the bitch Ponza are their names. Earl Roseberry is especially well known and came near being an inmate of Mr. Reick's kennel after Prince Regent died. Both of these dogs are by Prince Regent out of Moss Rose and therefore brothers to the late Scottish Prince.

Col. Jacob Ruppert, Jr., sailed for Europe last Saturday where he will join Mr. Reick in Paris. The latter arrived safely at Gibraltar, by the Fulda, and went on to Madrid. Together these two St. Bernard men will journey to England and we shall soon, no doubt, have some news to chronicle.

Exhibitors at Lynn, Mass., remember the efforts of Mr. D. A. Williams in their behalf, and we are sure that now that this gentleman has become a Benedict, they will wish the couple a life of prosperity and happiness.

In announcing the death of Mr. George Shepard Page we are sure that exhibitors, especially the greyhound men, with whom he was brought more intimately in contact, will join us in according sympathy to his bereaved family. Mr. Page, besides being identified with sports of the field, of which an extended account will be found in another column, was an ardent lover of dogs, and of deerhounds especially. Of this breed he had a grand collection at his handsome kennels at Stanley, N. J., of which we gave an account in FOREST AND STREAM last summer. Among those he has owned and bred are the noted winners champion Olga, Argyle, Duncan, etc. Mr. Page always took an active interest in the management of both the Eastern Coursing Club and the National Greyhound Club, and it was only a couple of weeks since he was elected chairman of the committee to organize a show in Brooklyn this fall under the auspices of the N. G. C. In manner kind and courteous, his presence will be greatly missed at future meetings of these clubs. Mr. Page was only seriously ill a few days, and his sudden taking off must be a great blow to his bereaved family.

The Philadelphia Kennel Club speak in no uncertain terms that they intend to take a position alongside our best field trial clubs, when they are willing to put up such handsome prizes in their coming trials. This enterprise is sure to meet with every encouragement from owners and handlers, and the presence of its merry members will go far to make their meeting a most enjoyable one. This year promises to be a memorable one in field trial history, as the number of trials that will be held is greater than ever, and our handlers will have a busy time of it the last two months of this year.

A collie bitch well known to breeders and exhibitors, champion Peggy II., has gone the way of all dog flesh. Besides being a noted winner, she will be long remembered as the dam of the noted Christopher, ch. Sefton, Grace, Dorothy and others.

Messrs. McEwen and Gibson, the well-known Canadian breeders of collies, have been setting their lines on the quiet, and through the aid of Mr. Astley, have landed two collies described by the *Stock-Keeper* as "a grand brace of young collies." They are a grand young black, white and tan dog by Egbaston Excelsior—Ryland Lady, and a very good young sable and white bitch by Great Alne Douglas—Wellesbourne Beauty. The dog is reported as being a flyer, and the bitch as being of the utmost promise. The brace left Glasgow on the Allan liner, Corean.

There is a great rush of breeders and others to get their live stock over before the new law takes effect on April 1. The steamer Tauric arriving here last Sunday had a lot of hackneys and other blooded stock on board. On this vessel a noted Clumber also arrived, consigned by Messrs. Meadows & Co. to Mr. James L. Little, of Brookline, Mass. This dog is Bustler IV., by Friar Barney out of Lady II. He is said to be a good field performer as well as a bench show dog. His wins include firsts at Exeter and Southampton, and seconds at Alexandra Palace and Colchester, etc. Mr. Little purchased him from Mr. J. G. H. Goundry, of Durham. Now that his other dogs are getting on in years, the new arrival should be a welcome addition to Mr. Little's kennel of Clumbers.

Mr. Raper's fox-terrier Raby Palyssy arrived Tuesday last and will be shown at Boston next week.

Mr. T. G. Davey has sold his noted English setter Canadian Jester to Mr. H. B. Vondersmith, Lancaster, Pa. Jester is a good field trial dog and is also considered perfection as a "gentleman's shooting dog."

Among the new advertisements this week we notice that J. H. Miller has broken rabbit dogs; Dunrobin Kennels, their entire kennel of deerhounds; V. L. Bossa, litter of English setters from noted field dogs; Dr. W. Crawford Johnson, Irish terrier pups; 327, some pure bred rough St. Bernards; A. C. Krueger, beagle bitch in whelp, also two rabbit dogs; Geo. W. Lovell, field dogs; J. J. Scanlan, Irish setter pups. At stud: Duchess Kennels have placed their Aristocrat and Young Keeper; J. J. Scanlan, his noted Irish setter champion Inchiquin and English setters Prince Noble and Gus Gladstone; Owner, Gordon setters, champion Beaumont and Heather York. Wants: L. H. Trotter, trained setter dog. James E. Green, late with Mr. Sears's celebrated kennel, and whose brother bred Sir Bedivere, desires a position as kennelman, and his services should be valuable to any one needing a first-class man. We also draw attention to the Dispensary for Dogs of the Ravenswood Kennels, and Dr. W. Blackburne as a canine specialist.

Mr. Clarence Rathbone, of Albany, has made another very interesting series of pictures of his gamy fox-terriers and called it "A Beverwyck Bouquet." Every picture is likelike in the extreme.

The National Pointer and Setter Field Trials will take place near Shrewsbury, England, April 26 to 29. The judges will be Rev. W. Serjeantson and Mr. J. M. Kilvert. Entries close April 1.

Mr. Geo. Raper, in his report of the New York show in the *British Fancier*, which, by the way, is given in full in the issue of March 11, with pictures of the judges, takes occasion to compliment Spratts Co. on the way the benching was done, saying: "The matter of benching is all in favor of the American company, as compared with our own firm." And, after giving just praise to Mr. Mortimer for his good management, adds this interesting paragraph: "As compared with our best shows in England, it (the New York show) certainly appears in a most favorable light in St. Bernards, setters, pointers and fox-terriers, but the other terrier classes, toy spaniels and pugs are decidedly weak. The collection of beagles and Japanese pugs would astonish show frequenters, the latter being the most wonderful group that has probably ever been gathered together."

Mr. Raper, after he has spent a day or two at the Boston show next week, intends leaving there on Thursday night in time to arrange his affairs so that he can sail for his mother country Saturday, April 9, on the s.s. Umbria. He is down to judge at Cleveland, April 18, so he will only just have time to get rid of his sea legs before he starts in again on the almost endless round of shows which take place in England during the spring and summer months.

There will be a special meeting of the English Setter Club at Hotel Thorndike, Boston, on April 6, at 7 o'clock, to be followed by the first club dinner at 8 o'clock. All English setter men and sportsmen generally are invited and will be cordially welcomed. Members and friends should apply for tickets promptly, that accommodations for all may be provided. Tickets ($1.50 each) will be mailed on receipt of that amount by Dr. W. A. Power, 266 Washington street, Boston, or by Wilson Fiske, Sec'y, 102 Chambers street, New York.

The Hamilton (Canada) Kennel Club claim dates September 6 to 9, for their second annual bench show. The secretary is Mr. A. D. Stewart.

The Liberty Kennels of Hyattville, Ohio, have purchased from the Niagara Kennels, Lockport, N. Y., the fine English setter brood bitch Rose, and have also taken three of the Belton Star-Rose litter to handle and break for Mr. Case.

Stock-Keeper (Eng.) in the issue just arrived "whispers," "FOREST AND STREAM did a big thing with their New York special supplement, which was not only got out ahead of all its contemporaries, but contained a complete report and a number of illustrations, some of them very good and some rather otherwise. The portraits reproduced direct from photographs are excellent."

A SERIOUS CHARGE.—New York, March 28.—*Editor Forest and Stream:* The "serious charge" of Joseph Zilligen in your issue of March 24 accuses the president and the secretary of the Great Dane Club of manipulating in the interest of a non-member of the club against him, one of the directors of the club at that time. That alone seems unreasonable as well as the fact that Mr. Zilligen should now, after a full year, send his complaint to your journal. Why did he not ventilate his grievances before and at the proper place, the American Kennel Club? New officers have been elected twice since the occurrence alleged by Mr Zilligen, and it is unjust on his part to bring up some of his grudge against the club as it now exists.—A. H. HEPPNER, Sec'y and Delegate, Great Dane Club of America.

DEATH OF LORD THORNDALE.—Phœnixville, Pa., March 27.—*Editor Forest and Stream:* Last night at midnight Lord Thorndale, the pride of the Menthon Kennels, died suddenly of pneumonia. Under separate cover I mail you a photograph of him. He leaves behind a pup, who, if he lives to grow up, will prove a wonder. The Wachovia Kennels, of Salem, N.C., are the fortunate owners.—KNOWLES CROSKEY.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

Carrollton Shot. By Esterbrook & Converse, Fitchburg, Mass., for white, black and ticked pointer dog, whelped Aug. 25, 1891, by Black Dude out of Carroll Queen Fan.

Sailor Boy. By W. A. Wheatly, Memphis, Tenn., for faded buffalo, russet smooth-coated Chesapeake Bay dog, whelped Dec. 17, 1891, by Wheatly's Marengo III. out of Jerry Cockrell's Diana.

Althea. By G. L. V. Tyler, Newtonville, Mass., for liver ticked pointer bitch, whelped Aug. 15, 1891, by Duke of Beaufort out of Mamselle.

Midget. By G. L. V. Tyler, Newtonville, Mass., for black cocker spaniel bitch, whelped Aug. 15, 1891, by Ben (Nauvie Obo—Flossie T.) out of Merry T. (Rex Obo—Nellie).

BRED.

Lou Pape—Bar Harbor Sam. Estate H. F. Piper's (Fitchburg, Mass.) pointer bitch Lou Pape (Broncho, Jr.—Rie) to I. O. Converse's Bar Harbor Sam (Duke of Vernon—Boski), March 19.

Dot—Lord Baltimore. Mrs. Runge's (Baltimore, Md.) pug bitch Dot to G. W. Wambach's Lord Baltimore (champion Kash—Nun Nicer), March 6.

Belle Creole—Lord Baltimore. W. G. Brunt's (Baltimore, Md.) pug bitch Belle Creole to G. W. Wambach's Lord Baltimore (champion Kash—Nun Nicer), Feb. 21.

Teaze—Lord Baltimore. W. G. Brunt's (Baltimore, Md.) pug bitch Teaze (Saxon—Fussie) to G. W. Wambach's Lord Baltimore (champion Kash—Nun Nicer), March 13.

Rustic Katti—Lord Baltimore. G. W. Wambach's (Baltimore, Md.) pug bitch Rustic Katti (Rustic King—Tra-la-la) to his Lord Baltimore (champion Kash—Nun Nicer), Dec. 28.

Rustie—Lord Baltimore. Mr. DeBear's (Baltimore, Md.) pug bitch Rustie (Lord Baltimore—Fannie) to G. W. Wambach's Lord Baltimore (champion Kash—Nun Nicer), Dec. 11.

Woodland Kate—Black Dufferin. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch Woodland Kate (King of Obos—Woodland Sallie) to champion Black Dufferin (champion Brant—Bonita), March 24.

Lady Aberdeen—Black Dufferin. Tyson & Hall's (Woodstock, Ont.) cocker spaniel bitch Lady Aberdeen (——— —Sallie Hamilton) to Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), March 20.

Marguerita—Black Dufferin. J. G. Jorgensen's (Woodstock, Ont.) cocker spaniel bitch Marguerita (champion Black Duke—Lady Nell) to Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), March 19.

——— —*Black Duke.* Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch ——— (champion Black Pete—Black Duchess) to their champion Black Duke (champion Obo II.—Woodland Queen), March 18.

Montie—Black Duke. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch Montie (Bobo Obo—Lady Stanley) to their champion Black Duke (champion Obo II.—Woodland Queen), March 14.

Elfreda—Black Duke. C. G. Browning's (Worcester, Mass.) cocker spaniel bitch Elfreda (Cherry Boy—Spaight) to Luckwell & Douglas's champion Black Duke (champion Obo II.—Woodland Queen), March 7.

Woodland Belle—Black Duke. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch Woodland Belle (champion Black Dufferin—Jealously) to their champion Black Duke (champion Obo II.—Woodland Queen), March 6.

Judee—Black Duke. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch Judee (champion Doc—Smutty) to their champion Black Duke (champion Obo II.—Woodland Queen), Feb. 29.

Dora—Black Duke. W. B. Palmer's (Woodstock, Ont.) cocker spaniel bitch (champion Brant—Bonita) to Luckwell & Douglas's champion Black Duke (champion Obo II.—Woodland Queen), Feb. 28.

Woodland Susie—Black Dufferin. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch Woodland Susie (champion Obo II.—Woodland Queen) to their champion Black Dufferin (champion Brant—Bonita), Feb. 23.

King Pharo's Sister—Black Dufferin. Luckwell & Douglas's (Woodstock, Ont.) cocker spaniel bitch King Pharo's Sister (champion Obo II.—Woodland Queen) to their champion Black Dufferin (champion Brant—Bonita), Feb. 20.

Miss Brant—Black Duke. L. Farewell's (Toronto, Ont.) cocker spaniel bitch Miss Brant (champion Brant—Daisy) to Luckwell & Douglas's champion Black Duke (champion Obo II.—Woodland Queen), Jan. 26.

Rosedale Jet—Black Dufferin. J. F. Kirk's (Toronto, Ont.) cocker spaniel bitch Rosedale Jet (champion Obo II.—Shadow) to Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), Jan. 24.

Little Lady—Black Dufferin. John Hopf's (Woodstock, Ont.) cocker spaniel bitch Little Lady (champion Black Duke—Little Nell) so Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), Dec. 14.

——— —*Black Dufferin.* Chas. Searl's (Hamilton, Ont.) cocker spaniel bitch ——— (Bob Obo—Searl's Gipsey) to Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), Jan. 3.

Petrel IV.—Forest Tatton. A. E. Davis's English setter bitch Petrel IV. to his Fore-t Tatton, Feb. 20.

Duke's Lass—Lord Graphic. H. N. Howell's pointer bitch Duke's Lass to Dr. Daniel's Lord Graphic, Feb. 5.

Vixen—Blemton Shiner. Mrs. D. Shannon's (San Francisco, Cal.) fox-terrier bitch Vixen (Scarsdale—Delta) to J. B. Martin's Blemton Shiner (Blemton Rubicon—Blemton Brilliant), March 4.

Flora—Republican. D. Lyman's (Los Angeles county, Cal.) St. Bernard bitch Flora to J. B. Martin's Republican (Duke of Wellington—Restless), March 1.

Lady Bess—Jerry Jarvis. F. L. Abbey's (Detroit, Mich.) Irish setter bitch Lady Bess (champion Tim—Lady Flora) to Seminole Kennels' Jerry Jarvis (Elcho, Jr.—Maid), March 14.

Elizabeth—Hundesport Bergmann. C. F. Gentz, Jr.'s (Grand Rapids, Mich.) dachshund bitch Elizabeth (Spur—Waldine) to W. Loeffler's Hundesport Bergmann (Hundesport Waldmann—Hundesport Annemieri), March 9.

Lina L.—Hundesport Bergmann. C. F. Gentz, Jr.'s (Grand Rapids, Mich.) dachshund bitch Lina L (Waldmann II.—Crawl) to W. Loeffler's Hundesport Bergmann (Hundesport Waldmann—Hundesport Annemieri), March 9.

Lady Desmond—Eberhart's Cashier. R. Graham's (Mexico, Mo.) pug bitch Lady Desmond (Spokane—Lulla Rookb) to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), March 15.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Rustic Katti. Geo. W. Wambach's (Baltimore, Md.) pug bitch Rustic Katti (Rustic King—Tra-la-la), March 8, seven (four dogs), by his Lord Baltimore (champion Kash—Nun Nicer).

Gundred. Mrs. J. M. Nicholson's (Albany, N.Y.) rough St. Bernard bitch Gundred (Baron Cardiff—Cameo), March 3, ten (two dogs), by E. B. Sears's Sir Bedivere.

SALES.

☞ **Prepared Blanks sent free on application.**

Carrollton Shot. White, black and ticked pointer dog, whelped Aug. 25, 1891, by Black Duke out of Carroll Queen Ann, by J. F. Pantier, Carrollton, Mo., to Easterbrook & Converse, Fitchburg, Mass.

Troy. Orange and white markings rough St. Bernard dog, whelped June 7, 1891, by Bruce out of Lady Gay, by Mrs. J. M. Nicholson, Albany, N. Y., to Mrs. F. W. Baetzel, Rochester, N. Y.

Grover Cleveland. Buff and white, black shadings, St. Bernard dog, whelped July 8, 1890, by Marco out of Bell M., by Geo. L. V. Tyler, Newtonville, Mass., to J. A. Barry, Roseland, Ill.

Lord Cedric. Liver and white ticked cocker spaniel dog, by G. L. V. Tyler, Newtonville, Mass., to Dr. C. H. Harwood, Salem, Mass.

Ben—Merry T. whelp. Black cocker spaniel bitch, whelped Aug. 15, 1891, by G. L. V. Tyler, Newtonville, Mass., to S. Guillian, same place.

PRESENTATIONS.

Ben—Merry T. whelps. Black cocker spaniel bitches, whelped Aug. 15, 1891, by G. L. V. Tyler, Newtonville, Mass., one each to F. B. Stafford, Faneuil, Mass., and A. Sydney, Boston, Mass.

ANSWERS TO CORRESPONDENTS.

CONSTANT READER.—Please inform me what to do to my Irish setter. It has got something growing on the bottom lip inside near the gum. It is like a mushroom. Ans. Remove the growth and cauterize with a red hot iron.

H. S. T., Manchester, N. H.—I have a pointer pup, 6 months old, and his under eyelids droop very bad. Is there any help for them? Ans. Cauterize in lines running parallel with the eyelid. This must be done by a competent person.

Answers to queries by the following have been forwarded by mail: H. J. McD., Lowell, Mass.; C. S. V., New York city; H. L. T., Philadelphia, Pa.; F. H., Meriden, Conn.; J. H., Raton, New Mexico; J. W. E., Baltimore, Md.; J. W. F., Rockland, N. Y.

BEACH GROVE.—What shall I do for my dog who has canker of the ear. Is about one and a half years old. Ans. Syringe the ears out daily with warm water and then dry. Pour a little of the following lotion in twice a day: Liquor plumti sub. acet 3drs., water 3ozs. Warm the lotion first.

J. H. W.—My dog has an encysted tumor under tongue, about the size and shape of a hen's egg. What treatment would you advise? Ans. It is more likely to be a cyst than an encysted tumor. If the former open and allow the contents to escape, keep the wound open for a few days. If the latter have it removed.

G. R., Naples, N. Y.—Please give me pedigree of the pointer bitch Telie Doe (10,134), also pointer dog Brash, don't know its number. Ans. Telie Doe, by champion Fritz out of Virginia. Brash is not registered; probably you mean Brake, by Bang Bang out of Jane, by Sensation out of Heath's Lill.

G. H. L., Amherst, Mass.—Can you give me the pedigree of the pointer dog Diplomat? As far as I can find he is by Donald II. out of Nellie II. Ans. Diplomat is not registered in either studbook. Donald II. was by Moore's Donald out of Devonshire Lass, by Don out of Lady, both imported from Lord Dartmouth's Kennels. Donald was by Bob (Hamlet Pearl) out of Sappho. We find no mention of Nellie II., but there is a Nell II., bred by the person who owned Donald II., and perhaps it is the bitch you mean. Nell II. by Graphic (Leach's Bonus Sancho—Fursdon's Juno) out of Clover, by champion King Bow out of Saunder's Old Dot.

X. Y. Z.—I have a Gordon bitch that takes a peculiar delight in rolling her shoulders on the dead bodies of various fowls and fishes lying in our streets. The more malodorous the substance the greater the ecstacy appears. Will you suggest a remedy? as neither sharp words nor the whip make any impression on her. Ans. Plenty of whip the only remedy.

J. R., JR., Brooklyn, N. Y.—Will you kindly give me a description of a Boston terrier and tell me if it is a distinct breed of terrier? Ans. Write to W. A. Powers, 226 Washington street, Boston, Mass., for the standard. The organizers of the Boston Terrier Club claim that it is, but it has not yet been recognized by the American Kennel Club. It is the old bull and terrier mongrel, but smart dogs nevertheless and capital companions.

A. C. U., Marblehead, Mass.—Please tell me in your paper what I can do to heal my dog's tail, which has been cut or jammed, just the tip, and I have been advised to touch it with a hot iron. Would that do it good? Also, would this dog be debarred from the show ring on account of loss of tip of the tail? Ans. Tie it up with a rag on which put some Friar's Balsam. The loss of the tip of tail will not disqualify, and should only affect it in close competition.

S. P. M. T., Philadelphia, Pa.—Could you let me know where I could procure a dachshund puppy? None of the local dog stores seem to keep them and I never saw any advertised. Also, what book is there that gives an account of them, training, etc. Ans. It is not in our province to give information where dogs can be purchased. If you state your wants in our business columns you would soon be able to find a dachshund. Vero Shaw's "Book of the Dog" treats exhaustively of the dachshund. We can supply it.

G. D. B. D., Philadelphia, Pa.—1. Can you give me the pedigree of Eaton Tippler; also of Olive Tart and of B[illegible]? These dogs were bred by the Messrs. Rutherfurd, I think. 2. Also can you tell me where I can get a bronze medal of D'Orsay as issued by the German Fox-terrier Club? Ans. They are not registered, though they may be in the new book that comes out next month. The Messrs. Rutherfurd, 66 Liberty street, New York, could no doubt give you the particulars. 2. Write to Mr. George Raper, care FOREST AND STREAM.

C. E. C., San Francisco, Cal.—My red Irish setter dog, eight months old, has, I think, a bad case of bleeding piles. I have kept him muzzled and have taken him to a veterinary surgeon, but he gets no better. Can you tell me what to do for him? Ans. I presume the piles are external. Gives the following powders: Sulphate of magnesia, 2drs.; sulphur precipitated, 1dr.; bitartarate of potash, 1dr.; mix and make twelve powders. Give one twice a day mixed with the food. Bathe the piles twice a day with solution of sulphate iron (one part of iron to ten of water) and afterward apply the following ointment: Powdered galls, 2scrs.; powdered opium, 5grs.; subacetat of lead ointment, 1scr.; simple ointment, 2scrs.

A. H. B.—I have a pointer dog that seems perfectly well in every respect, but during the winter has continued shedding his coat, and during the last week or two in greatly increased quantities, much more, I think, than I ever before saw. His hair is very dense. As he is a household pet as well as a good field dog, it makes it very unpleasant for me. He is young (2 years). Is there any possible cause for the trouble or any remedy? Ans. Wash the dog twice a week in a bath composed of 1 ounce of Squibb's solution of coal tar to a gallon of water. Treat for worms, and then give the following mixture: Arsenious acid, ½ grain; acid hydrocloric, 15 minims; tr. ferri sesquichlor., ʒiv; water, 4 ounces. Give one teaspoonful two or three times a day.

C. L., Utica, N. Y.—What is the meaning of the challenge class at a dog show, also what is the meaning of the reserve prize and vhc.? Ans. The challenge class is for dogs that have won four first prizes in the open classes at shows held under the rules of the American Kennel Club, counting up to 12 P.M. of the day preceding the closing of entries of the show in which it is to be exhibited. Vhc. reserve is given by the judge when there is more than one vhc. awarded in the regular classes, so that if there are, say, three prizes and the third prize winner is afterward disqualified the reserve dog moves up into third place. Vhc. means very highly commended, but not quite good enough to get into the money; hc. means highly commended and c. commended.

E. C. J. K., Brooklyn, N. Y.—1. What would be advisable to use for a bleeding tail? My pointer knocks his heavy tail against objects in the way, in consequence his tail is bleeding at the end. 2. Would you tell me whether a written pedigree without stamp is good? 3. When I bought the pointer Mark Antony I was given the inclosed pedigree. Is this one correct? If so, how can I get a stamped or authorized one? If it is not correct what should I do? Ans. 1. Put some Friar's balsam on a rag and tie the rag securely round the end of the dog's tail, renewing the dressing every day till well; then when healed up apply vaseline till the hair grows in again. See that the dog is not kenneled in too cramped quarters. 2 and 3. On referring to the A. K. C. S. B. we find that the pedigree as given of Mark Antony (10,057) is quite correct. Pedigrees are not stamped, but you can procure a certified copy of the pedigree by applying to the secretary of the A. K. C., 44 Broadway, New York, and inclosing a fee of 50 cents. We are always willing to answer any question pertaining to dogs or their management in this column.

J. D., Augusta, Me.—I have a black and white setter dog three years old. I find he is laboring under the same disease he contracted when a puppy. I may here mention that the dam had an open wound on the occiput which we called mange. The puppies, I think, derived the disease from the dam. The hinder parts of my dog have big red blotches here and there and on the inner parts of both hind legs. The hide on the parts affected is red, very hot and scaly. External application of linseed oil and sulphur made into a paste has been given with good results, but the malady always breaks out again when the application is discontinued. Ans. Try the following: Kerosene 10oz., oil of tar 4oz., sperm oil 20oz. Mix together and spread all over the dog every other day for a fortnight, then wash off and repeat in a few days. Treat for worms and give following medicine:

Sulphate of magnesia	ʒss.
Carbonate of magnesia	ʒii.
Bicarbonate of soda	ʒi.
Liq. sodæ arsenitis	ʒi.
Aq. ad	ʒvi.

Mix. Give one tablespoonful twice a day.

Yachting.

SAILING LENGTH.

Sailing length, commonly called "corrected length," is obtained by adding together the length on waterline and the square root of the sail area, and dividing the sum by 2, the result being in lineal feet. In this method of measurement, adopted by the Seawanhaka Corinthian Y. C. in 1884, and since known as the "Seawanhaka rule," the sail area is measured from the spars; club topsails not being included. The principal clubs now using the Seawanhaka rule are the Seawanhaka Corinthian, New York, Larchmont, Atlantic, Eastern, Beverly, Hull, Massachusetts, Philadelphia, Riverside, American, Knickerbocker, Royal Canadian, Royal Hamilton, Queen City, Oswego, Rochester, Marine and Field, Corinthian of New York, Marblehead, Philadelphia, and Corinthian Navy and Corinthian Mosquito Fleet. The full details of the rule were published in the FOREST AND STREAM of Feb. 25, 1892.

RATING.

The rating of a yacht is obtained by multiplying the length on waterline by the sail area, and dividing the product by the constant number 6,000, the result being a measurement in cubical units approximating to the old Thames tonnage. In this method of measurement, adopted by the Yacht Racing Association in 1887, the sail area is calculated from the drawing of the sail plan, such topsails, working, sprit or club, as are carried being included in the measurement. The established rating classes and the varying proportions of length and sail found in practice, are as follows:

½-rating.....16ft. l.w.l.×133 sq. ft. sail to 17ft. l.w.l.×178 sq. ft. sail.
1 rating.....18ft. l.w.l.×333 sq. ft. sail to 20ft. l.w.l.×300 sq. ft. sail
2½-rating.....25ft. l.w.l.×600 sq. ft. sail to 28ft. l.w.l.×536 sq. ft. sail.
5-rating.....28ft. l.w.l.×1071 sq. ft. sail to 33ft. l.w.l.×909 sq. ft. sail.
10-rating.....34ft. l.w.l.×1765sq. ft. sail to 36ft. l.w.l.×1666sq. ft. sail.
20-rating.....45.5 l.w.l.×2637sq. ft. sail to 46.5 l.w.l.×2580sq. ft. sail.
40 rating.....59ft. l.w.l.×4067sq. ft.
60-rating.....64ft. l.w.l.×5625sq. ft. sail to 68ft. l.w.l.×5294sq. ft. sail.

The rating rule is used exclusively in Great Britain, but is used in America by only one club, the Royal Nova Scotia Yacht Squadron, of Halifax, N. S.

CLASSIFICATION.

In America yachts are classed by some clubs by their waterline lengths alone; in others by their sailing length.

In Great Britain all yachts are classed by their rating, and not by waterline.

FIXTURES.

APRIL.

7. Savin Hill, Mosquito Boats.

MAY.

28-31. Oswego, Cruise, Gt. Sodus.
30. Larchmont, Special, Larchm't
30. Corinthian Mosquito Fleet.

JUNE.

1. Monatiquot, Opening.
4. Philadelphia, Ann., Del. River
4. Larchmont, Spring, Larchm't.
9. New York, Ann., New York.
11. Marine & Field, Ann., N. Y.
13. Pavonia, Ann., Communipaw.
17. Hull, Class 4, 5, 6, Hull.
18. Dorchester, Dorchester.
18. Corinthian, 21ft. Class, Marblehead.
18. Savin Hill, 1st Cham.
22. Rhode Island, Ann. Regatta and Ladies' Day.
25. Chelsea.
25. Indian Harbor, Open sweep, Greenwich.

3. Larchmont, Fall, Larchmont.
5. Corinthian, Marblehead.
5. N.Y.Y.R.A., Ann., New York.
24. Chelsea.

THE remarks on designing which we quote elsewhere from the *Model Yachtsman* are worth the attention of all who are interested in the subject. In each of the several points touched on, they are closely in accord with the view of the subject taken by Mr. Stephens in his recent lecture.

THE DUTCH BOEIER, ELIZABETH.

PLEASURE craft are, of course, common enough in Holland, the land of boats, and on the deeper and more extended stretches of water about Amsterdam and Rotterdam the latest types of modern craft are to be found; our readers may remember the accounts published in 1889 of several races in which a centerboard sloop designed by Mr. A. Cary Smith competed successfully with three keel boats designed and built by Mr. Will Fife, Jr., as well as with several native craft. For the major part of the Dutch waters, however, made up of lakes, canals and small streams, narrow and shoal, with the wind broken by dykes, trees and buildings, the favorite type of yacht is the "boeier," whose lines we are enabled to present through the kindness of Mr. J. J. Classen, of Amsterdam, a Dutch yachtsman. The Elizabeth, designed by Mr. L. Van Breen and owned by Mr. P. Alkink, Jr., was built at Amsterdam in 1886 and may be considered a representative boat, having won many prizes in all weathers and being one of the fastest of her class. Through their exceedingly light draft and flat floor they can penetrate to points entirely inaccessible to any sort of sloop or cutter; they are specially fitted for the narrow waterways through the absence of overhang and through their easy turning, due to the flat floor and the leeboards; in working to windward they are kept going until the boomkin is fairly against the bank, when they are put about instantly as though on a pivot, being away long before the ordinary yacht would be well about, and having saved an appreciable stretch to windward in the operation. In deep and open waters they are not so fast as the sloop or cutter, but in their own narrow waters they are faster, especially to windward. In a short sea they naturally go some heavy thumping and are built very strong to stand such work, the bows being filled in almost solid; but they are very dry through the full bows and the high freeboard.

SAIL PLAN.

The original boats were flat-floored, but the newer ones are somewhat sharper, taking more ballast and proving stiffer and faster. The sail plans are high and narrow, allowing them to catch the wind over the houses and treetops; and they will spin along at a good speed when the sloop lies becalmed. They are very easily handled, and the larger carry but two paid hands, six men being carried for racing. The main and staysail is the almost universal rig, an iron boomkin serving for a larger staysail at times. The mast is hung in a tabernacle, its heel being loaded with lead, so that it may be readily lowered and set up again for a bridge. They are built of white oak, with decks of pine, fastened entirely with copper and with all deck work of polished steel. The topsides are varnished, and being of selected oak, without knots or checks, the effect is very pleasing. The class limits are quite close, and the boats in each class sail mostly without time allowance, while as they are nearly on a par in the matter of speed, the finishes are very close, only a few seconds separating them as a rule. The winning is mainly a matter of handling, and such our building as kills one class and brings in another every year is unknown. For cruising, a purpose for which they are largely used, they offer excellent accommodations, as may be seen from the design. In racing a spinaker is carried, and also a large jib for reaching, the latter set on a movable bowsprit. The booms are so high, owing to the height of the cabin house, that water sails are used to advantage. Occasionally a small topsail is carried. The cost of a boeier such as the Elizabeth, of 10 metres l.w.l., built of first-class materials, copper fastened, and with full inventory, sails, etc., is from $2,000 to $3,000. The blue print from which our reproduction was made is to a scale of 1-20 meter, and the actual dimensions of the yacht in feet are given in the following table; but for the purpose of a closer comparison with American yachts, we have added a scale of ½in. to the foot, reduced proportionately in the cut, which makes the load waterline just under 40ft. The displacement and position of the center of buoyancy have been computed to this scale:

Length, over all	36ft. 1in.	43ft. 2in.
L.W.L.	32ft. 10in.	39ft. 3in.
Beam, external	13ft. 5½in.	16ft.
L.W.L.	12ft. 9in.	15ft. 2½in.
Freeboard, least	3ft. 7in.	4ft. 3in.
Draft, extreme	2ft. 8½in.	3ft. 1½in.
Displacement, long tons	10.2	17.7
L.W.L. plane area, sq. ft		204ft. in.
Lateral plane " "		118ft. 2in.
Midship section " "		24ft.
from stem	12ft. 9½in.	15ft. 4½in.
Center of buoyancy, from stem		15ft. 8in.
Mast, from stem	10ft. 2in.	13ft. 3in.
at deck	11in.	1ft. 2in.
deck to hounds	39ft. 4in.	47ft. 6in.
Boom	26ft. 3in.	31ft. 6in.
Gaff	13ft. 2in.	15ft. 9in.
Boomkin	5ft. 5in.	6ft. 6in.

The yacht has a large cabin, with over 6ft. headroom, with berths for four. On the starboard side of the companion is a lavatory, and on the port side a watercloset. The cabin is handsomely upholstered. The forecastle accommodates two men. The cockpit is very roomy. A characteristic feature of the boeier, in common with other Dutch craft, is the side or leeboard, shown in the drawing, a heavy oak plank fitted on a pivot, and with a line by which it may be tricked up alongside the gunwale, or, for sailing to windward, dropped into the position shown. One of these leeboards is fitted on each side of the yacht. Not only is it very effective in giving lateral resistance, but the boat turns on it in a way that is essential in the narrow canals and streams.

SMALL BOAT CONSTRUCTION.

THE greatest development in yachting within recent years has been in the direction of light and elaborate construction, the old methods having been completely replaced by the neatest cabinet work and the most careful planning of all parts. The construction is one of the most important points in all the new 21-footers, each designer striving to attain more strength with less weight than his competitors. We quote from the *Field* the following description of a new yacht building at Kingtown, Ireland, in which the construction is fully up to the times:

"James Doyle, the well-known builder of the Wee Pet, and in later years of the Gironette and Ruy Blas, and a host of small racing craft, has received an order to construct a 1-rater, by W. Fife & Son, for Mr. T. C. Barrows. Certainly the Nansheen, as a modern racing machine, will in every way be 'up to date.' The dimensions are 20ft. by 6ft. 6in., the keel being of elm, as well as the keelsons (American and English), the stem, mudship keel and after rake, all one curve, of oak with angle steel floors, all the bent timbers being of American elm. The planking will be entirely of the very finest seasoned cedar (secured to the framing in a most novel manner) of ¾in. in thickness, a circular hollow being squeezed into each edge of the plank, after being steamed and set round, and three plies of threads of ordinary cotton wick put into the hollow, the edge of the planking and cotton being then varnished, and then set up quite close to the planking, which will be wrought in one whole length, and beveled to shape, same as in clincher work. The covering boards will be of American rock elm, the deck being of ⅜in. cedar. The centerboard (if one can use the expression) will be a galvanized steel plate, holed in the upper edge to give lightness; and holed and loaded with lead on the bottom segment to secure the required weight; this being worked by a patent brass and steel windlass, the plate working in a mahogany and cedar casing, fastened with copper bolts, these having brass screw heads. She will have a lead keel. The rudder will be a steel plate, also galvanized, and protrude like a New Zealander's paddle, working in a steel socket. The entire fittings, like this newest of Fife's ideas, will be equally up to date. The outside planking of cedar, be will scraped and sandpapered and then coated with four coverings of varnish. The rigging plan will be that of a sloop, the boat having no bowsprit, the forestay being inside the stem head, the mainsail being of unusual area; all the spars being of white pine. The Nansheen will present a most novel appearance, the stem and fore portion of the keel being out of water, and the after part as well."

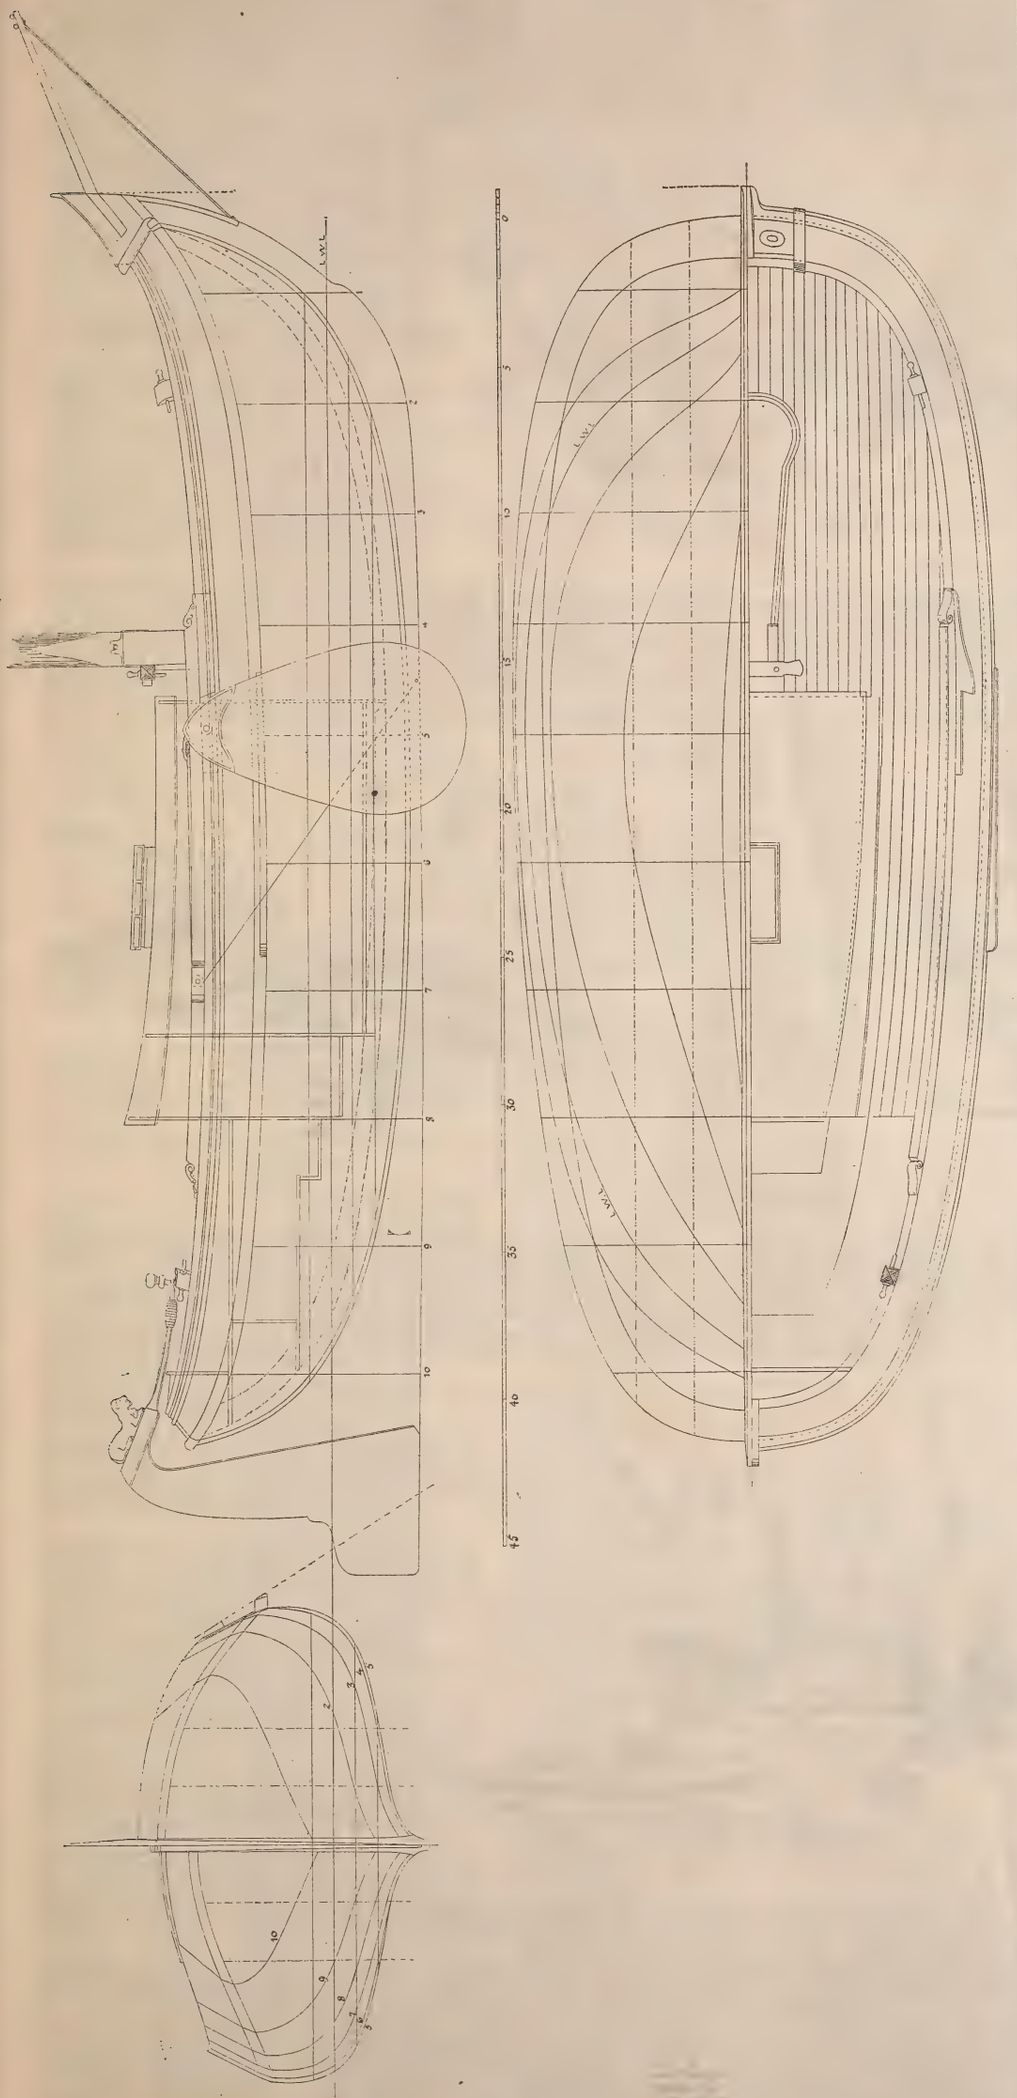
NEW 21-FOOTERS.

AT Newburyport Mr. Wm. Bowen is building two 21-footers for the new class, both centerboarders. One is for Mr. D. B. Pierce, owner of the old racer Hazard. She will be 33ft. over all, 19ft. 6in. l.w.l., 11ft. 4in. beam, 1ft. 6in. draft, 1ft. 5in. freeboard, fore overhang 4ft., after overhang 6ft. 6in. The spars will be: Mast 37ft. 5in., bowsprit 15ft. outboard, boom 33ft., gaff 23ft.

The other 21-footer will be for Mr. J. S. Poyen, of the Corinthian Y. C., of Marblehead, of similar model and dimensions. Another new yacht at the yard is a racing dory for Mr. Frank Howland, 20ft. over all, 16ft. l.w.l., 6ft. 6in. beam, and 2ft. 6in. deep. Mr. Bowen has also in hand a yacht for Mr. Geo. W. Rodigrass, to be 20ft. over all, 15ft. l.w.l and 8ft. 6in. beam; and also a cruising yacht for Mr. J. Bishop, to be 32ft. over all, 26ft l.w.l., 12ft. beam, 3ft. 6in. depth. Mr. Bowen has also rebuilt the sloop Gleam, built by him a year ago for Mr. P. J. Lowell, raising her side 6in.

NEWS NOTES.

Model yachting promises to have a lively season both in Brooklyn and Philadelphia. In the latter city the P. M. Y. C. has already opened its season with a sail on March 26. The full fixtures are as follows: April 2, 36in., New Lake; April 16, 36in. (with C. L. on trial), New Lake; April 30, 24in., New Lake; May 24, 30in. (Bates challenge cup), New Lake; May 21, 36in. (with C. L.), on Delaware; May 28, 36in. (with C. L.), New Lake; May 30, open races, New Lake; June 11, 24in., New Lake; June 25, 30in.; July 4, open races, New Lake; July 9, 36in., New Lake; July 23, 24in., New Lake; Aug. 6, 20in., New Lake; Aug. 20, 36in., New Lake; Sept. 3, 24in., New Lake; Sept. 17, 3.in. (Bates challenge), New Lake; Oct. 1, 36in. (with C. L.), New Lake; Oct. 15, 24in., New Lake; Oct. 29, 20in., New Lake; Nov. 12, 36in., New Lake; Nov. 26, 30in. (Bates challenge), New Lake. Any race to give way to inter-club races. The club will race this year under the Seawanhaka rule. The Cooper's Point C. Y. C. men have taken to model sailing, and their craft are already afloat in the Delaware.



A meeting of the New York Y. C. was held on March 24, at which it was decided to give a sweepstakes race for the 90ft. class of schooners in the fall; the entrance to be $100, forfeit $50. The question of special races for the 25ft. s.l. class and other small classes was discussed, and such races will probably be given. The following members were elected: John H. Davis, Legrand L. Benedict, T. L. Watson, James C. Hayden, James Otis Hoyt, John N. Luning, Arthur G. Earle, Henry Allen, J. B. Smull, Watson B. Dickerman, Peter Townsend Barlow, William Crozier, Duncan Elliott, William A. Parry, W. Mercer Baird, Wendell Goodwin, Frederick Swift, Perry Belmont, John L. Riker, Aug. Hemenway, W. Storrs Wells, R. K. McMurray and David Edson.

A young American who represents himself as the son of Mr. Hereshoff, the yacht builder, is doing a fairly good trade in enlisting the sympathies of English yachtsmen for himself. He seems to have got hold of *Lloyd's Register* and is calling upon all available yachting men, to whom he unfolds a doleful tale that he is stranded hopelessly and is without the necessaries of life until a remittance from America shall set him free. The remittance has been coming for the past six months. Still, yachtsmen who know the young man's tale by heart treat him kindly because they feel there may be some truth in his claim to the parentage mentioned.—*London Cablegram to New York Herald.*

We have received from Messrs. S. Hemmenway & Son, New York, their new catalogue of flags, sails, tents and camping outfits. They make or supply all kinds of canvas and bunting goods used by yachtsmen, canoeists and campers, including large and small sails, rope and cordage, shore and boat tents, awnings and ensigns, burgees, pennants and code signals. They also furnish canoe, boat and yacht brass work, camp stores, chairs and other furniture. They have made a specialty of canoe sails for some years; fitting out many well-known racers.

The factory of the Davis Boat and Oar Co., of Detroit, Mich., is running about 150 men, turning out a fine line of pleasure boats which includes yachts, launches, racing shells, barges, canoes and row and sail boats of all descriptions. This factory is the largest of the kind in the world and the company has succeeded in obtaining the services of many of the most skillful boat builders in the country and they have the best facilities for turning out the high grade work for which this concern is noted.

The new fisherman Mary J. Powers, designed by Stewart & Binney, has turned out a very successful boat, being very fast and a good sea boat. She is the handsomest of the fishing fleet, quite a yacht in appearance.

DUTCH SAILING YACHT (BOEIER) ELIZABETH. DESIGNED BY L. VAN BREEN, ESQ., 1886.

The annual meeting of the Portland Y. C. was held on March 2. The following officers and committees being elected: Com., C. W. Bray; Vice-Com., Walter Woodman; Sec'y, Chas. F. Flagg; Treas., C. T. A. Weber; Meas., J. H. Dyer. Trustees—Com., *ex-officio*; J. H. Boyd, Wm. Senter, B. W. Jones. Membership Committee—C. J. Farrington, E. H. York, J. H. Boyd, Sec'y *ex-officio*. Regatta Committee—Com., *ex-officio*; A. M. Smith, R. S. Rand, W. E. Carter, W. Kirsch. House Committee—W. W. Gould, C. D. Smith.

On March 19 the side-wheel steam yacht Clermont was launched from H. Lawrence's yard, Greenpoint, where she was built for Mr. Alfred Van Santvoord, of the New York Y. C. She is of wood, 160ft. over all, 42ft. beam, and 10ft. 6in. hold. She will have beam engines, by Wm. Fletcher.

Mr. J. Beavor Webb is at work on a design for an auxiliary steam yacht for Mr. Lloyd Phoenix, owner of the schooner Intrepid. The new yacht will be 164ft. over all, 132ft. l.w.l., 27ft. 2in. beam, 18ft. 3in. depth, and 13ft. 6in. draft. She will be rigged as a three-masted schooner, and her engines will be triple-compound, 9, 14½ and 23½in. by 19in. She will be built of steel by Neafie & Levy, of Philadelphia.

The opening cruise of the Rochester Y. C. has been announced for Saturday, May 28, the objective point being Sodus Bay. The fleet of this popular club has been augmented by the purchase of the Burgess sloop Choctaw and by the building of a Fife cutter by members of the club. The coming season promises to be, if possible, more successful than any former one.

The usual Fast Day races of the Savin Hill Y. C. will be sailed on April 7 off the club house, there being two classes, 13 to 15ft. and under 13ft. The club's fixtures for the season are: June 18, first championship; June 30, open race; July 2, first cup race; July 16, race for cash prizes; July 30, second championship; Aug. 13, second cup; Aug. 27, sail off.

The Herreshoffs have received an order for a second 30ft. fin-keel for an anonymous owner, and also for a racer for Buzzard's Bay, a fin-keel 25ft. over all, 16ft. 6in. l.w.l.

Canoeing.

Canvas Canoes and how to Build Them. By Parker B. Field. Price 50 cents. Canoe and Boat Building. By W. P. Stephens. Price $2.00. Canoe Handling. By C. B. Vaux. Price $1. Canoe and Camera. By T. S. Steele. Price 1.50. Four Months in a Sneak-box. By N. H. Bishop. Price $1.50. Canoe and Camp Cookery. By "Seneca." Price $1

WAR CANOES.

Editor Forest and Stream:

In response to the request contained in your issue of the 24th inst. for information as to war canoes built, we beg to inform you that up to the present we have built five, as follows: 35ft.×50in., Ko ko-ko-ho, for Yonkers C. C., 35ft.×50in. for Brown University C. C.; 30ft.×50in. for Orange C. C.; 25ft.×50in. for Red Dragon C. C., 25ft.×50in. for Chicago C. C. The 35-footers had nine and ten, the 30 footer ten and the 25-footers six and eight thwarts. There is plenty of space in the 35-footer for eleven thwarts.

Since we learned last December of Mr. Barney's suggestion to build these craft in sections we have been figuring on the plan. Doubtless the question of transportation has been a serious drawback to clubs contemplating purchasing war canoes, but the difficulty can be overcome by building them as Mr. Barney suggests, viz., in three sections; or a 25ft., 30ft., or even 35ft. canoe can be built in two sections and easily load in an ordinary box car. Probably the two sections only would be preferable as far as convenience in loading, shipping, and joining together is concerned. With the necessarily high thwarts, the bow and stern sections would not stow snugly in the middle piece unless thwarts were made removable, and that is scarcely desirable in a boat of this kind, which sometimes has to undergo hard usage, and with a crew of, say, twelve to fourteen, accompanied by two or three passengers, representing together probably from 2,300lbs. to 2,500lbs., has to be very strongly constructed to make a long lived boat, and the thwarts should be fixtures. But with the latter there would be good room, in shipping, for small canoes, carrying outfits, etc. The objection, however, against the two-section canoe, is that the division would have to be about midships, where she should be specially strong. To make the planking, etc., fit clean in place, and the whole thing watertight and perfect, these divisions will make the first outlay on the canoe considerably higher than for the regular style, but the difference between box and flat car railroad rates would soon more than counterbalance the thing, *i. e.*, if canoe is to be transported over the railroad to meets, races, etc., often. From correspondence received on the subject of war canoes the 30ft.×48in. to 50in. appears to be the proper size at present. This can be made with nine or ten thwarts, two paddlers to each. In the spring of 1890 you published in your columns our design of the 35ft.×50in. war canoe Ko-ko-ko-ho, we believe the first built of its kind in this country.

J. G. FRAZER,
Manager St. Lawrence River S., C. & S. L. Co.

CLAYTON, March 26.

NEWS NOTES.

From all accounts as to building and rigging, the racing of the coming season in the South will produce a considerable amount of interest in the trial of novelties. Short hulls will be tried against long ones, the short hulls having some 6in more beam than the long ones. Sharpie models, or rather models with more or less "sharpie" form in them, will be run with the round and sharp-rising floored craft; and the semicircular, cigar shaped "Nautilus" canoe, which came into existence last season, and which barely reached the end of the "trial period," is to be again put into the racing list should she remain unsold at Easter. The run upon "single sail" plans is undoubted, but we venture to think that the gain will be on the sailmakers' side. A short trial will probably convince many of the men that, to carry the total area allowed, 112sq. ft., in one sail, on a canoe 16ft by 30in., is not conducive to all-round efficiency, though, in a few isolated cases, such as days of light airs, it may turn up trumps in racing against the practical rig of main and mizen.—*Field.*

Judging from the report of the Oxford Sailing Club's race in last week's *Field*, the new sharpie-modeled canoe Battledore is by no means a slow craft, seeing that she beat the canoe-yawls in two races. She was fitted with a sliding deck seat, and to this fact the reporter attributes a considerable portion of her success. Probably such is in fact the case, for from a practical point of view there can be little doubt that the sliding seat produces as great advantage in sail carrying over mere side deck sitting, as such position gains over the in board and below sitting of the crew. The claim that this is the first use of the sliding seat in England is not well founded. The northern men, we are told, have been using sliding seats some time past; and we now find that the rules of the Northern C. C. permit "deck seats to extend beyond the sides of the canoe, not exceeding the canoe's width." If we are not mistaken, also, the sliding deck seat was used in some of the races on the Norfolk Broads last summer.—*Field.*

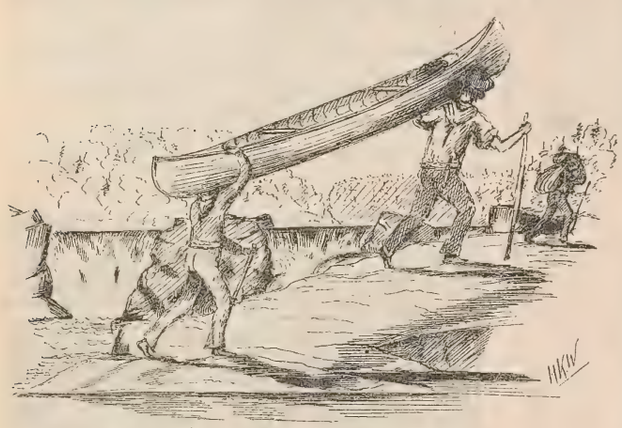
The new catalogue of the Grand Rapids Camp Furniture and Boat Co. contains a very full list of all varieties of small craft, rowboats, canoes, hunting boats, canoe-yawls, steam launches, sneak-boxes, together with sails and outfits. The book is well illustrated, showing a number of handsome models. The company manufactures a special line of camp furniture, including several varieties of a handy and compact tent and bed.

In a race on March 10 at Oxford the canoe Battledore started against three canoe-yawls, finally saving her time through a hard squall, in which she carried her sail better than her rivals. On March 17 another race was sailed, the canoe again winning.

A correspondent asks for information concerning Sebago Lake, Me., as a place for canoe cruising.

A TOUGH TRIP.

EARLY in the summer of 1883 I found myself on the north shore of Lake Superior in connection with the surveys for the Canadian Pacific Railway. I had already been a great part of the preceding summer and winter on the coast, and at this particular time I was deputed to examine the country further inland. A flying survey party was organized and started up the Prairie River, a considerable stream emptying into the lake some eight miles east of Jackfish Bay. Having seen them fairly started I conceived the idea of getting some of the supplies ahead and getting an insight into the character of the country at the same time by ascending the Little Pic, a parallel stream, to the proposed crossing, and thence going back on foot to meet the party.



Descending the Prairie in our canoe—a fine Peterboro—we coasted for some seven or eight miles and soon reached the mouth of the Little Pic and, loading up with a few hundred weight of flour, bacon and miscellanies, we started to ascend the stream. An Indian boy of 18, Louis, occupied the bow; a young half-breed, Paul, paddled amidships, and the writer took the steering paddle. It had been a late, cold spring, and though now well on in June, the river was at its height and pouring a tremendous volume of muddy water into the lake.

The current was steady and strong, but so were my boys' arms, and by creeping along shore and dodging from eddy to eddy we ascended the first three or four miles rapidly and without mishap. A continuous wall of gray granite rock followed us on the west, and to the east was an equally high but less precipitous range gradually approaching the river, these now closed together, and through the canyon between them the river came tearing and roaring over great boulders in a mighty ugly looking rapid. There was a narrow strip of intervale on the right, but so matted with fallen timber that a portage with our heavy loads seemed almost out of the question, and we concluded to try tracking. A long light cotton line was got out and one end fastened to the bow of the canoe. Louis clambered over the boulders with the other until he had stretched its full length. Paul held the canoe until this had been accomplished, and I hovered between the two ready to fend off and give signals. At a sign Paul shoved the canoe gently out into the current, Louis hauled upon the line, and in a few seconds the canoe was floating at his feet. Repeating this operation two or three times, we advanced steadily, if slowly, upward, and were soon in sight of more quiet waters.

TRACKING
"PAY! LOUIS PULL!"

The canoe was trembling in the fierce current behind a great boulder, Louis was gathering in his slack preparatory to taking a fresh pull, when Paul, with the recklessness and impatience begotten from his white father, shoved the canoe out without waiting for the signal. The current caught the bow, and meeting no resistance from the line, swung the canoe broadside on to the boiling current, then as Louis quickly brought a strain upon it she sheered out almost across the stream, keeled over far enough to dump most of her deck load into the torrent and then recovering herself as she swung round, came gently back to her resting place behind the boulder. Luckily we had stowed the heaviest of the stuff in the bottom as ballast, or she would have gone over altogether. Quickly unloading and bailing out the water we started in pursuit of such of our belongings as floated, but such was the swiftness of the current that they got nearly to the mouth of the river before we caught them. We picked up the flour but little damaged, and most of the blankets, but one gun had gone to the bottom and my kit had disappeared somewhere, carrying with it a fine prismatic compass. One side of bacon was also in the river beside the gun and escaped being cooked and eaten, and a large bag of tea was badly wetted.

A Portage Little Pic River

By the time we had struggled back again the day was far spent, and finding a short distance above an impossible fall we went ashore, picked out with some difficulty a level spot sufficiently large to contain our three recumbent forms, and after a frugal meal crawled under our wet blankets and slept with the roar of the cataract in our ears as only tired voyagers can sleep.

Day broke cold and gray with a light fog hanging over the rapids. With no tent to pull down and pack, breakfast was soon despatched and the canoe and its load carried over the rocks to the head of the falls. Afloat once more we found the hills receding from the river which now ran in a steady sweeping current between alder-covered banks of clay and sand, at first low, but gradually rising on either hand until they became great bluffs, 60 to 70ft. high, with the river lapping and eating away their bases, here and there a landslip had occurred, leaving a great streak of yellow between the dark green of the spruces and balsams which clothed the higher part of the slopes.

By noon we had reached the intended crossing and leaving our canoe and most of the stuff we clambered up the steep bank, and with a light load each started upon our search for the camp. It was terribly hot upon the hills and the black flies were out in tremendous force, but the country was for the most part fairly open and the walking good, so we pushed on merrily enough, following a stream valley toward a depression in the hills to the west which appeared to afford the most desirable approach to the river. Proceeding four or five miles we came across fresh blazes and axe marks, which we rightly conjectured to be the mark of the packers attached to the party cutting trail in advance, and following these up we emerged at sundown upon the shores of a small lake, upon the opposite shores of which we could see the gleam of white tents and hear the cook chopping wood for the morning's fire. This was luck, eight or ten miles across country in an afternoon and exactly in the right direction. A loud hail soon brought over our smallest canoe, and by dark we were relating our adventures in English and Ojibbeway to our comrades.

Two or three days were spent in camp exploring the country in the immediate neighborhood and directing the movements of the party, and then bad weather set in; for forty-eight hours we had such an incessant downpour of rain as must have preceded Noah's deluge. The cook had the greatest difficulty in keeping his fire going and the camp was flooded. Work out of doors was out of the question, and piling our blankets and effects on islands of logs and brush, we of the engineering staff played whist from morning till night for tobacco. A couple of the younger members were nearly bankrupted in consequence, and had the weather not cleared off on the third day their store accounts would have exceeded their pay for the month, but everything has an end; on the third morning the sun came out bright and strong, and our enemies, the black flies, who had been beaten down and demoralized by the rain, were soon in stronger force and hungrier than ever.

There was plain sailing ahead for the party for several miles, and my presence was of little use, and I concluded to put in the intervening time by exploring the Little Pic still higher up, the high water in the river affording a splendid opportunity. So taking my two dusky satellites again we retraced our steps to the river and with a very meagre outfit embarked in our canoe again and turned her bow against the stream. A huge landslip had almost blocked it up with trees and debris a couple of miles above, but dodging sometimes under, sometimes around the roots and anon hauling across a tree trunk we managed in half an hour's hard work to get past, and proceeded up stream, ever struggling against the sweeping current and dodging from bank to bank to take advantage of the smallest eddy at slack water. The clay banks rose higher and higher on either hand, but toward evening we heard a distant roar coming nearer, and rounding a bend we floated in a foam-flecked basin, into which poured a great cataract over a rocky ledge. At the head of the portage was the only piece of dry and level ground we had met with in ten miles, and we gladly availed ourselves of the opportunity to sleep in comfort.

Off again in the early morning our progress was a repetition of the previous day's work, with a variation in exploring the course of a tributary stream for a mile or two, but toward afternoon we came to a fork where two equal streams met, one coming from the north, muddy and white as below, and the other from the west, red brown and comparatively clear. We chose the latter as more likely to bring us to some rocky hill or large lake where we could get a more extended view of the country round us, and evening coming on we went ashore for the night.

The day had been warm and windless and the black flies and mosquitoes had punished us severely, white man and red alike, but the black fly is something of a gentleman after all, and goes to bed at night and after dark we had as much comfort as was possible with our sore and raw necks until day dawned.

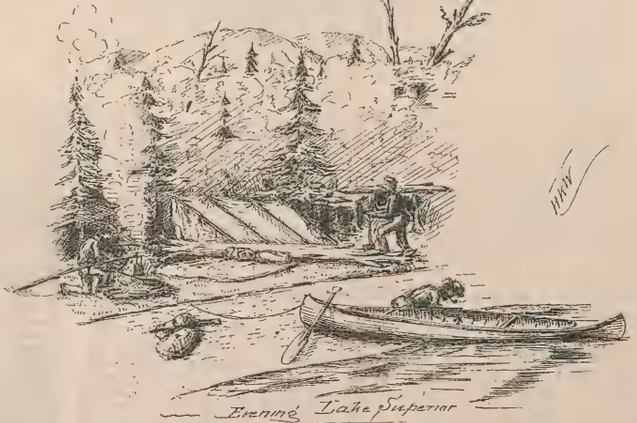
In the middle of June in latitude 49 and a fraction, the hours of darkness are very short and we were driven afloat again at 4 A. M. A few minutes paddling brought us to a small rapid which we ascended without difficulty, and a half hour later reached a wilder one. A portage was necessary, and leaving Louis and Paul to bring on the canoe I landed with the axe and proceeded to clear out the almost obliterated trail, and was cutting a final log in two at the head of the portage when a twig caught the blade of the axe, and deflecting it it came down across my foot, protected only by a light deerskin moccassin. A great red gash appeared across it, and the black flies had a noble feast without the trouble of biting and boring. Louis and Paul dropped the canoe and came forward anxiously, but after a minute's faintness I felt all right again and proceeded to examine the injury as well as we could. The toes did not appear to be completely severed, and the big one and the next I could still move; the bleeding was not excessive. We had no surgical appliances, however, and judged it better to leave the moccassin on to hold the fragment together, and considering our distance from camp and the impossibility of taking my share of the work it seemed unavoidable that we should abandon the expedition and return. So with a regretful look at the bright river coming from the great white patch of "unexplored" territory on the map, I turned and hobbled back to the foot of the portage.

The work of dropping down with the current was comparatively easy, and resigning my steering paddle to Louis, who had the steadiest head of the two, I stretched myself in the center of the canoe with my feet on the gunwale. In ten minutes we had entered the small rapid above our camp in one more we were broadside on to a sunken log, and in a fraction of a second I was swimming ashore with only one foot in operation and dragging the canoe after me. Blankets and provisions were rescued, but the latter were soaked, and axe, frying-pan and kettle were gone for good. No use crying over spilt milk, and we were soon afloat again. The canoe was, fortunately, uninjured, and it was comforting to reflect that unless Louis missed the next portage and shot us over the falls there was little chance of our coming to grief between our present position and the "cache." Thus he avoided, and in two hours I was toiling painfully over it. The cut had closed in the meantime, and was very painful until the exercise had opened it again and the bleeding commenced afresh.

Off again below the falls, and weak from loss of blood, I sank into a half doze, lulled by the dip of the paddles and the hum of insects. The Indians, worried by the flies, plied their paddles vigorously in the effort to create a current of air and leave the pests behind, and aided by the swift current we swept down the stream at the rate of seven or eight miles an hour, and before they suspected the proximity of the cache we had passed it unnoticed and were a mile lower down. To go back meant another night of misery on the banks from the attention of the flies, and I doubted my ability to walk into camp, where even if I reached it I would only be a care and nuisance for a week at least. So with a sigh for the provisions which would have afforded us a good supper we paddled on again, and by 5 o'clock had reached the canyon. Another agonizing scramble and we were afloat again with the boiling torrent which had wrecked our canoe, and which now, after the rains, was even wilder than before in front of us.

The Indians looked a moment, and with a few hurried words put ashore for another portage, but I would none of it, and bracing myself upright in the center with my sound foot against one thwart and my back against another, I ordered them ashore, and with a sweep of my paddle shot out into the stream broadside on, another sweep with all my strength whirled her head downward, and leaping from surge to surge I swept round the next bend and into the eddy at the foot of the rapid before the two boys had fairly made up their minds as to what I was going to do. They soon came scrambling through the brush, and bending again to their paddles we shot out just as the sun was sinking over the slate islands on to the gently heaving bosom of Lake Superior. A mile along the coast we stopped in a beautiful little cove with a sandy beach, "where the black fly ceased from troubling."

We were ravenously hungry, and the only thing in the way of food remaining to us was a little wet flour, but my boys were equal to the occasion which was exactly of the kind which brings out the best qualities of the Indian race—patience and endurance. Axe we had none to cut wood or brush, but sufficient driftwood was soon collected for a fire. I had saved a couple of matches and with a foretnought which becomes second nature after long sojourns in the wilderness, had dried these in the sun immediately after the upset of the morning. One of these was amply sufficient in an Indian's hands, and shortly we had a bright blaze, the wet flour was then kneeded into dough and small pieces of the latter wrapped around bits of sticks which were stuck up in the sand around the fire. In ten minutes we had a fair apology for bread, sufficient to stay our worst cravings. Tea there was none, but tobacco still remained, and after a delicious smoke we stretched out side by side on the sand, and lulled by the gentle lapping of the swell on the beach, slept until the sun was high in air next morning, but as this happens in that latitude at 6 A. M. we could hardly be accused of slothfulness.



SHOOTING THE RAPIDS—
LITTLE PIC CANON

The morning was perfect, the stillness deathlike, and the undulations of the oily surface of the lake almost imperceptible, except where they rose and fell almost noiselessly on an adjacent rocky point. So absolutely breathless was the air that the gnats and dragon flies ventured a mile out from the land and dropped exhausted at last into the lake to meet a common fate. No more perfect day for a long coasting trip such as that before us could have been chosen, and after another meal of hot "bread" we pushed off for our final day's run of twenty-five miles to the Pic River. So steadily did the boys ply their paddles that a little after noon we sighted the sand dunes around the H. B. C. post, and a few minutes after were struggling against the thick brown flood which was pouring out of the river. A few strokes more and the bow of our canoe slid upon the sandy beach and our tough trip was over.

A bountiful, if homely, meal was spread before us, saleratus bread, potatoes, whitefish and cranberries, accompanied by the inevitable hot tea, and an old Indian crone was called in to doctor the wounded foot. On removing the moccassin two toes were found to be almost severed and a third cut to the bone, but so excellent were the remedies applied and so utterly devoid of poison was my circulation after months of constant open air life and persistent drain of blood by the black flies that in three days I could get about a little with crutches and could volunteer as pilot to a party of railway men coasting to Nepigon in a Mackinac boat. In ten days I could walk about with a limp, and in fifteen was ascending the Pic River to rejoin my party. My gratitude is ever due to the kindly little Orkneyman in charge of the post, and to his gentle, pretty, half breed wife.

I have had many a hard trip since then, two narrow escapes from shipwreck, and as many experiences of starvation, besides many a bitter winter's night in an open bivouac amid the snow, but never have I struck a more welcome haven of rest nor kinder hearts than greeted me at the Pic Post. It was an important post then, with an annual brigade of great clumsy "York" boats descending annually from tributary stations inland, but the construction of the railway has afforded new outlets, and its glories have departed, and my friend has gone elsewhere, fleeing from the approach of civilization. May the beaver and marten increase, his Indian customers pay their debts, and his profits be large and promotion rapid, is the earnest wish of the writer.

H. K. W.

ENTRANCE LAKE SUPERIOR

MOHAWK C. C.—Spring has come and with it the paint and varnish brushes have come into use. Several canoes are being overhauled and fitted with new sails. Others are changing hands, and some new boats are expected this spring. The varnish brush will be applied to one 30ft. war canoe which will be in great demand next summer. Several members are making plans for a short cruise down the Hudson, on or about May 30. The following officers have been chosen for 1892: Com., Evert Jones; Vice-Com., Geo. U. Dexter; Sec'y, F. Stevenson; Purser, Geo. H. Rich. There are 25 active members at present of whom 8 or 10 expect to attend the '92 meet.

A. C. A. Membership.—Eastern Division: Howard L. Rogers, F. J. Burrage, Lawrence W. Webster, Boston, Mass. Central Division: L. C. Woodworth, Gouverneur, N. Y.

BOW-FACING OARS.

Editor Forest and Stream:

It is now about thirty-four years since I made the old original Kelpie, and ever since she was stolen from me I have meant to build another canvas canoe. Circumstances have not thus far favored this plan, but just now I have in mind some ideas which I wish to put in practice, and shall try to make a new edition of the Kelpie this season.

I have a decided preference for bow-facing oars for sportsmen's use, and should be glad if some one who has experience of the different sorts would give me the benefit thereof in your columns. The only point I make is that they shall be as light as possible. Those I have in use are, so it seems to me, unnecessarily heavy.

As to the canoe, there are many in market, but of those which I have seen, there are none which exactly suit me. There were some "pints" about my old favorite which I do not expect to see excelled, and which I have seen equalled in no other boat.

By the by, can you tell me what became of the Sairey Gamp?

CENTRAL LAKE, Mich. KELPIE.

[Probably Mr. Rushton can tell of the whereabouts of the Sairey Gamp, she was sent from our office to an exhibition at New Orleans about six years ago.]

Rifle Range and Gallery.

"FOREST AND STREAM" TOURNAMENT

FOR NEW JERSEY RIFLE CLUBS.

Excelsior Rifle Club vs. Miller Rifle Club, shot on Excelsior range, Jersey City, March 21, distance 25yds.:

Heidenreich Rifle Club.

NEW YORK, March 28.—The following scores were made by some of the members at their shoot yesterday at their headquarters, 425 West Fifty-third street:

Ageldinger	235	Horn	234	Busch	219
Dalton	232	Strekel	230	Goodman	217
Winter	224	Dineen	223	Enders	217
Hicks	222				

New Jersey Rifle Shooting.

[*Specially Reported for Forest and Stream.*]

QUITE a number of members of the Hudson Rifle Club, of Marion, are considering the advisability of holding a tournament among themselves. The idea is to have every member who enters fire 1,000 shots, 100 shots a week. It would therefore last a period of ten weeks. It is proposed to charge a small entrance fee and purchase prizes and present them to the first, second and third men at the end of the shoot. Those who have already announced their willingness to enter are Secretary Charles E. Bird, Henry Mahlenbrock, John Rebhan, Thomas A. Reynolds, John Smith, Adolph Matz, A. Braun, Henry Boddey, Jos. Buch and C. Braun, Jr. Among these cracks the affair would be an interesting one. Capt. Henry Hansen, the club's most enthusiastic shooter, would enter but for his being detained by business in Connecticut.

Claus Schroeder, of the Hoboken Schuetzen Corys, defeated James Smyth at Russell & Roedell's rifle range, last Thursday evening by a small margin. Each man fired 50 shots. It was for a gold medal and refreshments for friends of both parties. The scores were:

C Schroeder	235	236	235	230	228	—1164
J Smyth	231	236	234	233	226	—1160

Excelsior Rifle Club, Jersey City, Tuesday, March 22, 10 shots, off-hand, American 25-ring target, possible 250:

W J Channing	25	25	25	25	24	24	24	23	23	—243
Wm Robidoux	25	25	25	25	25	24	23	23	22	—242
L P Hansen	25	25	25	25	24	24	24	23	23	—241
W Weber	25	25	25	24	24	24	23	23	23	—238
C Bauchle	25	25	24	24	24	23	23	23	21	—233
W J Hennessy	25	24	24	24	23	23	22	22	22	—231
C L Pinney	25	25	24	24	23	23	23	22	22	—231
C Boag	25	24	24	24	24	23	23	22	21	—231
T Hughes	25	24	24	24	23	23	22	22	22	—230
Wm H Hallowell	25	25	24	23	23	23	22	21	21	—228

The club intends in a short time to devote most of its time to outdoor shooting, as they have done considerable in past seasons on the 200yds. range.

Miller Rifle Club, Captain Richard W. Dewey, Hoboken, Wednesday, March 23. The scores made to-night in the regular weekly competitions for the several class medals are appended below. The conditions were 10 shots off-hand, 25-ring target, possible 250, first 10 shots fired to count:

First Class.

D Miller	25	25	25	25	24	24	23	23	23	—242
A Meyns	25	25	25	25	24	24	23	23	22	—239
C Judson	25	25	25	25	24	24	24	23	23	—238
E Fischer	25	25	24	24	24	24	23	22	21	—233
W Forkel	25	25	25	24	24	24	23	22	22	—236
L Vogel	25	25	25	25	25	24	23	22	22	—235
L Sohl	25	25	24	24	23	23	23	22	21	—235
Capt R Dewey	25	25	24	24	23	23	23	20	20	—226

First class medal won by David Miller with a score of 242.

Second Class.

J Carragher	25	25	25	24	24	24	23	23	23	—239
J H Kruse	25	25	24	24	23	23	23	24	22	18—230
F Kloepping	25	25	25	24	24	23	23	22	20	18—228
A Thurk	25	25	24	24	23	23	23	20	20	19—225
R Zoch	25	25	24	24	23	22	20	20	18	18—219

Second class medal won by John Carragher with a score of 239.

Third Class.

F Kammel	25	25	25	23	23	23	18	18	18	16—214
H F Meyer	25	24	24	23	23	22	20	18	16	16—212
H Seltenreich	25	25	24	23	22	21	18	18	17	17—210
F Dunsteadt	25	24	23	22	21	21	20	19	17	16—208
H Vanderheyden	25	24	22	22	21	21	20	18	18	17—208

Third class medal won by Frank Hummell with a score of 214.

The club held its regular monthly meeting last night. The tickets for the coming shoot and festival at the Union Hill Schuetzen Park, on Decoration Day, were distributed among the members. It will prove an interesting race between Captain "Dick" Dewey and H. Fred Meyer, for the honor of winning the best of the two medals offered to the two members selling the most tickets for the festival. The Captain has made several wagers, he betting that Fred will not sell 200 tickets. The latter is confident of disposing of 300. The latter received his first hundred ten days ago, and the pile has already dwindled down considerable.

Frank Kammel has become pretty well acquainted among New Jersey rifle shooters, through the FOREST AND STREAM tournament, as the acknowledged A1 enthusiastic "rooter" of the Miller Rifle Club. He asserts that money talks and nothing else.

Capt. Dewey has been renominated as constable in the second ward, Hoboken, by the Democratic convention, although the genial "Dick" is a staunch Republican. He has the Republican nomination also. He has received the congratulations of his many friends, who predict a walkover.

The Palisade Rifle Club's members are incensed at the action of the Jefsen Rifle Club. The latter, after quite an effort by the former, promised to send a committee to the Palisade's headquarters to make arrangements for a ten-men team match, but no committee appeared, and the Palisades are forced to believe that the Jefsens are not anxious to shoot them a ten-men team match, notwithstanding the positive assurances of Capt. William Jefsen to the contrary.

A special feature of the Union Athletic Club's, of Hoboken, handsome and spacious headquarters are the neatly fitted up rifle ranges. The are well patronized by the club's members.

Greenville Rifle Club, Jersey City, March 25.—In the medal competitions first class medal was won by Joe Kaiser with a score of 225; second class medal won by J. Spahn with a score of 235; third class medal won by Purkess with a score of 236.

A ten men team match to take place shortly has been arranged between the Greenville and Hudson rifle clubs.

A committee of four of the Miller Rifle Club attended the funeral of Mrs. Chas. Judson from her late residence, 211 East 107th street, this city, Tuesday afternoon. A handsome floral design accompanied them. Genial Charley Judson, one of the Miller Club's foremost shots, has received much sympathy at the hands of his fellow members through his sad bereavement.

The Palisade Rifle Club, Capt. John Reinhardt, would like to arrange a series of five or ten-men matches with the Lischke Rifle Club, whose excellent scores have lately appeared in FOREST AND STREAM. It seems that the Jefsens are not anxious to arrange a ten-men team match, so the club is considering the advisability of challenging the Greenvilles. The return match with the Hudsons takes place soon. A challenge would also be acceptable from the Puritan Rifle Club, Newark, for a ten-men team match. The club held its regular monthly meeting at headquarters last Thursday evening.

The match for a $25 gold medal and supper for friends of John Havens and Judge George F. Seymour, took place at Thurk's ranges, Hoboken, last Saturday. Each man fired 50 shots:

J R Havens	244	246	242	230	238—1,209
G F Seymour	237	235	240	238	242—1,192

Match between Sergeant Frank Kammel and Fritz Dunsteadt:

F Kammel	215	230	228	210	214	—1 097
F Dunsteadt	220	223	215	205	200	—1,063

The next meeting of the Miller Rifle Club takes place April 6, when business relating to the coming shoot and festival will be discussed.

Ernst August Company, Germania Schuetzen Bund, held a small shoot recently. First and second medals were won by Capt. Forkel, with 70, and Robert Zoch, 69. JAY H. KAY.

New York Revolver and Pistol Club.

NEW YORK, March 19.—The following scores were made by the members of the club at their weekly practice shoot at headquarters, 12 St. Marks place, first five strings of six shots each on Standard American target, distance 20yds., S. & W. revolvers:

H Oehl, .44	53	54	53	49	54	—263
G L Hoffman, .38	51	40	48	44	51	—223
F Hecking, .38	46	44	43	40	38	—211
G E Jantzer, .38	57	51	51	46	49	—254
B Walther, .44	51	40	48	51	51	—242
A Bertrand, .32	38	32	29	41	39	—179

Scores of March 28:

A Stein	241	G L Hoffman	240	F Hecking	228	
H Oehl	255	G E Jantzer	252	W Koch	203	

F. HECKING, Secretary.

The Lischke Rifle Club.

JERSEY CITY HEIGHTS, N. J., March 23.—Scores of the A. Lischke Rifle Club practice shoot, 110ft. distance, 25-ring target:

A Lischke, Capt	25	25	24	24	24	23	22	22	22	—235
J Scharly	25	25	25	24	24	23	23	23	21	19—232
R Reicherz	25	25	24	24	24	24	22	22	21	20—231
O Schulte	25	25	25	25	25	24	22	21	15	11—218
A Paetzold	25	23	23	22	22	21	21	19	18	16—212
H Strater	24	24	22	22	20	19	19	17	17	11—202

Massachusetts Rifle Association.

BOSTON, Mass., March 26.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range today. The attendance of riflemen and pistol shooters was good. Much interest was shown in all the matches and some fine scores were made. Sumner Paine won the bronze and silver pistol medal. Below are the scores made to-day, distance 200yds., standard American targets:

Pistol Medal Match, 50yds.

E E Patridge	94	E H Foote	90
H S Harris	94	G Moore	88
J B Fellows	93	M T Day	85
H D Martin	91		
A G Stevens	82
J B Hobbs	79
D N Winn	75

Bronze and Silver Pistol Medal,

Won on 10 scores of 81 or better by Paine. 85 90 87 89 87 88 87 90 89 88

All-Comers' Off-Hand Match.

W Charles	81	E H Foote	74	A Stillman	70
W C Williams	76	D N Winn	72	O Moore	66
F Daniels	76	F W Chester	70	J B Hobbs	63

All-Comers' Rest Match.

J Francis	112	A H Ballard	100	A Stillman	93
T Warren	108	O Moore	98	H L Willard	90
A W Chester	104	J F White	95	D Martin	89
J French	100				

All-Comers' Military Match.

W J de Loriea	44	C Francis	41	J B Hobbs	40
G H Nason	43	A B Snow	40	S Field	39
M T Day	41				

All-Comers' Pistol Match, 50yds.

W C Williams	87	A Stillman	81	L A Ropes	77
A D Stevens	87	O Moore	80	C Francis	76
L R Avay	84	D N Winn	79		

Chicago Rifle.

CHICAGO, Ill., March 24.—At the last weekly shoot of the Garden City Rifle Club which took place at Geo. McCune's shooting gallery, 146 S. Halsted street last Tuesday evening under the regular conditions, the scores made were as follows, possible 300:

A McBean	274	H S Burley	265	C A Hankle	259
J Hosie	271	Geo McCune	264	Thos Ford	257
J W Gibbs	267	Roy Taylor	262	W J Frisbie	254

It will be seen by the scores made that Mr. McBean again made the highest score, and as he is a new member, the club may well be proud of his excellent shooting. After the regular shoot the boys made up a handsome purse shoot, the winner to take the entire purse. Mr. Ray Taylor showed his good nerve by making the winning score. In the contest between Burley and Hankle, with enough on the side to make it interesting, Burley defeated Hankle with a score of 103 to 105. C. A. HANKLE.

The Jefsens will Meet the Palisades.

JERSEY CITY HEIGHTS, N. J., March 23.—*Editor Forest and Stream:* The Jefsen Rifle Club hereby accepts the challenge of the Palisade Rifle Club, the first match to be shot on the Palisade range on Thursday, March 31, and the second match to be shot on the Jefsen range, and if a tie the third range will be chosen. The match is for five to ten-men teams and for $10 a side and a good time, the loser to pay for all.

JEFSEN RIFLE CLUB, Wm. F. Dilger, Sec'y.

Empire Rifle Club.

NEW YORK, March 23.—The following scores were made by the members of the Empire Rifle Club at their headquarters, 12 St. Mark's place, on the 25-ring target, 100ft.:

W Miller	232	W Fetzer	228	H Fetzer	215
B Zahn	231	J Grimm	226	J Diehl	210
H Zettler	230	Meisenholder	221	G Hillmeyer	201
A Rosenstraus	230	C Zettler, Jr.	216		

The Empire Rifle Club, one of the best organizations in New York, has made special inducements for the coming two months toward securing rifle shots. B. ZAHN, Sec'y.

Zettler Rifle Club.

NEW YORK, March 23.—At the regular weekly gallery shoot of the Zettler Rifle Club, held at their headquarters, 219 Bowery, on Tuesday evening, March 22, the following excellent scores were made on the 25-ring target, possible 250 points, off-hand:

G Nowak	247	M Dorrier	244	F Schmidt	239
B Walther	247	Dr J A Boyken	243	H F Hecking	237
L Flach	245	G W Plaisted	243	M Tropp	235
H Holges	244	C Percival	242	F Lindkloster	233
C G Zettler	245	M B Engel	240	F Fabarius	232
F Ross	244	B Zettler	239		

GUS NOWAK, Sec'y.

Cincinnati Rifle Shots.

THE regular shoot of the Cincinnati Rifle Association was held on its range to-day. The weather conditions were not favorable for good shooting owing to bad light and unsteady wind. Conditions 200yds. off-hand at the standard American target:

Gindele	82	79	79	Wellinger	83	76	77	Zelger	66	65	69
Nieman	76	75	74	Payne	82	75	74	Speth	70	70	66
Best	80	75	74	Drube	75	75	74	Stegner	73	74	71
Louis	75	67	63	Weinheimer	82	77	75	Simon	86	70	69

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

March 31.—Auburn Gun Club, grand blue rock tournament at Auburn, N. Y.

April 1.—Crescent Gun Club monthly shoot, at Dexter Park, Long Island.

April 2.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

April 2.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

April 2.—John Erb's Old Stone House grounds, five bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J.

April 2.—Sweepstake shooting at Watson's Park, Burnside, Ill.

April 2.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

April 2.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

April 2.—Verona Rod and Gun Club, Pittsburgh, Pa.

April 5.—Saratoga Gun Club and Eastern New York League tournament, at Saratoga Springs, N. Y. Kingbirds.

April 6.—Union Gun Club, fourth monthly prize shoot and open tournament at Springfield, N. J.

April 7.—C. Detlefsen vs. C. E. Morris, at Woodlawn Park, Long Island; 100 birds for $150 a side. Return match at West End, Coney Island, April 21.

April 7.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.

April 7-8.—Union Gun Club tournament, at Springfield, Ohio.

April 10.—Lincoln Gun Club, tournament at Alameda Point.

April 12-14.—Staunton Gun Club tournament, assisted by Interstate Manufacturer's and Dealer's Association, Staunton, Va.

DRIVERS AND TWISTERS.

THE Union Gun Club, of Springfield, N. J., will hold its fourth monthly prize shoot and open tournament on Wednesday April 6, and a jolly time is anticipated. The club event is on twenty-five Keystone targets per man, the members being divided into two classes. There are prizes of $15, $10 and $5 contested for by members of A class (90 per cent. men) and $10, $7.50, $5 and $2.50 by members of B class (under 90 per cent.). A gold medal also goes to the shooter making the highest score in each month, this to become the property of the one who succeeds in winning it the most times during the season. Hot luch and coffee will be on hand. The grounds are reached by the D., L. & W. trains, which leave New York at 8:30, 10:10, 11:10 A. M., and 2:30 P. M. Hacks meet all trains at Millburn and carry all shooters direct to the shooting grounds. Beside the club shoot, a regular programme of seven events are to be shot, and everybody who likes target shooting is cordially invited to attend.

New Jersey Trap Shooters' League.

IT would be an extremely difficult matter to find a more congenial party or one with more overflowing jollity and good nature than the one which congregated on the grounds of the Passaic City Rod and Gun Club, at Passaic, N. J., on Friday last. It was the second of the series of team champ onship contests of the New Jersey Trap Shooters' League which drew the party together, and it was the hospitality and good management of the members of the Passaic Citys, as well as a spirit of good fellowship, which kept the party together until darkness precluded any possibility of seeing a bluerock target whizzing through the air. The day was a perfect one in every respect, the sun shining bright and clear and the air being soft and balmy as on an April day. There was just a suspicion of a breeze, just enough in fact during the earlier hours to clear away the smoke from the guns. After 2 o'clock the wind strengthened somewhat, but at no time was it strong enough to seriously affect the flight of the targets.

The shooting house of the Passaic City Rod and Gun Club is situate on a rise of ground about ten minutes ride by stage from Passaic proper, the ground sloping gradually downward toward the traps. The shooting house is a fair-sized one, with a single room, the secretary's office being separate from the main building. On Friday a big marquee was pitched alongside the shooting house, and here a caterer was established with an abundant supply of temperance cordials, sandwiches, clam chowder and coffee, all of which received proper attention from the shooters. The shooting was done under the 5-trap rapid-firing system, bluerock targets and traps being used, and the traps being pulled by aid of Paul North's famous electric trap pull.

The shooting was done from a platform, fifty feet long and twelve feet wide. The back of this platform was about a foot above the ground, but owing to the slope of the earth the front was several feet above *terra firma*. The traps, too, had to be raised, the shields being fully eight feet high. Further down the hillside, and about 60yds. distant, was a scragly growth of timber, but so rapid was the pitch of the ground that the targets went above the line of these, thus giving a clear foreground. I have attended trap tournaments by the score in the days gone by and have seen some fine handling of traps and targets, but I can recall no instance in which traps have worked more perfectly or targets flown better than on this occasion. Somewhere about 6,000 bluerock targets were thrown in all, but I doubt if more than twenty-five were broken by the traps, The North electric pull worked perfectly, and after carefully noting its working I am fain to believe that the old obsolete style of rope and handle trap-pull has seen its best days and will soon be relegated to oblivion.

The writer reached the grounds about 11 o'clock, having traveled from Newark in a side-bar buggy behind Maud Q, W. Fred Quimby's pet roadster, the genial Fred bimself bandling the ribbons. At the time of our arrival a goodly party was already at work smashing targets in accordance with the conditions of a regular programme arranged by the Passaic C'tys. Busily moving here and there, getting things in readiness for the team shoot announced to begin at noon was "Little" Neaf Apgar, the energetic and efficient manager of the New Jersey League, and who is known all over the country as a hustler, whether it be in shooting at birds or inanimates, in managing a shoot, or in booming trade for Henry C. Squires. Another flitter about was Wm. H. Hobart, the League's rustling secretary and treasurer, another rattling good target smasher and manager and Von Lengerke & Detmold's right bower at tournaments. There was also six-foot-two J. L. Smith, from Hackettstown, N. J., who is an adept at either bird or target shooting as well as in loading the Smith cartridge. Of the local club there were President Abbett and Messrs. Campbell, Shaw, Coeman, Wise, Evans, Gaston and Palmer, all of whom were kept busy receiving the visitors and obliging them to feel at home. Gus Freche, the Newark Gun Club man, spent an hour on the grounds, but was obliged to leave without trying his luck on the traps.

Some time before noon a stage, on the side of which was the legend "The Shooters of Newark," reached the ground, bearing E. D. Miller, the Springfield expert, who looks after the Eastern interests of the Standard Keystone Co.; Ferd Van Dyke, manager of Von Lengerke & Detmold's Newark store, and one of Jersey's most expert shooters; Carl von Lengerke, of Newark; Thos. Brantingham, "Tee Kay" Keller, of the U. S. C. Co., Charles ("Dutchy") Smith, of Plainfield; C. M. Hedden and W. G. Hollis, of Newark; Chas. Dean, of Maplewood; S. S. Hedden, of East Orange, and J. Warren Smith, of Orange. Later came a big truck bearing the members of the East Side-Mutual Gun Club, of Newark. The next arrivals were the members of the Boiling Springs Fish and Gun Club, of Rutherford, piloted by Paul Jeannerett. Then came the Brunswick Gun Cluo, of New Brunswick; the Woodside and Southside gun clubs, of Newark; Maplewood Gun Club, East Orange Gun Club and the New Jersey Shooting Club, of Claremont. The Passaic Citys and Independents, of Plainfield, were already on the grounds primed for hot work. Al. Heritage ("Old South Paw"), of Jersey, was on hand talking up his big tournament, to be held at Marion; W. Fred Quimby was booming bluerock targets and Smith guns, and everybody else had some pet schema to boom.

The big team shoot had 10 entries, each team being comprised of 10 men and the conditions calling for 25 targets per man. This was started at the appointed hour and proved to be a rattling contest throughout. As in the February contest held on the Woodside grounds in Newark, the Independent Gun Club, of Plainfield, went to the front with a rush, breaking 112 out of its 125 targets. The scores showed a 24, two 23s, a 22 and a 20, this shooting being even enough to win in almost any company. The South Side Gun Club of Newark came to second position with 105 breaks, although its team held the tail-end position in February. During the team contest the duties of referee were performed by Jacob Pentz and Al. Heritage, C. H. Townsend, of FOREST AND STREAM, and Frank Mason being impressed as scorers. The scoring was made easy with the aid of one of the Keystone Company's excellently arranged manifold tournament and club score books, which admits of the making of five copies at one impression of a pencil.

And anent this question I would suggest to the New Jersey Trap-Shooters League in particular, and to all clubs in general, that they would incur the everlasting gratitude of newspaper correspondents if they would use one of the above books for all their shooting and have them manipulated by men who can get good impressions of the scorers. Newspaper men are notoriously the best-natured and most obliging people in existance (!) and are willing at all times to help along the good cause. So far as matches, either by individuals or teams, are concerned they are willing, in fact anxious, to do the scoring, but it should not be left for them to score an entire day's work in the way of sweepstakes. At Passaic the management used carbon and manifold in a few of the sweepstake events, but the duplicates in some cases could not be deciphered and the scribes were obliged to borrow the original sheets and make copies for themselves. In future the League should use a book and make copies enough to supply the correspondents of the sporting press. We are willing to help you out by scoring for you, brothers of the League, but don't compel us to sit down after the day's work is ended and copy all the scores. Let the League superintend the scoring of all events and save us trouble.

Previous to the team contest a half dozen sweepstakes were shot, these being regular programme events. Below are the scores in detail:

Nos. 1 to 4, 10 birds each, $1 entry, three moneys:

By this time all the teams were eager for the real business of the day, and they at once proceeded to work. The men shot in squads of 6, which took one full team and one man from another team in each squad. The shooting was very rapid from start to finish not a protest was made against the referee's or scorer's work. Below are full details of this important event:

Koegel	1010101111111111011101111—20— 92

The above shooting concluded, the programme events were again taken up and the traps were again kept busy. Had the League used two instead of one set of 5 traps, there is no doubt but nearly 10,000 targets would have been thrown, as everybody was full of shoot and had plenty of ammunition. It is hoped that in future contests the League will give the boys an abundant opportunity to exercise themselves. The management of this affair was of the most satisfactory character throughout, not a "kick" or growl being heard from start to finish.

Below are detailed scores of the programme events which closed this pleasant meeting.

Nos. 7 and 8 same as previous events: No. 9, 15 singles, $1.25 entry, four moneys:

	No. 7.	No. 8.	No. 9.

Lake Ontario Gun Club Tournament.

IRONDEQUOIT, March 23.—At the spring tournament of the Lake Ontario Gun Club, held at the Forest House to-day, the following scores were shot. The day was dark and the smoke hung over the traps all the morning, and of course every one prayed for a breeze. We got it. The wind came from the west, blowing directly from the shooter to the traps; and it did blow. It knocked down every bird thrown and snap shooting was in order, birds hardly showing over the screen, but traveling about 50yds. before striking the ground. The shooting was at U. S. pigeons, thrown from the U. S. Pigeon Co.'s new traps, rapid-firing system, 5 traps, American Association rules, all ties div., 4 moneys.

No. 1, 10 birds, entrance 25 cents:

C S Smith	7	Newton	9
J C Aman	4	Evershed	8
McVean	5	Stewart	8
Walzer	4		
Babcock	8
St. John	8
Foreman	7

No. 2, 10 birds, entrance 25 cents:

McVean	6	Schulte	9
Evershed	7	Aman	6
Newton	6	Stewart	9
Walzer	5		
Smith	7
St. John	7
Foreman	5

No. 3, 15 birds, entrance 50 cents:

Newton	011111111111011—13
Walzer	001100011011001— 7
Evershed	111111101111111—13

D. A. FOREMAN, Sec'y.

St. Patrick's Day Shoot at Pittsburgh, Pa.

Editor Forest and Stream:

Messrs. Elmer E. Shaner, "Jim Crow" and "Old Hoss" deserve credit for the manner in which they conducted the live bird shoot of the Pittsburgh Gun Club on St. Patrick's Day, March 17. The match was advertised to start at 1 P. M., and at that time fifty-two entries had been taken and the management refused to take twelve or fifteen more entries, as it would have been impossible to finish before darkness had any more been taken. The match was shot in a blinding snowstorm. Among the contestants from a distance was W. Fred Quimby, of New York, who was passing through on his way home from Chicago. Fred says it is wonderful how shooters turn out for a match at Pittsburg. Following is the score:

Ten live birds, entrance $6:

"Old Hoss"	2010211201— 7	Lemon	2112202122— 9
Arden	0221202211— 8	McCready	0110112020— 6

Rox.

Programmes of the tournament to be held by the Staunton (Va.) Gun Club, assisted by the Inte-State Manufacturers' and Dealers' Association, on April 12, 13 and 14, may be procured from W. H. Fowle, secretary, Staunton, Va.

* * *

Decoration Day will be celebrated at Canajoharie, N. Y., with a grand tournament, kingbirds to be the targets. T. C. Peguim will give any information required.

* * *

Leander Campbell, of Little Silver, N. J., and Daniel Terry, of Plainfield, had a little race at 50 artificial targets each, for $50 a side, at Red Bank, on March 23, Campbell breaking 31 to Terry's 26.

* * *

During the 20 bird sweep at John Erb's on Thursday, some of the contestants expressed a wish for a longer race to take place on the same grounds some time during April. A little canvassing revealed the fact that a match at 50 live birds per man, $50 entry, with the pot divided on the basis of one money for every four men was about what was wanted. The following named shooters have promised to enter: W. S. Cannon, C. M. Hedden and Harry E. Smith, of Newark; Capt. Cranmer, of Jersey City; Allen Willy, of Hartford; Ed Collins, of West Hoboken; M. F. Lindsley, of Hoboken; John Riggott, of Rockaway; E. D. Miller, of Springfield; J. Frank Kleinz and Richard Irwin, of Philadelphia. It is also probable that R. Roberts, A. Rust, J. Rothaker, W. Greenwood, W. H. Wolstencroft, A. Sheets, Prof. Meach and J. Rothacker, all well known Pennsylvania shooters; Samuel Castle and Gus Freche, of Newark; W. G. Hollis, of Kearney; Charles Smith, of Springfield, and others will enter the list. The date has not been definitely settled upon, but it will be shot either on April 25, 26 or 27. The exact date will be announced in these columns next week.

* * *

FOREST AND STREAM acknowledges the receipt of one of the famous tournament and club score books published by the Keystone Manufacturing Company. This book is a decided boon to club secretaries and scorers, and particularly to those who appreciate the benefits to be derived from placing their club scores before the public. Each page contains spaces for eighteen scores of 25 shots each, and by the insertion of carbon paper between the leaves, one impression gives the scorer a copy of the score and also makes four manifold duplicates. One of these handy books should be in the possession of every club in the country, as the price is a mere bagatelle and the book will last a year or more. They may be procured from the Standard Keystone Company, New London, Conn,

* * *

The April shoot of the New Jersey Trap-Shooters' League will be held at New Brunswick, under the auspices of the Brunswick Gun Club. The date has not yet been fixed. The league should on this occasion use two sets of traps, reserving one for the team shoot while the boys are blowing in their ducats in sweepstake shooting at the other set. They should also engage a competent scorer to make manifold copies of the scores in all events.

* * *

May 17, 18 and 19 are the dates chosen for a grand tournament at Indianapolis. For programme, etc., address Chas. Polster, 149 Indiana avenue, Indianapolis, Ind.

* * *

The Wayne Gun Club, of Philadelphia, held its annual meeting on March 12, the following officers being elected for the ensuing year: President, A. Ulary; Vice-President, Thos. Scargle; Secretary, E. Hansberry; Treasurer, H. Kane; Corresponding Secretary, P. F. Yost; Field Captain, F. Hessler; Trustees—W. Ulary, J. Side, Thos. Scargle. The club will hold a big shoot on their grounds at Sixteenth and Cayuga streets on April 9, for members only, when they will contest for a gold and a silver badge, also merchandise prizes. A great interest is being manifested among the members in revolver shooting, and it is likely that a revolver team will be organized during the coming season.

* * *

The Brunswick Gun Club have decided on Good Friday, April 15, as the day to hold the third shoot of the N. J. Trap-Shooters League.

* * *

A Connecticut paper says: "The Manufacturers' and Dealers' tournament at Baltimore was not a success. The first day saw only thirty men at the score, and noon of the second day a heavy storm came up and the tournament was declared off."

* * *

At the Baltimore tournament referred to above the entries in the ten events on the first day were as follows, in order: 29, 33, 33, 31, 37, 31, 38, 22, 39, 25; total, 318; average for each event 31 8/10. On this day the surplus was something above $340; of this 55 per cent. was added to the purses and 45 per cent. was paid out for averages in the three classes. The above bare facts will go a considerable way toward disproving the claim of failure.

* * *

C. Detlefsen, of the Coney Island Rod and Gun Club, and C. E. Morris, president of the Atlantic Rod and gun Club, of Coney Island, will shoot a match at 100 live birds each, at Woodlawn Park, Long Island, $150 a side and the birds, 30yds. rise, 80yds. boundary, play or pay, unofficial Burlingham rules. C. W. Wingert, of the Fountain Gun Club, is stakeholder. A return match under the same conditions will be shot off at the West End grounds, Coney Island, on April 21. The betting is about even, both men being the crack shots of their respective clubs.

* * *

The Saratoga Gun Club is out with an attractive programme for the tournament of the Eastern New York Trap League, to be held at Saratoga on April 5. The big event of the day will be the contest for teams of four men from any club in the above League, each man to shoot at 21 singles and 6 pairs of kingbirds, the entrance fee being $4 per team. The programme also shows five 10-bird and four 15-bird events, the entry fee being $1 and $1 50.

C. H. TOWNSEND.

Loads and Guns.

NEW YORK, March 29.—*Editor Forest and Stream:* "Fairplay" in your issue of March 10 criticises Mr. Fulford for shooting 5½ drams of wood powder in a 7lb. 15oz. gun, with the result of losing his match with Mr. Budd, and cutting his cheek and fingers to pieces, so that arnica and court plaster had to be liberally applied.

Mr. Fulford no doubt made a mistake and may see the errors of his ways by this time. He will find that he cannot make water run up hill and that it is dangerous to recklessly play and experiment with buzz saws and powders without advice from men who have been through the mills before him. Mr. Fulford will come around all right; he is a grand shot and properly equipped a foe worthy of any man's steel. According to "Fairplay" one would judge that for a proper equipment belongs a 10lb. 10 bore cannon. To this I wish to take exceptions, as it brings us back ten years or more to the reign of black powder, and a handful of it in now practically obsolete guns. All this has changed and science has taken the place of weight and quantity. Nitro powders are used by all leading men, and when black powders are used at all they are used in finer grains and smaller loads. Heavy weight guns are not needed to give best results for field or trap work. The heavy 10-bores if not ungentlemanly are out of date, like muzzle-loaders and other sundries.

Men like Mr. Fulford, who insist upon shooting or can be induced to shoot unreasonable quantities of powder and handicapping their work thereby as well as bruising and crippling themselves, are happily an exception. The experience of the best authorities in the world on such matters has proved beyond a doubt that moderate charges of the standard nitro powders, properly loaded, give the best all-around results, and moderate charges can be used in comparatively light guns without punishment to the shooter. To back up my assertion, I need only point to the official reports of the FOREST AND STREAM'S late gun and ammunition trials, where a 12-bore Francotte gun, weighing less than 6lbs., made the highest percentage of pattern, and though shot with only 2⅝drs. of Schultze powder, on a most unfavorable day, the official report says that "with No. 8 shot at 40yds. the penetration was above the average of a dozen previous guns;" that the penetration at 60yds. deserved comment for the well-sustained average.

If "Fairplay" wants more proof that light guns do not necessarily mean bruised cheeks, black-and-b ue shoulders and cut fingers, and yet give good results, I would like to mention the fact that during the third day of the last big Wellington tournament, with a list of over 50 entries, the highest average, 94 per cent., was made with a 25in. barrel, 5¼lb., 12-bore Francotte gun, loaded with less than 2¾drs. of E. C. powder, and no bruises for the shooter. Of course I do not wish to be understood as recommending such a feather-weight gun and light load as an ideal trap gun and load, but only wish to show that light guns are not necessarily coupled with a bruised shooter and ineffective work, only a little knowledge and science has to be taken into account to load nitro powder to best advantage.

Three to 3¼drs. of best nitro powder in a 7 to 7½lb., 12-bore gun of modern make and boring will be found sufficient to successfully do all work for field traps and most fowl shooting under the most trying conditions.

By the way, we heard nothing about the crippled condition of Mr. Budd, who used enough Schultze powder to do the work cleanly and successfully, yet we are officially informed that he never used over 3½drs. of any nitro powders, and that his gun weighed 7lbs. 10oz. "Fairplay" no doubt will be able to reform Mr. Fulford, but he will never be able to revive 10lb. cannon, shot-guns for ordinary field and trap-shooting.

As to handicapping the 10-gauge guns 2yds., I think it is perfectly proper on principle. In most European countries they are not allowed for trap-shooting at all. Many clubs here allow nothing larger than 12-bore. Everything being equal, a 4-gauge will outshoot a 10-gauge, and a 10-gauge should outshoot a 12-gauge on this principle; but as individual guns differ there are many 12-bores which will beat a major.ty of 10-bores.

JUSTUS VON LENGERKE.

An Al Bandle Memorial.

CINCINNATI, March 26, *Editor Forest and Stream:* The friends of the late Al Bandle, the well known Cincinnati pigeon shot, who had a national reputation, have prepared a neat artistic cabinet-size memorial photograph representing the united Ohio, Indiana and Kentucky sportsmen floral p'ece, on one side of which is represented an elegant likeness of the genial champion. The intention is to erect a monument to Al's memory, and the proceeds of the sale (at 25 cents each) of the memorial will be so applied. It is the design of "Wick" (W. E. Limberg) his life long friend, and gun and kennel editor of the Cincinnati *Commercial Gazette.* The pituree can be secured by applying or addressing the Bandle Arms Co. of Cincinnati, O.

North Side Tournament.

THE North Side Gun Club held an interesting tournament at the Queen's County Driving Park, Long Island, on Tuesday and Wednesday of last week. The first day was devoted to Keystone targets, of which about 1,700 were thrown. The day was a fairly good one for outdoor sports, but still the attendance was very light, in fact none of the events had more than twelve entries, and of these seven were out-of-town shooters. Taking into consideration the number of target shooters on Long Island, at least fifty entries should be expected at an affair run on their native heath. Among the contestants were T. H. Keller, of Plainfield, the "Tee Kay" of the U. S. C. Co.; W. R. Hobart, of Newark, representing Von Lengerke & Detmold; Neaf Apgar, of Plainfield, representing H. C. Squires; Eucch D. Miller, of Springfield, representing the Keystone Target and Trap Co.; Eddy Collins, of Hoboken, representing the W. Fred Quimby Co.; A. C. Hunt, of New York; Dr. Metcalf, Samuel Lyon and Hugh Knebel, Jr., of Brooklyn. The management of the affair was under the direct charge of Samuel Lyon, who is president of the club, and a veteran in handling tournaments. Everything about the shooting house was in first-class order, and the club members exerted themselves to make the visitors feel at home. Jacob Pentz acted as referee and Frank Mason was official scorer. The full programme of ten events was shot off, as were four extra events, the last three of the latter being under the expert-amateur rules. Below are details of the day's work. Entry to 10-bird races $1, 15 birds $1.50, 20 birds $2:

FOG FOR THE CLOSING DAY.

Wednesday broke with most abominable weather conditions. All night the rain had been coming down in torrents and there was but little let up to the down-pour until about 10 o'clock. Along toward noon a heavy fog settled down over the shooting grounds, making it imperatively necessary to put in a quick first on a bird that was inclined to keep its tail toward the shooter. Twenty yards beyond the traps nothing could be seen but fog. The birds, as might be expected, were slow to rise and lazy on the wing. Only five shooters were on the ground before dinner, but after this had been dispensed with the number was doubled. Among the shooters were Mr. and Mrs. M. F. Lindsley, of Hoboken; F. G. Moore, of the New Jersey Shooting Club, "Dick" Pfister, of Brooklyn; Cord., C. M. and Chas. Meyer, and A. E. Mead, of Knoxville, Tenn. The opening shoot was at 5 birds per man, $5 entry, 25 and 27yds. rise, 2 moneys:

C M Meyer	22201—4	Chas Meyer	21122—5
J Tiernan	11212—4	F G Moore	11221—5
A E Mead	02111—4		

Dinner came next, and then followed the appended events, the first being at 10 live birds, 10 entry, 25 and 27yds. rise, this being a record breaker, as the scores show.

The next was at twelve live birds, $12 entry, three moneys, 28 and 30yds. rise:

Tiernan	101111122— 9
Cord Meyer	1121111112—10
Lindsley	1122222222—10
Mead	1221122121—10
Ch Meyer	2111122121—10
C M Meyer	1112111111—10
Moore	2121221220— 9
Phister	1211221212—10
"Wanda"	

In the first event third money was added to the first.

Miss and out, $1 entry:

Tiernan	1122112212	Moore	2211121112
Cord Meyer	22120	"Ell See"	2121221121
Lindsley	20	Mencke	220
Mead	2111120	Lyon	0
C M Meyer	2210	Manning	1122222020
Ch Meyer	0		

At this stage the birds were almost gone and Tiernan and Ell See divided the pot.

C. H. T.

Before the Trap at Maple Bay.

SYRACUSE, N. Y., March 24.—The Onondaga Sportsmen's Association held an interesting series of shoots here yesterday, the weather conditions being fair and the attendance likewise. Rochester, Auburn, Fulton, Homer, Cortland and other places were represented. The details of the shoot are here given, 10 singles, unknown angles, entrance 75 cents:

Rochester Rod and Gun Club.

ROCHESTER, N. Y., March 22.—I inclose herewith the result of our semi-weekly practice shoot of last Saturday. The attendance was good considering the weather, which was not very inviting, and some good scores were made as the results will show. All of the practice was under American Association rules, rapid-firing system, 5 traps, 18yds., Peoria blackbird targets:

Wyandottes vs. Easton.

SOUTH BETHLEHEM, Pa., March 25.—The Wyandotte Gun Club, of this place, attended a live bird shoot at Easton to-day. The principal feature of the shoot was a match for $50 a side between four of the Wyandotte Gun Club against five of the crack shots of Easton, 10 birds, Hurlingham rules, and losers pay for birds. The day being favorable there was a large attendance of members of various clubs and spectators. The most objectionable feature to the shooters was that owing to the location of the grounds they were compelled to face the sun, which was shining bright and powerful. The birds were a fair lot, and when on the wing were unusually swift and strong. The Easton men were beaten hopelessly at the end of the ninth round and decided to quit:

J. C.

South Sides, of South Norwalk.

SOUTH NORWALK, Conn., March 27.—Regular shoot of the South Side Gun Club sweeps, 25 cents entrance, 3 moneys in all events, Keystone targets, rapid-firing system, 10 birds in each event.

No. 1: J. Coleman 9, E. H. Fox 9, Hendrie 9, Seymour 8, Drake 7, Lewis 7 Fielder 8, Kelly (not in sweep) 8.

No. 2: Coleman 6, Seymour 10, Rockwell 7, Lewis 7, Drake 8, Hendrie 7 Fox 9, Stevens 5, Rockwell 6.

No. 3: Coleman 5, Seymour 7, Rockwell 6, Lewis 7, Drake 7 Hendrie 10, Fox 9, Stevers 5.

No. 4: Coleman 7, Seymour 7, Rockwell 6, Lewis 7, Drake 7, Hendrie 10, Fox 9, Stevens 4, Rockwell 8.

No. 5: Coleman 6, Seymour 6, Craw 8, Hendrie 9, Hardy 2, Kelly 7, Fox 8, Northrup 9, Fielder 5.

No. 6 and last sweep: Coleman 7, Seymour 8, Craw 8, Hendrie 9, Kelly 8, Fox 8, Northrup 8. Ties miss and out, won by Northrup with 5 straight breaks; Coleman all alone with 7 for third place.

We expect to send one or two strong teams to represent this city in next State shoot, to be held at Hartford April 15, and hope to be assigned Decoration Day, May 30 next, for shoot following that to be held at Hartford. We have some "hustlers" in our "rank and file," and can give all who visit us then, or any other time, not only a hearty and fraternal welcome, but a right good time.

E. H. F.

CHICAGO TRAPS.

CHICAGO, Ill., March 24.—There has come to light a rather sad piece of news this week. Roll Organ has gone into politics and is running for Alderman in "der tirty-fort ward, see?" Last night Mr. Organ incidentally remarked that he intended to go to Europe this fall, from which it would appear that he is aware of the gravity of the aldermanic situation here. The election is not yet. If Mr. Organ wins, it will be Mr. R. B. Organ running; if he is defeated, it will be Mr. R. B. Wadsworth. He will have a shotgun ballot.

Mr. A. M. Hofmann, who has been laid up for a week or more, is still unable to be about, and a couple of interesting races he had scheduled for this week are off.

There was a faint sort of $5,000 ripple passed across here this week in the form of a good, old-fashioned $5,000 a side challenge from Jack Brewer to Charlie Budd. Nobody gasped a great deal, all being used to these things. Yesterday a telegram was received from Mr. Budd which said: "Will shoot no more matches for 60 days." A great deal can be said in 60 days by patient effort.

The following card has been received from Jack Winston, the "N. O. Meade" who so signally defeated George Kleinman here:

COVINGTON, Ky., March 19.—What a world of fun you all have been having. And I missed it all. Congratulate you and the boys of "Chicago and the West." I have always said that 85 of your best was pretty fair. Why, oh! why, did you not add the Cap'n (?) scalp? A lost opportunity. Is that safe door so easy on trigger at all times? Methinks I remember it as having a 5(000)lb. pull. My kindest to all. Yours sincerely, JACK.

Last week, I believe, I mentioned that Mr. Fulford had gone East. His start was delayed, and I hear now that he goes tomorrow, Friday. Within the week Mr. Fulford is to be married, at Utica, N. Y.

Day before yesterday Mr. Fulford shot at 50 practice birds, scoring 37. Yesterday he shot at 50, and scored 45. He has changed the cast-off in his gun stock, and thinks he will recover some of his former speed. In form, he says he can kill 95 of the hardest of the pigeons here. He did not think, to the extent of $100, that he could pick 100 of the easiest birds out of a lot of 500 at Watson's Park, to-day, and kill 90 of them.

Last week, in the course of a general talk, Mr. J. L. Wilcox and a Mr. Watson were speaking of Mr. Fulford's shooting, and a match was arranged by which Mr. Wilcox backed Mr. W. P. Mussey to beat Mr. Fulford, at 100 birds, $125 a side, Friday next. Articles were drawn by which should either shooter fail to appear, the whole amount of the wager was to be forfeited, this in view of recent numerous matches which had not materialized. Mr. Fulford agreed to shoot the match, but on Tuesday handed Mr. Mussey a written statement declining to shoot, "for several reasons." The reasons he did not state. Mr. Mussey had ordered the birds at the park, and had called off his races with Mr. Hofmann, which might otherwise have been postponed. Mr. Fulford yesterday declined to shoot a match with Roll Organ, and, as stated earlier, has forfeited to Rolla Heikes. He tells me that no match was concluded between him and George Kleinman, though George challenged him to shoot. Mr. Fulford has, however, challenged Jim Elliott for his cup, and this match will probably be shot at Kansas City about the middle of April.

Dick Turtle challenged Mr. Fulford also, for a race at 50 hens, not pigeons, but hens, plain cooking hens right off South Water street. These hens were to be placed on a storebox, not an automatic King storebox, just a plain pine storebox, at 50yds. Using any gun or load he liked, Mr. Fulford was to fire at these, paying a dollar for each he missed killing, and receiving a dollar for each he killed. The match was not concluded. This is a trick match, and a bad one to go against, as any shooter might learn. Mr. Turtle did not mean that Mr. Fulford could not hit the hens on the box, but that he could not kill them outright. These hens are possibly not as hard as Eastern hens, either. Evidently Mr. Fulford grows cautious as to his ability to shoot. Well, now, he's going back East for a little while, and will be near the St. Lawrence River. Why would it not be a good plan for him to see if he can't shoot the rapids, you know? That's easy.

"You fellows have got the laugh on me," said Mr. Fulford to a lot of us last night, "and I don't blame you for having a little fun out of it. That's all right. I'm going to let you alone now, this spring, but in the fall I will be back somewhere nearer my old form, and then I will go after a lot of you. I will file a bond of $1,000 to shoot half a dozen matches here next fall."

At this expression of willingness to book a few attractions there was a general willingness on the part of the attractions. At his request there were written down in his notebook the names of a few of those who would be willing to shoot with him. These he arranged in order and announced his schedule to be as follows: 1, W. P. Mussey, 100 birds, $150; 2, J. L. Wilcox, 100 birds, $150; 3, R. B. Organ, 100 birds, $150; 4, Geo. Hofmann, 100 birds, $100; 5, George Kleinman, 100 birds, $200; 6, Frank Parmalee, of Omaha, 100 birds for a hundred; 7, Jack Winston, of St. Louis, 100 birds, $200; 8, J. E. Haggerty, of St. Louis, 100 birds, $200; 9, J. A. R. Elliott, of Kansas City, three races of 100 birds each at $333.33 each; 10, C. W. Budd, same races as Elliott's, three for $1,000; 11, A. J. Atwater, of Chicago, 100 birds, $150; 12, Rolla Heikes, 100 birds, $150.

"I will file a bond of $1,000 to-morrow to bind any or all of these races, to be shot here in the months of October, November and December, 1892."

It is probable that Mr. Fulford's shooting will have improved materially by next fall, but it is also likely that some or all of these men will be waiting for him when he gets ready. Mr. Fulford is a picturesque challenger, but I fear that this last gem of his is injured in an artistic sense by too much of what the artists call a *pleine aire* effect.

In short, we have become used to Mr. Fulford out here, and he now comes around where the boys are, and we all sit around and talk and bluff, and challenge, and have a good time, just as shooters always will. He's a Chicago man now.

The name of the private gun club mentioned last week as organized by Mr. Thorne, of Montgomery Ward & Co., is the Kenwood Gun Club. It is now incorported under the laws of the State of Illinois. The membership is 15, the officers and members being as follows: Geo. R. Thorne, President; Wallace L. DeWolf, Vice-President; Clement L. Eaton, Secretary; Dr. H. Frothingham, Treasurer; John E. Cornell, Benj. F. Cummins, Reuben H. Donnelly, Edward S. Frasher, John S. Frasher, Wm. R. Gwinn, Ernest C. Johnson, Edward W. McClellan, Wm. C. Thorne, Sidney F. Underwood, Chas. C. Whiteacre.

The above is probably exclusive information, but comes too late to be added to the list of Chicago clubs published this week. New organizations constantly spring up in so large a place in these days of growing interest in trap matters.

March 25.—Yesterday Mr. R. S. Cox and Mr. H. B. Foss shot a 50-bird match, and Mr. Foss didn't win. It has to be sort of reasoned out, for this is the first match Mr. Cox ever won. He is after Jim Wilcox and Percy Stone again to-day, and is plucky enough to make some more of them keep thinking. "I ascribe the unforeseen result of to-day's match," said Mr. Cox, "to the unusual preponderance in my favor of a line of coarse, fat, two-for-a-quartering pheasants. At these I am simply hot tamales, with horseradish on the side."

Mr. Fulford yesterday shot at 50 more practice birds, and this time scored 46, losing one just over the line which was found to be hit with 13 pellets of shot. These last two practice scores, 45 and 46, make the best shooting he has done since he came here. I hope he will rally fully, and could come pretty nearly hoping that he will yet be able to beat some of his numerous challengers or challengees. He is wise, however, not to shoot any more matches this spring. This bracing lake breeze has not yet fully permeated his entire system. After a while, if he stays around here, he will be all right. Fine air here.

I notice that in the issue of March 24, Mr. Townsend in his clever column of "Drivers and Twisters," takes me to task for the assertion that "it is the strength and speed of a bird, not its course, that makes it hard," and concludes that the course of the bird should come first in consideration and before its strength and speed. There is, of course, much justice in this also, as there was in the original statement, though I imagine that neither is absolutely correct, as each bird must be a law unto itself and may instance several combinations. In the case of a twisting bird, the course is naturally the main thing, for you are obliged to hit the bird before you can kill it, be it weak or strong. Yet I should rather shoot at a soft trailer than at a good screaming bird that went to either quarter, came in, or towered, because such a bird as the latter might be shot nearly to pieces and still lug over. Instance, Mr. Fulford's bird of Thursday, which I mentioned as hit with 13 pellets. Of these, 3 pellets went through the wings and 10 through the body, yet the bird went over. It was its strength which did that. The character of the wind has much to do with shooting, and we may say the "strength and speed" of the birds depend much on the wind, as equally strong birds may make very different shooting on different days. Often a bird killed stone dead will skate across the line on the wind. Often, too, when there is little wind, you may see a gallant bird, hit hard and full with both barrels, struggle on and in some way get over the boundary, no matter what the direction may be.

Thus we come down to the case of the shield which had two sides, of different colors. Perhaps also we may arrive at the general legal maxim that in any divorce suit both parties are usually to blame. I shall be hard to persuade, however, that divorce is contemplated between New York and Chicago. I am disposed to think shooting and shooters are much the same in one city as in the other, that good birds are about the same in both places, and that the methods of the best shooters are about the same. As to the shooters themselves, God bless their irascible hearts! they are much the same the world over, full of fancy, spleen and readiness for a row on general principles, yet lovable, as any man must be who has something of the boy left in him yet.

Arrive we now again and again at another interesting fact, *videlicet*, the rapid progress of FOREST AND STREAM in shooting matters. I do not remember to have seen a journal advance in any department so rapidly as has FOREST AND STREAM in trap matters within the last three months. Ideas and enterprise will continue to do their work. I consider the New York columns of FOREST AND STREAM to show the best shooting news service that goes out of any city in the United States. Much of this is due directly to Mr. Townsend, and for this there are many Western men, myself one, who would like to thank him very sincerely.

March 27.—The most amusing typographical error I remember ever to have seen occurred in my trap communication of last week. In this I am made to say, "it seems to me that the blower of the effete East, grafted upon the wild and wooly stem of the exuberant West, ought to make a good combination." This is pretty good, though I am afraid about 10,000 men will take that as a personal allusion. What I meant to say was the "*flower* of the effete East," etc., etc., which would much improve the metaphor at least, if it didn't the accuracy of the remark. One must, I presume, get used to seeing his grammar and spelling knocked out by the types, but this felonius assault upon my personal rhetoric has resulted, it seems to me, in something which comes mighty near being funny. E. HOUGH.

Trap at Watson's Park.

BURNSIDE, Ill., March 24.—The following is the score made by Geo. Burns vs. H. Bee, 50 select live pigeons each, $50 a side and cost of birds, American Association rules:

George Burns	1012222221112120211—18	
	2200222120022012212—15	
	2222102110	—8—41
H Bee	2212202220010212120—15	
	1112012021102320211—15	
	0210111111	—8—38

Same day, sweep at 5 live pigeons, entrance $3, div. 60 and 40 per cent., A. A. rules:

W P Mussey	12002	Thos Denver	12122—5
Ben Dicks	12222—5	Doc Malcolm	02000—1
Harvey Bee	12000—2	Will	20011—3
F L Ford	10222—4	A J Atwater	21222—5
Geo Burns	20221—4		

Shot for birds:

G Burns	0001011211202211—10	Ben Dicks	1112102101110000—10
H Bee	2200001110120000— 7	T Denver	0201012201202220— 9
W P Mussey	2222222221201111—14		RAVELRIGG.

Eddy Collins Scoops the Cash.

THE unusual scarcity of live pigeons caused a change in the programme at John Erb's "Old Stone House" grounds in Newark, N. J., last Thursday. As previously announced in these columns a twenty-five bird sweep was to be shot on that day and a big crowd was expected. Erb however had been unable to secure as many birds as he desired, so the event was cut down to twenty birds per man, the entry fee being $20, this inclucing the birds. The day was a splendid one in every respect, the air being soft and balmy and the sun clear. Among the prominent shooters who were on hand ready to test one another's skill were Wm. S. Canon, the one-armed expert of Newark; J. Frank Kleinz, Richard Irwin and R. "Roberts," of Philadelphia; Allen Willey, the man who wields the editorial pen on the Hartford, (Conn.) *Globe*; M. F. Lindsley and Eddy Collins of Hoboken; Captain Wm. Craemer of Jersey City; Samuel Castle, E. Francis and Charles M. Hedden of Newark; Enoch W. Miller of Springfield, and Wm. G. Hollis of Kearney. Among the spectators were J. Cockefair of Bloomfield; John Riggott of Rockaway; Robert Baar of the East Side-Mutual Gun Club; Gottfried Snellen, Andrew Walters and Fred C. Dietz of the Essex Amateur Rifle Club. John Erb acted as referee while C. H. Townsend and Frank Mason alternated as official scorers. The result of the work is shown in the order in which the men shot:

Smith	01111021111212111211—18	Miller	10111210110111211112—17
Willey	20222211112111011122—18	Kleinz	10212202110121102111—16
Lindsley	22222012002022222222—16	Castle	11221210111111111121—19
Collins	22122221221212212222—20	Hollis	22220111111101221121—18
Roberts	11120212211211111122—19	Francis	11122211110211101123—18
Canon	11221112222212121210—19	Hedden	10021120117201102120—14
Craemer	01101112121201211222—17	Freche	12002121200121121121—16
Irwin	10022211011112222222—17		

First post was worth $90; second was $67.50; third, $45, and fourth, $22.50.

Long Island Clubs are Busy.

DEXTER PARK, March 22.—A dozen members of the Jeannette Gun Club had an outing here to-day. Only match and sweepstake shoots took place. The weather was fine and the birds good but the snow badly interfered with the shooters. Under the circumstances the shooting of A. J. Christian, secretary of the club, was very good, he winning second prize in the first sweep and first in the second.

The first event was a team match, five on a side, for a dinner, 10 birds per man. C. Brunie's side won by the following score:

C Brunie	0021211012—7	H Otten	1021101021—7
H Hoops	2030010020—3	H W Cordts	0020200200—3
R Buese	0111101000—5	W Bunger	1110010111—7
J H Kroger	1112101110—8	E Dish	0101000100—3
C Mohrmann	1111011101—8—31	J Voght	0220110100—5—25

Two sweepstake shoots, 5 birds each, $1 entry, 25yds. rise, two prizes in each. Score:

	No. 1.	No. 2.	
C Brunie	10011—3	20110—3	
J H Kroger	22122—5	00111—3	
J Voght	21012—4	01001—2	
C Mohrmann	02111—4	20221—4	
H Hoops	11002—3	21000—2	Ties.
H Otten		11121—5	21221
A J Christian	10111—4	12212—5	21110

WOODLAWN PARK, March 23.—The regular monthly shoot of the Erie Gun Club was held to-day in very disagreeable weather; a dense fog at times interfered with the shooters in using the second barrel. The birds were a good lot, and most of the members shot well. C. Detlefsen, C. Plate, C. Mohrman, H. Dohrman and W. Scheelje were the most effective.

Regular monthly shoot, 7 birds, modified Hurlingham rules:

D Lynch	0022020—3	C Mohrman	1212222—7
M Hayden	1121020—5	H Jankowsky	0221112—6
F Gref	2122020—4	W Scheelje	2111212—7
C Detlefsen	2211111—6	J Plate	0011022—4
H Dohrman	2221022—6	W Thompson	1200110—4
C Plate	1112112—7	J Still	1100210—4

The shoot-offs for the ties were hotly contested, the one for second being particularly so, H. Dohrman being compelled to kill 13 straight before forcing C. Detlefsen out of the race. The club badge and first money were secured by C. Mohrman, while fourth went to J. Plate; Hayden won third in the shoot.

At the February shoot there were not enough birds to shoot off ties for the club medal and money prizes and these were decided to-day, the result being as follows:

Tie for medal and first prize:

J Plate	1002112	D J Lynch	100001
H Dohrman	1002210	W Hartje	1001

Tie for second prize:

M Hayden	2221	C Plate	2110
C Mohrman	1112	F Gref	1110
C Detlefsen	2211	J Still	1120

The three first named divided on the fourth round.

DEXTER PARK, March 23.—The First German Gun Club of New York held its first shoot of the year at Dexter Park to-day, followed by a dinner. The birds were good lively flyers, but the fog interfered with the shooters. H. Miller, G. Grau and F. Pfaender shot well. The two first shot off the tie for medal and Grau won. Pfaender having previously won it, was not eligible to compete, so he took the $15 consolation prize. The conditions were ten live birds per man, handicap rises:

H Miller	1101222122—9	P Neusch	0212120121—8
F Pfaender	1110111211—9	F Schell	0100121212—7
H Restedt	0010110111—6	F Wannemacher	1212110201—8
F Breitestein	1100111101—7	A Stolzenberger	1002110211—7
G Grau	1112221210—9	F Schiller	2002210111—7
C Pfaff	1000111010—5	H Zahn	0211110211—8
J Schwaack	1122010202—7	W Joost	0011020022—5
A Goetz	1222000202—6	A Neusch	1101000202—5

Referee, Mr. H. Zahn. Scorer, Mr. F. Pfaender.

Dexter Park, March 24.—The monthly shoot of the Emerald Gun Club, Dr. V. G. Hudson's pet aggregation, took place here to-day, twenty-seven men taking turns in the attempt to grass ten live pigeons each. The weather was fine, the birds very good and the medal contest a sharp one. The conditions call for the gun being held below the elbow until the bird is on the wing. Dr. Hudson, the club's efficient president, won the first-class medal and the second medal was secured by H. Thau. The first class men shoot at 28 and 30yds, second class at rises under 28yds.

G Nowak (28)	2102100000—4	M Quinn (21)	0210020021—5
J Maesel (28)	2o22102001—6	Dr Leveridge (28)	1000200012—5

Dr Allen (28)	0001100001—3		

Referee, Mr. G. Nowak.

West End, Coney Island, March 24.—The Atlantic Rod and Gun Club's semi-monthly shoot, for the Newton diamond badge and four cash prizes, took place to-day with very fine weather conditions and good birds. C. Furgussen, Jr., is becoming a fine single barrel shot; although he did not win the medal he beat C. E. Morris on the sweepstake shoot. C. Furgussen's son, only nine years old, is becoming almost as proficient as his father with his little 16-bore gun. D. Deacon won the medal at his initial shoot with the club. The scores:

K F Sutherland	2112221010— 8	C E Morris	o2212221122— 9
T F Buckley	1000202121— 6	H Balzer	1211111222—10
A Boyle	0111200202— 6	G Kleist	2101100211— 7
D Monsees	1220100022— 6	D Deacon	1212112111—10
C Furgussen, Jr	1101112110— 8	R J Sutherland	1212200001— 6
D C Bennett	1112210101— 8	W Weber	0212122201— 8
J B Voorhees	1220211222— 9	W Gilman	0221121000— 5

On shoot-off, Deacon first, Voorhees second, Sutherland third.

Dexter Park, March 25.—Linden Grove Gun Club's regular monthly shoot for club medal, 7 birds each:

J Schliemann	2111112—7	L Neid	1021112—6
P J Eppig	0020120—3	F Frank	0012201—4
J Cunningham	1011210—5	F Voehringer	0022100—3
J Link	1221102—6	C Bermel	0200011—3
C Horney	0020212—5	F Ibert	1110211—6
A Eppig	1211102—6	J Eppig, Jr	0102201—4

Two sweepstake shoots, 10 bluerocks, 50 cents entrance, three prizes:

	No. 1.	No. 2.
J P Eppig	0110111110— 8	1110001110— 6
J Cunningham	0000111010— 5	0000101001— 4
T Eich	0001011000— 3

Dexter Park, March 25.—The return match between John Schliemann and F. Ibert, of the Coney Island Rod and Gun Club, vs. P. J. Eppig, president of the Linden Grove Gun Club, and C. Englebrecht, of the Glenmore Rod and Gun Club, was shot off at Dexter Park to-day. The match was under the same conditions as the previous one, which resulted in a tie on 70 kills each out of 100. The conditions were: Each man to shoot at 50 birds, 25yds. rise, modified Hurlingham rules, for $100 a side and the birds, the losers to pay the expenses of both shoots. The birds were a fast lot and the weather delightful, with just enough wind to carry some of the birds outside of the boundary line. C. Englebrecht and J. Schliemann started off well, but on the second round of 25 both fell off, and their partners, P. J. Eppig and Frank Ibert, picked up and made a good finish, which was very exciting, Englebrecht having to kill the last bird to tie, and that dropped just inside of the boundary line. Scores:

Algonquin beats Union Hill.

NEW YORK, March 25.—A very interesting return match at live birds took place on Thursday, March 24 between teams of the Algonquin Gun Club, of New York, and the Union Hill Gun Club, of New Jersey. The conditions were 10 men each club, 10 birds per man, 10-bore guns, 27yds. rise, 12-bore, 25yds. rise. Shoot took place at Monitor Park, Weehawken, N. J., Algonquins winning again by 69 to 66. In the first match the scores were Algonquin 74, Union Hill 69.

Algonquins.		Union Hill.	
Louis Brenner	8	John Mehl, Jr	8
Mathew Cox	4	Ad Johnson	8

Boston Shooting Association.

WELLINGTON, Mass., March 26.—There was a larger attendance than usual at the regular weekly shoot of the Boston Shooting Association this afternoon. The weather conditions were favorable for the sport and several good scores were made, both in the merchandise and sweepstake matches.

Merchandise scores at five singles and five pairs: Class A, Bond 21, Perry 19, Cowee 18, Sanborn 16. Class B, Stone 22, Warren 21, Climax and Bradstreet 19, Curtis 18, Daniels 17, Gore and Gale 16. Class C, Snow 23, Hardy 17, Peabody 15, Coughlin and Phillips 13, Winn 11.

Wyandotte Teams.

SOUTH BETHLEHEM, Pa. March 22.—Matches between Wyandotte Gun Club teams, at 8 and 10 live birds per man, $10 a side, losers to pay all expenses:

J P McFadden	21011021—6	H M Michail	21120122—7
H C Bachman	12112111—8—14	J Bender	00202000—2— 9

J P McFadden	12012010111—7—15	W H Gasener	22112022211—9—16

Shotgun at Walnut Hill.

WALNUT HILL, Mass., March 23.—A year ago the Shooting and Fishing Publishing Co. offered a handsome silver pitcher as a trophy to be competed for by the gun clubs of America, with a view of settling the much disputed question as to which club is entitled to claim the championship in trap-shooting. In addition to the massive pitcher emblematic of the championship, twelve silver tankards were offered, to be awarded to the team winning at each of the monthly competitions. The result of to-day's shooting settles the championship question very conclusively, and eleven of the twelve smaller cups have been credited to the Walnut Hill marksmen—for the team from this club has been beaten but once, and that by but a narrow margin. The weather conditions at to-day's meeting were anything but encouraging, and the attendance was small for this reason, but the champion team reported promptly for duty, and complained of nothing except the failure to appear on the part of their opponents. The scores below tell the story of the day's work. Mr. Bowker's 27 is very creditable, when the unfavorable weather is taken into consideration.

Team championship.—For the Shooting and Fishing trophy, teams of 5 from any organized gun club in America, 20 singles and 5 pairs per man, 12th and final competition:

	M. R. A. Team.	
S Bowker	11101111111111111111—19	10 11 11 11 10—8
W W Gale	11101111110011001101—15	10 10 10 11 11—7
J Nichols, Jr	01001101001101111111—12	10 00 10 00 01—3
O D Black, Capt	10110101111000111011—13	11 11 11 11 01—9
W C Leroy	11011111111011101001—14	11 11 11 11 00—8—108

The main feature of the meeting was, naturally, the team shoot, but a few minor sweepstakes were arranged, in which the winners were as follows:

Ten Keystone targets: Brown 9, first; Bowker 8, second; Gale 7, third.

Six Standard targets: Bowker and Gale 5, first; Denney 3, second.

Three pairs Keystone targets: Harrison and Denney 5, first; Black 4, second.

Ten Keystone targets: Gale and Barlow 8, first; Black and Camp 7, second.

Ten Standard targets: Bowker 9, first; Brown 8, second; Denney 7, third.

Ten Keystone targets: Gale, Bowker and Camp 9, first; Brown 7, second; Bent 4, third.

Ten Keystone targets, three traps: Barlow 10, first; J. Nichols, Jr., 8, second; Black and Wood 6, third.

Five pairs doubles: Brown 8, first; Camp and Barlow 8, second; Gale 7, third.

The series of competitions just closed has established the fact that the home team need fear no rivals. Strong clubs like the late Wellington Club and Worcester team have been met and defeated, and the shotgun men of the Massachusetts Rifle Association are now able to show a piece of plate well worthy of taking a place alongside the great silver trophy won by the riflemen of the association at Creedmoor a few years ago, and at the next dinner of the association the long table will be graced by these emblems of the Massachusetts marksmen's dual supremacy.

Trap at Waverly N. Y.

TEAM match March 26, between Park and VonWolfradt of Athens Pa., and J. W. Adams and Dr. Tucker of Waverly, N. Y. After two ten bird sweeps had been shot, the following scores was made, 50 singles each, kingbirds, rapid firing:

W K Park...11111111111111111111111111111111111111101111111011101—47
V'Wolfradt..10000111010111011111110011111110111110100160111111—35—82
J W Adams..11011111111111111100111111010011111010111010010111—37
Dr Tucker...11110101100101011111111111111111111111111111111111—41—78

Park used S. S. powder and the others black. The day was warm and pleasant and ten bird sweeps followed till dark.

K. BIRD.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

L., Washington.—The after mast where more than three are carried is called the jigger or spanker mast, the former term being commonly applied to the fourth mast in four-masted vessels. We believe that the terms used in five-masted vessels are jigger and spanker for fourth and fifth respectively.

W. F., Wilmington, Del.—Much depends on the type of yacht and her intended use. For racing on a centerboard sloop the single jib will be faster, but the double headsails will be better for general use, and from their convenience and adaptability to changes may be more desirable even in a racing yacht.

YACHTSMAN, New York.—There is no recognized standard of shape for yachts' flags, but the best usage is the pointed burgee for the club signal and the square or oblong for the officers' pennants and also for the private signal. The swallowtail is much used for both, but the plain oblong flag is more shipshape.

B. M., New York.—"Frazer's Practical Boat Sailing" will give you the desired information. When sailing to windward "close-hauled," or "beating," the boom is hauled nearly fore and aft; when sailing before the wind, or "running," the boom is nearly at right angles with the keel. In "reaching," or sailing with the wind on the beam, or forward or abaft it, but neither free nor "closehauled," the boom is trimmed to an intermediate position over the boat's quarter.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

To Lease.

Moose, Caribou, 10 lb. Trout,

IN THE

Grande Batiscan Tract.

To lease for a term of years to an individual or a club, a tract of land in Canada, 86 miles from Quebec, or 22 hours from New York City without change of cars.

This tract is 30 miles long and 25 miles wide, and contains 480,000 acres of land. It is covered with green forest and entirely without settlers. The tract contains more than one hundred lakes, besides innumerable rivers and streams. These waters abound in speckled trout which run up to 10lbs. in weight. An acount of a day's fishing in Lake Batiscan, published in FOREST AND STREAM March 15, 1888, says: "Fifteen of the large ones weighed 85lbs., or an average weight of 5¾lbs. each, all being speckled trout, beautiful in shape and color." Mr. Dumais, in his report to the Canadian Commission of Crown Lands, dated Feb. 15, 1892, says: "We have seen ourselves in 1874 thirty-two of these splendid fish taken in a couple of hours, weight quite near 300lbs." The landlocked salmon, plentiful in the waters of Lake St. John, could easily be planted in these waters if desired.

Besides abounding in fishing waters, this tract is rich in game and fur. Moose, caribou and black bear are abundant, and there are beaver, otter and fisher.

The scenery is extremely grand. Quite a full description of the angling capabilities of the region is given in FOREST AND STREAM of March 15, 1888.

The Quebec & Lake St. John Railway runs for 12 miles on the border of this tract, and the region is thus very accessible. The ordinary running time from New York is 27 hours, but this includes a delay of 2 hours in Quebec. Special arrangements can be made by which travelers can reach the ground in 22 hours from New York City without change of cars.

Maps, photographs, copies of official reports and the address of the lessee of tract can be had on application to BATISCAN, this office.

For Sale.

ARABS FOR SALE.

Polo Ponies.

THE PEARL, entire, 7 years old, silver gray, under 14.1. This horse is of the highest caste, Aneeza Kbailan. Very quiet both to ride and drive. **Price $500.**

THE GAZELLE, entire, 8 years old, gray, under 14.1. This horse is a well known polo pony, and played in the cavalry tournament at Hurlingham in 1890. He is also quiet in harness and a very fast trotter with fine action; good match to the above. **Price $500.** Both these ponies have been ridden and driven by ladies. Photographs and veterinary surgeon's certificate of soundness can be sent.

EXMOOR, entire, of the pure breed, 12 hands, brown with mealy muzzle, 6 yrs. old. A beautiful pony with long mane and tail. Bred by Sir Thomas Acland, who alone has the poor breed, and on this account extremely valuable to pony breeders. **Price $250.**

The prices include delivery in Liverpool and clothing. Address

A. G. BURCHARDT ASHTON,
Blackerton, Dulverton, England.

COP, 53 W. Van Buren street, Chicago.

The Chubb Eight-Strip Split Bamboo Rods are pronounced by Anglers to be the "King of Rods;" they are unexcelled for quality of material, workmanship, beauty and balance. Printed guarantee goes with each Rod which warrants them for one year. Rods are put up in an elegant case.

Price each, $15.00.

All lengths, weights and styles are described in our New Chubb Catalogue of Fishing Tackle for 1892. The Catalogue also contains elegant Lithographic Plates of Split Bamboo and Lancewood Rods, and over 100 varieties of Artificial Flies in colors, and describes, illustrates and gives prices of Fishing Tackle used by anglers of to-day.

Send 25c. for Catalogue. This may be deducted from first order for goods amounting to One Dollar or more, by enclosing Coupon which accompanies Catalogue.

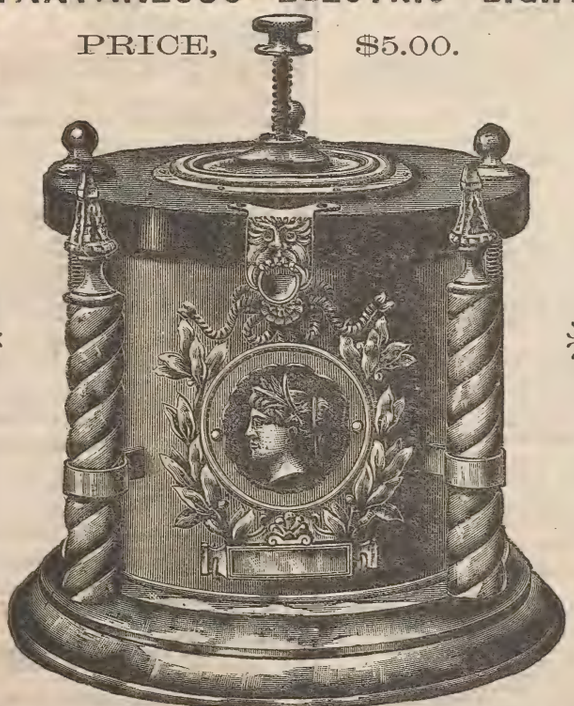
WHY PAY

Exorbitant prices for High Grade Hammerless Shotguns, when the CHARLES DALY HAMMERLESS GUNS can be bought so much cheaper, with superior workmanship, beauty and shooting qualities. Finish and balance equal to that of the best London makers.

WE ARE PREPARED TO TAKE ORDERS FOR

Hand-Loaded Shells.

These are loaded with the greatest care by experts to suit the most exacting sportsman. Price Sheet now ready.



Schoverling, Daly & Gales,

302 BROADWAY, NEW YORK.

INSTANTANEOUS ELECTRIC LIGHTER.

PRICE, $5.00.

FOR PARLOR, DINING ROOM OR CHAMBER.

OFFICE STORE, CIGAR SHOP OR SALOON.

Electricity Generated by Chemical Action. A Handsome Ornament for Table, Mantel or Counter.

THIS illustration represents our **Electric Lighter,** and is one-half its actual size. It is complete in itself—requires no extra Power Wires or Connections. The Current of Electricity is generated by Chemical Action. It occupies the space of but SIX SQUARE INCHES.

The construction is simple in the extreme. It can be taken to pieces at will, and just as easily readjusted. **A CHILD CAN OPERATE IT.** Simply by pressing the Center Rod, the Current of Electricity is generated, and the light is instantaneous.

ECONOMY.

The material to charge the Battery can be obtained at any drug store at a cost of 10 cents, and will run 30 to 60 days. Any part can be replaced at a cost not exceeding 10 cents. Aside from its use as a Lighter, this apparatus does away with the use of matches and the dangerous results and disagreeable odors arising from same. We have taken especial care in the manufacture of these Electric Lighting Batteries, they are handsomely constructed in nickel plate and highly ornamental, and will take a prominent place among the bric-a-brac of Reception Rooms, Parlors, etc.

☞ Full directions and one charge for the Battery accompany each apparatus.
All orders for less than $20.00 must be accompanied by Postal Express Money Order or by Draft on New York. Goods shipped C. O. D. on receipt of Twenty per cent. (Remittances with order save return charges.)

LIBERAL DISCOUNTS TO THE TRADE AND AGENTS.
We desire reliable representatives in every State in the Union, and invite correspondence on the subject.
